RATIONALE:

The current structure of the Senate IT Committee, while incorporating faculty voices and representation by one member of the Academic Senate, does not have a relationship that strengthens communication with the Academic Senate or directly support our role in shared campus governance. The current resolution builds upon the existing structure and institutionalizes the relationship between the Academic Senate and the renamed Academic Technology Committee as a Standing committee of the Senate. The resolution adds the expertise of a representative from advising to best serve advising our students through the use of appropriate technologies. It also adds the expertise of the Dean of Graduate Studies, recognizing that graduate programs have distinct needs and students. Further, the resolution includes previously absent representation from the Associated Students Incorporated, and strengthens the recognition and participation in shared governance that should be accorded to ASI.
