Fluid Navigation

June 16, 2022

Presented by Natalie Alarcon

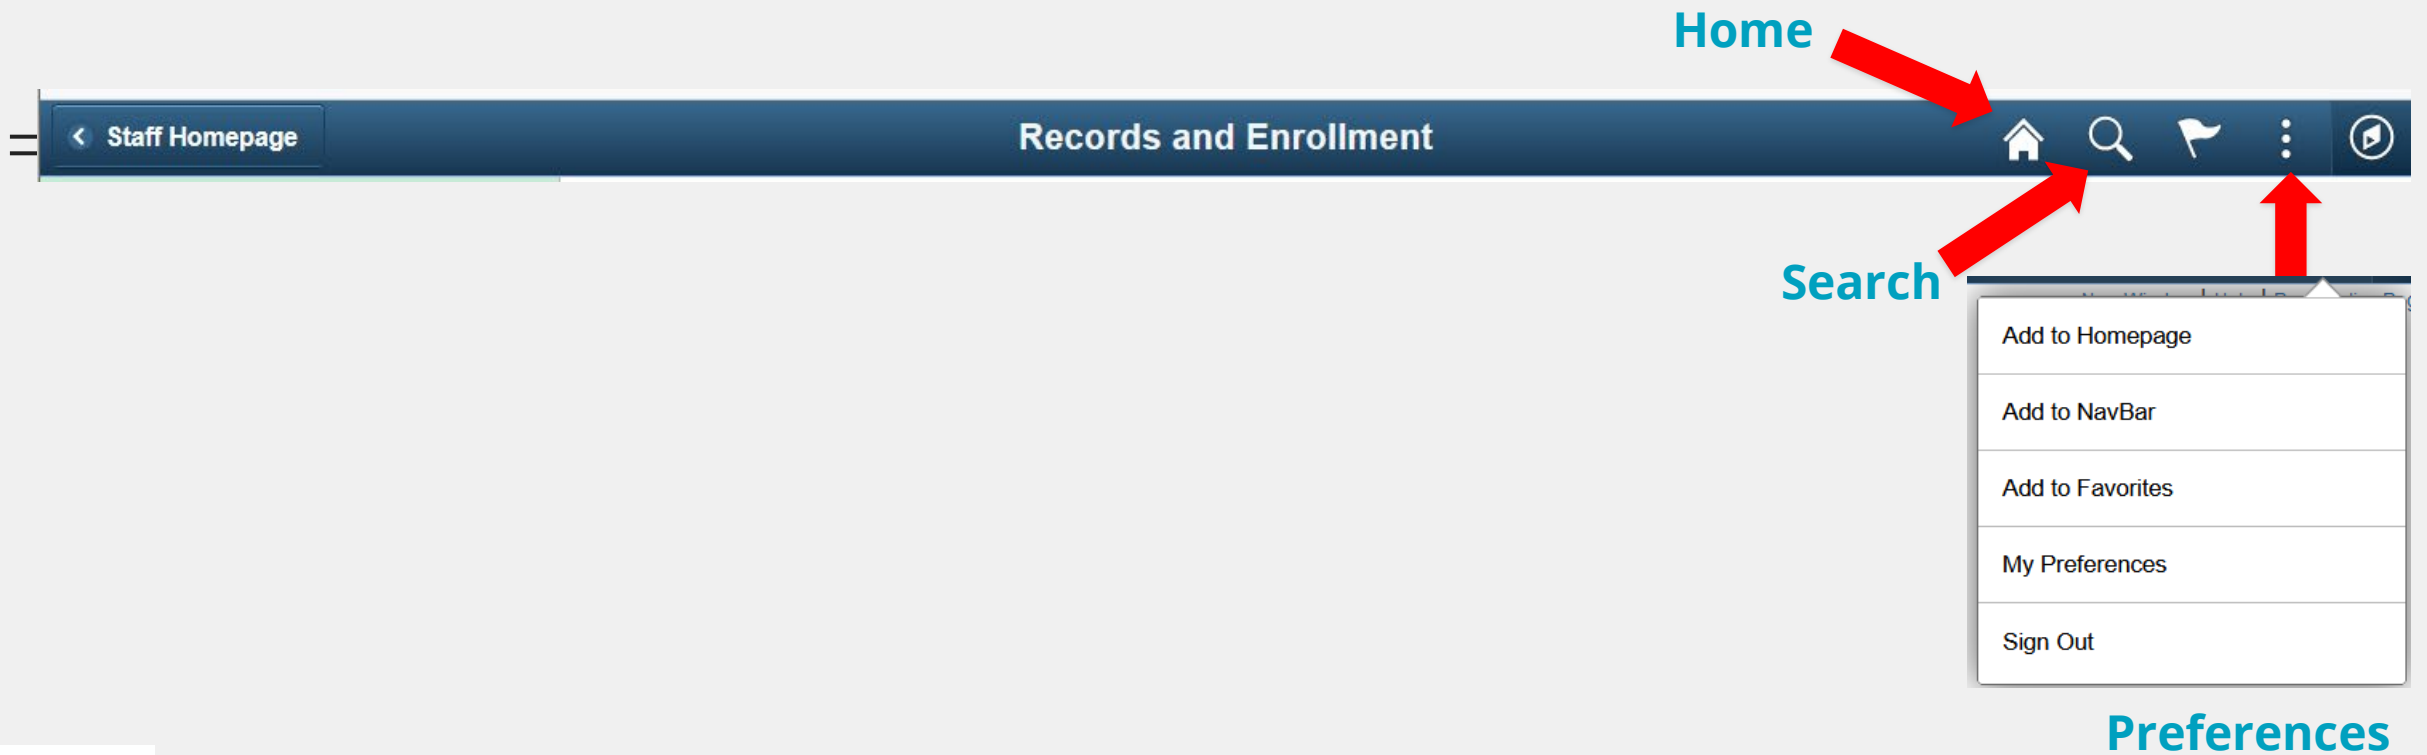

What is FLUID, Why and When?

- FLUID Navigation is a feature in PeopleSoft that **changes the look and feel** of the main home page and the navigation.
- FLUID brings with it a **new, modernized menu** system, making it easier to quickly access your most important processes.
- The Chancellor's Office has led an initiative to deploy this **navigation upgrade** to our Student System (PeopleSoft).
- FLUID is **not impacting components and pages**, although it could in the future.
- FLUID is **not impacting Student or Faculty Self Service** experience, although it could in the future.
- DIT setting this up now; Change will be introduced in the Campus Solutions PeopleTools 8.59 **Upgrade mid-November**.

