

TAKING A TEST WITH RESPONDUS LOCKDOWN BROWSER

ABOUT LOCKDOWN BROWSER

Some tests in Blackboard may require the use of a special web browser called LockDown Browser. While open, it will prevent the use of other applications. For more information, watch this [short video \(2:24 min\)](#).

LOCKDOWN BROWSER AUTOMATICALLY NAVIGATES TO BLACKBOARD (TORO.CSUDH.EDU) AT CSUDH.

DOWNLOADING AND INSTALLING

Downloading and installing LockDown Browser should take a few minutes. It is available for [macOS and Windows](#). A course using LockDown Browser usually provides the download link to the installer. The download link is also available below.

[Download Respondus LockDown Browser for CSUDH](#)

TAKING A TEST WITH RESPONDUS LOCKDOWN BROWSER

Test 1- Requires Respondus LockDown Browser

1. Close all applications
2. Open Respondus LockDown Browser
3. Log into Blackboard
4. Open the test requiring Respondus LockDown Browser (see example above)
5. Wait for the test to load
6. Save and submit your responses
7. Complete the test

CLOSING LOCKDOWN BROWSER

After successfully submitting a test, close LockDown Browser to resume access to other computer applications.
