healthy lives free of pain and crippling infirmities.

(1:02:55) MUSIC 23:04:19:20 Brian Basketball 3:01:34

Narration: Twelve-year-old Brian is able to enjoy an active, athletic life today because nearly nine years ago he received a heart transplant that

BS Brian 3:02:17

saved his life.

TALKING HEAD

TH 4:11:23

Key

Kimberly Mack/Brian's Mother: At 15 months old, Brian contracted a virus that settled in his heart muscle and destroyed it.

TH Photo Kim Kiss Brian 3:22:15

The surgeons told me that Brian was no longer responding to

heart transplant, and at that time, they figured that his window of opportunity was two months to receive the transplant in order to save his life.

TH 4:15:20 Key  
**Hellane Mack/Brian's Grandmother:** When we found out that Brian would die if he did not receive a transplant, the bottom just fell out of my life. The thought of losing him so young, without a chance of him having any part of life, was devastating. But with the transplant, and I look at him today, you couldn't find a happier grandmother because he is a normal, healthy little boy, but without it, we wouldn't have had him. There are days that I'll just walk up to him

TH Walking Sidewalk 3:05:28  
and just hug him for no reason, but I'm just so happy to have him. He's so active. He never stops, either the brain or the body. It never, never stops. I'm just thrilled, and I do, I'll just walk up to him and he'll say "What's that for, Grandma?", and I'll say "Just 'cause." But I'm so happy to have him. Brian Dive Pool 3:28:16

**Kimberly Mack/Brian's Mother:** Today, we're having a special party in honor of Brian's ninth anniversary that just passed three days ago, and we're taking a bunch of friends out to have a big swim party and a barbecue, just to kind of acknowledge the fact that we've made another milestone and completed another year.
