

# How to create a digital signature via a text message to a cellphone

Using your laptop/desktop browser, go to <https://na2.documents.adobe.com/account/homeJS> and go through the log in process to sign in to Adobe Sign. This is where your signature will be stored for use across all your devices in all Adobe products.

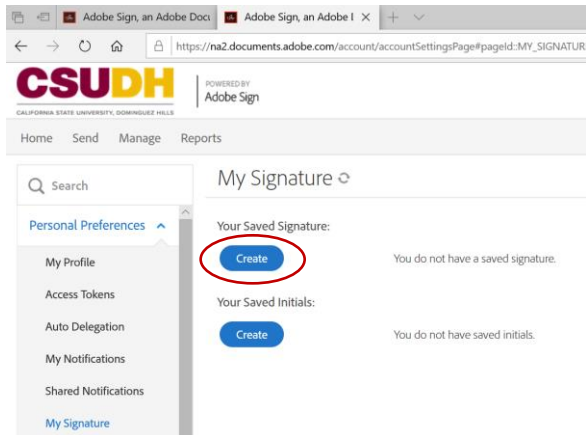

Click on your name on the right side and click on My Profile.

The navigation pane on the left will open. Click on My Signature.

Click on Create.

# How to create a digital signature via a text message to a cellphone

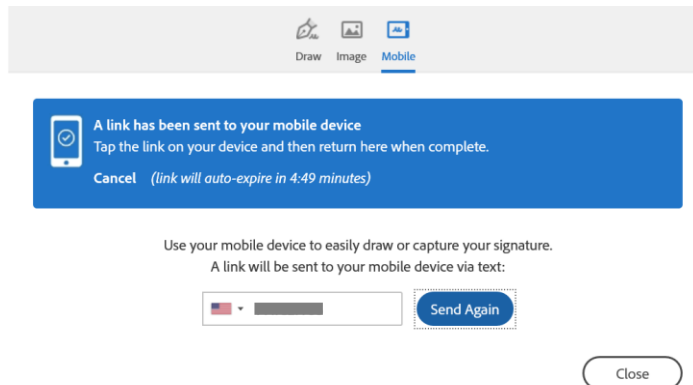

On the popup window, click on Mobile and enter your cellphone number to receive a text and click Send.

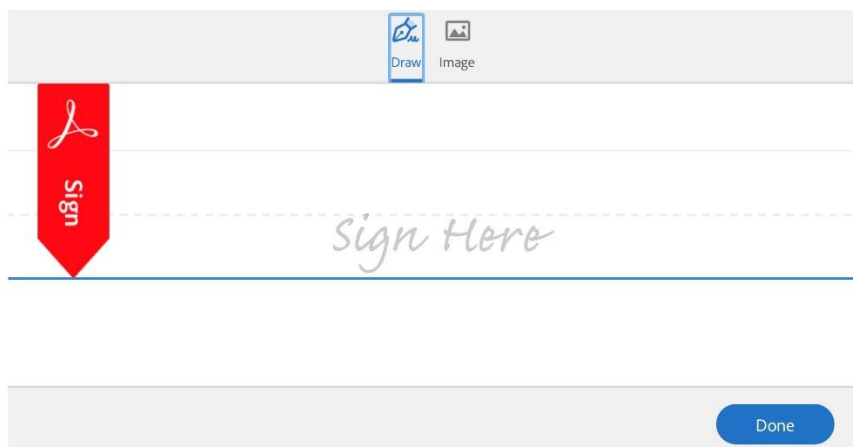

Use your mobile device to easily draw or capture your signature.  
A link will be sent to your mobile device via text:

The popup will show that you should have received a text. Check your cellphone and click the link in the text.

Turn your cellphone sideways and sign with your finger. Clear and repeat until you're happy with your signature. Click Done.

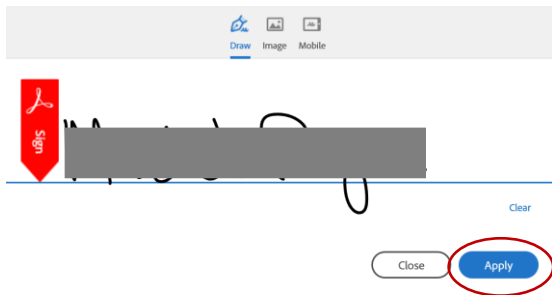

# How to create a digital signature via a text message to a cellphone

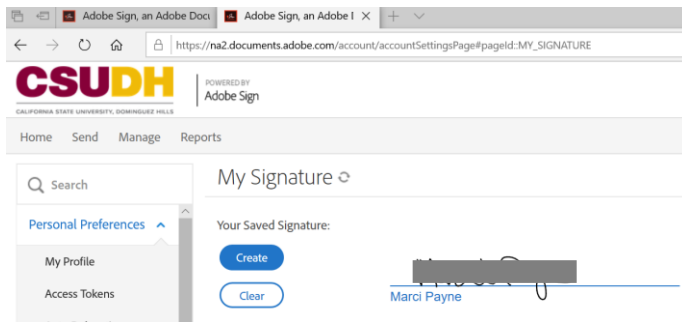

Your cellphone will show you've succeeded in creating your signature.

When you look back on your laptop/desktop browser screen, you will see your signature as you saved it from your cellphone. Click Apply.

Your signature is now saved in your Adobe account for use across all your devices and Adobe products. Close the browser.

It will take a minute or so for your signature to appear in Acrobat DC, but it will come. Once there, you can easily sign invoices with your true, authenticated signature quickly in Acrobat DC.
