

CALIFORNIA STATE UNIVERSITY, DOMINGUEZ HILLS

Thirteenth
Annual

Student Research Day

February 14-15, 2018

Greetings from President Hagan

Welcome to the Thirteenth Annual Student Research Day at CSU Dominguez Hills. This event has become an institution here, showcasing students from across the university and all walks of life, highlighting their scholarship and research in a vast array of disciplines.

Today is the culmination of hours upon hours of hard work, all leading to the results and findings being shown here. From their initial inquiries to their final presentations, students learn a great deal about their subjects and a great deal about themselves. In particular, they learn the value of having a plan and a process to reach the understanding and answers they're seeking. Along the way, they discover the important values of patience and persistence in the successful completion of that plan.

Great researchers are not born; they are made. Therefore, I want to thank all of the faculty mentors, staff, judges and fellow students who have guided and encouraged our student researchers on their important journeys. Your input and feedback have allowed them to shine.

I also encourage everyone — whether you're a presenter or a supporter — to try to visit as many of the presentations as possible. What you will find by doing so is the impressive amount of imagination, discovery, and creativity taking place here at CSU Dominguez Hills. Our university is composed of diverse, multi-talented, multi-faceted, highly engaged students, ready to share their latest discoveries with the world. And today's amazing, high-impact student research showcase offers ample evidence of that!

Sincerely,

Willie J. Hagan, Ph.D.

President

Welcome

Presenters, judges, faculty mentors, and guests:

Welcome to the Thirteenth Annual Student Research Day at California State University, Dominguez Hills!

For several years, Student Research Day has been the flagship research event on the CSUDH campus. This year we received 318 submissions from across the campus. Nearly every department at CSUDH is represented, showing the broad diversity of research, scholarship, and creative activity we have come to enjoy.

One of the main functions of a university is research, and CSUDH students are at the forefront of that work. Whether it is about the natural sciences, the social sciences, the arts and humanities, or any of the many and varied topics that will be discussed today, student researchers at CSUDH define the future by seeking out new knowledge, new ways of looking at the world around us.

The results of all the effort by CSUDH students are not limited to their time on our campus. Through the close relationships they develop with their faculty mentors, students develop skills they will carry with them far beyond CSUDH. Learning how to attack a new problem, or sometimes just learning not to shy away from new situations such as speaking publicly about the work one has done are skills that will make the participants of Student Research Day highly sought after by potential employers and graduate schools.

Today's event is not the end result of all the work done by our students. It is merely the end of the first chapter of the books they will write throughout the course of their lives. Student Research Day is a time to celebrate the results that have been obtained in the laboratory, the wisdom that was gained by bringing new ideas to old problems, by creating a work of art that will live forever. It is a time when the student, who has been the person studying a particular problem night and day for weeks on end, becomes the teacher, and lets us all know what they have learned.

Student Research Day is, of course, about the work done by students. However, the faculty mentor plays an important role that must not be forgotten. Upon entering the university, the student does not yet possess the tools to pursue research, to create something new. Often, even the selection of a research topic is beyond their ability. The faculty mentor's job is twofold. The first part of the job is to educate the student about how to go about research, scholarship, or creative activity. However, that alone is insufficient. The second, and more important job of the faculty mentor is to inspire the student to pursue research — to make it interesting enough that the student will continue the effort long after the class is over, or after the paper is turned in. In this way, faculty pass along their enthusiasm for research, scholarship, and creative activity to the next generation of researchers.

This year, we have received financial support for Student Research Day from Shell, for which we are especially grateful. We have also received water from Boxed Water, whom we would also like to thank. For their support in planning and executing this event, I would like to thank President Willie J. Hagan, Provost Michael Spagna, Dean Dorota Huizinga, Xhercis Méndez, the Office of Graduate Studies and Research, University Ceremonies and Events, the Office of Development, University Communications and Public Affairs, Loker Student Union, the faculty mentors, judges, and session chairs, the student volunteers, and my fellow members of the Planning Committee. I am proud to have worked with all of you these last several months in the planning of this event.

Sincerely,

John Price, Ph.D.
Professor of Physics
Student Research Day Committee Chair

Evening Session: 6:00 pm – 7:00 pm

6:00–6:20 pm **George Lopez, Biology**

Developing a stem cell therapy for Mucopolysaccharidosis type III B using CRISPR/Cas9 technology

Faculty Mentor: Michelina Iacovino, Pediatrics division, Harbor-UCLA

6:20–6:40 pm **Anthony Caballero, Biology**

The effects in an ammonium addition on bacterial succession and the nitrification process in a newly established low complexity (no fish, no plants) aquaponics system

Faculty Mentor: Adriane Jones, Biology

6:40–7:00 pm **Leobardo Corona, Stephanie Perez, Roberto Sandoval, Biology**

Using in situ hybridization and morpholinos to investigate the expression and function of transcription factors, znfx1 and vgl1, in zebrafish embryos

