

SUBSTANCE ABUSE RESEARCH TRAINING PROGRAM [SART]

Contact Information:

Raven Bean, MPH
Clinical Research Coordinator
Internal Medicine
SART Program Coordinator
RavenBean@cdrewu.edu

The current Next Generation Substance Abuse Disorders Research Training at Charles R. Drew University (CDU) and UCLA (NGSART-CU) R25 proposal continues to stress the importance of educating researchers at all stages of their career in substance use disorders research, responsible conduct of research, and career advancement with a novel emphasis on community engagement and dissemination.

The Substance Abuse Research Training Program [SART], aims to educate and train the next generation of PIs, MDs, and PhDs on grants pursuing a career as a full-time substance use researcher, and related disorders. These include physician assistants, family practitioners, internists, psychiatrists, and endocrinologists, (PIs); physician assistant sociologists, behavioral health clinicians including social workers, marriage and family therapists, psychologists, and substance-use treatment counselors. The focus is on making a difference in the long run by tackling the problem of substance use and building capacity and diversity for addiction research.

Application:

- Resume & CV
- Letter of Recommendation
- Letter of Interest
- Personal Statement
