Anthropology, Minor Requirements

The minor consists of five courses in anthropology. In consultation with an advisor, a specialized minor focusing on a specific aspect of anthropology can be developed in an area such as: Medical Anthropology, Human Evolution, Applied Anthropology, Educational Anthropology.

| Code | Title | Hours |
|--|---------------------------------------|-------|
| Lower Division Requirements | | |
| Select two courses from the following: | | 6 |
| ANT 100 | Introduction to Cultural Anthropology | |
| ANT 101 | Intro to Biological Anthro | |
| ANT 102 | Ancient Civilizations | |

| Upper Division Requirements | |
|--|-----------|
| Select three upper division Anthropology courses | 9 |
| Total Hours | 15 |

Cultural Resource Management, Certificate

In addition to the course work listed for the major concentration in Archaeology, the awarding of the certificate is based on demonstrated applied experience in the professional aspects of Cultural Resource Management. Students must demonstrate competence in at least two of the following areas:

1. Intensive archaeological or ethnographic field experience relating to Cultural Resource Management; this experience must extend beyond an introductory field course.
2. Laboratory analysis in which the student demonstrates knowledge of methods and techniques in handling, processing, and interpreting either archaeological or ethnographic findings.
3. Report preparation experience in which the archaeological or anthropological aspects of Cultural Resource Management are stressed.

The applied experiences required for the Certificate in Cultural Resource Management can be obtained through independent study, enrollment in a special topics course, volunteer training, internships or actual professional experience of reasonable duration gained through employment in cultural resource management programs or projects. Arrangements for such experiences and individual competencies need to be made in advance under the guidance of the program coordinator and the department chair. Consultation should take place as soon as possible after the student selects this certificate program and also periodically while participating in the program.

Indigenous Peoples of the Americas, Minor Requirements

The interdisciplinary minor in Indigenous Peoples of the Americas focuses on the indigenous peoples of North, Central, and South America. The minor includes courses from four academic disciplines in three colleges. The Indigenous Peoples of the Americas minor provides students with an understanding of and respect for historic and contemporary Native Peoples of the Americas, and it serves our students who have a Native American heritage. The minor helps to prepare students for a variety of careers in the public, non-profit, and private sectors, where knowledge of Native American history and culture is important. For further information, contact the Department of Anthropology.

| Code | Title | Hours |
|---|------------------------------|-------|
| Select one course from the following: ¹ | | 3 |
| ANT 330 | North American Indians | |
| HIS 342 | Native American History | |
| Select two courses from the following: ² | | 6 |
| ANT 333 | Ancient Peoples Of Mexico | |
| ANT 334 | Mesoamerica Past and Present | |
| ANT 342 | South America | |

| | |
|---|---|
| ANT 351 | Prehistory of the Americas |
| HIS 376 | Film As History |
| HIS 380 | Women In History |
| Select one of the following: ³ | |
| ANT 315 | Magic & Religion |
| HEA 468 | Multicultural Health |
| HIS 340 | American West |
| HIS 368 | Mexico: Colonial |
| HIS 369 | Mexico: National Period |
| SPA 490 | Seminar in Special Topics in Literature and Linguistics |

Total Hours **12**

¹ All students in the IPA minor must take at least one of the following core courses. These courses provide comprehensive converge of indigenous cultures and history in North America.

² All students are required to take two of the following courses. These courses focus exclusively on the themes relevant to indigenous peoples of the Americas or on specific indigenous groups/regions within the Americas.

Note: An advisor may approve the use of any 395 or 495 course for Area B of the IPA minor if the student can provide documentation indicating the course content meets the criteria discussed in Area B.

³ All students must take one of the following courses. These courses include components that focus on indigenous peoples of the Americas, and also include discussion of non-indigenous peoples.

Note: An advisor may approve the use of any 395 or 495 course for Area C of the IPA minor if the student can provide documentation indicating the course content meets the criteria discussed in Area C.

1.

Art

College of Arts and Humanities
Department of Art and Design

Program Description and Features

The Art major provides rich experiences and creative training in a community that values experimentation and self-awareness. Faculty mentor students by establishing a foundation of skillsets across disciplines in drawing, painting, sculpture, ceramics, socially engaged art, time-based media and other contemporary art practices.

Advances level courses are designed to cultivate content-driven art allowing students the flexibility of using the medium(s) of their choice. In the senior year, students develop a professional plan while conceptualizing and creating a cohesive body of work for participation in an exhibition.

Art historical precedents and contemporary art issues as well as professional practices and the technologies of art are emphasized throughout the program. Students have the option to participate in internships and apply for scholarships and are given access to visiting artists and curators. The Art major offers comprehensive preparation and guidance for students to become practicing artists, cultural producers, and creative thinkers.

Program goals are as follows:

1. To introduce students to a variety of art disciplines – drawing, painting, sculpture, ceramics, technologies of art, contemporary art practices, professional practices, and art history.
2. To help students develop technical, formal, and conceptual skills in these areas.
3. To prepare students for the further study or practice of art-making.

The Fine Arts facility is located in LaCorte Hall. All of the traditional visual arts areas have generously sized studios and the majority of these adjoin exterior patios, which further extend their usable space and take advantage of Southern California's mild climate. The studios are furnished with a wide range of equipment for various media.

The University Art Gallery contains over 2,000 square feet of exhibition space. The Gallery has frequent exhibitions, including guest lectures by exhibiting professional artists.

Students have additional access to studios outside of class time.

The **Minor in Art** invites students to explore two-and three-dimensional studies in the Department of Art and Design. Students may take the Minor in Art and also major in Art History or Design or a major from another program.

The **Minor in Ceramics** introduces students to the fundamentals of ceramic art both in functional and sculptural applications. Students may take the Minor in Ceramics and also a major in Art History or Design.

Academic Advisement

Advising for Art & Design majors and minors is done by Art and Design faculty members as well as the College of Arts and Humanities academic advisors. Students must stop by the Department of Art and Design to be assigned to an advisor. The advisor will facilitate the student's smooth passage through his/her educational experience. Students must consult their advisors each semester before registration to discuss their program. For General Education information and advisement, contact the College of Arts and Humanities Student Success Center located in LIB 5515, (310) 243-3264.

Preparation

High school students planning to major in art at CSU Dominguez Hills will be best prepared by taking a maximum variety of art courses offered in their school. In addition, they should have some general exposure to the history of art.

Community College transfer students seeking admittance to the CSU Dominguez Hills Art and Design department will be best prepared by having completed the equivalent of the following CSU Dominguez Hills lower division art courses:

- Introduction to World Art 2 (ARH 111)
 - Ceramics 1 (ART 150)
 - 2D Design (ART 170)
 - 3D Design (ART 171)
 - Drawing I (ART 179)
 - Painting 1 (ART 180)
 - Sculpture 1 (Art 190)
- Students should be aware that community college courses do not satisfy upper-division course requirements.

Student Organizations

Ceramics Guild, Jim Keville, Advisor
Arts Collective, Devon Tsuno, Advisor

Scholarships

The Winston Hewitt Endowed Scholarships are awarded on merit to Art majors emphasizing painting and who are continuing, full-time students at CSU Dominguez Hills. Winston Russell Hewitt (1922-2006) had a long career as an artist, traveler, multi-linguist, an OSS officer, and a Distinguished Professor of French Literature at California State University, Dominguez Hills. Applications are available annually at the beginning of the spring semester. The deadline for application submission will be announced at the beginning of the spring semester. Please contact the Department of Art and Design for additional scholarship questions.

Graduation With Honors

Undergraduate students may be candidates for graduation with Honors in Art if they meet the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of 3.5 in all courses is used to satisfy the upper-division requirements for the Art major;

Career Possibilities

The primary goal of the Bachelor of Arts in Art is to prepare the student for further studies. Nevertheless, the skills acquired may provide students with a variety of interesting employment opportunities, some of which are listed below:

Art

Exhibiting artist; self-employed work for various organizations on freelance or commission basis; artist-in-residence/artist-in-the-schools; art consultant; art director; cartoonist; illustrator; medical illustration; book illustration; and computer artist.

Emeriti Faculty

Bernard Baker, John Goders, Arthur L. Harshman, Gilah Yelin Hirsch, Louise Ivers, Noreen Larinde, Norman Neuerburg, Ernest Rosenthal, Sidney Glen White

Courses

ART 100. Looking At Art. (3 Units)

Learning to perceive art through discussion of selected historical periods, development of a descriptive vocabulary, and observation of actual works of art. Introduction to theories of interpretation and evaluation.
Offered Fall, Spring, Summer

ART 101. Experiencing Creative Art. (3 Units)

Learning modes of artistic expression through discussion of theories of composition, examination of the lives and goals of selected artists and art movements, and creation of individual and group art projects. Discussion of projects to develop skills in art criticism. This course is restricted to 1st time Freshman going through the First Year Experience.
Offered Fall, Spring

ART 150. Ceramics 1. (3 Units)

History of and introduction to ceramics design problems with ceramic materials emphasizing hand forming. Familiarization with low and high firing techniques. Six hours of activity per week. Fee required.
Offered Fall, Spring

ART 165. Contemporary Art Practices 1. (3 Units)

Prerequisites: ART 170 is recommended. Introduction to current art practices. Students will learn to conceptualize and produce contemporary art using a variety of materials, technologies and post-studio strategies. Six hours of activity per week.
Offered All terms, Fall

ART 170. 2-D Design. (3 Units)

Principles of design as they relate to two dimensional elements (point, line, shape, texture, color, etc.) and their composition on the pictorial surface. Introduction to various two-dimensional media. Six hours of activity per week.
Offered Fall, Spring

ART 171. 3-D Design. (3 Units)

Principles of design as they relate to the three-dimensional elements (line, plane, volume, color) and their composition in space. Six hours of activity per week.
Offered Spring, All terms

ART 179. Drawing 1. (3 Units)

A foundation course in drawing, oriented to understanding and use of various approaches to graphic representation. Six hours of activity per week.
Offered Fall, Spring, All terms

ART 180. Painting 1. (3 Units)

A foundation course introducing the student to problems of pictorial space, organization, and color through the use of two-dimensional painting media. Six hours of activity per week.
Offered Spring, All terms

ART 190. Sculpture 1. (3 Units)

Basic theory and methods of creating sculptural form by additive processes. Emphasis on clay modeling and waste-mold casting. Six hours of activity per week. Fee required.
Offered Fall, All terms

ART 301. Arts/Crafts For Non-Major. (3 Units)

Development, experience, and application of arts and crafts projects of special value to Liberal Studies and Recreation majors. Six hours of activity per week.
Offered Fall, Spring, Summer

ART 355. Ceramics 2. (3 Units)

Prerequisite: ART 150 is required. History of and continuation to ceramics design problems with ceramic materials emphasizing hand forming. Familiarization with surface enhancements will also be explored. Six hours of activity per week. Fee required.
Offered All terms, Fall, Spring

ART 360. Contemporary Art Practices 2. (3 Units)

Prerequisite: ART 165 is required. An intermediate course exploring current art practices. Students will advance conceptual ideas to produce contemporary art, expanding on the materials, technologies, and post-studio strategies introduced in Contemporary Art Practices 1. Six hours of activity per week. Fee required.
Offered Spring

ART 361. Wheel Thrown Ceramics. (3 Units)

Introductory course to the use of the potter's wheel Building on the skills learned in Ceramics I; emphasis on wheel-throwing techniques. Surface enhancements and kiln firing process will also be addressed. Six hour of activity per week.
Offered Fall

ART 371. Drawing 2. (3 Units)

Prerequisite: ART 179. Development of skill in graphic representation, stressing an understanding of pictorial space and organization. Problems of technique and media. Six hours of activity per week.
Offered Spring

ART 373. The Figure 1. (3 Units)

Prerequisite: ART 179. Development of the graphic representation of the human form. Live models used to introduce problems of form, structure, and anatomy. Six hours of activity per week. Fee required.
Offered Fall

ART 380. Painting 2. (3 Units)

Prerequisites: ART 170 and ART 180. Problems in the creative use of the materials of painting. Emphasis on visual concepts, interpretation, and expression. Six hours of activity per week.
Offered Fall

ART 384. Painting 3. (3 Units)

Prerequisite: ART 380. Development of a more comprehensive understanding of materials and methods as they related to current concepts of painting. Six hours of activity per week.
Offered Spring

ART 385. Visual Media Studies 1. (3 Units)

Prerequisites: ART 150, ART 165, ART 170, ART 171, ART 179, ART 180, ART 190 and ART 371 are required. ART 355, ART 360, ART 373, ART 380 and ART 392 are recommended. Intermediate course to begin creating a cohesive body of work. Emphasis on critical analysis, individual practice, group critique and current theoretical issues. Conceptualization and production of art can include any visual media. Six hours of activity per week.
Offered Fall

ART 392. Sculpture 2. (3 Units)

Prerequisite: ART 190 is required. Experiments in contemporary sculpture combining traditional concepts and the use of found objects and other readily available non-traditional materials. Introduction to wood and metal fabricating. Six hours of activity per week. Fee required.
Offered Spring

ART 395. Special Topics in Art. (3 Units)

Prerequisite: Consent of instructor. Study of special interest for students in the selected area of study. Topic and content will vary as announced.
Offered Infrequent

ART 447. Visual Identity and Branding. (3 Units)

Prerequisite: ART 344 is required. Study of building brands and brand identity. Visual systems and development of cultural messages are explored. Projects include development, research, client interaction, presentation, and independent student work. Six hours of activity per week. Fee required.
Offered Fall

ART 463. Ceramics 3. (3 Units)

Prerequisite: ART 355 or ART 361 is required. Study of the Mexica Culture and Nahuatl languages as reflected in 16th Century manuscripts. Designed to give students an indigenous cultural and linguistic perspective to read and analyze passages from primary sources in classic Nahuatl.
Offered Fall

ART 474. The Figure 2. (3 Units)

Prerequisite: ART 373. An advanced course in the graphic study of the human figure. Emphasis upon the creative interpretation of form and structure through media. Repeatable course. Six hours of activity per week. Fee required
Offered Fall

ART 485. Visual Media Studies 2. (3 Units)

Prerequisites: ART 150, ART 165, ART 170, ART 171, ART 180, ART 190, ART 371 and ART 385 are required. ART 355, ART 360, ART 373, ART 380 and ART 392 are recommended. Capstone course to complete a cohesive body of work for exhibition. Emphasis on critical analysis, individual practice, group critique and current theoretical issues. Six hours of activity per week.
Offered Spring

ART 486. Painting 4. (3 Units)

Prerequisite: ART 384. Advanced study emphasizing aesthetic development, personal imagery, and individual critical awareness. Self-initiated studio problems. Repeatable course. Six hours of activity per week.
Offered Spring

ART 492. Professional Practices Seminar. (3 Units)

Prerequisites: ART 150, ART 170, ART 171, ART 180, ART 165, ART 190, ART 371, Senior Status, Exhibiting in Spring Exhibition required. Co-requisite: ART 385 is required. This capstone provides professional training in the business of art addressing exhibition design, portfolio development, grant writing, residencies, and graduate school applications. A requirement before participation in the senior exhibition. Six hours of activity per week. Fee required.
Offered Fall

ART 493. Special Studies In Art. (3 Units)

Detailed study of material, method, concept, or period of Art. Repeatable course. Six hours of activity per week. Fee required.
Offered As needed

ART 494. Independent Study In Art. (1-3 Units)

Prerequisites: Senior standing as an Art major or minor is required; consent of instructor and department chair. ART 494 may not be substituted for a required course in the major or minor without prior consent of instructor and adviser. An art project undertaken with the advice and supervision of a Studio or Design Art faculty member. Repeatable course.
Offered Fall, Spring

ART 495. Selected/Variable Topics in Art. (3 Units)

Detailed study of art. Repeatable course. Restricted to juniors and seniors. Department consent required.

Offered As needed

ART 496. Internship In Art. (1-3 Units)

Prerequisites: Upper division standing and consent of instructor.

Supervised on- or off-campus art related work in selected museums, galleries, art and slide libraries, studios or commercial firms. Practical application of knowledge to such areas as exhibition, conservation, cataloging, and Art History, Studio or Design activity. Term paper required. Repeatable course.

Offered Fall, Spring

ART 498. Directed Rch Art History. (1-3 Units)

Prerequisites: Senior standing as an Art major or minor is required; consent of instructor and department chair. Preparation of a research paper on a selected topic in the History of Art. Repeatable course.

Offered Fall, Spring

Art, Bachelor of Arts Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

No minor required. Art majors are recommended to select a minor in another field of art.

Major Requirements (54 units)

The following courses, or their approved equivalents, are required for all candidates for this degree.

A. Lower Division Required Courses (24 units)

| Code | Title | Hours |
|--|------------------------------|-------|
| Lower Division Required Courses | | |
| ARH 111 | Introduction To World Art 2 | 3 |
| ART 150 | Ceramics 1 | 3 |
| ART 165 | Contemporary Art Practices 1 | 3 |
| ART 170 | 2-D Design | 3 |
| ART 171 | 3-D Design | 3 |
| ART 179 | Drawing 1 | 3 |
| ART 180 | Painting 1 | 3 |

| | | |
|--------------------|-------------|-----------|
| ART 190 | Sculpture 1 | 3 |
| Total Hours | | 24 |

B. Upper Division Required Courses (30 units)

| Code | Title | Hours |
|---------|--------------------------------|-------|
| ARH 331 | Modern Art | 3 |
| or | | |
| ARH 333 | Contemporary Art | |
| ART 355 | Ceramics 2 | 3 |
| ART 360 | Contemporary Art Practices 2 | 3 |
| ART 371 | Drawing 2 | 3 |
| ART 373 | The Figure 1 | 3 |
| ART 380 | Painting 2 | 3 |
| ART 385 | Visual Media Studies 1 | 3 |
| ART 392 | Sculpture 2 | 3 |
| ART 485 | Visual Media Studies 2 | 3 |
| ART 492 | Professional Practices Seminar | 3 |

C. Electives

The following courses are not required but may be taken to augment the required courses and may be needed to reach a total of 120 units for overall graduation.

| Code | Title | Hours |
|---------|--------------------------|-------|
| ART 361 | Wheel Thrown Ceramics | |
| ART 463 | Ceramics 3 | |
| ART 474 | The Figure 2 | |
| ART 493 | Special Studies In Art | |
| ART 494 | Independent Study In Art | |
| ART 496 | Internship In Art | |

- Identify a variety of art disciplines—drawing, painting, sculpture ceramics, art technologies, and contemporary art practices. (Information Literacy)
- Apply technical, formal, and conceptual skills in a variety of art disciplines and art practices. (Disciplinary Proficiency)
- Know a variety of visual art genres and the variety of art makers both locally and globally and the cultural significance or relevance. (Critical Thinking)
- Write and speak about artistic expression and what inspires creativity. (Communication)
- Explain in writing or orally how one's environment and moment in time can influence creative expression and how that expression can have an impact on society and social justice. (Engaged Citizenry)
- Develop knowledge and skills necessary to pursue graduate studies in the visual arts as measured through portfolios and mock graduate school applications. (Critical Thinking)
- Exhibit a selection of representative works in a public gallery or other cultural venue. (Disciplinary Proficiency)

Art, Minor Requirements (15 units)

The Minor in Art invites students to explore two- and three-dimensional studies in the Department of Art and Design. Students may take the Minor in Art and also Major in Art History or Design degree programs.

To complete the Minor in Art, the following courses must be taken:

| Code | Title | Hours |
|--|-------------|-----------|
| A. Lower Division Requirements | | |
| 1. Select one course from the following: | | 3 |
| ART 170 | 2-D Design | |
| ART 179 | Drawing 1 | |
| ART 180 | Painting 1 | |
| 2. Select one course from the following: | | 3 |
| ART 150 | Ceramics 1 | |

| ART 463 | Ceramics 3 | 3 |
| Total Hours | | 12 |

Art History

College of Arts & Humanities

Department of Arts and Design

Program Description and Features

The mission of the B.A. in Art History is to provide a comprehensive program of study in the history of Art. Students experience the opportunity to develop knowledge in the histories of art from several different regions of the world and time periods. Upon completion of the introductory survey courses, students pursue a set of Upper Division required courses that address periods in Western Art from the Renaissance to the Contemporary. Students are also required to take elective courses in New Western Art at the Upper Division level. A range of specialized Upper Division elective courses allow students to focus on particular interests including the histories of architecture and design.

The B.A. in Art History is intended to prepare the next generation of Art Historians who will serve as educators, researchers, and museum professionals. The pedagogical approach emphasizes critical thinking, writing, research, and oral presentation skills. In all courses, students gain experience analyzing problems in the field and learn to locate and evaluate a range of peer-reviewed sources and visual examples to support their inquiries and theses. Through the presentation of their findings to peers, they learn how to respond to questions and develop constructive feedback. In this manner, students emerge with skills necessary to perform key competencies required for work in the arts.

The **Minor in Art History** offers students a background in the history of Art and allows them a choice of three courses at the Upper Division level that may be of particular interest to them in any combination of traditional, modern, and non-Western Art.

Academic Advisement

Advising for Art & Design majors and minors is done by Art and Design faculty members as well as the College of Arts and Humanities advisors. Students must stop by the Department of Art and Design to be assigned to an advisor. The advisor will facilitate the student's smooth passage through his/her educational experience. Students must consult their

advisors each semester before registration to discuss their program. For General Education information and advisement, contact the College of Arts and Humanities Student Success Center in LIB 5515, (310) 243-3264.

Preparation

High school students planning to major in art and design at CSU Dominguez Hills will be best prepared by taking a maximum variety of art and/or design courses offered in their school, especially in traditional studio art areas, such as drawing, painting, ceramics, and 3-D studies, as well as an introduction to Adobe Photoshop and Illustrator. In addition, they should have some general exposure to the history of art. It is assumed that students will have the necessary precollegiate academic skills of reading, writing, and mathematics.

Students entering the B.A. in Art History program must complete the following:

1. Earn an overall grade point average of 2.0 or better in courses taken outside of the department.
2. Earn a grade of "C" or better in each course taken within the department.
3. Earn a grade of "C" or better in all direct and indirect prerequisite courses listed in the catalog before advancing to the next level course in a sequence for English, Mathematics, and Science courses.

Student Organizations

Ceramics Guild, Jim Keville, Advisor

Arts Collective, Devon Tsuno, Advisor

Scholarships

For Information regarding Scholarships in the Art and Design department, please contact the department chair.

Graduation With Honors

Undergraduate students may be candidates for graduation with Honors in Art if they meet the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of 3.5 in all courses used to satisfy the upper-division requirements for the Art major

Career Possibilities

Art History majors often pursue careers in museums and galleries in a variety of positions from curatorial and research to education, coordination, and management. Upon completion of a graduate degree, Art History majors may consider teaching careers or work in public and private archives. Art History majors are also suitable candidates for employment in non-profit institutions focused upon the arts and humanities.

Emeriti Faculty

Bernard Baker, John Goders, Arthur L. Harshman, Gilah Yelin Hirsch, Louise Ivers, Noreen Larinde, Norman Neuerburg, Ernest Rosenthal, Sidney Glen White

ARH 110. Introduction To World Art 1. (3 Units)

An overview of the major works of art and architecture from Prehistoric times through the Middle Ages around the world. Each style of art is related to the society which produced it.

Offered Fall

ARH 111. Introduction To World Art 2. (3 Units)

Prerequisite: ARH 110 is recommended. An overview of the major works of art and architecture from the Renaissance through the Modern Period. Each style of art is related to the society which produced it.

Offered Spring

ARH 322. Medieval to Gothic Art. (3 Units)

Prerequisites: ARH 110 and ARH 111. Examination of the art of Early Europe with emphasis upon the Medieval and Gothic periods. Emphasis is placed upon the study of the many forms of art and architecture from Medieval to Gothic periods including manuscripts, reliquaries, churches and cathedrals.

Offered As needed

ARH 323. Renaissance to Baroque Art. (3 Units)

Prerequisites: ARH 110 and ARH 111 are required. An examination of the painting, sculpture, and architecture of the Early, Middle and Late Italian Renaissance as well as related developments in the North. The transitions from the Renaissance to Mannerism is studied as is the flourishing of Baroque arts in Italy, Spain, and throughout the Golden Age of Dutch painting. Rococo arts in France and Germany are also considered.

Offered As needed

ARH 331. Modern Art. (3 Units)

Prerequisites: ARH 110 and ARH 111 are required. History of visual arts in Europe and the United States from the middle of the 19th Century to World War II. Movements studied include Realism, Impressionism, Post-Impressionism, Early Abstraction, Expressionism, Cubism, Dada, Surrealism, and Abstract Expressionism.

Offered As needed

ARH 332. Modern Architecture. (3 Units)

Prerequisites: ARH 110 and ARH 111 are required. An examination of key developments in the history of Modern Architecture beginning with the Beaux-Arts Style and progressing through Art Nouveau, The Chicago School, Early 20th Century Avant-Gardes, Art Deco, the International Style and Modern Architecture. Writings of important practitioners and theorists such as Louis B. Sullivan, Adolph Loos, Le Corbusier and others are also studied.

Offered As needed

ARH 333. Contemporary Art. (3 Units)

Prerequisites: ARH 110 and ARH 111 are required. An examination of developments in the visual arts from 1980 to the present with emphasis upon the emergence of new media and forms. The course contextualizes art from the period within theoretical contexts of postmodernity.

Offered As needed

ARH 337. Art from Asia. (3 Units)

Prerequisites: ARH 110 and ARH 111. An examination of arts from selected regions of Asia including China, Japan, and Korea that includes study of traditional and contemporary forms.

Offered As needed

ARH 350. Art Of The United States. (3 Units)

Prerequisites: ARH 110 and ARH 111 are required. History of the visual arts in the United States from pre-colonization through the postwar period. Topics include the role of Native American and Spanish influences, European colonization, the Civil War, Gilded Age, World War I, Harlem Renaissance and World War II on the development of Art in the United States.

Offered Fall

ARH 352. Design History. (3 Units)

Prerequisite: ARH 111 is required. Introduces students to the history and theory of design from the Renaissance to the modern poster and contemporary digital developments. The relationship of design to social and political developments through history is emphasized.

Offered Fall

ARH 363. Art of Latin America. (3 Units)

Prerequisites: ARH 110 and ARH 111. A study of the history of Pre-Columbian arts of Mesoamerican from the Pre-formative through Post-Classic periods. Investigates architecture, monuments, sculpture, ceramics, and other arts from key archaeological sites. Concludes with examination of ancient Mayan art and culture.

Offered Fall odd

ARH 365. Art from Africa. (3 Units)

Prerequisite: ARH 110 and ARH 111. Study of ancient arts from Africa with emphasis upon selected regions including North Africa, Western Sudan, West Africa and the Western and Eastern Congo Basins.

Offered As needed

ARH 366. Writing in the Visual Arts. (3 Units)

Prerequisites: ARH 110 and ARH 111 are required. Designed to build skills in a range of writing found within the visual arts. Students analyze different forms of written communication within the visual arts and generate a body of writing that addresses different rhetorical situations and targeted audiences. Students generate, review in peer groups and revise samples of writing in the visual arts for presentation online.

Offered Fall

ARH 368. Women In Art. (3 Units)

Prerequisites: ARH 110 and ARH 111 are required. An analysis of women as artists from the medieval period to the present with special emphasis given to women artists of the twentieth and twenty-first centuries.

Offered Spring odd

ARH 370. Art and Social Protest. (3 Units)

Prerequisites: ARH 110 and ARH 111. History of the technological and stylistic developments in the architecture of the nineteenth and twentieth centuries.

Offered As needed

ARH 490. Seminar in Theories of Art Criticism. (3 Units)

Prerequisites: Senior standing as an Art History major or minor or consent of instructor and department chair. ARH 110 and ARH 111 are required. An examination of various approaches to art criticism and theory with particular emphasis on modern developments. Subjects studied include Iconography, Psychoanalysis, Queer Theory, Post-Colonialism, Feminist Theory and Deconstruction. Offered Spring odd

ARH 495. Selected/Variable Topics in Art History. (3 Units)

Detailed study of a period, area, figure or movement in the history of art. Repeatable course. Offered As needed

ARH 496. Internship. (1-3 Units)

Internship in Art History related field both on campus and externally. Restricted to juniors and seniors. Department consent required. Offered As needed

ARH 498. Undergraduate Directed Research. (1-3 Units)

Like and independent study, individual students will consult with Art History faculty to conduct an independent research project in Art History. Restricted to juniors and seniors. Department consent required. Offered As needed

Art History, Bachelor of Arts

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

No minor is required. Art History majors are recommended to select a minor in another field of art.

Major Requirements (40 units)

The following courses, or their approved equivalents, are required for all candidates for this degree. It is recommended that transfer students come to CSUDH already having taken the equivalent of ARH 110 and ARH 111 and 3-units of a language other than English.

Lower Division Requirements (12 units)

Students must take two semesters of a language other than English (6 units)

| Code | Title | Hours |
|---|-----------------------------|-------|
| ARH 110 | Introduction To World Art 1 | 3 |
| ARH 111 | Introduction To World Art 2 | 3 |
| Students must take two semesters of a language other than English | | 6 |

Upper-Division Requirements (28 units)

Upper-Division Required Courses (19 units)

| Code | Title | Hours |

Art History Program Learning Outcomes

- Differentiate monuments, movements and principal artists of major art periods of the past and the present including western and non-western examples. (Disciplinary Proficiency)
- Apply methods for posing and addressing problems in Art History such as those related to subject matter, style and historical content. (Disciplinary Proficiency)
- Describe areas in the history of art outside the Western canon. (Disciplinary Proficiency)
- Produce oral and written research in formats that conform to professional standards in Art History. (Communication)
- Synthesize knowledge obtained in the classroom with analysis of diverse arts sites and issues in the Los Angeles area. (Engaged Citizenry)
- Evaluate and use peer reviewed research materials in the preparation of written and oral research in the discipline. (Information Literacy)
- Analyze works of art using appropriate art historical terminology. (Disciplinary Proficiency)
- Differentiate art forms as they relate to individual and social needs and values including such issues as culture, ethnicity and gender. (Critical Thinking)

Art History, Minor Requirements

The Minor in Art History offers students a background in the history of Western Art, and allows them a choice of three courses at the Upper Division level in areas that may be of particular interest to them in any

combination of traditional, contemporary, and non-Western Art. Students may take the Minor in Art History and also Major in the Art or Design B.A.'s.

To complete the Minor in Art History, the following courses must be taken:

| Code | Title | Hours |
|--|--------------------------------------|-----------|
| Lower Division Required Courses | | 6 |
| ARH 110 | Introduction To World Art 1 | |
| ARH 111 | Introduction To World Art 2 | |
| Upper Division Requirements | | 6 |
| Select two courses from the following: | | |
| ARH 322 | Medieval to Gothic Art | |
| ARH 323 | Renaissance to Baroque Art | |
| ARH 332 | Modern Architecture | |
| ARH 333 | Contemporary Art | |
| ARH 337 | Art from Asia | |
| ARH 350 | Art Of The United States | |
| ARH 352 | Design History | |
| ARH 363 | Art of Latin America | |
| ARH 365 | Art from Africa | |
| ARH 366 | Writing in the Visual Arts | |
| ARH 368 | Women In Art | |
| ARH 370 | Art and Social Protest | |
| ARH 490 | Seminar in Theories of Art Criticism | |
| Total Hours | | 12 |

Arts and Humanities

Note: this program is not accepting admissions at this time and is suspended until further notice.

College of Arts and Humanities

Program Description

Graduate

The Humanities Graduate Program provides post-baccalaureate students the opportunity to study the traditional humanities fields - philosophy, literature, history, music, and art - in the context of contemporary interdisciplinary topics, as well as in courses devoted to the methodology and current concerns of specific disciplines. Courses enable the critical evaluation of the visual and performing arts, as well as the ideas, cultures and individuals which have shaped our society. Program courses are designed around the theme of the city. Skills in advanced writing, research, and presentation are exercised in seminars and in a final research or creative project.

Designed for professionals such as teachers for whom the possession of a master's degree has practical as well as personal value, the program also serves the student who is continuing his/her college education for the enrichment of lifelong learning.

Academic Advisement

Graduate

Students should contact the Associate Dean in the College of Arts and Humanities for more information.

Preparation

Graduate

For students preparing to enter the Master of Arts in Arts and Humanities Program some prior experiences with courses or individual study in the areas of art, music, literature, history, and philosophy is required. Foreign language also provides valuable preparation for this program.

Emeriti Faculty

Bryan Feuer

Arts and Humanities, Master of Arts

Admission Requirements

1. To be admitted into the program a student must possess a baccalaureate degree from an accredited college, as well as a grade point average of 3.0 or better in the last 60 semester units (90 quarter units) of upper division course work attempted (not including extension units).
2. A Supplemental Application, available from the Humanities Office, must be completed.
3. Although there are no specific course prerequisites for admission to the program, a student will be required to take undergraduate preparatory courses if the educational background in the humanities is insufficient.
4. A letter of recommendation will be required.

Progress Towards The Degree

After nine units of graduate humanities courses are taken (500 level) with a grade average of "B" or better, and the Diagnostic essay Exercise has been passed, the student is given classified standing. After all requirements for the degree except the thesis/final project have been met, the student is given the status of advancement to candidacy. The degree is awarded after all requirements have been met, a grade point average of 3.0 or better has been maintained, and the final project/thesis has been completed and approved by the thesis committee and the Graduate Studies Office.

Features

This program provides the opportunity to study humanities topics in depth at an advanced level. Each course meets one evening per week, and is conducted in a seminar setting with active student participation and discussion. Although the emphasis is upon combining the disciplines around topics, there is an opportunity to focus upon a single discipline seminar, electives, independent study, and the final project or thesis.

Requirements

Degree Requirements (30 units)

The Master of Arts in Arts and Humanities requires completion of 27 units of course work and one of the following:

1. Passing score for HUM 598 Comprehensive Examination. After completion of all course work or during the last semester of course work, the degree candidate may apply to take HUM 598 Comprehensive Examination. There is only one retake opportunity.
2. Completion of an approved thesis or creative project (HUM 599 Final Project). Student must have at least a 3.75 GPA and the approval of the program coordinator to enroll in HUM 599 Final Project.

Student must select one of the options listed. The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

| Code | Title | Hours |
|--|---|-------|
| Core Courses | | |
| HUM 500 | The Humanities in the City | 3 |
| HUM 512 | Texts and Language | 3 |
| HUM 528 | Images and Artifacts | 3 |
| HUM 582 | Performance & Criticism | 3 |
| Seminars and Performance | | |
| Select one of the following options: | | 12-15 |
| Arts and Humanities in the City Option: | | |
| HUM 520 | Seminar In Art | |
| HUM 522 | Seminar In Literature | |
| HUM 523 | Seminar In Music | |
| HUM 524 | Seminar In Philosophy | |
| HUM 540 | Sem His: Moments Crisis | |
| Music and Intellectual Inquiry Option: ¹ | | |
| HUM 523 | Seminar In Music | |
| Select one of the following: | | |
| MUS 580 & MUS 594 | Performance, Performance Practices and Repertoire and Independent Study | |
| MUS 594 | Independent Study | |
| Select 3-6 units from the following: | | |
| HUM 520 | Seminar In Art | |
| HUM 522 | Seminar In Literature | |
| HUM 524 | Seminar In Philosophy | |
| HUM 540 | Sem His: Moments Crisis | |
| Electives (optional) | | |
| Approved humanities-related courses chosen in consultation with an advisor | | 3 |
| Final Project or Comprehensive Examination | | |
| HUM 598 | Comprehensive Examination | 3 |

or HUM 599 Final Project

Total Hours **30-33**

¹ Prerequisite: Consent of Department of Music Chair.

Master's Requirement

In addition to the major requirements, student must meet all university requirements for the master's degree. Students should consult the section of the catalog entitled "Graduate Degrees and Postbaccalaureate Studies (<https://catalog.csudh.edu/general-information/graduate-degree-postbaccalaureate-studies/>)."

Humanities, Minor

Requirements

| Code | Title | Hours |
|--|-----------------------|-----------|
| Required Courses | | |
| HUM 490 | Seminar In Humanities | 3 |
| Select nine units from the following using at least two different courses: | | 9 |
| HUM 310 | Key Concepts | |
| HUM 312 | Key Movements | |
| HUM 314 | Key Issues | |
| Total Hours | | 12 |

Note: If HUM 490 Seminar In Humanities is not offered, one of the following courses may be substituted with the permission of the Humanities Coordinator **and** the course instructor: one other HUM 310 Key Concepts/HUM 312 Key Movements/HUM 314 Key Issues, ART 490 , ENG 490 Seminar in Literature, HIS 490 Senior Seminar In History, MUS 495 Special Studies In Music, PHI 490 Seminar, THE 490 Seminar In Theatre Arts, or any HUM 500 The Humanities in the City level course (except HUM 598 Comprehensive Examination or HUM 599 Final Project).

Note: HUM 310 Key Concepts/HUM 312 Key Movements/HUM 314 Key Issues are repeatable with different topics. An additional three units selected from HUM 310 Key Concepts, HUM 312 Key Movements, or HUM 314 Key Issues must be completed to fulfill the upper division General Education requirement in Integrative

Studies in Humanities.

Asian-Pacific Studies

College of Arts and Humanities

Program Description

Undergraduate

The Asian-Pacific Studies Department offers an interdisciplinary major and minor in the study of Asian, Asian American, and Pacific Islander cultures, emphasizing a transnational perspective. Two concentrations are offered in the major:

1. The Asian-Pacific Studies Concentration focuses on Asian-Pacific peoples, societies, and nations from the perspective of their historical, cultural and political experiences from antiquity to the present. It covers ancient civilizations, history, culture, philosophy, religion, politics, economics, and gender and family relations. It also explores the interconnections of Asian Pacific societies with the rest

of the world. Though not required, Study Abroad and Asian language classes are highly recommended.

2. The Asian American and Pacific Islander Studies Concentration focuses on Asian American and Pacific Islander American history, community formation, education, gender and family relations, culture and social and political development including intra-Asian dynamics and relationships with other ethnic communities and the larger society. An internship course with a community organization is an important component of this concentration.

The major and minor in Asian-Pacific Studies are designed for students seeking to either complement their studies of other civilizations and cultures, or to pursue graduate study, foreign service, international business, teaching careers, or work in health science fields and community services.

Features

The University is located in a unique area at the nexus of the international ports of Los Angeles and Long Beach. Numerous corporations in Los Angeles and Orange counties represent the increasing importance of America's relations with the Asian-Pacific region.

Academic Advisement

Department Chair will help students plan their course of study to fulfill requirements for an Asian-Pacific Studies major or minor.

Students should see the department chair upon first entering CSU Dominguez Hills, at the beginning of their junior year and at the beginning of their senior year.

Preparation

Asian-Pacific Studies is open to all students who are admitted to the University.

Opportunities to Study Abroad

The California State University International Programs make available to students, who would like to have firsthand knowledge of Asia, an opportunity to study at Waseda University (Japan), University of Tsukuba (Japan), Yonsei University (Korea), and Peking University (China).

Languages

There are no language requirements for the Asian-Pacific Studies degree program; however, students are encouraged to study an Asian language.

Graduation with Honors

An undergraduate student may graduate with Honors in Asian-Pacific Studies provided that the following criteria are met:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of 3.5 in all courses used to satisfy the requirements in the major;
3. Eight upper division courses taken in the Asian-Pacific Studies Program

Student Organizations

The student group, the Asian and Pacific Islander Association (APIA), is directly affiliated with the Asian-Pacific Studies Department. The department also supports other Asian and Pacific Islander student

groups including Pagsikapan (Pilipino-American Student Community), Vietnamese Student Association, Oceania, and the Korean Culture Club.

Career Opportunities

In a world that is increasingly dependent upon global cooperation and trade, career opportunities for those with a background in Asian-Pacific Studies are numerous and varied.

- Advertising or marketing
- Community service
- Domestic or international business
- Education
- Foreign Service
- Film, television or multimedia
- Government work
- Health science
- International law
- Journalism
- Ministry
- Non-profit organization
- Social Work

Undergraduate Programs

Bachelor

- Asian-Pacific Studies, Bachelor of Arts (p. 384)

Minor

- Asian-Pacific Studies, Minor (p. 387)

Faculty

Dr. Mary T. Lacañale, Associate Professor and Chair

Dr. Jung-Sun Park, Professor

Dr. Jessica Marinaccio, Assistant Professor

Dr. Y Thien Nguyen, Assistant Professor

Program Office: LCH C-310

Phone: (310) 243-3327

Courses

APP 101. Introduction To Asian Studies. (3 Units)

Basic themes and key issues in Asia and the Pacific region. Multi-disciplinary survey of art, literature, philosophy, religion, politics, and society. Background to understanding tradition and change in the region, and introduction to the multicultural roots of Asian-Pacific Americans. Offered Fall, Spring

APP 195. Special Topics in Asian Pacific Studies. (3 Units)

Offered As needed

APP 201. Introduction to Asian American Studies. (3 Units)

Examines basic themes and key issues in the Study of Asian Americans. Interdisciplinary survey of immigration history, community formation, and development of ethnic identities through the arts, literature, music, multimedia and internet, cultural festivals, scholarship. and student and community organizations.

Offered Fall, Spring, Summer

APP 212. Introduction to Comparative Ethnic and Global Societies. (3 Units)

Explores the lived experiences of the three Ethnic/Global communities in the United States and their place of origin. Examines the socio-cultural dynamics in Africana, Asian-Pacific and Chicano/Latino communities.

Offered Fall, Spring

APP 225. Pacific Islander Culture in Oceania and the U.S.. (3 Units)

Examines the cultural, historical and contemporary experiences of various peoples of Hawai'i and the Pacific including the struggle over land, traditions, and sovereignty, state and national political restructurings, and global flows of knowledge, capital, and bodies.

Offered Fall, Spring

APP 295. Spec Topic Asian-Pacific Studies. (3 Units)

A study of selected topics or issues in Asian-Pacific Studies. Repeatable for a maximum of six units for credit.

Offered As needed

APP 311. Contemporary Issues in Asian American Communities. (3 Units)

Examination of the history and contemporary realities of Asian America. Analyzes the differences and commonalities in the experiences of various Asian American populations, focusing on the interplay of race, ethnicity, class, gender and culture in shaping their lives.

Offered Fall, Spring, Summer

APP 314. Asian Americans and the Media. (3 Units)

An investigation of the roles that artist-activists from the diverse areas of the world have played in 20th and 21st century social justice struggles. Students become familiar with the works of key resistance artists, including but not limited to the Mexican Muralists, members of the California Labor School, 1960's activists, and feminists. The course exposes students to specific propaganda art repositories, such as the Oakland Museum of California, where one of the world's largest and culturally diverse collections of social justice art is housed. The course examines museums in their evolution as sites of contestation for exhibitors and visitors who challenge their previously unquestioned scripts

Offered Fall, Spring

APP 315. Asian Pop Culture and Globalization. (3 Units)

Explores the growing transnational flows of Asian popular culture in historical and socioeconomic contexts. Analyzes the ramifications of the popularity of Asian pop culture for the changing contemporary global cultural landscape and power relations.

Offered Fall, Spring, Summer

APP 318. Vietnamese, Cambodian, and Lao Americans: Culture, History, and Identity. (3 Units)

Vietnamese, Cambodian, and Lao American culture, history, and identity examines the challenges of these immigrant groups focusing on the context of refugee experiences, intergenerational conflict, education, and preservation and transformation of culture in American society. GE F3.Â

Offered Fall, Spring

APP 319. Filipino American Experience. (3 Units)

Explores the lived experiences of Filipino Americans through the lens of Philippine history and culture, U.S. colonization, immigration, and community formation. Examines key issues, debates, and theories about diversity, ethnic identity and assimilation, education, families, and gender/sexuality.

Offered Spring odd

APP 325. Asian Pacific Art, Music and Literature. (3 Units)

Examination of diverse Asian Pacific cultures and history through art, music, and written and oral literatures. Analyzes the contributions of past and present artists, musicians/composers, and writers to the establishment and challenging of cultural identities in a globalized and mass-mediated world.

Offered Fall, Spring, Summer

APP 327. Values and Communication of Asian Pacific Cultures. (3 Units)

Prerequisites: Completion of all lower division General Education requirements. Junior Examination of basic values and societal outlooks unique to various Asian Pacific groups. Comparative analysis of verbal and nonverbal communication models for better cross-cultural understanding.

Offered Fall, Spring, Summer

APP 331. Japanese Comics/Animation. (3 Units)

Focusing on Japanese comics and animation, this course examines the contemporary transnational flows of culture and their implications. It also explores how the existing power relations between the East/West, center/periphery, and men/women are reflected and challenged in the production and dissemination of Japanese comics and animation.

Offered As needed

APP 333. E Asian Cul/Soc in Cinema. (3 Units)

Through critical analyses of films, this course will explore various aspects of East Asian societies including history, cultural traditions, socioeconomic transformations, politics, identity, gender and generational relations. It will also examine the issue of ethnic/racial/national/gender representation in East Asian cinema and its implications.

Offered As needed

APP 335. Asian Pacific Culinary Culture. (3 Units)

Analysis of Asian Pacific culture traditions and their transformation and globalization. Examines how Asian Pacific food culture intersects with local ecology, gender, cultural traditions, identity politics, (im)migration, colonialism, modernization, and globalization.

Offered Fall, Spring

APP 339. Asian Diaspora and Transnational Asian Religions. (3 Units)

Analysis of Asian diaspora populations' practice of Asian religions outside of Asia, especially in the U.S. Examines how Asian religions are transformed in different historical, social and cultural contexts and how the transformation in also intertwined with identity and community-building.

Offered Fall, Spring

APP 343. Asian Pacific Film & Literature. (3 Units)

Critical analysis on how a written source can be transformed from literature into film. Several Asian Films and Asian novels or short stories will be examined.

Offered Fall, Spring

APP 350. Asian-Pacific Gender and Family. (3 Units)

Critical analysis of Asian gender and family structure and their dynamic processes. Examines issues of dating, marriage, reproduction, parenting and child socialization, domestic labor, the negotiation of paid work and family care, sexual desires and practices.

Offered Fall, Spring

APP 395. Special Topics in Asian Pacific Studies. (3 Units)

Prerequisite: Consent of program coordinator. An intensive study of an issue, concept or theme in Asian-Pacific Studies. Repeatable for a maximum of nine units for credit.

Offered As needed

APP 490. Sem: Asian-Pacific Issues. (3 Units)

Prerequisites: APP 301 and APP 321. Capstone experience in Asian-Pacific concentration. In-depth study and project development of historical or current issues confronting Asian-Pacific populations. Three hours of seminar per week.

Offered Infrequent

APP 494. Indepen Study:Asian-Pacific. (1-3 Units)

Independent study of a particular topic in Asian/Pacific Studies, relating two or more disciplines, such as anthropology, art, education, history, languages, music, philosophy, politics, or sociology under the direction of an Asian/Pacific Studies Program faculty member. Repeatable course.

Offered Fall, Spring

APP 495. Selected Topics:. (3 Units)

An intensive study of selected topics or issues in Asian-Pacific studies.

Offered Infrequent

APP 496. Internship in Asian Pacific Studies. (1-3 Units)

Prerequisites: Lower division courses in Asian Pacific Studies Involves supervised work experience in community-based business, non-profit organization, or government agency serving Asian Pacific Americans with specific emphasis upon business and public administration, public policy, program planning, and economic development projects in a local, national, and/or international setting. Supervision emphasizes training and application of administration, analytical, socio-political and cultural knowledge, and technical skills. Students will be placed in setting suitable to their academic specialization. One hour of tutorial per week is required with instructor. Student must complete all of the lower division courses in Asian Pacific Studies before they can enroll in an internship.

Offered Fall, Spring

Asian-Pacific Studies, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

No minor required.

Major Requirements (39 units)

The following courses or their approved transfer equivalents, are required of all candidates for this degree.

| Code | Title | Hours |
|--|--|-------|
| Lower Division Requirements | | |

Electives

Select any two additional upper-division courses in APP or one upper-division APP course plus one of the courses below with the approval from the coordinator **6**

| | | |
|---------|--------------------------------------|--|
| ANT 338 | Mainland Southeast Asia | |
| HIS 362 | Traditional China | |
| HIS 363 | Modern China | |
| HIS 365 | Modern Japan | |
| POL 333 | International Relations of East Asia | |
| POL 341 | Gov and Politics of East Asia | |

Capstone Requirement

| | | |
|---------|---------------------------|----------|
| APP 490 | Sem: Asian-Pacific Issues | 3 |
|---------|---------------------------|----------|

Total Hours 39

¹ Note: APP 395 Special Topics in Asian Pacific Studies may be repeated twice with different course topics. In order to fulfill upper-division concentration requirements, APP 494 Indepen Study:Asian-Pacific should be taken for 3 units.

Program Learning Outcomes

- Identify the geographies and cultural areas of the Asian Pacific region.
- Explain cultural traditions, histories and sociopolitical issues of the Asian Pacific region.
- Compare the histories and sociocultural traditions of at least two different Asian Pacific countries.
- Describe the immigration histories and contemporary issues of Asian Americans.
- Outline the processes of globalization and how it affects the lives of Asian Pacific populations including Asian Americans.
- Demonstrate analytical, critical thinking and communication skills in written and oral presentations.
- Exhibit computer and information literacy including the skills to use scholarly resources for research and to utilize appropriate computer programs for written and oral presentations.

Audio Engineering

College of Arts and Humanities
Department of Digital Media Arts

Program Description

The B.A. in Audio Engineering at CSUDH is a hands-on, professionally-oriented program geared for students who want marketable job skills for careers in studio recording, live sound reinforcement, and sound design for television, film, and live theatre. Students track, mix, and master their own audio projects for television documentaries, public service announcements (PSA's), instructional films, and a variety of client-based projects for nonprofit organizations, community groups, and corporate partners.

The mission of the Audio Engineering degree is to

1. provide an academic program that gives students a solid base in the theory and technology skills required for professional careers in studio recording, live sound reinforcement, and sound design;
2. provide hands-on experience in the basic software and hardware tools utilized in studio recording, live sound reinforcement, and sound design;
3. provide the opportunity for students to work in teams, applying their producing, directing, writing, editing, and engineering skills to produce a variety of professional-quality studio recording, live sound reinforcement, and sound design; and
4. develop interpersonal skills and professional demeanor that will enable students to work effectively and cooperatively as team players on collaborative projects in the industry.

The Audio Engineering curriculum emphasizes collaborative teamwork among the students in the Digital Media Arts Department's degree programs. For example, Film & Television students will write, produce, film, and edit a television documentary or short movie that our Audio Engineering students then take over to perform the sound design elements of ADR, foley, and sound effects editing, while our Music Technology students compose, arrange, and record original music scores for the film's soundtrack. Conversely, our Audio and Music Technology

students record and produce a band's song while the Film & Television students film and edit the music video of the song as well as the bonus material such as interviews with the band and behind-the-scenes "making of" footage for the interactive DVD, Blu-ray, or website.

The Audio Engineering degree is geared for students who want to have careers working as professionals in the media industry. These career goals include producer, sound engineer, sound designer, re-record mixer, sound effects editor, and audio/video post production. With Hollywood just 20 minutes from campus, our students have the opportunity to work for and serve internships at a variety of commercial recording studios, live sound reinforcement companies, TV stations, motion picture studios, audio and video post production houses, and cable networks. There are also internship and employment opportunities for our students in noncommercial media venues such as educational media at schools and colleges and in-house media production at major corporations and community organizations.

Features

Recording Studios equipped with Pro Tools 10 HD with HDX 24 In/ Outs; SSL AWS-900+SE, 32x24x2 Console, 32x24x2 Sound Workshop Console, Furman HDS-6 and HR-6 headphone distribution system, Blue Sky monitors, various plug-ins by Sony, Oxford, Line 6, Digidesign, Native Instruments, Focusrite, Massenber Design Works, M-Audio, and McDSP, and a variety of professional microphones such as Neumann U-87, TLM-170, KM-83/84, AKG C414, Audix DP-5 drum pack, Groove Tube MD-1, and Sennheiser MD421 for recording, mixing, and mastering in stereo and 5.1 surround. Avantone Reference Monitors are also available for composite soundtrack mixing of dialogue, foley, sound effects, and music score for television and film projects.

Design Labs equipped with Mac Pro computer stations allow students to design disc cover packaging, motion graphics, television titles, websites, and green screen effects using Photoshop, Illustrator, After Effects, and Dreamweaver.

Graduation with Honors

Undergraduate students may be candidates for graduation with honors in Digital Media Arts if they meet the following criteria:

1. A minimum of 45 units in residence at CSU Dominguez Hills.
2. A minimum grade point average of 3.7 in all courses used to satisfy the requirements for the Digital Media Arts major.
3. A cumulative grade point average of 3.7 in all courses taken at CSU Dominguez Hills.

Academic Advisement

Audio Engineering courses are offered in a specific sequence that requires prerequisite and co-requisite courses. Therefore, it is crucial that students contact the department advisor, Dr. George Vinovich at gvinovich@csudh.edu before enrolling in or planning a course schedule. Consulting with the appropriate advisor ensures that students complete their program in the most expedient and efficient manner possible. In this way, students do not waste time and energy by completing unnecessary courses and units. Department advisors also serve as career counselors and concerned mentors to help bridge the gap between the world of the university and the world of the working professional

Preparation

Students interested in pursuing professional careers in the highly-competitive audio engineering industry should be aware that those who

succeed in establishing a career in the industry are characteristically hard-working, disciplined, focused on a career, and most of all, resilient to persevere in the face of continuous rejection. Strong computer skills are a definite advantage in this field. Additionally, students familiar with computer software such as Pro Tools, Logic, Reason, and the Adobe Creative Suite will find these skills essential in the rapidly changing world of media production and delivery.

Recommended Lower Division Electives

There are no specific lower division courses recommended for this major; however, any experience with software programs such as Pro Tools, Logic, Reason, Photoshop, Illustrator, and Audition would be helpful.

Student Organizations

Audio Engineering students can enhance their academic studies and involvement in the industry by joining the DMA Success Club on campus or by becoming student members of professional organizations such as the Audio Engineering Society (AES) or the Society of Motion Picture and Television Engineers (SMPTE). Student membership in these professional associations allows students to network with industry executives and working professionals regarding internships and job opportunities in the field. The proximity of the campus to the center of the media and entertainment industry of Hollywood, Burbank, and Los Angeles allows students to attend major trade show conferences such as ShowBiz Expo, Post L.A., DV Expo, SMPTE, and NAB.

Career Possibilities

Graduates in Audio Engineering will find career opportunities in a wide range of entertainment, informational, and educational venues. The broad focus of the curriculum prepares students for roles as producer, sound engineer, sound designer, re-record mixer, sound effects editor, and audio/video post production. With its emphasis on hands-on training and production project experience graduates of the program are qualified for a variety of career opportunities at commercial recording studios, live sound reinforcement for concerts and theater, TV stations, motion picture studios, audio/video post-production houses, and cable networks. There are also employment opportunities for our students in noncommercial media venues such as educational media at schools and colleges and in-house media production at major corporations and community organizations.

| DMA 432 | Recording Studio Maintenance | 2 |
| DMA 433 | Recording Studio Maintenance Lab | 1 |
| DMA 435 | Advanced Music Synthesis | 3 |
| DMA 436 | Advanced Music Synthesis Lab | 1 |
| DMA 438 | Music Production | 3 |
| DMA 439 | Music Production Lab | 1 |
| DMA 447 | Audio Projects Lab | 1 |
| DMA 452 | Audio Production | 3 |
| DMA 456 | Mixing and Mastering | 3 |
| DMA 460 | Digital Audio Workstation Concepts | 3 |
| DMA 496 | Internship in the Media | 1-3 |
| Writing Requirement | | |
| DMA 300 | Digital Technology, Culture and the Arts | 3 |
| Capstone Experience | | |
| DMA 490 | Senior Seminar | 3 |
| DMA 499 | Senior Proj Digital Media | 2 |
| Total Hours | | 49-51 |

¹ Note: Students are required to take three semesters of DMA 346 Digital Media Prod Workshop.

Program Learning Outcomes

Students who successfully complete a B.A. in Audio Engineering will be able to:

- Demonstrate application of the basic software and hardware tools used in digital media projection.
- Produce a product that reflects professional level production value and standards relative to student producer time and budget constraints.
- Demonstrate ability to create and produce a capstone digital media product that meets the objective of its target audience.
- Demonstrate ability to work effectively and cooperatively with others as a co-producer on team projects.
- Perform in a manner that is consistent with the professional image and demeanor of the digital media industries.

Behavioral Science

College of Natural and Behavioral Sciences

Program Description

The undergraduate program in Behavioral Science is designed to provide the student with a broad systematic understanding of human behavior, and of the biological, psychological, cultural, political and social factors that influence such behavior. The program stresses the mastery of key behavioral science concepts; exposure to significant behavioral science theories drawn from psychology, sociology, anthropology and political science; the development and utilization of rigorous investigation, observation and research skills common to the behavioral sciences; and the ability to integrate knowledge across the behavioral sciences. The program provides practical knowledge and skills with enduring career applicability.

Features

The undergraduate program in Behavioral Science is designed to provide the student with a broad systematic understanding of human behavior, and of the biological, psychological, cultural, political and social factors that influence such behavior. The program stresses the mastery of key behavioral science concepts; exposure to significant behavioral science theories drawn from psychology, sociology, anthropology and political science; the development and utilization of rigorous investigation, observation and research skills common to the behavioral sciences; and the ability to integrate knowledge across the behavioral sciences. The program provides practical knowledge and skills with enduring career applicability.

Academic Advisement

Students are encouraged to contact Dr. Hyo Joon Chang, the Behavioral Science Program Coordinator at (310) 243-3481 for information and for advising. The Behavioral Science Program Coordinator would be pleased to discuss the program with interested students.

Preparation

Completion of the General Education lower division requirements is recommended. Introductory-level courses in one or more of the disciplines contributing to behavioral sciences would be helpful.

Graduation with Honors

An undergraduate student may be a candidate for graduation with Honors in Behavioral Science by meeting the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of at least 3.5 in all courses used to satisfy the upper division requirements in the major.

Career Possibilities

Completion of the strong and diversified Behavioral Science Program will enhance the student's chances for employment in the various helping professions, government and industry. Positions in communication, recreation, gerontology and health sciences would be likely options for behavioral science students. Moreover, the application of behavioral science knowledge and training would be beneficial in the solution of critical social and business problems.

Undergraduate Programs

Bachelor

- Behavioral Science, Bachelor of Arts (p. 390)

Minor

- Behavioral Science, Minor (p. 392)

Faculty

Dr. Hyo Joon Chang, Behavioral Science Program Coordinator
 Dr. Heather Butler (Psychology), Dr. Carl Sneed (Sociology), Dr. Sarah Taylor (Anthropology), Dr. Hyo Joon Chang (Political Science)

Program Office: SBS G-322, (310) 243-2123

Courses

BEH 300. Res Methods Behavioral Science. (3 Units)

Prerequisites: MAT 131 or PSY 230 or SOC 220 and junior standing.

The course covers five areas: preparing and writing an academic paper, preparing and writing a literature review, developing a research proposal, general research methodology and delivering a research presentation. Offered Fall, Spring

BEH 490. Seminar In Beh Sciences. (3 Units)

Prerequisites: Prerequisites: MAT 131, PSY 230 OR SOC 220 and BEH 300, POL 300, and SOC 305 are required. Must pass with grade C or better. Senior standing required. A seminar designed to integrate previous course work by approaching selected problems from the perspective of the various behavioral sciences. Preparation of seminar paper. Three hours of seminar
 Offered Fall, Spring, All terms

Behavioral Science, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Students completing this major are not required to complete a minor in another field. However, it is recommended that students in the major complete a minor in one of the other social and behavioral sciences (Anthropology, Political Science, Psychology, or Sociology).

Major Requirements (44-45 units)

All courses applied to the BA in the Behavioral Science Program must be passed with a grade of "C" or better.

The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

| Code | Title | Hours |
|---|---|-------|
| Prerequisite Courses ¹ | | |
| POL 101 | American Institutions ² | 3 |
| Select one course from the following: | | 3-4 |
| MAT 131 | Elementary Statistics and Probability ³ | |
| PSY 230 | Elementary Statistical Analysis in Psychology | |
| SOC 220 | Analytical Statistics | |
| Upper Division Requirements | | |
| BEH 300 | Res Methods Behavioral Science ⁴ | 3 |
| ANT 388 | Anthro Theories Of Behav | 3 |
| POL 300 | Research Design in Political Science | 3 |
| POL 310 | Current Issues in American Government | 3 |
| PSY 305 | History and Systems of Psychology | 3 |
| SOC 305 | Methods Of Soc Research | 4 |
| SOC 355 | Modern Sociological Theories | 4 |
| BEH 490 | Seminar In Beh Sciences ⁵ | 3 |
| Elective Courses | | |
| Select three of the following courses: ⁶ | | 9 |
| ANT 310 | Culture & Personality: Psychological Anthropology | |
| ANT 312 | Language And Culture | |
| ANT 315 | Magic & Religion | |
| ANT 336 | Comparative Cultures: Culture, Environment and Globalization | |
| ANT 337 | Ethnography and Film | |
| POL 314 | American Political Parties and Elections | |
| POL 325 | Women and Politics in the United States | |
| POL 336 | Theories of International Relations | |
| POL 370 | Public Opinion and Propaganda | |
| PSY 340 | Social Psychology: Psychological Perspective | |
| PSY 350 | Child Psychology | |
| PSY 353 | The Experience of Death and Dying: Psychological Perspectives | |
| PSY 360 | Theories Of Personality | |
| PSY 363 | Abnormal Psychology | |

| | |
|---------------------------------------|---|
| SOC 311 | Global Organizations and Social Processes |
| SOC 320 | The Family |
| SOC 340 | Social Psychology: Sociological Perspective |
| SOC 365 | Deviant Behavior |
| Applied Elective Course | |
| Select one course from the following: | |
| ANT 390 | Applied Anthropology |
| BIO 370 | Bio Basis Human Behavior |
| POL 401 | Political and Public Sector Leadership |
| PSY 314 | Behavior Modification |
| SOC 304 | Computer Applications |
| SOC 306 | Program Evaluation |

Total Hours 44-45

- ¹ These are Prerequisite Courses only, they may be taken both to satisfy the General Education requirement and to fulfill this Prerequisite requirement.
- ² To qualify for graduation, each student shall demonstrate knowledge of the Constitution of the United States and the principles of state and local government established under the Constitution of the state of California. This statutory requirement may be satisfied by completion of POL 101 American Institutions.
- ³ MAT 131 Elementary Statistics and Probability fulfills General Education, Area B4.
- ⁴ BEH 300 Res Methods Behavioral Science must be completed by the student within the first two semesters of taking any upper division course for the major.
- ⁵ Prerequisites: BEH 300 ([https://catalog.csudh.edu/search/?P=BEH %20300](https://catalog.csudh.edu/search/?P=BEH%20300)), POL 300 (<https://catalog.csudh.edu/search/?P=POL%20300>), and SOC 305 (<https://catalog.csudh.edu/search/?P=SOC%20305>) are required. Senior standing required. Only offered in spring
- ⁶ Each selected course should be from a different behavioral science area than other chosen electives (anthropology, political science, psychology or sociology). Students with a minor in one of these areas are to select all elective courses (listed below) from an area different from their minor.

Program Learning Outcomes

- Students will demonstrate mastery of Theories and Concepts from the four core theory courses—from PSY, SOC, ANT, POL—required of all BEH majors.
- Students will demonstrate mastery of Interdisciplinary Research Methods from the Social Behavioral Sciences—including the development of a written research proposal and giving a presentation based on that proposal – from BEH 300.
- Students will demonstrate mastery of an ability to integrate ideas from across the Behavioral disciplines—from BEH 300 and BEH 490.
- Students will demonstrate mastery of critical reasoning skills—from BEH 300 and BEH 490
- Students will complete a relatively simple interdisciplinary research project using two forms of research methodologies – BEH 490.
- Students will learn terms and basic concepts having to do with various research methods across the four contributing disciplines – BEH 300

4-Year Degree Roadmap

| First Year | | Hours |
|---|--|-----------|
| Fall | | |
| GE Area A1 Oral Communication | | 3 |
| GE Area B1 Physical Science | | 3 |
| GE Area C1 Arts Course | | 3 |
| HIS 101 | History Of United States | 3 |
| Elective to meet 120 units | | 3 |

Behavioral Science, Minor Requirements

| Code | Title | Hours |
|--|--|-------|
| Upper Division Required Course | | |
| BEH 300 | Res Methods Behavioral Science | 3 |
| Elective Courses | | |
| Select four courses from the following: ¹ | | 12 |
| ANT 310 | Culture & Personality: Psychological Anthropology | |
| ANT 312 | Language And Culture | |
| ANT 315 | Magic & Religion | |
| ANT 336 | Comparative Cultures: Culture, Environment and Globalization | |
| ANT 337 | Ethnography and Film | |
| ANT 388 | Anthro Theories Of Behav | |
| POL 314 | American Political Parties and Elections | |
| POL 325 | Women and Politics in the United States | |
| POL 336 | Theories of International Relations | |
| POL 370 | Public Opinion and Propaganda | |
| POL 371 | Conflict, Violence, Nonviolence and Peace | |

| | |
|---------|---|
| PSY 305 | History and Systems of Psychology |
| PSY 340 | Social Psychology: Psychological Perspective |
| PSY 350 | Child Psychology |
| PSY 353 | The Experience of Death and Dying: Psychological Perspectives |
| PSY 360 | Theories Of Personality |
| PSY 363 | Abnormal Psychology |
| SOC 311 | Global Organizations and Social Processes |
| SOC 320 | The Family |
| SOC 340 | Social Psychology: Sociological Perspective |
| SOC 355 | Modern Sociological Theories |
| SOC 365 | Deviant Behavior |

Total Hours **15**

¹ One course in each of the core disciplines of the behavioral sciences: anthropology, political science, psychology and sociology. However, students with a major in anthropology, political science, psychology or sociology are to select the fourth course from one of the disciplines other than their major.

Biochemistry

College of Natural and Behavioral Sciences
Department of Chemistry and Biochemistry

Department Mission Statement

The California State University Dominguez Hills (CSUDH) Chemistry and Biochemistry department provides world class academic excellence across the chemical society by engaging a diverse student body and faculty that will strive for the finest quality of service in a dynamic learning environment to provide cutting edge research and from the University community prepare the next generation of critical thinkers, scientists, and industry leaders.

Program Description

The Bachelor of Science in Biochemistry will prepare students for graduate work in chemistry or biochemistry; teaching chemistry in secondary schools; employment with industry or government; entry into professional schools such as medicine or dentistry; or entry into law school with a view toward specialization in patent or environmental law. The department is approved by the American Chemical Society (ACS), 1155 Sixteenth Street, N.W., Washington, DC, 20036.

Features

The department is housed in well-equipped offices and laboratories with state of the art instruments on the third floor of the Natural Sciences and Mathematics Building. The faculty consists of full-time members who represent all the major areas of chemistry. Students generally benefit from the smaller class sizes and the individualized attention, which is seldom available at large universities. Students are introduced to modern instrumental techniques and are given many opportunities for "hands-on" experience.

Academic Advising

Students who are majoring in biochemistry should be advised once each semester, prior to registration. Permanent records of advisement are kept in the department office.

Preparation

High school students should include two years of algebra, one year of geometry and a one-year course in chemistry in their high school preparation. A course in high school physics also is recommended. Students who enter without this preparation must expect to delay their graduation beyond the minimum time-period of four years.

Community college transfers should have completed one year of general chemistry, one year of calculus and one year of physics.

Pre-Medical Professions Training in Biochemistry

Students who wish to apply to professional schools of medicine, dentistry, veterinary medicine, or other medical areas following graduation should consider completing the requirement for a B.S. degree in Biochemistry. In addition, students should complete the elective course that was not selected to fulfill the degree requirements.

The following courses are not usually required for admission to medical school, but it is recommended that students consider them when planning their academic program. Many former students have found them to be a valuable introduction to courses that must be taken in many professional programs.

| Code | Title | Hours |
|---------|----------------------|-------|
| BIO 422 | Histology | 3 |
| BIO 424 | Histology Laboratory | 1 |
| BIO 453 | Endocrinology | 3 |
| BIO 483 | Human Physiology | 3 |

Student Organizations

Membership in the Science Society of CSU Dominguez Hills is open to all students. The Society encompasses all of the scientific disciplines and is also a Student Affiliate Chapter of the American Chemical Society. It was founded to serve the interests and concerns of science students and sponsors scientific, educational, professional and social activities. The American Chemical Society has commended the Science Society for the high quality of its activities and programs. Contact the Department of Chemistry for further information.

Graduation With Honors

An undergraduate student may be a candidate for graduation with Honors in Biochemistry provided he or she meets the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of at least 3.5 in all courses used to satisfy the upper division requirements in the major.

Career Possibilities

A Major in Biochemistry will prepare students for graduate work in chemistry or biochemistry; teaching chemistry in secondary schools; employment with industry or government; entry into professional schools

such as medicine or dentistry; or entry into law school with a view toward specialization in patent or environmental law.

Students may prepare for a career in teaching science at the secondary level (junior high or high school) by completing an approved "Subject Matter Preparation Program." Completion of such a program is the first step in meeting the state requirements for a teaching credential. As the program requirements for the "Subject Matter Preparation Program" in science have changed recently, interested students should consult the departmentally designated advisor for current information.

Undergraduate Programs

Bachelor

- Biochemistry, Bachelor of Science (p. 394)

Faculty

Arumugam Thangavel, Department Chair
H. Leonardo Martinez, Noel Sturm, Lihung Pu, Tieli Wang, Patrick Still, Kenneth R. Rodriguez, Kari Pederson, Erin McCauley, Barbara Belmont, and Lida Latizadeah

Staff

Laboratory Technicians: Anthony Diaz (Led Lab Technician), Justin Hathaway, and Amber M. Rivas

Department Office: SCI 324, (310) 243-3376

Emeriti Faculty

Ulrich de la Camp, L. Danette Dobyns, Eugene N. Garcia, James Lyle, Sofia Papatheodorou, Oliver Seely, George Wiger, William Wilk

Biochemistry, Bachelor of Science

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major, no minor required.

Major Requirements (81 units)

The following courses, or their approved transfer equivalents, are required of all candidates for this degree. A grade of "C" or better must be achieved in all courses.

| Code | Title | Hours |
|--|-------------------------------------|-----------|
| Lower Division Required Courses | | |
| BIO 120 | Principles of Biology I | 3 |
| BIO 121 | Principles of Biology Laboratory I | 1 |
| BIO 122 | Principles of Biology II | 3 |
| BIO 123 | Principles of Biology Laboratory II | 1 |
| CHE 110 | General Chemistry I | 5 |
| CHE 112 | General Chemistry II | 5 |

| CHE 453 | Biochemistry II Lab | 2 |
| Electives | | |
| Select six units from the following: | | 6 |
| BIO 314 | Developmental Biology | |
| BIO 315 | Developmental Biology Lab | |
| BIO 320 | Cell Biology | |
| BIO 340 | Genetics ² | |
| Total Hours | | 81 |

¹ Major students may substitute this course for General Education Area E. Please contact the University Advisement Center to request the course substitution.

² Major students may substitute this course for General Education Area F2. Please contact the University Advisement Center to request the course substitution.

Bachelor of Arts and Bachelor of Science Chemistry/Bachelor of Science Biochemistry Program Learning Outcomes

- General familiarity with the following areas in chemistry: analytical, biochemistry, inorganic, organic and physical.
- Developed formal (abstract) thinking skills as well as concrete thinking skills.
- Learned how to think critically and analyze chemical problems.
- The ability to work effectively and safely in a laboratory environment.
- The ability to work in teams as well as independently.
- The ability to communicate effectively, both orally and in writing.

4-Year Degree Roadmap

| Course | Title | Hours |

Biology

College of Natural and Behavioral Sciences
Department of Biology

Program Description

The Biology Program at CSU Dominguez Hills is designed to provide students with intensive, progressive and balanced learning experiences in cell and molecular biology, organismal biology, population and community biology, and environmental science.

The Biology Department offers students eight programs from which to choose:

1. An undergraduate program which awards the Bachelor of Arts Degree;
2. Three undergraduate major options that award the Bachelor of Science Degree: a Cellular and Molecular Biology Option, an Ecology and Environmental Biology Option and a Microbiology Option;
3. Two minor programs: a General Minor and a Microbiology Minor;

4. A Biological Science Subject Matter Preparation Program for students pursuing a secondary teaching credential;
5. A graduate program which awards the Master of Science Degree.

Subject Matter Preparation Program

The Subject Matter Preparation Program is authorized by the California Commission on Teacher Credentialing. This course of study includes a number of prescribed courses that address proficiency standards for content knowledge required for the Single Subject credential in Biological Sciences. Interested students should contact the departmentally designated advisor for current information.

Specific Biological Sciences Subject Matter Authorization (32 units)

Holders of a Single Subject or Multiple Subject credential issued by the California Commission on Teacher Credentialing may secure an additional Specific Biological Sciences Subject Matter Authorization that allows the holder to teach the specific subjects in grades preschool, K-12, and classes organized primarily for adults.

For other requirements governing the issuance of this authorization, consult the Teacher Education section of this catalog or contact the College of Education Student Services Center.

Features

The most important feature of the Biology Department is its excellent faculty, of which all full-time and most part-time members hold a doctoral degree. They are dedicated to excellence in teaching and are active in basic and applied research and other scholarly activities. The department currently has more than \$1.5 million in private foundations, federal and international research grants. Another attractive feature of the department is its small class size. This allows students to interact frequently and effectively with instructors both within and outside of class. It also permits instructors to easily identify students in need of additional assistance and to supply such assistance.

The Biology Department's teaching and research facilities are modern and well equipped. Special facilities and equipment that are available for student use include a tissue culture laboratory, a next-generation sequencer, a greenhouse and a nature preserve. In addition to on-campus facilities, students may study marine biology and desert biology using facilities available in the Southern California Ocean Studies Institute and the Desert Studies Consortium. Excellent computer and library facilities also are available.

Since the Biology faculty maintain several diverse research programs that are well supported by public and private funds, the department can provide both undergraduate and graduate students with opportunities to actively participate in research. Biology students have been successful, not only in conducting research, but in presenting reports at scientific meetings, publishing their findings, and receiving national recognition for the high quality of their work.

Academic Advisement

The Biology Department requires that each semester prior to or during registration, undergraduate and graduate students meet with their biology advisor to review their progress, select new courses, update their departmental advisement file, explore career options, and to discuss any issues they may have encountered.

Preparation

Students planning to enter the biology program directly from high school should prepare by completing four years of English, including composition; algebra, geometry, trigonometry, and pre-calculus if available; and at least one year each of biology, chemistry, and physics.

Students transferring from a community college should have completed one semester of statistics, one semester of calculus, one year of introductory biology and one year of general chemistry.

Graduation with Honors

An undergraduate student may be a candidate for graduation with Honors in Biology provided the following criteria are satisfied:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of 3.5 in all courses used to satisfy the upper-division requirements in the major.

Students who achieve Honors in Biology will have the information recorded on their transcripts and diplomas.

