Introduction to Data Warehouse

What are some uses of Data Warehouse?

- Projections can be made to predict where a given department/division will end the year
- Expenses can be looked up by account, department, program, or fund
- Department budget balances can be monitored to ensure funds are being used correctly
- Fund balances can be queried to track cash balances
- Data Warehouse is a good resource for researching transactions

Manage My Budget

Here are the main columns that are involved in calculating the available balance:

- Current Budget – includes original & one time budgets
- Actuals – expenses/revenues

Fund Balance Report

Fund Balance

- It allows the user to view the cash balance of the fund, there are no options to bring in department, program or projects. The Fund Balance report is a straightforward report, it has fewer moving pieces than Mange My Budget.
- It should be used as a reference for funds that are for single use (examples Miscellaneous and Trust funds)
