

CSUDH MATH

# BE A MATH MAJOR!!!

## ONE MAJOR, INFINITE POSSIBILITIES

The Department of Mathematics at CSU Dominguez Hills invites students to earn a bachelor's degree in Mathematics, or a bachelor's in Mathematics with an option in Education. We offer an exciting program with internationally recognized faculty who are engaged in cutting-edge research.

*What are the advantages of being a math major at CSUDH?*

**Small and Engaging Classes:** Most classes have 30 or fewer students, and you can expect to be engaged in working closely to learn from faculty and fellow students.

**Career Opportunities:** Mathematics Majors are in high demand! A major in mathematics leads to careers in teaching, government, or industry.

**Research Projects for Undergraduates:** Research experiences for undergraduates are invaluable learning experiences, and department faculty offer a variety of projects.

**Support for Math Students:** The mathematics department prides itself on its support for students and their needs.

- Campus tutoring is available through the Toro Learning and Testing Center and the Alliance for Minority Participation.
- CSI<sup>3</sup> offers many programs to support future math and science teachers. See <https://www.csudh.edu/cise/> for more information.
- Scholarships are awarded annually from the department and the university.
- Many math and math education majors are employed on campus as tutors and supplemental instructors.
- Faculty are friendly and offer personal help and one-on-one advising.

**Two Options, Infinite Possibilities:** We have two options. Students interested in teaching choose the Mathematics Education option, while students interested in graduate school or a career in industry or government choose the math option. Department advisors will meet with you to discuss which option is best for you. See the university catalog for major requirements at <https://catalog.csudh.edu>.