Pre-Health Professions in Biology

Students who choose a career in the health professions, e.g. medicine, pharmacy, dentistry, physician assistant, veterinary medicine, etc. must satisfy certain prerequisites for entry into programs that offer those degrees. Students interested in a healthcare career often chose biology as their major since many of the prerequisites are required courses in biology; however, a pre-health student may declare any major if the prerequisites are met. Regardless of major, students choosing to become a health professional are highly recommended to meet with a CSUDH Pre-Health Advisor. Currently these individuals are Dr. HK Choi and Professor Nancy Roback (Chemistry).

In general, the courses required for many of these programs include General Biology (BIO 120 and BIO 121 Principles of Biology I with Lab/ BIO 122 and BIO 123 Principles of Biology II with Lab), General Chemistry (CHE 110 General Chemistry I/CHE 112 General Chemistry II), Organic Chemistry (CHE 310 and CHE 311 Organic Chemistry I with Lab/CHE 312 and CHE 313 Organic Chemistry II with Lab) and Physics (PHY 120 Elements Of Physics I/PHY 122 Elements Of Physics II). Most programs have their unique requirements, so individual review of all prerequisites is recommended. For example, medical schools strongly recommend one semester of biochemistry (CHE 450 Biochemistry I) in addition to the prerequisites listed above, whereas other programs, such as pharmacy school, may require two semesters of biochemistry with laboratory. Due to the variation of prerequisites at different institutions, students are advised to work closely with Pre-Health advisors.

In addition to the prerequisite courses, most programs require other components for their application, e.g.

1. a standardized test such as the MCAT, DAT, OAT, etc.;
2. GPAs, both the overall and BCPM (biology, chemistry, physics and math);
3. a personal statement;
4. letters of recommendation;
5. experience associated with the eventual health profession, e.g. some exposure to clinical situations such as volunteering, internships, etc.

To schedule a career advising appointment with a Pre-Health advisor, contact the Biology Office at 310-243-3381.

Career Possibilities

A student in the Biology Department will be prepared to pursue a variety of career opportunities, depending on the curricular program chosen. An undergraduate major may choose any of the options. The Cellular and Molecular Biology Option can fulfill the major entrance requirements for professional schools of medicine, dentistry, veterinary medicine, pharmacy, optometry, podiatry and medical technology, or prepare the student for further graduate study in biology. Biology graduates from CSU Dominguez Hills have competed successfully for admission to professional and graduate schools in California and elsewhere. Students also may use the Cellular and Molecular Biology Option to prepare for careers in teaching, research, government, academia or the biotechnology industry. The Ecology and Environmental Biology option will prepare students for graduate studies or careers with federal, state, and local agencies, non-governmental organizations (NGOs) and consultants, and careers in teaching, among others. The Microbiology Option provides training in microbiology, medical microbiology, immunology and related courses (virology, mycology and parasitology) for students interested in a career in applied biology, biomedical research or allied fields.

Students may prepare for a career in teaching science at the secondary level (junior high or high school) by completing an approved "Subject Matter Preparation Program." Completion of such a program is the first step in meeting the state requirements for a teaching credential. Interested students should consult the departmentally designated advisor for current information.

The Master of Science program in Biology will provide students with an in-depth background suitable for pursuing a career in biological research, teaching or in a related field such as public health, psychology and human services. Students may develop a program of courses and research that is tailor-made to their individual needs within the areas of expertise of their advising faculty. The graduate program also can establish a strong foundation for training in medicine, dentistry, veterinary, pharmacy, and allied health professions, as well as doctorate programs.

Undergraduate Programs

Bachelors

- Biology, Bachelor of Arts (p. 402)
- Biology, Bachelor of Science (p. 404)

Minors

- Biology, Minor (p. 410)
- Microbiology, Minor (p. 410)

Graduate Programs

Master

- Biology, Master of Science (p. 408)

Subject Matter Preparation

- Biology, Subject Matter Preparation (p. 410)

Faculty

Helen Chun, Department Chair

Fang Wang, Graduate Program Coordinator

H.K. Choi, Karin Kram, Samantha Leigh, Charlene McCord, Terrence McGlynn, Sonal Singhal, Davood Soleymani, Eillen Teclé, Kathryn Theiss, Justin Valliere, Fang Wang

Department Office: SCI 229, (310) 243-3381

Emeriti Faculty

David E. Brest, Lois W. Chi, Evelyn Tutt Childress, Robert V. Giacosis, Carol Guze, Catherine Jacobs, Gene A. Kalland, Getachew Kidane, Richard

Kuramoto, Thomas Landefeld, Francis McCarthy, Laura M. Phillips, John Roberts, Laura Robles, John Thomlinson

Courses

BIO 101. Success for Biologists. (1 Units)

Co-requisite: CHE 108 is required. This course will introduce concepts and skills to help students successfully navigate STEM courses and the biology major. Study skills, resources, careers, and academic mindset will be discussed. Students will be asked to reflect on their own learning. Consent required.

Offered Fall, Spring

BIO 102. General Biology. (3 Units)

Representative topics in modern biology, emphasizing the present state of knowledge and the major means whereby this knowledge is being expanded. Three hours of lecture per week.

Offered Fall, Spring

BIO 103. General Biology Laboratory. (1 Units)

Prerequisite: BIO 102 (may be taken concurrently) Laboratory work and demonstrations in representative areas of modern biology. Emphasizes scientific methodology. Three hours of laboratory per week.

Offered Fall, Spring

BIO 120. Principles of Biology I. (3 Units)

Prerequisite: CHE 108 or satisfactory performance on General Chemistry Placement Test. CHE 110 is recommended. Co-requisite: BIO 121.

Introduction to basic biological concepts including biochemistry and macromolecules, the structure and function of cells, basic genetic principles, DNA replication, transcription and translation. Three hours of lecture per week.

Offered Fall, Spring

BIO 121. Principles of Biology Laboratory I. (1 Units)

Co-requisite: BIO 120. Laboratory investigations of the properties of biological molecules and cells, metabolism, and patterns of inheritance. Modern laboratory techniques and application of the scientific method are emphasized. Three hours of laboratory per week.

Offered Fall, Spring

BIO 122. Principles of Biology II. (3 Units)

Prerequisites: BIO 120 and BIO 121, CHE 108 or satisfactory performance on General Chemistry Placement Test. CHE 110 is recommended. Co-requisite: BIO 123. Introduction to basic biological concepts, including biology of prokaryotes, fungi, plants, invertebrates, and vertebrates, the anatomy and physiology of select organ systems. Three hours of lecture per week.

Offered Fall, Spring

BIO 123. Principles of Biology Laboratory II. (1 Units)

Laboratory investigations demonstrating the major properties of the animal kingdom, plant structure and reproduction, vertebrate organ systems and animal fertilization. Application of the scientific method is emphasized. Three hours of lab per week.
Offered Fall, Spring

BIO 124. Principles of Biology III. (3 Units)

Prerequisites: BIO 122 and BIO 123. Co-requisite: BIO 125. Introduction to basic concepts of evolution and ecology, including Darwinian evolution, biogeography, biodiversity, genomics, biomes, coevolution, and population, community, ecosystem, landscape, behavioral ecology. Three hours of lecture per week.
Offered Fall, Spring

BIO 125. Principles of Biology Lab III. (1 Units)

Co-requisite: BIO 124. Fossils and stratigraphy, population genetics and ecology, field measurements in ecology and field trips to local ecosystems. Three hours of laboratory per week.
Offered Fall, Spring

BIO 190. Introduction to Marine Life. (3 Units)

General aspects of marine biology including the principles of physical and biological oceanography, the biological processes of marine life and the ecology of marine environments.
Offered As needed

BIO 195. Special Topics in Biology. (1-3 Units)

Introductory course of special interest in Biology for entry level students. Topic and content will vary as announced. Two to three hours of lecture per week. Not open for credit toward the Biology major.
Offered Infrequent

BIO 214. Embryology. (2 Units)

Offered All terms

BIO 220. Molecular Biology. (3 Units)

Prerequisites: BIO 120, BIO 121, BIO 122, BIO 123 and CHE 110. Co-requisite: BIO 221. Principles of molecular biology including DNA replication, transcription, translation, DNA recombination and repair and gene regulation. Emphasis on prokaryotic and eukaryotic systems. Three hours of lecture per week.
Offered Fall, Spring, All terms

BIO 221. Molecular Biology Laboratory. (1 Units)

Co-requisite: BIO 220. Basic laboratory techniques used in molecular biology, including DNA recombination, cDNA synthesis, PCR, transfection, gel electrophoresis, protein purification, immunoblotting. Required laboratory reports. Three hours of laboratory per week.
Offered Fall, Spring

BIO 250. Elem Hum Anat & Physiol. (3 Units)

Prerequisite: BIO 102 or equivalent or BIO 120 or equivalent. Basic principles of anatomical structure and physiological processes of human organ systems. Not open for credit toward the Biology major. Three hours of lecture per week.
Offered Fall, Spring, All terms

BIO 251. Elem Hum Anatomy Phys Lab. (1 Units)

Co-requisite: BIO 250. Laboratory work and demonstration in the anatomical structure and processes occurring in man. Not open for credit toward the Biology major. Three hours of laboratory per week.
Offered Fall, Spring

BIO 254. Human Biology. (3 Units)

Prerequisite: BIO 102 or equivalent. Biological aspects of humans with emphasis on structure and function of organ systems. Additional topics may include human origins, diseases, and health aspects of human genetics and the environment. Not open for credit towards the Biology major. Three hours of lecture per week.
Offered Fall

BIO 310. Plant Physiology. (3 Units)

Prerequisites: BIO 124, BIO 125. Co-requisite: BIO 311. An introduction to cell metabolism in plants. Topics include photosynthesis, respiration, amino acid synthesis and lipid metabolism. Physiology of plants, including hormones, photoperiodism and circadian rhythms, will also be covered. Three hours of lecture per week.
Offered Spring

BIO 311. Plant Physiology Laboratory. (1 Units)

Co-requisite: BIO 310. Associated laboratory to BIO 310. Topics include photosynthesis, respiration, amino acid synthesis and lipid metabolism. Physiology of plants, including hormones, photoperiodism and circadian rhythms, will also be covered. Three hours of laboratory per week.
Offered Spring

BIO 312. Animal Physiology. (3 Units)

Prerequisites: BIO 124, BIO 125. Co-requisite: BIO 313. Introduction to comparative animal physiology with emphasis on the vertebrates. Topics include gas exchange, circulatory function, digestion temperature regulation, metabolism, osmoregulation and excretion. Three hours of lecture per week.
Offered Fall

BIO 313. Animal Physiology Laboratory. (1 Units)

Co-requisite: BIO 312. Laboratory work and demonstration of the principles on how physiological systems work in normal and stressed conditions. Exercises coordinate with and reinforce material presented in BIO 312. Three hours of laboratory per week.
Offered Fall

BIO 314. Developmental Biology. (3 Units)

Prerequisites: BIO 124, BIO 125, and BIO 220 required. Co-requisite: BIO 315 required. Students will discuss developmental events from gametogenesis through organogenesis in a variety of animal models. The cellular and molecular mechanisms controlling development will be explored. We will also discuss how intrinsic and extrinsic factors can alter the developmental outcomes, which might lead to developmental defects and diseases.
Offered Spring

BIO 315. Developmental Biology Lab. (1 Units)

Co-requisite: BIO 314. Laboratory work and examination of the developmental anatomy in the frog and chick embryos, fertilization and early development of sea urchin and isolation of chick muscle, organs and whole embryos. Three hours of laboratory per week.
Offered Spring

BIO 320. Cell Biology. (3 Units)

Prerequisites: BIO 220, BIO 221; CHE 310, CHE 311 or CHE 316, CHE 317. Structure and function of eukaryotic cells with emphasis on the role of organic macromolecules, mechanisms of energy metabolism, DNA and protein synthesis, protein sorting, endo- and exocytosis, cell signaling, cytoskeletal elements, biotechnology and cell research techniques. Three hours of lecture per week.
Offered Fall, Spring

BIO 324. Microbiology with Clinical Applications. (3 Units)

Prerequisite: BIO 122, BIO 123; CHE 300, CHE 301 or CHE 310, 311, or CHE 316, CHE 317; Corequisite: BIO 325. The morphology, physiology, genetics and classification of microorganisms; applied aspects of microbiology. Basic bacteriological techniques included in the laboratory. Three hours of lecture per week.
Offered Fall

BIO 325. Microbiology with Clinical Applications Laboratory. (1 Units)

Co-requisite: BIO 324. Use of basic bacteriological techniques, including correct use of compound microscope, standard staining for microorganism identification, routine aseptic inoculations and culturing microbes. Three hours of laboratory per week.
Offered Fall, All terms

BIO 326. General Microbiology. (3 Units)

Prerequisites: BIO 124, BIO 125, BIO 220, CHE 112 are required. BIO 221, CHE 310, and CHE 311 are recommended. Co-requisite: BIO 327 is required. Introduction to the biology of microorganisms. The course examines microbial structure, metabolism, genetics, and growth, and will discuss microorganisms in different ecological environments and their role in pathogenicity. Three hours of lecture per week.
Offered Fall, All terms

BIO 327. General Microbiology Laboratory. (1 Units)

Prerequisites: BIO 124, BIO 125, BIO 220 and CHE 110 are required. Co-Requisites: BIO 326 is required. This laboratory course will introduce microbiology research and testing methods, including establishing experimental design. Basic techniques are emphasized, such as sterile techniques, culturing and microscopy. Students will be using methods to identify unknown microorganisms. Three hours of laboratory per week.
Offered Fall

BIO 330. Botany. (3 Units)

Prerequisites: BIO 124 and BIO 125 are required. Co-requisite: BIO 331 is required. An introduction to plant biology. Topics include anatomy and morphology, the evolution of land plants, and basic ecology. There will be a special focus on plant reproduction. Three hours of lecture per week.
Offered All terms, Fall

BIO 331. Botany Laboratory. (1 Units)

Prerequisite: BIO 124 and BIO 125 are required. Co-requisite: BIO 330 is required. Laboratory work to examine plant cells and tissues, diversity of land plants, and plant ecology. Emphasis includes phylogenetics, floral evolution, and Southern California ecology. Three hours of laboratory per week.
Offered Fall

BIO 332. Ecology. (3 Units)

Prerequisites: BIO 124, BIO 125. Co-requisite: BIO 333. Concepts in ecology including energy flow, biogeochemical cycles, community structure, succession, and population growth and interaction. Sampling techniques and use of ecological instrumentation learned in laboratory. Three hours of lecture per week.
Offered Spring

BIO 333. Ecology Laboratory. (1 Units)

Co-requisite: BIO 332. Laboratory work demonstrating principles of ecology, specifically the physical environment, adaptations of individuals, populations, communities of plants and animals, ecosystem, evolutionary ecology, biodiversity and biogeography, and interactions of human beings with the environment. Three hours of laboratory per week.
Offered Spring

BIO 336. Environmental Biology. (3 Units)

Prerequisite: BIO 102 or BIO 122 is required. Principles of ecology applied to contemporary environmental problems. Emphasis is placed upon human impact in Southern California. One day (18 hour) field trip is required. Not open for credit toward the Biology major.
Offered Spring

BIO 340. Genetics. (3 Units)

Prerequisites: BIO 124, BIO 125, BIO 220, MAT 131. CHE 310 and CHE 311 or CHE 316 and CHE 317 are recommended. Principles of heredity, gene expression at the molecular and organismic levels, variation and mutation. Three hours of lecture per week.
Offered Fall, Spring

BIO 342. Cell And Genetics Lab. (1 Units)

Prerequisite: BIO 220 and BIO 221. An introduction to modern techniques of biological research on cell biomolecules and genetics, with emphasis on microscopy, protein isolation and characterization, enzyme activity, electrophoresis of biomolecules, transformation and PCR. Three hours of laboratory per week.
Offered Fall, Spring

BIO 346. Human Heredity. (3 Units)

Prerequisite: BIO 102 or equivalent. Introduction to human genetics, including human reproduction. Mendelian inheritance, chemical basis of gene action, mutation, and eugenics. Not open for credit toward the Biology major or to students with credit in BIO 340.
Offered Infrequent

BIO 360. Marine Biology. (3 Units)

Introduction to the biology of marine life. Includes a review of common marine organisms and their taxonomic placement. Also includes an ecological perspective on marine planktonic, nektonic, and benthic communities with emphasis on the intertidal habitats of Southern California.
Offered Fall

BIO 361. Marine Biology Laboratory. (1 Units)

Co-requisite: BIO 360. The laboratory is devoted to learning the plants and animals common to each of a variety of local marine habitats. Several field trips are required. Transportation to field sites is the responsibility of each student. Three hours of laboratory or field work per week.
Offered Fall

BIO 370. Bio Basis Human Behavior. (3 Units)

Prerequisite: BIO 102 or equivalent. Biological structure and function as it relates to human behavior. Emphasis on the structure of the central and peripheral nervous systems, sensory systems, neurotransmission, endocrine system and hormones, genetic influences, neuropharmacology and the impact of disease on human behavior. Not open for credit toward the Biology major.
Offered Spring

BIO 374. Drug Abuse. (3 Units)

Prerequisite: BIO 102 or equivalent. Introduction to the problem of drug abuse. The action of commonly abused drugs on the human nervous system will be examined including the physiological and behavioral effects which are produced. Not open for credit toward the Biology major.
Offered Fall, All terms

BIO 380. Biology of Childhood and Adolescence. (3 Units)

Prerequisite: BIO 250 or BIO 254. The physiology of growth and development through the second decade of life; reproductive maturation and the hormonal regulation of puberty; common illnesses, growth disorders and health hazards, including a brief introduction to venereal diseases and drug abuse. Not open for credit toward the Biology major. Offered Infrequent, All terms

BIO 386. Human Aging. (3 Units)

Prerequisite: BIO 250 or BIO 254. The effects of aging on the structure and physiology of the human body and the effects of drugs used in the treatment of the elderly. Not open for credit toward the Biology major. Offered As needed

BIO 394. Independent Study. (1-3 Units)

Prerequisite: BIO 124, BIO 125. Advanced library, field or laboratory work. A contract must be signed by the student and supervising faculty. Credit in this course is contingent upon completion of a written report of work accomplished. Not more than three units may be applied toward the Biology major or minor. Repeatable course. Offered Fall, Spring

BIO 395. Special Topics In Biology. (2-3 Units)

Prerequisites: BIO 102 or equivalent or consent of instructor. Courses of special interest in Biology for students not majoring in the field. Topic and content will vary as announced. Not open for credit toward the Biology major. Repeatable course. Two or three hours of lecture per week. Offered As needed

BIO 412. Comparative Vert Biology. (4 Units)

Prerequisites: BIO 124, BIO 125 and BIO 312, BIO 313. Vertebrate evolution, classification and ecology and adaptive morphology will be investigated through observations of behavior, study of fossils, and comparative anatomy dissections. Three hours of lecture and three hours of laboratory per week. Several field trips, including one or more weekend trips required. Offered Infrequent

BIO 416. Landscape Ecology. (3 Units)

Interrelationships among ecosystems in space and time. How abiotic, biotic, and historical factors and disturbance combine to shape present-day landscapes. Use of computer technologies, such as remote sensing and geographic information systems, to study landscape characteristics. Offered Spring

BIO 419. Histotechnique Laboratory. (2 Units)

Co-requisite: BIO 420. Preparation of normal and abnormal tissues for microscopic study. Methods of preparation of tissues for sectioning with paraffin and freezing microtomes. Methods of fixation, dehydration, infiltration, embedding and sectioning tissues. Application of different stains on tissues. Six hours of laboratory per week. Offered Spring

BIO 420. Histotechnique. (2 Units)

Prerequisite: BIO 122, BIO 123. Co-requisite: BIO 419. Preparation of tissues for microscopic study, with emphasis on paraffin embedding and staining. Two hours of lecture per week. Offered Spring, All terms

BIO 421. Advanced Molecular Biology. (3 Units)

Prerequisites: BIO 220, BIO 221, BIO 320, BIO 340, BIO 342, CHE 310 and CHE 311. Recombinant DNA techniques used in the study of genome organization and gene structure, expression and regulation; emphasis on eukaryotic cells. One hour of lecture and six hours of laboratory per week. Offered Fall

BIO 422. Histology. (3 Units)

Prerequisites: BIO 122 and BIO 123 are required. Co-requisite: BIO 424. Microscopic study of the structure and function of cells and tissues and their integration into organs. Three hours of lecture per week. Offered Spring

BIO 423. Cell Fine Structure. (3 Units)

Prerequisite: BIO 320 or BIO 422 and BIO 424. Structure and function of eucaryotic sub-cellular constituents at the light and electron microscopic and biochemical level. Offered Infrequent, All terms

BIO 424. Histology Laboratory. (1 Units)

Co-requisite: BIO 422. Microscopic study of the structure and function of cells and tissues and their integration into organs. Three hours of laboratory per week. Offered Spring

BIO 425. Medical Bacteriology. (2 Units)

Prerequisites: BIO 324, BIO 325, CHE 310, CHE 311 or CHE 316, CHE 317. Co-requisite: BIO 435. Characteristics of bacterial agents in human disease emphasizing host-parasite relationships, epidemiology and infection control. Two hours of lecture per week. Offered Spring

BIO 426. Immunology. (3 Units)

Prerequisites: BIO 320 or BIO 340; BIO 342 is recommended. Co-requisite: BIO 436. Principles of immunology. Emphasis on the cellular and molecular nature of antigens and immunoglobulins; immunobiology; laboratory immunoassays. Three hours of lecture per week. Offered Fall

BIO 427. Clinical Mycology. (3 Units)

Prerequisites: BIO 324 and BIO 325. BIO 425 and BIO 435 are recommended. Comparative morphology, physiology and pathogenicity of medically important fungi. Laboratory methods for identification emphasize interpretation and evaluation of results including the recognition of contaminating or opportunistic organisms. Two hours of lecture and three hours of laboratory per week. Offered Infrequent

BIO 428. Virology. (3 Units)

Prerequisites: BIO 320, CHE 300, CHE 301 or CHE 310, CHE 311, or CHE 316, CHE 317. The anatomy, biochemistry, physiology and pathogenesis of bacterial and animal viruses emphasizing virus diseases of humans. Topics include structure, classification, theory and practical aspects of growth, purification and identification, host-virus interactions, tumor viruses and antiviral agents. Three hours of lecture per week. Offered Fall

BIO 430. Comp BIO: Phlogenetics. (3 Units)

Prerequisites: BIO 124, BIO 125 and BIO 340. BIO 332 is recommended. Strategies for rigorous comparisons of different species: Permissions (legal), collection, identification (diagnosis), taxonomy, maintenance-alive and preserved, character state description, phylogenetic analysis and biogeography. Two hours of lecture and three hours of laboratory per week. Offered Infrequent

BIO 435. Medical Bacteriology Laboratory. (2 Units)

Co-requisite: BIO 425. Laboratory methods used. Medical bacteriology, including detection, isolation and identification of medically important bacteria. Six hours of laboratory per week. Offered Spring

BIO 436. Immunology Laboratory. (1 Units)

Co-requisite: BIO 426. Principles of immunology. Emphasis on the cellular and molecular nature of antigens and immunoglobulins; immunobiology; laboratory immunoassays. Three hours of laboratory per week.
Offered Fall

BIO 440. Molecular Genetics. (3 Units)

Prerequisites: BIO 320 and BIO 340. Genome structure in relation to control of gene expression in prokaryotic and eucaryotic cells; interplay between genes and regulatory reactions that control development. Topics include antibody diversity, neoplastic transformation by oncogenes, and pattern formation. Three hours of lecture per week.
Offered Spring

BIO 442. Human Genetics. (3 Units)

Prerequisites: BIO 320 and BIO 340. BIO 440 is recommended. Principles of human genetics including cytogenetics, Mendelian inheritance, pedigree construction, complex patterns of inheritance, biochemical defects, gene mapping, hemoglobinopathies, molecular genetics, prenatal diagnosis and gene therapy. Three hours of lecture per week.
Offered Infrequent

BIO 450. Evolution. (3 Units)

Prerequisite(s): BIO 124 and BIO 340 required. Explores how modern approaches to studying evolution are teaching us new and surprising things about how evolution works and its power to help explain patterns in the natural world. This course is a paper-based, discussion-based course.
Offered Fall

BIO 452. Minority Health Disparities. (3 Units)

Prerequisite: BIO 220 is required. BIO 320 is recommended. This course deals with the issue of minority health disparities from the many possible courses and treatments to ways to address this problem in the future.
Offered Spring

BIO 453. Endocrinology. (3 Units)

Prerequisites: BIO 220 is required. The role of endocrine glands and tissues in metabolic regulation, environmental adjustment, reproduction, and development of vertebrates, with emphasis on mammals. Three hours of lecture per week.
Offered Spring

BIO 458. Human Parasitology. (3 Units)

Prerequisites: BIO 122 and BIO 123. Co-requisite: BIO 459. Physiological aspects of parasites in man, their symbiotic host and parasite relationships and clinical diagnostic techniques. Three hours of lecture per week.
Offered Fall

BIO 459. Human Parasitology Laboratory. (1 Units)

Co-requisite: BIO 458. Physiological aspects of parasites in man, their symbiotic host and parasite relationships and clinical diagnostic techniques. Three hours of laboratory per week.
Offered Fall

BIO 483. Human Physiology. (3 Units)

Prerequisites: BIO 312 or BIO 320. Advanced lecture and discussion of the functional activities occurring in the human organ systems.
Offered Spring

BIO 490. Senior Project. (3 Units)

Prerequisites: Senior standing and department consent; completion of general education requirements, lower division major requirements and BIO 340. Students will engage in biological writing for diverse audiences including writing for other biologists and the general public. Synthesis of biological literature, data presentation, and the importance of biology to society will be addressed. A grade of C or better in this course fulfills the GWAR requirement for all Biology majors and minors.
Offered Fall, Spring, All terms

BIO 491. Seminar in Biological and Biomedical Research. (1 Units)

Prerequisite: Permission by professor. Current topics in biological and biomedical research presented by CSUDH faculty and prominent scientists from throughout the country. CR/NC grading. Repeatable for up to 2 units.
Offered Fall, Spring

BIO 495. Selected Topics in Biology. (2-3 Units)

Prerequisite: BIO 124 and BIO 125. Advanced course of special interest for students majoring in Biology. May include laboratory exercises. Topic and content will vary as announced. Repeatable course. Two to three hours of lecture per week.
Offered As needed

BIO 496. Internship in Biology. (3 Units)

Prerequisites: BIO 124 and BIO 125 are required. BIO 332 and BIO 333 are recommended. This course is available as an elective in the BS in Biology: Ecology and Environmental Biology option only. Supervised internship in ecological setting off campus. A maximum of three units may be applied towards the Biology major.
Offered Fall, Spring

BIO 498. Directed Research in Biology. (3 Units)

Prerequisites: BIO 124 and BIO 125 are required. BIO 332 and BIO 333 are recommended. This course is available as an elective in the BS in Biology: Ecology and Environmental Biology option only. The class is intended to allow students to receive ecological research experience off-campus. A maximum of three units may be applied towards the Biology major.
Offered Fall, Spring

BIO 501. Biological Literature. (3 Units)

Prerequisite: Fulfillment of the Graduation Writing Requirement (GWAR). Standard forms of presentation of scientific research, including research articles, review papers, abstracts, poster and oral presentations. Sources of biological literature and contemporary literature search skills as well as data presentation formats and technical writing conventions will be addressed. Three hours of lecture per week.
Offered Spring

BIO 502. Biostatistics. (3 Units)

Prerequisite: MAT 131 or MAT 171 or MAT 191 or equivalent. Application of statistical analyses to biological research with emphasis on experimental design. Analysis of variance, regression and correlation will be the primary topics. Three hours of lecture per week.
Offered Fall

BIO 503. Biological Instrumentation. (3 Units)

Introduction to the operation and application of common instruments used in biological research. Emphasis on those instruments available for graduate research. Two hours of lecture and two hours of activity per week.
Offered Infrequent

BIO 504. Research Techniques in Biology. (3 Units)

Introduction to how research is conducted and how to avoid the major pitfalls that can beset researchers. Ethical conduct of research, permits and permissions, important laboratory and field techniques, preparation for a PhD program. Three hours of lecture per week.
Offered Fall

BIO 510. Urban Environmental Science. (3 Units)

Overview of environmental science. Problems specific to urban context. Pollution of air, water, etc., land-use change, environmental conflicts. Hands-on analysis of environmental conditions in Los Angeles area.
Offered Spring

BIO 516. Landscape Ecology. (3 Units)

Prerequisites: BIO 124 and BIO 125 are required. BIO 332 and BIO 333 are recommended. Interrelationships among ecosystems in space and time. How abiotic, biotic, and historical factors and disturbance combine to shape present-day landscapes. Use of computer technologies, such as remote sensing and geographic information systems, to study landscape characteristics. Three hours of lecture per week.
Offered Fall

BIO 520. Adv In Cell & Molecul Bio. (3 Units)

Prerequisite: BIO 421 or BIO 440. Current developments in the structure and function of viruses, prokaryotic cells, and eukaryotic cells. Three hours of lecture per week. Repeatable for credit in biology master's program for up to six units.
Offered Spring

BIO 522. Applied Biotechnology Skills III. (3 Units)

PABS Skills III is a graduate course for students in the PSM program. In this course, students will learn advanced molecular biology techniques including isolation of DNA and RNA, Southern and Northern blots, transcriptional profiling, and siRNA mediated gene silencing.
Offered Infrequent

BIO 523. Electron Microscopy. (3 Units)

Prerequisite: BIO 421. Theory and use of the electron microscopy preparation of tissue and photographic techniques. One hour of lecture and six hours of laboratory per week.
Offered Infrequent

BIO 590. Graduate Seminar. (2 Units)

Presentation and discussion of selected topics in Biological Science. A minimum of two and a maximum of four units may be applied toward the biology master's degree. The repeated courses must be taught by different instructors or must be on different topics. Two hours of seminar per week.
Offered Fall, Spring

BIO 595. Grad Sel Topics Biology. (2-3 Units)

Prerequisite: Consent of Department Chair. Advanced course of special interest to graduate students in Biology. Topic and content will vary as announced. Repeatable course. Two to three hours of lecture per week.
Offered As needed

BIO 597. Directed Reading. (1-3 Units)

Library research on a specific subject in biology. Topic for study to be approved and directed by instructor. Can be used to prepare for the comprehensive examinations or to formulate a research problem prior to enrollment in BIO 598 or BIO 599. A maximum of three units may be applied toward the master's degree. Repeatable course.
Offered Fall, Spring

BIO 598. Directed Research. (1-3 Units)

Laboratory research on a specific subject in biology. Topic of research to be approved and directed by an instructor. A maximum of three units may be applied toward the master's degree. Repeatable course.
Offered Fall, Spring

BIO 599. Thesis. (1-4 Units)

Laboratory research and writing of thesis for the master's degree. Topic of research to be approved by graduate advisor. A maximum of 9 units of BIO 597, 598 and 599 combined may be applied toward the master's degree. Open only to thesis option graduate students. Repeatable course.
Offered Fall, Spring

BIO 600. Grad Continuation Course. (1 Units)

Graduate students who have completed their course work but not their thesis, project, or comprehensive examinations, or who have other requirements remaining for the completion of their degree, may maintain continuous attendance by enrolling in this course. Signature of graduate program coordinator required.
Offered Fall, Spring

Biology, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single-field major. No minor is required, though it is recommended.

Major Requirements (64-67 units)

All courses applied to the B.A. in Biology must be passed with a grade of "C" or better.

| Code | Title | Hours |
|------------------------------------|-------------------------------------|-------|
| Lower Division Requirements | | |
| BIO 120 | Principles of Biology I | 3 |
| BIO 121 | Principles of Biology Laboratory I | 1 |
| BIO 122 | Principles of Biology II | 3 |
| BIO 123 | Principles of Biology Laboratory II | 1 |
| BIO 124 | Principles of Biology III | 3 |
| BIO 125 | Principles of Biology Lab III | 1 |
| BIO 220 | Molecular Biology | 3 |
| BIO 221 | Molecular Biology Laboratory | 1 |
| CHE 110 | General Chemistry I | 5 |
| CHE 112 | General Chemistry II | 5 |

| | | |
|--|--|-----------|
| MAT 131 | Elementary Statistics and Probability | 3 |
| PHY 120 | Elements Of Physics I | 4 |
| PHY 122 | Elements Of Physics II | 4 |
| Upper Division Requirements | | |
| BIO 320 | Cell Biology | 3 |
| BIO 340 | Genetics | 3 |
| BIO 342 | Cell And Genetics Lab | 1 |
| BIO 490 | Senior Project ¹ | 3 |
| CHE 316 & CHE 317 | Survey of Organic Chemistry and Survey of Organic Chemistry Laboratory | 4 |
| Select one of the following: | | 4 |
| BIO 310 & BIO 311 | Plant Physiology and Plant Physiology Laboratory | |
| BIO 312 & BIO 313 | Animal Physiology and Animal Physiology Laboratory | |
| BIO 314 & BIO 315 | Developmental Biology and Developmental Biology Lab | |
| BIO 326 & BIO 327 | General Microbiology and General Microbiology Laboratory | |
| Select a minimum of 9 additional units of upper division Biology or Chemistry elective courses | | 9 |
| BIO XXX | | |
| CHE 450 | Biochemistry I | |
| Total Hours | | 64 |

¹ BIO 490 Senior Project: Major students may substitute this course for General Education Area E. Please contact the University Advisement Center to request the course substitution.

Program Learning Outcomes

Upon successful completion of the B.A. and B.S. Programs in Biology, a degree recipient will be able to:

- Describe the detail the major unifying themes of biology, such as evolution, energy flow and transformation, homeostasis, genetic information storage and utilization, structure-function relationships, and hierarchies of organization.
- Apply scientific reasoning to generate and test hypotheses by designing and executing experiments using appropriate methods in the laboratory or in the field.
- Analyze and interpret quantitative biological data.
- Communicate scientific information in a variety of written and oral formats.
- Discuss the relevance of scientific research to society from a historic and a modern perspective, including the ethical implications of scientific research and of new technology.
- Find, read, understand, critically evaluate, summarize, and use scientific information.

4-Year Degree Roadmap

| | | |
|---|--|---|
| First Year | | |
| Fall | | |
| GE Area A1 Oral Communication | | 3 |
| GE Area A3 Logic/Critical Thinking | | 3 |
| GE Area C1 Arts Course | | 3 |

Biology, Bachelor of Science Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major, no minor required. However, for students who wish to complete the Biochemistry minor, Organic Chemistry is considered a pre-

requisite class for both programs and therefore can be double counted for both major and minor requirements.

Major Requirements (76-84 units)

Students must select one of the options listed.

All courses applied to the B.S. in Biology must be passed with a grade of "C" or better.

Cellular and Molecular Biology Option (76-81 units)

| Code | Title | Hours |
|------------------------------------|---|-------|
| Lower Division Requirements | | |
| BIO 120 | Principles of Biology I | 3 |
| BIO 121 | Principles of Biology Lab I | 1 |
| BIO 122 | Principles of Biology II | 3 |
| BIO 123 | Principles of Biology II Lab | 1 |
| BIO 124 | Principles of Biology III | 3 |
| BIO 125 | Principles of Biology Lab III | 1 |
| BIO 220 | Molecular Biology | 3 |
| BIO 221 | Molecular Biology Laboratory | 1 |
| CHE 110 | General Chemistry I | 5 |
| CHE 112 | General Chemistry II | 5 |
| MAT 131 | Elementary Statistics and Probability | 3 |
| MAT 171 | Survey of Calculus for Management and Life Sciences | 4-5 |

or MAT 191 Calculus I

| | |
|------------------------------|--|
| Select one of the following: | 8-10 |
| PHY 120 & PHY 122 | Elements Of Physics I and Elements Of Physics II |
| PHY 130 & PHY 132 | General Physics I and General Physics II |

Upper Division Requirements

| | | |
|------------|----------------------------|---|
| BIO 320 | Cell Biology | 3 |
| BIO 340 | Genetics | 3 |
| BIO 342 | Cell And Genetics Lab | 1 |
| BIO 421 | Advanced Molecular Biology | 3 |
| or BIO 440 | Molecular Genetics | |
| BIO 490 | Senior Project | 3 |

Select one of the following: 4-5

| | |
|-------------------|---|
| CHE 310 & CHE 311 | Organic Chemistry I and Organic Chemistry Lab I |
| CHE 300 & CHE 301 | Organic Chemistry I and Organic Chemistry Lab I |

Select one of the following: 4-5

| | |
|-------------------|--|
| CHE 312 & CHE 313 | Organic Chemistry II and Organic Chemistry Laboratory II |
| CHE 302 & CHE 303 | Organic Chemistry II and Organic Chemistry Lab II |

Select one of the following: 4

| | |
|-------------------|---|
| BIO 310 & BIO 311 | Plant Physiology and Plant Physiology Laboratory |
| BIO 312 & BIO 313 | Animal Physiology and Animal Physiology Laboratory |
| BIO 314 & BIO 315 | Developmental Biology and Developmental Biology Lab |

| | | |
|--|---|----|
| BIO 326 & BIO 327 | General Microbiology and General Microbiology Laboratory | |
| Select a minimum of 10 additional units of upper division Biology or Chemistry Courses | | 10 |

Total Hours 76-81

Ecology and Environmental Biology Option (76-81 units)

| Code | Title | Hours |
|------------------------------------|---|-------|
| Lower Division Requirements | | |
| BIO 120 | Principles of Biology I | 3 |
| BIO 121 | Principles of Biology Lab I | 1 |
| BIO 122 | Principles of Biology II | 3 |
| BIO 123 | Principles of Biology II Lab | 1 |
| BIO 124 | Principles of Biology III | 3 |
| BIO 125 | Principles of Biology Lab III | 1 |

Microbiology Option 4-Year Degree Roadmap

2- Year Roadmap (transfer students)

Biology, Master of Science About the Master's Program

The Master of Science Program in Biology is a two-year program in which a student must complete a series of both core and elective courses and engage in independent scientific research that culminates in a thesis. This graduate program is designed to be a flexible degree that can help students reach their career goals, whether that be further study in a doctoral program or employment in science education, health sciences or environmental fields.

In the first semester of the program, the student will choose a research mentor who will provide guidance for the thesis research and help the student set their curriculum. Three members of the student's thesis committee, including the research mentor, will need to be selected by the end of the first year of the program.

To accommodate students with other professional commitments, many graduate classes are scheduled in the late afternoon and evening.

Admission Requirements

Requirements for admission as a classified graduate student are a bachelor's degree in biology or a related field with a minimum grade point average of 2.75 in upper division courses, and completion of the Graduation Writing Assessment Requirement (GWAR) at the graduate level. Students should also have strong motivation in conducting original research. All students should have completed a course in each of the subject areas listed below:

Subject Area

- Cell Biology or Evolution or Ecology
- Genetics
- Upper Division Experimental Laboratory
- Physiology or Developmental Biology
- Statistics or Calculus

Students who do not satisfy all these requirements may complete the requirements while enrolled through Extended Education. Students who meet all but one requirement may be admitted as a conditionally classified graduate student at the discretion of the Biology Graduate

Committee. They must meet any conditions by the end of the first year as a conditional graduate student.

The Biology Graduate Committee makes all final decisions on graduate admissions.

Admission Procedures

All applicants are required to complete a Cal State Apply application. The following documents should be submitted in the 4th Quadrant at Cal State Apply:

1. CV/resume,
2. Unofficial transcripts (submit official transcripts to the Office of Admissions),
3. A personal statement, and
4. Three letters of recommendation.

Applicants with a baccalaureate degree from a non-English speaking university are also required to submit proof of English proficiency. Please visit <http://www.csudh.edu/englishproficiency> (<http://www.csudh.edu/englishproficiency/>) for details. Applicants should address in their personal statement why they are interested in the program and which research area(s) they wish to pursue. Applicants interested in ecology and/or evolutionary biology must contact the appropriate faculty member(s) in the Biology Department before submitting their Cal State Apply application. Applicants interested in cellular and molecular biology should indicate potential research mentors in their personal statement, and they are also encouraged to contact possible mentors.

For more information regarding the university application for admission, please visit: <https://www.csudh.edu/gsr/graduate-studies/>

Requirements

Degree Requirements (30 units)

The Master of Science Degree in Biology requires completion of 30 units, at least 15 of which must be graduate (500-level) courses in biology.

| Code | Title | Hours |
|--|--------------------------------|-------|
| Required Courses | | |
| BIO 501 | Biological Literature | 3 |
| BIO 502 | Biostatistics | 3 |
| BIO 504 | Research Techniques in Biology | 3 |
| BIO 510 | Urban Environmental Science | 3 |
| or BIO 520 | Adv In Cell & Molecul Bio | |
| BIO 590 | Graduate Seminar ¹ | 2 |
| BIO 590 | Graduate Seminar ¹ | 2 |
| Electives | | |
| Select 14 units from the following: ² | | 14 |
| Other graduate (500 level) courses in biology ³ | | |
| Upper division (400 level) courses in biology | | |
| BIO 597 | Directed Reading ⁴ | |
| BIO 598 | Directed Research ⁴ | |
| BIO 599 | Thesis ⁴ | |
| CHE 450 | Biochemistry I | |
| CHE 451 | Biochemistry I Lab | |
| CHE 452 | Biochemistry II | |
| CHE 453 | Biochemistry II Lab | |

Students doing research in ecology can also take the following courses:

| | |
|---------|-------------------------------------|
| GEO 408 | Remote Sensing and Image Processing |
| GEO 415 | Geographic Information Systems |

Total Hours **30**

¹ Students will take BIO 590 Graduate Seminar twice for a total of 4 units.

² Students might also take 400 or 500-level courses from other departments if approved by the research mentor and the Biology Graduate Program Coordinator.

³ A required course indicated as being repeatable may be used both as a required course and as an elective.

⁴ **Note:** Students may count a maximum of six units of BIO 597 Directed Reading and BIO 598 Directed Research, and a maximum of six units of BIO 599 Thesis.

Students must take all courses within five years of the date of graduation from the Master's degree. If approved by the Graduate Committee and the Graduate Dean, a student may revalidate a limited number of courses. However, under no circumstances can a course taken more than seven years before graduation be revalidated and counted in the program.

Grades

To graduate, students must maintain an overall "B" (GPA: 3.0), and they must pass courses with a grade of "B-" or above.

Thesis

Each student should select a major advisor to guide them in their program. The student and the major advisor will select two or more faculty to serve as the student's graduate committee. At least two of the committee, including the chair, must be faculty from the CSUDH biology department. When additional expertise is required, the third member may be a faculty member from another department, or other academic institution.

The thesis is appropriate for all students and a necessity for those who plan a career in research and plan to continue a doctoral program. The student and his or her major advisor will prepare a one or two page hypothesis-based proposal of the thesis research along with the time line of no more than two years to completion. This proposal is also to be approved by the two other members of the student's thesis committee and submitted to the Biology Graduate Committee for review and approval.

Upon the completion and acceptance of the thesis, the student and his or her advisor will arrange for an oral defense of the thesis. This ordinarily takes the form of a seminar to which the faculty, students, and public are invited to attend.

Continuing Student Status

Students should maintain continuous enrollment throughout their time in the graduate program. Students who have completed their course work and are working on their thesis may enroll in BIO 600: Graduate Continuation Course (0 units) to maintain continuous attendance. Eligible students may request a Planned Graduate Student Leave. Students must be enrolled the semester they graduate.

Biology Graduate Program Policy on Revalidation of Outdated Course Work

The Biology Department requires that all course work taken in the master's degree program be completed within five years immediately preceding the date of graduation.

Revalidation of outdated course work may be requested from the University Graduate Studies Office through the Biology Graduate Coordinator. Outdated course work means courses that were completed earlier than five years, and no more than seven years, immediately preceding the date of graduation. The request must be accompanied by a petition from the Biology Graduate Committee that verifies that the student has done one of the following:

- repeated the course and passed it with a grade of "B" or better;
- taken the exams and completed the assignments of the course as it is currently offered and earned a grade of "B" or better;

The choice of the revalidation method is at the discretion of the Biology Graduate Committee,

Classified Standing

If a student has been admitted as conditionally classified, they must fulfill the conditions for classified standing by the end of the first year after admission. The student must submit an application for classified standing to the Dean of Graduate Studies, who will forward the request to the Biology Graduate Coordinator. To receive classified standing, the student must have completed all prerequisite courses and requirements, a grade point average of 3.0 or better in all courses taken at CSUDH, and received a grade of "B-" or better in all courses,

Advancement to Candidacy

An application for advancement to candidacy is submitted when the student has completed most of the course work and is completing the thesis. Application is made through the Biology Graduate Coordinator and must be done before the student can complete the thesis. This application will list the student's program of courses and other requirements which must be completed for the degree.

The student should have:

- classified standing;
- completed all required courses;
- maintained a minimum grade point average of 3.0 and received a grade of "B-" or better in all courses taken in the graduate program;
- approval of their thesis proposal by their committee and the Biology Graduate Committee.

Master's Requirements

In addition to the program requirements, students must meet all university requirements for the master's degree. Students should consult the section of the catalog entitled "Requirements for the Master's Degree."

- Critically read, comprehend, and summarize original research papers in biology.
- Write in a variety of scientific formats, including manuscript describing experimental results, thesis, grant proposals, conference abstract, and literature review.

- Apply appropriate statistical analyses to experimental design and experimental results.
- Make oral presentations in acceptable formats describing information in the scientific literature and describing personal research results.
- Apply the scientific method to answer questions in biology through the design and conduct of hypothesis-driven experimental research projects.
- Demonstrate a thorough and sophisticated knowledge base in biology and describe in detail the current knowledge in at least one specialized field of the biological sciences.
- Defend the thesis in a seminar setting.
- Demonstrate responsible ethical and professional conduct related to biology in all facets of their education.
- Communicate scientific concepts and issues to a general audience.

Biology, Minor

Requirements

The Biology Minor requires 26-27 units: 17 units are lower division requirements, which may also be used, where allowed, to satisfy General Education requirements; 9-10 units of upper division biology courses are required.

| Code | Title | Hours |
|---|---|--------------|
| Lower Division Requirements | | |
| BIO 120 | Principles of Biology I | 3 |
| BIO 121 | Principles of Biology Lab I | 1 |
| BIO 122 | Principles of Biology II | 3 |
| BIO 123 | Principles of Biology II Lab | 1 |
| BIO 124 | Principles of Biology III | 3 |
| BIO 125 | Principles of Biology Lab III | 1 |
| CHE 110 | General Chemistry I | 5 |
| Upper Division Requirements | | |
| Select 9 to 10 units from the following for which the prerequisites have been met: ¹ | | 9-10 |
| BIO 250 & BIO 251 | Elem Hum Anat & Physiol and Elem Hum Anatomy Phys Lab | |
| BIO 220 & BIO 221 | Molecular Biology and Molecular Biology Laboratory | |
| BIO 3xx | | |
| BIO 4xx | | |
| No more than three units from the following: | | |
| BIO 394 | Independent Study | |
| BIO 496 | Internship in Biology | |
| BIO 498 | Directed Research in Biology | |
| Total Hours | | 26-27 |

¹ At least six units must be taken at the 300- or 400-level. Six units must be taken in residence.

Biology, Subject Matter Preparation

The Subject Matter Preparation Program is authorized by the California Commission on Teacher Credentialing. This course of study includes a number of prescribed courses that address proficiency standards for

content knowledge required for the Single Subject credential in Biological Sciences. Interested students should contact the departmentally designated advisor for current information.

Specific Biological Sciences Subject Matter Authorization (65 units)

Holders of a Single Subject or Multiple Subject credential issued by the California Commission on Teacher Credentialing may secure an additional Specific Biological Sciences Subject Matter Authorization that allows the holder to teach the specific subjects in grades preschool, K-12, and classes organized primarily for adults.

For other requirements governing issuance of this authorization, consult the Teacher Education section of this catalog or contact the College of Education Student Services Center.

Requirements

Complete each of the following courses or equivalent as approved by the Biology Department Advisor.

| Code | Title | Hours |
|------------------------------------|---|-----------|
| Lower Division Requirements | | |
| BIO 120 | Principles of Biology I | 3 |
| BIO 121 | Principles of Biology Lab I | 1 |
| BIO 122 | Principles of Biology II | 3 |
| BIO 123 | Principles of Biology II Lab | 1 |
| BIO 124 | Principles of Biology III | 3 |
| BIO 125 | Principles of Biology Lab III | 1 |
| BIO 220 | Molecular Biology | 3 |
| BIO 221 | Molecular Biology Laboratory | 1 |
| CHE 110 | General Chemistry I | 5 |
| CHE 112 | General Chemistry II | 5 |
| EAR 100 | Physical Geology | 3 |
| EAR 101 | Physical Geology Laboratory | 1 |
| MAT 131 | Elementary Statistics and Probability | 3 |
| MAT 171 | Survey of Calculus for Management and Life Sciences | 4 |
| PHY 120 | Elements Of Physics I | 4 |
| PHY 122 | Elements Of Physics II | 4 |
| Upper Division Requirements | | |
| BIO 312 | Animal Physiology | 3 |
| BIO 313 | Animal Physiology Laboratory | 1 |
| BIO 332 | Ecology | 3 |
| BIO 333 | Ecology Laboratory | 1 |
| BIO 340 | Genetics | 3 |
| BIO 490 | Senior Project | 3 |
| CHE 316 | Survey of Organic Chemistry | 3 |
| EAR 416 | Earth Sciences for Teachers | 3 |
| Total Hours | | 65 |

Microbiology, Minor

Requirements

The Microbiology Minor requires 44-47 units: 18 units are lower division courses, which also may be used, where allowed, to satisfy General

Education requirements; 26-29 units of upper division biology and chemistry courses are required.

| Code | Title | Hours |
|------------------------------------|--|--------------|
| Lower Division Requirements | | |
| BIO 120 | Principles of Biology I | 3 |
| BIO 121 | Principles of Biology Lab I | 1 |
| BIO 122 | Principles of Biology II | 3 |
| BIO 123 | Principles of Biology II Lab | 1 |
| CHE 110 | General Chemistry I | 5 |
| CHE 112 | General Chemistry II | 5 |
| Upper Division Requirements | | |
| Select one of the following: | | 3-5 |
| BIO 320 | Cell Biology | |
| CHE 450 & CHE 451 | Biochemistry I and Biochemistry I Lab | |
| BIO 324 | Microbiology with Clinical Applications | 3 |
| BIO 325 | Microbiology with Clinical Applications Laboratory | 1 |
| BIO 426 | Immunology | 3 |
| BIO 436 | Immunology Laboratory | 1 |
| BIO 428 | Virology | 3 |
| Select one of the following: | | 4-5 |
| CHE 310 & CHE 311 | Organic Chemistry I and Organic Chemistry Lab I | |
| CHE 316 & CHE 317 | Survey of Organic Chemistry and Survey of Organic Chemistry Laboratory | |
| Select 8 units from the following: | | 8 |
| BIO 310 | Plant Physiology | |
| BIO 311 | Plant Physiology Laboratory | |
| BIO 425 | Medical Bacteriology | |
| BIO 435 | Medical Bacteriology Laboratory | |
| BIO 458 | Human Parasitology | |
| BIO 459 | Human Parasitology Laboratory | |
| CHE 452 | Biochemistry II | |
| Total Hours | | 44-47 |

Biophysics

College of Natural and Behavioral Sciences
Department of Physics

Program Description & Features

The Biophysics program will train future professionals to research the physical and chemical aspects of biological phenomena, applying their knowledge of physics to the study of biological systems. Due to the interdisciplinary nature of the field, a biophysics major will employ a broad range of techniques such as spectroscopy, computational modeling, microscopy, mass spectrometry, and electrophysiology in the course of their research. The program emphasizes practical application of a wide range of theories and principles through laboratory experimentation and course lectures, which cover essential topics such as General Physics, Organic chemistry, Calculus, Biology, Optics, and Laser Physics. The program will have two options:

Option 1: Research Focus. This option provides research training to students. Students will complete a research portfolio. This will be done

in special classes for research. This will show the students' progress through the program and how each of the PLOs are met. Students in this track are required to undertake at least 3 units of research studies. This can be accomplished by doing research with a selected faculty on campus or by completing an intensive summer research program.

Option 2: Professional Focus. This option is designed to prepare students for the healthcare industry. As part of this track, students are required to complete 30 volunteer hours in their profession of interest and shadow a practitioner for at least 8 weeks which is tied to an elective designed as a service-learning course.

Academic Advising

Students will be assigned to an advisor and will be expected to meet with their advisor once every semester. All students will use Smart Planner to track their progress. Students should set up an advisement appointment with a faculty member or an advisor in the CNBS Student Success Center when they need to discuss the following:

1. Major requirements.
2. Switching or declaring options within the major.
3. Submitting a graduation application.
4. Graduate school and other career goals.

Preparation

To be on target for a 4-year graduation pathway, it would be ideal if all students have at least taken Pre-Calculus, Biology, Chemistry, and Physics at the high school level.

It is also recommended that students participate in extracurricular research activities while in high school. Moreover, students could benefit more if they took calculus in high school.

Graduation with Honors

Undergraduate students who have met the following criteria will be awarded departmental honors at graduation:

1. A minimum of 36 units in residence at CSU Dominguez Hills.
 2. An overall grade point average of 3.6 for upper-division courses taken for the major at CSUDH.
- Biophysics, Bachelor of Science (p. 412)

BPH 201. Seminar I: Introduction to Biophysics. (1 Units)

Prerequisite: PHY 120. Course is designed to inform students about the field of biophysics, its career applications, and college success. Students will understand how physics can be integrated into biology and explore basic computational tools through a tutorial approach. Offered Fall

BPH 202. Seminar II: The Art of Scientific Presentation and The Frontiers of Physics. (1 Units)

Prerequisites: BPH 201, PHY 120 are required or consent of instructor. Students learn how to prepare and give presentations on their research interests or discipline topics. Emphasis is given to the preparation, execution, and critique of effective scientific presentations. Offered Spring, Summer

BPH 330. Biological Physics. (3 Units)

Prerequisites: BIO 122, BPH 202, PHY 306 and CHE 310 are required. Introduction to the interface between biology and physics, applying the results of thermodynamics to topics such as protein folding, molecular machines, brain function, with a focus on molecular and cellular biology. Offered Fall

BPH 340. Experimental Biophysics. (3 Units)

Prerequisites: BPH 202, BIO 122, CHE 310 and PHY 306 are required. Co requisite: PHY 346 is required. A laboratory course introducing interdisciplinary research techniques and research writing in biophysics. Basic concepts behind commonly used biological techniques and how to collect and communicate discipline-specific data. Offered Spring

BPH 402. BIOPHYSICS RESEARCH. (1-3 Units)

Prerequisite: PHY 306, BPH 340, or faculty permission. An independent research project, supervised by a faculty mentor in the physics or biophysics department.

BPH 406. Computational Biophysics. (3 Units)

Prerequisites: PHY 306, BPH 330, BPH 340. An introduction to scientific computational methods and their application in physics, using various numerical and symbolic computing techniques.

BPH 410. Medical Biophysical Education and Medical Industry Impact on Society. (3 Units)

Prerequisites: BPH 201, BPH 202, BPH 340. This course will help students meet the criteria for professional schools. The students will practice professional communication skills through healthcare practices. The course's service-learning component requires shadowing of healthcare professionals for eight weeks and completing thirty volunteer hours with community organizations.

BPH 460. Advanced Microscopy. (3 Units)

Prerequisite: PHY 306, PHY 320, BPH 330, BPH 340. An introduction to the use of quantitative fluorescence microscopy procedures in modern biophysics laboratories.

Biophysics, Bachelor of Science

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major, no minor required.

Major Requirements (Options 1 & 2: 78 units each)

Students must select one of the options listed below. The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

| Code | Title | Hours |
|--|--|-------|
| A. Common Core Requirements (51 units) | | |
| 1. Lower Division Courses (43 units) | | |
| BIO 120 | Principles of Biology I | 3 |
| BIO 121 | Principles of Biology Laboratory I | 1 |
| BIO 122 | Principles of Biology II | 3 |
| BPH 202 | SeminarII: The Art of Scientific Presentation and The Frontiers of Physics | 1 |
| BPH 201 | Seminar I: Introduction to Biophysics | 1 |
| BIO 123 | Principles of Biology Laboratory II | 1 |
| CHE 110 | General Chemistry I | 5 |
| CHE 112 | General Chemistry II | 5 |

| PHY 320 | Physical Optics | 3 |
| PHY 346 | Thermal Physics | 3 |
| 2. Electives (6 units) | | |
| Students within this option must take BPH 406 and/or BPH 460 or any elective from Biophysics, Physics, Mathematics, Chemistry or Biology | | |
| Option 2: Professional Focus | | |
| 1. Lower Division Course (3 units) | | |
| BIO 220 | Molecular Biology | 3 |
| 2. Upper-Division Courses (19-21 units) | | |
| BPH 330 | Biological Physics | 3 |
| BPH 340 | Experimental Biophysics | 3 |
| BPH 410 | Medical Biophysical Education and Medical Industry Impact on Society | 3 |
| PHY 306 | Math Methods In Physics | 3 |
| PHY 320 | Physical Optics | 3 |
| PHY 346 | Thermal Physics | 3 |
| 3. Electives (6 units) | | |

Students in this option must take two electives from Biophysics, Physics, Mathematics, Chemistry or Biology 6

- **Outcome 1: Students will demonstrate the acquisition of discipline-specific knowledge in physics.**
 - *Objective 1:* Students will be able to memorize and cite central physics concepts.
 - *Objective 2:* Students will be able to explain central physics concepts and show an understanding of the context in which they are relevant.
- **Outcome 2: Students will demonstrate the ability to connect physics concepts with concepts from other disciplines.**
 - *Objective 1:* Students will identify and apply central concepts in their chosen track of Biophysics
 - *Objective 2:* Students will apply mathematics, biology and/or chemistry, and computer skills to theoretical or experimental problems in a cross-disciplinary environment.
- **Outcome 3: Students will become skilled in biophysics experimental methods and use various scientific technologies**
 - *Objective 1:* Students will solve problems using their knowledge and skills in physics
 - *Objective 2:* Students will explain how science relates to problems of societal concern
- **Outcome 4: Students will become skilled in biophysics experimental methods and use various scientific technologies**
 - *Objective 1:* Students will learn to collect, analyze, and explain data from biophysics experiments
 - *Objective 2:* Students will design and carry out simple experiments
 - *Objective 3:* Students will be able to connect science and technology to real-world problems
 - *Objective 4:* Students will understand the interrelations between theory and observation; the role of systematic and random experimental errors and methods used to analyze experimental uncertainty and compare experiments with theory.
- **Outcome 5: Students will communicate biophysics concepts effectively both orally and in writing**
 - *Objective 1:* Students will write technical reports on projects
 - *Objective 2:* Students will explain their research work according to academic and industry standards
- **Outcome 6: Students will demonstrate the ability to read and comprehend scientific literature**
 - *Objective 1:* Students will demonstrate an ability to read and comprehend primary literature in at least one field of physics through successful discussion/debate and presentation of concepts in the chosen field according to academic and industry standards
 - *Objective 2:* Students will learn how to conduct literature reviews and use the library database to find relevant information
 - *Objective 3:* Students will demonstrate the ability to critically read and analyze their own work and the scientific literature and understand its impact on healthcare and society
- **Outcome 7: Students will use offered resources to pursue higher education or training (biophysics, professional studies, workforce) and engage as good citizens in a diverse community**
 - *Objective 1:* Students will be securing enrollment in graduate studies in physics/professional studies

- *Objective 2:* Students will develop well-rounded, competitive applicants' packets for application in the medical and health science fields
- *Objective 3:* Students will demonstrate workforce readiness (job applications and work performance and skills). For example, biophysicist has a career in instrumentation and devices, biomedical engineering, academic and clinical research, healthcare, etc.
- *Objective 4:* Students will identify issues of diversity and equity in scholarly circles and the workforce - and will understand tools and actions which can mediate these challenges in their professional careers and environments
- **Outcome 8: Students will apply physical techniques to biological systems in diverse professional subdisciplines.**
 - *Objective 1:* Students will identify the biological, chemical, and physical properties of organisms on a molecular and cellular level
 - *Objective 2:* Students will solve problems involving the physics of biological materials
 - *Objective 3:* Students will demonstrate a conceptual understanding of the connections between physics and biology
 - *Objective 4:* Students will successfully complete a research project in the field of biophysics
 - *Objective 5:* Students will study diverse STEM fields and know the basic application of their major biological systems tools
 - *Objective 6:* Students will demonstrate basic knowledge and skill set compatible with success in health professional programs.

4-YEAR ROADMAP

Business Administration

College of Business Administration and Public Policy

Mission of the Business Programs

We provide a quality undergraduate business education and innovative professional graduate programs to a diverse student population in the South Bay area. Our business programs prepare students for career advancement through our classroom activities and a scholarly, applied research agenda.

About

The Bachelor of Science in Business Administration program is designed to accomplish two objectives. The first of these is to prepare students for lifelong professional careers in commerce, finance and industry, as well as for management careers in the public and not-for-profit sectors. A second objective is to provide students with the knowledge and skills needed to obtain professional, entry level positions in one functional area of the business enterprise, or in some particular field of business.

The College of Business Administration and Public Policy offers Minors in Business Administration, Data Analytics, Information Systems, Marketing and Management. The Minor in Business Administration is designed for students majoring in other fields who wish to acquire a basic knowledge of business for the purpose of career preparation. The Minor in Information Systems offers students the opportunity to acquire skills and knowledge in the application of computers for business decision-making. The Minor in Marketing offers students the opportunity to acquire skills and knowledge in the application of marketing concepts for business decision-making. The Minor in Management offers students the opportunity to acquire skills and knowledge in the application of management concepts for business decision-making.

The faculty possess a particularly strong combination of academic and professional credentials. Their doctoral degrees come from the finest universities in the world. Their expertise reflects specialization in different fields of business administration as well as practical experience in business and industry. The full-time faculty is augmented by highly qualified part-time faculty drawn from the business community surrounding the University. These faculty offer students a dimension of knowledge derived from actual experience, in addition to strong academic credentials.

Student Organizations

Student Organizations include the Accounting Society, American Marketing Association, CSUDH Association of Latino Professionals for America, Finance Society, Human Resources Management Association, Information Technology Society, Latino Student Business Association, and the Logistics and Supply Chain Management Club. Students interested in participating in one of these organizations should consult the appropriate Department Chair or stop by the Office of Student Life.

The College of Business Administration and Public Policy sponsors a Department Scholars program in addition to the Epsilon Mu Chapter of Delta Mu Delta, the national honor society for students in business administration. Founded in 1914, the main purpose of Delta Mu Delta is to promote higher scholarship in training for business and to recognize and reward scholastic attainment in business subjects. The Epsilon Mu chapter was chartered in 1989. The chapter inducts eligible business students each spring semester. To be eligible for membership, students must have obtained a grade point average that ranks them in the top ten percent of their class.

Student Honor Societies

The College of Business Administration and Public Policy sponsors a Department Scholars program in addition to the Epsilon Mu Chapter of Delta Mu Delta, the national honor society for students in business administration. Founded in 1914, the main purpose of Delta Mu Delta is to promote higher scholarship in training for business and to recognize and reward scholastic attainment in business subjects. The Epsilon Mu chapter was chartered in 1989. The chapter inducts eligible business students each spring semester. To be eligible for membership, students

must have obtained a grade point average that ranks them in the top ten percent of their class.

Academic Advisement

The College of Business Administration and Public Policy Student Success Center (<https://www.csudh.edu/cbapp/student-services/academic-advising/undergraduate-advisement-center-and-student-support/>) for undergraduate majors and minors provide authoritative information concerning student advisement including concentration, graduation requirements, transfer credit, special circumstances and conditions. Students are urged to come to the Student Success Center prior to their first enrollment as Business, Criminal Justice Administration and Public Administration majors or minors, as well as following semesters.

Students wishing to receive credit in the major or minor for courses taken at other institutions; must be verified by an Advisor and approved by the respective chair of the department or the Associate Dean of the College.

The Center maintains records of progress toward completion of degree requirements for all majors and minors. These records are used for counseling purposes and to check completion of course prerequisites. All students are encouraged to come to the Center for advisement and course approvals. Students should visit the Center for course approvals when adding courses during add/drop period.

Regular office hours are Monday through Friday from 8:00 a.m. to 5:00 p.m. Students are required to schedule a major advisement appointment online on our website at <https://csudh.campus.eab.com>.

Concentration and Career Advisement are provided by faculty. Names of faculty and their areas of professional expertise available at the faculty support office (<https://www.csudh.edu/cbapp/faculty-support/>) and on the departments' websites (<https://www.csudh.edu/cbapp/departments/>). Students may obtain advice from faculty about tailoring their academic programs toward career goals, about graduate schools and programs, and about career opportunities. Students are urged to consult with faculty on these matters.

A variety of student services such as declaring a major/minor, requesting a permission number, change of program (add/drop), petitions, etc. can be initiated by students on our website at: <https://www.csudh.edu/cbapp/student-services/student-support/>. Please visit our website to learn how you can get additional services completed online.

Graduation with Honors

An undergraduate student may be a candidate for graduation with Honors in Business Administration provided he or she meets the following criteria:

1. A minimum of 36 units in Business Administration in residence at CSUDH. At least 12 of these units must be in the concentration and three units must be from MGT 490 Strategic Management Seminar;
2. A minimum grade point average of at least 3.5 in all courses used to satisfy the upper-division requirements in the major.

Career Possibilities

Employment opportunities for students with a Major in Business Administration exist within many areas. In the private sector, students will find employment in a wide variety of business and professional organizations including public accounting firms, banks, savings and loans, and other financial institutions, commercial and high technology

industries, and in a multitude of firms engaged in transportation, communications, and the increasingly important foreign trade sector. Furthermore, business majors are actively recruited by many not-for-profit and public organizations for their skills in accounting and financial management, marketing, computer and data processing, human resource administration, and general management. Those who want to engage in entrepreneurial activity and operate their own business also will benefit from a major in business administration. In addition, an undergraduate degree in business administration is excellent preparation for graduate study in business, law, and other academic areas offering a professional focus.

Undergraduate Programs

Bachelors

- Business Administration, Bachelor of Science (p. 418)

Minors

- Business Administration, Minor (p. 436)
- Data Analytics, Minor (p. 436)
- Information Systems Security, Minor (p. 437)
- Information Systems, Minor (p. 438)
- Management, Minor (p. 439)
- Marketing, Minor (p. 439)

Certificates

- Accounting, Certificate (p. 417)
- Executive Management Certificate (p. 437)
- Information Systems, Certificate (p. 438)
- Marketing, Certificate (p. 439)
- Sports Management, Certificate (p. 440)

Graduate Programs

Certificates

- Logistics Management, Post-MBA Certificate (p. 439)
- Marketing, Post-MBA Certificate (p. 440)

Emeriti Faculty

Melvin P. Auerbach (Accounting & Finance), Donald J. Barnett (Accounting & Finance), Martin Blyn (Accounting & Finance), Potkin Basseer (Accounting & Finance), Barbara R. Chrispin (Management), George N. Clawson (Management), Dorothy M. Fisher (Information Systems), Raoul J. Freeman (Information Systems), Carolyn Harris (Business Communication), Steven Jenner (Management & Marketing), Jack Kitson (Marketing), C.W. Lee (Management), Carol V. Lopilato (Accounting & Finance), Richard Malamud (Accounting & Finance), Anthony Mastor (Accounting & Finance), Joseph F. McCloskey (Finance and Quantitative), Herbert J. Milgrim (Accounting & Finance), R. Bryant Mills (Management), George Morris (Marketing), Mazin M Nashif (Accounting & Finance), Richard Nehrbass (Management), Larry Press (Information Systems), Fahimeh Rezayat (Information Systems), Harold A. Rothbart (Industrial Management), Stanley R. Schoen (Accounting & Law), Robert H. Schueler (Business Administration), Franklin Strier (Business Law), Ricardo Ulivi (Accounting & Finance), Burhan Yavas (Accounting & Finance), Kosaku Yoshida (Accounting & Finance), Cyril E. Zoerner, Jr. (Marketing)

Accounting, Certificate

The Accounting Certificate program is designed to meet the needs of individuals who already hold a Bachelor's degree in another area, either in business with a concentration in another field or outside of business, and who now wish to acquire accounting competence. The certificate may be earned by regularly matriculated students who complete the following CSUDH courses, or show evidence of having done so elsewhere, with a grade point average of no less than 2.5. At least four of the eight accounting curriculum courses must be taken at CSU Dominguez Hills.

Requirements

The Accounting Certificate program is designed to meet the needs of individuals who already hold a Bachelor's degree in another area, either in business with a concentration in another field or outside of business, and who now wish to acquire accounting competence. The certificate

may be earned by regularly matriculated students who complete the following CSUDH courses, or show evidence of having done so elsewhere, with a grade point average of no less than 2.5. At least four of the eight accounting curriculum courses must be taken at CSU Dominguez Hills.

Accounting Certificate Prerequisites (30 units)

The following courses are the required prerequisites for students without a Bachelor's degree in Business:

| Code | Title | Hours |
|-------------------------------------|-------------------------------|-----------|
| Lower Division Prerequisites | | |
| ACC 230 | Financial Accounting | 3 |
| ACC 231 | Managerial Accounting | 3 |
| CIS 270 | Info Sys/Tech Fundamentals | 3 |
| ECO 210 | Economic Theory 1A Micro | 3 |
| LAW 240 | Legal Environment of Business | 3 |
| Upper Division Prerequisites | | |
| CIS 370 | Info Sys Theory and Practice | 3 |
| FIN 360 | Business Finance | 3 |
| MGT 310 | Management Theory | 3 |
| MKT 350 | Principles Of Marketing | 3 |
| OMG 321 | Business Statistics | 3 |
| Total Hours | | 30 |

Required Courses (12 units)

| Code | Title | Hours |
|--------------------|----------------------------|-----------|
| ACC 330 | Intermediate Accounting I | 3 |
| ACC 331 | Intermediate Accounting II | 3 |
| ACC 333 | Income Taxation I | 3 |
| ACC 337 | Cost Accounting | 3 |
| Total Hours | | 12 |

Electives (12 units)

| Code | Title | Hours |
|---|--------------------------|-----------|
| Select an additional 12 units from upper division Business Administration courses, of which at least 9 units must be from the following upper division courses: | | |
| ACC 336 | Intro To Internal Audit | |
| ACC 339 | Acctg & Ctrl Multnl Comp | |
| ACC 430 | Advanced Accounting | |
| ACC 431 | Govt & Nonprofit Acctg | |
| ACC 433 | Income Taxation II | |
| ACC 435 | Auditing | |
| LAW 340 | Law Of Bus Organizations | |
| Total Hours | | 12 |

Note: Students should consider professional certification exams (CPA, CMA, CIA, CFM) after completing additional preparation and extensive review.

Business Administration, Bachelor of Science

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major, no minor required.

Major Requirements (65-71 units)

Students must select a concentration. The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

Because most Business Administration course work completed over ten years ago is outdated, students must consult with an advisor in the Student Advisement and Service Center to ascertain whether courses taken ten or more years ago will need to be repeated. The Associate Dean in the College of Business Administration and Public Policy may waive the requirement to repeat outdated course work if there is evidence that student knowledge is current. Such evidence may consist of recent successful completion of more advanced course work in the specific discipline or satisfactory completion of designated national examinations.

Admission Requirements

Admission to the Business Administration major requires completion of all lower division Business Administration core courses with minimum grades of "C". All new majors are classified as "pre-business majors" until the requirements are met. Upper division advanced and concentration courses are available only to "Business Administration" majors. Students should consult with an advisor in the Business Advisement Center for more information.

Prerequisites and Residency Unit Requirements

All business majors are required to complete at least 36 units of the major in residence, including at least 12 of these units in the concentration and three units from MGT 490 Strategic Management Seminar.

Business Curriculum (44 units)

Students must complete all lower division core courses and satisfy the University's lower division English composition requirements (ENG 109 Freshman Composition I: Stretch 2, ENG 110 Freshman Composition Accelerated, or ENG 112 Freshman Composition Supported) and the

General Education mathematics requirement prior to enrolling in upper division business courses. Students who do not successfully complete the lower division prerequisites will not be permitted to enroll in upper division courses.

| Code | Title | Hours |
|--|---|-----------|
| Lower Division Required Core Courses ¹ | | |
| ACC 230 | Financial Accounting | 3 |
| ACC 231 | Managerial Accounting | 3 |
| CIS 270 | Info Sys/Tech Fundamentals | 3 |
| ECO 210 | Economic Theory 1A Micro | 3 |
| ECO 211 | Economic Theory 1B Macro | 3 |
| LAW 240 | Legal Environment of Business | 3 |
| Upper Division Core Courses | | |
| Select two courses from the following: ² | | 2 |
| BUS 301 | Employment Communications | |
| BUS 302 | Written Communications | |
| BUS 303 | Oral Communication ² | |
| CIS 370 | Info Sys Theory and Practice | 3 |
| FIN 360 | Business Finance | 3 |
| MGT 310 | Management Theory | 3 |
| MKT 350 | Principles Of Marketing | 3 |
| OMG 321 | Business Statistics ³ | 3 |
| Upper Division Advanced Core Courses | | |
| BUS 445 | International Business | 3 |
| MGT 490 | Strategic Management Seminar ⁴ | 3 |
| OMG 322 | Operations Management | 3 |
| Total Hours | | 44 |

¹ **Note:** All lower division courses required for the Business Administration major must be completed with a grade of "C" or better.

² At least two of the following courses: BUS 301 Employment Communications, BUS 302 Written Communications, or BUS 303 Oral Communication must be taken during or prior to the semester when the student first registers for any other Business Administration upper division course.

³ Students in Business Administration should take a basic statistics course as the General Education Quantitative Reasoning requirement, otherwise OMG 221 Introduction to Business Statistics will need to be taken as a prerequisite to OMG 321 Business Statistics.

⁴ **Note:** MGT 490 Strategic Management Seminar is a capstone course and should be taken during the last semester before graduation with 400-level core courses and concentration courses (or General Education courses). Students must meet the specific course prerequisites for MGT 490 Strategic Management Seminar.

Concentrations

Each Business Administration major must select one of the concentrations listed below:

Accounting Concentration (24 units)

| Code | Title | Hours |
|---|----------------------------|-------|
| Required Courses | | |
| Complete required concentration courses | | |
| ACC 330 | Intermediate Accounting I | 3 |
| ACC 331 | Intermediate Accounting II | 3 |
| ACC 333 | Income Taxation I | 3 |

| | | |
|------------|-------------------------|---|
| ACC 337 | Cost Accounting | 3 |
| ACC 336 | Intro To Internal Audit | 3 |
| or ACC 435 | Auditing | |

Electives

Select an additional 9 units from the following upper division courses: 9

| | | |
|---------|--------------------------------|--|
| ACC 336 | Intro To Internal Audit | |
| ACC 339 | Acctg & Ctrl Multnl Comp | |
| ACC 340 | Accounting Information Systems | |
| ACC 385 | Entrepreneurial Accounting | |
| ACC 430 | Advanced Accounting | |
| ACC 431 | Govt & Nonprofit Acctg | |
| ACC 433 | Income Taxation II | |
| ACC 435 | Auditing | |
| LAW 340 | Law Of Bus Organizations | |

Total Hours 24

Note: Students should consider professional certification exams (CPA, CMA, CIA, CFM) after completing additional preparation and extensive review.