Fluid Navigation Features

Top Blue Navigation Bar with Home Button, Search, Preferences

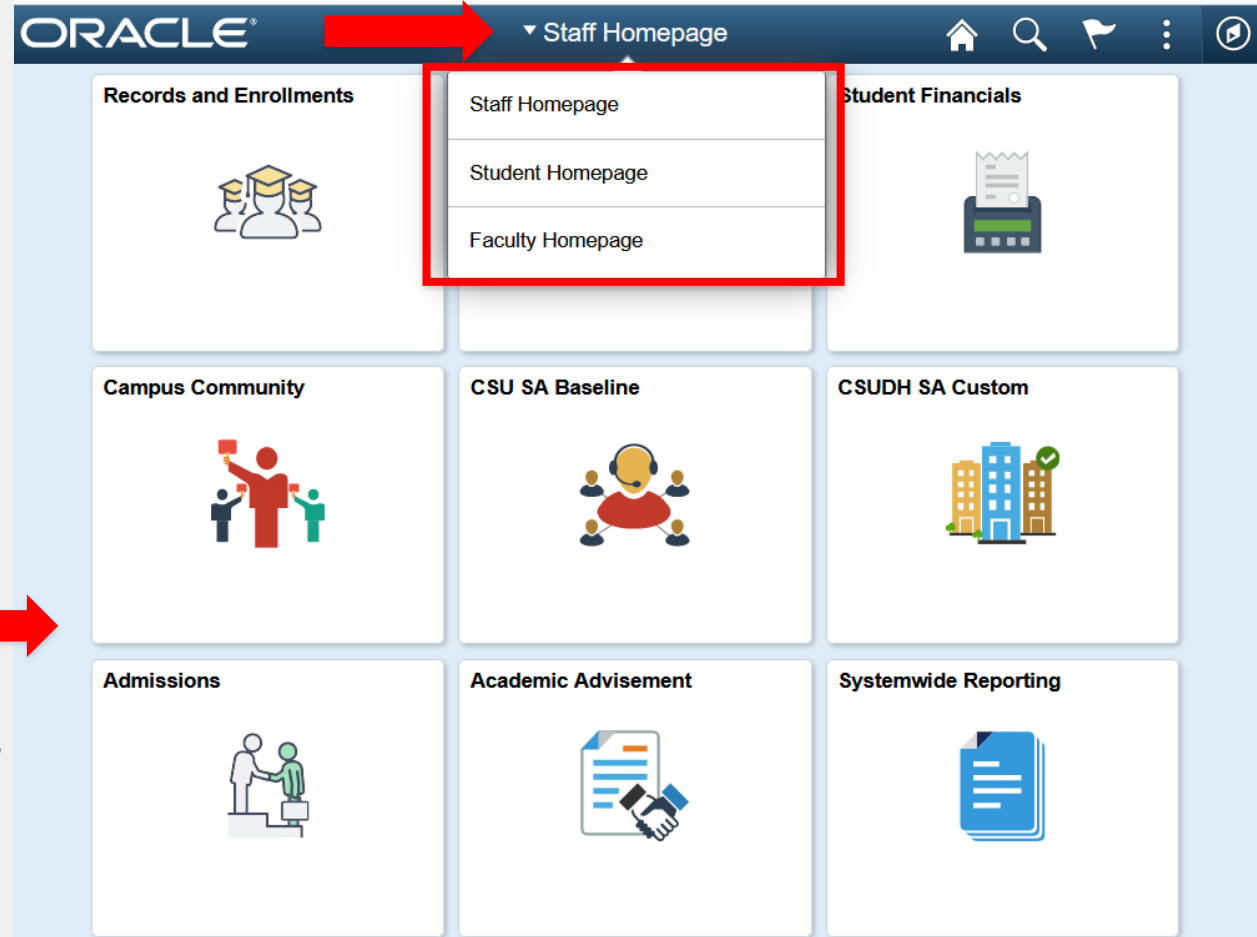

Fluid Navigation Features

Homepages for Staff,
Student, Faculty

