

CHEMICAL HYGIENE

OCCUPATIONAL EXPOSURE TO CHEMICALS IN LABORATORIES

Employee training includes:

1. Methods and observations that may be used to detect the presence of release of a hazardous chemical (such as monitoring conducted by the employer, continuous monitoring devices, visual appearance or odor of hazardous chemicals when being releases, etc.)
2. The physical and health hazards of chemicals in the work area
3. The measures employees can take to protect themselves from these hazards; including specific procedures the employer has implemented to protect employees from exposure to hazardous chemicals. Such as appropriate work practices, emergency procedures, and personal protective equipment to be used
4. The employee shall be trained on the applicable details of the University's Chemical Hygiene Plan