Business Analytics Concentration (27 units)

| Code | Title | Hours |
|------|-------|-------|
|------|-------|-------|

Required Courses

| | | |
|---|-------------------------------------|---|
| Complete required concentration courses | | |
| CIS 272 | Business Programming I ¹ | 3 |
| CIS 372 | Systems Analysis and Design | 3 |
| CIS 373 | Database Systems | 3 |

Select two of the following courses: 6

| | | |
|---------|---|--|
| CIS 380 | Introduction to Programming for Data Analysis | |
| CIS 480 | Data Mining and Business Intelligence | |
| OMG 423 | Quantitative Analysis | |

Electives

Select four elective concentration courses from one of the following tracks: 12

Cyber Security Track:

One of the concentration courses that hasn't been taken

| | | |
|---------|--|--|
| CIS 275 | Internet Literacy | |
| CIS 375 | Data Communications | |
| CIS 378 | Info Security Theories & Pract | |
| CIS 478 | Firewall and Computer Network Security | |
| CIS 482 | Databases & Web Security | |
| CIS 488 | Mgt of Information Security | |
| CIS 496 | Internship In CIS | |

Information & Decisions Systems Track:

One of the core concentration courses that hasn't been taken

| | | |
|---------|---------------------------------|--|
| CIS 371 | Business Programming II | |
| CIS 375 | Data Communications | |
| CIS 378 | Info Security Theories & Pract | |
| CIS 471 | Adv Network Based Applications | |
| CIS 474 | Project Management Fundamentals | |
| CIS 476 | Adv Concepts Bus Systems | |
| CIS 477 | Adv Data Communications | |

| | | |
|--------------------|-------------------|-----------|
| CIS 496 | Internship In CIS | |
| Total Hours | | 27 |

¹ CIS 272 Business Programming I is replaceable with CIS 371 Business Programming II for students with some prior programming knowledge.

Entrepreneurship Concentration (24 units)

| Code | Title | Hours |
|--|--------------------------------|-------|
| ACC 385 | Entrepreneurial Accounting | 3 |
| FIN 485 | Entrepreneurial Finance | 3 |
| LAW 340 | Law Of Bus Organizations | 3 |
| MGT 330 | New Venture Entrepreneurship | 3 |
| MKT 352 | Advertising and Promotion MGT. | 3 |
| Select three courses from the following: | | 9 |
| HRM 313 | Human Resources Management | |
| MGT 412 | Small Business Management | |
| MGT 416 | Leadership | |
| MGT 491 | Bus Consulting Practicum | |
| MKT 450 | Internet Marketing | |
| MKT 454 | Marketing Research | |

Total Hours 24

Finance Concentration (24 units)

| Code | Title | Hours |
|---|------------------------------------|-------|
| FIN 382 | Financial Analysis | 3 |
| FIN 468 | Seminar in Investment Analysis | 3 |
| FIN 481 | Financial Inst & Mgmt | 3 |
| FIN 488 | Multinatl Financial Trans | 3 |
| Select four courses from the following: | | 12 |
| ACC 337 | Cost Accounting | |
| FIN 375 | Personal Financial Planning | |
| FIN 426 | Portfolio Management | |
| FIN 467 | Real Estate Finance and Investment | |
| FIN 480 | Economics Of The Firm | |
| FIN 484 | Financial Forecasting & Modeling | |
| FIN 485 | Entrepreneurial Finance | |
| FIN 494 | Independent Study in Finance | |
| FIN 496 | Internship in Finance | |
| OMG 423 | Quantitative Analysis | |

Total Hours 24

General Business Concentration (21 units)

| Code | Title | Hours |
|---|----------------------------------|-------|
| MGT 312 | Organizational Behavior | 3 |
| MGT 412 | Small Business Management | 3 |
| Select five courses from the following: | | 15 |
| ACC 333 | Income Taxation I | |
| ACC 337 | Cost Accounting | |
| ACC 433 | Income Taxation II | |
| CIS 275 | Internet Literacy | |
| CIS 372 | Systems Analysis and Design | |
| FIN 468 | Seminar in Investment Analysis | |
| FIN 484 | Financial Forecasting & Modeling | |
| HRM 313 | Human Resources Management | |

| | |
|---------|--|
| HRM 318 | Training and Development |
| LAW 340 | Law Of Bus Organizations |
| MKT 355 | Consumer Behavior |
| MKT 454 | Marketing Research |
| OMG 430 | Enterprise Resource Planning and Supply Chain Management Cases |

Total Hours 21

Global Supply Chain Management Concentration (24 units)

| Code | Title | Hours |
|--|--|-------|
| OMG 220 | Introduction to Transportation Management | 3 |
| OMG 230 | Introduction to Supply Chain Management | 3 |
| OMG 423 | Quantitative Analysis | 3 |
| OMG 427 | Business Process Improvement | 3 |
| OMG 428 | Purchasing Management | 3 |
| OMG 430 | Enterprise Resource Planning and Supply Chain Management Cases | 3 |
| Select two courses from the following: | | 6 |
| CIS 372 | Systems Analysis and Design | |
| CIS 373 | Database Systems | |
| CIS 474 | Project Management Fundamentals | |
| CIS 476 | Adv Concepts Bus Systems | |

Total Hours 24

Information Systems Concentration (27 units)

| Code | Title | Hours |
|--|--|-------|
| CIS 272 | Business Programming I | 3 |
| CIS 275 | Internet Literacy | 3 |
| CIS 372 | Systems Analysis and Design | 3 |
| CIS 373 | Database Systems | 3 |
| CIS 375 | Data Communications | 3 |
| CIS 474 | Project Management Fundamentals | 3 |
| Select three courses from the following: | | 9 |
| CIS 371 | Business Programming II | |
| CIS 378 | Info Security Theories & Pract | |
| CIS 471 | Adv Network Based Applications | |
| CIS 476 | Adv Concepts Bus Systems | |
| CIS 477 | Adv Data Communications | |
| CIS 478 | Firewall and Computer Network Security | |
| CIS 480 | Data Mining and Business Intelligence | |
| CIS 482 | Databases & Web Security | |
| CIS 488 | Mgt of Information Security | |
| CIS 496 | Internship In CIS | |

Total Hours 27

Information Systems Security Concentration (27 units)

| Code | Title | Hours |
|---------|--|-------|
| CIS 272 | Business Programming I | 3 |
| CIS 275 | Internet Literacy | 3 |
| CIS 372 | Systems Analysis and Design | 3 |
| CIS 373 | Database Systems | 3 |
| CIS 375 | Data Communications | 3 |
| CIS 378 | Info Security Theories & Pract | 3 |
| CIS 478 | Firewall and Computer Network Security | 3 |

Select two courses from the following: 6

| | |
|---------|-----------------------------|
| CIS 482 | Databases & Web Security |
| CIS 488 | Mgt of Information Security |
| CIS 496 | Internship In CIS |

Executive Management Certificate

The Executive Management Certificate is designed to provide a body of knowledge for management staff in small to medium-sized general-business firms, including hotels and resorts, who may not have a management degree. This set of coursework will provide essential academic background to accompany real-world management experience. This course sequence will explore all major facets of management for both domestic and international firms.

The Executive Management Certificate is designed to provide a body of knowledge for management staff in small to medium-sized general-business firms, including hotels and resorts, who may not have a management degree. This set of coursework will provide essential academic background to accompany real-world management experience. This course sequence will explore all major facets of management for both domestic and international firms.

Requirements

Required Courses (15 units)

| Code | Title | Hours |
|----------------------------|-----------------------------|-------|
| Select four courses | | |
| HRM 313 | Human Resources Management | |
| MGT 310 | Management Theory | |
| MGT 312 | Organizational Behavior | |
| MGT 416 | Leadership | |
| MGT 418 | International Management | |
| SEH 448 | Hotel and Resort Management | |

The certificate's objectives are:

- To provide background theory on how to manage staff and an organization.
- To provide the fundamentals of how and why organizations operate as they do.
- To provide insight into how to lead a staff and an organization.
- To provide knowledge of how to staff and manage an organization's workforce.
- To provide specific knowledge into the issues of managing hotels and resorts.
- To provide insight into the ideas and issues surrounding managing an organization that is interconnected to other organizations in a globalized world.

Information Systems Security, Minor

The Minor in Information Systems Security offers students an opportunity to acquire an in-depth understanding of methods and applications of information security. It thus provides an excellent compliment and/or improvement to the functional knowledge obtained through other programs. Two preparation courses (6 units) and five ISS concentration courses (15 units) comprise the minor.

Information Systems, Certificate

The Information Systems Certificate program is designed to meet the needs of individuals who already hold a bachelor's degree in another area, either in business with a concentration in another field or outside of business, and who now wish to acquire information systems competence. The certificate may be earned by regularly matriculating students who complete the listed CSUDH courses, or show evidence of having done so elsewhere, where an overall GPA of no less than 2.5. At least four of the Information Systems Curriculum courses must be taken at CSUDH, and the certificate will be granted upon completion of requirements.

|-------------------------|-------------------------------------|-----------|
| Required Courses | | |
| HRM 313 | Human Resources Management | 3 |
| HRM 316 | Labor & Industrial Relations | 3 |
| MGT 310 | Management Theory | 3 |
| MGT 312 | Organizational Behavior | 3 |
| Elective | | |
| MGT 416 | Leadership | 3 |
| | or MGT 418 International Management | |
| Total Hours | | 15 |

Marketing, Certificate

The Marketing Certificate program is designed to meet the needs of individuals who already hold a bachelor's degree in another area, either in business with a concentration in another field or outside of business, and who now wish to acquire marketing knowledge and competence. The certificate may be earned by regularly matriculated students who complete the following CSUDH courses, or show evidence of having done so elsewhere, with a grade point average of no less than 2.5. At least four of the six marketing curriculum courses must be taken at CSU Dominguez Hills.

Requirements

Marketing Certificate Prerequisites (12 units)

The following are the courses required for students without a Bachelor's degree in Business:

| Code | Title | Hours |
|-------------------------------------|---|-----------|
| Lower Division Prerequisites | | |
| CIS 270 | Info Sys/Tech Fundamentals ¹ | 3 |
| ECO 210 | Economic Theory 1A Micro | 3 |
| Upper Division Prerequisites | | |
| MKT 350 | Principles Of Marketing | 3 |
| OMG 321 | Business Statistics | 3 |
| Total Hours | | 12 |

¹ **Note:** Students who can demonstrate competence in computer application software usage, specifically word processing and spreadsheet software, will not be required to take CIS 270 Info Sys/ Tech Fundamentals.

Marketing Certificate Requirements (18 units)

The following are the required courses for **all** students interested in the Certificate in Marketing, including those with a business degree in a non-marketing area:

| Code | Title | Hours |
|--|--|-----------|
| MKT 355 | Consumer Behavior | 3 |
| MKT 454 | Marketing Research | 3 |
| MKT 459 | Sem In Marketing Mgmt | 3 |
| Select three courses from the following: | | 9 |
| MKT 351 | Sales Mgt & Techniques | |
| MKT 352 | Advertising and Promotion MGT. | |
| MKT 353 | Retail Mktg Management | |
| MKT 358 | International Marketing | |
| MKT 450 | Internet Marketing | |
| MKT 452 | Sports & Entertainment Mkt. | |
| MKT 495 | Special Topics in Marketing ¹ | |
| OMG 430 | Enterprise Resource Planning and Supply Chain Management Cases | |
| Total Hours | | 18 |

¹ **Note:** May be taken twice with different topics.

Marketing, Minor

The Minor in Marketing is designed for students majoring in other fields who wish to acquire marketing knowledge and competence. A total of 12 units in upper division marketing courses are required. It is suggested that students take ECO 210 Economic Theory 1A Micro prior to enrolling in MKT 350 Principles Of Marketing. A grade point average of 2.0 must be achieved in the minor.

The Minor in Marketing is designed for students majoring in other fields who wish to acquire marketing knowledge and competence. A total of 12 units in upper division marketing courses are required. It is suggested that students take ECO 210 Economic Theory 1A Micro prior to enrolling

in MKT 350 Principles Of Marketing. A grade point average of 2.0 must be achieved in the minor.

Requirements

| Code | Title | Hours |
|---|--|-----------|
| Required Course | | |
| MKT 350 | Principles Of Marketing | 3 |
| Electives | | |
| Select three elective courses from the following: | | 9 |
| MKT 351 | Sales Mgt & Techniques | |
| MKT 352 | Advertising and Promotion MGT. | |
| MKT 353 | Retail Mktg Management | |
| MKT 355 | Consumer Behavior | |
| MKT 358 | International Marketing | |
| MKT 450 | Internet Marketing | |
| MKT 452 | Sports & Entertainment Mkt. | |
| MKT 454 | Marketing Research | |
| MKT 495 | Special Topics in Marketing ¹ | |
| Total Hours | | 12 |

¹ May be taken twice with different topics.

Marketing, Post-MBA Certificate

The Marketing Certificate program is designed to meet the needs of individuals who already hold a master's degree in another area, with a concentration in another field who now wish to acquire marketing knowledge and competence.

The Marketing Certificate program is designed to meet the needs of individuals who already hold a master's degree in another area, with a concentration in another field who now wish to acquire marketing knowledge and competence.

Admission Requirements

- A Master's degree from an accredited university.
- Approval by the Assistant Dean.
- The certificate may be earned by regularly matriculated students who complete the following CSUDH courses:

| Code | Title | Hours |
|--|-------------------------------|-----------|
| MKT 500 | Marketing Management | 3 |
| MKT 501 | Marketing Information Mgt | 3 |
| MKT 580 | Strategic Marketing | 3 |
| Select two electives from the following: | | 6 |
| MKT 510 | Business-to-Busingess Mkt | |
| MKT 512 | Seminar in Services Marketing | |
| MKT 530 | Negotiation and Presentations | |
| MKT 531 | Sales Management | |
| MKT 545 | New Product Development | |
| MKT 550 | Internet Marketing | |
| MKT 555 | Seminar in Consumer Behavior | |
| MKT 595 | Special Topics | |
| Total Hours | | 15 |

Sports Management, Certificate

The Certificate in Sports Management program is designed to meet the needs of individuals who already hold a Bachelor's degree. The program trains students and professionals for a long list of careers, including professional and amateur sports, intercollegiate athletics, sports marketing or event and facility management. The certificate program tackles the growing complexity of the sports business, facilities and entertainment industries with four core courses: Ticketing Operations, Leadership, Strategic Sport Marketing and Sport Venue and Event Management. The following segments of the sport industry provide most of the job opportunities:

- Professional Sports Operations
- Sport Marketing and Sponsorship
- Facility & Event Management
- College Athletics
- Sports Media & Communication
- Athletics Representation

Requirements

Students are required to have a Bachelor's degree. Limited computer experience is also needed to take the four courses offered online. An access to Internet is required in order to take the courses.

| Code | Title | Hours |
|--------------------|--|-----------|
| SEH 400 | Tickets Operations in the Entertainment Industry | 3 |
| SEH 401 | Leadership in the Entertainment Industry | 3 |
| SEH 402 | Strategic Sports Marketing | 3 |
| SEH 403 | Sport Venue and Event Management | 3 |
| Total Hours | | 12 |

Chemistry

College of Natural and Behavioral Sciences

Department of Chemistry and Biochemistry (<https://www.csudh.edu/chemistry/>)

Department Mission Statement

California State University Dominguez Hills (CSUDH) Department of Chemistry provides world-class academic excellence – across the chemical society – by engaging a diverse student body and faculty in a dynamic learning environment. Our department provides cutting-edge research and is shaping the next generation of critical thinkers, scientists, and industry leaders.

Program Description

The Department of Chemistry and Biochemistry offers majors leading to a Bachelor of Science or a Bachelor of Arts Degree. The B.A. degree also has a Biochemistry Option. The Bachelor of Science in Chemistry is designed primarily for students who plan to enter graduate programs in chemistry or other closely related sciences. This program is approved by the American Chemical Society, meeting its guidelines and standards for undergraduate chemistry education. Students graduating with this degree will receive a certificate from the American Chemical Society. The Bachelor of Arts in Chemistry fulfills the need of those students who are pursuing pre-medical or pre-dental programs as well as those who plan to enter fields such as business, environmental or patent law, where a

background in chemistry can be of great utility. Our department webpage link is <https://www.csudh.edu/chemistry/>

Features

The department is housed in well-equipped offices and laboratories on the third floor of the Science and Innovation Building. The faculty consists of full-time members who represent all the major areas of chemistry. Students generally benefit from the smaller class sizes and the individualized attention, which is seldom available at large universities. Students are introduced to modern instrumental techniques and are given many "hands-on" experience opportunities.

Academic Advising

Students who are majoring in chemistry should be advised once each semester, prior to registration. For a list of advisors in the department of chemistry and biochemistry, please visit our website <https://www.csudh.edu/chemistry/>

Preparation

High school students should include two years of algebra, one year of geometry and a one-year course in chemistry in their high school preparation. A course in high school physics also is recommended. Students who enter without this preparation must expect to delay their graduation beyond the minimum time-period of four years. Either student take our introduction to chemistry of CHE108 and earn Credit or take the Chemistry placement exam and pass to be placed in the CHE110 General Chemistry I.

Community college transfers should have completed one year of general chemistry, one year of calculus and one year of physics. They MUST transfer their entire sequence to earn transfer credit/be articulated for our CHE110 and CHE112 general chemistry series in our department. Please refer to www.assist.org (<http://www.assist.org/>) for all agreed and approved articulation requests from Community Colleges, CSUs, and UCs.

Pre-Medical Professions Training in Biochemistry

Students who wish to apply to professional schools of medicine, dentistry, veterinary medicine, or other medical areas following graduation should consider completing the requirement for a B.S. degree in Chemistry in Biochemistry. In addition, students should complete the elective course that was not selected to fulfill the degree requirements. The following courses are not usually required for admission to medical school, but it is recommended that students consider them when planning their academic program. Many former students have found them to be a valuable introduction to courses that must be taken in many professional programs. Please note: BIO220 Molecular Biology is a pre-requisite for BIO320 and BIO340. Biochemistry students do not need to take BIO124 & BIO125. 6 Units in the C Elective area is required for BS Biochemistry majors listed below.

| Code | Title | Hours |
|---------|---------------------------|-------|
| BIO 314 | Developmental Biology | 3 |
| BIO 315 | Developmental Biology Lab | 1 |
| BIO 320 | Cell Biology | 3 |
| BIO 340 | Genetics | 3 |

Student Organizations

Membership in the Chemistry & Biochemistry Club of CSU Dominguez Hills is open to all students (https://torolink.csudh.edu/organization/chem_biochem (https://torolink.csudh.edu/organization/chem_biochem/)). CSUDH Chemistry & Biochemistry Club

The purpose of this organization is to expand the perception and appreciation of Chemistry & Biochemistry. The mission of the club serves as a valuable medium for information, opportunities, and networking that would assist the academic and professional career goals of students and faculty. All CSUDH students, faculty, and alumni who are interested in chemistry and biochemistry are welcome to join the CSUDH Chemistry & Biochemistry Club.

Graduation With Honors

An undergraduate student may be a candidate for graduation with Honors in Chemistry provided he or she meets the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of at least 3.5 in all courses used to satisfy the upper-division requirements in the major;

Career Possibilities

A Major in Chemistry either as a B.A. or B.S. will prepare students for graduate work in chemistry or biochemistry; teaching chemistry in secondary schools; employment with industry or government; entry into professional schools such as medicine or dentistry; or entry into law school with a view toward specialization in patent or environmental law.

Students may prepare for a career in teaching science at the secondary level (junior high or high school) by completing an approved "Subject Matter Preparation Program." Completion of such a program is the first step in meeting the state requirements for a teaching credential. As the program requirements for the "Subject Matter Preparation Program" in science have changed recently, interested students should consult the departmentally designated advisor for current information.

Undergraduate Programs

Bachelors

- Chemistry, Bachelor of Arts (p. 443)
- Chemistry, Bachelor of Science (p. 446)

Minor

- Organic/Biochemistry, Minor (p. 448)

Graduate Programs

Subject Matter Authorization

- Chemistry, Subject Matter Authorization (p. 447)

Faculty

Arumugam Thangavel, Department Chair
H. Leonardo Martinez, Noel Sturm, Lihung Pu, Tieli Wang, Kenneth R. Rodriguez, Kari Pederson, Erin McCauley, Barbara Belmont, and Lida Latifzadeh

Staff

Laboratory Technicians: Anthony Diaz (Led Lab Technician),

Justin Hathaway, and Amber M. Rivas
 Department Office: SCI 324, (310) 243-3376

Emeriti Faculty

Ulrich de la Camp, L. Danette Dobyns, Eugene N. Garcia, James Lyle, Sofia Papatheodorou, Oliver Seely, William Wilk, George Wiger

Courses

CHE 102. Chemistry For The Citizen. (3 Units)

A non-mathematical treatment of the basic principles of chemistry and their application to various facets of life in a highly technological society. Offered Fall, Spring, All terms

CHE 103. Chemistry Lab for the Global Citizen. (1 Units)

Recommended general education course for students interested in the chemistry of everyday life. Includes determining the composition of foods and drugs, measurements, unit conversions, scientific notation, chemical representations, mole concept, structure of atoms and molecules. Three hours of laboratory per week. Offered Fall, Spring

CHE 108. Introduction to College Chemistry. (5 Units)

Measurements, units, unit conversion, scientific notation, chemical stoichiometry, mole concept, structure of atoms and molecules. CR/NC grading. Three hours of lecture and six hours of laboratory per week. Offered Fall, Spring, All terms

CHE 110. General Chemistry I. (5 Units)

Prerequisites: CHE 108 or high school chemistry and satisfactory performance on the General Chemistry Placement test. Chemical stoichiometry, atomic structure, periodic table, quantum theory, gases, thermochemistry, ionic bonding, Lewis formulas, liquids, solids, solutions. Four hours of lecture and three hours of laboratory per week. Offered Fall, Spring, All terms

CHE 112. General Chemistry II. (5 Units)

Prerequisite: CHE 110. Chemical kinetics, equilibria, thermodynamics, acids and bases, solubility, electrochemistry, covalent bonding, transition metal complexes. Four hours of lecture and three hours of laboratory per week. Offered Fall, Spring, All terms

CHE 230. Quantitative Analysis. (4 Units)

Prerequisite: CHE 112. Introduction to the techniques and theory of gravimetric and volumetric analyses, colorimetry, flame photometry and electroanalytical procedures. Two hours of lecture and six hours of laboratory per week. Laboratory fee required. Offered Fall, Spring

CHE 300. Organic Chemistry I. (3 Units)

Prerequisite: CHE 112 or 1 year of general chemistry. A detailed study of organic molecular structure, reaction mechanisms stereochemistry, and synthesis with emphasis on a aliphatic and aromatic systems. Offered Summer

CHE 301. Organic Chemistry Lab I. (1 Units)

Prerequisites: CHE 112 or 1 year of general chemistry; concurrent enrollment in CHE 300. Basic experimental techniques of organic chemistry. Three hours of laboratory per week. Offered Summer

CHE 302. Organic Chemistry II. (3 Units)

Prerequisites: CHE 300 and CHE 301. Concurrent enrollment in CHE 303. Continuation of CHE 300 with emphasis on the chemistry of organic compounds containing oxygen and nitrogen. Offered Summer

CHE 303. Organic Chemistry Lab II. (1 Units)

Prerequisites: CHE 112 or 1 year of general chemistry; concurrent enrollment in CHE 302. Preparation of organic compounds and qualitative organic analysis. Three hours of laboratory per week. Offered Summer

CHE 310. Organic Chemistry I. (4 Units)

Prerequisites: CHE 112; concurrent enrollment in CHE 311. Systematic study of organic compounds, with emphasis on molecular structure and reaction mechanisms; stereochemistry; aliphatic compounds. Offered Fall, Spring

CHE 311. Organic Chemistry Lab I. (1 Units)

Prerequisite: Concurrent enrollment in CHE 310. Techniques of separation and purification of organic compounds. Introduction to organic synthesis. Three hours of laboratory per week. Fee required. Offered Fall, Spring

CHE 312. Organic Chemistry II. (3 Units)

Prerequisites: CHE 310, CHE 311; concurrent enrollment in CHE 313. A continuation of CHE 310 with emphasis on aromatic systems. Introduction to spectroscopy. Structures and reactions of organic compounds containing oxygen and nitrogen. Offered Fall, Spring

CHE 313. Organic Chemistry Laboratory II. (2 Units)

Prerequisites: CHE 310, CHE 311; concurrent enrollment in CHE 312. Organic synthesis, introduction to spectroscopy. Qualitative organic analysis. Six hours of laboratory per week. Fee required. Offered Fall, Spring

CHE 316. Survey of Organic Chemistry. (3 Units)

Prerequisite: CHE 112 and concurrent enrollment in CHE 317. Structure and properties of aliphatic and aromatic compounds. Stereochemistry and functional group chemistry. Oriented toward life sciences and related areas. Offered Fall, Spring

CHE 317. Survey of Organic Chemistry Laboratory. (1 Units)

Co-requisite: CHE 316. Basic purification processes and techniques of separation of mixtures. Preparation of organic compounds. Introduction to qualitative and quantitative analytical methods, including chemical, chromatographic, and spectroscopic procedures. Three hours of laboratory per week. Fee required. Offered Fall, Spring

CHE 320. Physical Chemistry I. (5 Units)

Prerequisites: CHE 112 and CHE 230; MAT 193; PHY 132. PHY 122 may be substituted for PHY 132 by students in the biochemistry option and by non-chemistry majors, with consent of instructor. Principles and applications of classical thermodynamics and chemical kinetics. Introduction to computer based techniques of treating scientific data. Offered Fall

CHE 322. Physical Chemistry II. (3 Units)

Prerequisite: CHE 320. Introduction to group theory, quantum chemistry, spectroscopy and statistical thermodynamics. Offered Spring

CHE 360. Writing in Chemical Sciences. (2 Units)

Prerequisites: CHE 310 or concurrent enrollment required. Extensive practice in written chemistry communication, emphasizing effective communication of scientific data to a wide variety of audiences. Extensive practice in writing chemistry reports and summaries, preparing career related documents, searching and evaluating chemical literature. A grade of C or better in this course fulfills the GEAR requirement for all Chemistry and Biochemistry majors.
Offered Fall, Spring

CHE 393. Supervised Projects. (1-3 Units)

Prerequisites: CHE 112 and consent of instructor. Laboratory projects to be carried out under the supervision of a chemistry faculty member. Designed for students of sophomore and junior standing. A-C/NC grading. Repeatable course. Three to nine hours of laboratory per week.
Offered Fall, Spring

CHE 420. Advanced App for Chemistry. (2 Units)

Prerequisite: CHE 320. Advanced applications for chemistry including computational techniques, molecular modeling, combinatorial approaches to synthesis, data acquisition and analysis, and use of computers to simulate spectral data. One hour of lecture and two hours of activity per week.
Offered Spring

CHE 431. Adv Integrated Lab I Lec. (3 Units)

Prerequisites: CHE 230 and CHE 320. Experimental work involving instrumental analytical techniques, inorganic syntheses, physical measurements on chemical systems. Analysis of experimental data, including the use of computer techniques. One hour of lecture and six hours of laboratory per week.
Offered Fall

CHE 433. Adv Integrated Lab II Lec. (3 Units)

Prerequisites: CHE 431 and CHE 322. A continuation of CHE 431. One hour of lecture and six hours of laboratory per week.
Offered Spring

CHE 440. Inorganic Chemistry. (4 Units)

Prerequisite: CHE 322. Structural inorganic chemistry, coordination compounds, mechanisms of inorganic reactions, inorganic synthetic methods. Organometallic chemistry, catalysis.
Offered Spring

CHE 450. Biochemistry I. (4 Units)

Prerequisites: CHE 230, CHE 312 and CHE 313, or CHE 316 and CHE 317, and concurrent enrollment in CHE 451. The chemistry of amino acids and proteins; the chemistry and metabolism of carbohydrates and lipids; energetics in living systems.
Offered Fall, Spring

CHE 451. Biochemistry I Lab. (1 Units)

Prerequisites: CHE 230, CHE 312, and CHE 313, or CHE 316 and CHE 317, and concurrent enrollment in CHE 450. Biochemistry laboratory experiments using advanced techniques for separation and analysis of biologically active compounds. Three hours of laboratory per week. Fee required.
Offered Fall, Spring

CHE 452. Biochemistry II. (4 Units)

Prerequisite: CHE 450. Metabolism of nitrogenous compounds, discussion of nucleic acid structure/function and metabolic control.
Offered Spring

CHE 453. Biochemistry II Lab. (2 Units)

Prerequisites: CHE 451 and concurrent enrollment in CHE 452. Biochemistry experiments using advanced techniques for the isolation and purification of macromolecules, and for determination of their activity or function. Six hours of laboratory per week.
Offered Spring

CHE 456. Clinical Chemistry. (3 Units)

Prerequisites: CHE 450 and CHE 451. Methods of analysis of body fluids and tissues. Relation of analytical results to interpretation of metabolism and diagnosis of disease. Three hours of lecture and three hours of laboratory per week. Laboratory fee required.
Offered Fall, Spring

CHE 458. Toxicology. (3 Units)

Prerequisites: CHE 450 is required; CHE 452 is recommended. Discussion of methods of introduction of toxic substances into the body, their metabolic transformations, and their biochemical and physiological effects. Examples drawn from forensic, clinical, occupational, and environmental sources.
Offered Infrequent

CHE 460. Chemical Literature. (2 Units)

Prerequisites: CHE 312 and CHE 320. Chemical literature, including the nature, content, and accessibility. Modern electronic search and retrieval techniques. CR/NC grading.
Offered Spring

CHE 474. Geochemistry. (3 Units)

Prerequisites: CHE 112 is required; EAR 356 is recommended. Factors controlling the distribution of the chemical elements in the earth, atmosphere and oceans. Methods in the analysis of minerals. Special consideration of economically important metals. Applications in earth sciences, chemistry, and environmental studies. Two hours of lecture and three hours of laboratory per week.
Offered Infrequent

CHE 495. Selected Topics in Chemistry. (1-3 Units)

Prerequisite: Consent of instructor. Lectures on a specific area of current interest in chemistry, or advanced discussion of a selected topic in a limited field of chemistry. Repeatable course. One to three hours of lecture per week.
Offered Fall, Spring

CHE 497. Directed Research. (1-3 Units)

Prerequisites: Senior standing and consent of instructor. Advanced laboratory work, with each student undertaking an independent and original investigation. A-C/NC grading. Repeatable course. Three or nine hours of laboratory per week.
Offered Fall, Spring

Chemistry, Bachelor of Arts Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

No minor required.

Major Requirements (60-62 units)

Students must select one of the options listed. The following courses, or their approved transfer equivalents, are required of all candidates for this degree. A grade of "C" or better must be achieved in all courses.

Each B.A. Chemistry major must select one of the options listed below:

Biochemistry Option (62-64 units)

| Code | Title | Hours |
|--|---|-------|
| Lower Division Required Courses | | |
| CHE 110 | General Chemistry I | 5 |
| CHE 112 | General Chemistry II | 5 |
| CHE 230 | Quantitative Analysis | 4 |
| MAT 191 | Calculus I | 5 |
| MAT 193 | Calculus II | 5 |
| Select one of the following: | | 8-10 |
| PHY 130 & PHY 132 | General Physics I and General Physics II | |
| PHY 120 & PHY 122 | Elements Of Physics I and Elements Of Physics II | |

Upper Division Required Courses

| | | |
|--------------------|---------------------------------|--------------|
| CHE 310 | Organic Chemistry I | 4 |
| CHE 311 | Organic Chemistry Lab I | 1 |
| CHE 312 | Organic Chemistry II | 3 |
| CHE 313 | Organic Chemistry Laboratory II | 2 |
| CHE 320 | Physical Chemistry I | 5 |
| CHE 360 | Writing in Chemical Sciences | 2 |
| CHE 420 | Advanced Applic for Chemistry | 2 |
| CHE 450 | Biochemistry I | 4 |
| CHE 451 | Biochemistry I Lab | 1 |
| CHE 452 | Biochemistry II | 4 |
| CHE 453 | Biochemistry II Lab | 2 |
| Total Hours | | 62-64 |

General Chemistry Option (63 units)

| Code | Title | Hours |
|--|-----------------------|-------|
| Lower Division Required Courses | | |
| CHE 110 | General Chemistry I | 5 |
| CHE 112 | General Chemistry II | 5 |
| CHE 230 | Quantitative Analysis | 4 |
| MAT 191 | Calculus I | 5 |
| MAT 193 | Calculus II | 5 |
| PHY 130 | General Physics I | 5 |
| PHY 132 | General Physics II | 5 |

Upper Division Required Courses

| | | |
|--------------------|---------------------------------|-----------|
| CHE 310 | Organic Chemistry I | 4 |
| CHE 311 | Organic Chemistry Lab I | 1 |
| CHE 312 | Organic Chemistry II | 3 |
| CHE 313 | Organic Chemistry Laboratory II | 2 |
| CHE 320 | Physical Chemistry I | 5 |
| CHE 322 | Physical Chemistry II | 3 |
| CHE 360 | Writing in Chemical Sciences | 2 |
| CHE 420 | Advanced Applic for Chemistry | 2 |
| CHE 431 | Adv Integrated Lab I Lec | 3 |
| CHE 440 | Inorganic Chemistry | 4 |
| Total Hours | | 63 |

CHE 450 Biochemistry I: Major students may substitute this course for General Education Area E. Please contact the CNBS Student Success Center to request the course substitution.

- General familiarity with the following areas in chemistry: analytical, biochemistry, inorganic, organic and physical.
- Developed formal (abstract) thinking skills as well as concrete thinking skills.
- Learned how to think critically and analyze chemical problems
- The ability to work effectively and safely in a laboratory environment.
- The ability to work in teams as well as independently.
- The ability to communicate effectively, both orally and in writing

Chemistry, Bachelor of Science

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major, no minor required.

Major Requirements (79 units)

The following courses, or their approved transfer equivalents, are required of all candidates for this degree. A grade of "C" or better must be achieved in all courses.

| Code | Title | Hours |
|--|---------------------------------|-----------|
| Lower Division Required Courses | | |
| CHE 110 | General Chemistry I | 5 |
| CHE 112 | General Chemistry II | 5 |
| CHE 230 | Quantitative Analysis | 4 |
| MAT 191 | Calculus I | 5 |
| MAT 193 | Calculus II | 5 |
| MAT 211 | Calculus III | 5 |

| CHE 431 | Adv Integrated Lab I Lec | 3 |
| CHE 433 | Adv Integrated Lab II Lec | 3 |
| CHE 440 | Inorganic Chemistry | 4 |
| CHE 450 | Biochemistry I ¹ | 4 |
| CHE 451 | Biochemistry I Lab | 1 |
| PHY 333 | Analog Electronics | 3 |
| Total Hours | | 79 |

¹ Major students may substitute this course for General Education Area E. Please contact the CNBS Student Success Center to request the course substitution.

Program Learning Outcomes

- General familiarity with the following areas in chemistry: analytical, biochemistry, inorganic, organic and physical.
- Developed formal (abstract) thinking skills as well as concrete thinking skills.
- Learned how to think critically and analyze chemical problems.
- The ability to work effectively and safely in a laboratory environment.

- The ability to work in teams as well as independently.\n
- The ability to communicate effectively, both orally and in writing.

Chemistry, Subject Matter Authorization

Holders of a Single Subject or Multiple Subject credential issued by the California Commission on Teacher Credentialing may secure a Specific Chemistry Subject Matter Authorization that allows the holder to teach the specific subjects in grades preschool, K-12, and classes organized primarily for adults.

For other requirements governing issuance of this authorization, consult the Teacher Education section of this catalog or contact the School of Education Student Services Center.

Requirements

Complete each of the following courses or equivalent as approved by the Chemistry Department Advisor.

Chicana/Chicano Studies

College of Arts and Humanities
Department of Chicana and Chicano Studies

Program Description

Undergraduate

The Chicana and Chicano Studies (CHS) major is an interdisciplinary Ethnic Studies major that investigates Chicana/o historical/social, political, and cultural experiences. The BA degree and minor program emphasize a theoretical and empirical foundation preparing students to pursue diverse career tracks, graduate school, and post-baccalaureate studies and training in a variety of related fields. The focus of the program provides students training in pre-colonial history, identity formations, literature, contemporary politics, education, the arts, theory, and more.

Student Organizations, Programs, and Activities

The Chicana and Chicano Studies Department sponsors an extensive activities calendar throughout the academic year. The department faculty collaborate with university areas such as the Affinity and Cultural Centers including the Latinx Cultural Resource Center, the Toro Dreamers Success Center, and the Queer Culture Resource Center to foster community awareness on anti-racism, social justice, and equity. The department also co-sponsors and supports campus-wide programs and events such as the annual *Dia de los Muertos* (Day of the Dead) celebration and the Dolores Huerta graduation celebration. In support of student organizations, department faculty members serve as advisors and work closely with campus Chicana/e/o, Latina/e/o student organizations.

Academic Advisement

All majors and minors in Chicana and Chicano Studies receive academic advisement from a faculty advisor. Students select an advisor, or have one assigned to them. Students will work closely with faculty to prepare them or academic success and potential career choices.

Preparation

Although not required, both high school and community college students wishing to major or minor in Chicana and Chicano Studies are encouraged to take Ethnic Studies courses that relate to Chicana/e/o and Latina/e/o experiences.

Graduation with Honors

An undergraduate student may graduate with Honors in Chicana/o Studies provided that the following criteria are met:

1. A minimum of 36 units in residence at CSU Dominguez Hills.
2. A minimum grade point average of at least 3.5 in all courses used to satisfy the upper-division requirements in the major.

Career Options for Chicana and Chicano Studies

- Arts careers
- Business sector
- College and university teaching, administration, and student affairs
- Community organizing
- Counseling and advising
- Criminal justice and law
- Government affairs

- International abroad professional experiences
- Human Resources
- Journalism and media
- K-12 Teaching and counseling
- Non-profit sector
- Public administration
- Social work and human services

The degree in Chicana and Chicano studies prepares students for graduate studies and provides a foundation for a law degree and Master's or Ph.D. in Anthropology, Art, Chicana/o Studies, Comparative Cultures, Cultural Studies, Education, Ethnic Studies, History, Psychology, Political Science, History, Sociology, Social Work, Spanish, and other fields.

Undergraduate Programs

Bachelor

- Chicana/Chicano Studies, Bachelor of Arts (p. 451)

Minor

- Chicana/Chicano Studies, Minor (p. 453)

Faculty

Corina Benavides López, Department Chair

Marisela R. Chávez, Alfredo González, Alexandro D. Hernández, José R. López Morín, Gretel Vera-Rosas

Department Office: LCH A 338, (310) 243-3326 or (310) 243-3327

Courses

CHS 100. Chicana/o Cultural Roots. (3 Units)

An introduction to Chicana/o cultural traditions influenced by diverse Mexican Indian, African, and European experiences and histories prior to, during and after the conquest of Americas. Special focus is on Mexico and the Southwest of the United States.

Offered Fall, Spring

CHS 125. Chicano/Latino Musical Culture. (3 Units)

The course examines musical expressions of Chicano and Latino peoples in the present geographical boundaries of the United States. The course emphasizes the intercultural dynamics in the formation of Chicano and Latino music which incorporates African, American, Native American, and European roots.

Offered Infrequent

CHS 195. Special Topics in Chicana/o Studies. (3 Units)

A study of an issue, concept or theme in Chicana/Chicano Studies. Three hours of lecture per week. Repeatable for a maximum of twelve units for credit.

Offered Infrequent

CHS 200. Introduction to Chicana/o and Latina/o History. (3 Units)

Explores the history and experiences of Chicanos/as and Latinos/as in the United States in the 19th and 20th Centuries and will explore the following themes: immigration, migration, labor, education, gender roles, and community organizations.

Offered Fall, Spring

CHS 205. Introduction to Chicana/o Literature. (3 Units)

An introduction to selected works of modern Chicano literature including an analysis of influences, themes, and techniques. Special attention given to certain issues of the Chicano/a experiences reflected in the literature. Frequent written assignments.

Offered Fall, Spring

CHS 210. Representation of Indigenous. (3 Units)

An introduction to the different forms on indigenous representation with special emphasis on Mesoamerica. Discussions of how these accounts are expressed, perceived, and constructed at the point of European contact will be examined.

Offered Infrequent

CHS 212. Introduction to Comparative Ethnic Studies. (3 Units)

The course will explore the lived experiences and gendered complexities of Ethnic/Global communities as they relate to historical and contemporary international and global forces. The course will examine the economic and socio-cultural dynamics of the global interdependencies of Indigenous, Latino, Asian-Pacific and Africana communities and women's lived experiences within and across these communities.

Offered Fall, Spring

CHS 216. Mexica Language and Culture. (3 Units)

Supervised work experience in a Chicano/Latino community with emphasis upon social and economic development in a local, national, or international setting. Students will be placed in settings suitable to their academic expertise.

Offered Infrequent

CHS 225. Mexican & Chicano Poetry & Mus. (3 Units)

An introduction to Mexican/Chicano poetry and music from the Spanish Conquest to the present. Students will learn to recognize boleros, sones, huapangos, mariachi, norteno, corridos, Tex-Mex, and oldies. The class is not designed for music majors.

Offered Infrequent

CHS 295. Spc Topics Chicana/o Stud. (3 Units)

A study of an issue, concept, or theme in Chicana/Chicano studies. Repeatable for a maximum of six units for credit.

Offered Infrequent

CHS 300. Critical Issues in Chicana/Chicano Studies. (3 Units)

Prerequisites: ENG 110 or equivalent are required. CHS 100 or CHS 205 and CHS 200 or 212 are recommended. An exploration of the field of Chicana and Chicano Studies. Course will emphasize the changing constructions and interpretations of what comprises Chicana/o identities and cultures through an analysis of cultural, historical, political, psychological, and social issues. Enrollment priority will be given to Chicana/Chicano Studies majors and minors. This course fulfills a requirement in the Chicana/Chicano Studies major and minor, in addition to the GVAR.

Offered Fall, Spring

CHS 315. Changing Dynamics in Raza Comm. (3 Units)

Prerequisite: CHS 200 is recommended. Assesses the challenges confronting the Chicano community resulting from increased and diverse patterns of immigration, restricted occupational opportunities, and socio-political differences. Focus will be on urban issues from communities throughout the United States, including the Mexican/United States Border.

Offered Spring

CHS 323. Latina/o Perspectives on U.S. Immigration and Citizenship. (3 Units)

Seeks to understand some of the issues which concern Mexican/Latino immigrant people, specifically Mexican and Central American groups, in efforts to bring awareness to this human crisis and to explore some of its effects on U.S. Latino community.

Offered Fall, Spring, Summer

CHS 325. Chicana/o Movement. (3 Units)

A historical and comparative examination of the Chicana/o movement by examining the early pattern of Mexican immigration and the formation of mutual aids associations designed to defend their interests. The focus is on the period from 1960-1990.

Offered Spring

CHS 330. Latina/o Identities in U.S.. (3 Units)

Explores the social, cultural, and political experiences of Chincano/a and Latino/a communities in the United States, including Puerto Rican, Caribbean, and Central and South American peoples. The historical experiences of these diverse communities will be examined.

Offered Fall, Spring, Summer

CHS 335. Urban Youth Gangs in Los Angeles. (3 Units)

Provides an interdisciplinary perspective to the origins and evolution of youth groups (African Americans, Anglos, Asians, Chicana/os, and Pacific Islanders) in California. Class topics include definition of gangs; history of gangs; membership practices; and law enforcement responses.

Offered Infrequent

CHS 340. Native American and Chicana Women's Narrative. (3 Units)

Course explores contemporary cultural and historical narratives by and about Native American Chicana women in the U.S. Through poetry, short stories, and narratives the class will analyze the histories of colonial exploitation, historical memories, gender oppression, and marginalization.

Offered Fall, Spring

CHS 344. Chicana/o History I. (3 Units)

Mexican American life to 1900, stressing the evolution of economic and political thought, social institutions, and cultural experiences.

Offered Fall

CHS 345. Latina/o Identities in the Americas. (3 Units)

Explores the concept of Latina/o identity in the Americas from a literary perspective in different time periods and particular cultural societies. The study of certain intellectuals and their literary contributions will assist with comprehension of identity and socio-political reality.

Offered Fall, Spring, Summer

CHS 346. Chicana/o History II. (3 Units)

The Mexican American's contributions to the building of the Southwest; the clash between Mexicans and North Americans; the emergence of the urban Mexican American.

Offered Spring

CHS 372. Chicana/o Spiritualities and Healing Practices. (3 Units)

Examination of the diverse spiritual practices and decolonial methods of healing found in Mexican and Chicana/o/x traditions.

Offered All terms

CHS 375. Chicana/o Latina/o Body Politics. (3 Units)

Recommended Prerequisites: CHS 100, CHS 200, CHS 205, and CHS 212. An exploration of the interconnections between the physical body and politics, both current and historical, for Chicana/os and Latina/os.

Students will examine issues such as public health, reproductive justice, ability, gender, and sexuality in Chicana/o Latina/o communities.

Offered All terms

CHS 395. Special Topics in Chicana/o Studies. (1-3 Units)

Prerequisite: Consent of instructor. Study of special topic of interest for students in the selected area of study. Topic and content will vary as announced.

Offered As needed

CHS 396. Practicum in Chicana/o Studies. (3 Units)

Prerequisite: Consent of Department Chair. This course is an introduction to theorists and methods under girding Chicana and Chicano Studies as these have been deployed in the writings by Chicana and Chicano authors during the past thirty years. The class will present theories and methods that inform intellectual issues in Chicana/o studies.

Offered As needed

CHS 400. Chicana/o Issues in Education. (3 Units)

An overview of the educational system in society - how it functions, whom it serves, and the cultural and theoretical explanations for the success and failure of Chicana/o students. Discussions include family values, teen pregnancy, language, gangs, etc.

Offered Fall

CHS 401. Theories and Methods in Chicana/o Studies. (3 Units)

Prerequisites: ENG 110 or equivalent; CHS 100 or CHS 205 and CHS 200 or CHS 212 or equivalent are required. Must be a Senior. Focuses on examining the various theories and methods utilized by Chicana/o scholars during the evolution of the discipline of Chicana/o Studies, exploring how these theories and methods have informed and continue to inform writing and research in Chicana/o Studies.

Offered Fall

CHS 410. Chicana/o Popular Culture. (3 Units)

An overview of the central areas of Chicana/o popular culture, focusing on film, mass media, art, theatre, and music. The course examines how concepts of culture, identity, and ethnicity are popularly expressed in a constant state of flux.

Offered Fall

CHS 436. Chicana/o Latina/o Politics. (3 Units)

Recommended Prerequisites: CHS 200 and CHS 323 Course examines the role of Chicana/o and Latina/o communities in shaping state and national politics in the United States, including contemporary modes of political organizations, political history, organizational strategies, electoral impact, public policy issues surrounding citizenship, and empowerment strategies.

Offered All terms

CHS 450. Precolumbian Lit of Mexico. (3 Units)

Prerequisite: CHS 300 recommended. The study of the literature of ancient Mexico, specifically the PopolVuh of the Maya and Aztec poetry, in order to obtain an insight into the Precolombian world view. Periodic essay exams.

Offered Infrequent

CHS 460. Las Chicanas. (3 Units)

Prerequisite: ENG 110 or equivalent is required. The study of the issues that Chicanas encounter in contemporary U.S. society. Includes a survey of remote and recent cultural, social, and political issues that have influenced the values, expectations, and roles of Chicanas.

Offered Fall, Spring

CHS 471. Mexican Thought, Social Activism and Political Ideology. (3 Units)

Prerequisite: CHS 100 is recommended. Examines the evolution of Mexico's modernistic state via its reformation and dictatorship of President Porfirio Diaz. It will investigate how revolutionary leaders banded together to dismantle the Porfirio regime, and how later Mexico's Government attempted to institutionalize the ideals of justice, freedom, and democracy.

Offered Fall

CHS 480. Chicana/o Folklore. (3 Units)

Prerequisite: CHS 300 recommended. An introduction to some of the basic theories and techniques in folklore studies, especially Mexican American. Folk art, music, oral literature, customs, philosophy, and belief systems will be examined for understanding groups of people.

Offered Fall, Spring

CHS 486. Chicana/o Family and Gender Issues. (3 Units)

Prerequisite: ENG 110 or equivalent is required. CHS lower division requirements or courses on previous women and gender are recommended. The course examines family and gender issues as they relate to the Chicana/o community in the United States. Topics will include Chicana/o family roles and structure, cultural values, experiences that influence and challenge families, gender roles and expectations.

Offered Fall

CHS 490. Senior Seminar in Chicana/o Studies. (3 Units)

Prerequisites: ENG 110 and CHS 401 are required. CHS 100 or CHS 205; CHS 200 or CHS 212; and CHS 300 are recommended. Seminar where students examine a particular topic or theme in the field of Chicana/o Studies. As the capstone course for the major, students undertake a major research paper.

Offered Fall, Spring

CHS 494. Independent Study. (1-3 Units)

Prerequisite: Consent of Program Director. Independent study of a particular topic in Chicana/Chicano Studies relating two or more disciplines, such as anthropology, art, education, history, language, music, politics, psychology, or sociology under the direction of an instructor in Chicana/Chicano Studies. Repeatable course.

Offered Fall, Spring

CHS 495. Spec Topic Chicano/Chicana St. (1-3 Units)

Prerequisite: Consent of Program Director. An intensive study of an issue, concept or theme in Chicana/Chicano Studies. Three hours of lecture per week. Repeatable for a maximum of six units for credit.

Offered Fall, Spring

CHS 496. Internship Chicana/o Studies. (3 Units)

Under direction of the internship faculty, students will work in a Chicano/Latino community, applying skills and knowledge learned in the classroom as well as the workplace. Repeatable course.

Offered As needed

CHS 497. Directed Reading. (1-3 Units)

Prerequisite: CHS 100 is recommended. Extensive reading in selected areas under the guidance of a faculty member.

Offered Fall, Spring

CHS 498. Directed Research in CHS. (1-3 Units)

The student develops and completes an individual study under faculty supervision. Repeatable course.

Offered As needed

CHS 590. Grad Sem Theory & Methods. (3 Units)

Instruction in the basic principles of still photography. Two hours of lecture and three hours of laboratory per week.

Offered As needed

CHS 594. Independent Study. (1-4 Units)

Prerequisites: Consent of Department Chair. Independent investigation of a research problem or directed readings in a selected area of Chicano Studies.

Offered As needed

CHS 595. Special Topics. (3 Units)

An intensive study of a concept, movement, school of thought, or individual within the discipline of Chicano Studies. Intended for students with senior or graduate standing. Specific topic listed in Class Schedule. Repeatable course. Three hours of seminar per week.

Offered As needed

CHS 596. Pract. in Teach Chicana/o Stud. (1-4 Units)

Supervised experience in teaching Chicana/o Studies. Techniques and skills appropriate to instruction at the college level. Instructional and evaluative experiences under supervision of Chicana/o Studies faculty.

Offered As needed

CHS 597. Directed Reading. (1-4 Units)

Extensive reading in selected areas under the guidance of a faculty mentor.

Offered As needed

CHS 598. Graduate Directed Research. (1-3 Units)

Independent research under direction of supervising faculty member in Chicana/o Studies.

Offered As needed

CHS 599. Final Project. (3 Units)

In consultation with a faculty member, writing of a master's thesis or completion of project. Choice of area requires prior consent of advisor.

Offered As needed

Chicana/Chicano Studies, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

No minor required.

Major Requirements (39 units)

The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

Core Requirements (21 units)

| Code | Title | Hours |
|--|--|-----------|
| Lower Division Required Courses | | |
| Select one of the following: 3 | | |
| CHS 100 | Chicana/o Cultural Roots | |

- Students will learn about race, ethnicity, gender, class, sexuality, intersectional feminisms, and identity in order to examine how they inform both Chicana/e/o individual and community social, economic, political, and historical outcomes.
- Students will critically assess historical and contemporary paradigms to explain how power is created, how Chicana/e/o communities maintain power against oppressive structures, and how Chicana/e/o communities operationalize power to employ anti-colonial and social justice norms and values.
- Students will evaluate and produce research and scholarship to distinguish, differentiate, and analyze theories and practices of space, place, and belonging in an effort to identify diversity in Chicana/e/o communities.
- Students will express how relationships among Chicana/e/o cultural practices, expressions, and epistemologies create new forms of knowledge.
- Students will engage in and gain practical leadership experience in the Chicana/e/o community by participating in civic engagement, activism opportunities, internships, and community-based events on campus and in the community.

Child Development

College of Health, Human Services, and Nursing
Department of Child Development

Program Description

The field of Child Development is dedicated to understanding how individuals change over time from conception through adolescence. Knowledge of developmental processes and the factors that influence development is essential for effectively working with children and for making sound decisions regarding their welfare and promoting individual success. The program in Child Development includes in-class and field experiences to prepare students to become knowledgeable and effective child and family professionals. Foundational coursework prepares students to master the basics of development across different developmental periods. As students advance through the program, they take specialized courses to develop a deeper understanding of the factors related to development, its study, and its application.

Features

The Child Development major is a single-field major. A minor is not required. The program offers students the opportunity to work in the field as well as receive rigorous scientific training. The curriculum spans the period of infancy through adolescence, thus preparing students for working with any age group. Specialized courses such as one on immigrant children or child and family policy provide concrete linkages to the challenges of growing up in diverse settings and of the powerful social and political contexts that shape children's development.

Academic Advisement

New students are required to see an academic advisor before enrolling in the classes. Students may call the Student Services Center at (310) 243-2120, WH 220. **Students are encouraged to use the Smart Planner to plan and enroll in their courses and need to bring their completed Smart Planner report to any advising appointment.** Please use this link for information and tutorials: <https://www.csudh.edu/registrar/registration/>.

Preparation

High school students are encouraged to develop strong competencies in English, mathematics, and the social, behavioral, and life sciences. Both lower and upper-division courses in the major require substantive writing, analytical and critical thinking skills, and a comprehensive understanding of research methods. Thus, adequate academic preparation is strongly advised.

Transfer students should take equivalents of CDV 150 Intro Child Development and MAT 131 Elementary Statistics & Probability, MAT 132 Elementary Statistics & Probability with Algebra Review, or PSY 230 Elementary Statistical Analysis in Psychology.

Graduation With Honors

An undergraduate student may graduate with Honors in Child Development provided that the following criteria are met:

1. A minimum of 36 units in residence at CSU Dominguez Hills.
2. A minimum grade point average of 3.5 in all courses used to satisfy the upper-division requirements in Child Development.

Career Possibilities

The Bachelor of Science degree in Child Development provides a basis for diverse professional careers including – but not limited to – early childhood and K-12 education, parent education, youth counseling, program development and administration for at-risk or special needs youth, case management in governmental agencies, occupational/

behavioral/speech therapy, social work, or child advocacy. Child development majors work in settings such as schools, family courts, hospitals, governmental agencies, and non-profit agencies that deliver services to children and families, recreation programs, and for companies that manufacture products for children such as toys, books, and software, as well as in research settings. The degree also prepares students for credentialing programs and graduate studies.

Undergraduate Programs

Bachelor

- Child Development, Bachelor of Science (p. 456)

Faculty

Megumi Kuwabara, Department Chair

Kaitlyn Breiner, Cornelia Brentano, Anupama Joshi, Kara Kogachi, Megumi Kuwabara, Angelica Lopez Fraire, Kimberley Radmacher, Christina Toolan

Program Office: WH A320, (310) 243-2029

Courses

CDV 150. Intro Child Development. (3 Units)

Overview of physical, cognitive, social and emotional development from conception through the end of adolescence; theoretical advances in child development; individual and contextual contribution to developmental processes.

Offered Fall, Spring

CDV 180. Introduction to Observation and Assessment. (4 Units)

Prerequisites: CDV 150 required. Overview of and introduction to methods of studying children; the basic research paradigm; observational methods; ethical issues in the study of children; generation and interpretation of data. 1 unit of observations of children in different settings. Department consent required.

Offered Fall

CDV 225. Infant Development - FROZEN. (4 Units)

Prerequisites: Live Scan and current negative TB documentation. CDV 180. Development from conception through 2 years; changes through prenatal period; birth; development of attachment; infant care issues. 3 hours of lecture, 1 unit of observation in infant-care settings.

Offered Infrequent

CDV 240. Early Childhood Development and Curriculum. (4 Units)

Prerequisites: CDV 150. Examines developmentally appropriate curriculum and teaching strategies from 2 to 6 years of age. Connections between curriculum and children's physical, cognitive, social and emotional development are examined. Includes 1 unit of curriculum development activities.

Offered Spring

CDV 295. Special Topics in Child Development. (1-5 Units)

Prerequisite: CDV 150 is required. Contemporary topics of interest in Child Development.

Offered Fall, Spring

CDV 320. Mthd & Analysis in Child Study. (4 Units)

Prerequisites: CDV 150 and MAT 131 or MAT 132 or PSY 230 are required. Junior Standing is recommended. Various methods used to study children; quantitative and qualitative data; measurement issues; basic data analytic techniques. 3 hours lecture, 1 hour lab. A grade of C or better in this course fulfills the GVAR requirement for Child Development majors.

Offered Fall, Spring

CDV 325. Infancy and Early Childhood. (3 Units)

Prerequisite: CDV 150 is required. Provides an overview of physical, cognitive, social and emotional development from conception through 6 years.

Offered Fall, Spring

CDV 330. Schoolage Years. (3 Units)

Prerequisite: CDV 150 is required. Physical, cognitive, social and emotional development from 6 to 12 years. Emphasis on home, school, and community contexts and their interconnections; developmental analysis related to contemporary issues in areas of health and education.

Offered Fall, Spring

CDV 342. Advanced Observation and Assessment in Early Childhood. (3 Units)

Prerequisite: CDV 180 and CDV 240 are required. Observation and assessment methods in early childhood and their significance in guiding development and designing programs for children birth through 8 years.

Offered Spring

CDV 344. Supervision in Early Childhood Settings. (3 Units)

Prerequisites: CDV 180, CDV 240 and CDV 325 are required. Provides students with the methods and principles of supervising teachers, volunteers, student teachers, staff and other adults in early childhood education settings. An emphasis is placed on the development and role of early childhood professionals as mentors and leaders.

Offered Fall

CDV 360. Adolescence. (3 Units)

Prerequisite: CDV 150 is required. Physical, cognitive, social and emotional development from 12 to 20 years, focusing on developmentally unique changes at individual, interpersonal and social levels.

Offered Fall, Spring

CDV 363. Development in Diverse Contexts. (3 Units)

Prerequisites: CDV 320, CDV 325, CDV 330 and CDV 360. The development of the individual identity along multiple dimensions of age, gender and abilities in the contexts of class, culture, and ethnicity. Issues of hierarchies, the development of prejudice and discrimination at individual and institutional levels.

Offered Fall, Spring

CDV 366. Parenting. (3 Units)

Prerequisites: CDV 320, CDV 325, CDV 330, and CDV 360 are required. The development of the parent-child relationship from birth through young adulthood. Changes in attachment, intimacy and distance; changing demands of parenting with developmental changes in children, parents and the family.

Offered Fall, Spring

CDV 370. Enhancing Early Language and Literacy I. (3 Units)

Prerequisite: Jumpstart Corp member and department consent. Examines early language, literacy, and multi-lingual development with an emphasis on environmental factors. Provides techniques for engaging children in language and literacy activities and opportunities for students to evaluate and reflect on their civic engagement. Course open to Jumpstart Corps members only. Department consent required.

Offered Spring

CDV 372. Scl Devpt Intrpsnl Reltns. (3 Units)

Prerequisites: CDV 225, CDV 240, CDV 330 and CDV 360. Study of social and emotional development from birth through adolescence; development of the self; temperament and emotion; attachment, peer, parent-child, and early romantic relationships; interpersonal skills and moral development.

Offered Infrequent

CDV 380. Stress, Risk, & Resilience. (3 Units)

Prerequisites: CDV 320, CDV 325, CDV 330 and CDV 360 are required. Childhood stress is examined within a risk and resilience framework. Concepts and theories explaining developmental risk and the protective factors and intervention strategies that promote adaptive coping and adjustment in various contexts will be discussed.

Offered Fall, Spring

CDV 423. Chld Devpt Scl Policy. (3 Units)

Prerequisite: CDV 320, CDV 325, CDV 330, CDV 360, CDV 380 are required. Enduring issues related to children's development that have led to policy decisions; process of policy making; current issues that require policy decisions; evaluating the impact of policy on children and families.

Offered Fall, Spring

CDV 440. Immigrant Children and Families. (3 Units)

Prerequisites: CDV 320, CDV 325, CDV 330 and CDV 360 are required. The process of immigration as an influential factor in development; changing ecologies and adaptation demands on individuals and families; informal and formal support structures.

Offered Fall, Spring

CDV 442. Marriage, Family, and Community. (3 Units)

Prerequisite: CDV 320, CDV 325 and CDV 330 and CDV 360 are required. Examines family structure, love, mate selection, marital communication, divorce, remarriage, gender roles, and domestic violence across diverse contexts with a special focus on the factors that enhance healthy family relationships and children's development.

Offered Fall, Spring

CDV 444. Language, Cognition, and Schooling. (3 Units)

Prerequisite: CDV 320, CDV 325, CDV 330, and CDV 360 Theoretical and empirical overview of cognitive and language development from birth through the end of adolescence; second language acquisition; interconnections between cognitive development, language development and schooling.

Offered Fall, Spring

CDV 450. Devpt in Poverty. (3 Units)

Prerequisites: CDV 320, CDV 325, CDV 330, and CDV 360 Poverty as a unique context of development; developmental processes and child outcomes in poverty; family interactions and generation of coping mechanisms in the context of poverty; special needs of poor children

Offered Fall, Spring

CDV 490. Senior Seminar. (3 Units)

Prerequisites: 2.75 GPA, senior level standing, and department consent. Integration of knowledge about theories, empirical findings and practice in Child Development; emphasis on writing and presentation skills. Offered Fall, Spring

CDV 492. Seminar in Child Development Research. (4 Units)

Prerequisite: Grade of B or better in CDV 320; 2.75 GPA and department consent are required. Provides students an opportunity to integrate knowledge about theories, empirical findings and research practices in child development. Students learn and apply research methods. An emphasis is placed on writing and presenting research reports for academic or non-academic audiences. Offered Fall, Spring

CDV 494. Independent Study. (1-6 Units)

Prerequisites: Consent of instructor. Investigation of a single topic, chosen in consultation with a faculty member, culminating in a paper, presentation, or project. Repeatable course. Offered Fall, Spring

CDV 495. Special Topics. (1-5 Units)

Prerequisites: Upper division standing. Contemporary topics of interest in Child Development. Repeatable course. Offered As needed

CDV 496. Directed Field Experience. (4 Units)

Pre-requisite: Upper Division Standing, Department approval required. Must take Seminar and Supervision. Faculty supervised experience in any approved Child Development setting. Weekly seminar designed to facilitate the integration of Child Development knowledge and theory with students' fieldwork experience. Students will examine and integrate personal and professional goals and values to gain an understanding of the self in a professional role. Each seminar provides an opportunity to share field experiences and problem solve. Offered Fall, Spring

CDV 498. Directed Research. (1-6 Units)

Prerequisites: CDV 320 and consent of instructor are required. Project selected in consultation with a faculty supervisor and a plan made to implement the project; meetings held regularly. May be repeated to a maximum of 6 units. Offered Fall, Spring

Child Development, Bachelor of Science

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major, no minor required

Major Requirements (53-55 units)

The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

The Child Development Department does not accept courses in the Early Development and Learning concentration that have been completed more than 10 years ago.

All Child Development courses applied to the B.S. in Child Development must be passed with a grade of "C" or better.

| Code | Title | Hours |
|--|---|-------|
| Lower Division Required Courses | | |
| CDV 150 | Intro Child Development | 3 |
| Select one of the following Statistics courses: ¹ | | 3-4 |
| MAT 131 | Elementary Statistics and Probability | |
| MAT 132 | Statistics and Probability with Support | |
| PSY 230 | Elementary Statistical Analysis in Psychology | |
| Foundational Courses | | |
| CDV 320 | Mthd & Analysis in Child Study | 4 |
| CDV 325 | Infancy and Early Childhood | 3 |
| CDV 330 | Schoolage Years | 3 |
| CDV 360 | Adolescence | 3 |
| Specialized Courses | | |
| Specialized Core: | | |
| CDV 366 | Parenting and Child Guidance | 3 |
| CDV 380 | Stress, Risk, & Resilience | 3 |
| Diversity Core: | | |
| Select one of the following: | | 3 |
| CDV 363 | Development in Diverse Contexts | |
| CDV 440 | Immigrant Children and Families | |
| CDV 450 | Devpt in Poverty | |
| Specialized Electives: | | |
| Select three of the following courses: | | 9 |
| CDV 370 | Enhancing Early Language and Literacy I | |
| CDV 423 | Chld Devpt Scl Policy | |
| CDV 442 | Marriage, Family, and Community | |
| CDV 444 | Language, Cognition, and Schooling | |
| Students may select one additional diversity elective as a specialized 0-3 elective: | | |
| CDV 363 | Development in Diverse Contexts | |
| CDV 440 | Immigrant Children and Families | |
| CDV 450 | Devpt in Poverty | |
| Capstone | | |
| Select one of the following: | | 3-4 |
| CDV 490 | Senior Seminar | |
| CDV 492 | Seminar in Child Development Research | |
| CDV 496 | Directed Field Experience | |
| CDV 498 | Directed Research | |

Interdisciplinary Concentration

| | |
|---|-------|
| Select one of the concentrations listed below | 12-14 |
|---|-------|

| | |
|--------------------|--------------|
| Total Hours | 52-59 |
|--------------------|--------------|

¹ **Note:** MAT 131 Elementary Statistics and Probability and MAT 132 Statistics and Probability with Support may be used to meet the GE Area B4 Quantitative Reasoning requirement. PSY 230 Elementary Statistical Analysis in Psychology does not count towards GE Area B4.

Interdisciplinary Concentration (12-14 units)

Concentration coursework is offered in the curriculum to give students the flexibility to tailor their coursework to their professional goals. For maximum flexibility, students may choose the General Elective option.

General Elective Option (12 units)

Electives must be selected in consultation with an advisor.

Early Development and Learning Concentration (12-14 units)

The Child Development Department does not accept courses in the Early Development and Learning concentration that have been completed more than 10 years ago.

| Code | Title | Hours |
|---|--|--------------|
| Select four courses from the following: | | 12-14 |
| CDV 180 | Introduction to Observation and Assessment | |
| CDV 240 | Early Childhood Development and Curriculum | |
| CDV 342 | Advanced Observation and Assessment in Early Childhood | |
| CDV 344 | Supervision in Early Childhood Settings | |
| LBS 310 | Early Language and Literacy | |
| LBS 330 | Bridging Cultures Through Literacy and Learning | |
| LBS 340 | Early Mathematical Concepts | |

Clinical Science

College of Health, Human Services, and Nursing
Division of Health Sciences

Program Description Undergraduate

The rapid expansion of basic medical information, methodology, and technology in recent years has increased the demand for highly trained professionals in clinical, research, and teaching laboratories. The training of such specialists as medical technologists (Medical/ Clinical Laboratory Scientists), and Cytotechnologists is all within the broad scope of the field of clinical science.

The Bachelor of Science Degree in Clinical Science is designed to provide baccalaureate-level preparation in the clinical science professions. A strong preclinical curriculum is combined with the science and liberal arts focus of the University. The curriculum at CSUDH is designed to be inclusive of courses required by both the California Department of Public Health for the CLS generalist license and ASCP certification in medical laboratory science.

CSUDH BS graduates are eligible to apply to the Post Baccalaureate Certificate for the clinical internship program in either Medical Technology or Cytotechnology. Please note that placement in a clinical site is competitive and not guaranteed.

Post-Baccalaureate Certificates

The Post Baccalaureate Certificate Program options in Cytotechnology and Medical Technology (Medical/Clinical Laboratory Scientists) provide an academic and clinical route to professional certification and California State licensure. All applicants must apply to the University through Cal State Apply and be admitted to the Post Baccalaureate Certificate in

Clinical Science. Refer to the Graduate/Postbaccalaureate Admission Requirements in the University Catalog for details.

For post-baccalaureate students without a BS degree in either Clinical Science or Cytotechnology from CSUDH, additional coursework at CSUDH is required prior to becoming eligible to apply to the clinical internship program.

Graduates of the program, upon completion of their clinical training and passage of the appropriate certification examination(s), are considered to be clinical laboratory scientists and professionals armed with the technical skills and knowledge theory necessary to meet current and future standards of quality laboratory and health care services practice. The clinical or internship components of both options are offered under the supervision of university faculty, in affiliation with approved, accredited diagnostic healthcare facilities. Students admitted to the certificate program and who are planning to apply to a clinical option internship must meet the entry and prerequisite requirements specified in the Supplemental Criteria and Clinical Science Curriculum.

Pre-Admission Disclosure for Academic Program Leading to Licensure or Credentialing

Admission into programs leading to licensure and credentialing **does not guarantee** that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or taxpayer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements is available from the Program Director. Please contact the department.

Features and Accreditation

The Medical Technology program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) located at:

5600 N. River Rd., Suite 720
Rosemont, IL 60018
Phone: (773) 714-8880

The Cytotechnology clinical program is accredited through The Greater Los Angeles Consortium by the Program Review Committee of the American Society of Cytopathology, sponsored by the Commission on Accreditation of Allied Health Programs (CAAHEP) located at:

9355 113th St. N, #7709
Seminole, FL 33775
727-210-2350

Graduates of each program are eligible for the certification examination of the American Society of Clinical Pathology (ASCP) Board of Certification (BOC) and for licensure by the California State Department of Health.

Academic Advisement

Careful and comprehensive advising is a key to student success in the University and entails student, faculty, and University support services. Clinical Science majors are required to consult with an advisor upon admission and each semester before registration. Students must provide the program with copies of transcripts from all institutions attended. Each student should review the University Catalog and become familiar with the academic program and relevant policies and procedures before his/her first advising session. Students in their clinical year meet regularly with an assigned university education coordinator or liaison. Students in the clinical year meet periodically with the Program Director to monitor progress.

Preparation

High school students are encouraged to take chemistry, biology, and physics in addition to English, a foreign language, fine arts, and computer science courses.

College transfer students should contact their counseling office at their college before admission to CSUDH and contact the College of Health, Human Services, and Nursing Student Success Center after admission to the university to identify appropriate lower division major/minor preparatory courses. Courses in quantitative chemistry, anatomy and physiology, physics, general biology, and statistics are recommended.

Students with foreign degrees must have their transcripts evaluated by an approved external foreign transcript evaluation service and comply with the University's policy on the Test of English as a Foreign Language (TOEFL).

The evaluation must document an acceptable baccalaureate degree before consideration for clinical placement may be made. The California State Department of Public Health Laboratory Field Services will accept the evaluation from "Current Members" of the National Association of Credential Evaluation Services (NACES) or "Endorsed Members" of the Association of International Credential Evaluators, Inc. (AICE)

Graduation With Honors

An undergraduate student may be a candidate for graduation with Honors in Clinical Science provided he or she meets the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of 3.5 in courses used to satisfy the upper-division requirement in the major; and

Students who achieve Honors in Clinical Science will have the information recorded on their transcripts and diplomas.

Practicing Professionals in the Clinical Options

Cytotechnologists are skilled in examining human cellular material in search of abnormalities that are the warning signs of cancer. They perform a variety of diagnostic and research procedures in the cytology laboratory including basic cytologic examinations, staining, and processing of tissue specimens that have been removed by non-invasive techniques, surgery, or fine needle aspiration. Advanced techniques include the use of digital and immunofluorescent microscopy, cytogenetics, and molecular markers. The cytotechnologist is capable

of developing a differential diagnosis based on cellular evidence in conjunction with pertinent cognitive knowledge and other clinical data.

The Medical Technologist is also known as a Clinical Laboratory Scientist (CLS) and/or Medical Laboratory Scientist (MLS), depending on the certification obtained. Medical Technologists perform or supervise the performance of clinical laboratory testing in the general and specialized areas of clinical biochemistry, hematology, medical microbiology, immunohematology, immunology, serology, and clinical microscopy. Data collected is correlated to pathophysiology and used by health professionals in the diagnosis, treatment, and prevention of disease. Medical Technologists may also review and conduct research activities.

Student Organizations

All Clinical Science Majors and other interested students are encouraged to join and become active in the Clinical Science Club (CSC). For application and other information, contact the club president or advisor to become a member.

Supplemental Admission Criteria and Policies for Clinical Internships

All applicants must first be admitted to the University. However, Admission to the University does not constitute automatic admission to the clinical internship. There is no direct admission into the Clinical Internship program. The clinical internship application is available in the Department. Contact the department based on the following timelines.

Application Dates for Clinical Internships

| Clinical Application | Clinical Component | Dates Beginning |
|----------------------|--------------------|-----------------|
| Cytotechnology | February 1-28 | Summer Class |
| Medical Technology | October 1-31 | Summer Class |

For all postbaccalaureate clinical training internships, i.e., Cytotechnology and Medical Technology, **Supplemental Admission Criteria** apply.

Because clinical facilities in each of the options have a limited number of positions, a limited number of students are admitted to a given option. In addition, clinical positions may not be available to international student visa holders or students not proficient in English. For any clinical class, there may be more qualified applicants than can be accommodated, thereby designating the program as "impacted."

Applicants for clinical placement must have been fully admitted to the University and must have been in residence for two semesters prior to the beginning of the clinical component. BS degree applicants must have completed all graduation requirements with the exception of the preclinical requirement. However, all pre-clinical requirements must be scheduled for completion prior to the start of the clinical internship.

From among the applicants for a Clinical Option, the Committee for Clinical Laboratory Experience (CCLE) will determine those applicants who are accepted to the clinical internship on the basis of the following Supplemental Admission Criteria:

1. Grade point average in required "pre-clinical course work" (minimum 3.00 on a 4.00 scale). The pre-clinical courses must be completed at CSUDH unless department approval is received.
2. Completion of the pre-clinical course requirements. A minimum grade of "C" is required for all pre-clinical courses.

3. Desirable "pattern" of academic performance (i.e., consistency and/or improvement).
4. Evaluation by the Committee for Clinical Laboratory Experience (CCLE) of the student's potential to succeed in the program and the profession (appearance, attitude, interest, enthusiasm, poise, motivation, expectations, career planning, maturity, social understanding and involvement, flexibility, and stability).
5. Completion of a minimum of two semesters in residence at CSUDH to complete the preclinical course requirements prior to beginning the clinical training. Evaluation of missing coursework at the time of application will be performed on a case-by-case basis by the Program Director.
6. Physical, professional, and emotional fitness for the demands of the job as verified by a physician and three letters of recommendation. At least one of these letters should validate relevant work experience and/or knowledge of the field. Accordingly, it is recommended that one be from an employer and the others from faculty teaching for the pre-clinical course work at CSUDH or other institutions. Recommendations should address recent activities.
7. Clarity of expression (oral and written) and relevant extracurricular activity (e.g., active member or officer of a social club, Clinical Science Club, Science Society, etc.).
8. Have no felony convictions.
9. Other factors that will be considered, but which will not guarantee selection are prior qualified application, previous experience in a clinical laboratory setting, and veteran status.