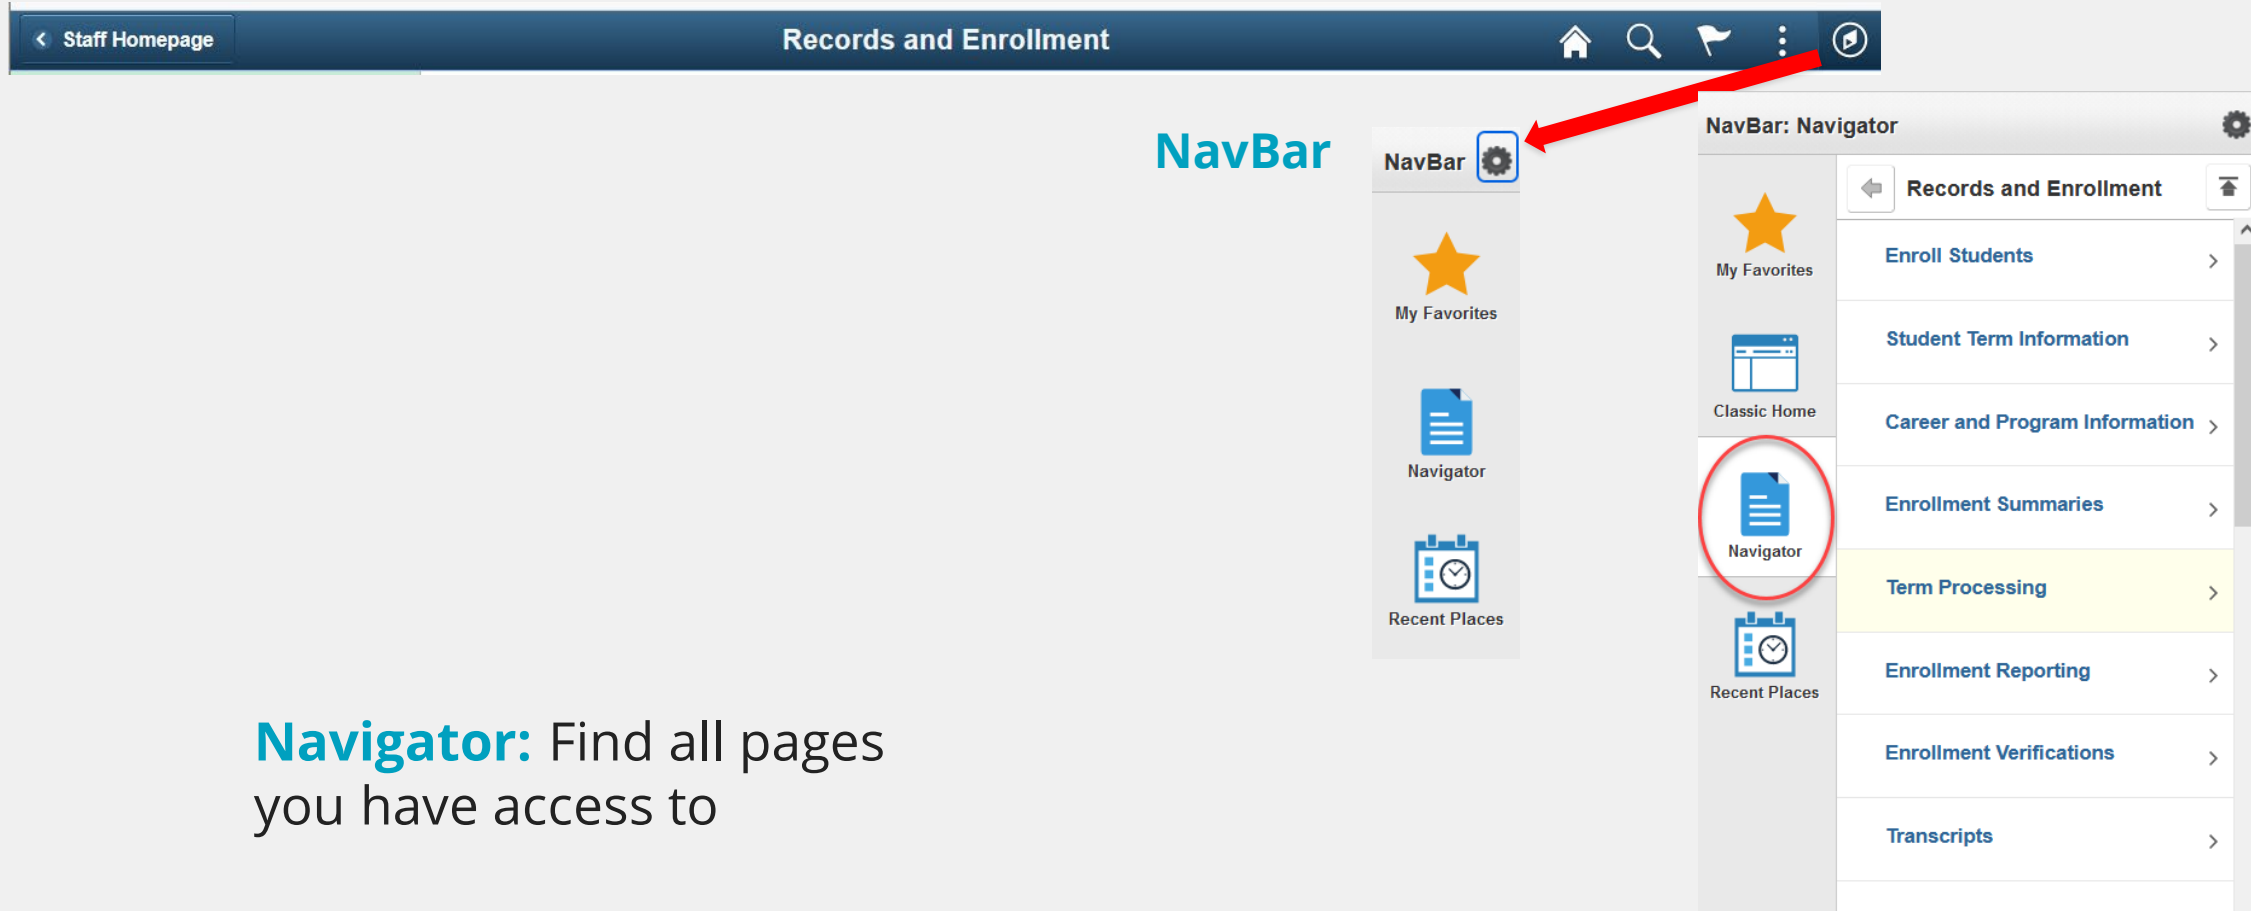

Graphic tiles contain the
most essential PeopleSoft
pages

NOTE: Tiles will **NOT** appear
in myCSUDH portal or to
Students & Faculty in Self-
Service
