

As part of OSHA respiratory regulations, an annual evaluation of the Respiratory Program must occur. The following questions will provide information to determine the program's effectiveness as well as highlight areas of improvement.

Please make your responses candid and return to Environmental Health Occupational Safety ERC D-102:

yes	no	Do you wear your respirator during operations or in areas which require respiratory protection?
yes	no	Do you feel you have been adequately trained on respirator usage, limitations, cleaning and inspecting?
yes	no	Do you clean and inspect your respirator after each use?
yes	no	Is your respirator stored away from heat, chemicals, or in a way to prevent damage?
yes	no	Did you complete your annual physical prior to your fit test?
yes	no	Does your respirator fit comfortably? If not would you like to be refitted with a different brand or size?
yes	no	Is breathing resistance when wearing a respirator unbearable?
yes	no	Does wearing a respirator cause you to become fatigued quickly?
yes	no	Are you confident that your respirator is providing adequate protection?
yes	no	Does your respirator significantly interfere or restrict motion?