Applicants to the clinical Internship who have repeated pre-clinical courses may have their ranking reduced in the selection process. Repeating a single course more than once is discouraged. After 3 unsuccessful attempts, the applicant is no longer eligible for the Clinical Internship.

The CCLE is composed of university faculty and adjunct faculty from each clinical facility. One or more oral interviews will be required on campus and/or at the clinical facilities.

The program director will notify the applicant of the admission decision in consultation with the Committee for Clinical Laboratory Experience (CCLE). The program director, in consultation with the officials of the affiliated program, determines to which affiliate the student will be placed. Student preference is considered as one factor in the decision. In order to retain admission status, students must communicate their intention to the program director, in writing, within 15 working days following notification of admission. Final placement assumes continued eligibility under supplementary and basic admission criteria. In some cases, the CCLE may require additional coursework or performance levels prior to placement consideration. Failure to satisfy such requirements may disqualify the student from entering the clinical component.

Academic Regulations

For pre-clinical courses, a grade of "C" is the minimum acceptable grade. In the clinical component, a grade of "C" is the minimal acceptable grade. Students in the clinical internship who receive a grade or grades below the acceptable minimum or who show a lack of reasonable progress may be requested to appear before the Committee for Clinical Laboratory Experience and/or placed on academic notice. The committee also considers disciplinary cases. Continued lack of progress, in the opinion of the committee, and with the approval of the department Chairperson, may result in Administrative or Academic Dismissal from the clinical program.

Transportation

Students are required to furnish their own transportation to and from the clinical facility and in those pre-clinical courses that require field trips.

Uniforms

Laboratory coats are required in the clinical and for most pre-clinical courses.

Essential Functions

A combination of psychomotor and sensory abilities is needed by students to successfully achieve professional entry-level competencies in the clinical sciences. These "Essential Functions" fall into the categories of visual, motor, communications, behavior, and computational:

Essential Functions: Visual

The CLS student must possess sufficient visual acuity to recognize, perform, and analyze findings from clinical procedures, including the necessary skills to:

- Observe clinical demonstrations.
- Differentiate color reactions.
- Characterize physical properties of biologicals and solutions.
- Distinguish numbers, characters, decimal points, and graphs on an electronic screen.
- Distinguish numbers, characters, decimal points, and graphs on a hard copy report.
- Identify stained and unstained structural features of specimens using a binocular bright-field microscope.
- Match figures, lines, structural and spatial configurations with or apart from each other.
- Read calibration marks on measuring devices.
- Observe signs of distress from clients during phlebotomy, injections, or imaging.

Essential Functions: Motor

The CLS students must possess sufficient motor ability to perform clinical diagnostic tests and to manipulate laboratory equipment, including the necessary skills to:

- Travel to numerous clinical sites for assigned clinical rotations.
- Position patients for diagnostic procedures.
- Deliver assistance to clients in distress during phlebotomy.
- Control and adjust switches, dials, keypads, and/or touchpads on equipment used for laboratory tests and diagnostic procedure.
- Manipulate equipment used for phlebotomy, injections or fine needle biopsies.
- Control and adjust devices used for measuring biologicals, chemicals, or radiation.
- Move about a clinical facility in a safe manner.

Essential Functions: Communications

- Read, write, and verbalize in English.
- Read and comprehend technical policy and procedure manuals and test inserts.
- Follow verbal and written instructions.
- Instruct clients prior to specimen collection, in preparation for and/or during diagnostic procedures.

- Take written, computer, and practical examinations.
- Investigate and prepare a research paper and/or project.

Essential Functions: Behavior

The CLS student must possess sufficient behavioral skills to:

- Adapt to changes in schedule and/or assignments.
- Show flexibility and adjust to instruction from multiple clinical practitioners and Adjunct Faculty.
- Comply with the health, safety, and liability policies listed in the University Catalog.

Essential Function: Computational

The CLS student must possess sufficient computational skills to perform mathematical calculations needed for laboratory data analysis and quality assurance.

Health Insurance

Student health and accident insurance is required during clinical training. It is the responsibility of the student to secure acceptable insurance and present evidence of health insurance before entering the clinical. For additional information, contact the Student Health Center or the affiliate.

Liability Insurance

Clinical affiliates require students to carry professional liability insurance during the clinical component. In those cases, it is the responsibility of the student to provide evidence of such coverage prior to entering the clinical class. An information packet on insurance requirements is included in the Application Packet for Clinical Placement.

Health Requirements

Immune Status

Students selected for internships in the clinical options will be required to demonstrate immunity to measles, mumps, rubella(MMR), and varicella.

Students must also show that they are free from tuberculosis by PPD (TB Mantoux Skin Test), Quantiferon Gold TB test, or chest X-ray, and must present proof of immunity to hepatitis B, diphtheria, tetanus, pertussis, and COVID-19. The seasonal influenza vaccine and additional requirements may be required by specific sites. Students must provide documentation of all the above to the Clinical Science Program Director before beginning training at any affiliated facility.

Hepatitis B Vaccination

Clinical Science students will be offered, at their own expense, vaccination against Hepatitis B at the CSU Dominguez Hills Student Health Center. Students may refuse the vaccine using the approved waiver form. The record of waiver or vaccination must be provided to the clinical facility and on file in the Clinical Sciences department. Students may be vaccinated by their own healthcare provider or by the Department of Public Health. All students are encouraged to consult with their healthcare provider for information on possible adverse effects before being vaccinated.

Physical Examination

Successful applicants will be required to obtain a physical examination including a tuberculin skin test. Additional information on these procedures may be obtained by contacting the program office. The physical examination may be done by the student's family physician or,

for a nominal fee, at the Student Health Center. An appointment is advised well in advance of the beginning of the clinical class.

Trainee License

For the clinical year in medical technology, students must obtain a California Clinical Laboratory Technologist Trainee's license before entering the clinical year. The Trainee license is requested online through the LFS website and official transcripts, with the degree, posted, are sent by the registrar's office, directly to:

State of California Department of Health Services Laboratory Field Services Section -PLS Program
850 Marina Bay Parkway, Building P, 1st Floor, Richmond, California 94804

Mission and Goals

The mission of the Clinical Science programs is to provide high-quality education and professional preparation in cytotechnology and medical technology for a diverse student population, to prepare them for traditional and emerging roles as clinical science professionals. The goals of each of the programs, in addition to preparing entry-level clinical practitioners, are to:

- Produce clinical scientists who can research, develop, evaluate, and implement clinical skills and procedures utilizing a high degree of independent judgment and applied cognitive knowledge.
- Consult, where appropriate, with other members of the healthcare team; and
- Instill within graduates a sense of professionalism, dedication, and commitment to healthcare and their profession that will stay with them throughout their careers.

Undergraduate Programs

Bachelor

- Clinical Science, Bachelor of Science (p. 470)

Post Baccalaureate Programs

Post Baccalaureate Certificates

- Clinical Science - Cytotechnology, Post-Baccalaureate Certificate (p. 469)
- Clinical Science - Medical Technology, Post-Baccalaureate Certificate (p. 469)

Faculty

Payman Nasr, Ph.D., MT ASCP - Department Chair

Jahangir Abdi, Ph.D., ASCP

Sarah Turkel, MS, MPH, MT(ASCP), CIC, FAPIC - Postbaccalaureate Medical Technology Certification Program Director

Program Office: Welch Hall A-330, (310) 243-3748

Emeriti Faculty

Cheryl Jackson-Harris

Courses

CLS 301. Intro Clin Lab Proced Lec. (2 Units)

Prerequisite: BIO 122 required. Demonstration and practice of specialized techniques used in the clinical setting. Theory of arterial, capillary and venipuncture including complications. Processing body fluids. Review of state/federal laws, biohazards and quality assurance. Oral and/or written reports/projects.

Offered Fall, Spring

CLS 302. Clinical Practice Lab. (1 Units)

Prerequisites: BIO 122; CLS 301 or concurrent enrollment required. Practice in clinical laboratory techniques: phlebotomy; serum, plasma and whole blood preparation for testing; Minimum 90 hours training at a clinical affiliate under University Faculty supervision. Written report(s).

Offered Fall, Spring

CLS 303. Radiation Science. (3 Units)

Prerequisites: MAT 171 and HSC 201. Overview of radiation science: history, radiation physics, instrumentation, protection and safety. Applications to clinical procedures utilizing radionuclides. Problem solving.

Offered As needed

CLS 304. Introduction to Urinalysis and Body Fluids. (3 Units)

Prerequisite: BIO 122 and CHE 112 or equivalent is required. An introduction to the analysis of urine and body fluids used in the clinical setting. Discussion of the theory and diagnostic applications relative to the analysis of urine and body fluids. Demonstration of lab techniques with limited lab practice.

Offered Fall, Spring

CLS 305. Rad Biology & Protection. (1 Units)

Prerequisite: Admission to the clinical year. Modes of radioactive decay, photon radiation, interaction of radiation with matter, biologic effects of radiation, decontamination techniques, government regulations. Problem solving. Report writing. Oral and/or written reports/projects.

Offered As needed

CLS 306. Clin Immun & Immunochem. (4 Units)

Prerequisites: BIO 250; CLS 301 or concurrent enrollment required. Theory and practice of serologic techniques; nature of antigens, antibodies and the immune response. Genetics of red cell antigens. Pre-natal, neonatal, and pre transfusion testing. Cause, investigation and prevention of HDNB. Compatibility testing and investigation of transfusion reactions. Case studies. Written reports. Three hours of lecture and three hours of laboratory per week.

Offered Spring

CLS 307. Clinical Hematology. (4 Units)

Prerequisites: BIO 250; CLS 301 or concurrent enrollment required. The goal of this course is to provide the student with the basic theoretical foundation of Clinical Hematology relative to the scope of practice for an entry level Clinical Laboratory Scientist. The student will first focus on normal blood cell development (hematopoiesis), then normal cell function, leading into abnormal function and the pathogenesis of hematological disorders. The course emphasis is on recognition of normal and abnormal laboratory results and interpretation of clinical data used in the diagnostic process. The course is broken down into four main sections: starting with an overview of the clinical hematology laboratory and hematopoiesis; then erythropoiesis and disorders primarily involving red cells; followed by normal leukopoiesis, non-malignant leukocytes, and related disorders; and lastly the study of malignant leukocyte disorders and platelets. Students will describe and analyze the process of Hematopoiesis. Disciplinary writing will be employed to produce case studies, written reports and analyze theory of hematology procedures. Application of course concepts will be used to enumerate and identify blood cells. Emphasis will be placed on the identification and description of detection of abnormalities and on the demonstration of special equipment and techniques. The proposed Student Learning Outcomes (SLO) are as follows. 1. Demonstrate the ability to perform clinical diagnostic testing, evaluate outcomes, and generate a written report in order to solve problems related to pre-analytical, analytical, and post-analytical components of services in the clinical laboratory. 2. Employ health professional discourse and proper medical terminology to facilitate communication on laboratory findings pertaining to hematology. 3. Identify, read, and interpret published studies in clinical hematology in order to describe, evaluate, and report the clinical laboratory findings. 4. Identify and analyze the principles of hematology and generate written reports that address laboratory findings. 5. Communicate effectively about hematology across medical professions, including physician, nursing, and other specializations.

Offered Fall

CLS 308. Pathophys for Hlth Professions. (3 Units)

Prerequisite: BIO 250 and either BIO 251, CHE 112, or equivalent. Principles of clinical pathophysiology, including assessment of clinical data necessary for identifying the causes of diseases and evaluating the underlying mechanisms of pathologic processes. Discussion of immune disorders, inflammation, neoplasia and genetic disorders. Review of the individual organ system and associated pathology. Case studies, written/ and or oral reports.

Offered All terms, Fall

CLS 401. Overview: Virology/Mycology. (2 Units)

Prerequisites: BIO 324 or concurrent enrollment; CLS 301 is recommended. Brief introduction to special pathogens for students preparing for the clinical virology and mycology rotations in the clinical laboratory.

Offered Spring

CLS 410. Nml: Imaging Techniques. (5-6 Units)

Prerequisite: Admission to the clinical year. Use of nuclear medicine equipment in a clinical setting to visualize organs, determine function of organs and organ systems.

Offered As needed

CLS 411. Nml: Radiopharm/Assay. (4 Units)

Prerequisite: Admission to the clinical year. Preparation of radionuclides for administration in diagnostic testing including radio- chemical purity, quantitative assay and sterility. Radioassay techniques: calibration and use of instruments, specimen collection. Quality assurance.

Offered As needed

CLS 412. Nml: Instru/In Vivo. (4 Units)

Prerequisite: Admission to the clinical year. Performance of procedures utilizing radionuclides for in-vivo studies. Instrument calibration, preventive maintenance. Computer applications.

Offered As needed

CLS 413. Nml: Special Studies. (2 Units)

Prerequisite: Admission to the clinical year. Practicum in special studies of interest related to nuclear medicine. Project and written report.

Repeatable course.

Offered As needed

CLS 420. Cnm: Imaging Techniques. (3 Units)

Prerequisite: Admission to the clinical year. Principles of stationary and moving imaging with correlations to pathophysiology in human organs and systems.

Offered As needed

CLS 421. Cnm: Radiopharm/Assay. (2 Units)

Prerequisite: Admission to the clinical year. Theory of radiopharmaceutical applications: radionuclides, dose calibration. Principles of saturation analysis and competitive protein binding, correlations of biochemistry, pathophysiology, radioassay techniques, principles and applications to individual techniques. Quality assurance.

Offered As needed

CLS 422. Cnm: Instru/In Vivo Tech. (2 Units)

Prerequisite: Admission to the clinical year. Instrumentation including Geiger-Mueller tubes, rectilinear scanners, scintillation spectrometers and gamma cameras. In-vivo techniques including Schilling test, blood volume, time dependent studies, erythrokinetics, gastrointestinal loss studies.

Offered As needed

CLS 423. Cnm: Special Studies. (1 Units)

Prerequisite: Admission to the clinical year. Special studies including ultrasound, radiotherapy and nuclear magnetic resonance. Repeatable course.

Offered As needed

CLS 430. Clin Micro Lab. (3-4 Units)

Prerequisite: Admission to the clinical year. Techniques and practice in medical microbiology including parasitology, mycology, and bacteriology at a clinical affiliate. Oral and/or written reports/projects.

Offered Fall

CLS 431. Clin Chemistry Lab. (3-4 Units)

Prerequisite: Admission to the clinical year. Techniques and practice in chemistry at a clinical affiliate. Oral and/or written reports/projects.

Offered Fall

CLS 432. Clin Hem/Urinalysis Lab. (4 Units)

Prerequisite: Admission to the clinical year. Techniques and practice in hematology and urinalysis at a clinical affiliate. Oral and/or written reports/projects.

Offered Spring

CLS 433. Clin Immunohem/Sero Lab. (3 Units)

Prerequisite: Admission to the clinical year. Techniques and practice in serology, immunology and blood banking at a clinical affiliate. Oral and/or written reports/projects.

Offered Spring

CLS 434. Clin Special Proc Lab. (1 Units)

Prerequisite: Admission to the clinical year. Techniques and practice in special procedures at a clinical affiliate. Oral and/or written reports/projects. Repeatable course.

Offered Spring

CLS 440. Correl Clin Micro. (2 Units)

Prerequisite: Admission to the clinical year. Theory and correlations of pathophysiology in medical microbiology including mycology, parasitology and bacteriology.

Offered Spring

CLS 441. Correl Clin Chem. (2 Units)

Prerequisite: Admission to the clinical year. Theory and practical aspects correlating clinical chemistry with pathophysiology.

Offered Spring

CLS 442. Correl Clin Hem-Urinalysis. (2 Units)

Prerequisite: Admission to the clinical year. Theory and practical applications correlating hematology and urinalysis to pathophysiology.

Offered Fall

CLS 443. Correl Clin Imunohem-Sero. (2 Units)

Prerequisite: Admission to the clinical year. Theory and practical applications correlating serology, immunology and blood banking to pathophysiology.

Offered Fall

CLS 450. Micro: Fem Genit Tract. (4 Units)

Prerequisite: Admission to the clinical year in cytotechnology. Microscopic examination of cytologic and histologic material of benign and malignant disease processes from the female genital tract, including microbiology, hormonal effects and response to therapy.

Offered Fall

CLS 451. Micro: Resp & Gi Tract. (2 Units)

Prerequisite: Admission to the clinical year in cytotechnology. Microscopic examination of cytologic and histologic material of benign and malignant disease processes from the respiratory and gastrointestinal tracts.

Offered Fall

CLS 452. Micro: Gu Tract/Body Cav Fluid. (2 Units)

Prerequisite: Admission to the clinical year in cytotechnology. Microscopic examination of cytologic and histologic material of benign and malignant disease processes of the genitourinary system and body cavity fluids.

Offered Fall

CLS 453. Micro: Fine Needle Aspir. (2 Units)

Prerequisite: Admission to the clinical year in cytotechnology. Microscopic examination of cytologic and histologic material of benign and malignant disease processes in aspirated material.

Offered Spring

CLS 454. Micro: Systems Overview. (4 Units)

Prerequisite: Admission to the clinical year in cytotechnology. Cytologic examination of gynecologic and non-gynecologic material from all body sites for diagnostic purposes.

Offered Spring

CLS 455. Cytologic Preparation. (2 Units)

Prerequisite: Admission to the clinical year in cytotechnology. Current methods of processing and staining material for cytologic study. Techniques utilized in obtaining non-gynecologic material for cytologic evaluation.

Offered Spring

CLS 460. General Cytology. (3 Units)

Prerequisite: Admission to the clinical year in cytotechnology. General cytology, cytogenetics, and electron microscopy. Basic principles of pathology and cytology as they apply to malignancy. Anatomy, histology, pathology and cytopathology of the female genital tract, including microbiology, hormonal effects and response to therapy.

Offered Fall

CLS 461. Cyto Res & Gi Tract. (2 Units)

Prerequisite: Admission to the clinical year in cytotechnology. Normal and abnormal cytology of the respiratory and gastrointestinal tracts with emphasis on anatomical and histological pathology.

Offered Spring

CLS 462. Cyto Gu Body C Fluids. (2 Units)

Prerequisite: Admission to the clinical year in cytotechnology. Normal and abnormal cytology of the genitourinary system and body cavity fluids with emphasis on anatomical and histological pathology.

Offered Spring

CLS 463. Fine Needle Aspirat Cytol. (1 Units)

Prerequisite: Admission to the clinical year in cytotechnology. Normal and abnormal aspiration cytology of the major organs with emphasis on anatomical and histological pathologies.

Offered Spring

CLS 490. Seminar In Clinical Sciences. (1 Units)

Prerequisites: CLS 301 and CLS 306 required; and all lower division Clinical Science Program required. Presentation and discussion of pertinent topics from clinical science trade journals. Written and oral presentations. One hour of seminar per week.

Offered As needed

CLS 491. Management Skills in Clinical Sciences. (3 Units)

Prerequisites: Admission to Clinical Internship; CLS 301 is recommended. Discussion of current and emerging theories, concepts and trends relevant to the management of clinical laboratories, including compliance, professional development, training and educational methodologies. Student projects, written and oral reports are required.

Offered All terms, Spring

CLS 492. Research Methods in Clinical Science. (3 Units)

Prerequisite: Admission to Clinical Internship; MAT 131 is recommended. Overview of relevant theoretical concepts, methods and applications utilized in clinical science research. Application of research methods to the development and design of research proposal. Critical analysis of literature review, data, and published research studies in clinical sciences.

Offered All terms, Fall

CLS 494. Independent Study in Clinical Science. (1-3 Units)

Course of study designed cooperatively by student and instructor to accomplish individualized learning objectives that are appropriate to the clinical laboratory. Consent of instructor required. CR/NC grading.

Offered Fall, Spring

CLS 501. Clinical Sciences: Team Concept. (3 Units)

Prerequisite: HEA 201. Analysis of the current status and problems in health care delivery including management, staffing and health economics; development of a realistic model. Role of allied health professionals in health care delivery; scientific medicine vs. holistic health; prevention and health education. Coordination of the clinical sciences into an effective health care team. To successfully complete this class, students must demonstrate proficiency to the satisfaction of the instructor in oral and written communication skills in the English language. Oral and/or written reports/projects.

Offered As needed

CLS 502. Management Concepts in the Clinical Sciences. (3 Units)

Prerequisite: HEA 201. Managerial function, organization, and structure. A pragmatic approach to the strategies and tactics available to the professional manager. Special projects in work sampling, workload recording and time management for health care professionals. Oral and/or written reports/projects.
Offered As needed

CLS 503. Clinical Diagnosis. (3 Units)

By use of case studies, interpretation of clinical data, correlation of history and physical to diagnosis, treatment and follow-up protocols. Student case study investigation. Two hours of lecture and two hours of activity per week.
Offered As needed

CLS 504. Data Collect & Process. (3 Units)

Prerequisite: CSC 111 or equivalent. Collection, storage and retrieval of data, with emphasis on clinical applications. Modern information systems and evaluation of such systems from the clinical science management view point. Oral and/or written reports/projects. Two hours of lecture and two hours of activity per week.
Offered As needed

CLS 505. Stat Analysis & Research. (3 Units)

Prerequisite: MAT 131. Application of statistical analysis in the clinical and health sciences, including normal and binomial distribution, t-tests, chi square tests, analysis of variance, linear regression and correlation. Student project required. Two hours of lecture and two hours of activity per week
Offered As needed

CLS 590. Graduate Seminar. (1-2 Units)

Prerequisites: CLS 501, CLS 502 and CLS 503 or consent of instructor. Seminar methods and use of the literature in the clinical sciences. Faculty and student directed discussions of contemporary clinical science issues. Participants present and interpret recent publications. Written abstracts. Repeatable up to 6 units. One hour of seminar per week.
Offered As needed

CLS 594. Ind Study In Clin Sci. (1-3 Units)

Prerequisite: Consent of instructor and advisor. Independent and original laboratory or field investigation under supervision of a faculty member.
Offered As needed

CLS 595. Special Top:.. (1-3 Units)

Prerequisite: Health Care Practitioner. Advanced topics of special interest to Clinical Science majors possessing health care credentials. Topic and content will vary as announced.
Offered As needed

CLS 596. Internship. (1-6 Units)

Prerequisite: Graduate standing; CLS 501 and 502 recommended. Students will be directed to health care facilities to serve as interns within their chosen specialization. Teaching opportunities may be available in a variety of settings. Regular meetings are scheduled with a faculty internship supervisor to assess student progress. Written report required. Course designed for graduate students in the Clinical Sciences. Repeatable course.
Offered As needed

CLS 599. Grad Capstone Activity. (1-3 Units)

Prerequisites: Graduate Writing Assessment Requirement; advancement to candidacy, and completion of all required core courses. Department approval of advisor and project. Students will choose either a thesis, project or comprehensive examination in consultation with their advisor.
Offered As needed

CLS 600. Grad Continuation Course. (1 Units)

Graduate students who have completed course work but not their thesis, project, or comprehensive examination, or who have other requirements remaining for completion of their degree, may maintain continuous attendance by enrolling in this course. Signature of graduate program coordinator required.
Offered Fall, Spring

Clinical Science - Cytotechnology, Post-Baccalaureate Certificate

All pre-clinical requirements must be completed prior to starting the clinical internship. See BS degree Curriculum. The Post Baccalaureate Certificate in Clinical Science – Cytotechnology is awarded upon successful completion of Clinical Year Laboratories and Lectures as a Cytotechnologist Trainee in an affiliated clinical facility. Awardees are eligible to sit for the national certification of the ASCP - Board of Certification and California-issued State licensure.

All pre-clinical requirements must be completed prior to starting the clinical internship. See BS degree Curriculum. The Post Baccalaureate Certificate in Clinical Science – Cytotechnology is awarded upon successful completion of Clinical Year Laboratories and Lectures as a Cytotechnologist Trainee in an affiliated clinical facility. Awardees are eligible to sit for the national certification of the ASCP - Board of Certification and California issued state licensure.

Total Hours **28-30**

Clinical Science, Bachelor of Science

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Major Requirements (72-76 units)

The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

Single Field Major - no minor required

Cytotechnology Option (72 units)

¹ These are pre-clinical courses from which grade point averages are calculated to determine clinical placement eligibility. They must have been taken within the last five years in the United States. Exceptions may be granted by the Program Coordinator.

Phlebotomy experience (CLS 302 Clinical Practice Lab) is required by many of the affiliated labs for clinical internships in medical technology. Each medical technology student is required to consult with an advisor regarding this elective.

California state licensure for medical technology requires that three (3) units in physics, including light and electricity, be completed prior to issuing the clinical trainee license. Each medical technology student is required to consult with an advisor regarding this state regulation.

Program Learning Outcomes

- Demonstrate the ability to recall, apply and synthesize knowledge of scientific principles, clinical concepts, mechanisms leading to disease, and methodologies in each area of the laboratory.
- Demonstrate the ability to correlate laboratory findings with the disease presentation.
- Demonstrate the ability to perform clinical diagnostic testing and evaluate outcomes in order to solve problems related to pre-analytical, analytical, and post-analytical components of services in each area of the laboratory.
- Demonstrate the ability to use knowledge of research design/practice to evaluate published studies, to create an abstract and proposal, and to address laboratory-related advances and innovations.
- Demonstrate the ability to apply principles of management to address laboratory operations, communication, ethics, safety, regulatory and compliance, and professional development.
- Demonstrate professionalism in personal conduct by showing the ability to communicate effectively, respect patient rights, culture, privacy, and participate as a member of the healthcare team and comply with laboratory standards of practice.
- Graduates of the program, upon completion of their clinical training and passage of the appropriate certification examination(s), are considered to be clinical/medical laboratory scientists and professionals armed with the technical skills and knowledge theory

necessary to meet current and future standards of quality laboratory and healthcare services practice.

Communications

College of Arts and Humanities
Communications Department

Program Description and Features

Students dedicated to building professional careers in print and digital media, film, television, and the closely related fields of public relations and advertising, as well as those interested in preparing for post-baccalaureate programs, will find degree programs designed by the Communications Department to meet their needs and to develop their skills and interests. The Department offers the Advertising and Public Relations B.A. program, the Film, Television, and Media B.A. program, the Journalism B.A. program, the Advertising Minor, and the Communications Minor. The curriculum provides a broad understanding of communications media within a liberal arts framework.

Advertising and Public Relations B.A.

The Bachelor of Arts in Advertising and Public Relations degree program is designed to help students develop an in-depth understanding of the role and impact of advertising and public relations in both for-profit and nonprofit organizations. The program focuses on preparing students to become logical and innovative advertising and public relations professionals who also examine the ethical and cultural values in their practice. The curriculum is designed to emphasize professional skills, analytic abilities, and critical approaches in dealing with advertising and public relations issues. Students will polish creative ideas and gain a variety of professional skills, including creating advertising and public relations messages; planning advertising and public relations media; organizing integrated communication plans, and developing sponsorships and promotional strategies.

Film, Television, and Media B.A.

The Bachelor of Arts in Film, Television and Media degree program integrates critical thinking and critical making. By approaching both traditional and emerging media as creative storytelling and grounding students in the knowledge of the history, politics, forms and industry structures of media stories, students learn to adapt to a constantly changing media landscape and how they can make a positive impact on society using their creative voices. Students take courses on storytelling in and across media forms. In writing about media stories, students develop skills in analyzing and interpreting media stories. Building on

those skills, students will also learn how to tell new stories as well as identify potential audiences and venues for those stories.

Journalism B.A.

The Bachelor of Arts in Journalism degree program is dedicated to high standards in journalistic practices, skills, and specializations with a strong focus on analytical reasoning, critical thinking, and problem-solving. Through innovative teaching practices, the program provides a broad-based curriculum designed to promote news and information literacy; proficiency in the various journalistic forms and styles; an understanding of the new media landscape; and information dissemination practices through contemporary and emerging media tools. The program is committed to freedom of the press, freedom of expression, freedom of inquiry, and the questioning of dominant institutional practices and ideologies. It encourages dedication to ethical practices including truth, accuracy, fairness, diversity, inclusivity, and independence.

Advertising Minor

The department offers an Interdisciplinary Minor in Advertising, in conjunction with the College of Business Administration and Public Policy and the Art and Design Department, combining courses in advertising, marketing and graphic design. The Advertising Minor provides an overview of both the business and creative sides of the advertising field.

Communications Minor

For the Minor in Communications, students take two lower-division courses and then choose two upper-division courses from the Advertising and Public Relations, Film, Television, and Media and Journalism programs based on their interests.

Preparation

High school students are encouraged to take college preparatory English courses. Students planning to transfer from community college should consult with their counselor or advisor to identify appropriate transferable lower-division courses.

Student Organizations

The Communications Department has sponsored a chapter of the Public Relations Student Society of America (PRSSA) since 1979. The chapter's mission is:

1. to serve its student members by enhancing their knowledge of public relations and providing access to professional development opportunities; and
2. to serve the public relations profession by helping to develop highly qualified, well-prepared professionals.

PRSSA cultivates a favorable and mutually advantageous relationship between student members and professional public relations practitioners. The CSUDH Chapter is highly active, holding monthly meetings and sponsoring various on- and off-campus social and professional activities.

The Department also sponsors the Society of Independent Student Journalists (SISJ) student organization. Its mission is:

1. to offer educational and professional support for student journalists;
2. to reinforce and strengthen the guiding principles of independent journalists;
3. to give student journalists the opportunity to network with industry professionals and instructors; and
4. to ensure all interested students are proficient in the principles and practices of journalism professionals.

Undergraduate Programs

Majors

- Advertising and Public Relations, Bachelor of Arts (p. 354)
- Film, Television, and Media, Bachelor of Arts (p. 565)
- Journalism, Bachelor of Arts (p. 625)

Minors

- Advertising, Minor (p. 478)
- Communications, Minor (p. 478)

Faculty

Brant Burkey, Department Chair, Ana de la Serna, Advertising and Public Relations Coordinator, Ryan Bowles Eagle Film, Television and Media Coordinator, Nancy Cheever, Journalism Coordinator

Virginia (Toddy) Eames, Miriam Hernández, Larry Hygh Jr., Sharon Sharp, John Vanderhoef

Department Office: LIB 5324, (310) 243-3313

Courses

COM 100. Media & Society. (3 Units)

A critical overview of media culture including newspapers, magazines, film, radio, television, popular music, advertising, public relations, and the Internet. Focuses on building critical media literacy skills by developing a concrete understanding of media history, media analysis, the structure of media industries and their major players and products.

Offered Fall, Spring, All terms

COM 105. Introduction to Media Criticism. (3 Units)

Develops the analytical tools required for critical understanding of media culture. Investigates relationships between institutions, texts, audience practices and technologies in order to build a foundation for informed media engagement, criticism and analysis in the 21st century.

Offered Fall

COM 106. Digital Toolkit. (2 Units)

Co-requisite: COM 107 is required. Introduction to the foundational and emerging tools, platforms, and digital skills essential for students interested in pursuing careers in any communications or related field, including word processing, data management, presentational, media content creation, web publishing and design/editing software and programs.

Offered Fall, Spring

COM 107. Digital Toolkit Lab. (1 Units)

Co-requisite: COM 106 is required. Provides practice in the foundational and emerging tools, platforms, and digital skills essential for students interested in pursuing careers in any communications or related field, including word processing, data management, presentational, media content creation, web publishing, and design/editing software and programs.

Offered Fall, Spring

COM 110. Introduction to Digital Media Production. (2 Units)

Co-requisite: COM 111 is required. An introduction to the process of digital video production that provides basic skills in all areas of digital video production in preparation for a career in any communications or related field that might require these basic skills. Skill sets include camera, lighting, sound, pre-production and production methodologies, and basic digital processes.

Offered Fall, Spring

COM 111. Introduction to Digital Media Production Laboratory. (1 Units)

Co-requisite: COM 110 is required. Provides instruction on basic skills in all areas of digital video production. The lab provides hands-on training in the use of camera operations, lighting, sound recording, pre-production, production and post-production methodologies, and basic digital processes.

Offered Fall, Spring

COM 130. Introduction to Film. (3 Units)

An introduction to the study of film as an aesthetic, historical, and cultural phenomenon, and to various methods of critical analysis.

Offered Fall, Spring

COM 200. Genre Analysis. (3 Units)

Prerequisites: COM 100 or COM 105 is required. Critical study of a specific genre of media (horror, science fiction, western, or documentary for example). Examines genres in their cultural and historical context and critical analysis writing using appropriate concepts and terminology.

Offered All terms, Fall, Spring

COM 206. Photojournalism. (3 Units)

Instruction in the basic principles of still photography.

Offered Infrequent, All terms

COM 250. Writing for the Media. (3 Units)

Instruction and practice in the basics of reporting and writing news for print, electronic and digital media.

Offered Fall, Spring, Summer, All terms

COM 251. Newswriting in Spanish. (3 Units)

Prerequisites: SPA 220 and SPA 221; or SPA 280 are required. Instruction and practice of the basics of reporting in Spanish language for traditional and new media. Students will gain the ability to conduct research, find sources and produce news in Spanish.

Offered Fall, Spring, Summer

COM 301. News and Information Literacy. (3 Units)

Develop critical thinking and literacy skills through examination of news and other constructed messages. Emphasis on analyzing and evaluating information sources and their narratives, structures, origins, placement and availability.

Offered Fall, Spring

COM 302. Law Of The Mass Media. (3 Units)

Libel law, right to privacy, contempt of court, copyright, the right to print news of public affairs, the Freedom of Information Act, and other legal topics of concern to the media professional.

Offered Fall, Spring

COM 307. History of Film. (3 Units)

Prerequisite: COM 100 or COM 105 is required. A critical survey of the history of film from the 1890s to the present. Covers a range of cinematic traditions from narrative to experimental. Examines the interrelationships between cinematic forms, industry, regulation, technology, aesthetics, and culture.

Offered Spring

COM 308. Television History. (3 Units)

Prerequisite: COM 100 or COM 105 is required. A critical survey of the history of American television, from the 1940s to the present. Examines the interrelationships between programming forms, industry, regulation, technology, aesthetics, and culture.

Offered Fall

COM 309. History of Emerging Media. (3 Units)

Prerequisite: COM 100 or COM 105 is required. A critical survey of the history of new and emerging media forms from 1830s to the present. Examines a range of media technologies as sites of contestation and negotiation before their use by audiences had been institutionalized within industry and culture.

Offered Fall, Spring

COM 311. Persuasion. (3 Units)

Prerequisite: COM 100 is required. Provides students with an in-depth understanding of persuasion conceptions, theories, and practices. Students analyze findings and implications of persuasion research to real-world cases.

Offered Infrequent

COM 314. Broadcast Journalism. (2 Units)

Prerequisite: COM 250 is required. Co-requisite: COM 315 is required. Provide students with accurate news judgement and the fundamental journalistic techniques of news gathering, reporting, writing, editing, evaluating, and producing news and feature stories for radio and television news broadcasts.

Offered Fall

COM 315. Broadcast Journalism Lab. (1 Units)

Prerequisite: COM 250 is required. Co-requisite: COM 314 is required. Provide students with accurate news judgement and the fundamental journalistic techniques of news gathering, reporting, writing, editing, evaluating, and producing news and feature stories for radio and television news broadcasts.

Offered Fall

COM 320. Sports Journalism. (3 Units)

Prerequisite: COM 250 is required. Provides instruction and practice in reporting stories and producing multimedia news packages on a variety of sports topics including game coverage, interviewing, and reporting on both professional and amateur sports activities for print, broadcast, and online media.

Offered Fall

COM 328. Entertainment and Lifestyle Journalism. (3 Units)

Prerequisites: COM 250 is required. Theory and practices of journalistic writing about television, film, music, visual arts, travel destinations, dining and other cultural phenomena across media platforms.

Offered Spring

COM 330. Emerging Media Writing. (3 Units)

Prerequisite: COM 100 or COM 105; and COM 106 are required. Course focuses on writing interactive stories for emerging media. Students develop skills in generating concepts, story structure, character development, incorporating interactivity and pitching. Students conduct both collaborative and individual projects and develop skills for peer critique of creative work.

Offered Spring

COM 331. Screenwriting I. (3 Units)

Prerequisite: COM 100 or COM 105 is required. Serves as an introduction to the craft of screenwriting, with primary focus on equipping students with the skills to write scenes and short format screenplays and to analyze and evaluate feature films and screenplays.
Offered Fall, Spring

COM 332. Writing for Series Television. (3 Units)

Prerequisite: COM 100 or COM 105 is required. Students break down the TV-writing process then apply each step to the development of their own original script. Students will learn the basic theory and formal aspects of story structure, character development, the use of conflict, scene writing and dialogue for television.
Offered Fall

COM 333. Digital Journalism. (2 Units)

Prerequisites: COM 110 and COM 250 are required. Co-requisites: COM 334 is required. Provides students with skills needed to gather news, analyze and produce a variety of stories for digital media across platforms and digital publishing tools, including social media, podcasts, blogs, videos, and websites, as well as to understand the nature of the emerging field of convergent journalism.
Offered Fall, Spring

COM 334. Digital Journalism Laboratory. (1 Units)

Prerequisites: COM 110 and COM 250 are required. Co-requisite: COM 333 is required. Provides skills needed to gather, analyze and produce a variety of stories for digital media, across platforms and digital publishing tools, including social media, podcasts, blogs, videos, and websites, and understand the emerging field of convergent journalism.
Offered Spring

COM 338. Cross-Cultural Journalism. (3 Units)

Prerequisite: COM 250 is required. Provides a broad, critical examination of differences in global news culture, policies and styles, including Spanish-language, alternative, ethnic-focused, and political-driven media, and other cultural print and broadcast organizations. Topics vary by semester.
Offered Fall, Spring

COM 339. Latinx culture and the news media in the USA. (3 Units)

This course offers an overview of contemporary Latinx news media in the U.S. For a deeper understanding of the topics reported in the LatinX new media, students will learn about the countries that comprise Latin America. This includes Latin American history and culture. The course will highlight current events in Latin America and how they connect with Latinx communities in the U.S.

COM 340. Emerging Media Making. (2 Units)

Prerequisites: COM 100 or COM 105; and COM 106/107 are required. Co-requisite: COM 341 is required. Students utilize digital software to produce original new media projects, including memes, pixel art, music, interactive fiction and/or digital games. Students conduct both collaborative and individual projects and develop skills for peer critique of creative work.
Offered Infrequent

COM 341. Emerging Media Making Lab. (1 Units)

Prerequisites: COM 100 or COM 105; and COM 106/17 are required. Corequisite: COM 340 is required. Lab activity works in conjunction with COM 340: Emerging Media Making to give students hands-on time with production software under instructor supervision.
Offered Infrequent

COM 342. Advertising Strategy and Copywriting. (3 Units)

Planning, creating and preparing demographically and psychographically targeted advertisements for print, electronic, interactive, and out-of-home media. Students will write copy for commercial and not-for-profit advertising campaigns. Restricted to majors
Offered Fall, Spring

COM 344. Advertising Media Analysis. (3 Units)

Analysis of the comparative advantages (cost and market impact) of various advertising media as a basis for time and space buying within the context of the creative advertising campaign with an emphasis on campaign planning and implementation.
Offered Fall, Spring

COM 346. News Gathering & Reporting. (3 Units)

Prerequisites: COM 250. Theory and practice of information gathering for print and electronic media writing, including the art of interviewing. Identification, assessing and verifying published, computerized data base and live sources. Special emphasis on interview problems such as invalid inference and supposition.
Offered Fall, Spring

COM 347. Multimedia Interviewing Practices. (3 Units)

Prerequisites: COM 100, COM 110 and COM 250 are required. An introduction to the fundamentals of gathering information through interview techniques, active listening, nonverbal communication, and psychological dynamics of interviewing in journalistic situations. Emphasis on accurate note taking, transcribing, and narrative structure from interviewing for print, online, and broadcast media.
Offered Fall, Spring

COM 348. News Editing And Design. (3 Units)

Prerequisites: COM 250. Principles, practice in copy editing, including review of grammar, spelling, punctuation, word use, organization, word flow, sentences, information verification, application of appropriate story forms; writing headlines, photo cropping and sizing, computer desktop page design and editorial judgment. One hour lecture, two hours activity per week.
Offered Infrequent

COM 350. Culture, Gender and Strategic Communication. (3 Units)

Prerequisite: COM 100 is required. Improve the understanding of cultural differences and assumptions regarding gender in the context of strategic communication. An overview of major communication theories, strategies, methods, and practices in advertising and public relations campaigns will be covered. Develop advertising skills and public relations messages based on cultural aspects in strategic communication.
Offered All terms, Fall, Spring

COM 352. Feature And Critical Writing. (3 Units)

Prerequisites: COM 250. Analysis and practice of preparing feature stories and critical reviews for newspapers, magazines, radio, television and video. Assignments include profiles, how-to pieces and news features. Critical reviews focus on theatre, film, music, fine arts and books. Two hours lecture, two hours activity per week.
Offered Fall, All terms

COM 355. News Production Workshop. (3 Units)

Prerequisites: COM 250 is required, COM 346 is recommended. Production of print and electronic forms of campus newspaper. Practices include original story selection, writing, reporting, interviewing, and editing. Repeatable course. Two hours lecture, three hours activity per week.
Offered Fall, Spring

COM 358. Communications Graphics. (3 Units)

Prerequisites: COM 250. Learning methods for producing various forms of visual communications including fliers, informational graphics and logos, newsletters, magazines and newspapers in correlation with desktop publishing, page design, typography selection, copy fitting photo sizing and cropping. Two hours lecture, two hours activity per week.
Offered Infrequent

COM 360. Pub Affairs & Edit. Writing. (3 Units)

Prerequisites: COM 250 and COM 346. Reporting, writing and editorial interpretation of public affairs events and issues, including on-site coverage of local governments, civic affairs, schools, police and courts. Utilization of public documents, enhancement of interviewing techniques, with emphasis on accuracy, clarity and social responsibility. Two hours lecture and two hours activity per week.
Offered Infrequent

COM 363. Social Media Strategies. (3 Units)

Prerequisites: COM 250 and COM 365 are required. Provides an overview of various social media techniques and the strategies to help organizations engage in dialogue and build relationships effectively with different audiences and stakeholders.
Offered Spring

COM 365. Introduction to Public Relations. (3 Units)

Public relations practices and principles as applied to government, education and industry.
Offered Fall, Spring

COM 366. Public Relations Writing. (2 Units)

Prerequisites: COM 250 and COM 365. Co-requisite: COM 367 is required. Public relations writing; message and audience analysis. Creating effective forms of public relations communications, producing print and video press releases, public service announcements, media fact sheets and alerts, executive letters, press kits and brochures and newsletter copy. Two hours lecture, two hours activity per week.
Offered Fall, Spring

COM 367. Public Relations Writing Lab. (1 Units)

Prerequisites: COM 250 and COM 365 are required. Co-requisite: COM 366 is required. Public Relations writing laboratory course that covers the creation of effective forms of public relations communications; the production of print and video press releases, public service announcements, media fact sheet ans alerts, executive letters, press kits and brochures, and newsletter copy.
Offered Fall, Spring

COM 368. Investigative Reporting. (3 Units)

Prerequisite: COM 250 is required. Prepares students to conduct in-depth reporting by examining the motivation, process, and skills behind investigative journalism, including obtaining and analyzing public records, private documents and data on social, political, and scientific issues for print, broadcast or online media.
Offered Fall

COM 370. Creative Producing I. (3 Units)

Prerequisites: COM 100 or 105, COM 379, and COM 330, COM 331 or COM 332 are required. Builds on students' understanding of storytelling and the industry to provide an introduction to script development and writing coverage. Students study the basics of packaging films for Hollywood and how to navigate the business of both studio production and independent film-making.
Offered Fall, Spring

COM 372. Crisis Communication. (3 Units)

Prerequisites: COM 250 and COM 365 are required. An introduction to crisis communication theory and application. The course will cover crisis communication theory, crisis management strategies and various case studies.
Offered All terms, Fall

COM 375. Media and Representation. (3 Units)

Prerequisite: COM 100 or COM 105 is required. Critical study of US media representations of race, gender, class, sexuality, and other markers of difference. Considers the complex social, historical, and industrial forces shaping media portrayals of identities, groups, and cultures.
Offered Fall, Spring

COM 376. Transmedia Storytelling. (3 Units)

Prerequisite: COM 100 or COM 105; and COM 379 are required. Provides an overview of the transmedia landscape and developing skills necessary for writing stories intended for use across multiple platforms. Topics include how stories are developed for cross media consumption from story ideation to production and distribution.
Offered Fall

COM 377. Global Media. (3 Units)

Prerequisites: COM 100 or COM 105; and COM 379 are required. Critical study of media outside of the US; may focus on a transnational, national, regional, or local media tradition or industry. Considers how global media relates to history, culture, and identity. Focuses on critical analysis writing using appropriate concepts and terminology.
Offered Spring

COM 378. Media Audiences. (3 Units)

Prerequisite: Prerequisites: COM 100 or COM 105 is required. Critical study of a specific media audience (comic book fans, social media users, telenova viewers, for example). Examines audiences in cultural and historical context, considering the range of ways in which audiences make meaning from and engage with media texts.
Offered Fall

COM 379. Media Industries. (3 Units)

Prerequisite: COM 100 or COM 105 is required. Analyzes contemporary media industries offering a comprehensive overview of how the industries work, their historical roots in relation to how they operate today, and their cultural influence. Examines how the relationships between various cultural, industrial, regulatory, and economic elements set the conditions by which media industries create cultural texts.
Offered Fall, Spring

COM 388. Digital Magazine Production. (1 Units)

Prerequisites: COM 250, COM 347 and COM 352 are required. Co-requisite: COM 389 is required. This course is designed to build skills in advanced feature storytelling through the production of a digital magazine for distribution across digital platforms. From conception to production, feature story packages and will be developed with a strong focus on research, writing, editing, photography, creating videos and podcasts, and design.
Offered Spring

COM 389. Digital Magazine Production Laboratory. (2 Units)

Perquisites: COM 250 and COM 352 are required. Co-requisite: COM 388 is required. This course is designed to build skills in advanced feature storytelling through the production of a digital magazine for distribution across digital platforms. From conception to production, feature story packages and will be developed with a strong focus on research, writing, editing, photography, creating videos and podcasts, and design.
Offered Spring

COM 390. Hollywood by the Horns. (3 Units)

Prerequisites: COM 100 or COM 105; and COM 379 are required.
Workshop that contributes to the mission of the Hollywood by the Horns program: to build up and maintain the relationship between working professionals in Hollywood and the dynamic students of CSU Dominguez Hills. Requires department consent.
Offered Fall

COM 400. Media Analysis and Research Methods. (3 Units)

Prerequisites: COM 100 and COM 250. Critical analyses of the media and their role in society from an empirical research perspective. Emphasis on social science-based research methods including focus groups, in-depth interviews, correlational studies and experiments, and research report preparation.

Offered Fall, Spring

COM 420. Screenwriting II. (3 Units)

Prerequisite: COM 100 or COM 105; and COM 331 are required. Advancing the process of screenwriting, students develop original work culminating in the completion of the first act of a feature length screenplay. Final projects can be developed into a senior project for COM 490.

Offered Infrequent

COM 435. Media Psychology. (3 Units)

Prerequisite: COM 100 is required. Course is designed to acquaint students with the burgeoning field of media psychology, which examines the intersection of media use/media content and psychological processes. In this course, students will learn how mass media messages, images, and texts can alter our thoughts, feelings, and behaviors, and how media and technology use may lead to or exacerbate psychological disorders.

Offered Spring

COM 467. Integrated Communications Management. (3 Units)

Prerequisites: COM 250, COM 365 and COM 366 are required. Analysis and development of strategies for planning/implementing integrated communications campaigns and preventing/solving integrated communications problems. Emphasis is placed on both individual and team case studies, incorporating strategic planning and writing techniques previously learned.

Offered Fall, Spring

COM 470. Creative Producing II. (3 Units)

Prerequisites: COM 100 or COM 105, COM 370, and COM 330, COM 331, or COM 332 are required. Develops students' knowledge of producing scripted entertainment from development through distribution. Students will complete advanced work in screenplay development and the multiple pathways to producing.

Offered Infrequent

COM 490. Senior Project. (3 Units)

Prerequisite: Consent of department; senior standing. Discussion and preparation of senior project and professional portfolio.

Offered Fall, Spring

COM 494. Independent Study. (1-3 Units)

Independent study in any relevant subject area under the direction of a member of the Communications Department faculty. Course repeatable 3 times for a maximum of 9 units.

Offered Fall, Spring

COM 495. Special Topics. (3 Units)

Prerequisite: COM 100 or COM 105 is required. Restricted to seniors or by consent of department. An intensive study of an issue or concept in journalism, advertising, public relations, film, television or emerging media that is of special interest to both the faculty member and the students.
Repeatable for credit
Offered As needed

COM 496. Internship In Communications. (3 Units)

Prerequisites: Senior standing and/or approval of the department is required; completion of a minimum of 27 upper division units in the major is recommended. Directed work experience in the communications field-print or electronic journalism, public relations or advertising, film, broadcasting, or telecommunications. Ideally, such work provides a practical bridge linking the student's academic studies with the world of work. A minimum of 10 hours a week of supervised work experience under the direction of a professionally-qualified mentor.

Offered Fall, Spring

Advertising, Minor Requirements

The academic standards of the department require that all Advertising minors pass all required and prerequisite courses with grades of "C" or better.

Required Courses

| Code | Title | Hours |
|--------------------|--------------------------------------|-----------|
| COM 342 | Advertising Strategy and Copywriting | 3 |
| COM 344 | Advertising Media Analysis | 3 |
| DGN 310 | Graphic Design 1 | 3 |
| MKT 350 | Principles Of Marketing | 3 |
| MKT 352 | Advertising and Promotion MGT. | 3 |
| MKT 355 | Consumer Behavior | 3 |
| Total Hours | | 18 |

Communications, Minor Requirements

| Code | Title | Hours |
|---|-----------------------|-----------|
| Lower Division Required Courses | | |
| COM 100 | Media & Society | 3 |
| COM 250 | Newswriting For Media | 3 |
| Upper Division Required Courses | | |
| Select two upper division Communications elective courses | | 6 |
| Total Hours | | 12 |

Program Learning Outcomes

Computer Science

College of Natural and Behavioral and Sciences
Department of Computer Science

Program Description

The modern electronic digital computer has become the indispensable tool of government, commerce, and technology because of its enormous appetite for data and its near-instantaneous processing speed. Computer

Science is the discipline of designing methods for solving problems by means of such computers. The subject involves a surprising amalgam of logic, mathematics, engineering, electronics, communications, and ergonomics.

The curriculum is designed to provide preparation for professional careers in the areas of software design and applied computer science, as well as to give the necessary theoretical background for graduate study in the field and to allow a flexible response to a dynamic and growing profession. The required courses give students a firm foundation in the basic areas of computer science and related areas of mathematics, and a wide choice of electives allows them to tailor their program to their specific interests.

The baccalaureate program (Bachelor of Science in Computer Science) is accredited by the Computing Accreditation Commission of ABET, <http://www.abet.org> (<http://www.abet.org/>). The programs accredited by ABET are accredited as separate and distinct from any other programs or kinds of accreditation.

Features

The University's location in the South Bay area of greater Los Angeles provides direct access to many major government contractors, manufacturers, and international centers of commerce and finance. This provides excellent opportunities for work-study and early job placement.

Our highly qualified full-time faculty are supplemented by talented and dedicated part-time faculty drawn from local firms and schools. Good teaching and easy on-campus access to professional quality computing systems enhance a degree program with a solid core curriculum and a broad range of electives.

All courses are offered alternatively day and evening so that students may complete their programs by enrolling at either time exclusively.

Graduation with Honors

An undergraduate student may be a candidate for graduation with Honors in Computer Science provided he or she meets the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills at least 24 of which taken in Computer Science major;
2. A minimum GPA of 3.5 in all upper-division courses in the Computer Science major completed in residence at CSUDH.

Students who achieve Honors in Computer Science will have the information recorded on their transcripts and diplomas.

Academic Advisement

Faculty guidance in the development of career goals and program planning to achieve those goals is available to all majors.

Preparation

Students entering the computer science program should have completed high school mathematics through trigonometry. Remediation is available but will delay the student's progress toward a Computer Science Degree.

This is a demanding program that places a premium on the student's initiative and effort.

Student Organizations

Contact the departmental office for membership information, or visit the websites:

Association for Computing Machinery (ACM) ACM@csudh.edu
 Institute of Electrical and Electronics Engineers (IEEE) IEEE@csudh.edu
 Cyber Security CyberSec@csudh.edu
 Computing Alliance of Hispanic-Serving Institutions (CAHSI) CAHSI@csudh.edu

Career Possibilities

Entry-level positions in the areas of systems analysis, systems programming, applications programming, data engineering, data communications, and software engineering provide typical career opportunities for computer science graduates. Such positions are available in a wide variety of software vendors, aerospace and defense-related industries, manufacturing, and commercial firms, and government and other public agencies. Many graduates have also gone on to graduate school. Job opportunities for computer science graduates continue to be excellent because of the continued long-term growth of the computer industry.

Undergraduate Programs

Bachelor

- Computer Science, Bachelor of Science (p. 483)

Minor

- Computer Science, Minor (p. 489)

Certificate

- Computer Science, Certificate (p. 485)

Graduate Programs

Master

- Computer Science, Master of Science (p. 486)
- Cyber Security, Master of Science (p. 514)

Faculty

Mohsen Beheshti, Department Chair
 Jianchao (Jack) Han, Marek Suchenek, Bin Tang, Amlan Chatterjee,
 Liudong Zuo, Allireza Izaddoost, Brad Hollister, Khondaker Salehin, Ali (Ashkan) Jalooli, Sanaz Rahimi Moosavi, Sahar Hooshmand

Emeriti Faculty

William B. Jones, Kazimierz Kowalski

Staff

Violeta Diaz, Administrative Assistant
 Ken Leyba, IT Consultant
 Department Office: NSM A-132, (310) 243-3398

Courses

CSC 101. Intro to Computer Education. (3 Units)

A computer literacy course designed to familiarize the learner with a variety of computer tools and computer concepts with emphasis on utilizing packaged programs. This course provides an introduction to the use of computers, common software programs and peripherals. Students are instructed in the use of a word processor, drawing programs, spreadsheet, database, presentation tools, internet applications and statistical package in scientific applications.
Offered Fall, Spring

CSC 111. Introduction to Computers and Basic Programming. (3 Units)

Introduction to computer programming with particular emphasis on small systems through programming in the BASIC language.
Offered Fall, Spring

CSC 112. Intro Computers And Basic. (20 Units)

Offered All terms

CSC 115. Introduction to Programming Concepts. (3 Units)

Introduces students to computer programming by teaching techniques of problem solving. Students will become acquainted with decision constructs, looping structures, and subroutine modules. Students will learn the vocabulary of object-oriented programming.
Offered Fall, Spring

CSC 116. Introduction to Computer Hardware and Tools. (3 Units)

Introduction to microcomputer hardware and operating systems. Students will be required to use application software to research, generate and prepare a semester project.
Offered Fall, Spring

CSC 121. Introduction to Computer Science and Programming I. (4 Units)

Prerequisite: CSC 115 or equivalent and MAT 153 or consent of instructor. Organization of sequential, digital machine: CPU, I/O, storage, communications devices. Functions of operating systems: translators, editors, peripheral control utilities. The course covers the development, description, and analysis of elementary algorithms. It includes three hours of lecture and two hours of activity per week.
Offered Fall, Spring

CSC 123. Introduction to Computer Science and Programming II. (4 Units)

Prerequisites: CSC 121. Continuation of CSC 121. Fundamental programming concepts using arrays, records, pointers, linked list, trees and recursion. Good style, documentation and structure will be emphasized. Introduction to analysis of algorithms for efficiency and correctness.
Offered Fall, Spring, Summer

CSC 195. Selected Topics in Computer Science. (1-4 Units)

Prerequisite: Consent of Instructor. Content varies. Topics in computer science not covered by current course offerings.
Offered As needed

CSC 221. Assembly Language and Introduction to Computer Organization. (3 Units)

Prerequisite: CSC 121. Programming problems in assembly language. Writing and using macros. Features of modern computer hardware and operating systems.
Offered Fall, Spring

CSC 251. C Language Programming and Unix. (3 Units)

Prerequisite: CSC 121. Introduction to programming in the C language and its use in systems programming in the UNIX operating system.
Offered Fall, Spring

CSC 255. Dynamic Web Programming. (3 Units)

The goal of the course is to provide instruction to the design and implementation of dynamic web applications. Topics include origins of Internet, TCP/IP basics, Standard Generalized Markup Language SGML, XML and XSL languages, client-side and server-side languages: Perl and PHP; interactivity in website design, front-end interface to databases, website access control, confidentiality, integrity, accessibility and their applicability in developing dynamic and distributed client/server web applications.
Offered All terms, Fall, Spring

CSC 281. Discrete Structures. (3 Units)

This course introduces fundamental structures and logical principles that form the foundation of computer science. Topics will be introduced with emphasis on applications in computer science. Students will be required to write programs to deepen their understanding about the topics.
Offered Fall, Spring

CSC 295. Sel. Topics in Computer Sci. (1-4 Units)

Prerequisite: Consent of Instructor. Content varies. Topics in computer science not covered by current course offerings. May be used for elective credit in departmental programs. Subject to approval.
Offered As needed

CSC 300. Software Development. (3 Units)

Prerequisites: CSC 123 is required. This is an advanced Java programming course. Students are expected to have a much deeper understanding about major aspects of Java and OOP, and significantly enhance their programming and problem-solving ability. Several data structure and algorithms will be introduced.
Offered Fall, Spring

CSC 301. Computers And Society. (3 Units)

Prerequisites: CSC 101 or CSC 111 or CSC 115 or CSC 121 or CSC 272 or consent of instructor. Ethical, legal, psychological, economic, and theoretical implications and limitations of the uses of digital computers. Oral and written presentations required.
Offered Fall, Spring

CSC 311. Data Structures. (3 Units)

Prerequisites: CSC 123 and CSC 281 or MAT 281. More advanced and detailed treatment of concepts of data organization introduced in CSC 123. Includes lists, trees, graphs and storage allocation and collection. Applications to such areas as symbol tables, string search and optimization.
Offered Fall, Spring, Summer

CSC 321. Programming Languages. (3 Units)

Prerequisite: CSC 123. A comparative study of programming languages. Characteristics of languages and formal description of languages. Assignments in several languages.
Offered Fall, Spring

CSC 331. Computer Organization. (3 Units)

Prerequisites: CSC 221 and MAT 281. Structure of the modern digital computer. Introduction to Boolean algebra and design of digital circuits. Arithmetic, control, storage and input/output systems.
Offered Fall, Spring, Summer

CSC 337. Microcomputers. (3 Units)

Prerequisite: CSC 221, CSC 331, and MAT 281. The architecture, programming and interfacing of microcomputers. Topics include input/output, instruction sets, subroutines, interrupts and control. In-class use of microcomputer hardware. Repeatable course. Two hours of lecture and three hours of laboratory per week.
Offered Infrequent

CSC 341. Operating Systems. (3 Units)

Prerequisites: CSC 311, CSC 331, and MAT 321. Overall structure of batch and time-shared operating systems. Scheduling of jobs, CPU and I/O devices. Paged and segmented memory management. I/O programming and file handling. Synchronization of concurrent processes.
Offered Fall, Spring

CSC 353. File Processing. (3 Units)

Prerequisite: CSC 123 and CSC 251 are required; CSC 311 is recommended. Characteristics of secondary storage media. Logical vs. physical organization. Sequential, direct, and indexed access methods. Tree structure of indices; hashing.
Offered Infrequent

CSC 361. Systems Programming. (3 Units)

Prerequisite: CSC 311, CSC 331, and CSC 341. Design and construction of systems programs such as assemblers, macro processors and linking loaders. Introduction to software engineering.
Offered As needed

CSC 371. Finite Automata. (3 Units)

Prerequisite(s): CSC 311 is required. Introduces the formal foundations of computer science, the limits of computation, and the limits of efficient computation. The goal is to provide computer science students with a broad understanding of various models of computation and their power.
Offered Fall, Spring, Summer

CSC 395. Sel Topics in Computer Science. (1-4 Units)

Prerequisite: Consent of Instructor and upper division standing in major. Content varies. Advanced topics in computer science not covered by current course offerings. May be used for elective credit in departmental programs. Subject to approval.
Offered As needed

CSC 401. Analysis Of Algorithms. (3 Units)

Prerequisite: CSC 311. Mathematical study of non-numeric computer algorithms. Topics include combinatorial techniques, algorithm proof, and program complexity.
Offered Fall, Spring

CSC 411. Artificial Intelligence. (3 Units)

Prerequisites: CSC 311 and CSC 321. Introduction to the use of computers to simulate intelligent behavior; includes game playing, problem solving, use of natural languages and pattern recognition.
Offered Fall

CSC 421. Advanced Programming Languages. (3 Units)

Prerequisites: CSC CORE. Continuation of CSC 321. Methods of formal specification of syntax and semantics of programming languages and special purpose language features for such areas as simulation and systems programming.
Offered Infrequent

CSC 431. Advanced Computer Organization. (3 Units)

Prerequisites: CSC 221, CSC 331, CSC 341, MAT 271, and MAT 281. Alternate computer architectures and features of large scale systems. Microprogramming, parallel processing, memory organization, input/output systems, interprocessor communications and multiprocessing.
Offered Infrequent

CSC 441. Advanced Operating Systems. (3 Units)

Prerequisite: CSC CORE. Theoretical study of important topics in operating system design. Substantial individual and group programming projects.
Offered Infrequent

CSC 451. Computer Networks. (3 Units)

Prerequisite: CSC 311 and MAT 281. An introduction to computer networks including both long haul and local area networks. Topics include network topology, network access methodology, transmission media, protocols and applications.
Offered Fall, Spring

CSC 453. Data Management. (3 Units)

Prerequisite: CSC 311. Fundamental concepts in design, analysis and implementation of computerized database systems. Database models, user and program interfaces and database control.
Offered Fall, Spring

CSC 455. WWW Design and Management. (3 Units)

Prerequisites: CSC 251, CSC 311 and CSC 321. An introduction to the design, implementation and management of World Wide Web over the Internet and Intranet networks. Topics include Internet overview, web authoring, web programming, server setting and maintenance.
Offered Infrequent

CSC 459. Security Engineering. (3 Units)

The goal of the course is to provide introduction to the design, implementation and management of systems that remain dependable in the face of malice, error or mischance. Topics include the tools, processes and methods needed to design, implement and test complete systems and to adapt existing systems as their environment evolves. Specifically, it includes cryptography, privacy, hardware tamper resistance, firewalls, intrusion detection and prevention and security policies.
Offered Fall, Spring

CSC 461. Computer Graphics I. (3 Units)

Prerequisite: CSC 311. Fundamental concepts of programming for computer graphics. Graphics devices, languages and algorithms. Substantial graphics programming projects.
Offered Spring

CSC 463. Computer Graphics II. (3 Units)

Prerequisite: CSC 461. Advanced topics in computer graphics. Interactive graphics, animation, color and three dimensional modeling.
Offered Infrequent

CSC 471. Compiler Construction I. (3 Units)

Prerequisites: CSC 221, CSC 311 and MAT 361. Introduction to the theory and practice of compiler construction. Overall structure of compilers. Lexical and syntactic analysis, code generation for block structured languages and code optimization.
Offered Infrequent

CSC 481. Software Engineering. (3 Units)

Prerequisites: CSC 301, CSC 311 and CSC 321. Introduction to software engineering, with emphasis on software design and specification. Oral and written presentations required.
Offered Fall, Spring

CSC 490. Senior Seminar. (3 Units)

Prerequisite: CSC 301, CSC 311 and CSC 321. Intense, structured seminar. Exposure to current areas of research in Computer Science. Students will attend department colloquia; conduct research; present individual and group projects; and, prepare a written proposal for a senior project.
Offered Infrequent

CSC 492. Senior Design. (3 Units)

Prerequisites: CSC 301, CSC 321 and CSC 481. Intensive study under the guidance of a member of the Computer Science faculty which continues and expands the research carried out in Senior Seminar. Students will study system design and total project planning and management. A formal written report and oral presentation are required.

Offered Fall, Spring, Summer

CSC 495. Selected Topics. (3 Units)

Prerequisite: CSC 311 is required. Content varies. Advanced topics in computer science not covered by current course offerings. May be used for elective credit in departmental programs. Subject to approval.

Offered Fall, Spring

CSC 497. Directed Study In Computer Science. (1-3 Units)

Prerequisite: CSC CORE or consent of instructor. A project in computer science carried out on an independent study basis. Repeatable course.

Offered Infrequent

CSC 498. Directed Research. (1-3 Units)

Offered Infrequent

CSC 500. Research Methods. (3 Units)

Prerequisite: Graduate standing and consent of instructor. Series of lectures given by faculty and visiting computer scientists.

Offered Summer

CSC 501. Design and Analysis of Algorithms. (3 Units)

Prerequisite: CSC 401. Methods for the design of efficient algorithms: divide and conquer, greedy method, dynamic programming, backtracking, branch and bound, problem in string matching, polynomials and matrices, graph theory, NP-problems.

Offered Fall, Spring, Summer

CSC 511. Artificial Intelligence and Expert Systems. (3 Units)

Prerequisite: CSC 411. Introduction to in-depth engineering approach to the field of artificial neural networks. Topics include different types of network architectures and applications, and their properties and behavior.

Offered Fall

CSC 521. Fundamentals and Concepts of Programming Languages. (3 Units)

Prerequisite: CSC 321. Study of the principles that form the basis of programming language design. Research topics in high-level languages including: data abstraction, parameterization, scoping, generics, exception handling, parallelism and concurrency; alternative language designs; imperative, functional, descriptive, object-oriented and data flow; overview of interface with support environments.

Offered Spring

CSC 531. Advanced Computer Architecture. (3 Units)

Prerequisite: CSC 331. Covering new technological developments, including details of multiprocessor systems and specialized machines. The main focus is on the quantitative analysis and cost-performance tradeoffs in instruction-set, pipeline, and memory design. Description of real systems and performance data are also presented. Topics covered: quantitative performance measures, instruction set design, pipeline, vector processing, memory organization, input/output, and an introduction to parallel processing.

Offered Fall even

CSC 541. Advanced Operating Systems. (3 Units)

Prerequisite: CSC 341. Theoretical and practical aspects of operating systems: overview of system software, time-sharing and multiprogramming operating systems, network operating systems and the Internet, virtual memory management, inter-process communication and synchronization, file organization, and case studies. Giving advanced topics and examples, and simulation techniques used in performance evaluation.

Offered Fall

CSC 546. Human Computer Interaction and Interface Design. (3 Units)

Prerequisite: CSC 481. Research-oriented course; in-depth analyses of selected current topics with emphasis on problems related to computer systems, artificial intelligence, and human computer information interaction and interface design.

Offered Spring

CSC 551. Data Communications and Computer Networks. (3 Units)

Prerequisite: CSC 451. Topics related to the development of client-server based application, including two-tiers and multi-tiers Client-Server concepts and programming. Concurrency issues in the design of client and server programs. Trade-off of different architectures and usage of remote procedure calls. Broadcasting and multicasting.

Offered Fall odd

CSC 552. Distributed Computing and Parallel Processing. (3 Units)

Prerequisites: CSC 451, CSC 401. Comprehensive introduction to the field of parallel and distributed computing systems: Algorithms, architectures, networks, systems, theory and applications. The distributed parallel computation models, design and analysis of parallel algorithms will be discussed.

Offered Infrequent

CSC 553. Advanced Database Management Systems. (3 Units)

Prerequisite: CSC 453. Provides an in-depth treatment of one or more advanced topics in the management of information systems. The field of information systems consists of three major components: information systems technology, information systems development and information systems management. Deals with the latter area. Because of the many advances in information technology and the corresponding development techniques, new business opportunities are constantly emerging and with them the need to manage these applications effectively. Explores these new application areas and the management approaches needed to make them successful.

Offered Spring odd

CSC 555. Information Assurance and Network Security. (3 Units)

Prerequisites: CSC 451, CSC 401 and/or consent of instructor. Topics related to communications and IT infrastructures, their vulnerabilities as well as the size and complexity of security threats faced by enterprises, development of security practices, policies, awareness and compliance programs, and legal and regulatory issues will be examined. Fundamental encryption algorithms and systems supported in today's IT and secure communications networks Virtual Private Networks, Tunneling, Secure Socket Layer, SSH, and PGP will also be examined.

Offered Spring even

CSC 561. Advanced Computer Graphics. (3 Units)

Prerequisite: CSC 461. Solid modeling Euler operators, finite element methods. Rendering: filling, shading, ray tracing. Natural modeling: L-systems, fractals. Image processing: filtering anti-aliasing, enhancement. Color: physics, graphics, physiology.

Offered Spring

CSC 564. Numerical Analysis. (3 Units)

Prerequisite: MAT 361. Topics include numerical solution of partial differential equations by finite difference and finite element algorithms. Focus on direct and iterative methods for solving large, sparse linear systems and related eigenvalue and vector problems. Emphasis is placed on robust mathematical software and its interaction with computer hardware and languages.

Offered Infrequent

CSC 565. Theory of Computation. (3 Units)

Prerequisites: CSC 401 and MAT 361. Models of computation, complexity theory, intractable problems, complete problems, recursive function theory, incompleteness, formal theory of program semantics and correctness, logics of programs.

Offered Infrequent

CSC 581. Advanced Software Engineering. (3 Units)

Prerequisite: CSC 481. This course focuses on defining software requirements and provides an overview of advanced analysis and design techniques that can be used to structure applications. Topics of software requirements include interacting with end-users to determine needs and expectations, identifying functional requirements and identifying performance requirements. Analysis techniques include prototyping, modeling and simulation. Design topics include design in the system lifecycle, hardware vs. software trade-offs, subsystem definition and design, abstraction, information hiding, modularity and reuse.

Offered Spring

CSC 582. Object-Oriented Analysis and Design. (3 Units)

Prerequisite: CSC 481. Object-oriented analysis and design is essential in developing high-quality object-oriented systems. Topics will include object-oriented classes, attributes, methods and relations to other classes, objects, classifications and inheritance, encapsulation, polymorphism, object-oriented analysis, design and programming.

Offered Fall

CSC 583. Software Engineering Processes. (3 Units)

Prerequisite: CSC 581. The course focuses on the engineering of complex systems that have a strong software component. Topics include deriving and allocating requirements, system and software architectures, system analysis and design, integration, interface management, configuration management, quality, verification and validation, reliability, and risk.

Offered Fall

CSC 584. Software Project. (3 Units)

Prerequisite: CSC 581. The main topics of this course address the successful management of a software development project. This includes planning, scheduling, tracking, cost and size estimating, risk management, quality engineering, and process improvement. The course is centered on the concept of a software engineering process and includes discussion of life cycle models for software development.

Offered Spring

CSC 585. Advanced Software Quality Assurance. (3 Units)

Prerequisite: CSC 581. The relationship of software testing to quality is examined with an emphasis on testing techniques and the role of testing in the validation of system requirements. Topics include module and unit testing, integration, code inspection, peer reviews, verification and validation, statistical testing methods, preventing and detecting errors, selecting and implementing project metrics and defining test plans and strategies that map to system requirements. Testing principles, formal models of testing, performance monitoring and measurement also are examined.

Offered Fall odd

CSC 590. Master's Project. (3 Units)

Prerequisite: Graduate standing and consent of the graduate adviser. Offered on the letter-grade basis only. The equivalent of three lecture hours a week.

Offered Fall, Spring

CSC 594. Independent Study. (3 Units)

Prerequisites: Graduate standing and consent of instructor. Individual studies in advanced computer science and technology.

Offered Infrequent

CSC 595. Special Topics in Computer Science. (3 Units)

Prerequisite: Graduate standing and consent of instructor. Exposes students to new and emerging concepts and technologies

Offered Infrequent

CSC 597. Directed Reading. (3 Units)

Offered As needed

CSC 599. Master's Thesis. (3 Units)

Prerequisite: Graduate standing and consent of the graduate adviser. Computer research writing of thesis for a master's degree. CR/NC grading.

Offered Fall, Spring

CSC 600. Graduate Continuation Course. (1 Units)

Prerequisite: Signature of graduate program coordinator required. Graduate students, who have completed their course work but not their thesis, project, or comprehensive examination, or who have other requirements remaining for the completion for their degree, may attain continuous enrollment by enrolling in this course.

Offered Fall, Spring

Computer Science, Bachelor of Science

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major, no minor required.

Major Requirements (76 units)

Students entering the Computer Science program must complete the following.

1. Earn an overall grade point average of 2.0 or better in courses taken outside of the department.

- Earn a grade of "C" or better in each course taken within the department.
- Earn a grade of "C" or better in all direct and indirect prerequisite courses listed in the catalog before advancing to the next level course in a sequence for English, Mathematics, and Science courses.
- Students must take capstone course CSC 492 Senior Design at CSUDH.

The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

| Code | Title | Hours |
|---|---|-------|
| Lower Division Requirements | | |
| CSC 121 | Introduction to Computer Science and Programming I ¹ | 4 |
| CSC 123 | Introduction to Computer Science and Programming II | 4 |
| CSC 221 | Assembly Language and Introduction to Computer Organization | 3 |
| CSC 2xx | | 3 |
| MAT 191 | Calculus I | 5 |
| MAT 193 | Calculus II | 5 |
| MAT 271 | Foundations Of Higher Math | 3 |
| MAT 281 | Discrete Mathematics | 3 |
| PHY 130 | General Physics I | 5 |
| PHY 132 | General Physics II | 5 |
| Upper Division Requirements ² | | |
| Core Requirements: | | |
| CSC 311 | Data Structures | 3 |
| CSC 321 | Programming Languages | 3 |
| CSC 331 | Computer Organization | 3 |
| CSC 341 | Operating Systems | 3 |
| Required Courses: | | |
| CSC 301 | Computers and Society | 3 |
| CSC 401 | Analysis of Algorithms | 3 |
| CSC 481 | Software Engineering | 3 |
| CSC 492 | Senior Design | 3 |
| MAT 321 | Probability and Statistics | 3 |
| MAT 361 | Finite Automata | 3 |
| Electives | | |
| Select two courses from the following: | | 6 |
| CSC 395 | Sel Topics in Computer Science | |
| CSC 411 | Artificial Intelligence | |
| CSC 421 | Advanced Programming Languages | |
| CSC 431 | Advanced Computer Organization | |

| CSC 490 | Senior Seminar | |

| | |
|--------------------|-----------------------|
| CSC 495 | Selected Topics: |
| MAT 367 | Numerical Analysis I |
| MAT 369 | Numerical Analysis II |
| Total Hours | 76 |

¹ Major students may substitute this course for General Education Area A3. Please contact the CNBS Student Success Center to request the course substitution.

