

*The RISE Program and Office of Undergraduate Research presents...*

# Dr. David McIver

Malaria Elimination Initiative  
Institute for Global Health Sciences  
University of California, San Francisco

## "Epidemiology in the Field"

**FRI | MAR 11 | 11:30 AM | LSU 323**

Dr. McIver will discuss his career path to date, ranging from a post-doctoral fellowship, working in private industry, and now with a public university. Each of these milestones was an opportunity to use his skills gained through graduate school to pursue different avenues of research. Dr. McIver will give his perspective on the different types of career opportunities that exist for scientists with post-graduate experience.
