

## Save PDF Document instead of using Default PDF Viewer in Chrome Browser

Chrome has its own built-in PDF viewer but some new features used on the document may not be supported. Follow the steps below to set Adobe Reader as your PDF default viewer on Chrome browser.

- 1) Download the latest version of [Adobe Reader](#) and install it.
- 2) Open the Chrome browser and type in `chrome://settings/content` in the address box.
- 3) Click on PDF documents near the bottom of the page.

- 4) Turn on Download PDF files instead of automatically opening them in Chrome. Screenshot shown below has this option turned on.