² A minimum of 18 upper division units in the major must be taken in residence at CSU Dominguez Hills.

Program Learning Outcome

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
- Apply computer science theory and software development fundamentals to produce computing-based solutions.

4- Year Roadmap

| | | |
|------------------------------------|---|--------------|
| First Year | | |
| Fall | | Hours |
| CSC 121 | Introduction to Computer Science and Programming I | 4 |

Notes:

1. Adequate preparation in terms of the completion of all lower division courses which are prerequisites of courses for this certificate is necessary.
2. At least four of the six upper division courses must be taken at CSU Dominguez Hills.
3. None of the upper division courses may be taken as credit/no credit.
4. A minimum grade point average of 2.0 is required for all units taken for the certificate.

- 1.

Computer Science, Master of Science

The Master's Program in Computer Science is a two-year program in which a student must complete a required core of courses and additional concentration and general computer science elective courses. The curriculum for the Master of Science in Computer Science requires 36 semester credit units, and offers both a thesis option (30 semester credit units of coursework and 6 semester units of a thesis) and a non-thesis option (33 semester credit units of coursework and 3 semester credit units of a project). Students may choose to obtain the degree in Computer Science with specialization in Software Engineering or Distributed Systems and Networking.

The academic program is expected to culminate in a master's thesis or project. During the first semester of the program, the student should choose a major advisor who will assist him or her in the choice of elective courses. The major advisor will chair the student's advisory committee for the thesis. Two additional members of the student's graduate advisory committee will need to be selected.

The graduate program can provide a strong background for future study in a doctoral program. It also provides graduate training as preparation for professional applications. Students with a master's degree in computer science are also prepared for a career in teaching and/or research.

A majority of graduate classes are scheduled to accommodate late afternoon and evening students.

Admission Requirements

Students holding a Bachelor's degree in Computer Science are accepted as graduate students, provided they meet the general requirements stated below.

Applicants **not** holding a degree in Computer Science are also accepted as graduate students, provided they meet the general requirements and successfully complete the leveling courses described below.

General requirements for graduate study in Computer Science are as follows:

- An undergraduate degree from an accredited higher education institution.
- A minimum GPA of 2.75 on a 4.0 scale.
- A minimum TOEFL score of 90 or ITLES score of 6.5 (for applicants whose native language is not English).
- A minimum Graduate Examination (GRE) General Test score of 293 (combined verbal and quantitative); for more information refer to: www.gre.org (<https://www.ets.org/gre/>)

A student with a Bachelor of Science in Computer Science, with a GPA greater than 2.44 but less than 2.75 and/or a GRE score below 191 may first receive conditionally classified admission to the MS degree program. A conditionally classified student has one year to receive a minimum GRE score of 900 and a minimum GPA of 3.0 to change status to classified graduate student.

A student with a Bachelor's degree in a discipline other than Computer Science must possess a computer science background equivalent to the following CSUDH courses:

| Code | Title | Hours |
|--|-----------------------|-------|
| CSC 321 | Programming Languages | 3 |
| CSC 331 | Computer Organization | 3 |
| CSC 311 | Data Structures | 3 |
| MAT 281 | Discrete Mathematics | 3 |
| CSC 341 | Operating Systems | 3 |
| MAT 361 | Finite Automata | 3 |
| Proficiency in a programming language ¹ | | |

¹ or CSC 123 Introduction to Computer Science and Programming II.

A student without this background must enroll in these leveling courses before being accepted as a regular student in the graduate Computer Science program. Successful completion in these courses means a grade of C or better in each leveling course.

Students entering the master's program must maintain a grade of no less than B in any course for their continuation in this program. Final decision on admission to the graduate program is made by the Computer Science Graduate Committee.

Admission Procedures

Prospective graduate students must:

1. Submit an application to the University for admission (or readmission) with graduate standing, and official transcripts of all previous college work following the procedures outlined in the Admissions section of the University Catalog.
2. Submit to the Computer Science Graduate Program Coordinator:
3. a second set of official transcripts;
4. a letter to the department describing interests, goals and expectations in pursuing the master's degree in computer science;
5. three letters of recommendation sent directly from individuals who can evaluate potential for graduate study;
6. verification of a minimum GRE General Test score of 900 (combined verbal and quantitative) before the student has completed 9 semester units.

Graduate Standing: Conditionally Classified

To qualify for admission with a graduate degree objective, students must meet the admission requirements for post-baccalaureate standing as well as any additional requirements of the particular program. Students who apply to a graduate degree program but who do not satisfy all program requirements may be admitted to conditionally classified status. Program coordinators will outline all conditions for attainment of classified status.

Graduate Standing: Classified

Students applying for master's degree programs will be admitted in classified status if they meet all program admission requirements.

Classified standing as a graduate student is granted by the academic unit to which the student is applying. Classified standing is normally granted when all prerequisites have been satisfactorily completed for admission to a master's degree program. Students must have classified standing to qualify for Advancement to Candidacy.

Graduation Writing Assessment Requirement

All graduate students entering the University in the Fall of 1983 or thereafter are required to satisfy the Graduation Writing Assessment Requirement (GWAR) in accordance with the established policies of the university. Students must satisfy the requirements before being advanced to Candidacy. (See "Graduation Writing Assessment Requirement (<https://catalog.csudh.edu/general-information/graduate-writing-examination/>)" section of the University Catalog.

Advancement to Candidacy

Advancement to candidacy recognizes that the student has demonstrated the ability to sustain a level of scholarly competency commensurate with successful completion of degree requirements. Upon advancement to candidacy, the student is cleared for the final stages of the graduate program which, in addition to any remaining course work, will include the thesis or project.

Following are the requirements for Advancement to Candidacy:

1. A minimum of 15 resident units;
2. Classified standing;
3. An approved Program of Study;
4. Successful completion of GWAR;
5. A cumulative GPA of 3.0 in all courses taken as a graduate student;
6. No grade lower than a "B" in the degree program.

Advancement to Candidacy must be certified on the appropriate form to the Graduate Dean by the department prior to the final semester, prior to enrolling in the thesis or project.

Admission Requirements

Students holding a Bachelor's degree in Computer Science are accepted as graduate students, provided they meet the general requirements stated below.

Applicants **not** holding a degree in Computer Science are also accepted as graduate students, provided they meet the general requirements and successfully complete the leveling courses described below.

General requirements for graduate study in Computer Science are as follows:

- An undergraduate degree from an accredited higher education institution.
- A minimum GPA of 2.75 on a 4.0 scale.
- A minimum TOEFL score of 90 or ITLES score of 6.5 (for applicants whose native language is not English).
- A minimum Graduate Examination (GRE) General Test score of 293 (combined verbal and quantitative); for more information refer to: www.gre.org (<https://www.ets.org/gre/>)

A student with a Bachelor of Science in Computer Science, with a GPA greater than 2.44 but less than 2.75 and/or a GRE score below 191 may first receive conditionally classified admission to the MS degree program. A conditionally classified student has one year to receive a minimum GRE score of 900 and a minimum GPA of 3.0 to change status to classified graduate student.

A student with a Bachelor's degree in a discipline other than Computer Science must possess a computer science background equivalent to the following CSUDH courses:

| Code | Title | Hours |
|--|-----------------------|-------|
| CSC 321 | Programming Languages | 3 |
| CSC 331 | Computer Organization | 3 |
| CSC 311 | Data Structures | 3 |
| MAT 281 | Discrete Mathematics | 3 |
| CSC 341 | Operating Systems | 3 |
| MAT 361 | Finite Automata | 3 |
| Proficiency in a programming language ¹ | | |

¹ or CSC 123 Introduction to Computer Science and Programming II.

A student without this background must enroll in these leveling courses before being accepted as a regular student in the graduate Computer Science program. Successful completion in these courses means a grade of C or better in each leveling course.

Students entering the master's program must maintain a grade of no less than B in any course for their continuation in this program. Final decision on admission to the graduate program is made by the Computer Science Graduate Committee.

Admission Procedures

Prospective graduate students must:

1. Submit an application to the University for admission (or readmission) with graduate standing, and official transcripts of all previous college work following the procedures outlined in the Admissions section of the University Catalog.
2. Submit to the Computer Science Graduate Program Coordinator:
3. a second set of official transcripts;
4. a letter to the department describing interests, goals and expectations in pursuing the master's degree in computer science;
5. three letters of recommendation sent directly from individuals who can evaluate potential for graduate study;
6. verification of a minimum GRE General Test score of 900 (combined verbal and quantitative) before the student has completed 9 semester units.

Graduate Standing: Conditionally Classified

To qualify for admission with a graduate degree objective, students must meet the admission requirements for post-baccalaureate standing as well as any additional requirements of the particular program. Students who apply to a graduate degree program but who do not satisfy all program requirements may be admitted to conditionally classified status. Program coordinators will outline all conditions for attainment of classified status.

Graduate Standing: Classified

Students applying for master's degree programs will be admitted in classified status if they meet all program admission requirements.

Classified standing as a graduate student is granted by the academic unit to which the student is applying. Classified standing is normally granted when all prerequisites have been satisfactorily completed for admission

to a master's degree program. Students must have classified standing to qualify for Advancement to Candidacy.

Graduation Writing Assessment Requirement

All graduate students entering the University in the Fall of 1983 or thereafter are required to satisfy the Graduation Writing Assessment Requirement (GWAR) in accordance with the established policies of the university. Students must satisfy the requirements before being advanced to Candidacy. (See "Graduation Writing Assessment Requirement (p. 112)" section of the University Catalog.

Advancement to Candidacy

Advancement to candidacy recognizes that the student has demonstrated the ability to sustain a level of scholarly competency commensurate with successful completion of degree requirements. Upon advancement to candidacy, the student is cleared for the final stages of the graduate program which, in addition to any remaining course work, will include the thesis or project.

Following are the requirements for Advancement to Candidacy:

1. A minimum of 15 resident units;
2. Classified standing;
3. An approved Program of Study;
4. Successful completion of GWAR;
5. A cumulative GPA of 3.0 in all courses taken as a graduate student;
6. No grade lower than a "B" in the degree program.

Advancement to Candidacy must be certified on the appropriate form to the Graduate Dean by the department prior to the final semester, prior to enrolling in the thesis or project.

Requirements

Thesis Option

| Code | Title | Hours |
|----------------------------|--|-----------|
| Graduate Coursework | | |
| CSC 500 | Research Methods | 3 |
| CSC 501 | Design and Analysis of Algorithms | 3 |
| CSC 521 | Fundamentals and Concepts of Programming Languages | 3 |
| CSC 581 | Advanced Software Engineering | 3 |
| CSC 584 | Software Project | 3 |
| Elective graduate courses | | 15 |
| Master's Thesis | | |
| CSC 599 | Master's Thesis | 6 |
| Total Hours | | 36 |

Non-Thesis Option

| Code | Title | Hours |
|----------------------------|--|-------|
| Graduate Coursework | | |
| CSC 500 | Research Methods | 3 |
| CSC 501 | Design and Analysis of Algorithms | 3 |
| CSC 521 | Fundamentals and Concepts of Programming Languages | 3 |
| CSC 581 | Advanced Software Engineering | 3 |

| | | |
|---------------------------|------------------|-----------|
| CSC 584 | Software Project | 3 |
| Elective graduate courses | | 18 |
| Master's Project | | |
| CSC 590 | Master's Project | 3 |
| Total Hours | | 36 |

Tracks

Students may choose to obtain the degree specializing in either Software Engineering (SE) or in Distributed Systems and Networking (DSN) tracks.

Software Engineering (SE) Track

| Code | Title | Hours |
|--------------------|---|-----------|
| CSC 541 | Advanced Operating Systems | 3 |
| CSC 546 | Human Computer Interaction and Interface Design | 3 |
| CSC 582 | Object-Oriented Analysis and Design | 3 |
| CSC 583 | Software Engineering Processes | 3 |
| CSC 585 | Advanced Software Quality Assurance | 3 |
| Total Hours | | 15 |

Distributed Systems Networking (DSN) Track

| Code | Title | Hours |
|--------------------|---|-----------|
| CSC 531 | Advanced Computer Architecture | 3 |
| CSC 541 | Advanced Operating Systems | 3 |
| CSC 551 | Data Communications and Computer Networks | 3 |
| CSC 552 | Distributed Computing and Parallel Processing | 3 |
| CSC 555 | Information Assurance and Network Security | 3 |
| Total Hours | | 15 |

Elective Graduate Courses

| Code | Title | Hours |
|---------|---|-------|
| CSC 511 | Artificial Intelligence and Expert Systems | 3 |
| CSC 531 | Advanced Computer Architecture | 3 |
| CSC 541 | Advanced Operating Systems | 3 |
| CSC 546 | Human Computer Interaction and Interface Design | 3 |
| CSC 553 | Advanced Database Management Systems | 3 |
| CSC 551 | Data Communications and Computer Networks | 3 |
| CSC 552 | Distributed Computing and Parallel Processing | 3 |
| CSC 555 | Information Assurance and Network Security | 3 |
| CSC 561 | Advanced Computer Graphics | 3 |
| CSC 564 | Numerical Analysis | 3 |
| CSC 565 | Theory of Computation | 3 |
| CSC 582 | Object-Oriented Analysis and Design | 3 |
| CSC 583 | Software Engineering Processes | 3 |
| CSC 585 | Advanced Software Quality Assurance | 3 |
| CSC 594 | Independent Study | 3 |
| CSC 595 | Special Topics in Computer Science | 3 |

Notes:

1. General Computer Science:
 - a. Thesis Option: select 5 courses (15 units) from the list of elective courses;
 - b. Non-Thesis Option: select 6 courses (18 units) from the list of elective courses.
2. Software Engineering or Distributed Systems Networking tracks:

- a. No double counting of electives;
- b. Thesis Option: select 1 course (3 units) from the list of elective courses;
- c. Non-Thesis Option: select 2 courses (6 units) from the list of elective courses
 - a.

Program Learning Outcomes

1.

Computer Science, Minor

Requirements

| Code | Title | Hours |
|---|---|-------|
| Lower Division Required Courses | | |
| CSC 121 | Introduction to Computer Science and Programming I | 4 |
| CSC 123 | Introduction to Computer Science and Programming II | 4 |
| CSC 221 | Assembly Language and Introduction to Computer Organization | 3 |
| MAT 191 | Calculus I | 5 |
| MAT 193 | Calculus II | 5 |
| MAT 271 | Foundations Of Higher Math | 3 |
| MAT 281 | Discrete Mathematics | 3 |
| Upper Division Required Courses | | |
| CSC 311 | Data Structures | 3 |
| Select two courses from the following, one of which must have a CSC prefix: 6 | | |
| CSC 321 | Programming Languages | |
| CSC 331 | Computer Organization | |
| CSC 341 | Operating Systems | |
| CSC 395 | Sel Topics in Computer Science | |
| CSC 401 | Analysis of Algorithms | |

Total Hours 36

Computer Technology

College of Natural and Behavioral and Sciences
Department of Computer Science

Program Description

Computer Technology forms the technological infrastructure of modern commerce. It's the driving force of every industry and permeates everyday life. The ability to combine the power of computing with the management of multimedia information is arguable the key to obtaining ascendancy in any field.

Computer Technology is an ever-evolving, expanding field. The proposed Computer Technology Program will provide students with the background, knowledge and skills they'll need to adapt to the dynamic nature of the marketplace. Program faculty will consist of traditional academics as well as industry professionals in order to provide curricular content that is on the cutting edge of industry trends.

The BACT degree provides a high-quality degree program in computer technology that will prepare students for lifelong learning as they pursue professional careers in computer technology and leadership roles in the society in which they serve. It provides our students with a strong foundational base, state-of-the-art techniques, methodologies, and tools to specify, design, and develop technology-based solutions to complex system problems. This program prepares our students to communicate well, both orally and in writing, on moral and ethical development, in the knowledge of the liberal arts, and commitment to services to others. CT provides opportunities for students to contribute to the body of knowledge that serves the profession, by engaging in activities that support their interests and are in agreement with the goals and objectives of the College, and the university.

Features

The University's location in the South Bay area of greater Los Angeles provides direct access to many major government contractors, manufacturers, and international centers of commerce and finance. This provides excellent opportunities for work-study and early job placement.

Our highly qualified full-time faculty are supplemented by talented and dedicated part-time faculty drawn from local firms and schools. Good teaching and easy on-campus access to professional quality computing systems enhance a degree program with a solid core curriculum and a broad range of electives.

All courses are offered alternatively day and evening so that students may complete their programs by enrolling at either time exclusively.

Graduation with Honors

An undergraduate student may be a candidate for graduation with Honors in Computer Technology provided he or she meets the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills at least 24 of which taken in Computer Technology major;
2. A minimum GPA of 3.5 in all upper-division courses in the Computer Technology major completed in residence at CSUDH.

Students who achieve Honors in Computer Technology will have the information recorded on their transcripts and diplomas.

Academic Advisement

Faculty guidance in the development of career goals and program planning to achieve those goals is available to all majors.

Preparation

Students entering the computer technology program should have completed high school mathematics through trigonometry. Remediation is available but will delay the student's progress towards a Computer Technology Degree.

This is a program that places a premium on the student's initiative and effort.

Student Organizations

Contact the departmental office for membership information, or visit the websites:

Association for Computing Machinery (ACM) ACM@csudh.edu
 Institute of Electrical and Electronics Engineers (IEEE) IEEE@csudh.edu
 Cyber Security CyberSec@csudh.edu
 Computing Alliance of Hispanic-Serving Institutions (CAHSI)
 CAHSI@csudh.edu

Career Possibilities

Bachelor of Arts in Computer Technology is a comprehensive program that will consist of the following tracks: General Track, Homeland Security, and Professional. This program is intended to provide students with the technology-based skills set required immediately after degree completion to enter the workforce within the following areas related to computer technology: Manufacturing, Repair, troubleshooting, Lab technician, Public Service, Government Agencies, Consultants, Software Version Control, Domain Expert Technician, and other computer/software technology-related fields. Feedback from our Industry Advisory Board members indicates the need for professionals with a balance of practical and theoretical knowledge that extends beyond conventional information technology curricula.

Undergraduate Programs

Bachelor

- Computer Technology, Bachelor of Arts (p. 492)

Minor

- Computer Technology, Minor (p. 496)

Certificate

- Computer Technology, Certificate (p. 496)

Faculty

Mohsen Beheshti, Department Chair

Jianchao (Jack) Han, Marek Suchenek, Bin Tang, Amlan Chatterjee, Liudong Zuo, Alireza Izaddoost, Brad Hollister, Khondaker Salehin, Ali (Ashkan) Jalooli, Sanaz Rahimi Moosavi, Sahar Hooshmand

Emeriti Faculty

William B. Jones, Kazimierz Kowalski

Staff

Violeta Diaz, Administrative Assistant
 Ken Leyba, IT Consultant
 Department Office: NSM A-132, (310) 243-3398

Courses

CTC 195. Special Topics. (1-3 Units)

Topics in computer technology not covered by current course offerings. May be used for elective credit in departmental programs. Subject to approval.

Offered As needed

CTC 218. Digital Logic Design. (3 Units)

Provides students with a basic understanding of digital device and circuit fundamentals. The students should be able to analyze and design both combinational and sequential circuits after completing this course.

Offered Fall, Spring

CTC 228. Introduction to Operating Systems and Networks. (4 Units)

Course acquaints students with basic networking concepts such as TCP/IP, local/wide area networking as well as emerging industry topics such as Radio Frequency Identification (RFID), Global Information Systems (GIS), Networked Attached Storage (NAS), and WiMAX.

Offered Fall, Spring

CTC 295. Special Topics. (1-3 Units)

Topics in computer technology not covered by current course offerings. May be used for elective credit in departmental programs. Subject to approval.

Offered As needed

CTC 305. Introduction to Game and Mobile Programming. (3 Units)

This course teaches students through lectures, discussions, demonstrations, and classroom labs. Students learn the knowledge, skills, and abilities necessary to create games in the C# programming language using the Microsoft XNA framework and Silver light.

Offered Fall

CTC 310. Software Project Management. (3 Units)

Course will focus on the critical aspects of project management, including software project management concepts and case studies, and discuss software project management roadmap, and especially address linear, incremental, iterative, adaptive and extreme effective software project management from the perspectives of project scoping, planning, launching, monitoring, controlling and closing phases.

Offered Fall, Spring

CTC 316. Operating Systems and Networks Support. (3 Units)

Course provides an introduction to OS and networking support. Topics include user engineering, risk management, mission assurance, software process management, enterprise management tools and processes, disaster recovery, business continuity and information life cycle management.

Offered Fall, Spring

CTC 328. Computer Forensics and Investigation. (4 Units)

Course presents methods to properly conduct a computer forensics investigation, beginning with a discussion of ethics while mapping to the objectives of the International Association of Computer Investigative Specialists (IACIS) certification.
Offered Fall, Spring

CTC 362. Communication Systems Security. (3 Units)

Course provides the foundation for understanding the key issues associated with protecting information assets, determining the levels of protection and response to security incidents, and designing a consistent, reasonable information security system, with appropriate intrusion detection and reporting features.
Offered Fall, Spring

CTC 385. Introduction to Programming. (3 Units)

Introduces computing practice first, and then the concept of programming using block-based and visual (drag-and-drop) programming language such as Scratch. Students will also be exposed to pseudocode and algorithm design.
Offered Fall, Spring, Summer

CTC 386. Computational Thinking and Programming. (3 Units)

Prerequisite: CTC 385 is required. Restricted to majors. Introduces computational thinking and problem-solving frameworks first, and then uses Python to teach programming concepts and problem-solving skills. Ethics in computing is also discussed.
Offered Fall, Spring, Summer

CTC 387. Computer Networks, Communication Devices and Methods. (4 Units)

Prerequisites: CTC 386 is required. Restricted to majors. Introduces computer system, network and communication devices first, and then introduces how to identify hardware and software failures, and use tools to perform diagnosis. Social and legal issues in computing, and pedagogy in computer science are also discussed.
Offered Fall, Spring, Summer

CTC 389. Data Structures and Software Design. (3 Units)

Prerequisite: CTC 387 is required. Restricted to majors. Introduces different data structures and algorithm design principles first, followed by different software design models. Advanced Python programming techniques are also discussed.
Offered Fall, Spring, Summer

CTC 395. Special Topics. (1-3 Units)

Advanced topics in computer technology not covered by current course offerings. May be used for elective credit in departmental programs. Subject to approval.
Offered As needed

CTC 399. IT Practicum. (3 Units)

The technology internship program allows students to gain hands on experience in a technology environment by spending one semester as an intern in the Information Technology Department at CSUDH. The Internship program provides students with the opportunity to gain technical experience related to their studies, and to prepare for future career opportunities. CR/NC grading
Offered Fall, Spring

CTC 405. Advanced Game Development. (3 Units)

Prerequisites: Prerequisites: CTC 305 or CSC 123 Students learn the advanced knowledge in game development including Skills, and the abilities necessary to create #D games on multiple platforms. The course includes lectures, discussions, demonstrations, and classroom labs.
Offered Spring

CTC 428. Operating Systems Security. (3 Units)

Prerequisites: CTC 316 is required. Course takes an in depth look at operating system security concepts and techniques. It examines theoretical concepts that make the world of security unique. Also, this course will adopt a practical hands-on approach when examining operating system security techniques.
Offered Fall, Spring

CTC 435. Fundamentals of Information Technology. (2 Units)

This course focuses on the introduction to Python programming language, handling data, database, operating systems, and network and security. Students are expected to gain significant theoretical knowledge of information technology, and know how to write Python programs. Restricted to students in the major.
Offered Fall, Spring, Summer

CTC 436. Fundamentals of Networking and Hardware. (2 Units)

This course focuses on the introduction of computer hardware systems, computer network, and wireless networking. Students who enroll and complete this course are expected to gain significant theoretical knowledge and hands-on experience of computer hardware and networking. Restricted to students in the major.
Offered Fall, Spring, Summer

CTC 437. Fundamentals of Information Security. (2 Units)

Introduces students to security, network monitoring and access control, malicious activity detection, cryptography and security function. Students who enroll and complete the course are expected to gain significant theoretical knowledge and hands-on experience of information security. Restricted to students in the major.
Offered Fall, Spring, Summer

CTC 452. Network Security and Hacking Prevention. (3 Units)

Prerequisite: CTC 228 or consent of instructor is required. Course takes an in depth look at network defense concepts and techniques. It examines theoretical concepts that make the world of networking unique. This course also adopts a practical hands-on approach when examining network defense techniques and strategies.
Offered Fall, Spring

CTC 454. Wireless Security & Forensics. (3 Units)

Examines fundamental topics in wireless technology in wireless technology, such as planning, designing, installing, securing, using tools, and forensics. Students will also examine the maintenance, security, and business applications for wireless Local Area Networks.
Offered Spring

CTC 456. Enterprise System Security. (3 Units)

Prerequisite: CTC 228 is required. Students learn to identify and fix enterprise level network vulnerabilities through the use of existing defense tools. Students also learn the essential skills and techniques needed to develop enterprise level network security skills to protect enterprise's information.
Offered Spring

CTC 458. Network Security Through Penetration Testing. (3 Units)

Prerequisite: CTC 228 is required. Students learn how to determine the feasibility of a particular set of attack vectors and identify higher-risk vulnerabilities. students learn through performing penetration tests against the setup environment using existing tools, techniques, and programming languages.
Offered Fall

CTC 492. Senior Project. (3 Units)

Intensive study under guidance of a member of the Computer Science Department to complete a project from start to end. Students will study system design and total project planning and management. A formal written report and oral presentation will be required.

Offered Fall, Spring

CTC 495. Special Topics. (1-3 Units)

Advanced topics in computer technology not covered by current course offerings. May be used for elective credit in departmental programs.

Subject to approval.

Offered Fall, Spring

CTC 496. Internship in Computer Technology. (3 Units)

Offered As needed

CTC 497. Directed Studies. (3 Units)

Software Project Management (CTC 310)

Offered As needed

Computer Technology, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major, no minor required.

Major Requirements (62-68 units)

Students entering the Computer Technology program must complete the following.

1. Earn an overall grade point average of 2.0 or better in courses taken outside of the department.
2. Earn a grade of "C" or better in each course taken within the department.
3. Students must take capstone course CTC 492 Senior Project at CSUDH.

The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

Core Requirements (34 units)

| Code | Title | Hours |
|------------------------------------|---|-----------|
| Lower Division Requirements | | |
| CSC 101 | Intro.to Computer Education | 3 |
| CSC 111 | Introduction to Computers and Basic Programming | 3 |
| CSC 116 | Introduction to Computer Hardware and Tools | 3 |
| CSC 255 | Dynamic Web Programming | 3 |
| MAT 131 | Elementary Statistics and Probability | 3 |
| MAT 153 | Pre-Calculus with Trigonometry with Lab | 4 |
| Upper Division Requirements | | |
| CSC 301 | Computers And Society | 3 |
| CTC 310 | Software Project Management | 3 |
| CTC 316 | Operating Systems and Networks Support | 3 |
| CTC 452 | Network Security and Hacking Prevention | 3 |
| CTC 492 | Senior Project | 3 |
| Total Hours | | 34 |

Tracks

General Track (62 units)

| Code | Title | Hours |

Specific Domain

Complete one of the following: 15-31

- Associate Degree
- Minor in another program
- Concentration courses- with the consultation of computer science department

Free Electives

Complete free elective courses 3-19

Total Hours 52-84

Program Learning Outcomes

- Analyze, design, implement, and evaluate a Technology related solution in areas such electronics, Manufacturing, Homeland Security, and etc. using appropriate tools.
- Work effectively as a team member in design, implementation, and use of software and hardware utilization.
- Communicate effectively through speaking, writing, and the use of presentation tools in describing the hardware and software specification.
- Appraise the impact of ethical issues and societal concerns about constant changes in hardware/software computer technology.

General Option Roadmaps

4- Year Roadmap

| Course | Title | Hours |
|---|---|-----------|
| First Year | | |
| Fall | | |
| MAT 131 | Elementary Statistics and Probability (GE Area B4) | 3 |
| HIS 101 | History Of United States | 3 |

Continuing & Professional Education Programs

Features

Programs offered through the College of Continuing and Professional Education (CCPE) are self-supporting and require tuition. For information on the fee and tuition schedules, please refer to the appropriate CCPE website.

Students should be advised that courses containing an "X" in their prefix may not meet University requirements for continuing student status. Undergraduate students may apply up to twenty-four (24) semester units earned through these programs to a baccalaureate degree with departmental approval. Graduate students may apply a maximum of nine (9) units to a graduate degree with departmental approval.

Undergraduate Programs

Certificates

- Alcohol and Drug Counseling, Certificate (p. 497)
- Assistive Technology, Specialist Certificate (p. 497)
- Communication Sciences and Disorders, Certificate (p. 497)
- Community College Teaching, Certificate (p. 498)
- Human Resources Management, Certificate (p. 499)
- Mediation and Conflict Resolution, Certificate (p. 500)
- Production and Inventory Control, Certificate (p. 500)
- Purchasing, Certificate (p. 500)
- Sport and Fitness Psychology, Certificate (p. 501)

Graduate Programs

Credential

- American Language and Culture Program (p. 497)
- Designated Subjects Adult Education, Teaching Credential (p. 499)

Faculty/Staff

Paul Richard, Assistive Technology Coordinator
 John Spruill, Coordinator, Communication Sciences and Disorders Program
 Carman Wimsatt, Community College Teaching Internship Coordinator
 Matthew Luckett, Humanities External Degree Coordinator
 Mark Muller, Orthotics and Prosthetics Coordinator
 Raul Guzman, Director, OSHA Training Education Center
 Milton Krivokuca (Interim), Quality Assurance Degree Coordinator
 Mark Cartiglia, Sport and Fitness Psychology Coordinator
 Fawn Supernaw, Coordinator, Lifelong Learning Programs and Extension Program Development Specialist
 Elena Christova, Director, Special Sessions
 Shirley Jones, Director, Degree and Certificate Partner Programs
 Elisabeth Legge, Director, Extension Programs

Continuing and Profession Education: EE-1300, (310) 243-3737
 Regular and adjunct faculty teach in the programs. This provides a good balance and mix of expertise. Each possesses the appropriate degree,

professional certification and experience. In addition, many of the faculty are nationally recognized leaders in their field.

Alcohol and Drug Counseling, Certificate

Program Description

The Certificate Program consists of eleven courses designed to prepare individuals to enter the field of substance abuse counseling at a professional level. All courses provide extension credit or Continuing Education Units (CEUs) for nurses and teachers, if needed. ADX 300 and ADX 301 courses may be taken on an individual basis without formal entrance into the Certificate Program.

Features

The Alcohol and Drug Counseling Certificate Program provides students with the educational and practical requirements for becoming a Certified Substance Abuse Counselor (CSAC). The practicum courses provide for on-the-job training in a variety of settings. Six courses in the certificate may transfer into the core curriculum of the Bachelor of Arts in Human Services Program.

Preparation

Applicants should have completed at least two years of college or have at least two years of work experience in a health or human service agency. If applicant is a recovering substance abuser, two years of continuous sobriety is required.

Career Possibilities

The program is designed to prepare individuals to enter the field of Alcohol and Drug Counseling at a professional level. The Certificate is widely recognized by alcoholism and substance abuse treatment centers and hospitals.

Requirements (27 units)

Upon satisfactory completion of eleven courses with a 2.5 grade point average, and 300 hours of field work, the student will receive a Certificate as recognition of educational achievement and professional status.

American Language and Culture Program

Program Description

The American Language and Culture Program offers a variety of specialized programs designed to meet the English needs of domestic and international students and professionals. Classes are taught by teachers with extensive international and second language experience. All teachers are certified and/or have a masters degree in second language instruction.

Intensive English Program (IEP)

The IEP offers an eight week intensive English language program five times a year for students with academic or professional goals. The program is designed for those persons wishing to pass the TOEFL for entrance to an American University or for those needing a professional level of English proficiency. The core classes consist of 20 hours a week of grammar, conversation, reading, writing and listening. Optional classes

in pronunciation, TOEFL, computers and others are offered as well. The program has six levels designed to move the student from beginning to advanced in discrete steps. Qualified students from outside the U.S. are eligible for I-20s and student visas.

Worksite and Vocational ESL (VESL)

Working with local businesses and governments ALCP can design and deliver industry specific classes in vocational English and basic skills. Students can also study more advanced management and leadership skills.

Short-Term Adult and Youth Groups

International groups of teenagers, college students and adults can study English, American culture and other areas of interest at CSU Dominguez Hills while staying in on-campus housing. Classes can be combined with tourist activities and excursions. Groups typically visit during the winter and summer breaks. However, programs are available year-round.

English for Specific Purposes

Students and business persons seeking focused instruction in English vocabulary and vernacular specific to a particular industry or vocation can arrange appropriate classes to achieve this end.

Study Abroad America

The American Language and Culture Program coordinates one semester and one year study abroad experiences for international students who wish to study at CSUDH.

Assistive Technology, Specialist Certificate

Program Description

California State University, Dominguez Hills and the Orange County Department of Education offer a Certificate Program in the area of Assistive Technology. Federal and state laws require that school personnel be prepared to offer a full range of services to disabled persons in the area of assistive technology. This certificate program will prepare individuals to fully understand and implement these state and federal mandates. All of the courses offered meet the professional development hours for licensure renewal as required by the California Speech-Language Pathology and Audiology Board.

Who Should Attend

Educational administrators, teachers, and anyone who has the desire or professional need to learn the federal and state requirements for serving the disabled within their organizations.

For program requirements, visit the Assistive Technology Credential page (p. 838) under Special Education.

Communication Sciences and Disorders, Certificate

Mission and Goals Statement

The Certificate program is aligned with the mission of the Human Services Program. This mission is to provide diverse members of the community a university education that focuses on the knowledge and

skills required to help those in need. The goals of the program are to provide a broad interdisciplinary background of the knowledge and skills needed to help improve the quality of life of those in need; to provide the opportunity for specialization in either target populations or methods of intervention; through supervised fieldwork, to provide experience applying academic knowledge and skills in human services organizations.

Program Description

The Certificate in Communication Sciences and Disorders is a pre-professional program offering students the prerequisite knowledge that is required for education leading to a career as a Speech-Language Pathologist. Topics include speech and language development and disorders, relevant anatomy and physiology, audiology and audiometry, phonetic transcription of typical and disordered speech, and other topics as required by the American Speech-Language-Hearing Association and the Commission on Teacher Credentialing in California. Students will be prepared to enter MA/MS programs in Communication Sciences and Disorders or to partially meet state licensure requirements to become a Speech-Language Pathology Assistant.

Pre-Admission Disclosure for Academic Programs Leading to Licensure or Credentialing

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the **College of Continuing and Professional Education (310) 243-3741**.

Features

The Certificate in Communication Sciences and Disorders offers classes that meet only in the evening and on Saturdays, which allows students to work full or part time and complete the prerequisite courses required for admission into a graduate program. The program affords students the opportunity to observe certificated, licensed, and credentialed speech and language pathologists in clinical and school settings in the geographic area surrounding the university. The times that courses are offered accommodate students who live outside the immediate geographic area of CSUDH. Students are trained within a cohort model and are mentored throughout the certificate program.

Academic Advisement

Students may call the Coordinator directly at (310) 243-2046.

The website for the Human Services Program is <http://www.csudh.edu/human-development/csd> (<http://www.csudh.edu/human-development/csd/>).

Preparation

Students must hold a BA/BS in a subject area not related to Communication Sciences and Disorders from an accredited institution and have a minimum 3.0 GPA.

Requirements (36 units)

Community College Teaching, Certificate

Teaching in the community college no longer requires a credential. Since the 1990-91 academic year, most community colleges require faculty to have a master's degree in a discipline currently taught at the community college level.

The Community College Teaching Certificate Program is designed for candidates who are interested in teaching in a community college, or who are new faculty at a community college. The program consists of three courses (8 units), a two unit survey course, a three unit methodology course and a three unit teaching internship at a community college.

Prerequisites

To be eligible for the program, the student must be near completion in a graduate program, possess a master's degree, or be currently employed as a faculty member in a community college.

Human Resources Management, Certificate

Program Description

The Human Resource Management Certificate program provides the knowledge and practical skills for career enhancement and job advancement in Human Resource management. California State University Dominguez Hills is recognized by SHRM to offer Professional Development Credits (PDCs) for the SHRM-CPSM or SHRM-SCPSM. This program is valid for 45 PDCs for the SHRM-CPSM or SHRM-SCPSM. For more information about certification or recertification, please visit www.shrmcertification.org (<http://www.shrmcertification.org/>). The program also provides 45 recertification credits toward PHR (Professional in Human Resources) and SPHR (Senior Professional in Human Resources) re-certification.. The certificate consists of six required courses. Two additional elective courses are included to provide an opportunity for participants to select an area of emphasis. Each course is offered for two extension units of credit.

The program also provides 45 recertification credits toward PHR (Professional in Human Resources) and SPHR (Senior Professional in Human Resources) re-certification.. The certificate consists of six required courses. Two additional elective courses are included to provide an opportunity for participants to select an area of emphasis. Each course is offered for two extension units of credit.

Requirements

- Required Courses (12 units)**
- Electives (2 units)**

Mediation and Conflict Resolution, Certificate

Program Description

The Mediation and Conflict Resolution Certificate Program, a partnership between the College of Continuing and Professional Education and the College of Arts and Humanities, offers the most comprehensive training available in any single-semester program in this fast-growing field.

This certificate program consists of three courses awarding four (4) graduate extension units and actively engages mediation providers in the community to develop opportunities for its students. Participants receive hands-on mediation and conflict resolution training that actively reinforces the classroom training.

Students in the Negotiation, Conflict Resolution and Peacebuilding Masters program at CSUDH will be able to use these courses as electives in their program.

Courses

Note: All three courses are to be taken concurrently.

Production and Inventory Control, Certificate

Program Description

This certificate is designed for those who wish to gain a broad education in the principles of supply chain management. Topics covered include: supply chain management, detailed scheduling and planning, material requirements planning, capacity requirements planning, inventory management, supplier planning, procurement, operations execution and control, production processes, quality incentives, inventory control, master planning of resources, forecasting, master scheduling, strategic management of resources, and integrating operating processes into the strategic plan.

Features

Participants in the Supply Chain Management Certificate program have the benefit of being taught by industry professionals. All instructors are nationally certified by APICS and are currently employed in the field of

production and inventory control. Courses are taught at off-campus sites in 13-week trimesters and through Distance Learning.

Career Possibilities

Certificate completers have found employment in aerospace, military, manufacturing, hospitals, retail, and warehouse supervision.

Sport and Fitness Psychology, Certificate

Program Description

The online Sport and Fitness Psychology Certificate Program addresses a growing demand for using psychological knowledge to enhance sports performance, teamwork, fitness, and well-being. Five online psychology courses comprise the Sport and Fitness Psychology Certificate Program. Coursework covers principles, research and applications which will expand and enhance participants' skill sets. Courses provide university credit of 3 units each at the 400-level which may be used for graduate-level credit subject to approval of department accepting the units. Students may enroll in individual courses or the certificate program.

Features

Courses in the certificate program are offered online so that participants can access materials, study and complete the assignments anywhere, anytime. The internship course affords an opportunity to practice acquired skills and knowledge in a community near home. A Certificate is provided upon successful completion of program requirements.

Who Should Attend

Coaches, athletes, trainers, fitness instructors, and health professionals and counselors will gain valuable skills from the courses in the Sport and Fitness Psychology Certificate Program.

Career Possibilities

The program is designed to increase knowledge of this developing field, to enhance employability of participants and to advance the careers of those currently employed in sport and fitness occupations.

| PSY 482 | Psychology of Coaching and Team-Building | 3 |
| PSY 483 | Contemp Issues in Sports and Fitness Psychology | 3 |
| PSY 486 | Internship in Sport and Fitness Psychology | 3 |
| Total Hours | | 15 |

Note: For course descriptions, refer to the Psychology section of this catalog.

Counseling

College of Education

Division of Graduate Education

Program Description

The Master of Science in Counseling program prepares students for careers in educational counseling settings and is designed to provide a broad conceptual knowledge base and the development of specialized counseling skills applicable to a diversity of student populations and counseling needs. Students choose to concentrate in School or College specializations and are able to concurrently pursue the PPS credential, which is required to work as a School Counselor in the pK-12 public school system. Through a framework of cultural humility and a commitment to justice in education, the program stresses the importance of self-awareness, reflective examination, and interpersonal and professional growth in order to provide a comprehensive preparation in K-16 educational counseling.

The PPS Credential program in School Counseling prepares candidates with the knowledge, skills, and professional dispositions to maximize the developmental potential of culturally diverse student populations in public elementary, middle, and high schools. The program is accredited by the California Commission on Teacher Credentialing to offer both the PPS credential and the Child Welfare and Attendance (CWA) authorization. The optional CWA specialization authorizes specialized counseling services specifically related to student attendance and truancy prevention and remediation.

Pre-Admission Disclosure Programs Leading to Licensure or Credentialing

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include

evidence of the right to work in the United States (e.g., social security number or taxpayer-identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements is available from the program coordinator.

Admission Requirements

Admission Procedures and Requirements for MS Degree and PPS Credential

All applicants to the program must apply for the Master's degree. In addition to the MS degree, applicants may also select admission to the PPS credential. Applicants to the School Counseling option may also select admission to the College Counseling Certificate.

Admission to the program does not automatically guarantee completion of the degree, fieldwork, credential, or certificate if there are any dispositional, interpersonal, intrapersonal, or psychological difficulties demonstrated that might inhibit the effectiveness of the candidate's role as a counselor.

1. Application to the University and the Counseling Program via Cal State Apply by the February 1 deadline
2. Submission of one official electronic set of transcripts for all undergraduate and any post-graduate work to the CSUDH Admissions Office at: admissions@csudh.edu.
3. The following items are required to be uploaded within the Cal State Apply application:
 - a. Unofficial set of transcripts showing BA degree (from a regionally accredited college or university) and any post-baccalaureate or graduate work.
 - b. A minimum grade point average of 3.0 or better in all undergraduate and if applicable, graduate coursework (or a minimum combined score of 300 on the Graduate Record Examination (GRE) (Revised) Verbal and Quantitative Tests.
 - c. Three professional recommendations from individuals who can evaluate the applicant's potential as a counselor.
 - d. Statement of Purpose (4-5 page minimum).
 - e. Small group interview (if selected).
 - f. A valid Certificate of Clearance or teaching credential.
 - g. A valid TB clearance
 - h. For School Counseling option and PPS credential applicants: verification of meeting the CA Basic Skills Requirement (BSR) will need to be furnished if admitted to the program.

Additional Degree and Credential Requirements

1. The Master of Science degree in Counseling, PPS credential, and College Counseling Certificate require completion of all courses with a "B" or higher.
2. Students must maintain continuous enrollment in the university by enrolling in a programming course or GED 600 every semester.

3. The Culminating Experience/Capstone Requirement includes an action research project, completion of a thesis, or when available, a comprehensive written examination. Students choosing to complete the thesis must seek advisement from the program chair prior to beginning a thesis project.
4. Students must complete all of the requirements for the degree and credential within seven years.
5. Candidates must adhere to all ethical and professional standards required of the university, professional counseling organizations, and accrediting affiliations associated with the degree or credential. Candidates must, at all times, demonstrate high-quality interpersonal skills with faculty, staff, fellow students, and others in their field experiences. If candidates fail to meet this requirement, they are subject to disqualification from the program.
6. Students who have earned their baccalaureate degree outside the U.S. or from a non-English speaking university in the U.S. will need to consult with the CSUDH Testing Office to determine equivalency for the Graduate Writing Assessment Requirement (GWAR).
7. In addition to the major requirements, students must meet all university requirements for the Master's degree indicated in the section of the catalog entitled "Graduate Degrees and Postbaccalaureate Studies."

Additional Requirements for the PPS Credential in School Counseling

1. Completion of degree requirements and required courses for the MS Counseling, School Counseling option with a "B" or higher.
2. Completion of the California Basic Skills Requirement.

Additional Requirements for the Child Welfare and Attendance Authorization (60 units)

1. Completion of degree requirements and required courses for the MS Counseling, School Counseling option with a "B" or higher.
2. Completion of the PPS credential.
3. Additional 6 units of the following CWA coursework:

| Code | Title | Hours |
|---------|--|-------|
| PPS 557 | Child Welfare and Attendance | 3 |
| PPS 558 | School Attendance Improvement and Truancy Remediation: Prevention and Intervention | 3 |

Conditionally Classified and Classified Standing

Students who satisfy the above requirements of program admission will be admitted as Conditionally Classified. Upon successful completion of PPS 525 Group Dynamics for Personal Growth, students will qualify for Classified Status in the program. Candidates who fail to demonstrate appropriate professional dispositions at any time are subject to disqualification from the program. Should the candidate wish to continue in the program, the program faculty will require the fulfillment of a remediation plan before the candidate can reapply to the program. Re-admittance to the program is not guaranteed.

Criminal Justice Administration

College of Business Administration and Public Policy
 School of Public Service and Justice
 Criminal Justice Administration Program

Features

The Bachelor of Science in Criminal Justice Administration is designed to provide students with a high quality and affordable education. Students will be engaged in education that promotes public service and social justice through scientific research and critical analysis of criminal justice policies and laws. The degree provides students with opportunities to consider a career in public, non-profit, and private sector professions, as well as in federal, state, and local agencies in the field of criminal justice administration and related public services. The degree also prepares students for graduate and professional education in criminal justice studies, criminology, law, and public policy.

The degree program requires: the completion of two lower-division required courses common to all students in the Department of Criminal Justice Administration:

1. completion of a set of upper-division core courses common to all Criminal Justice Administration students; and
2. four elective courses.

The Bachelor of Science in Criminal Justice Administration Degree is a single-field major, which means that students are not required to complete a minor for graduation.

The **Minor in Criminal Justice Administration** is designed to provide a basic foundation in Criminal Justice Administration. The minor is especially appropriate for students who major in the Social and Behavioral Sciences. It is an attractive option for students with majors in fields that lead to employment in the public, non-profit, and private sector professions, as well as in federal, state, and local agencies in the field of criminal justice administration and related public services.

Academic and Career Advisement

Candidates for the Bachelor of Science (BS) degree receive academic advisement for designing and completing their program of study. Professional academic advisement can be obtained from CBAPP Student Success Center. Undergraduate students seeking career advisement should contact department faculty, who are available to discuss Criminal Justice Administration career options.

Preparation Undergraduate

High school students should take college preparatory courses in English and mathematics in the social and natural sciences.

Students taking their first two years of study at a community college are advised to complete lower-division general education requirements.

Graduation with Honors

A student may be a candidate for graduation with Honors in Criminal Justice Administration by meeting the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of 3.5 in all courses used to satisfy the upper-division requirements in the major.

Career Possibilities

The job opportunities for students in criminal justice administration include employment in the public, non-profit, and private sector

professions, as well as in federal, state, and local agencies in the field of criminal justice administration and related public services.

The degree also prepares students for graduate and professional education in criminal justice studies, criminology, law, and public policy.

Emeriti Faculty

Mary Auth, Iris Baxter, Justine Bell, Gary Colboth, David J. Karber

Courses

CJA 339. Research Methods and Communication in Criminal Justice Administration. (3 Units)

Presents an overview of the fundamentals of research design in criminal justice. Students will learn how to design, conduct, and communicate ethical scientific research. A focus will be placed on academic writing and oral communication as an iterative process. This is a GWAR certifying course.

Offered Fall, Spring

CJA 340. Crim Justice & Community. (3 Units)

Political, cultural, and social environment of criminal justice administration; police community relations; accountability of criminal justice agencies to the political and legal order.

Offered Fall, Spring

CJA 341. Statistics in Criminal Justice Administration. (3 Units)

Prerequisites: MAT 105 (<https://catalog.csudh.edu/search/?P=MAT%20105>), MAT 131 (<https://catalog.csudh.edu/search/?P=MAT%20131>), MAT 132 (<https://catalog.csudh.edu/search/?P=MAT%20132>) or MAT 195 (<https://catalog.csudh.edu/search/?P=MAT%20195>) is required. Explores statistical procedures used for the analysis of data by criminal justice professionals. Instruction on the most commonly used applications of statistical analysis in the administration of justice, including review of mathematics and statistical functions and the use of statistics by criminal justice decision makers. An introduction to computer applications will also be provided.

Offered Fall, Spring

CJA 342. Legal and Ethical Foundations of Justice in Criminal Justice Administration. (3 Units)

Local, state, and federal judicial systems; constitutional, judicial and legislative influences on the administration of justice.

Offered Fall, Spring

CJA 344. Theories of Crime and Criminal Justice Policy. (3 Units)

Examines theories of crime and criminal justice policy. Covers definitions of crime, its measurement, and patterns across time and place. This is used to evaluate historical and contemporary politics in criminal justice administration.

Offered Fall, Spring

CJA 423. Administrative Law. (3 Units)

Role and nature of administrative law, procedural requirements and judicial review of administrative actions, safeguards against arbitrary action, delegation of legislative power, legal principles and trends in the development of public administration.

Offered Fall, Spring

CJA 443. Criminal Law & Justice Admin. (3 Units)

Examination of the law of criminal culpability, parties to crime, defenses, and sentencing issues. Critical analysis of types of crime, elements of specific crimes, theories of criminal law, and issues pertaining to its application by the criminal justice system.

Offered Fall, Spring

CJA 444. Juvenile Justice Process. (3 Units)

Examination of the administration of juvenile justice, including juvenile justice policies and procedures, and components of the juvenile justice system. Critical analysis of the theory and dynamics of how the juvenile justice system responds to juvenile issues, including delinquent behavior.

Offered Fall, Spring

CJA 445. Policing & Admin. of Justice. (3 Units)

Examination of policing in the United States. Critical analysis of theories of policing, police administration, and police obligations and

responsibilities under the law. Analysis of historical and contemporary approaches to police-community relations.

Offered Fall, Spring

CJA 446. Terrorism & Extremism. (3 Units)

Examination of contemporary terrorism and extremism. Critical analysis of terrorist behavior, typologies of terrorism, and extremism as a foundation for terrorist behavior. Analysis of the role of law enforcement and other public administrative agencies.

Offered Fall, Spring

CJA 447. Corrections Administration and Policy. (3 Units)

Explores the history, organization, administration and effects of institutional and community corrections in the United States and abroad. Critically examines the development and implementation of correctional administration through analysis of policy and practice at each level.

Offered Fall, Spring

CJA 448. Forensic Science. (3 Units)

Examines the scientific basis of forensic science techniques. Students will learn to think critically about forensic science, and the legal and ethical considerations that come with relying on forensic science evidence in the courtroom

Offered Fall, Spring

CJA 449. Investigative Interviewing, Interrogation and Lie Detection. (3 Units)

Scientific research is informing and transforming the practice of investigative interviewing, interrogation, and lie detection. This course reviews this research and the ethical considerations and legal decisions of this work as applied to the practice of criminal justice administration.

Offered Fall, Spring

CJA 450. Eyewitness Evidence and the Law. (3 Units)

Criminal Justice administrators are commonly tasked with collecting and assessing eyewitness evidence. Course focuses on the scientific research of eyewitness testimony and the legal decisions on eyewitness evidence as applied to the practice of criminal justice administration.

Offered Fall, Spring

CJA 451. Intelligence and National Security. (3 Units)

Explores the history, function, principles, policy guidelines and methods of collecting intelligence. Central to this course is the use of intelligence in the United States regarding homeland security, cybersecurity, terrorism, and organized crime investigations.

Offered Fall, Spring

CJA 452. Homeland Security. (3 Units)

Introduces students to the homeland security environment in the United States. Emphasis is placed on policies and systems designated to prevent, respond to, and mitigate incidents. Discussions critically assess how governments and homeland security agencies respond to domestic threats.

Offered Fall, Spring

CJA 460. Gender, Race and the Administration of Justice. (3 Units)

Examines the relationship between race/ethnicity, gender, crime, and the criminal justice system, including resulting disparities. We analyze traditional and critical theories of crime, system policies and practices, and the system as a place of work.

Offered Fall, Spring

CJA 490. Capstone in Criminal Justice Administration. (3 Units)

Prerequisites: CJA 339 (<https://catalog.csudh.edu/search/?P=CJA%20339>), CJA 340 (<https://catalog.csudh.edu/search/?P=CJA%20340>), CJA 342 (<https://catalog.csudh.edu/search/?P=CJA%20342>), and CJA 344 (<https://catalog.csudh.edu/search/?P=CJA%20344>) are required. CJA 341 (<https://catalog.csudh.edu/search/?P=CJA%20341>), CJA 443 (<https://catalog.csudh.edu/search/?P=CJA%20443>), CJA 444 (<https://catalog.csudh.edu/search/?P=CJA%20444>) and CJA 447 (<https://catalog.csudh.edu/search/?P=CJA%20447>) are recommended. The capstone experience synthesizes the CJA student's experience at CSUDH. Integrates CJA coursework with a 120-hour semester-long internship in criminal justice administration. The course provides students with an opportunity to directly apply the knowledge gained in the CJA program to the criminal justice system.

Offered Fall, Spring, Summer

CJA 495. Special Topics in Criminal Justice Administration. (1-3 Units)

Prerequisite: Consent of instructor. An intensive study of an issue, concept or technique that is related to criminal justice administration. Repeatable course.

Offered Fall, Spring

Offered Fall, Spring

CJA 540. Adv. Criminal Justice Issues. (3 Units)

This course will introduce students to advance issues relating to the administration of justice from the perspective of the American criminal justice system. Emphasis will be placed on policy concerns, crime and its causes, the structure of the criminal justice system, and criminal justice procedures. Special issues in criminal justice will also be reviewed.

Offered Infrequent

CJA 563. Administrative Law, Policy and Analysis. (3 Units)

This course shall define the scope and boundaries of administrative law within the context of public policy. It will introduce students to major constitutional issues underlying administrative law bodies at the federal, state, and local levels of government.

Offered Fall, Spring

CJA 565. Issues in Police Administration and Ethics. (3 Units)

Examination of policing in the US. Critical analysis of theories of policing, police administration, police obligations, ethics, and responsibilities under the law. Analysis of historical / contemporary approaches to ethical community relations.

Offered Fall, Spring

CJA 566. Issues in Homeland Security and Terrorism. (3 Units)

This course will introduce students to contemporary issues in homeland security and terrorism. Emphasis will be placed on foundations of homeland security, threats and vulnerabilities, preparedness / response / recovery, and evolving issues.

Offered Fall, Spring

CJA 595. Special Topics in Criminal Justice Administration. (1-3 Units)

Prerequisite: Graduate standing. Intensive study of a specialized area or contemporary issues in Criminal Justice Administration (e.g. Homeland Security, Emergency Management, CJA Debates). Three hours of seminar per week. Repeatable course.

Offered Fall, Spring

CJA 596. Internship Practicum. (3 Units)

Prerequisite: Consent of MPA program coordinator. Supervised internship working with a cooperating government agency in a function germane to public administration. Sessions are held to discuss and analyze the problems with which interns are concerned. A written project related to the internship is required. CR/NC grading.

Offered Fall, Spring

Criminal Justice Administration, Bachelor of Science

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major, no minor required.

Major Requirements (51 units)

Students may select one of the concentrations listed. All candidates for this degree require the following courses or one of their approved transfer equivalents.

Common Core Requirements (42 units)

| Code | Title | Hours |
|--|----------------------------|-------|
| Lower Division Required Courses | | |
| CIS 270 | Info Sys/Tech Fundamentals | 3 |

Select one of the following: 3

| | | |
|---------|---|---|
| MAT 105 | Finite Mathematics | 3 |
| MAT 131 | Elementary Statistics and Probability | |
| MAT 132 | Statistics and Probability with Support | |
| MAT 195 | Selected Topics in Mathematics | |

Upper Division Required Courses

| | | |
|------------|---|---|
| PUB 300 | Foundations of Public Administration | 3 |
| CJA 339 | Research Methods and Communication in Criminal Justice Administration | 3 |
| CJA 340 | Crim Justice & Community | 3 |
| CJA 341 | Statistics in Criminal Justice Administration | 3 |
| CJA 342 | Legal and Ethical Foundations of Justice in Criminal Justice Administration | 3 |
| CJA 344 | Theories of Crime and Criminal Justice Policy ¹ | 3 |
| or SOC 368 | Criminology | |
| CJA 443 | Criminal Law & Justice Admin | 3 |
| CJA 444 | Juvenile Justice Process | 3 |
| CJA 445 | Policing & Admin. of Justice | 3 |
| CJA 447 | Corrections Administration and Policy ² | 3 |
| or SOC 364 | Corrections | |
| CJA 460 | Gender, Race and the Administration of Justice | 3 |
| CJA 490 | Capstone in Criminal Justice Administration ³ | 3 |

Electives

Select a total of four courses from the following: 12

| | | |
|---------|---|--|
| CJA 423 | Administrative Law | |
| CJA 446 | Terrorism & Extremism | |
| CJA 448 | Forensic Science | |
| CJA 449 | Investigative Interviewing, Interrogation and Lie Detection | |
| CJA 450 | Eyewitness Evidence and the Law | |
| CJA 451 | Intelligence and National Security | |
| CJA 452 | Homeland Security | |
| NCR 541 | Restorative Justice&Peacblng ⁴ | |
| PUB 302 | Public Financial Administration | |
| PUB 303 | Public Personnel Administration | |
| PUB 494 | Independent Study ⁵ | |
| SOC 362 | Gangs and Adolescent Subcultures | |
| SOC 364 | Corrections | |
| SOC 365 | Deviant Behavior | |
| SOC 368 | Criminology | |
| SOC 369 | Juvenile Delinquency | |

Total Hours 54

¹ SOC 368 Criminology may be substituted for CJA 344 Theories of Crime and Criminal Justice Policy.

² SOC 364 Corrections may be substituted for CJA 447 Corrections Administration and Policy.

³ Taken after completion of four (4) core courses

⁴ Open to seniors only.

⁵ May be taken after completion of four (4) courses.

Students may select one of the concentrations listed below:

Homeland Security Studies Concentration (12 units)

| Code | Title | Hours |
|---|---|-------|
| Required Courses | | |
| CJA 446 | Terrorism & Extremism | 3 |
| CJA 451 | Intelligence and National Security | 3 |
| CJA 452 | Homeland Security | 3 |
| Select one additional course from the following choices: | | |
| CJA 423 | Administrative Law | 3 |
| CJA 448 | Forensic Science | 3 |
| CJA 449 | Investigative Interviewing, Interrogation and Lie Detection | 3 |
| CJA 450 | Eyewitness Evidence and the Law | 3 |
| NCR 541 | Restorative Justice&Peacblng ¹ | 3 |
| PUB 302 | Public Financial Administration | 3 |
| PUB 303 | Public Personnel Administration | 3 |
| PUB 324 | Analytic Decision-Making | 3 |
| PUB 494 | Independent Study ² | 1-3 |
| POL 310 | Current Issues in American Government | 3 |
| POL 360 | American Constitutional Law: Distribution of Power | 3 |
| SOC 362 | Gangs and Adolescent Subcultures | 3 |
| SOC 364 | Corrections | 3 |
| SOC 365 | Deviant Behavior | 3 |
| SOC 368 | Criminology | 3 |
| SOC 369 | Juvenile Delinquency | 3 |

Total Hours 55-57

¹ Open to seniors only

² May be taken after completion of four (4) core courses.

- Demonstrate familiarity with the major concepts, theoretical perspectives, research, and case law in criminal justice administration.
- Demonstrate critical thinking and skeptical inquiry in their analysis of problems and potential solutions related to criminal justice administration.
- Understand and assess the role of diversity and multicultural perspectives in the policies, practices, and culture of criminal justice administration.
- Present well-organized and well-supported arguments in both written and oral formats.
- Analyze and evaluate social justice issues and ethical decision-making in criminal justice administration.
- Identify, access, utilize, and evaluate various forms of information.

Criminal Justice Degree Roadmap

4- Year Roadmap

Cyber Security

College of Natural and Behavioral and Sciences
Department of Computer Science

Program Description

The Master of Science in Cyber Security program is designed to provide professional preparation for private, public and non-profit sector professionals in the field of cyber security. The curriculum delivered in an accelerated 18-month cohort model, requires completion of six (6) core and four (4) elective courses. The program culminates with a cyber-security research project supervised by a faculty member. The purpose of the Master of Science in Cyber Security program is to prepare students for professional careers in cyber security. The program aims to provide a learning experience for the students to develop technical skills in protecting IT infrastructures, operating system, and networks

from intentional and unintentional information security breaches. The curriculum learning outcomes are designed for the acquisition of advanced expertise in the area of cyber security, including the protection of computers, networks, programs from unauthorized access, alteration or damage of data. The program's strengths include a robust academic curriculum, high quality expert instructors, accelerated format (18-month model); and affordability. The Master of Science I Cyber Security will position its graduates to become leaders in the field of cyber security. Classes are scheduled to accommodate late afternoon, evening, and weekend classes.

Admission Procedures

The following materials are required for admission review by the submission deadline:

Please note that the cut-off dates for Admission to the Fall Term is July 1, with the complete package of materials (application, transcripts and other required documents) due by August 1. For the Spring Term, the deadline for completed applications is November 15, and the deadline for materials is December 1. If you do not meet these deadlines, you will need to re-apply with a new application for the next term.

- Apply via Cal State Apply #
- Contact your previous college(s) to request official transcripts. Applicants must provide an official transcript from each postsecondary institution attended (post-baccalaureate course work included) be sent to the Admissions Office at admit@csudh.edu. If the institution providing the transcript can only mail the transcript, mail it to:
Admissions Office CSU Dominguez Hills
1000 E. Victoria Street
Carson, CA 90747
- Send two letters of support and a Statement of Purpose (why you want to be in the program) for your application to the program coordinator at: MSCY@csudh.edu.

Admission Requirements

The following general requirements must be met to be admitted to the program:

- A bachelor's degree from a regionally accredited college or university
- Good standing at the last institution
- A grade point average (GPA) of at least 2.5 on the last degree completed or at least 2.5 in the last 60 semester (90 quarter) units attempted.
- International Students must provide an evidence of one of the following:
 - A minimum score of 80 on the internet-based TOEFL exam (iBT)
 - A minimum score of 213 on the computer-based TOEFL exam
 - A score of 6.5 or higher on the IELTS, or
 - A score of 53 or higher on the Pearson Test of English (PTE) Academic Depending on the type of the undergraduate degree held, the applicants may be admitted with either a classified or conditional admission status.

Who can apply for this graduate program? Minimum requirement: Bachelor degree with a GPA of 2.5 or higher

1. Full Admission: Bachelor degree in Computer Technology from CSUDH or an equivalent program; or,

2. Conditional Admission: Bachelor degree other than computer technology. Students with no background may need to take some leveling courses before admission to the program.

Full Admission

In order to be admitted with a classified status, the applicant must meet all general admission requirements and hold a bachelor's degree in Computer Technology (CT), Information Technology (IT), Computer Science(CS) or a related subject.

Conditional Admission

The applicants holding bachelor's degrees in the fields not related to Computer Science, may be considered for a conditional admission. Conditionally admitted students may have to fulfill additional requirements before they attain a classified status. These additional requirements, which will be determined by evaluating applicant's transcripts and work-related experience, include an evidence of mastery of the key concepts in the following topic areas:

- Computer Hardware and Tools
- Computer Programming
- Operating System and Networking
- Dynamic Web Programming
- Network Security
- Introduction to Statistics

Or take the Cyber Security Certificate of Completion at CSUDH: (three 2-unit courses)

- IT Fundamentals,
- Network and Hardware, and
- CyberSecurity

Advancement to Candidacy

Advancement to candidacy recognizes that the student has demonstrated the ability to sustain a level of scholarly competency commensurate with successful completion of degree requirements. Upon advancement to candidacy, the student is clear for the final stages of the graduate program which, in addition to any remaining course work, will include the project. Following are the requirements for Advancement to Candidacy:

1. A minimum of 15 resident units
2. Classified standing
3. An approved Program of Study
4. Successful completion of GEAR
5. A cumulative of 3.0 in all courses taken as a graduate student
6. No grade lower than a "B" in the degree program

Courses

CYB 501. Foundation of Information Security. (3 Units)

An overview of information security concepts; a basic introduction to information assurance principles and information security systems and specific issues pertaining to risk assessment and cyber threats; a brief examination of the laws governing information security including public policy and ethical standards.

Offered Fall, Spring

CYB 505. Practical Cyber Security. (3 Units)

Prerequisite: Restricted to majors. To understand and deal with real-world cyber threats, this course explores the latest development in the area of cyber security, and provides theory and hands-on practice in playing with cyber security software and network systems in a laboratory environment.

Offered Fall, Spring, Summer

CYB 525. Cybersecurity System Analytics and Automation. (3 Units)

Provides theory and hands-on practice in data analytics and threat intelligence in cybersecurity systems. Explores way to perform analytical tasks automatically, and solve cryptography, intrusion detection, automation, log creation, log management and other problems in cybersecurity.

Offered Fall, Spring, Summer

CYB 528. Foundations of Cyber Forensics. (3 Units)

Presents a high level introduction of Cyber Forensics including the different approaches in computer forensics investigation. Covers the ethics as it is mapped to the objectives of the Center of Academic Excellence in Cybersecurity.

Offered Spring

CYB 529. Advanced Cyber Forensics. (3 Units)

Prerequisite: CYB 528 is required. Provides advanced case examples in digital forensics. Provides understanding of everyday issues in real investigations such as technical, logistical, and legal challenges. Presents advanced methodologies and proven practices applied in digital investigations.

Offered Infrequent

CYB 535. CyberOps and Cloud DevSecOps. (3 Units)

Prerequisite: restricted to majors. Provides theory and hands-on practice on day-to-day, tactical knowledge and skills that Security Operations Center teams need to detect and respond to cybersecurity threats.

Main topics include security monitoring, host-based analysis, intrusion analysis, and security policies and procedures.

Offered Fall, Spring, Summer

CYB 538. Information Security Policy and Procedure. (3 Units)

Examines the legal concepts, principles and theories of public policy as they apply to information technology. A review of the American system with its federal and state levels will be studied to provide students with the necessary legal background in which the world of Information Technology functions. A special emphasis will be placed on compliance issues, Cyber laws, and regulations.

Offered Fall

CYB 548. Advanced OS Security. (3 Units)

A study of the challenges involved in the design and implementation of a secure operating system. Identify security threats and monitor operating system security implementations; learn how to configure operating systems to meet security standards using best practices.

Offered Summer

CYB 551. Data Communications and Computer Networks. (3 Units)

A comprehensive survey of the computer communication and field including data communication concepts and categories, communications switching and routine, network configuration and management. Topics also include layered network models and protocol.

Offered Spring

CYB 552. Advanced Hacking Prevention. (3 Units)

To evaluate advanced hacks and methods of defense fortification. Provides more advanced network defense concepts and techniques. Covers more detailed theoretical concepts in networking. State-of-the-art techniques and tools will be used to learn how to protect network.

Offered Fall

CYB 555. Information Assurance and Network Security. (3 Units)

Students will examine the concepts and topics in network security and information assurance. Through this course, students will conduct a CRT (Capture The Flag) exercise, and learn more about security threats, secure socket layer, SSH, Tunneling, PGP, encryption algorithm, vulnerabilities and other related topics.

Offered Spring

CYB 562. Advanced Communication System Security. (3 Units)

The course covers more advanced security life-cycle of products and services; it will go beyond requirements and policy development and progressing through the actual development, deployment and operations. This course will also provide advanced methods regarding the issues associated with protecting information assets.
Offered Infrequent

CYB 572. Secure Cloud Computing. (3 Units)

Students will learn four cloud service models: IaaS-Infrastructure as a Service, PaaS-Platform as a Service, SaaS-Software as a Service and BaaS-Business Process as a Service. This course will also cover topics related to big data, and challenges resulting from the implementation of high computing performances.
Offered Summer

CYB 584. Software Project Planning and Management. (3 Units)

Students will learn to build a software project and manage it professionally. Additionally, they will be expected to devise a plan with a schedule of finished products, a tracking system to monitor the building process of the project, and a risk management assessment.
Offered Fall

CYB 590. Graduate Project. (3 Units)

Capstone course. Students are required to submit and present a semester long project. Students will develop their own cyber security project, devise hypotheses related to their study, gather data to support their hypotheses, and present the results.
Offered Fall, Spring

CYB 595. Special Topics in Cyber Security. (3 Units)

Advanced topics in cyber security not covered by current course offerings. May be used for elective credit in departmental programs. Subject to approval. Consent required.
Offered Fall, Spring

CYB 600. Graduate Continuation Course. (1 Units)

Prerequisite: Signature of graduate program coordinator required. Graduate students, who have completed their course work but not their thesis, project, or comprehensive examination, or who have other requirements remaining for the completion for their degree, may attain continuous enrollment by enrolling in this course.
Offered Fall, Spring

Cyber Security, Master of Science

College of Natural & Behavioral Sciences
Department of Computer Science

Program Description

The Master of Science in Cyber Security program is designed to provide professional preparation for private, public, and non-profit sector professionals in the field of cyber security. The curriculum delivered in an accelerated 18-month cohort model requires the completion of six (6) core and four (4) elective courses. The program culminates with a cyber-security research project supervised by a faculty member. The Master of Science in Cyber Security program aims to prepare students for professional careers in cyber security. The program aims to provide a learning experience for the students to develop technical skills in protecting IT infrastructures, operating systems, and networks from intentional and unintentional information security breaches. The curriculum learning outcomes are designed for the acquisition of advanced expertise in the area of cyber security, including the protection of computers, networks, programs from unauthorized access, alteration,

or damage of data. The program's strengths include a robust academic curriculum, high-quality expert instructors, accelerated format (18-month model); and affordability. The Master of Science in Cyber Security will position its graduates to become leaders in the field of cyber security. Classes are scheduled to accommodate late afternoon, evening, and weekend classes.

Admission Procedures

The following materials are required for admission review by the submission deadline:

Please note that the cut-off date for Admission to the Fall Term is July 1, with the complete package of materials (application, transcripts and other required documents) due by August 1. For the Spring Term, the deadline for completed applications is November 15, and the deadline for materials is December 1. If you do not meet these deadlines, you will need to re-apply with a new application for the next term.

- Apply via Cal State Apply: <https://www.calstate.edu/apply> (<https://www.calstate.edu/apply/>)
- Contact your previous college(s) to request official transcripts. Applicants must provide an official transcript from each post-secondary institution attended (post-baccalaureate coursework included) be sent to the Admissions Office at admit@csudh.edu. If the institution providing the transcript can only mail the transcript, mail it to:

Admissions Office CSU Dominguez Hills
1000 E. Victoria Street Carson, CA 90747

- Send two letters of support and a Statement of Purpose (why you want to be in the program) for your application to the program coordinator at: MSCY@csudh.edu.

Admission Requirements

The following general requirements must be met to be admitted to the program:

- A bachelor's degree from a regionally accredited college or university
- Good standing at the last institution
- A grade point average (GPA) of at least 2.5 on the last degree completed or at least 2.5 in the last 60 semester (90 quarter) units attempted.
- International Students must provide evidence of one of the following:
 - A minimum score of 80 on the internet-based TOEFL exam (iBT)
 - A minimum score of 213 on the computer-based TOEFL exam
 - A score of 6.5 or higher on the IELTS, or
 - A score of 53 or higher on the Pearson Test of English (PTE) Academic. Depending on the type of undergraduate degree held, the applicants may be admitted with either a classified or conditional admission status.

Who can apply for this graduate program? Minimum requirement:

1. Bachelor's degree with a GPA of 2.5 or higher
2. Full Admission: Bachelor degree in Computer Technology from CSUDH or an equivalent program; or,

3. Conditional Admission: Bachelor degree other than computer technology. Students with no background may need to take some leveling courses before admission to the program.

Full Admission

In order to be admitted with a classified status, the applicant must meet all general admission requirements and hold a bachelor's degree in Computer Technology (CT), Information Technology (IT), Computer Science (CS), or a related subject.

Conditional Admission

The applicants holding bachelor's degrees in fields not related to Computer Science may be considered for conditional admission. Conditionally admitted students may have to fulfill additional requirements before they attain a classified status. These additional requirements, which will be determined by evaluating the applicant's transcripts and work-related experience, include evidence of mastery of the key concepts in the following topic areas:

- Computer Hardware and Tools
- Computer Programming
- Operating System and Networking
- Dynamic Web Programming
- Network Security
- Introduction to Statistics
- Or take the Cyber Security Certificate of Completion at CSUDH: (three 2unit courses)
- IT Fundamentals,
- Network and Hardware, and
- CyberSecurity

Advancement to Candidacy

Advancement to candidacy recognizes that the student has demonstrated the ability to sustain a level of scholarly competency commensurate with successful completion of degree requirements. Upon advancement to candidacy, the student is clear for the final stages of the graduate program which, in addition to any remaining course work, will

include the project. Following are the requirements for Advancement to Candidacy:

1. A minimum of 15 resident units
2. Classified standing
3. An approved Program of Study
4. Successful completion of GVAR
5. A cumulative of 3.0 in all courses taken as a graduate student
6. No grade lower than a "B" in the degree program

Requirements

Admission Requirements

The following general requirements must be met to be admitted to the program:

- A bachelor's degree from a fully accredited institution.
- Good standing at the last institution attended.
- A grade point average (GPA) of at least 2.5 on the last degree completed or at least 2.5 in the last 60 semester (90 quarter) units attempted.
- International Students must provide an evidence of one of the following:
 - A minimum score of 550 on the paper-based TOEFL exam
 - A minimum score of 80 on the internet-based TOEFL exam (iBT)
 - A minimum score of 213 on the computer-based TOEFL exam
 - A score of 6.5 or higher on the IELTS, or
 - A score of 53 or higher on the Pearson Test of English (PTE) Academic

Depending on the type of the undergraduate degree held, the applicants may be admitted with either a classified or conditional admission status.

Classified Admission

In order to be admitted with a classified status, the applicant must meet all general admission requirements and hold:

- A bachelor's degree in Computer Technology (CT), Information Technology (IT), Computer Science (CS) or a related field.

Conditional Admission

The applicants holding bachelor's degrees in the fields not related to Computer Science, may be considered for a conditional admission. Conditionally admitted students may have to fulfill additional requirements before they attain a classified status. These additional requirements, which will be determined by evaluating applicant's transcripts and work-related experience, include an evidence of mastery of the key concepts in the following topic areas:

- Computer Hardware and Tools
- Computer Programming
- Operating Systems and Networking
- Dynamic Web Programming
- Network Security
- Introduction to Statistics

These requirements may be met by successful completion of the necessary bridge courses identified by the Program Coordinator or passing of a placement exam.

Major Requirements (30 units)

| Code | Title | Hours |
|--|--|-----------|
| Core Courses | | |
| CYB 501 | Foundation of Information Security | 3 |
| CYB 528 | Foundations of Cyber Forensics | 3 |
| CYB 538 | Information Security Policy and Procedure | 3 |
| CYB 555 | Information Assurance and Network Security | 3 |
| CYB 584 | Software Project Planning and Management | 3 |
| CYB 590 | Graduate Project | 3 |
| Electives | | |
| Select four courses from the following: | | 12 |
| CYB 529 | Advanced Cyber Forensics | |
| CYB 548 | Advanced OS Security | |
| CYB 551 | Data Communications and Computer Networks | |
| CYB 552 | Advanced Hacking Prevention | |
| CYB 562 | Advanced Communication System Security | |
| CYB 572 | Secure Cloud Computing | |
| Culminating Experience ¹ | | |
| CYB 590 | Graduate Project | 3 |
| Total Hours | | 33 |

¹ The culminating experience is a student-developed cyber security research project conducted under the supervision of a faculty member.