Faculty Mentor: Fang Wang, Biology

Health, Nutrition, and Clinical Sciences I — LSU 324-325

Evening Session: 6:00 pm – 8:50 pm

- 6:00–6:20 pm** **Colleen Curry, Caitlin Allen, Erin Farber, Occupational Therapy**
Transitions into housing: Shifts in time use for formerly homeless veterans
Faculty Mentor: Claudia Peyton, Occupational Therapy
- 6:20–6:40 pm** **Rebecca Moss, Brittany Schornstein, Meenely Nazarian, Occupational Therapy**
Exploring the Perceptions of Fatigue Held by Individuals Living with Multiple Sclerosis: A Phenomenological Approach
Faculty Mentor: Claudia Peyton, Occupational Therapy
- 6:40–7:00 pm** **Joanne Kwak, Lauren Labac, Jennifer McCann, Occupational Therapy**
Young Adult Cancer Survivorship
Faculty Mentor: Claudia Peyton, Occupational Therapy
- 7:00–7:20 pm** **Jamila Dizon, Health Science**
Self-Esteem & Health
Faculty Mentor: Enrique Ortega, Health Science
- 7:20–7:30 pm** **Coffee Break**
- 7:30–7:50 pm** **Elmira Maghen, Monique Le, Jessica Martinez, Occupational Therapy**
Occupational Therapists Supporting Minorities Receiving Care Under Medi-Cal: A Multi-Case Study
Faculty Mentor: Claudia Peyton, Occupational Therapy
- 7:50–8:10 pm** **Lindsey Taylor, Justin Stehr, Ricardo Salazar, Occupational Therapy**
Young Adult Life Choices and Military Service: A Retrospective Study
Faculty Mentor: Claudia Peyton, Occupational Therapy
- 8:10–8:30 pm** **Katherine Simon, Thao Thai, Occupational Therapy**
A Photovoice Study Exploring Falls Among Older Adults
Faculty Mentor: Claudia Peyton, Occupational Therapy
- 8:30–8:50 pm** **Amanda Rogers, Graduate Nursing**
Reducing Door to Balloon Times in STEMI Patients
Faculty Mentor: Lauren Outland, Graduate Nursing

Physical and Mathematical Sciences I — LSU 326-327

Evening Session: 6:00 pm – 8:50 pm

- 6:00–6:20 pm** **Noraim Nunez, Physics**
Analysis of Lambda-Proton Elastic Scattering in CLAS
Faculty Mentor: John Price, Physics
- 6:20–6:40 pm** **Marcos Guillen, Physics**
Simulation of Lambda-Proton Elastic Scattering in CLAS
Faculty Mentor: John Price, Physics
- 6:40–7:00 pm** **Zhayne Tanyag, Clinical Sciences**
Antifreeze Proteins as Nucleants for Thymidine
Faculty Mentor: Sen Wang, Chemistry
- 7:00–7:20 pm** **Justin Hathaway, Chemistry**
Maker's Electrochemistry: Building a Low-Cost Potentiostat for Cyclist Voltammetry

PROGRAM

Welcome

Dr. John Price

Professor of Physics

Director of Undergraduate Research, Scholarship and Creative Activity

Opening Remarks

Dr. Ken O'Donnell

Interim Vice Provost, Academic Affairs

Keynote Speech

Dr. Xhercis Méndez (2008, B.A., Interdisciplinary Studies)

Assistant Professor in Philosophy, African American Studies and African Studies

Michigan State University

Xhercis Méndez received her doctorate from the Philosophy, Interpretation and Culture Program at Binghamton University, along with certificates in Feminist Theory and Latin American and Caribbean Area Studies. As a scholar-activist her research departs from engaged philosophy that centers those bodies systematically devalued, marginalized and targeted for demise. Her work brings together Women of Color and Decolonial Feminisms, Sexuality Studies, and Afro-Latinx/diasporic Religion and Philosophies in order to develop decolonial feminist methodologies, ingredients and tools for the (re)making of social relations, histories, intimacies, normative value systems, and resistant possibilities. She has authored several articles to that end, including but not limited to the following: **“Notes Toward a**

Decolonial Feminist Methodology: The Race/Gender Matrix Revisited” (2015), **“Transcending Dimorphism: Afro-Cuban Ritual Praxis and the Rematerialization of the Body”** (2014), and **“Which Black Lives Matter? Gender, State-Sanctioned Violence, and ‘My Brother’s Keeper’”** (2016) for the *Radical History Review*. She is currently working on her manuscript entitled, *Decolonizing Feminist Methodologies from the Dark Side*. Tied to her research and her experiences as a first generation college graduate, she is committed to diversifying not only academic spaces, but also the processes through which knowledge is produced. Her pedagogical approach includes emphasizing a diversity of thought in the selection of readings, often including non-canonical texts produced by women and communities of color, queer, and gender non-conforming folks of color. She also works to create intellectual spaces where a diversity of experiences can find a voice, experiences largely marginalized within her own educational trajectory. An alumna of CSUDH, she draws upon her experiences as a former McNair scholar and Clark Fellow to mentor and create workshops designed to prepare first-generation students to face the challenges and possibilities of higher education.
