

MAJOR IN CHEMISTRY!

The Department of Chemistry at CSU Dominguez Hills invites hard-working and enthusiastic students to earn a bachelors degree in Chemistry. Apply online at <http://www.csudh.edu> and click on future students.

Why should you become a Chemistry major at CSU Dominguez Hills?

Small classes, instructor availability, research opportunities, and a student centered friendly environment are just some of the reasons.

Why should you become a Chemistry major?

- Crime Scene Investigation
- Environmental
- Biotechnology
- Pharmacy
- Professional and Graduate School

Career Possibilities:

A Degree in Chemistry with either a B.A. or B.S. will prepare students for graduate work in chemistry, biochemistry or pharmacy; teaching; employment in the chemical industry or government; entry into professional schools such as medicine, graduate, or dentistry; or entry into law school with a view toward specialization in patent or environmental law.

Research:

Get involved in undergraduate research in biochemistry and help elucidate the mechanisms underlying the radiation resistance of some cancer cells. Come and explore theoretical research projects in nanotechnology, random motion in Molecular Motors, or the kinetics of chemical reactions. Learn how to use our high performance parallel computer. Participate in the Synthesis of novel Inorganic chemicals and learn how to handle air sensitive materials using Schlenk lines and glove boxes.

Visit our high performance computer labs.

MAJOR IN CHEMISTRY!

Many of our graduates go on to pursue PhD and MD programs at UCLA, UCSD, Johns-Hopkins, University of Wisconsin, University of Ohio and New York University. Others are now in dental or pharmacy school and still others are working in industry and for the government.

Social:

Our Science Society organization is a Student Affiliate Chapter of the American Chemical Society. It sponsors scientific, educational, professional, and social activities.

What do we have to offer?

The Chemistry Department offers Bachelor of Science or Bachelor of Arts Degrees. The B.A. Degree also has a Biochemistry Option. The Bachelor of Science in Chemistry is ideal

for students who plan to enter graduate programs in chemistry or other closely related sciences. The B.S. program is approved by the American Chemical Society (ACS) and students graduating with this degree will be certified by the Society and will receive a certificate from the ACS. The Bachelor of Arts in Chemistry fulfills the requirements of those students who are pursuing premedical or pre dental programs as well as those who plan to enter fields such as business, environmental or patent law, where a background in chemistry can be of great utility.

Additional Information?

Need more info or want to tell us you're coming? Call Virginia in the Chemistry Department Office (310-243-3376), visit our web site: <http://chemistry.csudh.edu>, or contact our Faculty.

Faculty:

Leonardo Martinez: Physical Chemistry;
leoh@csudh.edu

Lihung "Angel" Pu: Inorganic Chemistry;
lpu@csudh.edu

Noel Sturm: Biochemistry;
noel@chemistry.csudh.edu

Oliver Seely: Physical Chemistry;
oseely@csudh.edu

Sofia Papatheodoro: Organic Chemistry;
sofia@csudh.edu

Tieli "Tilly" Wang: Biochemistry;