Students graduating with the MSCY degree will be able to:

- Identify, locate, and interpret cyber security research of cyber threats originating from policies, practices, and products to information systems and the infrastructure.

- Compare and contrast legal, ethical, technical and policy issues in cyber security.
- Evaluate different approaches to vulnerability assessment, risk mitigation, auditing, and information systems certification.
- Design and evaluate information systems in regard to their security and protection of its own data.
- Perform an advanced computer forensics investigation and evaluate system networks.

Dance

College of Arts and Humanities
Department of Theatre and Dance

Program Description

The Bachelor of Arts in Dance offers each student the opportunity to develop creative and technical skills to become leaders in the field of dance as dancers, choreographers, and teachers in studios, private, and public schools. The B.A. in Dance also prepares students looking to further their education by attending graduate school to receive their M.F.A, M.A., or Ph. D. in Dance or related fields. The Dance program is multicultural and multi-ethnic by nature and offers a wide range of dance styles and techniques to explore. Students are encouraged to create, produce, and assess their work in relation to the broad knowledge of dance history and its traditions.

The Dance Minor offers courses designed for students who wish to augment their Bachelor's degree or desire to become a performer, choreographer, teacher, or further their dance training.

CSU Dominguez Hills Dance faculty are professional dancers, choreographers, and teachers who offer classes in Ballet, Modern, Jazz, Tap, Hip-Hop, Latin Social Dance, African dance and more. Students will have the opportunity to participate in master dance classes taught by nationally known artists and attend the American College Dance Association Conference. Complimenting dance technique classes, student will take classes in Dance Composition, Dance Production, Global Dance Perspectives, Rhythmic Analysis, Dance for Children, Forces & Figures in Dance, Dance Kinesiology, and more to round out the B.A. in Dance.

Features

Two large dance studios are available to students. Both studios are equipped with sprung floors, mirrored walls and the main studio has ballet barres, a grand piano, and digital audio and visual systems. Ballet and modern classes have live music accompaniment. Ample locker and shower facilities are also available. Dance students perform in the fully equipped University Theatre, which seats over 400 audience members. Two dance concerts are held each year, one in each semester, the Mosaic Dance Company offers screen dance opportunities along with outreach performances, and our Theatre Productions regularly incorporate dance. There are also opportunities to perform at on and off-campus events throughout the year.

The Dance program is a member of the American College Dance Association. Students have the opportunity to participate in the ACDA annual conference and adjudication concerts in the Baja Region and other performance venues

Academic Advisement

We request that students meet with the dance advisor and program coordinator, Doris Ressler or Amy Allen, before starting their first semester at CSU Dominguez Hills. This is when educational goals and previous dance experience will be discussed. Based on this discussion, the progression of the student's major or minor requirements will be planned. Career opportunities will also be discussed. If transferring from a community or 4-year college, students should bring a copy of their transcripts.

Dedication and commitment are the keys to the successful pursuit of a career in theatre and dance. To help students achieve high academic and production standards, the department requires all majors and minors to pass their required classes with a "C" grade or better. Students who receive lower than a "C" will need to "Repeat and Cancel" that course in the following semester.

Graduation with Honors

An undergraduate student may graduate with Honors in Dance if the following criteria are met:

1. A minimum of 36 units in residence at CSU Dominguez Hills.
2. A minimum GPA of at least 3.5 in all courses used to satisfy the upper-division requirements.

Preparation

For the B.A. in Dance and Dance Minor, it is strongly suggested that students pursuing a career in dance study ballet, modern, jazz dance techniques and dances of world cultures such as African, Latin Social, and Hip Hop. Students should take advantage of all available choreography and performance opportunities and view as many dance performances as possible. In addition to high school graduation requirements, the student should study art music, acting, literature, philosophy, and kinesiology. While attending community college, students should seek choreographic and performance experience in theatre presentations and attend as many dance performances as possible. Most dance technique courses are taken at community colleges in ballet, modern, jazz, tap, and other selected dance styles will transfer to satisfy the lower-division requirements for the B.A. in Dance and Dance Minor.

Dance Opportunities

Mosaic Dance Company – is a semi-professional touring dance company is comprised of students at CSUDH. Guest artists, faculty members, and students create dance works with the company, which are performed in concerts on campus and in the surrounding community. Through a variety of dance styles, the Mosaic Dance Company provides a professional training experience for the students involved and provides dance education and performances to underserved populations in the community.

American College Dance Association (ACDA) – Interested dance students have opportunities to attend the annual conference and participate in the adjudication concerts. Students will meet students from college dance programs in and out of the Baja Region, take master dance classes, perform in adjudication concerts, receive feedback, and experience dance from other undergraduate and graduate academic institutions.

Career Possibilities

The B.A. in Dance provides students with a broad-based foundation in dance and prepares them for graduate school, auditioning for and performing in dance companies, teaching opportunities in public schools, private dance studios, fitness programs, theatre, television, industrial shows, and working in "the business."

The Dance Minor is designed for students who desire to become performers, choreographers, or teachers, or to complement their major.

Courses

DAN 110. Dance of World Cultures. (1 Units)

Introduction to a variety of ethnic and social dance forms; and appreciation of their historical and cultural origins. Repeatable for credit. Two hours of activity per week. Offered Fall, Spring

DAN 120. Tap Dance. (1 Units)

Development of proficiency in performing elementary tap technique with emphasis on skills, steps, combinations and terminology. Appreciation of the origin and evolution of tap dance. Repeatable for credit. Two hours of activity per week. Offered Fall

DAN 125. Tap Dance II. (1 Units)

Prerequisites: DAN 120 or permission from instructor. Develop proficiency in performing beginning intermediate tap technique with emphasis on skills, steps, combinations and terminology. Be able to speak and write appropriate vocabulary steps when necessary, and gain a further appreciation of the origin and evolution of tap dance and current tap trends. Offered As needed

DAN 130. Global Dance Perspectives. (3 Units)

Global Dance Perspectives provides an understanding and appreciation of dances from all cultures of the world as an expression of people's imaginative and creative urges/ Diversity in dance is explored through a global perspective addressing social, cultural, and historical topics. Offered Fall, Spring, Summer

DAN 200. Jazz I. (2 Units)

Development of proficiency in performing beginning jazz dance technique. Emphasis on theory, terminology, steps and combinations in a variety of jazz styles. Appreciation of origin and evolution of jazz. Repeatable for credit. Four hours of activity per week.
Offered Fall

DAN 205. Jazz II. (2 Units)

Prerequisite: DAN 200 or consent of instructor. Continuing development of proficiency in performing beginning jazz dance technique. Emphasis on theory, terminology, steps and combinations in a variety of jazz styles. Appreciation of origin and evolution of jazz. Repeatable for credit. Four hours of activity per week.
Offered Fall

DAN 210. Ballet I. (2 Units)

Development of proficiency in performing elementary ballet technique. Emphasis on basic theory, positions, steps, combinations and French terminology. Appreciation of ballet as an art form. Repeatable for credit. Four hours of activity per week.
Offered Fall, Spring

DAN 215. Ballet II. (2 Units)

Prerequisite: DAN 210 or consent of instructor. Continuing development of proficiency in performing elementary ballet technique. Emphasis on basic theory, positions, steps, combinations and French terminology. Appreciation of ballet as an art form. Repeatable for credit. Four hours of activity per week.
Offered Fall, Spring

DAN 220. Modern Dance I. (2 Units)

Development of proficiency in performing beginning modern dance technique. Emphasis on basic technical development, movement theories, movement phrasing and terminology. Appreciation of basic movement discoveries of early pioneers in modern dance, and of modern dance as an art form. Repeatable for credit. Four hours of activity per week.
Offered Fall

DAN 225. Modern Dance II. (2 Units)

Prerequisite: DAN 220 or consent of instructor. Continuing development of proficiency in performing beginning modern dance technique. Emphasis on basic technical development, movement theories, movement phrasing and terminology. Appreciation of basic movement discoveries of early pioneers in modern dance, and of modern dance as an art form. Repeatable for credit. Four hours of activity per week.
Offered Fall

DAN 230. Dance Touring Ensemble. (1 Units)

Co-requisite: Enrollment in a Dance Technique class. Dance Touring Ensemble members will discover and cultivate their own talents as performers and educators. Multiple performances will be held during the semester. Auditions and an Interview will be required.
Offered All terms

DAN 300. Jazz III. (2 Units)

Prerequisite: DAN 205 or consent of instructor. Development of proficiency in performing intermediate jazz dance technique. Emphasis on theory, terminology, steps and combinations in a variety of jazz styles. Appreciation of the origin and evolution of jazz. Repeatable for credit. Four hours of activity per week.
Offered Spring

DAN 305. Jazz IV. (2 Units)

Prerequisite: DAN 300 or consent of instructor. Continuing development of proficiency in performing intermediate jazz dance technique. Emphasis on theory, terminology, steps and combinations in a variety of jazz styles. Appreciation of the origin and evolution of jazz. Repeatable for credit. Four hours of activity per week.
Offered Spring

DAN 310. Ballet III. (2 Units)

Prerequisite: DAN 215 or consent of instructor. Development of proficiency in performing intermediate ballet technique. Emphasis on theory, positions, steps, combinations and French terminology. Appreciation of ballet as an art form. Repeatable for credit. Four hours of activity per week.
Offered Fall, Spring

DAN 315. Ballet IV. (2 Units)

Prerequisite: DAN 310 or consent of instructor. Continuing development of proficiency in performing intermediate ballet technique. Emphasis on theory, positions, steps, combinations and French terminology. Appreciation of ballet as an art form. Repeatable for credit. Four hours of activity per week.
Offered Fall, Spring

DAN 320. Modern Dance III. (2 Units)

Prerequisite: DAN 225 or consent of instructor. Development of proficiency in performing intermediate modern dance technique. Emphasis on intermediate technical development, movement theories, movement phrasing and terminology. Appreciation of intermediate movement discoveries of early pioneers in modern dance, and of modern dance as an art form. Repeatable for credit. Four hours of activity per week.
Offered Spring

DAN 325. Modern Dance IV. (2 Units)

Prerequisites: Upper division class standing; KIN 448 is recommended. Planned internship in alternative dance careers at a cooperating institution, agency, organization or company under professional supervision. Application of principles and skills acquired in student's chosen professional preparation program.
Offered Spring

DAN 330. Dance Composition I. (2 Units)

Use of improvisation in choreography as an introduction to structural form; individual and group problems.
Offered Fall

DAN 335. Dance Composition II. (3 Units)

Prerequisites: DAN 330 Co-requisite: Concurrent enrollment in a dance technique class. Theory and practice in the immediate elements of dance composition.
Offered Spring

DAN 340. Dance Production. (1 Units)

Prerequisites: DAN 330 and DAN 335 or consent of instructor. Designed to teach students how to coordinate and produce a dance concert. Emphasis on technical aspects of dance production such as lighting design, costume design and construction, recording sound, applying dance makeup, staging dances, and concert publicity and promotion. Repeatable for credit. Three hours of activity per week.
Offered Spring

DAN 345. Rhythmic Analysis. (3 Units)

Prerequisites: DAN 330. Basic music exploration of simple and complex rhythmic patterns, time, styles, and a brief survey of the historical periods and styles of music used in western and non-western cultures.

Offered Fall even

DAN 355. Forces and Figures in Dance. (3 Units)

Prerequisite: DAN 130 required. Survey of the historical development of dance from the 18th century to the 21st centuries.

Offered Spring even

DAN 375. Dance Kinesiology & wellness. (1 Units)

Investigation of the kinesiology and physiology of the human body as it relates to dance. Students will develop a basic understanding of human anatomy, the biomechanics of human movement, and wellness concerns as they relate to dance.

Offered Spring

DAN 385. Somatics and Conditioning. (3 Units)

The discipline of somatic studies emphasizing the unity of mind and body, and an integrated experience from within, through conscious guided movement and opportunities for increased self-awareness.

Offered As needed

DAN 395. Dance Pedagogy. (3 Units)

Prerequisites: DAN 205, DAN 315, DAN 325, DAN 335 or permission of instructor, Dance Pedagogy explores the art and instructional methods of teaching dance technique and choreography.

Offered As needed

DAN 410. Ballet V. (2 Units)

Prerequisite: DAN 315 or consent of instructor. Development of proficiency in performing intermediate-advanced ballet technique. Emphasis on intermediate-advanced theory, positions, combinations and French terminology. Appreciation of ballet as an art form. Repeatable for credit. Four hours of activity per week.

Offered Spring

DAN 415. Ballet VI. (2 Units)

Prerequisite: DAN 410 or consent of instructor. Continuing development of proficiency in performing intermediate-advanced ballet technique. Emphasis on intermediate-advanced theory, positions, combinations and French terminology. Appreciation of ballet as an art form. Repeatable for credit. Four hours of activity per week.

Offered Spring

DAN 420. Modern Dance V. (2 Units)

Prerequisite: DAN 325 or consent of instructor. Development of proficiency in performing intermediate-advanced modern dance technique. Emphasis on intermediate-advanced technical development, movement theories, movement phrasing and terminology. Appreciation of movement discoveries of contemporary modern dancers, and of modern dance as an art form. Repeatable for credit. Four hours of activity per week.

Offered Spring

DAN 425. Modern Dance VI. (2 Units)

Prerequisite: DAN 420 or consent of instructor. Continuing development of proficiency in performing intermediate-advanced modern dance technique. Emphasis on intermediate-advanced technical development, movement theories, movement phrasing and terminology. Appreciation of movement discoveries of contemporary modern dancers, and of modern dance as an art form. Repeatable for credit. Four hours of activity per week.

Offered Spring

DAN 430. Dance Composition III. (3 Units)

Prerequisites: DAN 330, and DAN 335 required. Co-requisites: Concurrent enrollment in a dance technique class. Development of theme and style in a dance technique class.

Offered Fall

DAN 440. Dance for Children. (3 Units)

Study of developmentally appropriate creative movement experiences for children. Examination of teaching methodology designed to develop foundational movement skills, artistic exploration of movement elements, improvisational techniques, imagination and creativity, and how these learning activities can be taught across the curriculum.

Offered Fall, Spring, Summer

DAN 450. Musical Theatre Studies. (3 Units)

Prerequisites: DAN 203, DAN 315, DAN 325, DAN 335 or permission of instructor, Musical Theatre Studies is an exploration of American Musical Theatre, Students will study the work of the actor/singer/dancer and develop as performers.

Offered As needed

DAN 480. Dance Rehearsal & Performance. (2 Units)

Prerequisites: DAN 200, DAN 205, DAN 210, DAN 215, DAN 220, DAN 225 are recommended. Participation as a performer and/or choreographer in a Dance Program approved, University sponsored production. Concert participation is by audition only. Repeatable for credit. Four hours of activity per week.

Offered Fall, Spring

DAN 494. Independent Study. (1-3 Units)

Advanced study in dance, with each student participating in a special project mutually agreed upon by student and instructor.

Offered Fall, Spring

DAN 495. Special Topics:. (1-3 Units)

Intensive study of a dance topic of current interest. May be repeated for credit to a maximum of 6.0 units.

Offered Infrequent

DAN 496. Internship in Dance. (1-3 Units)

Prerequisite: Consent of instructor. Collaborative production activity on various projects in the digital media arts curriculum. Repeatable for credit for up to three units. Two hours of activity per week.

Offered Infrequent

DAN 499. Senior Dance Thesis. (2 Units)

Prerequisites: Dan 430 or permission of instructor. Co-requisite: DAN 340 A capstone course culminating in the production of a final, collaborative project. Selected in consultation with and evaluated by a faculty panel. Restricted to seniors.

Offered Spring

Dance, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Major Requirements (58 UNITS)

The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

| Code | Title | Hours |
|---|--------------------------------|-------|
| Lower Division Requirements | | |
| DAN 130 | Global Dance Perspectives | 3 |
| DAN 200 | Jazz I | 2 |
| DAN 205 | Jazz II | 2 |
| DAN 210 | Ballet I | 2 |
| DAN 215 | Ballet II | 2 |
| DAN 220 | Modern Dance I | 2 |
| DAN 225 | Modern Dance II | 2 |
| Select two units of the following: | | 2 |
| DAN 110 | Dance of World Cultures | |
| DAN 120 | Tap Dance | |
| DAN 125 | Tap Dance II | |
| DAN 230 | Dance Touring Ensemble | |
| Select one course from the following: | | 3 |
| THE 264 | Acting I | |
| THE 342 | Fundamentals of Theatre Design | |
| THE 346 | Theatre Workshop | |
| Upper Division Requirements | | |
| DAN 330 | Dance Composition I | 2 |
| DAN 335 | Dance Composition II | 3 |
| DAN 340 | Dance Production | 1 |
| DAN 345 | Rhythmic Analysis | 3 |
| DAN 355 | Forces and Figures in Dance | 3 |
| DAN 375 | Dance Kinesiology & wellness | 1 |
| DAN 430 | Dance Composition III | 3 |
| DAN 480 | Dance Rehearsal & Performance | 2 |
| DAN 499 | Senior Dance Thesis | 2 |
| Select five Dance Technique courses of the following: | | 10 |
| DAN 300 | Jazz III | |
| DAN 305 | Jazz IV | |
| DAN 310 | Ballet III | |
| DAN 315 | Ballet IV | |
| DAN 320 | Modern Dance III | |
| DAN 325 | Modern Dance IV | |
| DAN 410 | Ballet V | |
| DAN 415 | Ballet VI | |
| DAN 420 | Modern Dance V | |
| DAN 425 | Modern Dance VI | |
| Select one Theatrical Design course of the following: | | 3 |
| THE 340 | Costuming | |
| THE 341 | Makeup and Hair | |

| | | |
|---|---------------------------|-----------|
| THE 347 | Stage Lighting and Sound | |
| THE 376 | Stage Management | |
| Select one Dance Studies course of the following: | | 3 |
| DAN 385 | Somatics and Conditioning | |
| DAN 395 | Dance Pedagogy | |
| DAN 440 | Dance for Children | |
| DAN 450 | Musical Theatre Studies | |
| Total Hours | | 56 |

- **Cultural Literacy:** Students must demonstrate an acquaintance with a wide selection of dance repertory, the principal eras, genres, and cultural sources and an understanding of procedures for realizing a variety of dance styles.
- **Performance Skills:** Students must demonstrate the ability, knowledge and/or skills in performing areas in one or more areas of dance beyond basic coursework and performance appropriate to the individual's needs and interests.
- **Discipline Proficiency:** Students will demonstrate fundamental knowledge of the body and of kinesiology as applicable to work in dance and an understanding of choreographic processes, aesthetic properties of style, and the ways these shape and are shaped by artistic and cultural ideas and contexts.
- **Oral Communication:** Students will demonstrate criticism literacy, aesthetic knowledge, and speaking skills, providing informative information and insightful messages in a public setting.
- **Written Communication:** Students will demonstrate competence in using language, critical thinking, research and analysis through written skills.
- **Critical Thinking:** Students will demonstrate the ability to develop and defend critical evaluations and have the ability to identify and work conceptually with the elements of dance.

| DAN 310 | Ballet III | |
| DAN 320 | Modern Dance III | |
| Technique Advancement | | |
| Total Hours | | 23-24 |

Students may advance to a higher level in a dance technique requirement if they receive prior permission from the Dance Advisor.

Design

College of Arts & Humanities
Department of Art & Design

Program Description and Features

The **B.A. in Design** provides students with a rich, multifaceted design education in the areas of print, web, interactive, photography, and motion design. The pedagogy of the program is set in learning by doing. Its distinctive upper-division courses are structured with level I courses to focus on principles of design, and technical skills around type and image-making through a series of multiple assignments. Upper-division level II courses focus on the conceptualization and execution of single semester-long projects.

Students are introduced to professional practices through individual and group projects by creating a professional portfolio, reviewed by a panel of professional designers, by participating in nationwide design competitions, and by an opportunity to work with clients through the ALGA student-run design group. A two-semester portfolio class helps students build strong career objectives in the field of design, with an internship placement in collaboration with the Career Center. Students also experience creating work for social change and environmental impact and are exposed to the work of a broad, multicultural range of artists/designers and historical, contemporary art/design movements.

The B.A. in Design is committed to offering students a more flexible schedule to allow them to participate in internships and work by providing all of the design courses as blended courses, meeting once a week face-to-face in a classroom, and 50% online, it is the only CSU program in the arts with such a modality. On-campus, classes are held in two specialized Mac Labs running the latest industry design software: Adobe Creative Cloud. Majors in Design also have free access to it for home-usage. Laser cutters and 3D printers have been recently acquired to provide students with the latest innovative technology.

The **Minor in Design** provides students with an introduction to the fundamentals of print, media, and graphic design.

The **Minor in Digital Graphics** provides students with an introduction to motion design fundamentals.

The **Minor in Photography** provides students with an introduction to the fundamentals of photography.

Academic Advisement

Advising for Art & Design majors and minors is done by Art and Design faculty members as well as the College of Arts and Humanities advisors. Students must stop by the Department of Art and Design to be assigned to an advisor. The advisor will facilitate the student's smooth passage through his/her educational experience. Students must consult their advisors each semester before registration to discuss their program. For General Education information and advisement, contact the University Advisement Center located in WH 220, (310) 243-3538.

Preparation

High school students planning to major in design at CSU Dominguez Hills will be best prepared by taking a maximum variety of art and/or design courses offered in their school. In addition, they should have some general exposure to the history of art.

Community College transfer students seeking admittance to the CSU Dominguez Hills Department of Art and Design will be best prepared by having completed the equivalent of the following CSU Dominguez Hills lower division art courses:

- Introduction to Design Applications (DGN 110)
- 2-D Design (ART 170)
- 3-D Design (ART 171)
- Drawing I (ART 179)

Students should be aware that community college courses do not satisfy upper-division course requirements.

Student Organizations

CSUDH AIGA Student Group, Advisor Michele Bury

Scholarships

Please contact the Department of Art and Design for additional scholarship requirements.

Graduation With Honors

Undergraduate students may be candidates for graduation with Honors in Art if they meet the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of 3.5 in all courses used to satisfy the upper-division requirements for the Art major

Career Possibilities

The Bachelor of Arts in Design prepares students for entry-level careers in design from print, web, app, and motion design and to prepare students for further studies.

Examples of possible careers and positions: Print design, print production, web design, advertising, marketing, motion design, app design, illustration, packaging design, photography, interactive media, publication design, branding and identity design, and broadcast design. Creative/design direction.

Emeriti Faculty

Bernard Baker, John Goders, Arthur L. Harshman, Gilah Yelin Hirsch, Ivers, Noreen, Larinde, Norman Neuerburg, Ernest Rosenthal, Sidney Glen White

DGN 110. Intro to Design Applications. (3 Units)

Introduction to digital imaging using Adobe Photoshop and to vector based art using Adobe Illustrator. Six hours of activity in-class an online per week.

Offered Fall, Spring

DGN 310. Graphic Design 1. (3 Units)

Prerequisite: DGN 110. Introduction to graphic design as a form of visual communication through the use of type, image and form. Projects explore design processes, creative problem solving, and the basic design practices of critiques and discussion. Six hours of activity per week. Fee required.

Offered Fall

DGN 320. Typography 1. (3 Units)

Prerequisites: ART 160 and ART 170. Introduction to basic aspects of letterforms and typography through a variety of projects. Introduction to the historical background, technical considerations, and aesthetic issues of typography. Six hours of activity per week.

Offered Fall

DGN 330. Motion Design 1. (3 Units)

Prerequisite: DGN or DMA 310 or consent of instructor. Introduction to the principles and or elements of motion design. Emphasis on the relationship between typographic principles and fundamentals of animation. Software: Introduction to Adobe After Effects. Six hours of activity per week. Fee required.

Offered Fall

DGN 340. Web Design 1. (3 Units)

Prerequisites: DGN 310 or consent of instructor. Introduction and exploration of the concepts and technologies in web design. Individual and team projects address navigational structures, systems, identity, audience and intent in the design of website prototypes. Six hours of activity per week.

Offered Fall

DGN 345. Illustration 1. (3 Units)

Prerequisites: ART 179 is required; DGN 110 is recommended.

Introduction to illustration, with an emphasis on craftsmanship, as well as learning and employing the illustration process. Explores many aspects of the illustration field, giving students a broad view of the discipline. The skills studied will provide a foundation for work in both illustration and animation. Students will explore personal artistic voice, techniques, design, and visual narrative.

Offered Fall

DGN 410. Graphic Design 2. (3 Units)

Prerequisite: DGN 310 is required. Advanced study of graphic design principles and their application to more complex and comprehensive solutions. Course examines the integration of design with civic engagement, through the completion of an awareness campaign addressing social issues. Students work collaboratively on semester long campaign. Six hours of activity per week. Fee required.

Offered Spring

DGN 420. Typography 2. (3 Units)

Prerequisite: ART 347 is required. Advanced analysis and study of typographic design through projects based on the setting of words, sentences and paragraphs. Projects will gradually increase in scope and complexity dealing with multiple levels of hierarchical meaning. Six hours of activity per week. Fee required.

Offered Spring

DGN 430. Motion Design 2. (3 Units)

Prerequisite: DGN 330. Advanced concepts of motion design as they relate to the use of Adobe After Effects and Cinema 4D. Students will work independently on individual projects from concept to final output. Repeatable course. Six hours of activity per week. Fee required. Offered Spring

DGN 440. Web Design II. (3 Units)

Prerequisites: DGN 340 is required. Intermediate to advanced course in web design, offering in-depth investigation of the planning, design and building of web sites. This course is structured around projects that combine creative exploration and comprehensively learning industry-standard software programs. Six hours of activity per week. Offered Spring

DGN 445. Illustration 2. (3 Units)

Prerequisite: DGN 345 is required. DGN 110 is recommended. Intermediate elective in illustration focuses on craftsman ship. Reinforces the illustration process learned in level 1. Students will explore multiple areas within illustration, creating several advanced projects, with an emphasis on narrative in illustration as it relates to editorial, publishing, and visual development for animation. Students will build their portfolios and refine their personal artistic voice. Repeatable for credit. Offered Spring, Summer

DGN 450. Interactive Design. (3 Units)

Prerequisite: DGN 440 is required. This class will show how to build apps and user base responsive design (UX). Students will gain an understanding of the javascript programming language and explore the most current technologies available. Six hours of activity per week. Fee required. Offered Spring

DGN 460. Portfolio 1 and Internship. (3 Units)

Prerequisite: Senior standing and consent of instructor required. Students will identify and research their career objectives, design their visual identity, start working on their professional portfolio and find and confirm an internship of a minimum of 70 hours to be completed by the end of Portfolio part II. Six hours of activity per week. Fee required. Offered Fall

DGN 470. Portfolio 2 and Internship. (3 Units)

Prerequisites: Senior standing and consent of instructor. Capstone course involving preparation of essential material for seeking a position in graphic design. Emphasizes the preparation of a graphic design portfolio and resume. Six hours of activity per week. Fee required. Offered Spring

DGN 494. Independent Study. (1-3 Units)

Individual students will consult with a Design faculty to conduct an independent project in Design. Restricted to juniors and seniors. Department consent required. Offered As needed

DGN 495. Selected/Variable Topics in Design. (3 Units)

Detailed study Design. Repeatable course. Offered As needed

DGN 496. Internship. (1-3 Units)

Internship in a Design related field, both on campus and externally. Restricted to juniors and seniors. Department consent required. Offered As needed

Design, Bachelor of Arts

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Major Requirements (54 units)

The following courses, or their approved equivalents, are required for all candidates for this degree.

Lower Division Required Courses (12 units)

| Code | Title | Hours |
|---------|------------------------------|-------|
| ART 170 | 2-D Design | 3 |
| ART 171 | 3-D Design | 3 |
| ART 179 | Drawing 1 | 3 |
| DGN 110 | Intro to Design Applications | 3 |

Upper Divisions Required Courses (48 units)

1. Required Courses (45 units)

| Code | Title | Hours |
|---------|----------------------------|-------|
| ARH 352 | Design History | 3 |
| DGN 310 | Graphic Design 1 | 3 |
| DGN 320 | Typography 1 | 3 |
| DGN 330 | Motion Design 1 | 3 |
| DGN 340 | Web Design 1 | 3 |
| DGN 410 | Graphic Design 2 | 3 |
| DGN 420 | Typography 2 | 3 |
| DGN 430 | Motion Design 2 | 3 |
| DGN 440 | Web Design II | 3 |
| DGN 450 | Interactive Design | 3 |
| DGN 460 | Portfolio 1 and Internship | 3 |
| DGN 470 | Portfolio 2 and Internship | 3 |
| PHT 300 | Digital Photography | 3 |

2. Elective (3 units)

| Code | Title | Hours |
|--------------------------------------|------------------------|-------|
| Select one of the following courses: | | |
| ARH 332 | Modern Architecture | |
| ARH 333 | Contemporary Art | |
| ARH 363 | Art of Latin America | |
| ARH 370 | Art and Social Protest | |

Students who complete the B.A. in design program will:

- Create solutions for a wide range of print and digital media projects using problem-solving thinking and creative practices. (Critical thinking)
- Acquire and cite visual and industry-related vocabulary for print and digital media. (Disciplinary Proficiency)
- Know the work of a broad and multicultural range of artists/designers, and of historical, contemporary art/design movements. (Critical thinking)
- Design a wide range of projects relevant to print and digital media using industry-related software applications. (Disciplinary Proficiency)
- Present written and oral critique of a broad range of design work, both by students and professionals. (Communication)
- Design socially engaged work and to engage with the broader community. (Engaged Citizenry)
- Demonstrate the competence of best professional practices in time management, project planning and collaboration for a professional entry level position in print, web, interactivity and motion. (Disciplinary Proficiency)
- Create entry-level professional work and design a portfolio. (Disciplinary Proficiency)

Design, Minor

Requirements (12 units)

The Minor in Design provides students with an introduction to the fundamentals of print media graphic design.

To complete the Minor in Design, the following courses must be taken:

| Code | Title | Hours |
|---|------------------------------|-----------|
| A. Lower Division Required Courses | | |
| DGN 110 | Intro to Design Applications | 3 |
| B. Upper Division Required Courses | | |
| DGN 310 | Graphic Design 1 | 3 |
| DGN 320 | Typography 1 | 3 |
| DGN 340 | Web Design 1 | 3 |
| Total Hours | | 12 |

Digital Graphics, Minor

Requirements (12 units)

The Minor in Digital Graphics provides students with an introduction to the fundamentals of screen-based design.

To complete the Minor in Digital Graphics, the following courses must be taken:

| Code | Title | Hours |
|---|------------------------------|-----------|
| A. Lower Division Required Courses | | |
| DGN 110 | Intro to Design Applications | 3 |
| B. Upper Division Requirements | | |
| Required Courses: | | |
| DGN 310 | Graphic Design 1 | 3 |
| DGN 330 | Motion Design 1 | 3 |
| DGN 430 | Motion Design 2 | 3 |
| Total Hours | | 12 |

Photography, Minor

Requirements (12 units)

The Minor in Photography provides students with an introduction to the fundamentals of photography. To complete the Minor in Photography, the following courses must be taken:

To complete the Minor in Photography, the following courses must be taken:

| Code | Title | Hours |
|---|---------------------|-------|

| Total Hours | | 12 |

Digital Media Arts

Note: The Bachelor of Arts in Digital Media Arts is suspended.

Students are invited to apply to the Bachelor of Arts in Audio Engineering (p. 387) or the Bachelor of Arts in Film and Television Production (p. 557).

College of Arts and Humanities
Department of Digital Media Arts

Program Description

Digital Media Arts at CSUDH is a hands-on, professionally-oriented B.A. Degree program geared for students who want marketable job skills for careers in the television, motion picture, music recording, sound design, and interactive media industries. Students major in one of the three DMA degree options:

1. Audio Recording Option;
2. Music Technology Option; or
3. Television Arts Option.

In this program, students

1. track, mix, and master their own original music recordings in stereo and 5.1 surround sound in our two Recording Studios that are available to students on a 24/7 basis;
2. write, produce, direct, and edit their own music video, documentary, drama, public service announcement (PSA), TV commercial, and client-based video projects in our 10,000 square-foot Television Studio and twelve editing bays that are available to students on a 24/7 basis; and
3. design and author their own interactive DVD, Blu-ray, and websites in our state-of-art computer lab facilities equipped with the latest software.

The mission of the Digital Media Arts Department is to

1. provide an academic program that gives students a solid base in the theory and technology skills required for professional careers in the digital media industries;
2. provide hands-on experience in the basic software and hardware tools utilized in digital media production;
3. provide the opportunity for students to work in teams, applying their producing, directing, writing, composing, editing, and engineering skills to produce a variety of professional-quality digital media products; and
4. develop interpersonal skills and professional demeanor that will enable students to work effectively and cooperatively as team players on collaborative projects in the industry.

The DMA curriculum emphasizes collaborative teamwork among the students in our three program options. For example, Television Arts students will write, produce, film, and edit a TV commercial or short movie that our Audio Recording students then take over to perform the sound design elements of ADR, foley, and sound effects editing, while our Music Technology students compose, arrange, and record original music scores for the film's soundtrack. Conversely, our Audio Recording and Music Technology students record and produce a band's song while the

Television Arts students film and edit the music video for the song and the bonus material for the interactive DVD, Blu-ray, or website, such as interviews with the band and behind-the-scenes "making of" footage.

The Digital Media Arts curriculum is geared for students who want to have careers working as professionals in the digital media industry. These career goals include producer, director, sound engineer, writer, composer, editor, director of photography, camera operator, audio/video post-production, sound designer, disc authoring, MIDI composer/arranger, motion graphics and animation designer, webmaster, and freelance videographer. With Hollywood just 20 minutes from campus, our students have the opportunity to work for and serve internships at a variety of commercial TV stations, recording studios, motion picture studios, audio and video post-production houses, and cable networks. There are also internship and employment opportunities for our students in noncommercial media venues such as educational media at schools and colleges and in-house media production at major corporations.

The Certificate in Television Arts (21 units) and the Certificate in Audio Technology (24 units) are designed for students already holding a Bachelor's Degree whose primary objective is immediate training in the field of television production or audio recording. These certificate programs allow students to concentrate exclusively on just the training in their selected field of study.

Features

Television Studio allows students to produce multi-camera projects in a 10,000 square-foot sound stage equipped with real time 3D virtual set creation for digital compositing on a 40x12 covered cyc, Grass Valley SEG, Inscriber CG, Leicht Still Store, Kino-Flo and Mole-Richardson studio lighting, Mackie 16 channel mixer, and Strand CD80 dimmer system.

Recording Studios equipped with Pro Tools 10 HD with HDX 24 In/Outs; SSL AWS-900+SE, 32x24x2 Console, 32x24x2 Sound Workshop Console, Furman HDS-6 and HR-6 headphone distribution system, Blue Sky monitors, various plug-ins by Sony, Oxford, Line 6, Digidesign, Native Instruments, Focusrite, Massenberg Design Works, M-Audio, and McDSP, and a variety of professional microphones such as Neumann U-87, TLM-170, KM-83/84, AKG C414, Audix DP-5 drum pack, Groove Tube MD-1, and Sennheiser MD421 for recording, mixing, and mastering in stereo and 5.1 surround. Avantone Reference Monitors are also available for composite soundtrack mixing of dialogue, foley, sound effects, and music score for television and film projects.

Design Labs equipped with 20 Mac Pro stations and 25 iMac stations allow students to design disc cover packaging, motion graphics, television titles, websites, and green screen effects using Photoshop, Illustrator, After Effects, and Dreamweaver.

Video Editing Suites allow students to edit projects using Avid, Final Cut Pro, and Premiere in rooms equipped with Encore for Blu-ray and DVD authoring.

Field Production Camera Systems equipped with Panasonic HD camcorders; Nikon full-frame cine-rig DSLR's with prime lenses, Tascam PCM audio recorders, and DP-4 professional monitors; Sachtler tripods; Cobra crane and dolly systems; LED light kits by Dracast, Fiilex, and Ikan; Lowel lighting kits with Rifa softboxes; Chauvet ellipsoidal spots; Reflectmedia portable green screen system; GoPro cameras with helmet, handle bar, and suction cup mounts; steady trackers; sliders; Matthews C-Stands and Road Rags; Sennheiser boom microphone systems with PCS

carbon fiber poles; and Ikan HD field monitors allow students to shoot professional-quality video on location.

Mackie Station consists of a Mackie 16x8 Mixing Console and a Roland A90 full-weighted controller equipped with ProTools M-Powered, Digital Performer, Reason, Tassman, Logic, MOTU Symphonic, and VocAlign for ADR, foley, music scoring, walla-walla, and sfx drop-ins.

Live Sound Reinforcement System equipped with QSC power amps, JBL speakers, Yamaha stage monitors, Audix DP-7 drum mike package, Shure SM57/58 mikes, and Atlas stands.

Students receive hands-on instruction on the proper use of the equipment in these production facilities. Once students pass their Proficiency Exams, they can schedule access to these facilities on a 24/7 basis to work on class production projects outside of class time.

Graduation with Honors

Undergraduate students may be candidates for graduation with honors in Digital Media Arts if they meet the following criteria:

1. A minimum of 45 units in residence at CSU Dominguez Hills.
2. A minimum grade point average of 3.7 in all courses used to satisfy the requirements for the Digital Media Arts major.
3. A cumulative grade point average of 3.7 in all courses taken at CSU Dominguez Hills.

Academic Advisement

It is crucial that students meet with the appropriate advisor of their selected degree option before enrolling in or planning a course schedule in Digital Media Arts. (Television Arts, George Vinovich gvinovich@csudh.edu); (Audio Recording, Mark Waldrep mwaldrep@aixmediagroup.com); (Music Technology, Joshua McKendry jmckendry@csudh.edu). These advisors assist students in selecting appropriate courses and staying on track in their selected degree option in Digital Media Arts.

Digital Media Arts courses are offered in a specific sequence that requires prerequisite and co-requisite courses. Consulting with the appropriate advisor ensures that students complete their program in the most expedient and efficient manner possible. As such, students do not waste time and energy by completing unnecessary courses and units. Advisors also serve as career counselors and concerned mentors to help bridge the gap between the world of the university and the world of the working professional.

Preparation

Students entering the Digital Media Arts program who wish to focus on Audio Recording or Music Technology should have a demonstrated interest and/or background in music, composition, audio production, and current uses of personal computers in the field. Additionally, students familiar with the internet and other online information services will find these skills essential in the rapidly changing world of digital media production and delivery. Students interested in pursuing professional careers in the highly-competitive television and film industry should be aware that those who succeed in establishing a career in the industry are characteristically hard-working, disciplined, focused on a career, and most of all, resilient to persevere in the face of continuous rejection. Strong writing, interpersonal, and computer skills are a definite advantage in this field.

Recommended Lower Division Electives

| Code | Title | Hours |
|--------------------|------------------------|-----------|
| ART 170 | 2-D Design | 3 |
| COM 100 | Media & Society | 3 |
| COM 206 | Photojournalism | 3 |
| COM 250 | Writing for the Media | 3 |
| MUS 110 | Music Fundamentals | 3 |
| MUS 111 | Intro. To Music Theory | 3 |
| Total Hours | | 18 |

Student Organizations

DMA students can enhance their academic studies and involvement in the industry by joining the DMA Success Club on campus or by becoming student members of professional organizations such as the Society of Motion Picture and Television Engineers (SMPTE), the Media Communicators Association- international (MCA-i), or the local student chapter of the Audio Engineering Society (AES). Student membership in these professional associations allows students to network with industry executives and working professionals regarding internships and job opportunities in the field. The proximity of the campus to the center of the media and entertainment industry of Hollywood, Burbank, and Los Angeles allows students to attend major trade show conferences such as ShowBiz Expo, Post L.A., Musicom, DV Expo, SMPTE, NAB and SIGGRAPH.

Career Possibilities

Graduates from the Digital Media Arts program will find career opportunities in a wide range of existing entertainment, informational, and educational venues. The broad focus of the instruction in this program prepares students for roles as media production specialists, audio engineers and producers, interactive designers, music technologists, and MIDI-assisted composers. The emerging areas of the internet will create additional demand for graduates skilled in advanced media production techniques. The Television Arts program with its hands-on training and production project experience prepares graduates for a variety of career opportunities in the television and film industry such as producer, director, writer, camera operator, video editor, lighting director, sound technician, and motion graphics designer in a variety of venues such as commercial broadcasting at TV stations, networks, studios, and production houses; noncommercial television such as in-house corporate, government, educational, and institutional communications operations; public access and local origination cable television; and of course, free-lance production services as a video consultant.

Undergraduate Programs

Bachelor

- Digital Media Arts, Bachelor of Arts (p. 530)

Certificate

- Audio Technology, Certificate (p. 530)
- Television Arts, Certificate (p. 531)

Faculty

George Vinovich, Department Chair
 Professors: David Bradfield, Mark Waldrep
 Division Office: LCH E-303, (310) 243-3543

Courses

DMA 195. Special Topics in Music. (1-3 Units)

Offered As needed

DMA 300. Digital Technology, Culture and the Arts. (3 Units)

Prerequisite: HUM 200 or consent of instructor. Survey of the impact of digital technology on culture and the arts including but not limited to the visual arts, music, dance, video, film, literature, and theatre. Offered Fall

DMA 310. Tools and Techniques in Digital Media Production. (3 Units)

Prerequisite: Must have junior standing or consent of instructor. Introduction and examination of the fundamental software and hardware tools used in the production of media for digital delivery. Emphasis on creative production techniques and the development of skills required in the digital media industry. Restricted to majors. Offered Fall, Spring

DMA 320. TV Directing I. (3 Units)

Co-requisites: Concurrent enrollment in DMA 323 and DMA 328. Fundamental techniques in producing and directing multi-camera television productions in the studio, and single-camera, film-style programs on location. Emphasis on producer/director skills for performance-based productions in the studio and on location. Six hours of activity per week. Restricted to majors. Offered Fall

DMA 322. TV Directing II. (3 Units)

Prerequisites: DMA 310, DMA 320, DMA 323, and DMA 328 are required. Advanced techniques in producing and directing multi-camera television productions and single-camera, film-style programs in the studio and on location. Emphasis on producer/director skills for drama-based productions. Six hours of activity per week. Restricted to majors. Offered Spring

DMA 323. TV Crew Production. (3 Units)

Co-requisite: Concurrent enrollment in DMA 328 and either DMA 320 or DMA 322. Participation in a variety of crew assignments on production projects in the studio and on location. Repeatable for credit. Six hours of activity per week. Offered Fall, Spring

DMA 324. TV Titling and Animation. (3 Units)

Prerequisite: DMA 310 is required. Introduction to computer-generated titles and basic, two-dimensional animation for television production. Students will explore the aesthetics of graphic design elements for the screen and related software programs. Six hours of activity per week. Restricted to majors. Offered Spring

DMA 325. EFP Videography. (3 Units)

Prerequisites: DMA 310, DMA 320, DMA 323, and DMA 328 are required. Restricted to majors. Application of professional-format videotape recording techniques used in location shooting. Emphasis on using portable lighting systems, reflectors, and location sound recording techniques. Experience in technical aspects of equipment setup, system trouble shooting, and preventative maintenance. Six hours of activity per week. Offered Spring

DMA 326. TV Sound Design. (3 Units)

Prerequisites: DMA 310, DMA 320, DMA 323, and DMA 328 are required. Use of synthesizers, samplers, and MIDI for music scoring, sound effects drop-ins, ADR, and foley in television and stage productions. Six hours of activity per week. Restricted to majors. Offered Spring

DMA 327. Independent TV Production. (3 Units)

Prerequisite: DMA 322 and DMA 323. Aspects of producing television features on an independent-producer basis. Practice in pre-production coordination, location shooting, directing, and editing techniques in the production of a broadcast-quality feature segment for public airing on the University cable TV channel. Repeatable for credit. Six hours of activity per week.

Offered Spring

DMA 328. DSLR Video Production. (3 Units)

Co-requisites: DMA 320 and DMA 323 are required. Introduction to the theory and practice of using DSLR photo cameras for video production. Students will learn fundamental techniques for lighting, proper exposure, camera movement, audio recording, and video editing.

Offered Fall

DMA 330. Audio Recording. (3 Units)

Prerequisite: Junior standing or consent of instructor. Theory and practice of sound recording. Acoustics, psychoacoustics, microphones and microphone techniques, consoles, mixers, signal processing and multi-track recording techniques.

Offered Fall

DMA 331. Audio Recording Lab. (1 Units)

Prerequisite: Previous or concurrent enrollment in DMA 330. Hands-on experience in studio recording using Pro Tools HD. Live mix to stereo techniques and fundamentals of studio flow path. Three hours of laboratory per week.

Offered Fall

DMA 335. Music Synthesis. (3 Units)

Prerequisite: Junior standing or consent of instructor. Production techniques, equipment, theory, and history of electro-acoustic music with an emphasis on MIDI. Psychoacoustics and a conceptual approach to electronic music production using a variety of MIDI-based software.

Offered Fall

DMA 336. Music Synthesis Lab. (1 Units)

Prerequisite: Previous or concurrent enrollment in DMA 335. Hands-on experience in production using hardware and software synthesizers and MIDI in conjunction with Pro Tools, Digital Performer, Reason, and various sequencers for a variety of musical styles. Three hours of laboratory per week.

Offered Fall

DMA 346. Digital Media Prod Workshop. (1 Units)

Prerequisite: Consent of instructor. Investigation of a single topic, chosen in consultation with a faculty member, culminating in a paper, presentation, or creative project. Repeatable for credit for up to six units.

Offered Fall, Spring, Summer

DMA 400. Strategies for Digital Media Delivery. (3 Units)

Prerequisite: DMA 310. Advanced exploration into the methods and mechanics of informational and entertainment design and delivery. Evaluation of media production strategies including linear and non-linear scripting, conditional branching, and virtual reality via online, optical disc, and hybrid formats

Offered Fall, Spring

DMA 410. Media Arts Projects. (3 Units)

Prerequisites: DMA 320 required. Experience in producing client-based projects for a variety of campus, corporate, or community organizations. Students participate in a variety of activities ranging from video coverage and live sound reinforcement of campus events to writing, filming, recording and editing client-based projects.

Offered Spring

DMA 430. Advanced Audio Recording. (3 Units)

Prerequisite: DMA 330 and consent of instructor. A continuation of DMA 330 incorporating digital audio workstations and associated peripheral equipment, signal processing and mastering for optical disc and web delivery, console automation, 5.1 surround mixing techniques, and DVD audio.

Offered Spring

DMA 431. Advanced Audio Recording Lab. (1 Units)

Prerequisite: Previous or concurrent enrollment in DMA 430 and consent of instructor. Practical multi-track session work featuring increased access to studio facilities for individual and group recording projects using Pro Tools HD in conjunction with analog console and Digidesign Command 8 control surface. Three hours of laboratory per week.

Offered Spring

DMA 432. Recording Studio Maintenance. (2 Units)

Prerequisites: PHY 331 and concurrent enrollment in DMA 433 is recommended. Installation, maintenance, trouble shooting, and repair of professional audio equipment in a studio environment. Repeatable course.

Offered Fall, Spring

DMA 433. Recording Studio Maintenance Lab. (1 Units)

Prerequisites: PHY 331 and previous or concurrent enrollment in DMA 432. Installation, maintenance, trouble shooting, and repair of professional audio equipment in a studio environment. Repeatable course. Three hours of laboratory per week.

Offered Fall, Spring

DMA 435. Advanced Music Synthesis. (3 Units)

Prerequisite: DMA 335 and consent of instructor. A continuation of DMA 335. Synthesizer and sampler sound design using a variety of synthesis strategies and concepts. Direct software and hardware sound synthesis theory using software synthesizers such as Tassman and Reason, modular synthesizers and MIDI.

Offered Spring

DMA 436. Advanced Music Synthesis Lab. (1 Units)

Prerequisite: Previous or concurrent enrollment in DMA 435 and consent of instructor. Experience in programming a variety of digital synthesizers including Tassman, Reason, FN-7, and Motu software synthesizers. Three hours of laboratory per week.

Offered Spring

DMA 438. Music Production. (3 Units)

Prerequisite: DMA 330, DMA 331 and DMA 431 are required. Analysis of recordings in music production. Spatial and timbral ear-training techniques for recording engineers and producers. Access to Pro Tools HD 5.1 surround system and a variety of engineering and production topics which include surround mixing techniques, advanced microphone techniques, DVD Audio specifications, and DVD authoring. Restricted to majors.

Offered Fall, Summer

DMA 439. Music Production Lab. (1 Units)

Prerequisites: DMA 330, DMA 331, DMA 430 and DMA 431 are required. Practice in the production of studio recordings. Responsibility for music composition and arrangements, rehearsal, performance, studio and musician bookings, artist promotion, engineering assistance and artistic direction and management. Interdisciplinary projects involving video or theatre are also possible. Repeatable course. Three hours of laboratory per week. Restricted to majors.

Offered Fall, Summer

DMA 447. Audio Projects Lab. (1 Units)

Prerequisite: DMA 331 and DMA 431. Advanced studio session work culminating in passing the Audio Recording Proficiency Exam
Offered Infrequent

DMA 450. Computer Music. (3 Units)

Prerequisite: DMA 435 and consent of instructor. Advanced studies in computer applications in music. Course concentrates on CSOUND and new technologies. Topics will vary with new innovations in the field. Students will have access to Pro Tools LE workstations for individual projects. A-C/NC grading.
Offered Summer

DMA 452. Audio Production. (3 Units)

Prerequisite: DMA 430 and DMA 431 are required. Advanced skills in integrating audio production components of voice over, music, and sound effects with graphics, motion graphics and video on multi-media projects that include proposal, interactive design, audio recording, music mixing, mastering, and encoding and authoring to optical disc.
Offered Fall

DMA 456. Mixing and Mastering. (3 Units)

Prerequisites: DMA 438 and DMA 439 are required. Theory and practice in various styles of mixing and mastering popular music. Application of panning, equalization, dynamics processing, spatial effects, modulation effects, automation, song sequencing and methods for final delivery. Hardware-based instruction. ITB digital methods and hybrid workflows.
Offered Spring

DMA 460. Digital Audio Workstation Concepts. (3 Units)

Prerequisites: DMA 435 and DMA 436 are required. Theory and practice of operating a Digital Audio Workstation using a variety of software programs. Experience in recording session set-ups, grouping, touting techniques, MIDI composition and editing, song structuring, an editing and mixing scenarios for outputting stereo stem mixes.
Offered Fall

DMA 490. Senior Seminar. (3 Units)

Prerequisite: DMA 331 and DMA 431. Research projects, chosen in consultation with the instructor, culminating in a paper, presentation, or creative project.
Offered Infrequent

DMA 494. Independent Study. (1-3 Units)

Traditional and modern approaches to the study of language. Fundamentals of phonology and grammar.
Offered Fall, Spring

DMA 495. Special Topics in DMA. (3 Units)

Study of a single topic or contemporary issue in the entertainment industry of television, film, music, or digital media to be determined by the instructor. Repeatable for credit. Repeatable 3 times for a maximum of 9 units.
Offered Infrequent

DMA 496. Internship in the Media. (1-3 Units)

Directed work experience in the television, film, music, or digital media industry under the supervision of a professionally-qualified mentor. CR/NC grading only. Repeatable for credit. Ten hours of work experience per week.
Offered Fall, Spring, Summer

DMA 499. Senior Proj Digital Media. (2 Units)

Prerequisite: Senior standing or consent of instructor. A capstone course culminating in the production of a final, collaborative project in conjunction with students from other program options in Digital Media Arts. Selected in consultation with and evaluated by a faculty panel.
Offered Fall, Spring

Audio Technology, Certificate Requirements

Required Courses

| Code | Title | Hours |
|---------|----------------------------------|-------|
| DMA 330 | Audio Recording | 3 |
| DMA 331 | Audio Recording Lab | 1 |
| DMA 335 | Music Synthesis | 3 |
| DMA 336 | Music Synthesis Lab | 1 |
| DMA 430 | Advanced Audio Recording | 3 |
| DMA 431 | Advanced Audio Recording Lab | 1 |
| DMA 432 | Recording Studio Maintenance | 2 |
| DMA 433 | Recording Studio Maintenance Lab | 1 |
| PHY 331 | Audio Electronics | 3 |
| PHY 335 | Digital Electronics | 3 |
| PHY 337 | Microprocessors | 3 |

Total Hours **24**

Synthesizer Proficiency Exam

Requires the student to demonstrate a knowledge of contemporary analog and digital synthesis terms and techniques and to produce a specified sonic design on a studio synthesizer.

Audio Recording Proficiency Exam

Requires the student to demonstrate a practical working knowledge of standard studio procedures and techniques as well as operational familiarity with the equipment found in a multi-track recording facility.

Digital Media Arts, Bachelor of Arts Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Major Requirements (51-61 units)

Students must select one of the options listed. The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

| Code | Title | Hours |
|---------------------------------|--|-----------|
| Common Core Requirements | | |
| DMA 300 | Digital Technology, Culture and the Arts | 3 |
| DMA 310 | Tools and Techniques in Digital Media Production | 3 |
| DMA 346 | Digital Media Prod Workshop | 1 |
| DMA 400 | Strategies for Digital Media Delivery | 3 |
| DMA 499 | Senior Proj Digital Media | 2 |
| Total Hours | | 12 |

Program Learning Outcomes

- Demonstrate application of the basic software and hardware tools used in digital media production (in area of emphasis)
- Produce a product that reflects professional level production value and standards relative to student producer time and budget constraints.
- Demonstrate ability to create and produce a capstone digital media product that meets the objective of its target audience.
- Demonstrate ability to work effectively and cooperatively with others as a co-producer on team projects
- Perform in a manner that is consistent with the professional image and demeanor of the digital media industries.

Television Arts, Certificate

Requirements

Required Courses

| Code | Title | Hours |
|--------------------|---------------------------|-----------|
| DMA 320 | TV Directing I | 3 |
| DMA 322 | TV Directing II | 3 |
| DMA 323 | TV Crew Production | 3 |
| DMA 324 | TV Titling and Animation | 3 |
| DMA 325 | EFP Videography | 3 |
| DMA 327 | Independent TV Production | 3 |
| Total Hours | | 18 |

EFP Proficiency Exam

Requires the student to pass a hands-on, practical exam on the setup, calibration, operation, troubleshooting, and storage of the electronic field production camera system, lighting kit, and Sachtler support system used for location shooting. Students must pass this exam before checking out equipment for off-campus use on production projects.

Edit Room Proficiency Exam

Requires each student to pass a hands-on, practical exam on the operation, calibration, and troubleshooting of the Avid Nonlinear editing system. Students must pass this exam before booking independent editing time outside of class hours.

Earth Science

College of Natural and Behavioral Sciences

Department of Earth Science and Geography (<https://www.csudh.edu/earth/>)

Program Description

The Earth Science major is one of two programs housed in the Department of Earth Science and Geography. The Earth Science degree is a cross-disciplinary program that trains students for careers involving earth system science, which broadly includes the physical science behind the interactions of the lithosphere, atmosphere, and hydrosphere. The Earth Science program also examines the contribution of those systems to natural landscapes and geological hazards. Importantly, it also considers the relationship of human populations to these geosystems.

If you are curious about the answers to the following questions, Earth Science might be the right major for you:

- How and when did the Earth form? How has Earth evolved? What is the history of life on Earth? When did mass extinctions occur, and what caused them?
- What is plate tectonics, and how do tectonic plates interact? How do mountains form? Where and why do volcanoes form? What causes earthquakes? Can we predict them? Why or why not? How do tsunamis form?
- What are the different drainage patterns for river systems? How do flowing water and ice sculpt the landscape? How does the generation of hydroelectricity change the characteristics of flowing rivers?
- What is groundwater, why is it important to humans, and what are the implications of groundwater contamination?
- What has Earth's climate been like in the past, and how might the climate change in the future? What are the greenhouse effect and ocean acidification? What is the carbon cycle, and why is it important?
- What are the differences between non-renewable, renewable, and perpetual natural resources? What is the supply versus demand for water, petroleum, coal, minerals, and other natural resources? What are the pros and cons of various energy sources including nuclear, solar, wind, geothermal, hydroelectric, and carbon-based fuels?

Features

The Earth Science and Geography Department has a map library containing several thousand map sheets. The department also has two dedicated computer laboratories, the Earth Sciences Spatial Analysis Laboratory (ESSAL) which acts as a center for remote sensing and GIS-based research projects, and a teaching laboratory that provides computer-based teaching with an emphasis on geotechniques. These labs provide sophisticated image processing and spatial analysis software as well as libraries of satellite imagery and spatial databases. There is also a climate research laboratory with specialized equipment for analyzing tree rings and cave deposits. Additional equipment includes Global Positioning System (GPS) receivers and advanced instruments for field data collection.

The faculty have expertise in plate tectonics, historical geology, and field geology; hydrology, atmospheric science, air quality, climate change, and landscape change; geographic information systems, remote sensing, and sensor networks, plus urban planning, environmental planning, and environmental science. The broad expertise of the faculty provides an unusual opportunity for motivated undergraduate students to work closely with their professors and gain "hands-on" experience within domestic and international research projects.

Academic Advisement

Majors should consult with their advisor prior to registration each semester. Records of student progress toward the degree are accessible online through MyCSUDH. Students should check their progress regularly.

Preparation

For high school students, the best preparation for the Earth Science major is a well-rounded program of high school courses in humanities, four years of natural sciences, mathematics, and written and oral communication.

Community college transfer students should have completed an introductory course in geology or physical geography. Other introductory courses in the physical or biological sciences, including field courses, are encouraged.

Graduation With Honors

An undergraduate student may be a candidate for graduation with Honors in Earth Science provided they meet the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of at least 3.5 in all courses used to satisfy the upper-division requirements in the major.

Career Possibilities

The Earth Science major prepares students for a wide range of employment opportunities within government, industry and nonprofit organizations. Specific fields include environmental protection and consulting; natural resource management; air and water quality monitoring; geologic hazards and geotechnical investigations; water supply and power generation utilities. The Earth Science degree also provides excellent preparation for graduate programs.

Students may prepare for a teaching career at a secondary school (middle or high school) by completing an approved "Subject Matter Preparation Program" for Geoscience. Completion of such a program is the first step in meeting the state requirements for a teaching credential. As the program requirements for the Subject Matter Preparation Program routinely change, interested students should consult with the appropriate advisor for current information.

Undergraduate Programs

Bachelor

- Earth Science, Bachelor of Science (p. 533)

Minor

- Earth Sciences, Minor (p. 535)

Faculty

John Keyantash, Department Chair
Parveen Chhetri, Brendan McNulty, Ashish Sinha

Instructional Support Tech Office: LIB 1114, (310) 243-3368
Department Office: NSM B-202, (310) 243-3377

Emeriti Faculty

Rodrick Hay, Ralph Saunders, David Sigurdson, Jamie Webb

Courses

EAR 100. Physical Geology. (3 Units)

Prerequisite: Concurrent enrollment in EAR 101 is recommended. Volcanoes, earthquakes, oceanic processes and continental drift. Rock and mineral identification is enhanced by concurrent enrollment in EAR 101. Meets certain general studies requirements, is fundamental to the Geology major, and has wide-ranging applications in art, commerce, public policy, and science. Field Trip.
Offered Fall, Spring

EAR 101. Physical Geology Laboratory. (1 Units)

Prerequisite: Concurrent enrollment in EAR 100 is recommended. Nature and origin of rocks and minerals through determination of physical properties of specimens. Topographic and geologic map analysis. Geological features from stereoscopic air photos. Recommended elective for students interested in the outdoors, archaeology, mineral deposits, land use, and natural hazards.
Offered Fall, Spring

EAR 200. Earth History and Evolution. (3 Units)

Prerequisite: EAR 100, EAR 101, and concurrent enrollment in EAR 201. This course covers the evolution of the Earth's dynamic systems and their record through geologic time. Emphasizes interactions between the physical, chemical, and biological components of the Earth system. Includes development of the geologic time scale, origin of the planet, early life, biological evolution, the fossil record, mass extinctions, and climate change.
Offered Spring even

EAR 201. Earth History Lab. (1 Units)

Prerequisite: Concurrent enrollment in EAR 200. Laboratory analysis of depositional processes and ancient environments. Topics include radiometric dating, geologic maps, facies analysis, fossil records, and stratigraphic correlations. Three hours of laboratory per week
Offered Spring even

EAR 312. Natural Disasters. (3 Units)

Prerequisite: Completion of lower division General Education. Examines the impact of natural events on human activities and vice versa. Mankind's uneasy relationship with atmosphere, oceans and not-so-solid Earth. Examines the study of earthquakes, volcanoes, floods, landslides, tsunamis, climate change, hurricanes, tornadoes, and wildfires.
Offered Fall, Spring, Summer

EAR 370. The World Ocean. (3 Units)

Prerequisite: EAR 100 or GEO 200 is recommended. This course introduces global oceanographic phenomena and emphasizes the interdisciplinary nature of ocean processes, including the ocean's role in regulating Earth's climate. Topics include the physical and chemical characteristics of seawater, and the vertical and spatial distributions of temperature, salinity, gases, and density; surface and deep-water circulations
Offered Spring odd

EAR 376. Field Mapping. (3 Units)

Prerequisites: EAR 100 and EAR 101 are required, or consent of instructor. Introduction to geological and environmental field mapping. Techniques include working with topographic maps and remotely-sensed images, use of Brunton compass traverse methods, and interpretation of sedimentary rocks and geological structures (faults, folds). Applications to geotechnical work, resource management, environmental and archaeological surveys, and outdoor education activities. Eight hours of laboratory and one-half hour of lecture per week.
Offered Spring even

EAR 410. Environmental Geology. (3 Units)

Study of human interaction with the geologic environment. Mitigating exposure to geological hazards (earthquakes, volcanic eruptions, landslides); environmental consequences of geological resource (fossil fuels, minerals, water) extraction and consumption; surface and groundwater contamination; acid rain; climate change; waste burial. Offered Spring odd

EAR 416. Earth Science for Teachers. (3 Units)

Prerequisites: Completion of lower division General Education. Study of planet Earth featuring units in geology, oceanography, weather, and astronomy, as appropriate for elementary and secondary school teachers. Two hours of lecture and three hours of laboratory per week Offered Fall, Spring, Summer

EAR 450. Plate Tectonics and the Rock Cycle. (4 Units)

Prerequisites: EAR 100 and EAR 101 are required. Study of plate tectonic processes and how they relate to the formation of rocks and the rock cycle. Includes earthquakes, volcanic activity, hot spots and plate boundary types. Offered Fall even

EAR 460. Global Change. (3 Units)

An interdisciplinary introduction to the science of understanding global change natural as well as anthropogenically induced. Key topics include the physical climate system and its variability, the carbon cycle, land and water issues, and the impact of global change on society. Offered Fall even

EAR 476. Groundwater. (3 Units)

Prerequisites: EAR 100 and EAR 101 are required. CHE 108 or CHE 110 is recommended. Study of the movement of underground water through geological layers. Topics include the geological characteristics of aquifers, wells, and connectivity with surface water resources. Includes groundwater chemistry and contaminant transport, plus considerations for the management of groundwater resources. Offered Fall even

EAR 478. Engineering Geology. (3 Units)

Prerequisite: EAR 450. Evaluation and abatement of geologic hazards affecting construction projects and land use. Landslides, groundwater pollution, subsidence, flooding, and earthquake effects. Mechanical properties of rocks and soils. Case histories and site investigations. Application to business, law, construction engineering and environmental studies. Two hours of lecture and three hours of laboratory per week. Offered Infrequent

EAR 490. Sr Sem In Earth Sciences. (1 Units)

Prerequisite: Senior standing in Earth Sciences or consent of instructor. Study and discussion of current research in Earth Sciences. Techniques of oral presentation, library research and preparation of audiovisual materials. One hour of seminar per week. Offered Infrequent

EAR 494. Independent Study. (1-3 Units)

Prerequisite: Consent of instructor. Independent study of a particular earth science or environmental topic under the supervision of an Earth Science faculty member. Offered Fall, Spring

EAR 495. Advanced Top In Ear Sci. (3 Units)

Selected topics in Earth Science with course content to be determined by instructor. Repeatable course. Offered Spring

EAR 496. Internship In Earth Sci. (1-3 Units)

Prerequisite: Consent of instructor. Employment as an assistant or volunteer in an earth sciences-related firm or government agency. Course may run at time convenient to student and employers, including summer. Student should contact Department faculty three months prior to enrollment. CR/NC grading. Repeatable course. Offered Fall, Spring

EAR 498. Directed Research. (1-3 Units)

Prerequisite: Consent of instructor. Research of a particular earth science or environmental problem under the direction of an Earth Science faculty member. Offered Fall, Spring

Earth Science, Bachelor of Science Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Students completing this major are not required to complete a minor in another field.

Major Requirements (58-63 units)

| Code | Title | Hours |
|--|--|-------|
| Lower Division Required Courses | | |
| EAR 100 or GEO 200 | Physical Geology Physical Geography | 3 |
| EAR 101 | Physical Geology Laboratory | 1 |
| EAR 200 | Earth History and Evolution | 3 |
| EAR 201 | Earth History Lab | 1 |
| Select one of the following: | | 7-10 |
| MAT 131 & MAT 171 | Elementary Statistics and Probability and Survey of Calculus for Management and Life Sciences | |
| MAT 191 & MAT 193 | Calculus I and Calculus II | |
| Select one of the following options: | | 8-10 |
| Option 1: | | |
| CHE 110 & CHE 112 | General Chemistry I and General Chemistry II | |
| Option 2: | | |

| | | |
|--|--|--------------|
| PHY 120 & PHY 122 | Elements Of Physics I and Elements Of Physics II | |
| Option 3: | | |
| BIO 120 & BIO 121 | Principles of Biology I and Principles of Biology Laboratory I | |
| BIO 122 & BIO 123 | Principles of Biology II and Principles of Biology Laboratory II | |
| Upper Division Required Courses | | |
| EAR 370 | The World Ocean | 3 |
| EAR 376 | Field Mapping | 3 |
| EAR 410 | Environmental Geology | 3 |
| EAR 450 | Plate Tectonics and the Rock Cycle | 4 |
| EAR 460 | Global Change | 3 |
| EAR 490 | Sr Sem In Earth Sciences | 1 |
| GEO 370 | Numerical Methods in Geography | 3 |
| GEO 412 | Rivers and Streams | 3 |
| GEO 415 | Geographic Information Systems | 3 |
| Select nine units from the following: | | 9 |
| EAR 476 | Groundwater | |
| GEO 310 | Geomorphology | |
| GEO 315 | The Weather | |
| GEO 357 | Urban Environmental Geography | |
| GEO 380 | Biogeography | |
| GEO 408 | Remote Sensing and Image Processing | |
| GEO 416 | Earth's Climates | |
| GEO 420 | Natural Resources | |
| GEO 433 | Environmental Analysis and Planning | |
| EAR 495 | Advanced Top In Ear Sci | |
| EAR 496 | Internship In Earth Sci | |
| Total Hours | | 58-63 |

- **Geographic Literacy:** Students will apply their knowledge of the world's geography by interpreting topographic and thematic maps. They will demonstrate their ability to think geographically by analyzing geographic problems at a variety of scales.
- **Environmental Processes:** Students will demonstrate their understanding of the utilization and distribution of key natural resources. This will include fundamental transport processes such as the hydrologic cycle, the rock cycle, and circulations through the world ocean and global atmosphere and their relationship to contemporary environmental issues.
- **Geotechniques:** Students will demonstrate their understanding of geotechniques such as GIS, remote sensing, spatial statistics, and field maps. Students will apply spatial statistics and other forms of numerical analysis to interrogate existing and original geographical data sets.
- **Field Experience:** Students will apply field research techniques toward the completion of field mapping and other data collection exercises.
- **Written and Oral Communication:** Students will demonstrate their ability to describe research and to summarize research results in essays, written reports and oral presentations.
- **Group Activities:** Students will be able to work together in small groups to collect and analyze classroom/field data and they will demonstrate their ability to collaborate with other students to deliver research presentations.

- **Professional Preparation:** Students will hone research skills and work on research projects which reflect their command of the subject matter and its relevance to contemporary environmental issues, as well their command of geotechniques and their application. The research projects prepare students for graduate school and/or the workforce, and can be used as examples of the kinds of knowledge and expertise that they could bring to prospective employers.

4-Year Degree Roadmap

| Course | Title | Hours |
|--|--|--------------|
| First Year | | |
| Fall | | |
| GE Area A1 | Oral Communication | 3 |
| GE Area A3 | Logic/Critical Thinking | 3 |
| GE Area C | Arts and Humanities | 3 |
| GE Area D | Social Science | 3 |
| GE Area E | Lifelong Learning and Self-Development | 3 |
| Hours | | 15 |
| Spring | | |
| THE 120 | Fundamentals of Speech | 3 |
| MAT 131 or MAT 191 | Elementary Statistics and Probability or Calculus I | 3-5 |
| EAR 100 or GEO 200 | Physical Geology or Physical Geography | 3 |
| EAR 101 | Physical Geology Laboratory | 1 |
| GE Area C or D | | 3 |
| Elective to meet 120 units (If registered in MAT 191, elective course not necessary this term) | | 2-3 |
| Hours | | 15-18 |
| Second Year | | |

Earth Sciences, Minor

The Minor in Earth Sciences requires completion of 19 units. The lower division requirement includes courses which satisfy university General Education requirements.

The Minor in Earth Sciences requires completion of 19 units. The lower division requirement includes courses which satisfy university General Education requirements.

Requirements

| Code | Title | Hours |
|---|-----------------------------|-----------|
| Lower Division Required Courses | | |
| EAR 100 | Physical Geology | 3 |
| EAR 101 | Physical Geology Laboratory | 1 |
| GEO 200 | Physical Geography | 3 |
| Upper Division Required Courses | | |
| Select one of the following options: | | 12 |
| Option 1: | | |
| Complete any 12 units of upper division Earth Sciences (EAR) courses | | |
| Option 2: | | |
| Complete any six units of upper division Earth Sciences courses with six units selected from the following geography courses: | | |
| GEO 310 | Geomorphology | |
| GEO 315 | The Weather | |
| GEO 412 | Rivers and Streams | |
| GEO 416 | Earth's Climates | |
| Total Hours | | 19 |

Educational Leadership Justice

College of Education
Division of Graduate Education

Program Description

California State University, Dominguez Hills (CSUDH) offers a Doctor of Education in Educational Leadership degree designed to ensure critically conscious equity leaders are ready to lead in all executive settings by bridging the divide between educational practice and the rigorous acquisition and application theory. These leaders will apply the knowledge and skills to transform and improve the quality of P-16 education in the South-Central Los Angeles and South Bay region of Los Angeles County and beyond. The program, titled Educational Leadership for Justice in Education (EDLD), will prepare candidates to assume executive leadership position in P-16 educational settings and related agencies such as County Offices of Education, K-12 District Offices, Charter School Boards, and educational non-profits. It is designed to be a high quality, high touch, academically rigorous doctoral program that addresses the following mission.

The missions of the EDLD for Justice program is to equip educational leaders to champion justice and equity in all educational settings. We facilitate the development of the leaders' mindsets, moves, and skills needed to:

- examine their transformative potential and transformative actions

- interrogate, dismantle, and re-imagine historically oppressive systems
- create spaces that center on community wealth, cultural capital, and voice
- ground their practice on the CSUDH Liberatory Leadership Framework
- design creative solutions to existing, and new, challenges in the field of education

The program philosophy is focused on using a culture of care to address inequities that are pervasive in the the educational system and hinder the academic success of student who are culturally and linguistically diverse, have disabilities, or are economically disadvantaged. The EDLD for Justice program is seated in the College of Education (COE) in the Division of Graduate Education (GED) and aligns fully with the College's Mission and Vision statements. The understanding that COE students need to be "grounded in the principles of justice, equity and critical consciousness" is a thorough line for students in the College of Education (general education teachers, ed specialist, counselors, administrators) and will continue in this doctorate program in preparing executive leaders. More specifically, the EDLD for Justice program extends the work of the CSUDH School Leadership Program (SLP), where candidates establish their Liberatory Stance in the SLC Preliminary Administrative Services Credential Induction Program to culminate with Liberatory Leadership as the model used to transform entire educational systems as candidates from the EDLD for Justice program.

Critical features of the program include:

- Developing collaborations skills to address the problems of practice to create collaborative cultures that provide actions to solve the problems of practice.
- Relationship building, that establishes trust and a common language among students, faculty, and school partners.
- Research Support Seminars that will embed the development of a research proposal for the dissertation throughout the program. The inclusion of these seminars provides ongoing support of the students' research efforts and allows students to identify and involve research advisors as early as possible in the degree program.
- Course instructor will provide a stable advising relationship with the candidates in their group. Applied laboratories are collaborations amongst and between candidate, faculty, and practicing educational leaders.
- The candidate and doctoral faculty will conduct research, conduct policy analyses, and implement small or largescale interventions in selected school. Their work with the faculties at these sites will make contributions to practice and help advance the field of urban educational leadership. The systemic inquiry and practices undertaken are expected to affect schools, educational support services, and educational policy.

The EDLD for Justice program will provide a deep understanding of the relationship between schools and society; democracy, local control, and education; equal protection under the law; systemic inequalities in the educational workforce; and issues of equity and access. Using a Liberatory Leadership lens steeped in principles of justice, equity, and inclusion. They will have the ability to promote high academic performance for all students, facilitatie continuous learning and transformative practices within districts and across schools, and mobilize resources, human, political, and fiscal, to redress system inequalities. Graduates will engage and enlist members of

city governments, school boards, business, political, and parental communities in joint efforts to create policy and make strategic decisions designed to radically transform the life chances of all children. Graduates will also know how to forge and sustain cultures of change through strategic collaborations. As part of the CSU system, the CSUDH program meets the stated expectations of the system found in the Senate Bill.

The EDLD for Justice program is a 60-unit cohorted, applied research degree program that takes place over nine consecutive semesters (including summers) for experienced leaders in the field of education are employed in full-time positions. the program is a Face-to-Face/Hybris program with a combination of on-campus face-to-face didactic courses (80%) and hybrid synchronous courses (20%). It offers research-based knowledge, skills, behaviors, and dispositions required to understand, plan, develop, implement, and evaluate educational programs using the les of justice, equity, diversity, ethics, and leadership to address issues in urban educational settings. Program graduates will earn the degree designation of Doctor of Education (Ed.D.) in Education Leadership with an emphasis on educational leadership for justice in schools. One cohort of thirty experienced educational leaders will be accepted and enrolled each academic year. Expected time to completion of the degree, which includes the writing of the dissertation, is intended to be three calendar years, including summers. There are options for candidates who may need to take longer to complete the program.

The program will utilize an interdisciplinary teaching approach with a small faculty-student ratio (1:15 for content and research courses and 1:4 for dissertation courses). The signature pedagogies that reflect what counts as knowledge in the field of education and how things become known come from a variety of teaching methods and diverse pedagogies such as:

- collaborative problem solving
- case studies
- laboratory projects using extant statistical/research data
- ethnographic and participatory research studies, fieldwork projects, and applied projects (including presentations, flowcharts, and program recommendations)
- book reviewers; reviews of annotated bibliographies
- job shadowing
- online course sessions
- threaded discussions accompanying student assignments
- reflective essays
- policy analysis and studies
- reflective practice cases
- research and literature review papers (range 5-20 pages)
- individual and group research projects
- self-reflection essays
- simulations involving role playing, and scenario responses, and structured interview protocols for use with practitioners

Additionally, candidates will contribute to preparation of scholarly articles for publication and to the development of grant proposals. Pedagogies that promote engagement, learning, and development of professional leadership. The broad scope of pedagogical approaches is designed to develop knowledge and skills that equip graduates of the EDLD for Justice program for leadership in schools facing the most challenging issues in California.

Academic Advising

Advising

The objective of advising is two-fold. First, advisement is governed by the principle that enhancing the academic and professional development of students in the EDLD for Justice program is a central purpose of the program. Second, advisement promotes a well-planned and efficient doctoral Ed.D. course of study that can be completed within three years by working professional and facilitates advocacy on behalf of students and their needs. Advising is the responsibility of CORE EDLD for Justice faculty who will oversee the progress of all students, provide consistent and accurate advising, and ensure students remain on-track for program completion. Core Doctoral faculty who lead the Research Support seminars will advise students with regard to the Written Qualifying Examination, approval by the Institutional Review Board.

Students in the EDLD for Justice program will be assigned a faculty advisor at the beginning of their first year. This person will meet with each candidate to provide individualized guidance for the student during the first two years of the program to assist in the completion (coursework, qualifiers, and dissertation). Once dissertation work has commenced, the Dissertation Chair will replace the faculty advisor.

The Program Director and Research Coordinator will provide support for students with respect to major milestone activities, including making arrangements for the qualifying examinations, the proposal hearing and the dissertation oral defense. In addition to the faculty advisor and the Research Coordinator, program faculty will be available for consultation on a regular basis. All program faculty members are required to schedule office hours both in person and through Zoom to accommodate working professionals. Additionally, all program faculty members will provide out of class advising and academic support regarding coursework assignments. All courses are designed to include face-to-face meetings as well as having synchronous and asynchronous work interspersed throughout sessions. Also, students have access to each faculty member's email address and office phone number

Dissertation Chairs

Through dissertation supervisions, dissertation chairs have the opportunity to serve both as advisors and mentors, going beyond the academic directing of research by modeling and creating a professional relationship with doctoral students and assisting them in their professional endeavors.

Mentoring

To ensure that candidates for the doctorate have mentors who assist them in learning leadership roles in institutional contexts and inducting candidates into the professional networks necessary to P-12 academic leaders, the Doctoral Executive Council will establish a trained corps of mentors from among adjunct faculty and other practitioners holding executive level P-12 positions. Mentors will be oriented to the EDLD for Justice program requirements and curriculum, especially as it relates to field experience components. Each candidate will be assigned a mentor who will be responsible for providing the candidate with coaching, modeling, and informal assessment on best ways to integrate research, theory, and practice.

Preparation

Admission to the Educational Leadership for Justice program requires completion of a master's degree in a related field and submission of all specified admission requirements.

Admission Requirements

Applications to the program are accepted at one time each year. Students planning to seek admission to the program should submit a complete application packet including required supporting materials. All applications will be completed online.

In accordance with Title 5 of the California Code of Regulations, Section 41020, admission shall be granted on a competitive basis; meeting the minimum requirements qualifies an individual for but does not guarantee admission to the program.

1. Article 4.1 (CSU Guidelines for EdD Programs) requirements for admission shall apply to all EDLD for justice program applicants and shall include, at minimum, the following:
 - a. The applicant holds an acceptable baccalaureate and master's degree earned at a regionally accredited institution(s), or the applicant has completed equivalent academic preparation as determined by the appropriate campus authority.
 - b. The applicant has attained a cumulative grade point average of at least 3.0 in upper-division and graduate study combined.
 - c. The applicant was in good standing at the last institution of higher education attended,
 - d. The applicant has demonstrated sufficient preparation for, experience in, and potential for educational leadership, including successful experience in leadership in school, postsecondary, of community contexts, and/or policy leadership; academic excellence; problem-solving ability; technological proficiency; interest in critically assessing current educational policies and practices; and interest in improving current educational policies and practices. Evidence considered in the admission process shall include but not be limited to:
 - i. Three letters of recommendation attesting to the leadership and scholarship potential of the applicant.
 - ii. Submission of a written statement of purpose reflecting an understanding of the challenges facing organizations in the field of education in California.
 - iii. Attendance at a personal interview.
 - iv. Submission of one of the following statements:
 1. a statement from the applicant's employer, indicating support for the applicant's doctoral studies; or
 2. a statement from the applicant, describing the applicant's plan for meeting professional responsibilities and the demands of the program.

Program Requirements

Students in the program complete three areas of study through the 60 semester units. Area 1 is comprised of ten core leadership courses. Area 2 is comprised of nine courses focused on research. To advance to candidacy students will complete a qualifying examination. This qualifying examination will demonstrate the students' command of knowledge relevant to educational leadership as developed throughout the core courses. The final area of study, Area 3, comprises the four dissertation support courses taken over two semesters. Students specialize in Leadership for Justice in Education with a curricular emphasis in: (1) urban school leadership, teaching, and learning for diverse learners (e.g., culturally and linguistically diverse, economically

disadvantaged, and those needing specialized education services); (2) organization and systemic transformation; and (3) diversity, inclusion and ethical decision making,

Student in the program will be required to:

- Attend a 3-day Doctoral Onboarding Retreat
 - Attend one class weekly on campus and two additional classes biweekly on the weekend
 - Earn a grade of 'B' or higher in all courses
 - Attend an International Education Leadership Trip
 - The CSUDH Education for Justice program requires the successful completion of 31 units of Leadership didactic course work 17 units of Doctoral Research and 12 units of Doctoral Dissertation Writing for a total of 60 units.
 - Successful completions of four qualifiers:
 - Qualifier #1: Comprehensive Exam
 - Qualifier #2: Dissertation Proposal Defense
 - Qualifier #3: Oral Dissertation Defense
 - Qualifier #4: Written Dissertation Publication
 - Earn at least a "B" to pass each course. No course with a grade lower than a "B" will be applied to the degree program.
 - Maintain a GPA of 3.0 or higher to fulfill degree requirements.
 - Remain in good academic standing. A student who is in academic notice may not be granted a doctoral degree.
- Educational Leadership Justice, Doctorate (p. 539)

ELJ 700. Leadership for Justice (Self). (3 Units)

Introduces candidates to the program and the liberatory/justice leadership framework providing the foundation Exploration of leadership models, positionality, intersectionality, purpose and leadership identity for enacting leadership using a justice lens begins for each candidate.
Offered Summer

ELJ 705. Leadership for Justice (Organizations). (3 Units)

Focuses on candidates identifying key aspects of their organization that are critical to justice leadership. Data driven decision-making, utilization of all sources of data and information and the identification of actions to promote justice will be addressed.
Offered Summer

ELJ 710. Leadership for Systems Thinking. (3 Units)

Takes candidates deeper into the context of their own organization to analyze their systems and the framing that guides them. In addition, focuses on the implications identified as structural, social and psychological barriers.
Offered Fall

ELJ 715. Leadership for Praxis. (3 Units)

Focuses on the identification of justice focused relational obligations, accountability, governance and communication within organizations.
Offered Fall

ELJ 720. Leadership for Participatory Liberation. (3 Units)

Designed to build candidates' knowledge and capacity to address systemic racism in their organization. Focuses on aspects of racism and its manifestation in beliefs, values and inequitable stances present in their workplace
Offered Spring

ELJ 725. Leadership for Supportive and Inclusive Communities. (3 Units)

Asks candidates to focus on themselves, their organization, and the larger community that they serve. Utilizing the mindset and moves of liberatory leadership, candidates examine their values, principles, and ethics using supportive, inclusive and humanizing practices.
Offered Spring

ELJ 730. Assessments, Evaluation, and Design Thinking. (3 Units)

This course will introduce candidates to program evaluation and the cyclical of assessing processes and structure to investigate organizations' areas of strength and challenges for internal change and improvement.
Offered Summer

ELJ 735. Politically Intelligent Leadership. (3 Units)

The course will teach candidates how to interpret and utilize laws and policies to better understand political structures(organizations), Justice Leadership, and their responsibility as a justice leader (self).

ELJ 740. Leadership for Learning, Development, and Organizational Transformation. (3 Units)

This course focuses on the human potential within organizations for sustainable growth based on rational aspects and formulating a plan for individual and collective growth.

ELJ 745. Cosmopolitan Leadership. (4 Units)

Candidates revisit their positionality as researchers, leaders, and members of the global community ensuring that they foster a culture of authenticity and liberation in their organizations. Candidate will self-interrogate to clarify their leadership growth and experience in the program.

ELJ 760. Research Design. (3 Units)

Examination of research methodologies including ethical and foundational aspects of educational research as applied in justice-focused leadership practices. Topics include research skills, identifying educational problems, evaluating research, understanding qualitative and quantitative research literature, and IRB. The CITI is completed.
Offered Fall

ELJ 762. Advanced Quantitative Research methods. (3 Units)

Advanced hypothesis testing using quantitative methods, including research designs used to dismantle inequities. Statistical analyses using t-test, analysis of variance, factorial analysis of variance, multiple regression, and chi-square, with an emphasis on research questions addressing justice focused interpretations of results

ELJ 764. Advanced Qualitative Research Methods. (3 Units)

In- depth study of qualitative research methods, analysis and interpretation for understanding and application to advance the change in leadership to support equity and justice will be the focus for this course. Ethnographic interviews, participant and naturalistic observation, document analysis and other qualitative data analyses will be emphasized.

ELJ 766. Action Research design & Mixed Methods. (3 Units)

Exploration of the principle and methods used in participatory action research, including using mixed methods, review of current research, full participatory of research participants, validity, ethnical issues, data collection, and social action for social justice.

ELJ 771. Research Seminar I. (1 Units)

A seminar-format course designed to introduce students to the academic and reflective writing skills needed for dissertation proposals. Offered Spring

ELJ 772. Research Seminar II. (1 Units)

A seminar-format courses designed to develop students' academic and reflective writing skills for doctoral student preparing to write their dissertation proposals. Offered Summer

ELJ 773. Research Seminar III. (1 Units)

A seminar-format Course designed to advance doctoral students' academic and reflective writing, skills, following American Psychological Association (APA) guidelines.

ELJ 774. Research Seminar IV. (1 Units)

A seminar-format course designed to advance doctoral students' academic and reflective writing skills, including their writing, and their proposed data collection plan for their proposed data collection plan for their dissertation following American Psychological Association guidelines.

ELJ 775. Research Seminar. (1 Units)

A seminar-format course designed to enhance students' skills in critiquing theirs and others academic writing for their dissertation proposal, and explaining research for justice in leadership.

ELJ 780. Dissertation Seminar I. (0 Units)

In this course candidates develop a dissertation that identifies and educational issue or practice within a particular community; review professional literature from multiple disciplinary perspectives; design appropriate research to investigate the issue; and begin data collection.

ELJ 781. Dissertation Seminar II. (3 Units)

In this course candidates develop their dissertation with ongoing, supported advising on data analysis implications, and conclusions. This course will also support their oral and written dissertation defense.

ELJ 785. Dissertation Writing I. (3 Units)

This course is designed for dissertation chairs and their candidates to work together to engage in dissertation development and writing.

ELJ 786. Dissertation Writing II. (3 Units)

The course is designed for dissertation chairs and their candidates to work together to engage in dissertation development and writing.

ELJ 800. EdD Continuation Course. (1 Units)

EdD candidates who have completed their course work but not their dissertation. Signature of EdD Program Director required.

Educational Leadership Justice, Doctorate

Required Courses (60 units - 23 courses)

Semester 1 - Summer (6 units - 2 courses)

| Code | Title | Hours |
|---------|--|-------|
| ELJ 700 | Leadership for Justice (Self) | 3 |
| ELJ 705 | Leadership for Justice (Organizations) | 3 |

Semester 2 - Fall (9 units - 3 courses)

| Code | Title | Hours |
|---------|---------------------------------|-------|
| ELJ 710 | Leadership for Systems Thinking | 3 |
| ELJ 715 | Leadership for Praxis | 3 |
| ELJ 760 | Research Design | 3 |

Semester 3 - Spring (7 units - 3 courses)

| Code | Title | Hours |
|---------|---|-------|
| ELJ 720 | Leadership for Participatory Liberation | 3 |
| ELJ 725 | Leadership for Supportive and Inclusive Communities | 3 |
| ELJ 771 | Research Seminar I | 1 |

Semester 4 - Summer (7 units - 3 courses)

| Code | Title | Hours |
|---------|--|-------|
| ELJ 730 | Assessments, Evaluation, and Design Thinking | 3 |
| ELJ 762 | Advanced Quantitative Research methods | 3 |
| ELJ 772 | Research Seminar II | 1 |

Semester 5 - Fall (7 units - 3 courses)

| Code | Title | Hours |
|---------|---------------------------------------|-------|
| ELJ 735 | Politically Intelligent Leadership | 3 |
| ELJ 764 | Advanced Qualitative Research Methods | 3 |
| ELJ 773 | Research Seminar III | 1 |

Semester 6 - Spring (5 units - 2 courses)

| Code | Title | Hours |
|---------|---|-------|
| ELJ 740 | Leadership for Learning, Development, and Organizational Transformation | 3 |
| ELJ 766 | Action Research design & Mixed Methods | 3 |
| ELJ 774 | Research Seminar IV | 1 |

Semester 7 - Summer (5 units - 2 courses)

| Code | Title | Hours |
|---------|-------------------------|-------|
| ELJ 745 | Cosmopolitan Leadership | 4 |
| ELJ 775 | Research Seminar | 1 |

Dissertation Courses - (12 units - 4 courses)

Semester 8 - Fall (6 units - 2 courses)

| Code | Title | Hours |
|---------|-------------------------|-------|
| ELJ 780 | Dissertation Seminar I | 0 |
| ELJ 786 | Dissertation Writing II | 3 |

Semester 9 - Spring (2 units - 2 courses)

| Code | Title | Hours |
|---------|-------------------------|-------|
| ELJ 781 | Dissertation Seminar II | 3 |
| ELJ 786 | Dissertation Writing II | 3 |

As Needed (Summer, Spring, Fall)

| Code | Title | Hours |
|---------|-------------------------|-------|
| ELJ 800 | EdD Continuation Course | 1 |

- 1. Visionary, Supportive, & Inclusive Leadership.** Graduates will apply relevant methods to research, develop, nurture, and articulate an anti-racist vision for inclusive organizations.
- 2. Reflective and Activist Practice.** Graduates integrate reflective praxis using lenses of equity, care, and humanizing pedagogy focused on

ethical behavior to intentionally center multiculturalism and anti-racist practices in their leadership practices.

3. **Equity and Cultural Proficiency.** Graduates apply culturally proficient practices and advocate for equity and justice to dismantle systems of cultural and racial domination and oppression for families and communities.
4. **Systems Thinker.** Graduates incorporate their understanding of the dynamics and complexities of large organizations when working with educational communities to design global systems that include diverse perspectives, achieve a shared vision, and support continuous improvement of the organization.
5. **Leadership Capacity, Organizational Management.** Graduates utilize multiple genres of communication and a values-based, research-guided, adaptive, and generative mindsets to establish collaborative relationships with the purpose of eliminating systems of oppression and racism in education.
6. **Developing Human Capacity for Organizational Growth.** Graduates develop communities that collaboratively engage in continuous and deliberate learning by creating and maintaining liberated, anti-racist educational spaces, where critically conscious, justice oriented, and innovative educators work together to honor all voices, and reduce disparities in learning outcomes.
7. **Politics & Policies.** Graduates evaluate the dynamic nature of their systems, policies and politics for inequalities and inclusion. With the knowledge of political styles, they establish and maintain strategic relationships to influence policy and policy makers to allocate resources focused on reducing and dismantling structures, policies, and practices that contribute to institutionalized racism and support the goals of inclusion, equity, and achievement for all.
8. **Practitioner Researcher.** Graduates engage in oral and written inquiry, critical reflection, and the construction/reconstruction of knowledge to promote justice in education and to inform praxis and organizational goals.

³ Qualifier #3 due by April 25 in the third year of the program.

⁴ Qualifier #4 due by June 30 of the third year of the program.

English

College of Arts and Humanities
Department of English

Program Description and Features

Bachelor of Arts

As a major, English offers a varied and soundly-based program that unifies the study of composition, language, and literature. Within the English major, students may concentrate their programs of study in literature or English education. Minors can focus on Creative Writing or English Literature. Also within the English Department, the [Linguistics major](#) and [minor](#) focuses on the structures, sounds, and formations of languages.

The English major prepares the student for many different career paths, including teaching, law, social work, writing or editing, arts and entertainment, business, politics and public service, media, journalism, and many more. It also prepares students for advanced study in graduate and professional schools. Students develop skills in critical thinking, writing, and research, which are valuable in many professions. It is truly a versatile major.

The English: Literature option provides a strong foundation for the critical study of literature, its histories, and its structures. Students pursuing a degree in Literature will engage deeply with a variety of literary theories and critical methodologies as they create and construct their own analyses of literary and cultural texts. The program encourages students to investigate and interrogate the construction of the literary canon, as well as to expand its boundaries through the inclusion of diverse texts and perspectives. The capstone seminar, English 490 Seminar in Literature, enables students to demonstrate their development as readers, writers, thinkers, and as professional scholars.

Students may prepare for a career in teaching English at the secondary level (junior high or high school) by completing the English major. An approved "Subject Matter Preparation Program" such as our B.A. in English (English Education Option) offers further training useful to future educators. The English: Education option provides students with a solid foundation in the study of literature and language along with training in pedagogy and a secondary field. Completion of the English major is the first step in meeting the state requirements for a teaching credential. Interested students should consult the departmentally designated advisor for current information.

Master of Arts

The program leading to the Master of Arts Degree in English is a 30-semester-unit curriculum. Opportunities for emphasis in British and American Literature, Rhetoric and Composition, and Teaching English as a Second Language exist in a flexible curriculum.

The Master of Arts in English prepares students for doctoral degrees or for community college teaching positions. It is also a strong finishing school for students who wish to continue to develop their writing, reading, and research skills beyond the undergraduate level. The concentration in Rhetoric and Composition specifically prepares students to teach composition at the community college level; it also improves the instructional skills of in-service teachers of English in the secondary schools. Graduate students also may elect to do all of their work in the study of literature. Many students have discovered that work at both the undergraduate and graduate levels has provided them with the skills that enable them to succeed in business, industry, and other professions.

Students may choose to complete a concentration in the Teaching of English as a Second Language (TESL). The M.A. English: TESL program prepares students to teach adult ESL/EFL. Graduates go on to teach community college or adult school classes, or they teach abroad. This

program also provides a solid foundation for those who plan to pursue a doctorate in either Linguistics or Applied Linguistics.

Academic Advisement

All of the full-time faculty serve as academic advisors. Students may either choose their own advisors, or they may be assigned to advisors. Students who would like to be assigned to an advisor should come to the department office for assistance.

Students are urged to see an advisor upon admission, upon completion of 60 semester units, and during the first semester of their senior year. Academic advisors may refer their students to other student services when appropriate.

Preparation

Four years of high school college-preparatory English courses must have been completed in partial fulfillment of the admission requirements of The California State University.

Graduation with Honors

Undergraduate students who have met the following criteria will be awarded departmental honors at graduation:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. An overall grade point average of 3.6 for upper-division courses taken for the major in English at CSUDH.

Undergraduate Programs

Bachelor

- English, Bachelor of Arts (p. 547)

Minors

- Creative Writing, Minor (p. 547)
- English, Minor (p. 553)
- Linguistics, Minor (p. 553)

Certificates

- Professional and Creative Writing, Certificate (p. 553)
- Rhetoric and Composition, Certificate (p. 554)
- Teaching of English to Speakers of Other Languages (TESOL), Certificate (p. 554)

Graduate Programs

Master

- English, Master of Arts (p. 551)

Subject Matter Preparation

- English, Subject Matter Preparation (p. 553)

Faculty

Andrew Kalaidjian, Department Chair

Iara Mantenuto, Associate Chair

Debra Best, Cramer R. Cauthen, Timothy Chin, Thomas J. Giannotti, Jon Hauss, Roderick Hernandez, Kimberly Huth, Jane Lee, Siskanna

Naynaha, Helen Oesterheld, Sherwin Sales, David Sherman, Malik Stevenson

Department Of#ce: LCH E-315, (310) 243-3322

Emeriti Faculty

Larry Ferrario, Lois Feuer, Lila B. Geller, Joyce Johnson, Violet L. Jordain, Irene McKenna, Burckhard Mohr, David B. Rankin, Abe C. Ravitz, Ephriam Sando, Michael R. Shafer, Lyle E. Smith, Marilyn P. Sutton, Walter Wells, Vanessa Wenzell, Andrea White, Selase Williams, Agnes A. Yamada, Joanne Zitelli, Ed Zoerner

Courses

ENG 107. Reading & Writing LA. (3 Units)

Through reading and writing about place and identity, students are introduced to threshold concepts in writing studies to increase their metacognitive skills, deepen their sense of belonging, and strengthen their growing academic identities.

Offered Summer

ENG 108. Freshman Composition I: Stretch 1. (3 Units)

College-level reading and writing taken over two terms (ENG 108/109) that incorporates additional instruction and support to develop rhetorical knowledge and critical thinking and engage students in writing processes, research and practice of conventions. CR/NC grading.

Offered Fall

ENG 109. Freshman Composition I: Stretch 2. (3 Units)

College-level reading and writing taken over two terms (ENG 108/109) that incorporates additional instruction and support to develop rhetorical knowledge and critical thinking and engage students in writing processes, research and practice of conventions. Graded A-C-/NC.

Offered Spring

ENG 110. Freshman Composition Accelerated. (3 Units)

College-level reading and writing that develops rhetorical knowledge and critical thinking and engages students in writing processes. Graded A-C-/NC.

Offered Fall, Spring

ENG 111. Freshman Composition II. (3 Units)

Prerequisite: ENG 110 or equivalent. Reinforcement of basic writing skills with emphasis on persuasion and argumentation, including a documented essay. Aids in writing convincing arguments and assembling, organizing, and documenting evidence supporting a thesis. Graded A-C-/NC.

Offered Fall, Spring, All terms

ENG 112. Freshman Composition Supported. (3 Units)

College-level reading and writing that incorporates additional instruction and support to develop rhetorical knowledge and critical thinking and engage students in writing processes, research, and observation of conventions. A-C-/NC grading.

Offered Infrequent

ENG 150. Languages of the World. (3 Units)

Introduction to linguistics as a social science. Includes an overview of the world's languages and language families, with an investigation of how social issues and language impact each other. Not open for credit toward the English major.

Offered Fall, Spring

ENG 194. Independent Study in English. (1-3 Units)

Offered As needed

ENG 195. Special Topics in Composition. (1-4 Units)

Offered Infrequent

ENG 202. English Literature to 1642. (3 Units)

Survey of British poetry, drama, and prose to 1642. Offered Fall, Spring

Offered All terms

ENG 203. English Literature: 1642-1832. (3 Units)

Survey of British poetry, drama, and prose, 1642-1832. Offered Fall, Spring.

Offered Fall, Spring, Summer

ENG 204. English Literature: 1832- Present. (3 Units)

Survey of British poetry, drama, and prose, 1832- present. Offered Fall, Spring

ENG 205. Literary Genres and Devices. (3 Units)

Prerequisite: Completion of GE Area A2: Written Communication.

Introduces a series of literary genres including stories, poems, plays, essays, and the novel, with characteristic devices including point of view, symbol, plot and imagery.

Offered Fall

ENG 210. Study of Language. (3 Units)

Prerequisite: Completion of G.E. Area A2. Forms of prose fiction from different periods and national literatures. Written exercises required.

Offered Fall, All terms

ENG 230. Literature and Popular Culture. (3 Units)

Ways of reading literature and popular culture to enhance understanding, appreciation, and enjoyment. Requires frequent writing assignments.

Offered Fall, Spring

ENG 240. American Literature to 1865. (3 Units)

Offered All terms

ENG 241. American Literature after 1865. (3 Units)

Intensive study of selected American works after 1865, with reading across periods, genres, and traditions, including texts by underrepresented and marginalized groups. Offered Fall, Spring.

Offered All terms

ENG 271. Introduction to Creative Writing. (3 Units)

Experiences in creative writing through encounters with selected literary works.

Offered Fall, Spring, Summer

ENG 302. English Literature to 1642. (3 Units)

Prerequisite: Completion of G.E. Area A2 Written Communication . Survey of British poetry, drama, and prose to 1642.

Offered Fall, Spring

ENG 303. English Literature: 1642-1832. (3 Units)

Prerequisite: Completion of G.E. Area A2: Written Communication. Survey of British poetry, drama, and prose, 1642-1832.

Offered Fall, Spring

ENG 304. English Literature: 1832-Present. (3 Units)

Prerequisite: Completion of G.E. Area A.1. Composition. Survey of British poetry, drama, and prose, 1832-present.

Offered Fall, Spring

ENG 305. Critical Reading of Literature. (3 Units)

Prerequisite: Completion of G.E. Area A.1. Analysis of literature to develop critical reading skills. Intended for students in Liberal Studies and Linguistics; may not be counted toward major/minor in English with Literature option. Written exercises required.

Offered Fall, Spring, Summer

ENG 306. Backgrounds of Literature. (3 Units)

Prerequisite: Completion of G.E. Area A.1. Survey of traditional sources of world literature, including Greek and Roman mythology, Old and New Testaments, and early traditions of Asia, Africa, and the Americas
Offered Spring

ENG 307. Practice in Literary Criticism. (3 Units)

Prerequisite: Completion of G.E. Area A2: Written Communication.
Practice in literary criticism from contemporary theoretical perspectives. For Literature majors and minors in English. Written exercises regularly required.
Offered Fall, Spring

ENG 308. Critical Approaches to Children's Literature. (3 Units)

Prerequisite: Completion of G.E. Area A2. Critical analysis of children's literature from its inception to the present including the concept of the child as a historical, social, cultural, and political construct. Examines genre and form in literary and visual works from various perspectives. 3 hours lecture.
Offered Fall, Spring, Summer

ENG 311. Phonology. (3 Units)

Prerequisite: Completion of G.E. Area A2. The phonetics of a variety of languages and the phonetic phenomena that occur in natural languages. Practice in the perception and transcription of such phenomena. Introduction to the traditional and current views of phonological theory.
Offered Fall, All terms

ENG 312. Morphology. (3 Units)

Prerequisite: Completion of G.E. Area A2. Descriptive and historical (etymological) analysis of the structure of words in English and other languages: common roots, base forms, and affixes; rules of word formation; semantic change.
Offered Spring

ENG 314. English Syntax: Traditional. (3 Units)

Prerequisite: Completion of G.E. Area A2. The structure and meaning of sentences, approached through traditional models of grammar; the role of syntax in writing and composition.
Offered Fall, Spring, All terms

ENG 315. Theoretical Syntax. (3 Units)

Prerequisite: Completion of G.E. Area A.1. The structure and meaning of sentences approached through any current theoretical model of syntax.
Offered Fall

ENG 317. Black English Language and Culture. (3 Units)

This course examines the linguistic features and the cultural, social, historic, and communicative aspects of Black English in the US and across the African and African American diaspora. Students will learn how to create community-based research to explore the past, present and future of Black English in a globalized society and in educational discourse. Students will then learn the writing conventions of sociolinguistics research and critically reflect on our own intersectional experiences and interactions with Black English, in order to position ourselves as sociolinguists within the broader scholarly and academic community. A grade of C or better in this course fulfills the GEAR requirement for Linguistics majors.
Offered Spring, All terms

ENG 320. Literacy, Power, and Identity. (3 Units)

Exploration of literacy as a sociocultural practice. Connections between literacies, individuals and social identities, social and political power structures, and their pedagogical implications

ENG 325. Poetry. (3 Units)

Prerequisite: Completion of G.E. Area A2. Analysis of various forms of poetry, with an emphasis on American and British writers from various eras. Students will learn and apply conventions of oral poetry. Written exercises required.
Offered Fall, Spring

ENG 326. Prose Fiction. (3 Units)

Offered Fall

ENG 327. Drama. (3 Units)

Prerequisite: Completion of G.E. Area A2. Forms of drama by major playwrights from different periods and national literatures. Written exercises required.
Offered Spring

ENG 335. Readings in World Literature. (3 Units)

Prerequisite: Completion of G.E. Area A2. Intensive study of selected major writers from the world's literature, read in translation.
Offered Fall, Spring

ENG 340. American Literature to 1865. (3 Units)

Prerequisite: Completion of G.E. Area A2. Composition. Intensive study of selected American works.
Offered Fall, Spring

ENG 341. American Literature: 1865-Present. (3 Units)

Prerequisite: Completion of G.E. Area A2. Composition. Intensive study of selected American works.
Offered Fall, Spring

ENG 342. African American Literature. (3 Units)

Study of works by African American authors. Historical development of the tradition from its beginnings to the present. Genres include poetry, drama, fiction, and autobiography. Key themes include connections to folk and oral traditions and the role of literature in social protest.
Offered Fall, Spring

ENG 343. African-American Poetry and Drama. (3 Units)

Prerequisite: ENG 111. Historical development of African-American poetry from its roots. Study of major African-American plays. Focus on poetry and drama as media informing particular aspects and textures of the Black American experience.
Offered Infrequent

ENG 344. African-American Prose. (3 Units)

Prerequisite: ENG 111. Selected African-American works of fiction and non-fiction. Analysis of themes, techniques and symbols. Special attention given to folkloric elements; i.e., blues, dozens, folktales, etc., as they are employed in the literature.
Offered Infrequent

ENG 345. Latino/a Literature. (3 Units)

Prerequisite: ENG 111. Study of works by U.S. Latino/a authors. Attention to historical and cultural contexts. Comparative analyses of themes such as identity and community with respect to race, class, gender, sexuality, migration and citizenship.
Offered Fall, Spring

ENG 346. Native American Literature. (3 Units)

Study of works by indigenous writers of North America in their historical, cultural, and tribal contexts. Readings across periods and multiple genres (fictions, poetry, memoir, oral traditions). Key topics include race, gender, sexuality, class nationality and sovereignty. Prerequisite: Completion of G.E. Area A.1. Composition

ENG 347. Literature of Ethnicity and Gender. (3 Units)

Prerequisite: Completion of first year composition. Readings in such areas as Latino American, Asian American, and women's literature. Topic will vary. May be repeated up to six units for the major or minor in English. Offered Fall, Spring

ENG 350. Advanced Composition. (3 Units)

Prerequisite: Completion of GE Area A2 Written Communication. Continued study of writing processes and rhetorical communication, with emphasis on literacy within and across disciplinary contexts and how to negotiate the attitudes and conventions of various discourse communities. May not be counted toward major/minor in English. Satisfies Graduation Writing Assessment Requirement (GWAR). Graded A-C/NC. Offered Fall, Spring, Summer

ENG 351. Composition for Elementary School Teachers. (3 Units)

Prerequisite: Satisfaction of the GWAR. Advanced writing course. Focus on children's writing development, writing process and techniques for teaching composition, and further development of writing abilities of prospective elementary school teachers. Offered Infrequent

ENG 352. Writing and Speaking Skills for Management. (3 Units)

Prerequisites: Satisfaction of the GWAR. Principles and skills of effective communication within organizational management. This course concentrates on eliciting desired responses through various types of business communication in writing. May be counted only once toward major/minor and twice for elective credit. Graded A-C/NC. Repeatable course. Offered Infrequent

ENG 360. Heroes and Antiheroes. (3 Units)

Prerequisite: Completion of G.E. Area A2. Composition. Students will investigate the cultural assumptions and implications lying behind the archetypes of heroism and anti-heroism. Texts will be drawn from mythology, literature, stage drama, and film, with side glances at philosophy and psychology. Offered As needed

ENG 362. Environment in Literature & Culture. (3 Units)

Prerequisite: Completion of G.E. Area A2 Composition. Analysis of the influence of environment on literature with attention to rural vs. urban spaces, nature vs. culture, climate change and environmental justice. Offered As needed

ENG 364. Literary Utopia. (3 Units)

Prerequisite: Completion of G.E. Area A2. Composition. Critical study of traditions of utopian and dystopian literature, with emphasis on genre definitions and intersections with science fiction, fantasy, history, philosophy, and politics. Offered As needed

ENG 398. Directed Research. (1-3 Units)

Prerequisites: Senior standing and consent of instructor. Investigations in the historical and/or theoretical foundations of modern linguistics. Repeatable course. Three hours of seminar per week. Offered Infrequent

ENG 413. History of the English Language. (3 Units)

Prerequisite: Completion of G.E. Area A2. Composition. The evolution of English from its Indo-European origins, through Old and Middle English, to the rise and spread of Modern English. Offered Fall, All terms

ENG 414. American English. (3 Units)

Prerequisite: Completion of G.E. Area A2. Composition. American English from colonial times to the present. Contacts with native, colonial, and immigrant languages and regional, social, and ethnic dialects. Offered Spring

ENG 419. Psycholinguistics. (3 Units)

Prerequisite: Completion of G.E. Area A2. ENG 210 or ENG 314 or one course in psychology. Current theory and research in the psychology of language and its historical background, including experiments on speech production and comprehension, acquisition of language by children, and disorders of speech and language. Offered Infrequent

ENG 420. Linguistic Analysis. (3 Units)

Prerequisite: Completion of G.E. Area A2. ENG 311 or ENG 314. Descriptive and formal analysis of phonological, syntactic, and/or historical data from a variety of human languages. Repeatable for credit. Offered Fall

ENG 433. Thematic Approaches to Literature. (3 Units)

Prerequisite: Completion of G.E. Area A2. An exploration of literature organized around such themes as Women Writers or Death and Dying, using works from a variety of cultures and historical periods. Repeatable course. Offered Infrequent

ENG 451. Advanced Creative Writing. (3 Units)

Prerequisites: ENG 111 and consent of instructor. Practice in various forms of imaginative writing. Repeatable course. Offered Spring

ENG 457. Advanced Composition for Teachers. (3 Units)

Prerequisite: Satisfaction of the GWAR. Advanced writing course for prospective secondary school teachers, designed to develop understanding of writing process and techniques for teaching composition. Course also stresses development of students' own strengths as writers. Offered Fall

ENG 465. Chaucer. (3 Units)

Prerequisite: Completion of G.E. Area A2. Composition. Chaucer's major poetry, its historical and literary background. Offered Fall

ENG 467. Shakespeare. (3 Units)

Prerequisite: ENG 307 is required. Literary analysis of selected comedies, histories, and tragedies. Students will learn and apply performative aspects of Shakespeare's plays. Offered Fall, Spring, All terms

ENG 472. Creative Nonfiction Workshop. (3 Units)

Practice in various forms of contemporary creative nonfiction, such as memoir, essay, literary journalism. Analysis of a wide range of models, exercises in invention techniques, discussion of writing processes, and workshopping of students' drafts and revisions. Repeatable for credit. Offered Fall

ENG 473. Writing Center Theory and Practices. (3 Units)

The history and theoretical foundations of writing centers and writing tutoring. Frequent writing assignments as well as best practices in the teaching of writing. Offered Spring, Summer

ENG 476. Individual Authors and Topics Pre-1700. (3 Units)

Prerequisite: Completion of G.E. Area A2. Composition. Intensive study of a major author, group of authors, or focused topic from the pre-1700 period.

Offered Fall

ENG 477. Individual Authors and Topics Post-1700. (3 Units)

Prerequisite: Completion of G.E. Area A.1. Composition. Intensive study of a major author, group of authors, or focused topic from the post-1700 period.

Offered Spring

ENG 478. Current Issues in Rhetoric and Composition. (3 Units)

Intensive study of selected topics in rhetoric and composition such as invention and teaching of writing, issues in literacy instruction, rhetoric and contemporary culture, composition and cognitive development, the composing process in a rhetoric framework, linguistic approaches to rhetoric. Three hours of seminar per week. Offered Fall.

ENG 485. Literary, Media and Culture Studies. (3 Units)

Prerequisite: Completion of G.E. Area A.1. Composition. Practice in devising strategies appropriate to the needs of students in grades 7-12. Emphasis on techniques of developing textual, media, and cultural literacies, of analyzing genres, of making literature, media, and popular culture accessible, and of generating essay topics from these sources.

ENG 486. ESL Teaching Methods. (3 Units)

Prerequisite: Completion of G.E. Area A2. Composition. Investigation of approaches, methods, and techniques used in second language instruction.

Offered Spring

ENG 487. Introduction to Second-Language Learning and Teaching. (3 Units)

Prerequisite: Completion of G.E. Area A.1. Composition. Focus on linguistic, social, and cultural factors in schooling language-diverse students. Areas of concentration include first and second-language acquisition, history of second-language teaching, current second-language theoretical frameworks, and dual language teaching strategies.

Offered Fall, Spring

ENG 490. Seminar in Literature. (3 Units)

Prerequisite: Consent of instructor. Intensive study of one or more authors, a single historical period, a literary movement or genre, or an aspect of literary criticism. This course examines disciplinary discourse through formal and informal written assignments that stress the importance of literary analysis, research, and revision. Repeatable course. A grade of C or better in this course fulfills the GEAR requirement for all English Literature and English Education majors and minors.

Offered Fall, Spring

ENG 492. Seminar in Linguistics. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Study of American writers, texts and topics primarily before 1900. Repeatable course. Three hours of seminar per week.

Offered Spring, All terms

ENG 494. Independent Study. (1-4 Units)

Prerequisites: Consent of instructor and department chair. Intense reading or an original research project or creative writing under faculty supervision. Arrangements must be made a semester in advance of registration. Repeatable course.

Offered As needed, All terms

ENG 495. Special Topics in English. (3 Units)

Variable authors and texts, literary periods, or analytical approaches and methodologies. Uses upper-division research techniques to produce sustained critical arguments.

Offered As needed

ENG 496. Internship. (1-3 Units)

Prerequisite: Consent of Instructor, restricted to majors. Under the direction of the internship faculty associate, students work in various approved internship opportunities. Repeatable course. Credit/no credit grading.

Offered As needed

ENG 497. Directed Reading. (1-3 Units)

Prerequisites: Consent of instructor and department chair. Extensive reading in selected areas under faculty supervision. Repeatable course.

Offered Infrequent

ENG 498. Directed Research. (1-3 Units)

Offered Infrequent

ENG 501. Advanced English Studies. (3 Units)

Prerequisites: Graduate Standing or Consent of instructor. Introduces students to the interdisciplinary fields of English studies, including literature, rhetoric and composition, and linguistics. This course fulfills the Oral Requirement of the MA in English: Literature Option and MA in English: Literature Option with Rhetoric and Composition.

Offered Fall

ENG 513. History of English Language. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. The evolution of English from its Indo-European origins, through Old and Middle English, to the rise and spread of Modern English.

Offered Fall odd

ENG 514. American English. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. American English from colonial times to the present. Contacts with native, colonial and immigrant languages and regional, social and ethnic dialects.

Offered Fall even

ENG 530. Seminar: Studies in Medieval Literature. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. A study of major works in English literature before 1500. Some focus on major continental analogues and critical methodology. Majority of the texts read in translation. Repeatable course. Three hours of seminar per week.

Offered Spring

ENG 535. Seminar: Studies in Renaissance Literature. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Major works in English literature from 1500-1660. Emphasis on such representative writers as More, Spenser, Shakespeare, Marlowe, Jonson, Donne, Bacon and Milton. May include continental contemporaries such as Montaigne and Machiavelli. Repeatable course. Three hours of seminar per week.

Offered Fall

ENG 540. Seminar: Studies in Restoration and Eighteenth-Century Literature (1660-1798). (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Consent of instructor and department chair. Literature of the Restoration, Neoclassic, and Sensibility eras. May include readings that provide historical, philosophical, or cultural content. Repeatable course. Three hours of seminar per week.

Offered Spring even, All terms

ENG 543. Seminar: Studies in Romantic Literature (1798-1832). (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Consent of instructor and department chair. Selected studies in the Romantic movement in English literature, including such precursors as Burns and Blake. Repeatable course. Three hours of seminar per week
Offered Fall odd

ENG 545. Literary Criticism. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Major works in literary criticism selected from Plato to the present.
Offered Spring, All terms

ENG 546. Seminar: Studies in Victorian Literature (1832-1901). (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. A study of major writers from the Great Reform Bill to the fin de siecle with an emphasis on literary responses to emerging scientific thought, social consciousness, and religious issues. Repeatable course. Three hours of seminar per week.
Offered Fall even

ENG 549. Seminar: Modern British Literature. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Selected literary study of the modern period in England, Ireland, and the Commonwealth, as typified by such novelists and poets as Conrad, Yeats, Lawrence, Joyce, Woolf, Forster, Eliot, Auden, Thomas, Greene, and Lessing. Repeatable course. Three hours of seminar per week.
Offered Spring

ENG 552. Sem: Studies In American Literature to 1900. (3 Units)

Prerequisites: Consent of instructor and department chair. Comparative study of genres, literary movements, or authors over more than one period. Repeatable course. Three hours of seminar per week.
Offered Spring odd

ENG 555. Seminar: Studies in American Literature After 1900. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Study of American writers, texts, and topics primarily after 1900. Repeatable course. Three hours of seminar per week.
Offered Fall

ENG 570. Seminar in Writing. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Intensive training in writing. Advanced study of techniques of prose discourse. Frequent writing assignments. Repeatable course. Three hours of seminar per week.
Offered Fall

ENG 571. Discourse Analysis. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Analysis and description of structures and functions of language beyond the sentence level. May include textual and conversational analysis; classical rhetorical canons; speech acts; scripts/information structures; cohesion, coherence, deixis; spoken and written discourse. Three hours of seminar per week.
Offered Spring

ENG 572. Creative Nonfiction Workshop. (3 Units)

Practice in various forms of contemporary creative nonfiction, such as memoir, essay, literary journalism. Analysis of a wide range of models, exercises in invention techniques, discussion of writing processes, and workshopping of students' drafts and revisions. Repeatable for credit.
Offered Fall

ENG 573. Writing Center Theory and Practices. (3 Units)

Prerequisite graduate standing or Consent of Instructor. The history and theoretical foundations of writing centers and writing tutoring. Frequent writing assignments as well as best practices in teaching of writing.

ENG 574. Research Methods and Discourses in Composition and Rhetoric. (3 Units)

Advanced study in research methodologies, scholarly discourses, and means of knowledge production in composition/rhetoric and writing studies. Frequent writing and hands-on practice in text-based and empirical approaches to inquiry. Three hours of seminar per week.

ENG 575. Teaching Of Composition. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Theory and practice in teaching composition. Three hours of seminar per week.
Offered Fall

ENG 576. History and Theories of Rhetoric. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Major theories of rhetoric from ancient Greece to the present. Role of rhetoric in the history of ideas. Emphasis on multiple notions of rhetoric and attitudes toward it. Three hours of seminar per week.
Offered Spring

ENG 577. Current Issues in Rhetoric and Composition. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Intensive study of selected topics in rhetoric and composition such as invention and the teaching of writing, issues in literacy instruction, rhetoric and contemporary culture, composition and cognitive development, the composing process in a rhetorical framework, linguistic approaches to rhetoric. Repeatable course. Three hours of seminar per week.
Offered Fall

ENG 581. Semantics, Pragmatics and Discourse. (3 Units)

Overview of semantics and the major approaches to pragmatics and discourse analysis. Three hours of seminar per week.
Offered Spring

ENG 582. Seminar: Linguistic Analysis. (3 Units)

Seminar in the descriptive and formal analysis of phonological, syntactic, and/or historical data from a variety of human languages. Repeatable course. Three hours of seminar per week.
Offered Fall

ENG 583. Seminar: Psycholinguistics. (3 Units)

Seminar in current theory and research in the psychology of language and its historical background, speech production and comprehension, acquisition of language, disorders of speech and language. Three hours of seminar per week.
Offered Infrequent

ENG 584. Seminar: Sociolinguistics. (3 Units)

Examinations of varieties of English and social aspects of language use. Topics include dialectology, pidgin and creoles, bilingualism, code-switching, and intercultural communication. Three hours of seminar per week.
Offered Fall, Spring

ENG 585. Second Language Acquisition. (3 Units)

Prerequisites: Consent of instructor and department chair. Theories of second-language acquisition second-language learning, bilingualism, and sociocultural variables of language uses, with particular emphasis on the young adult and adult learner. Three hours of seminar per week.
Offered Fall

ENG 586. ESL Teaching Methods. (3 Units)

Prerequisites: Graduate standing. Investigation of approaches, methods, and techniques used in second language instruction.

Offered Spring

ENG 587. Seminar: Current Issues in TESL/Applied Linguistics. (3 Units)

Intensive study of selected topics in TESL/Applied Linguistics such as ESL Writing/Composition, Reading and Vocabulary Acquisition, Pedagogy of Spoken English, Curriculum and Program Design, Testing/Evaluation. Repeatable course. Three hours of seminar per week.

Offered Fall

ENG 588. Sem:Pedag Gram For TESOL. (3 Units)

Examination of areas of English grammar typically taught to non-native speakers. To familiarize prospective ESL teachers with classroom terminology, techniques and materials. Develop ability to analyze and explain grammatical phenomena in terms accessible to ESL students.

Offered Spring

ENG 590. Seminar In Literature. (3 Units)

Prerequisite: Consent of chair. Study of a writer, period, genre, theme, or problem in literature. Repeatable course. Three hours of seminar per week.

Offered Infrequent

ENG 591. Integrative Seminar in Literature. (3 Units)

Prerequisite: FRE 220 or equivalent. A reading, composition, and discussion course concerned with elements of style and syntax, with emphasis on creative writing by students.

Offered Infrequent

ENG 592. Seminar:Topics in Linguistics. (3 Units)

Prerequisites: Consent of instructor and department chair. Advanced topics in phonological, syntactic, historical-comparative or contrastive theory and analysis. Repeatable course. Three hours of seminar per week.

Offered Spring

ENG 593. Research Methods in Applied Linguistics. (3 Units)

Prerequisites: Consent of instructor and department chair. Survey of research methods in applied linguistics, including problem description, data collection and analysis, interpretation of results. Preparation of Final Project. Three hours of seminar per week. Repeatable but may count only once toward the MA degree.

Offered Infrequent

ENG 594. Independent Study. (1-3 Units)

Prerequisites: Consent of instructor and department chair. In consultation with a faculty member, the student will investigate in detail current scholarship in some area, or will undertake a project involving original research or creative writing. Repeatable course.

Offered As needed

ENG 595. Special Topics:. (3 Units)

An intensive study of a selected issues in literature or linguistics. Repeatable course. Three hours of seminar per week.

Offered Infrequent

ENG 597. Directed Reading. (1-3 Units)

Prerequisites: Consent of instructor and department chair. Extensive reading in selected areas under the guidance of a faculty mentor. Repeatable course.

Offered Infrequent

ENG 600. Grad Continuation Course. (1 Units)

Graduate students who have completed their coursework but not their thesis, project, or comprehensive examination, or who have other requirements remaining for the completion of their degree, may maintain continuous attendance by enrolling in this course. Signature of graduate program coordinator required.

Offered Fall, Spring

Creative Writing, Minor Requirements

| Code | Title | Hours |
|---|---|-----------|
| ENG 271 | Introduction to Creative Writing | 3 |
| ENG 451 | Advanced Creative Writing ¹ | 3 |
| ENG 472 | Creative Nonfiction Workshop | 3 |
| Select one course from the following: | | 3 |
| ENG 325 | Poetry | |
| ENG 326 | Prose Fiction | |
| ENG 472 | Creative Nonfiction Workshop ¹ | |
| Select one course from the following: | | 3 |
| ENG 451 | Advanced Creative Writing ¹ | |
| ENG 472 | Creative Nonfiction Workshop ¹ | |
| THE 353 | Playwriting | |
| Submit a portfolio to the department chair ² | | |
| Total Hours | | 15 |

¹ Please note that ENG 451 Advanced Creative Writing and ENG 472 Creative Nonfiction Workshop are repeatable for credit.

² The portfolio will consist of three works from the classes taken in the minor and cover essay. Please see the English department for further details.

English, Bachelor of Arts Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major. No minor required.

Major Requirements (45-50 units)

Students must select one of the options listed. The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

English Education Option (50 units)

Students who complete the following will earn a B.A. in English: English Education Option and also satisfy subject matter preparation Program in English (SMPP) requirements. The SMPP is designed for students interested in a career in teaching English at the secondary school level (grades 6-12). This program satisfies the requirements set by the California Commission on Teacher Credentialing for demonstrating substantive preparation in the subject matter field of English. Completion of this approved program or passing a comprehensive examination in English fulfills one part of the requirements leading to the Single Subject teaching Credential in English. Students interested in pursuing a teaching career at the secondary level should meet regularly with their departmental advisors.

All English Education option majors must complete the 38 units of core requirements given below. In addition, all students must select one of the four fields of extended Studies (Communications, Literature, Teaching English as a Second Language, Theatre Arts, Rhetoric and Composition) and complete the 12 units worth of requirements in that field. The English Education Option is a single-field major.

Core Requirements (38 units)

| Code | Title | Hours |
|---|---|-------|
| A. Lower Division Core (9 units) | | |
| ENG 205 | Literary Genres and Devices | 3 |
| Select one course from the following (3 units) | | 3 |
| ENG 202 | English Literature to 1642 | |
| ENG 203 | English Literature: 1642-1832 | |
| ENG 204 | English Literature: 1832- Present | |
| Select one course from the following (3 units) | | 3 |
| ENG 240 | American Literature to 1865 | |
| ENG 241 | American Literature after 1865 | |
| B. Upper Division Core (18 units) | | |
| ENG 307 | Practice in Literary Criticism | 3 |
| ENG 320 | Literacy, Power, and Identity | 3 |
| ENG 335 | Readings in World Literature | 3 |
| Select one course from the following: | | 3 |
| ENG 342 | African American Literature | |
| ENG 345 | Latino/a Literature | |
| ENG 346 | Native American Literature | |
| ENG 347 | Literature of Ethnicity and Gender | |
| ENG 467 | Shakespeare | 3 |
| ENG 490 | Seminar in Literature | 3 |
| C. Additional Required Courses (9 units) | | |
| ENG 314 | English Syntax: Traditional | 3 |
| Select one course from the following: | | 3 |
| ENG 457 | Advanced Composition for Teachers | |
| ENG 485 | Literary, Media and Culture Studies | |
| ENG 487 | Introduction to Second-Language Learning and Teaching | 3 |
| D. Field Experience (2 units) | | |

| | | |
|--------------------|-------------------------------------|-----------|
| UNV 300 | Early Field Experience ¹ | 2 |
| Total Hours | | 38 |

¹ Should be taken concurrently with either ENG 485 Literary, Media and Culture Studies or ENG 487 Introduction to Second-Language Learning and Teaching. If UNV 300 is unavailable, students are advised to take TED 400 or ENG 308 and request a substitution from their advisor. More information is available through the Center for Teaching Careers (310-243-2663).

Portfolio and Exit Interview

In the last semester, students must also complete the following requirements for assessment of subject matter competence:

- Submission of a portfolio of assignments in literature, composition, language and linguistics, and from their option, and a self-reflective essay of 3-4 pp.
- An interview with a panel of faculty members from the English Department. This panel will certify completion of the Subject Matter Preparation Program in English.

Additional information on assessment of subject-matter competence is available in the English Department Office.

Extended Studies

All English Education Option students must select one of the following four fields of Extended Studies and complete it in its entirety.

Communications (12 units)

| Code | Title | Hours |
|--------------------|-------------------------------|-----------|
| COM 250 | Writing for the Media | 3 |
| COM 301 | News and Information Literacy | 3 |
| COM 338 | Cross-Cultural Journalism | 3 |
| COM 346 | News Gathering & Reporting | 3 |
| Total Hours | | 12 |

Literature (12 units)

| Code | Title | Hours |
|---------------------------------------|--|-----------|
| ENG 306 | Backgrounds of Literature | 3 |
| ENG 308 | Critical Approaches to Children's Literature | 3 |
| Select one course from the following | | 3 |
| ENG 325 | Poetry | |
| ENG 326 | Prose Fiction | |
| ENG 327 | Drama | |
| Select one course from the following: | | 3 |
| ENG 465 | Chaucer | |
| ENG 476 | Individual Authors and Topics Pre-1700 | |
| ENG 477 | Individual Authors and Topics Post-1700 | |
| Total Hours | | 12 |

Teaching English as a Second Language (12 units)

| Code | Title | Hours |
|---------------------------------------|------------------------------------|-------|
| ENG 210 | Study of Language | 3 |
| ENG 317 | Black English Language and Culture | 3 |
| ENG 486 | ESL Teaching Methods | 3 |
| Select one course from the following: | | 3 |
| ENG 420 | Linguistic Analysis | |

| | | |
|--------------------|-------------------------|-----------|
| ENG 492 | Seminar in Linguistics: | |
| Total Hours | | 12 |

Theatre Arts (12 units)

| Code | Title | Hours |

English, Master of Arts

Admission Requirements

All applicants to the M.A. in English must follow all application and admission procedures outlined in the university graduate application booklet. To be admitted to the program, the applicant must have earned a baccalaureate degree from an accredited university or college and a grade point average of 3.00 or better in the last 60 semester units of upper division course work attempted (not including extension units). Applicants with majors other than English may be accepted into the program, but should expect to do additional work to gain the background necessary for success in their graduate courses.

Program Requirements

Prerequisites and Admission to Classified Standing and Advancement to Candidacy

1. Graduate standing or permission of the instructor are prerequisites to enrollment in graduate English classes.
2. For admission to classified standing, students must have completed nine units of graduate English (500-level) courses at CSU Dominguez Hills with an average of "B" or better.
3. For advancement to candidacy, students must have attained classified standing and have completed nine additional graduate units in English with an average of "B" or better, in addition to completing the Graduate Writing Assessment Requirement.

Graduation Requirements

1. Each student's program must be approved by the graduate coordinator. No more than nine units selected from upper division undergraduate offerings in English may count toward the master's degree in English.
2. Graduate students must satisfy the Graduation Writing Assessment Requirement.
3. In addition to successful completion of required coursework, all candidates must achieve a passing score on a Comprehensive Examination. Literature and Literature & Rhetoric/Composition candidates who have earned a 3.75 GPA, or who have an ongoing

project warranting special permission from the graduate coordinator and the thesis director, may elect to undertake a Thesis, provided that they can form a thesis committee with the relevant specialization and have their proposal approved by the graduate committee.

4. Students must complete all requirements for the M.A. within seven years.
5. In addition to the major requirements, students must meet all university requirements for the master's degree. Students should consult the section of the catalog entitled "Requirements for the Master's Degree."
6. A reading knowledge of at least one foreign language is a valuable research and teaching tool. While a formal foreign language requirement is not part of this program, those planning to pursue a Ph.D. in English should prepare themselves to meet the doctoral requirement calling for reading ability in two foreign languages.

Literature Option (30 units)

The Master of Arts in English is a degree in literature, the heart of the discipline. The program provides for both breadth and depth in the study of literature.

Students may choose to do all of their work in literature or may elect an emphasis in Rhetoric and Composition.

Requirements

| Code | Title | Hours |
|---|---|-------|
| Prerequisites | | |
| ENG 307 | Practice in Literary Criticism | 3 |
| Select one of the following: | | 3 |
| ENG 490 | Seminar in Literature Any single-author course | |
| Select three courses from the following: | | 9 |
| ENG 302 | English Literature to 1642 | |
| ENG 303 | English Literature: 1642-1832 | |
| ENG 304 | English Literature: 1832-Present | |
| ENG 340 | American Literature to 1865 | |
| ENG 341 | American Literature: 1865-Present | |
| Required Courses | | |
| ENG 501 | Advanced English Studies | 3 |
| ENG 545 | Literary Criticism | 3 |
| ENG 575 | Teaching Of Composition | 3 |
| Select one course from the following: | | 3 |
| ENG 530 | Seminar: Studies in Medieval Literature | |
| ENG 535 | Seminar: Studies in Renaissance Literature | |
| Select one course from the following: | | 3 |
| ENG 540 | Seminar: Studies in Restoration and Eighteenth-Century Literature (1660-1798) | |
| ENG 543 | Seminar: Studies in Romantic Literature (1798-1832) | |
| ENG 546 | Seminar: Studies in Victorian Literature (1832-1901) | |
| ENG 552 | Sem: Studies In American Literature to 1900 | |
| Select one course from the following: | | 3 |
| ENG 549 | Seminar: Modern British Literature | |
| ENG 555 | Seminar: Studies in American Literature After 1900 | |
| Select four additional courses in English | | 12 |

| | |
|-------------------------------------|-----------|
| Comprehensive Examination or Thesis | |
| Total Hours | 45 |

Literature Option with Rhetoric and Composition Emphasis (12 units)

The emphasis in Rhetoric and Composition is a specially designed program for students who plan to teach writing at the secondary or community college level. Students may be offered the opportunity to gain practical experience by working as tutors in the writing program. Students who choose this emphasis are required to take the "Required Course" and "Three additional courses" in Rhetoric and Composition as listed below to satisfy the Literature Option.

| Code | Title | Hours |
|---|---|-----------|
| ENG 576 | History and Theories of Rhetoric | 3 |
| Select three additional courses numbered between 570 and 580 with advisor approval: | | 9 |
| ENG 570 | Seminar in Writing ¹ | |
| ENG 571 | Discourse Analysis | |
| ENG 577 | Current Issues in Rhetoric and Composition ¹ | |
| Comprehensive Examination or Thesis | | |
| Total Hours | | 12 |

¹ Repeatable for credit.

Teaching of English as a Second Language (TESL) Option (30 units)

The Master of Arts in English Option in the Teaching of English as a Second Language (TESL) is a 30-unit program of study designed for graduate students planning careers in TESL/TEFL at the secondary school or college level in this country or abroad. This program combines upper division and graduate level course work in English and linguistics.

| Code | Title | Hours |
|--|---|-------|
| Prerequisites | | |
| ENG 311 | Phonology | 3 |
| ENG 312 | Morphology | 3 |
| ENG 315 | Theoretical Syntax | 3 |
| A minimum of one year's work in a foreign language | | |
| Required Courses | | |
| ENG 513 | History of English Language | 3 |
| ENG 514 | American English | 3 |
| ENG 581 | Semantics, Pragmatics and Discourse | 3 |
| ENG 582 | Seminar: Linguistic Analysis | 3 |
| ENG 583 | Seminar: Psycholinguistics | 3 |
| or ENG 584 | Seminar: Sociolinguistics | |
| ENG 585 | Second Language Acquisition | 3 |
| ENG 586 | ESL Teaching Methods | 3 |
| ENG 587 | Seminar: Current Issues in TESL/Applied Linguistics | 3 |
| ENG 588 | Sem: Pedag Gram For TESOL | 3 |
| ENG 592 | Seminar: Topics in Linguistics | 3 |
| A passing score on Comprehensive Examinations | | |

Select a practicum with the prior approval of the TESL Coordinator
Total Hours 39

English, Minor Requirements

| Code | Title | Hours |
|--|--------------------------------|-----------|
| ENG 205 | Literary Genres and Devices | 3 |
| ENG 307 | Practice in Literary Criticism | 3 |
| Select three upper division English courses with the assistance of an advisor ¹ | | 9 |
| Total Hours | | 15 |

¹ ENG 305 Critical Reading of Literature and ENG 350 Advanced Composition may not count toward the minor.

English, Subject Matter Preparation

Students admitted in Fall 2009 and after who plan to complete the Subject Matter Preparation Program in English should consult the English: English Education option requirements.

The Subject Matter Preparation Program in English is designed for students interested in a career in teaching English at the secondary school level. This program satisfies the requirements set by the State Commission on Teacher Credentialing for demonstrating substantive preparation in the subject matter field of English. Completion of this approved program or passing a comprehensive examination in English (the CSET or California Subject Examination for Teachers) fulfills one part of the requirements leading to the Single Subject Teaching Credential in English. While the Subject Matter Preparation Program in English is not itself an academic major, the requirements are the same as those required for the English: English Education option, plus the portfolio and interview. Students interested in pursuing a teaching career at the secondary level should meet regularly with their departmental advisors.

Linguistics, Minor

Requirements

Upper Division Required Courses (15 Units)

| Code | Title | Hours |
|--------------------|-------------------------|-----------|
| ENG 311 | Phonology | 3 |
| ENG 312 | Morphology | 3 |
| ENG 315 | Theoretical Syntax | 3 |
| ENG 420 | Linguistic Analysis | 3 |
| ENG 492 | Seminar in Linguistics: | 3 |
| Total Hours | | 15 |

Professional and Creative Writing, Certificate

The Professional and Creative Writing Certificate Program is designed to expand the skills and knowledge of students interested in writing. The certificate program prepares students for work as writers, editors or teachers, but also for jobs in any field that requires creative thinking and

clear expression. Drawing on the diverse talents of faculty throughout the campus community, the program offers students intensive, practical experience in writing in their choice of creative genres (poetry, fiction, drama, screenplays, and multimedia) as well as job-oriented courses in professional, technical, and scientific writing. Students write and revise in intensive workshops of limited size and take additional courses in the craft and history of their area of concentration. In addition, students get practical, real-world writing experience through internship programs in the Los Angeles area.

The Professional and Creative Writing Certificate Program is designed to expand the skills and knowledge of students interested in writing. The certificate program prepares students for work as writers, editors or teachers, but also for jobs in any field that requires creative thinking and clear expression. Drawing on the diverse talents of faculty throughout the campus community, the program offers students intensive, practical experience in writing in their choice of creative genres (poetry, fiction, drama, screenplays, and multimedia) as well as job-oriented courses in professional, technical, and scientific writing. Students write and revise in intensive workshops of limited size and take additional courses in the craft and history of their area of concentration. In addition, students get practical, real-world writing experience through internship programs in the Los Angeles area.

Requirements

Upon admission to the program, student must complete 18 units with a grade of C or better in each course selected from the following:

| Code | Title | Hours |
|--|--|-------|
| Prerequisite Courses | | |
| COM 250 or ENG 271 | Newsriting For Media Introduction to Creative Writing | 3 |
| Foundation Courses | | |
| Select one to two courses from the following: | | 3-6 |

| Total Hours | | 18-24 |

Rhetoric and Composition, Certificate

The Certificate in Rhetoric and Composition is a program that may be taken with or apart from any degree program or major. Many students who have completed graduate degrees have found this certificate program both exciting and helpful. The following courses must be completed for this certificate. Candidates must maintain a grade point average of 3.0 or better in the program.

Requirements

| Code | Title | Hours |
|--|----------------------------------|-----------|
| ENG 575 | Teaching Of Composition | 3 |
| ENG 576 | History and Theories of Rhetoric | 3 |
| Select three additional ENG courses numbered between 570 and 580 inclusive with advisor approval | | 9 |
| Total Hours | | 15 |

Teaching of English to Speakers of Other Languages (TESOL), Certificate

The Certificate in the Teaching of English to Speakers of Other Languages (TESOL) is a program of study designed for teachers and prospective teachers seeking competence in the teaching of English to speakers of other languages. The program combines upper division and graduate courses in English, linguistics and education. Courses completed as part of other programs of study may be applicable toward the certificate. Candidates must maintain a grade point average of 3.0 or better in the program.

Requirements

Prerequisites

1. An acceptable baccalaureate degree from an accredited institution and a grade point average of 2.5 or better over the last 60 semester units attempted.
2. A minimum of one year's work in a foreign language.

| Code | Title | Hours |
|---|---|-----------|
| ENG 314 | English Syntax: Traditional | 3 |
| ENG 486 | ESL Teaching Methods | 3 |
| or ENG 586 | ESL Teaching Methods | |
| ENG 311 | Phonology | 3 |
| or ENG 312 | Morphology | |
| Select two courses from the following: | | 6 |
| ENG 487 | Introduction to Second-Language Learning and Teaching | |
| ENG 581 | Semantics, Pragmatics and Discourse | |
| ENG 585 | Second Language Acquisition | |
| ENG 587 | Seminar: Current Issues in TESL/Applied Linguistics | |
| ENG 588 | Sem:Pedag Gram For TESOL | |
| Select a practicum with the prior approval of the TESOL Coordinator | | |
| Total Hours | | 15 |

Environmental Science

College of Natural and Behavioral Sciences
Department of Earth Science and Geography

Program Description

The M.S. in Environmental Science is an interdisciplinary program housed in the College of Natural and Behavioral Science (CNBS). Our mission is to prepare leaders, innovative thinkers, and planners who can address and solve environmental challenges using interdisciplinary approaches. Because of our campus' location, the emphasis of the program is on the urban environment. The required courses in the natural and social sciences introduce students to the unique problems of environmental analysis, policy, and planning. Elective courses allow students the flexibility to meet their specific interests and career goals. Real-world experience is obtained through directed research and internships in government agencies, non-profit organizations, and corporations.

Features

The program is interdisciplinary, with core and elective courses drawn from the natural and social sciences. Core courses introduce the student to the unique problems of the urban environment, environmental analysis, policy, and planning, mathematical and analytic skills to address environmental problems, and the original research literature in environmental science. Elective courses allow students the flexibility to tailor their academic programs to meet specific goals. Students obtain real-world experience in the urban environment through internships in government, non-governmental, or other agencies and organizations. The academic program culminates with an original research project leading to a thesis.

Two Tracks toward MS in Environmental Sciences

All students can enter the master's program through either the Internship Track or Thesis track. The 'Internship' (Professional) track (i.e., without the thesis option) is primarily aimed at students who want to gain professional experience while pursuing their degree and seek immediate employment after graduating from the program.

Students seeking the Thesis Track are strongly advised to consult with the Program Coordinator and contact prospective faculty mentors before applying for the research track. The conventional 'Thesis' (Research) track is

Admission Requirements

Admission as a classified graduate student requires applicants to hold a bachelor's degree in natural or social science from an accredited university with a minimum grade point average of 3.0 overall or 3.0 in the last 60 semester (90 quarter) units of upper-division course work. Students with GPAs between 2.5 and 2.9 in the last 60 semester (90 quarter) units of upper-division course work, may be granted conditional admission. All students are required to have completed two courses in a field related to environmental science and a statistics course, with grades of "B" or better.

Applicants must also document writing proficiency by submitting administrative evidence of graduate writing proficiency. This is usually the satisfactory completion of an upper-division writing course or a writing exit examination prior to receiving the undergraduate diploma. In

the CSU system, this writing competency is called the Graduation Writing Assessment Requirement (GWAR).

There are four existing pathways for entering graduate and post-baccalaureate students to immediately satisfy GWAR: GL requirements:

1. Graduate students who earned a baccalaureate degree from an accredited college or university in the United States satisfy the GWAR: GL.
2. Graduate students who earned a baccalaureate degree from an accredited non-US institution where English is a primary language of instruction satisfy the GWAR: GL.
3. Graduate students who earned a 4 or above on the analytical writing component of the Graduate Record Examinations (GRE) or the Graduate Management Admission Test (GMAT) satisfy the GWAR: GL.
4. Students coming from baccalaureate programs offered in non-English speaking university settings can qualify to enter a graduate program by meeting university admissions standards as outlined in the online course schedule and catalog.

Applicants with a baccalaureate degree from a non-English speaking university or who have not attended schools at the secondary level or above for at least three years full-time where English is the principal language of instruction are also required to submit proof of English proficiency. Please visit <https://www.csudh.edu/future-students/international/english-proficiency> for details.

1. A minimum score of 80 on the internet-based TOEFL exam (iBT),
2. A minimum score of 213 on the computer-based TOEFL exam
3. A score of 6.5 or higher on the IELTS Academic Test, or
4. A score of 53 or higher on the Pearson Test of English (PTE) Academic

Applications are not considered complete without the test scores.

These test scores should be sent along with your other application materials to the address provided above.

Please note that scores are considered valid for only two years and that if several scores are submitted, only the most recent is considered.

Students who meet all but one requirement of the MSES program may be admitted in conditionally classified status at the Program Coordinator's discretion. They must meet all conditions by the end of the first academic year.

Admission Procedures

All applicants are required to complete a Cal State Apply application. The following documents should be submitted in the 4th Quadrant at Cal State Apply:

1. CV/resume
2. All unofficial transcripts (must also submit all official transcripts to the Office of Admissions at CSUDH)
3. A personal statement/cover letter
4. Letters of recommendation are not required but can be provided in support of the applicant

All applicants are also required to contact the program coordinator and those faculty with whom they wish to work.

1. Students are strongly advised to contact a potential Faculty mentor prior to submitting application materials to increase the possibility of enrollment.
2. Submit to the M. S. in Environmental Science Program Coordinator:
 - A letter describing research interests, goals, and expectations in pursuing the master's degree in environmental science.
 - Unofficial undergraduate transcripts (separate official copies still need to be submitted to University Admissions).

The application deadline for the **Fall semester is March 1st. Application materials can be sent to:**

California State University Dominguez Hills
College of Natural and Behavioral Sciences, Dean's Office
ATTN: Environmental Science Program Coordinator
1000 E. Victoria Carson, CA 90747

Academic Advisement

Upon acceptance to the program, each student will select or be assigned to a faculty advisor and plan an individualized program of study based on the student's interests and career goals. All students in the program will be required to be advised every semester to assess student progress and program effectiveness.

Career Possibilities

Among the many employment opportunities available for recipients of an M.S. in Environmental Science are government agencies, particularly in the areas of environmental protection and management, water, sewer and power-generation utilities, analytic laboratories, environmental and engineering firms, private industry and management, and nonprofit organizations. Potential areas of employment include forestry, agriculture, fisheries management, environmental education, air quality analysis or control, soil conservation, environmental lobbying, remote sensing, urban and regional planning, soil and water conservation, environmental policy analysis, environmental impact analysis, environmental planning, conservation systems analysis, earth science, oceanography, hydrology, seismology, and environmental social impact analysis. In addition, the M.S. in Environmental Science is excellent preparation for further academic pursuits, such as a Ph.D. in environmental science or a degree in environmental law.

Graduate Programs

Master

- Environmental Science, Master of Science (p. 556)

Faculty

Ashish Sinha, Program Coordinator
Parveen Chhetri (Earth Sciences), Cheyenne Cummings (Earth Sciences)

Department Office: NBS Dean's Office LIB 5734, (310) 243-2547

Courses

ENV 590. Graduate Seminar. (1-3 Units)

Prerequisite: Graduate standing in the M.S. in Environmental Science Program or approval by the Program Coordinator. Presentation and discussion of selected topics in environmental science. One to two hours of seminar per week. Repeatable course. A maximum of four units may be applied to the master's degree.

Offered Fall, Spring

ENV 596. Internship in Environmental Science. (3 Units)

Supervised internship, in the student's area of interest, with a participating agency or company. The internship will be chosen in consultation with the Program Coordinator. A minimum of nine hours per week of internship activity and a final written report are required.

Offered Fall, Spring

ENV 598. Directed Research. (1-3 Units)

Laboratory and/or field research on a specific subject in environmental science. The research is to be approved and directed by the instructor. Repeatable course. A maximum of three units may be applied to the master's degree.

Offered Fall, Spring

ENV 599. Thesis. (3 Units)

Research and writing of a thesis to fulfill the thesis requirement for the master's degree. The topic of the thesis to be approved and supervised by the Graduate Advisor, in consultation with the student's Graduate Thesis Committee. Repeatable course. A maximum of three units may be applied to the master's degree.

Offered Fall, Spring

ENV 600. Graduate Continuation Course. (1 Unit)

Graduate students who have completed their course work but not their thesis may maintain continuous attendance by enrolling in this course.

Offered Fall, Spring

Environmental Science, Master of Science

Degree Requirements (30 units)

The M.S. in Environmental Science requires completion of 30 units, at least 21 of which must be at the graduate (500-level).

| Code | Title | Hours |
|--|-------------------------------------|-------|
| Required Courses | | |
| ANT 555 | People, Culture and the Environment | 3 |
| BIO 502 | Biostatistics | 3 |
| BIO 510 | Urban Environmental Science | 3 |
| GEO 433 | Environmental Analysis and Planning | 3 |
| ENV 590 | Graduate Seminar ¹ | 1-3 |
| ENV 598 | Directed Research | 1-3 |
| Electives ² | | |
| Select two elective courses from the following list: | | 6 |
| BIO 416 | Landscape Ecology | |
| CHE 474 | Geochemistry | |
| GEO 405 | Advanced Cartography | |
| GEO 408 | Remote Sensing and Image Processing | |
| GEO 412 | Rivers and Streams | |
| GEO 415 | Geographic Information Systems | |

| | | |
|-------------------------|-------------------------------------|--------------|
| GEO 416 | Earth's Climates | |
| GEO 420 | Natural Resources | |
| SOC 408 | Survey Research | |
| Internship Track | | |
| ENV 596 | Internship in Environmental Science | 3 |
| Thesis Track | | |
| ENV 599 | Thesis | 3 |
| Total Hours | | 26-30 |

¹ For students enrolled in the Thesis and Internship Options, ENV 590 Graduate Seminar must be taken at least twice; 1-2 units each

² In consultation with an academic advisor, each student will select 2 elective courses from the following list. Elective courses will be selected that best suit the academic background and career goals of the student. Other courses may be substituted with the approval of the academic advisor and Program Coordinator.

Options

Thesis

A written thesis, based on an original research project in environmental science, and an oral defense of the thesis are required for completion of the degree.

Each student must select a thesis advisor and two faculty to serve as the graduate thesis committee. When additional expertise is required, a member may be from another institution, but at least two committee members, including the Chair, must be full-time CSUDH faculty.

The student in consultation with his or her major advisor will prepare a research proposal along with a time line to completion. The proposal must outline the problem, its significance, and the methods to be employed to collect and analyze data. The proposal must be approved by the two other members of the thesis committee and submitted to the Program Coordinator.

The thesis will be evaluated on the basis of originality, critical and independent thinking, appropriate organization and format, and thorough documentation. Upon the completion and acceptance of the thesis, the student and advisor will arrange for an oral defense of the thesis. This ordinarily takes the form of a seminar to which the faculty, students and public are invited to attend.

Internship

A culminating report and portfolio are required for completion of the degree.

Each student must obtain faculty approval for each of the internships. Faculty supervisor must be full-time CSUDH faculty, but when additional expertise is required, an additional supervisor may be from another institution or from the part-time faculty. Each internship must focus on the student's intended field of study within the field of Environmental Science and should guide the student to completing a final culminating report.

The student, in consultation with both their faculty advisor and internship supervisor will prepare a final written report detailing skills learned, tasks accomplished, and/or research conducted. The written report must detail environmental methods used during the internship and explain to others how to complete the tasks undertaken.

The culminating written report will be evaluated on the basis of originality, critical independent thinking, appropriate organization and format, and thorough documentation. Upon completion and acceptance by the faculty advisor, the student is required to present the material at a conference.

Continuing Student Status

Students must maintain continuous enrollment throughout the graduate program and during the semester they graduate. Students who miss a semester must reapply to the university and to the program. Students who have completed all course work and are working on their thesis may enroll in ENV 600 Graduate Continuation Course, or equivalent, to maintain continuous attendance.

Grades

An overall "B" average is required in courses in the student's program and all courses must be passed with a grade of "B-" or above.

Policy on Revalidation of Outdated Course Work

All course work taken in the master's degree program must be completed within the five years immediately preceding the date of graduation. Revalidation of outdated course work may be requested from the University Graduate Studies Office through the Environmental Science Program Coordinator. Outdated course work means courses that were completed between five and seven years immediately preceding the date of graduation. The request must be accompanied by a petition from the program Coordinator that verifies that the student has done one of the following:

- repeated the course and passed it with a grade of B or better;
- taken the exams and completed the assignments of the course as it is currently offered and earned a grade of B or better;
- taken and passed a written comprehensive exam which covers the course contents.

Classified Standing

If a student has been admitted to Conditionally Classified status he or she must fulfill the conditions for Classified standing by the end of the first year after admission. The student must submit an Application for Classified Standing to the Dean of Graduate Studies, who will forward the request to the Environmental Science Coordinator. To receive classified standing, the student must have:

- completed all prerequisite courses and requirements including the GEAR;
- a grade point average of 3.0 or better in all courses taken at CSUDH and received a grade of B- or better in all courses.

Advancement to Candidacy

An application for advancement of candidacy is submitted when the student has completed most of the course work. Application is made through the Program Coordinator and must be done before the student can submit the thesis or culminating written report. This application will list the student's program of courses and other requirements which must be completed for the degree.

The Program coordinator send the advancement to candidacy form to the College Dean and Graduate Dean who forwards it to the graduation

unit of the Registrar's Office. It is used for the degree check after the student has submitted an Application for Graduation from the Office of the Registrar.

University Requirements

In addition to the program requirements, students must meet all university requirements for the master's degree. Students should consult the section of the catalog entitled "Requirements for the Master's Degree (<https://catalog.csudh.edu/general-information/graduate-degree-postbaccalaureate-studies/>)."

- **Environmental Literacy.** Students will demonstrate their knowledge of, and the ability to analyze, diverse environmental problems representing the local, state, national and international spatial scales.
- **Environmental Multidisciplinarity.** Students will demonstrate their understanding of the complexity of environmental processes and problems, and an understanding of why environmental science is a multidisciplinary endeavor that draws from the natural and social sciences.
- **Written and Oral Communication.** Students will demonstrate their ability to describe research and to summarize research results in essays, written reports and oral presentations.
- **Scientific Research.** Students will perform in-depth scientific research, incorporating literature reviews; hypothesis formulation and testing; data collection and analysis, and critical reasoning.
- **Thesis Writing.** Students will demonstrate the ability to author an original, in-depth, scientific research monograph (the thesis).
- **Professional Preparation.** Students will work on research projects and hone research skills toward their mastery of environmental science, particularly in the urban setting. The thesis research project prepares students for doctoral programs and/or the environmental workforce, and can be used as examples of the knowledge and expertise that they could bring to prospective employers.

Film and Television Production

College of Arts and Humanities
Department of Digital Media Arts

Program Description

The B.A. in Film & Television Production in the Digital Media Arts Department at CSUDH is a hands-on, professionally-oriented program geared for students who want marketable job skills for careers in film, television, and related media industries. Students write, create, produce, direct, and edit their own film features, television documentaries, music videos, instructional films, television public service announcements (PSA's), and a variety of client-based projects for nonprofit organizations, community groups, and corporate partners.

The mission of the Film & Television Production degree is to

1. provide an academic program that gives students a solid base in the theory and technology skills required for professional careers in the film and television industry;
2. provide hands-on experience in the basic software and hardware tools utilized in film and television production;
3. provide the opportunity for students to work in teams, applying their producing, directing, writing, editing, and engineering skills to produce a variety of professional-quality film and television products; and

4. develop interpersonal skills and professional demeanor that will enable students to work effectively and cooperatively as team players on collaborative projects in the industry.

The Film & Television Production curriculum emphasizes collaborative teamwork among the students in the Digital Media Arts Department's three degree programs. For example, Film & Television students will write, produce, film, and edit a television documentary or short movie that our Audio Engineering students then take over to perform the sound design elements of ADR, foley, and sound effects editing, while our Music Technology students compose, arrange, and record original music scores for the film's soundtrack. Conversely, our Audio and Music Technology students record and produce a band's song while the Film & Television students film and edit the music video of the song as well as the bonus material such as interviews with the band and behind-the-scenes "making of" footage for the interactive DVD, Blu-ray, or website.

The Film & Television Production degree is geared for students who want to have careers working as professionals in the media industry. These career goals include producer, director, writer, editor, cinematographer, camera operator, audio/video post-production, motion graphics and animation designer, or freelance videographer. With Hollywood just 20 minutes from campus, our students have the opportunity to work for and serve internships at a variety of commercial TV stations, motion picture studios, audio and video post-production houses, and cable networks. There are also internship and employment opportunities for our students in noncommercial media venues such as educational media at schools and colleges and in-house media production at major corporations and community organizations.

Features

Television Studio allows students to produce multi-camera projects in a 10,000 square-foot sound stage equipped with real time 3D virtual set creation for digital compositing on a 40x12 coved cyc, Grass Valley SEG, Inscrubber CG, Leicht Still Store, Kino-Flo and Mole-Richardson studio lighting, Mackie 16 channel mixer, and Strand CD80 dimmer system.

Recording Studios equipped with Pro Tools 10 HD with HDX 24 In/Outs; SSL AWS-900+SE, 32x24x2 Console, 32x24x2 Sound Workshop Console, Furman HDS-6 and HR-6 headphone distribution system, Blue Sky monitors, various plug-ins by Sony, Oxford, Line 6, Digidesign, Native Instruments, Focusrite, Massenberg Design Works, M-Audio, and McDSP, and a variety of professional microphones such as Neumann U-87, TLM-170, KM-83/84, AKG C414, Audix DP-5 drum pack, Groove Tube MD-1, and Sennheiser MD421 for recording, mixing, and mastering in stereo and 5.1 surround. Avantone Reference Monitors are also available for composite soundtrack mixing of dialogue, foley, sound effects, and music score for television and film projects.

Design Labs equipped with Mac Pro computer stations allow students to design disc cover packaging, motion graphics, television titles, websites, and green screen effects using Photoshop, Illustrator, After Effects, and Dreamweaver.

Finishing Suites allow students to edit their final cuts and mix their final soundtracks on a 4K monitor and high fidelity sound system equipped with a variety of color correction, motion graphics, and audio editing software.

Field Production Filming Systems equipped with Sony cinema cameras with prime lenses, Sachtler fluid-head tripods; crane and dolly systems; gimbal cameras, LED light kits by Dracast, Fiilex, and Ikan; Reflectmedia portable green screen system; Matthews C-Stands and Road Rags;

Sennheiser boom microphone systems with PCS carbon fiber poles; and Lilliput field monitors allow students to film professional-quality projects on location.

Graduation with Honors

Undergraduate students may be candidates for graduation with honors in Film and Television Production if they meet the following criteria:

1. A minimum of 45 units in residence at CSU Dominguez Hills.
2. A minimum grade point average of 3.7 in all courses used to satisfy the requirements for the Digital Media Arts major.
3. A cumulative grade point average of 3.7 in all courses taken at CSU Dominguez Hills

Academic Advisement

Film & Television courses are offered in a specific sequence that requires prerequisite and co-requisite courses. Therefore, it is crucial that students contact the department advisor, Dr. George Vinovich at gvinovich@csudh.edu before enrolling in or planning a course schedule. Consulting with the appropriate advisor ensures that students complete their program in the most expedient and efficient manner possible. In this way, students do not waste time and energy by completing unnecessary courses and units. Department advisors also serve as career counselors and concerned mentors to help bridge the gap between the world of the university and the world of the working professional.

Preparation

Students interested in pursuing professional careers in the highly-competitive television and film industry should be aware that those who succeed in establishing a career in the industry are characteristically hard-working, disciplined, focused on a career, and most of all, resilient to persevere in the face of continuous rejection. Strong writing, interpersonal, and computer skills are a definite advantage in this field. Additionally, students familiar with computer software such as the Adobe Creative Suite will find these skills essential in the rapidly changing world of media production and delivery.

Recommended Lower Division Electives

There are no specific lower division courses recommended for this major; however, any experience with software programs such as Photoshop, Illustrator, After Effects, Premiere, Audition, or Avid would be helpful.

Student Organizations

Film & Television students can enhance their academic studies and involvement in the industry by joining the DMA Success Club on campus or by becoming student members of professional organizations such as the Society of Motion Picture and Television Engineers (SMPTE), the Media Communicators Association- international (MCA-i). Student membership in these professional associations allows students to network with industry executives and working professionals regarding internships and job opportunities in the field. The proximity of the campus to the center of the media and entertainment industry of Hollywood, Burbank, and Los Angeles allows students to attend major trade show conferences such as ShowBiz Expo, Post L.A., DV Expo, SMPTE, and NAB.

Career Possibilities

Graduates in Film & Television Production will find career opportunities in a wide range of entertainment, informational, and educational

venues. The broad focus of the curriculum prepares students for roles as producers, directors, writers, cinematographers, editors, camera operators, and motion graphics designers. With its emphasis on hands-on training and production project experience graduates of the program are qualified for a variety of career opportunities in commercial broadcasting at TV stations, networks, studios, and production houses; noncommercial television such as in-house corporate, government, educational, and institutional communications operations; public access and local origination cable television; and of course, free-lance production services as a video consultant.

Film and Television Production, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Major Requirements (51-61 units)

Students must select one of the options listed. The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

| Code | Title | Hours |
|--|--|-------|
| Upper Division Required Courses | | |
| DMA 310 | Tools and Techniques in Digital Media Production | 3 |
| DMA 320 | TV Directing I | 3 |
| DMA 322 | TV Directing II | 3 |
| DMA 323 | TV Crew Production (two semesters) ¹ | 6 |
| DMA 324 | TV Titling and Animation | 3 |
| DMA 325 | EFP Videography | 3 |
| DMA 326 | TV Sound Design | 3 |
| DMA 327 | Independent TV Production | 3 |

| | | |
|--|--|-----|
| DMA 328 | DSLR Video Production | 3 |
| DMA 346 | Digital Media Prod Workshop (three semesters) ¹ | 3 |
| DMA 400 | Strategies for Digital Media Delivery | 3 |
| DMA 496 | Internship in the Media | 1-3 |
| Writing Requirement | | |
| DMA 300 | Digital Technology, Culture and the Arts | 3 |
| Capstone Experience | | |
| DMA 490 | Senior Seminar | 3 |
| DMA 499 | Senior Proj Digital Media | 2 |
| Electives | | |
| Select two courses from the following: | | 6 |
| DGN 340 | Web Design 1 | |
| DGN 330 | Motion Design 1 | |
| DGN 430 | Motion Design 2 | |
| DMA 495 | Special Topics in DMA | |
| PHT 300 | Digital Photography | |

Total Hours **51-53**

¹ Students are required to take two semesters of DMA 323 TV Crew Production and three semesters of DMA 346 Digital Media Prod Workshop.

Program Learning Outcomes

Students who have successfully completed a B.A. in Film & Television Production will be able to:

- Demonstrate application of the basic software and hardware tools used in digital media production.
- Produce a product that reflects professional level production value and standards relative to student producer time and budget constraints.
- Demonstrate ability to create and produce a capstone digital media product that meets the objective of its target audience.
- Demonstrate ability to work effectively and cooperatively with others as a co-producer on team projects.
- Perform in a manner that is consistent with the professional image and demeanor of the digital media industries.

¹ Elective

Film, Television, and Media

College of Arts and Humanities
Department of Communications

Program Description

The mission of the Bachelor of Arts in Film, Television, and Media is to cultivate the diverse creative voices of CSU Dominguez Hills students by providing them with an understanding of the histories, forms, contexts, and existing structures of where and how media stories are told.

Students are prepared to contribute new and necessary stories with the potential to meaningfully represent their own communities and transform society. Upon completing the degree, students will understand the power of media stories and the impact they can have. They will have a deep understanding of what stories have been told and what is missing. They will be empowered with the skills to express their voice in places where stories can and need to be told.

Our innovative program integrates critical thinking and critical making. By approaching both traditional and emerging media as creative storytelling and grounding students in the knowledge of the history, politics, forms, and industry structures of media stories, students learn to adapt to a constantly changing media landscape and how they can positively impact society using their creative voices. Students take courses on

storytelling in and across media forms. In writing about media stories, students develop skills in analyzing and interpreting media stories.

Building on those skills, students will also learn how to tell new stories as well as identify potential audiences and venues for those stories.

Preparation

High school students are encouraged to take college preparatory English courses. Students planning to transfer from community college should consult with their counselor or advisor to identify appropriate transferable lower-division courses.

Graduation With Honors

Undergraduate students may be candidates for graduation with Honors in Film, Television, and Media provided they meet the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of at least 3.5 across all courses used to satisfy the upper division requirements in the major.

Career Opportunities

The Film, Television, and Media curriculum provides pathways for students interested in focusing their coursework toward work in the industry, attending graduate school, or both. The critical thinking and making skills that Film, Television, and Media students acquire from their coursework prepare them for a wide array of career opportunities in the entertainment industries.

All COM Courses are listed in this section. Please see the section on "Requirements" as well as your Smart Planner for courses specific to the Film, Television, and Media major

COM 100. Media & Society. (3 Units)

A critical overview of media culture including newspapers, magazines, film, radio, television, popular music, advertising, public relations, and the Internet. Focuses on building critical media literacy skills by developing a concrete understanding of media history, media analysis, the structure of media industries and their major players and products.

Offered Fall, Spring, All terms

COM 105. Introduction to Media Criticism. (3 Units)

Develops the analytical tools required for critical understanding of media culture. Investigates relationships between institutions, texts, audience practices and technologies in order to build a foundation for informed media engagement, criticism and analysis in the 21st century.

Offered Fall

COM 106. Digital Toolkit. (2 Units)

Co-requisite: COM 107 is required. Introduction to the foundational and emerging tools, platforms, and digital skills essential for students interested in pursuing careers in any communications or related field, including word processing, data management, presentational, media content creation, web publishing and design/editing software and programs.

Offered Fall, Spring

COM 107. Digital Toolkit Lab. (1 Units)

Co-requisite: COM 106 is required. Provides practice in the foundational and emerging tools, platforms, and digital skills essential for students interested in pursuing careers in any communications or related field, including word processing, data management, presentational, media content creation, web publishing, and design/editing software and programs.

Offered Fall, Spring

COM 110. Introduction to Digital Media Production. (2 Units)

Co-requisite: COM 111 is required. An introduction to the process of digital video production that provides basic skills in all areas of digital video production in preparation for a career in any communications or related field that might require these basic skills. Skill sets include camera, lighting, sound, pre-production and production methodologies, and basic digital processes.

Offered Fall, Spring

COM 111. Introduction to Digital Media Production Laboratory. (1 Units)

Co-requisite: COM 110 is required. Provides instruction on basic skills in all areas of digital video production. The lab provides hands-on training in the use of camera operations, lighting, sound recording, pre-production, production and post-production methodologies, and basic digital processes.

Offered Fall, Spring

COM 130. Introduction to Film. (3 Units)

An introduction to the study of film as an aesthetic, historical, and cultural phenomenon, and to various methods of critical analysis.

Offered Fall, Spring

COM 200. Genre Analysis. (3 Units)

Prerequisites: COM 100 or COM 105 is required. Critical study of a specific genre of media (horror, science fiction, western, or documentary for example). Examines genres in their cultural and historical context and critical analysis writing using appropriate concepts and terminology.

Offered All terms, Fall, Spring

COM 206. Photojournalism. (3 Units)

Instruction in the basic principles of still photography.

Offered Infrequent, All terms

COM 250. Writing for the Media. (3 Units)

Instruction and practice in the basics of reporting and writing news for print, electronic and digital media.

Offered Fall, Spring, Summer, All terms

COM 251. Newswriting in Spanish. (3 Units)

Prerequisites: SPA 220 and SPA 221; or SPA 280 are required. Instruction and practice of the basics of reporting in Spanish language for traditional and new media. Students will gain the ability to conduct research, find sources and produce news in Spanish.

Offered Fall, Spring, Summer

COM 301. News and Information Literacy. (3 Units)

Develop critical thinking and literacy skills through examination of news and other constructed messages. Emphasis on analyzing and evaluating information sources and their narratives, structures, origins, placement and availability.
Offered Fall, Spring

COM 302. Law Of The Mass Media. (3 Units)

Libel law, right to privacy, contempt of court, copyright, the right to print news of public affairs, the Freedom of Information Act, and other legal topics of concern to the media professional.
Offered Fall, Spring

COM 307. History of Film. (3 Units)

Prerequisite: COM 100 or COM 105 is required. A critical survey of the history of film from the 1890s to the present. Covers a range of cinematic traditions from narrative to experimental. Examines the interrelationships between cinematic forms, industry, regulation, technology, aesthetics, and culture.
Offered Spring

COM 308. Television History. (3 Units)

Prerequisite: COM 100 or COM 105 is required. A critical survey of the history of American television, from the 1940s to the present. Examines the interrelationships between programming forms, industry, regulation, technology, aesthetics, and culture.
Offered Fall

COM 309. History of Emerging Media. (3 Units)

Prerequisite: COM 100 or COM 105 is required. A critical survey of the history of new and emerging media forms from 1830s to the present. Examines a range of media technologies as sites of contestation and negotiation before their use by audiences had been institutionalized within industry and culture.
Offered Fall, Spring

COM 311. Persuasion. (3 Units)

Prerequisite: COM 100 is required. Provides students with an in-depth understanding of persuasion conceptions, theories, and practices. Students analyze findings and implications of persuasion research to real-world cases.
Offered Infrequent

COM 314. Broadcast Journalism. (2 Units)

Prerequisite: COM 250 is required. Co-requisite: COM 315 is required. Provide students with accurate news judgement and the fundamental journalistic techniques of news gathering, reporting, writing, editing, evaluating, and producing news and feature stories for radio and television news broadcasts.
Offered Fall

COM 315. Broadcast Journalism Lab. (1 Units)

Prerequisite: COM 250 is required. Co-requisite: COM 314 is required. Provide students with accurate news judgement and the fundamental journalistic techniques of news gathering, reporting, writing, editing, evaluating, and producing news and feature stories for radio and television news broadcasts.
Offered Fall

COM 320. Sports Journalism. (3 Units)

Prerequisite: COM 250 is required. Provides instruction and practice in reporting stories and producing multimedia news packages on a variety of sports topics including game coverage, interviewing, and reporting on both professional and amateur sports activities for print, broadcast, and online media.
Offered Fall

COM 328. Entertainment and Lifestyle Journalism. (3 Units)

Prerequisites: COM 250 is required. Theory and practices of journalistic writing about television, film, music, visual arts, travel destinations, dining and other cultural phenomena across media platforms.
Offered Spring

COM 330. Emerging Media Writing. (3 Units)

Prerequisite: COM 100 or COM 105; and COM 106 are required. Course focuses on writing interactive stories for emerging media. Students develop skills in generating concepts, story structure, character development, incorporating interactivity and pitching. Students conduct both collaborative and individual projects and develop skills for peer critique of creative work.
Offered Spring

COM 331. Screenwriting I. (3 Units)

Prerequisite: COM 100 or COM 105 is required. Serves as an introduction to the craft of screenwriting, with primary focus on equipping students with the skills to write scenes and short format screenplays and to analyze and evaluate feature films and screenplays.
Offered Fall, Spring

COM 332. Writing for Series Television. (3 Units)

Prerequisite: COM 100 or COM 105 is required. Students break down the TV-writing process then apply each step to the development of their own original script. Students will learn the basic theory and formal aspects of story structure, character development, the use of conflict, scene writing and dialogue for television.
Offered Fall

COM 333. Digital Journalism. (2 Units)

Prerequisites: COM 110 and COM 250 are required. Co-requisites: COM 334 is required. Provides students with skills needed to gather news, analyze and produce a variety of stories for digital media across platforms and digital publishing tools, including social media, podcasts, blogs, videos, and websites, as well as to understand the nature of the emerging field of convergent journalism.
Offered Fall, Spring

COM 334. Digital Journalism Laboratory. (1 Units)

Prerequisites: COM 110 and COM 250 are required. Co-requisite: COM 333 is required. Provides skills needed to gather, analyze and produce a variety of stories for digital media, across platforms and digital publishing tools, including social media, podcasts, blogs, videos, and websites, and understand the emerging field of convergent journalism.
Offered Spring

COM 338. Cross-Cultural Journalism. (3 Units)

Prerequisite: COM 250 is required. Provides a broad, critical examination of differences in global news culture, policies and styles, including Spanish-language, alternative, ethnic-focused, and political-driven media, and other cultural print and broadcast organizations. Topics vary by semester.
Offered Fall, Spring

COM 339. Latinx culture and the news media in the USA. (3 Units)

This course offers an overview of contemporary Latinx news media in the U.S. For a deeper understanding of the topics reported in the LatinX new media, students will learn about the countries that comprise Latin America. This includes Latin American history and culture. The course will highlight current events in Latin America and how they connect with Latinx communities in the U.S.

COM 340. Emerging Media Making. (2 Units)

Prerequisites: COM 100 or COM 105; and COM 106/107 are required.
Co-requisite: COM 341 is required. Students utilize digital software to produce original new media projects, including memes, pixel art, music, interactive fiction and/or digital games. Students conduct both collaborative and individual projects and develop skills for peer critique of creative work.

Offered Infrequent

COM 341. Emerging Media Making Lab. (1 Units)

Prerequisites: COM 100 or COM 105; and COM 106/17 are required.
Corequisite: COM 340 is required. Lab activity works in conjunction with COM 340: Emerging Media Making to give students hands-on time with production software under instructor supervision.

Offered Infrequent

COM 342. Advertising Strategy and Copywriting. (3 Units)

Planning, creating and preparing demographically and psychologically targeted advertisements for print, electronic, interactive, and out-of-home media. Students will write copy for commercial and not-for-profit advertising campaigns. Restricted to majors

Offered Fall, Spring

COM 344. Advertising Media Analysis. (3 Units)

Analysis of the comparative advantages (cost and market impact) of various advertising media as a basis for time and space buying within the context of the creative advertising campaign with an emphasis on campaign planning and implementation.

Offered Fall, Spring

COM 346. News Gathering & Reporting. (3 Units)

Prerequisites: COM 250. Theory and practice of information gathering for print and electronic media writing, including the art of interviewing. Identification, assessing and verifying published, computerized data base and live sources. Special emphasis on interview problems such as invalid inference and supposition.

Offered Fall, Spring

COM 347. Multimedia Interviewing Practices. (3 Units)

Prerequisites: COM 100, COM 110 and COM 250 are required. An introduction to the fundamentals of gathering information through interview techniques, active listening, nonverbal communication, and psychological dynamics of interviewing in journalistic situations. Emphasis on accurate note taking, transcribing, and narrative structure from interviewing for print, online, and broadcast media.

Offered Fall, Spring

COM 348. News Editing And Design. (3 Units)

Prerequisites: COM 250. Principles, practice in copy editing, including review of grammar, spelling, punctuation, word use, organization, word flow, sentences, information verification, application of appropriate story forms; writing headlines, photo cropping and sizing, computer desktop page design and editorial judgment. One hour lecture, two hours activity per week.

Offered Infrequent

COM 350. Culture, Gender and Strategic Communication. (3 Units)

Prerequisite: COM 100 is required. Improve the understanding of cultural differences and assumptions regarding gender in the context of strategic communication. An overview of major communication theories, strategies, methods, and practices in advertising and public relations campaigns will be covered. Develop advertising skills and public relations messages based on cultural aspects in strategic communication.

Offered All terms, Fall, Spring

COM 352. Feature And Critical Writing. (3 Units)

Prerequisites: COM 250. Analysis and practice of preparing feature stories and critical reviews for newspapers, magazines, radio, television and video. Assignments include profiles, how-to pieces and news features. Critical reviews focus on theatre, film, music, fine arts and books. Two hours lecture, two hours activity per week.

Offered Fall, All terms

COM 355. News Production Workshop. (3 Units)

Prerequisites: COM 250 is required, COM 346 is recommended. Production of print and electronic forms of campus newspaper. Practices include original story selection, writing, reporting, interviewing, and editing. Repeatable course. Two hours lecture, three hours activity per week.

Offered Fall, Spring

COM 358. Communications Graphics. (3 Units)

Prerequisites: COM 250. Learning methods for producing various forms of visual communications including fliers, informational graphics and logos, newsletters, magazines and newspapers in correlation with desktop publishing, page design, typography selection, copy fitting photo sizing and cropping. Two hours lecture, two hours activity per week.

Offered Infrequent

COM 360. Pub Affairs & Edit. Writing. (3 Units)

Prerequisites: COM 250 and COM 346. Reporting, writing and editorial interpretation of public affairs events and issues, including on-site coverage of local governments, civic affairs, schools, police and courts. Utilization of public documents, enhancement of interviewing techniques, with emphasis on accuracy, clarity and social responsibility. Two hours lecture and two hours activity per week.

Offered Infrequent

COM 363. Social Media Strategies. (3 Units)

Prerequisites: COM 250 and COM 365 are required. Provides an overview of various social media techniques and the strategies to help organizations engage in dialogue and build relationships effectively with different audiences and stakeholders.

Offered Spring

COM 365. Introduction to Public Relations. (3 Units)

Public relations practices and principles as applied to government, education and industry.

Offered Fall, Spring

COM 366. Public Relations Writing. (2 Units)

Prerequisites: COM 250 and COM 365. Co-requisite: COM 367 is required. Public relations writing; message and audience analysis. Creating effective forms of public relations communications, producing print and video press releases, public service announcements, media fact sheets and alerts, executive letters, press kits and brochures and newsletter copy. Two hours lecture, two hours activity per week.

Offered Fall, Spring

COM 367. Public Relations Writing Lab. (1 Units)

Prerequisites: COM 250 and COM 365 are required. Co-requisite: COM 366 is required. Public Relations writing laboratory course that covers the creation of effective forms of public relations communications; the production of print and video press releases, public service announcements, media fact sheet ans alerts, executive letters, press kits and brochures, and newsletter copy.

Offered Fall, Spring

COM 368. Investigative Reporting. (3 Units)

Prerequisite: COM 250 is required. Prepares students to conduct in-depth reporting by examining the motivation, process, and skills behind investigative journalism, including obtaining and analyzing public records, private documents and data on social, political, and scientific issues for print, broadcast or online media.

Offered Fall

COM 370. Creative Producing I. (3 Units)

Prerequisites: COM 100 or 105, COM 379, and COM 330, COM 331 or COM 332 are required. Builds on students' understanding of storytelling and the industry to provide an introduction to script development and writing coverage. Students study the basics of packaging films for Hollywood and how to navigate the business of both studio production and independent film-making.

Offered Fall, Spring

COM 372. Crisis Communication. (3 Units)

Prerequisites: COM 250 and COM 365 are required. An introduction to crisis communication theory and application. The course will cover crisis communication theory, crisis management strategies and various case studies.

Offered All terms, Fall

COM 375. Media and Representation. (3 Units)

Prerequisite: COM 100 or COM 105 is required. Critical study of US media representations of race, gender, class, sexuality, and other markers of difference. Considers the complex social, historical, and industrial forces shaping media portrayals of identities, groups, and cultures.

Offered Fall, Spring

COM 376. Transmedia Storytelling. (3 Units)

Prerequisite: COM 100 or COM 105; and COM 379 are required. Provides an overview of the transmedia landscape and developing skills necessary for writing stories intended for use across multiple platforms. Topics include how stories are developed for cross media consumption from story ideation to production and distribution.

Offered Fall

COM 377. Global Media. (3 Units)

Prerequisites: COM 100 or COM 105; and COM 379 are required. Critical study of media outside of the US; may focus on a transnational, national, regional, or local media tradition or industry. Considers how global media relates to history, culture, and identity. Focuses on critical analysis writing using appropriate concepts and terminology.

Offered Spring

COM 378. Media Audiences. (3 Units)

Prerequisite: Prerequisites: COM 100 or COM 105 is required. Critical study of a specific media audience (comic book fans, social media users, telenova viewers, for example). Examines audiences in cultural and historical context, considering the range of ways in which audiences make meaning from and engage with media texts.

Offered Fall

COM 379. Media Industries. (3 Units)

Prerequisite: COM 100 or COM 105 is required. Analyzes contemporary media industries offering a comprehensive overview of how the industries work, their historical roots in relation to how they operate today, and their cultural influence. Examines how the relationships between various cultural, industrial, regulatory, and economic elements set the conditions by which media industries create cultural texts.

Offered Fall, Spring

COM 388. Digital Magazine Production. (1 Units)

Prerequisites: COM 250, COM 347 and COM 352 are required. Co-requisite: COM 389 is required. This course is designed to build skills in advanced feature storytelling through the production of a digital magazine for distribution across digital platforms. From conception to production, feature story packages and will be developed with a strong focus on research, writing, editing, photography, creating videos and podcasts, and design.

Offered Spring

COM 389. Digital Magazine Production Laboratory. (2 Units)

Prerequisites: COM 250 and COM 352 are required. Co-requisite: COM 388 is required. This course is designed to build skills in advanced feature storytelling through the production of a digital magazine for distribution across digital platforms. From conception to production, feature story packages and will be developed with a strong focus on research, writing, editing, photography, creating videos and podcasts, and design.

Offered Spring

COM 390. Hollywood by the Horns. (3 Units)

Prerequisites: COM 100 or COM 105; and COM 379 are required. Workshop that contributes to the mission of the Hollywood by the Horns program: to build up and maintain the relationship between working professionals in Hollywood and the dynamic students of CSU Dominguez Hills. Requires department consent.

Offered Fall

COM 400. Media Analysis and Research Methods. (3 Units)

Prerequisites: COM 100 and COM 250. Critical analyses of the media and their role in society from an empirical research perspective. Emphasis on social science-based research methods including focus groups, in-depth interviews, correlational studies and experiments, and research report preparation.

Offered Fall, Spring

COM 420. Screenwriting II. (3 Units)

Prerequisite: COM 100 or COM 105; and COM 331 are required. Advancing the process of screenwriting, students develop original work culminating in the completion of the first act of a feature length screenplay. Final projects can be developed into a senior project for COM 490.

Offered Infrequent

COM 435. Media Psychology. (3 Units)

Prerequisite: COM 100 is required. Course is designed to acquaint students with the burgeoning field of media psychology, which examines the intersection of media use/media content and psychological processes. In this course, students will learn how mass media messages, images, and texts can alter our thoughts, feelings, and behaviors, and how media and technology use may lead to or exacerbate psychological disorders.

Offered Spring

COM 467. Integrated Communications Management. (3 Units)

Prerequisites: COM 250, COM 365 and COM 366 are required. Analysis and development of strategies for planning/implementing integrated communications campaigns and preventing/solving integrated communications problems. Emphasis is placed on both individual and team case studies, incorporating strategic planning and writing techniques previously learned.

Offered Fall, Spring

COM 470. Creative Producing II. (3 Units)

Prerequisites: COM 100 or COM 105, COM 370, and COM 330, COM 331, or COM 332 are required. Develops students' knowledge of producing scripted entertainment from development through distribution. Students will complete advanced work in screenplay development and the multiple pathways to producing.
Offered Infrequent

COM 490. Senior Project. (3 Units)

Prerequisite: Consent of department; senior standing. Discussion and preparation of senior project and professional portfolio.
Offered Fall, Spring

COM 494. Independent Study. (1-3 Units)

Independent study in any relevant subject area under the direction of a member of the Communications Department faculty. Course repeatable 3 times for a maximum of 9 units.
Offered Fall, Spring

COM 495. Special Topics. (3 Units)

Prerequisite: COM 100 or COM 105 is required. Restricted to seniors or by consent of department. An intensive study of an issue or concept in journalism, advertising, public relations, film, television or emerging media that is of special interest to both the faculty member and the students. Repeatable for credit
Offered As needed

COM 496. Internship In Communications. (3 Units)

Prerequisites: Senior standing and/or approval of the department is required; completion of a minimum of 27 upper division units in the major is recommended. Directed work experience in the communications field-print or electronic journalism, public relations or advertising, film, broadcasting, or telecommunications. Ideally, such work provides a practical bridge linking the student's academic studies with the world of work. A minimum of 10 hours a week of supervised work experience under the direction of a professionally-qualified mentor.
Offered Fall, Spring

Film, Television, and Media, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Major Requirements (48 units)

The following courses, or their approved equivalents, are required of all candidates for this degree. The academic standards of the department

require that all Film, Television and Media majors pass all required and prerequisite courses with grades of "C" or better.

| Code | Title | Hours |
|--|--|-----------|
| Lower Division Required Courses (15 units) | | |
| COM 100 or COM 105 | Media & Society Introduction to Media Criticism | 3 |
| COM 106 | Digital Toolkit | 2 |
| COM 107 | Digital Toolkit Lab | 1 |
| COM 110 | Introduction to Digital Media Production | 2 |
| COM 111 | Introduction to Digital Media Production Laboratory | 1 |
| COM 130 | Introduction to Film | 3 |
| COM 200 | Genre Analysis | 3 |
| Upper Division Courses (33 units) | | |
| Required Courses (9 units) | | |
| COM 370 | Creative Producing I | 3 |
| COM 375 | Media and Representation | 3 |
| COM 379 | Media Industries | 3 |
| Select two of the following History Courses (6 units): | | 6 |
| COM 307 | History of Film ¹ | |
| COM 308 | Television History ¹ | |
| COM 309 | History of Emerging Media ¹ | |
| Writing Requirement | | |
| Select one of the following (3 units): | | 3 |
| COM 330 | Emerging Media Writing ¹ | |
| COM 331 | Screenwriting I ¹ | |
| COM 332 | Writing for Series Television ¹ | |
| Capstone Experience (3 units) | | |
| COM 490 | Senior Project | 3 |
| Electives | | |
| Select four 3-unit upper division electives (12 units) | | 12 |
| COM 340 | Emerging Media Making | |
| COM 341 | Emerging Media Making Lab | |
| COM 376 | Transmedia Storytelling | |
| COM 377 | Global Media | |
| COM 378 | Media Audiences | |
| COM 390 | Hollywood by the Horns | |
| COM 420 | Screenwriting II | |
| COM 470 | Creative Producing II | |
| COM 494 | Independent Study | |
| COM 495 | Special Topics: ² | |
| COM 496 | Internship In Communications ² | |
| Total Hours | | 48 |

¹ Cannot double count for elective.

² May be repeated twice for credit.

Program Learning Outcomes

Upon the completion of the B.A. in Film, Television, and Media program, a degree recipient will be able to:

- Demonstrate media literacy via the ability to critically analyze the cultural significance and social role of media, making substantive connections between media production, content, and audiences.
- Demonstrate the ability to communicate clearly and in a critically informed manner in a variety of analytical and/or creative contexts.
- Demonstrate the ability to locate, evaluate and effectively use information in pursuit of creative and/or scholarly projects.
- Demonstrate an understanding of key theories, concepts, methods and practices from the academic and/or practical fields of screen media.
- Demonstrate an understanding of the complex forces shaping media portrayals of identities and cultures through critical analysis and/or creative expression that reflect students' communities and experiences.

Film, Television, and Media 4-Year Roadmap

| First Year | | Hours |
|--|--|-----------|
| Fall | | |
| GE Area A1 | | 3 |
| COM 130 | Introduction to Film (satisfies GE Area C1) | 3 |

Geography

College Natural and Behavioral Sciences
Department of Earth Science and Geography

Program Description

The Geography program is one of two programs housed in the Department of Earth Science and Geography. Geography studies the spatial distribution of features across Earth's landscape, such as the location of landforms, water bodies, and the organization of climate zones. It also considers the human landscape, including how populations are distributed, why they migrate, and the ways they alter natural and urban environments. As a tool to advance these spatial analyses, the Geography program teaches the use of both traditional and computer-based geotechnical skills (geotechniques) such as cartography, remote sensing, and geographic information systems (GIS).

Geography at CSUDH emphasizes "hands-on" learning, and many courses feature field trips. The expertise and international focus of the faculty provide opportunities for engaged students to participate in diverse research projects ranging from treeline studies in alpine environments, GIS mapping of California river systems, or studying the effects of water scarcity or environmental pollution through the lenses of sustainability and environmental justice.

Features

The Earth Science and Geography Department has a map library containing several thousand map sheets. The department also has two dedicated computer laboratories, the Earth Sciences Spatial Analysis Laboratory (ESSAL) which acts as a center for remote sensing and GIS-based research projects, and a teaching laboratory which provides computer-based teaching with an emphasis on geotechniques. These labs provide sophisticated image processing and spatial analysis software as well as libraries of satellite imagery and spatial databases. Additional equipment includes Global Positioning System (GPS) receivers and advanced instruments for field data collection.

The faculty have expertise in plate tectonics, historical geology and field geology; hydrology, atmospheric science, air quality, climate change, and landscape change; geographic information systems, remote sensing, and sensor networks, plus urban planning, environmental planning, and environmental science. The broad expertise of the faculty provides an unusual opportunity for motivated undergraduate students to work closely with their professors and gain "hands-on" experience within domestic and international research projects.

Academic Advisement

Majors should consult with their advisor prior to registration each semester. Records of students' progress toward the degree are accessible online through MyCSUDH. Students should check their progress regularly.

Preparation

For high school students, the best preparation for the Geography major is a well-rounded program of high school courses in humanities, science, mathematics, and written and oral communication. Community college transfer students should have completed introductory physical geography and a human/cultural geography course. Introductory courses in the physical, biological and social sciences are recommended.

Graduation With Honors

An undergraduate student may be a candidate for graduation with Honors in Geography provided they meet the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of at least 3.5 in all courses used to satisfy the upper-division requirements in the major.

Career Possibilities

Many societal problems have geographic dimensions and training in Geography provides essential skills for solving them. Geographic skills such as GIS, the analysis of remotely-sensed imagery, and other geotechniques are in high demand from governments, non-governmental organizations, and private industry alike at the local, regional, national, and international levels. Career opportunities include environmental consulting, planning and zoning; urban and regional planning; natural resource management and conservation; energy; air and water quality management; secondary school (middle and high school) teaching, and a wide array of social service firms and agencies. The geographic toolkit has many applications.

Geography is an appropriate major for a teaching career at a secondary school (middle or high school), as part of an approved "Subject Matter Preparation Program" in Social Science. Completion of such a program is the first step toward meeting California state requirements for a teaching credential. Interested students should consult with an appropriate advisor for current information as program requirements for the "Subject Matter Preparation Program" in Social Science change regularly.

Undergraduate Programs

Bachelor

- Geography, Bachelor of Arts (p. 569)

Minor

- Geography, Minor (p. 570)

Certificate

- Geotechniques, Certificate (p. 571)

Faculty

John Keyantash, Department Chair
Parveen Chhetri, Brendan McNulty, Ashish Sinha

Instructional Support Tech Office: LIB 1114, (310) 243-3368

Department Office: NSM B-202, (310) 243-3377

Emeriti Faculty

Rodrick Hay, Ralph Saunders, David Sigurdson, Jamie Webb

Courses

GEO 100. Human Geography. (3 Units)

Cultural, physical, and biological earth systems. Emphasizes human geography and adaptation to physical habitats.
Offered Fall, Spring, All terms

GEO 200. Physical Geography. (3 Units)

Classical natural systems, including earth-sun relationships, atmospheric flows, terrestrial biogeography, landforms, and processes of change; introduction to modern monitoring methods using maps, satellite reconnaissance, and geographic information systems.
Offered Fall, Spring

GEO 305. Cartography. (3 Units)

Principles, techniques, design and production of maps and graphs for data presentation. One hour of lecture and six hours of lab per week.
Offered Spring even

GEO 310. Geomorphology. (3 Units)

Prerequisite: EAR 100 or GEO 200 is required. Study of landforms created by geologic, volcanic, weathering, fluvial, karst, coastal and other processes acting on the land surface and ocean floor.
Offered Fall odd

GEO 315. The Weather. (3 Units)

Structure of the atmosphere, planetary circulations, and storms of all latitudes. Types of clouds, radiation, humidity, precipitation, and optical phenomena. El Niño-Southern Oscillation and global teleconnections. Two hours of lecture and three hours of laboratory per week.
Offered Fall odd

GEO 318. Cultural Pluralism The Human Environment: Methods of Knowledge and Truth. (3 Units)

Prerequisites: Completion of Lower Division General Education. Analysis of cultural diversity and the process of cultural interaction, inter-ethnic relations and social integration on the community, national and international levels with emphasis on people's knowledge of the natural world.
Offered Fall, Spring

GEO 336. Land Use. (3 Units)

Sequential, compatible, and conflicting land uses. Zoning and regulation. Impacts of public and private uses. Social and economic benefits from alternative land use.
Offered Infrequent

GEO 350. World Geography. (3 Units)

Study of the world's regions: population distribution, landforms and natural resources, urban and non-urban relationships, connections of trade and transportation, plus selected case studies involving water resources, boundaries and environmental impacts.
Offered Fall, Spring

GEO 357. Urban Environmental Geography. (3 Units)

A survey of key environmental issues affecting Los Angeles and other cities with special emphasis on environmental policy and local ordinances designed to mitigate urban environmental issues including air pollution, water resources, park and waste management.
Offered Fall even

GEO 359. Geography Of California. (3 Units)

The physical, cultural and regional geography of California. The land and its modifications. Spatial distribution of resources. Population, migration and urbanization. Problems and prospects.
Offered Infrequent

GEO 360. North America. (3 Units)

Physical, regional and cultural geography of the United States, Canada and Mexico. Emphasizes human-environment interaction, contemporary patterns of population distribution, resource exploitation, transportation, and agricultural and industrial production.
Offered Infrequent

GEO 370. Numerical Methods in Geography. (3 Units)

Prerequisites: CSC 101 and MAT 009 (or equivalents). Principles of data reduction and analysis in the natural sciences. Practical techniques to understand spatial data sets using computer software. Topics include matrices, summary statistics, distributions, transformations, hypothesis testing, contouring, regression and curve-fitting.
Offered Spring odd

GEO 380. Biogeography. (3 Units)

The distribution of plant and animal species with emphasis on native plant and animal populations in Southern California and recent changes to the region's flora and fauna.
Offered Fall odd

GEO 405. Advanced Cartography. (3 Units)

Prerequisite: GEO 305 or equivalent is recommended. Planning and preparing maps, graphics, photographs, and models. One hour of lecture and six hours of lab per week.
Offered Spring even

GEO 408. Remote Sensing and Image Processing. (3 Units)

Interpretation of physical and cultural features, resources, environmental factors from photographic and specific sensor imagery. One hour of lecture and six hours of activity per week.
Offered Spring odd

GEO 412. Rivers and Streams. (3 Units)

Geographic inventory of global, state and national water resources. Drainage networks, streamflow measurements and flooding. Waterfalls, rapids, river conservation and dam case studies. Features field trip.
Offered Spring even

GEO 415. Geographic Information Systems. (3 Units)

Prerequisites: Basic computer knowledge, CSC 101 or equivalent. Techniques of data acquisition, processing, analysis and display as pertain to geographic information systems. Includes practical applications based on various forms of geographically referenced data. One hour of lecture and six hours of laboratory per week.
Offered Fall

GEO 416. Earth's Climates. (3 Units)

Prerequisite: GEO 200 is required. Characteristics and classifications for Earth's climates, with emphasis on the physical geographic reasons for their distribution patterns, as well as the biomes associated with each climate zone. The influence of climate zones on agriculture, diet, dress, and lifestyle. Physical and biological proxies for climate data, and historical and current trends in global climate.

Offered Spring odd

GEO 420. Natural Resources. (3 Units)

Atmospheric, hydrologic, ecologic and geologic principles; economic and environmental considerations in air, water, soil, food, timber, wildlife, nonmetallic and metallic resources.

Offered Fall even

GEO 433. Environmental Analysis and Planning. (3 Units)

Federal and State requirements, required inputs, presentation formats, procedures for review and acceptance of environmental reports. Methods of assessing air quality, noise, water pollution and traffic problems.

Offered Spring even, All terms

GEO 494. Independent Study. (1-3 Units)

Prerequisite: Consent of instructor. Independent study of a particular geographic or environmental problem under the supervision of a Geography faculty member

Offered Fall, Spring

GEO 495. Special Topics In Geography. (3 Units)

Selected topics in Geography with course content to be determined by instructor. Repeatable course.

Offered As needed

GEO 498. Directed Research. (1-3 Units)

Prerequisite: Consent of instructor. Research of a particular geographic or environmental problem under the direction of a Geography faculty member. CR/NC grading.

Offered Fall, Spring

Geography, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Students completing this major will need to complete a minor in another field.

Major Requirements (34 units)

The following courses (or for lower division courses, their approved transfer equivalents) are required for all candidates for this degree:

| Code | Title | Hours |
|--|--|-----------|
| Lower Division Required Courses | | |
| GEO 100 | Human Geography | 3 |
| GEO 200 | Physical Geography | 3 |
| Upper Division Required Courses | | |
| GEO 310 | Geomorphology | 3 |
| GEO 357 | Urban Environmental Geography | 3 |
| GEO 370 | Numerical Methods in Geography | 3 |
| GEO 415 | Geographic Information Systems | 3 |
| EAR 490 | Sr Sem In Earth Sciences | 1 |
| Elective Courses | | |
| Select at least five courses from the following: | | 15 |
| GEO 305 | Cartography | |
| GEO 315 | The Weather | |
| GEO 318 | Cultural Pluralism The Human Environment: Methods of Knowledge and Truth | |
| GEO 350 | World Geography | |
| GEO 360 | North America | |
| GEO 380 | Biogeography | |
| GEO 408 | Remote Sensing and Image Processing | |
| GEO 412 | Rivers and Streams | |
| GEO 416 | Earth's Climates | |
| GEO 420 | Natural Resources | |
| GEO 433 | Environmental Analysis | |
| GEO 495 | Special Topics In Geography | |
| EAR 376 | Field Mapping | |
| EAR 460 | Global Change | |
| Total Hours | | 34 |

Program Learning Outcomes

- **Geographic Literacy:** Students will apply their knowledge of the world's geography by interpreting topographic and thematic maps. They will demonstrate their ability to think geographically by analyzing geographic problems at a variety of scales.
- **Environmental Processes:** Students will demonstrate their understanding of the utilization and distribution of key natural resources. This will include fundamental transport processes such as the hydrologic cycle, the rock cycle, and circulations through the world ocean and global atmosphere and their relationship to contemporary environmental issues.
- **Geotechniques:** Students will demonstrate their understanding of geotechniques such as GIS, remote sensing, spatial statistics, and field maps. Students will apply spatial statistics and other forms of numerical analysis to interrogate existing and original geographical data sets.
- **Field Experience:** Students will apply field research techniques toward the completion of field mapping and other data collection exercises.
- **Written and Oral Communication:** Students will demonstrate their ability to describe research and to summarize research results in essays, written reports and oral presentations.

- **Group Activities:** Students will be able to work together in small groups to collect and analyze classroom/field data and they will demonstrate their ability to collaborate with other students to deliver research presentations.
- **Professional Preparation:** Students will hone research skills and work on research projects which reflect their command of the subject matter and its relevance to contemporary environmental issues, as well their command of geotechniques and their application. The research projects prepare students for graduate school and/or the workforce, and can be used as examples of the kinds of knowledge and expertise that they could bring to prospective employers.

Geography, Minor Requirements

To meet this requirement, the student must complete the lower division courses listed below. Where appropriate, these courses may also be used to meet General Education requirements.

| Code | Title | Hours |
|---|--------------------|-----------|
| Lower Division Required Courses | | |
| GEO 100 | Human Geography | 3 |
| GEO 200 | Physical Geography | 3 |
| Upper Division Required Courses | | |
| Select 12 units of upper division Geography courses | | 12 |
| Total Hours | | 18 |

Geotechniques, Certificate

The Geotechniques certificate is designed to prepare students for public and private sector employment involving the collection, input, processing, and analysis of spatial databases for research and management purposes. To qualify for the certificate, candidates must demonstrate their competence in the use of remote sensing and geographic information systems technologies and their application to problem solving. Students majoring or minoring in Geography may complete the certificate requirements by taking the appropriate courses as part of their regular programs.

Graduate Education

College of Education
Division of Graduate Education

Program Description

Graduate Education Programs are designed to provide knowledge and understanding of the basic foundations and theories of education, as well as advanced training in specific fields. The curriculum blends theory and practice to prepare students for advancement within their chosen field in education, public service or private industry.

The comprehensive program at CSU Dominguez Hills includes a Master of Arts degree, a Master of Science degree, Credential Programs and a Certificate program. In two instances, master's programs and credential programs may be combined.

Features

The Graduate Education curriculum is designed to meet the needs of full-time working professionals by offering a full program of courses in the late afternoon and evening. Courses are offered so that degree requirements may be completed over a period of one to four years, depending on the program. All students receive advising to plan their programs that meet individual student needs. The urban location of the University provides a unique opportunity for working with a diverse cultural and ethnic population in classes and in field experiences.

Academic Advisement

Students work with advisors when they are admitted to the Division of Graduate Education for a specific program (master's degree, credential, or certificate). Students who are uncertain about which program best meets their professional goals may meet with the department chairperson to discuss the range of options available.

Students must confer with their advisors each semester prior to registration to ensure that they are taking the appropriate course work in the proper sequence.

Requirements for Admission to the Graduate Programs in Education

Admission as a classified graduate student in education requires:

- Admission to the University.
- A baccalaureate degree from a regionally accredited college or university.
- School Leadership Program (SLP): A minimum of a 3.0-grade point average for the last 60 units of upper-division course work attempted, or a Miller's Analogies Test (MAT) score of 400 or above in lieu of the 3.0 GPA.
- Counseling and the Graduate Certificate Program in Higher Education Administration and Leadership (HEAL): A cumulative GPA of 3.0.
- Counseling, HEAL and SLP: A separate program application for the desired Graduate Education program. Must include a copy of all transcripts to the College of Education Student Services Center. Students can find the applications at: <https://www.csudh.edu/coe/forms/>.
- Counseling, HEAL and SLP: Three letters of recommendation from individuals who can evaluate the applicant's potential for graduate study. Exception: School Leadership Program Option requires two letters of recommendation, one from the applicant's site supervisor, or principal, or designee.
- The Counseling, School Leadership Program and Higher Education Administration and Leadership Graduate Certificate Programs require a typed Statement of Purpose as part of the application.

Admission Procedures

The application deadline for the School Leadership Program is June 1st. Dates are subject to change.

All prospective graduate students, including CSU Dominguez Hills graduates, must do the following:

1. Apply for graduate admission to the university through Cal State Apply.
2. Submit two sets of official transcripts from all colleges and universities attended other than CSU Dominguez Hills to the CSU Dominguez Hills Admissions Office.
3. Must complete a separate program application for the desired Graduate Education program. Must include a copy of all transcripts to the College of Education Student Services Center. Students can find the applications at: <https://www.csudh.edu/coe/forms/>. Upon completion of university and program admission requirements, a decision regarding admission will be made.

Classified Standing

Students who satisfy all the requirements of program admission will be admitted with Classified Standing. Students accepted with Conditional Standing will have a semester to meet the conditions for Classified Standing. Upon completion of specified conditions, students must request that a Postbaccalaureate/Graduate Change of Objective form be filed by their advisor on their behalf.

Degree Requirements

The Master of Arts Degree in Education requires completion of 30 units or more of course work with a minimum 3.0 grade point average. A minimum of 21 semester units must be completed in residence. Courses taken previously may be used to meet the course content requirements of a graduate program if they have been completed within the seven years immediately preceding the completion of the requirements for the degree or credential. However, no courses may apply toward the required number of units of approved graduate work that have been used to meet the requirements of another degree.

Students may take up to seven years to complete the course work, including exams. Course work that does not meet the seven-year deadline will have to be repeated and/or replaced by other courses with the approval of the program advisor.

A Graduation Writing Assessment Requirement must be met by all students prior to classified standing. This requirement can be met on the CSU Dominguez Hills campus by obtaining one of the following:

- A baccalaureate degree from an accredited college or university in the United States.
- A baccalaureate degree from an accredited non-US institution where English is the primary language of instruction.
- Graduate students who earned a 4 or above on the analytical writing component of the Graduate Record Examinations (GRE) or the Graduate Management Admission Test (GMAT).
- Students from a baccalaureate program offered in non-English speaking university settings can qualify to enter a graduate program by meeting one of the following options: take the Test of English
- Has a Foreign Language (TOEFL) and achieves a score of: 550 (paper-based); 80 (internet-based); 213 (computer-based); or achieves an International English Language Testing System (IETLS) score of 6.5.

In addition to the major requirements, students must meet all university requirements for the master's degree. Students should consult

the section of the catalog entitled "Requirements for the Master's Degree (<https://catalog.csudh.edu/general-information/graduate-degree-postbaccalaureate-studies/>) (<https://catalog.csudh.edu/general-information/graduate-degree-> (<https://catalog.csudh.edu/general-information/graduate-degree-postbaccalaureate-studies/>) (<https://catalog.csudh.edu/general-information/graduate-degree-postbaccalaureate-studies/>))."

Completion of Degree

1. Complete an approved program of 30 units or more of course work and meet specific GPA requirements.
2. Pass a comprehensive written examination. After completion of all course work or during the last semester of course work, the M.A. degree candidate may apply to take the comprehensive examination. There is only one retake opportunity.

Certificate

- Higher Education Administration and Leadership (HEAL), Graduate Certificate (p. 575)

Faculty

Gary Rhodes, Department Chair

Rene Castro, Yesenia Fernandez, Kitty Fortner, Leena Furtado, Jeremy Hart, Julie Jhun, Margarita Landeros, Adrieann Mancillas,

Department Office: COE 1446, (310) 243-3524

Emeriti Faculty

Charmayne Bohman, Edith Buchanan, Muriel P. Carrison, James L. Cooper, Peter Desberg, Farah Fisher, Jitsu Furusawa, Marjorie Holden, Antonia Issa-Lahera, Judith Jackson, Rita Lee, Suzanne Medina, Anthony Normore, Sean R. Morgan, Terry Richardson, Pamela Robinson, Karlton Skindrud, Judson H. Taylor, George Walker

Courses

GED 500. Research Methods in Education. (3 Units)

Examination of assumptions and techniques of educational research. Review of pertinent research studies emphasizing their applicability to educational problems. Statistical concepts, research methodology and computer applications are included.
Offered Fall, Spring

GED 501. Seminar in Learning and Development. (3 Units)

Theory, research and practice related to learning and development. Emphasis on biological and psychological factors in individual differences. Includes study of affective and cognitive development. Three hours of seminar per week.
Offered Fall, Spring

GED 503. Socio-Cultural Issues in Education. (3 Units)

Examines the total process of socialization and the effects of cultural determinants on human development and learning. Considers the school as an agent of socialization. Change agent role of school personnel is explored.

Offered Fall, Spring

GED 512. Values And Teaching. (3 Units)

Exploration of philosophical literature as it relates to values in education. Development of values from early childhood to adolescence. Exploration of personal values. Methods and procedures for teaching values in the classroom.

Offered Infrequent

GED 548. Effective College Teaching. (3 Units)

Study of research, theory, and practices associated with teaching and learning processes within the community college system. Topics include course planning and organization, student diversity, teaching and student retention, and instructional technology. Required Text: Tools for Teaching

Offered Infrequent

GED 549. The Community College. (2 Units)

An overview of the history, mission and function of the community college. Topics include this history of higher education, the role of the community college, student characteristics, curriculum, finance, governance, articulations and the California Master Plan. Required Text: The American Community College

Offered Infrequent

GED 550. Leadership in Higher Education. (3 Units)

Corequisite: GED 551 is recommended. Focuses on leadership theory, models, practices, governance, and management processes, leadership perspectives and theory applicable to higher education; addresses the complex social and political landscape and current and future trends of higher education.

Offered Fall

GED 551. Legal Issues in Higher Education. (3 Units)

Co-requisite: GED 550 is recommended. Addresses laws, policies, and legal issues pertaining to teaching, learning, and administrative environments in higher education and discusses ethical and legal principles applicable to their resolution; considers the policy issues which impact the application of law in higher education.

Offered All terms, Fall

GED 552. Higher Education Finance. (3 Units)

Prerequisites: GED 550 and GED 551 are recommended. Co-requisite: GED 553 is recommended. Examines current financial, economic, regulatory, and budget issues within higher education. Primary political, regulatory, economic and social influences on higher education, as well as revenue/expenditure streams, financial planning, analysis, and management are explored at national, state, and institutional levels.

Offered All terms, Spring

GED 553. Diversity and Inclusion in Higher Education. (3 Units)

Prerequisites: GED 550 and GED 551 are recommended. Corequisite: GED 552 is recommended. Explores issues of diversity, inclusion, equity, and social justice in higher education; focuses on theory, major concepts, and best practices as they inform policy, practice and leadership within higher education.

Offered All terms, Spring

GED 592. Education Coursework Synthesis. (3 Units)

Designed to assist the graduate student completing the M.A. in education to integrate previous course work and to research new material in preparation for the master's exam. For all options. May not be used as credit toward the M.A. CR/NC grading. Three hours of seminar per week. Offered Infrequent

GED 594. Independent Study. (1-3 Units)

Independent study undertaken under the supervision of a faculty member. Repeatable course.

Offered Fall, Spring

GED 595. Special Top.: (1-3 Units)

Topics vary by section and semester. See class schedule for title and prerequisites. Repeatable course. Three hours of seminar per week. Offered Infrequent

GED 599. Thesis. (1-6 Units)

Prerequisite: Consent of Advisor. The student will execute an individually planned research effort or a creative project. Students work under individual supervision with assigned faculty. May be repeated up to six units.

Offered Infrequent

GED 600. Grad Continuation Course. (1 Units)

Graduate students who have completed their course work but not their thesis, project, or comprehensive examination, or who have other requirements remaining for the completion their degree, may maintain continuous attendance by enrolling in this course. Signature of graduate program coordinator required.

Offered Fall, Spring, Summer

Administrative Services Credential

The School Leadership Program at CSU Dominguez Hills provides the two CTC-required pathways for Administrative Services Credentials in California. These pathways prepare educators for leadership positions in elementary and secondary schools, and certain district level positions. The School Leadership program is comprised of a two-tier credential structure.

1. The first tier, the **Preliminary Administrative Services Credential (PASC)**, is the first credential issued after an individual meets basic credential requirements. The PASC authorizes service in positions serving preschool, K-12, and adults. This is a one-year program.
2. The second tier, the **Clear Administrative Administrative Services Credential (CASC)**, is issued when all credential requirements have been completed. The CASC is for those holding a Preliminary Administrative Services Credential and employed in an administrative position. Candidates are expected to enroll a clear program for their Clear credential within one year of beginning service on their Preliminary Administrative Services Credential. The Administrative Services Clear Induction Program is a two-year program.

Preliminary Administrative Services Credential (26 units)

Admission Requirements

1. Five years of full-time teaching and/or service experience in a public or private school (i.e. five years' experience in pupil personnel services) or students with four years of full-time teaching and/or service experience in a public or private school must complete their fifth year of full-time teaching and/or service experience during the School Leadership Program.

2. A 3.0 grade point average in the last 60 units of college work, a score of 500 or better on the MAT or a score of 300 or better on the GRE, General Aptitude Test.
3. Possession of a valid California teaching credential, designated subjects teaching credential, or services credential. (See CTC Requirements ([https://www.ctc.ca.gov/credentials/leaflets/admin-services-credential-california-\(cl-574c\)/](https://www.ctc.ca.gov/credentials/leaflets/admin-services-credential-california-(cl-574c)/)) for more details)
4. Have passed the California Basic Education Skills Test (CBEST) or meet basic skills requirement.
5. Attendance at SLP Orientation and Summer Institute
6. Two letters of recommendations, one from the applicant's site supervisor.

Pre-Admission Disclosure for Academic Programs Leading to Licensure or Credentialing

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the **College of Education Dean's Office: COE 1490, (310) 243-3510.**

Clear Administrative Services Credential (14 units)

Admission Requirements

1. Possession of a valid California Preliminary Administrative Services Credential.
2. Verification of an Offer of Employment in a full or part-time administrative position in an employing agency as defined in Title 5 of the California Code of Regulations section 80054(g)(1).

Authorization

This credential authorizes the holder to serve as a superintendent, deputy superintendent, assistant superintendent, principal, assistant principal, supervisor, consultant, coordinator director, dean, instructional specialist, or in an equivalent or intermediate level administrative position.

The School Leadership Program at CSU Dominguez Hills provides the two CTC-required pathways for Administrative Services Credentials in California. Higher Education Administration and Leadership (HEAL), Graduate Certificate

The Graduate Certificate in Higher Education Administration and Leadership, a two academic semester program, includes four courses (12 units) that encompass four fundamental areas of higher education administration: leadership; law; finance; and diversity and inclusion. The four 3-unit each courses will be offered over a period of two semesters. The proposed sequence of course offerings will ensure logical progression of student learning and experience over the course of one year if they enroll in two courses per semester.

The Graduate Certificate in Higher Education Administration and Leadership commences each semester. Students may apply for the Graduate Certificate in Higher Education Administration and Leadership

program to start in either fall or spring semester, consistent with the university and College of Education deadlines and admission requirements for graduate certificate programs.

The proposed sequence of course offerings will ensure logical progression of student learning and experience over the course of one year if they enroll in two courses per semester.

The Graduate Certificate in Higher Education Administration and Leadership commences each semester. Students may apply for the Graduate Certificate in Higher Education Administration and Leadership program to start in either fall or spring semester, consistent with the university and College of Education deadlines and admission requirements for graduate certificate programs.

Requirements

Requirements and Application to the Program

The following items are required for the application to be reviewed for admission to the Graduate Certificate in Higher Education Administration and Leadership:

- Statement of purpose/interest (2 page maximum)
- Program application
- Professional resume
- Eligibility/transcripts: Applicants to the program must have a bachelor's degree from an accredited institution with a minimum 3.0 GPA
- Three professional recommendation letters
- Prior work experience within higher education institutions (2/4 year colleges and universities) and/or closely affiliated organizations.
- There are no other pre-requisites

Requirements for Continuous Enrollment in the Program

- Students must complete all required courses with a grade of "B" or higher.
- Students must complete all of the program/course requirements for the certificate within two years.
- Students must adhere to all ethical and professional standards required by the university and the American Associate of University Administrators. Candidates must, at all times, demonstrate high quality interpersonal skills with faculty, staff, fellow students, and others in their interactions and communication. If candidates fail to meet these requirements, they are subject to disqualification from the program.

Health Science

College of Health, Human Services, and Nursing
School of Public Health and Health Sciences

Our Mission

The School of Public Health and Health Sciences programs are designed to:

Strengthen students' intellectual capacities and abilities to develop and mobilize human and institutional resources and services to meet the health needs of diverse individuals and populations, as well as the communities in which they reside.

Educate students in developing and implementing evidence-based assessment and intervention models that improve the biopsychosocial health of diverse individuals and populations, as well as the communities in which they reside.

Prepare scholar-practitioners to engage in multidisciplinary scientific inquiry that advances the knowledge base of research and practice in the health disciplines.

Prepare graduates who will be leaders in their fields and professions to inform and influence professional dialogues on key health issues affecting diverse individuals and populations, as well as the communities in which they reside.

Prepare scholar-activists who – with global consciousness and ecosystemic perspectives – are committed to attaining health equity and collective well-being through the promotion of human development, universal human rights, and social justice.

Program Description

Health Science offers a variety of programs including a major with different options leading to the Bachelor of Science in Health Science.

The **Community Health Option** is designed to provide students with the necessary skills and perspectives to function as effective community health workers and educators in an urban population that is diverse ethnically, economically, and demographically. Students will gain knowledge and understanding of health behavior and strategies for change, health disparities among diverse populations, and the development of programs that increase access to healthcare and related services.

A student in this option will acquire oral and written communication skills needed to develop health education materials and gain a basic understanding of public health problems and methods commonly used in studying and addressing these problems. Registered nurses and allied health care workers will be able to serve their patients more effectively by becoming knowledgeable about community health service agencies and public health policy at all levels of government. Upon completion of the Community Health Option, students will qualify to take the national Certified Health Education Specialist (CHES) examination.

The **Healthcare Management Option** is designed to provide students with a general foundation in the principles and theories of management, the skills needed by frontline or middle-level supervisors in a health care unit, an understanding of the organizational structure of the health care system, the financing of health care services in the United States, and knowledge of current health policies at local, state and federal levels.

The **Radiologic Technology Option** is designed to accommodate the transfer student already certified in the profession. This is **not** an entry point into the profession. A radiographer who holds a current certification from the ARRT or is a licensed CRT in California is eligible to enter this option to earn a BS degree in Health Sciences.

Features

The Healthcare Management and Community Health options are designed for practicing health professionals and future community health and healthcare personnel. Students may also apply to Radiologic Technology. Since many students work during the day, many health science courses are offered in the late afternoon, evening, and on weekends, and many meet only once a week. To keep the health science programs contemporary, most of the health science courses are taught by practicing professionals.

The transfer program is designed for Certified/Registered Radiologic Technologists who wish to earn a BS degree. This program is not competitive but students must meet admission criteria.

Academic Advisement

All students are urged to consult with advisors throughout their matriculation at CSU Dominguez Hills. At the very least, advisors should be consulted for the following:

- Admission
- Career plans and choices
- Selection of options
- Variation in programs and/or "course substitution"
- Pre-registration advisement
- Filing for graduation

Advisement is available through the College of Health, Human Services, and Nursing Student Services Center at 1-310-243-2120 or 1-800-344-5484.

Preparation

Students interested in healthcare management or community health may complete their lower division general education, preferably with an associate of science degree, before coming to CSU Dominguez Hills.

Credit for Prior Health Education

If students have completed a clinical program for which they did not receive academic credit, they may be granted credit for that education. Please consult the health science office for details. The credits obtained for a clinical program may be applied as lower-division elective credits toward the Bachelor of Science degree in Health Science only.

Procedures and Admission Criteria

Only a limited number of students can be accommodated in the clinical options. In addition to filing a completed application to the university, students must also complete the desired option application form to be considered for admission. Admission to these clinical options is not automatically ensured by meeting academic requirements, nor does

admission to CSU Dominguez Hills as a Health Science Major guarantee acceptance into individual clinical options.

Graduation with Honors in the Major

An undergraduate student may be a candidate for graduation with honors in Health Science provided s/he meet the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of at least 3.5 in courses used to satisfy the upper division requirements in the major.

Students who achieve honors in Health Science will have the information recorded on their transcripts and diplomas.

Radiologic Technology Option

The Radiologic Technology option is for a post-certification option for Certified Radiologic Technologists (CRTs) who wish to continue their education and earn a bachelor's degree in Health Science.

Post-Certification Option: To be eligible for the post-certification option, an applicant must meet the following minimum requirements:

1. Either be a Certified Radiologic Technologist (CRT) or registered by the American Registry of Radiologic Technologists (R.T.).
2. Completion of all lower division required courses. A grade of "C" or better in each course is required. The completion of 56-70 units of lower-division coursework is highly recommended before application to the program.
3. Applicants must submit an application, with supporting documents, to CSU Dominguez Hills.
4. Admission to this option is **not** competitive as long as the above requirements have been met.

Please note that BS Health Science– Radiologic Technology Option is not currently accepting new students. The post-certification option is currently being structured and will be offered in the near future.

Orthotics and Prosthetics Option

Submit the application directly to the National Commission for Orthotics and Prosthetics Common Application System:

1. M.S. in Health Science, Orthotics and Prosthetics Program
Application is available at <http://portal.opcas.org> (<http://portal.opcas.org/>). (Common Application System) Applications to the program are accepted one time each year. Students planning to seek admission should submit both applications including all supporting materials no later than December 31 preceding a summer semester admission to the program. The application deadline may be extended to accommodate enrollment;
2. Record of experience in an Orthotic and Prosthetic facility (recommended at least 40 hours)
3. a copy of official transcripts;
4. GRE Test scores (optional);;
5. a statement of interest;
6. three letters of recommendation must be submitted directly to the Common Application System.
7. A subsequent interview by a panel consisting of orthotics and prosthetics faculty.

8. Upon admittance, to the program applicants must submit a complete graduate admission application to the University at calstate.edu/ (<http://calstate.edu/apply/>) apply (<http://calstate.edu/apply/>).
Please note: Application deadlines are subject to change without notice. Check with the O&P Program for the deadlines of the current application cycle.

Undergraduate Programs

Bachelor

Minor

- Health Science, Minor (p. 591)

Graduate Programs

Master

- Health Science, Master of Science (p. 588)

Faculty

Matt G Mutchler, Department Chair

Health Science Faculty: Karla Castillo, Kristen Emory, Matt G Mutchler, Archana Sharma, Elwin Tilson, Abel Whittimore, Tony Jehi, Parichart Sabado

Program Office: SBS C-321, (310) 243-2698

Mark Muller, Program Coordinator, Orthotics, and Prosthetics Program
O&P Faculty: Ava Herbrick, Mark Cromer, Jen Lucarevic

O&P Program location: 10641 Calle Lee, Suite 185, Los Alamitos, CA 90720

Student Success Center Main Office - Advising: Welch Hall A210, (310) 243-2120, Email: chhsnadvising@csudh.edu; Mark Kerr - Advisor mkerr@csudh.edu, (310) 243-3423

Emeriti Faculty

Amer El-Ahraf, Ellen Hope-Kearns, Chi-Hua Hsiung, Pamela C. Krochalk

Courses

HEA 100. Health & Lifestyles. (3 Units)

To familiarize the student with relationships among the physical, social and psychological aspects of health, which include: self-care, prevention and analysis of personal health problems through participation in self-assessment techniques. Topics include the relationship of lifestyles to nutrition, stress, physical fitness, death and dying, and mental illness. Offered Fall, Spring, All terms

HEA 104. Food, Health and Environment. (3 Units)

Explores the links among food, the environment and health. Contributions of social trends and government policies to the current state of health, disease and environmental impact of food systems will be examined. Offered Fall, Spring

HEA 195. Special Topics Health Science. (1-3 Units)

Study of special interest for students in the selected area of study. Topic and content will vary as announced. Offered Infrequent

HEA 201. Healthcare Systems and Perspectives. (3 Units)

Examination of healthcare delivery systems and personal health as integrated physiological, social, psychological processes. Topics include role of healthcare providers; major healthcare organizations; contemporary healthcare issues; interactions of healthcare and physical environmental changes which influence health of the whole person. Offered Fall, Spring

HEA 280. Orientation and Elementary Radiation Protection. (1 Units)

Prerequisite: Admission to the Radiologic Technology Option. Orientation to applied medicine, hospitals and radiology departments. Introduces students to overall view of radiology and ethical principles. Basic radiation protection instruction to allow students to begin the clinical practicum. Offered Fall

HEA 281. Medical Terminology: Radiology. (1 Units)

Prerequisite: Admission to the Radiologic Technology Option. Programmed approach to general medical terminology with emphasis on radiology and applied specialties. Review of common medical terms, prefixes, suffixes and roots. Offered Fall

HEA 287. Clinical Practicum I. (1 Units)

Prerequisite: Admission to the Radiologic Technology Option. Supervised Clinical rotations through support areas of radiology department: filerooms, darkrooms, patient transport and scheduling. Introduction to hospital environment and health care team. Film critiques. Practicum 280 hours. Offered Fall

HEA 300. Health in Public Education. (3 Units)

Prerequisite: HEA 100 or equivalent is recommended. Health education required course for the professional multiple or single-subject, clear credential teaching applicants. Covers all topics designated in the Health Framework for California, including personal health, family health, nutrition, the physiological and sociological effects of substance abuse, cardiopulmonary resuscitation and child abuse. Offered Fall, Spring

HEA 309. Mapping Public Health. (3 Units)

Introduction to Geographic Information Systems using ArcGIS Online for Healthcare Professionals. The course allows students to interpret geographic patterns/address public health problems for policy planning. Basic concepts include population demographics, health services, analyzing environmental factors, data interpretation, and data analysis. Offered Fall, Spring

HEA 312. Intro To Public Health. (3 Units)

Prerequisite: HEA 201 or concurrent enrollment is required. Nature, transmission, and control of disease from a public health perspective: Historical background, current problems, trends in prevention and control, and applications to health care planning. Students must demonstrate proficiency in the English language by successfully completing oral and written assignments. Offered Fall, Spring

HEA 313. Introduction to Biostatistics. (3 Units)

Prerequisite: HEA 201 (or concurrent enrollment) and MAT 131/132 are required. Introduction to the basic concepts of biostatistics and their application and interpretation. Topics include descriptive statistics, graphics, diagnostic tests, probability distributions, inference, tests of significance, association, linear and logistic regression, and life tables. Offered Fall

HEA 314. Health Behavior. (3 Units)

Prerequisite: HEA 201 (or concurrent enrollment) is required. Current concepts of the behavioral sciences in the health field with specific application to ethnically and culturally diverse urban communities. Students must demonstrate proficiency in the English language by successfully completing oral and written assignments. Offered Fall, Spring

HEA 315. Interpersonal Skills in Health Communication. (3 Units)

Prerequisite: HEA 201 (or concurrent enrollment) is required. Fundamentals, principles, and skills of interpersonal and group processes in health related occupations. Special emphasis on theory and techniques of interviewing, small group dynamics, crisis intervention and interpersonal management skills in ethnically and culturally diverse urban settings. Students must demonstrate proficiency in the English language by successfully completing oral and written assignments. Offered Fall, Spring

HEA 316. Introduction to Epidemiology. (3 Units)

Principles of epidemiology are introduced in the context of interpreting studies of health in human populations within their socio-cultural setting and diverse environments. Concepts addressing the design, implementation, analysis and interpretation of epidemiological studies are covered. Offered All terms, Spring

HEA 318. Health Services Management. (3 Units)

Prerequisite: HEA 201 is required. Concepts, issues, and skills in administration and management of a health care unit, including personnel, finances, equipment, supplies, and facilities. Students must demonstrate proficiency in the English language by successfully completing oral and written assignments. Offered Fall, Spring

HEA 319. Leadership in Healthcare. (3 Units)

Prerequisite: HEA 201 is required. Focuses on leadership theory and its application to the healthcare setting. Leadership concepts include traits, situations, communication, power, vision, integrity, emotional intelligence, and courage. Provides an understanding of theory and research, as well as skills and self insight to become effective leaders. Offered Spring

HEA 320. Contemporary Health and Disease. (3 Units)

Prerequisites: HEA 201 and BIO 102 are required. Through the natural and social sciences, addresses infectious and non-infectious diseases across the lifespan, their causative factors, disease occurrence patterns, risk factors, symptoms, prevention, control, and treatment methods as well as educational implications for achieving optimal community health. Offered Spring

HEA 371. Radiologic Technology Legal Perspectives Review. (1 Units)

Prerequisite: Admission to Radiologic Technology Option - CRT. Explores the foundations of the radiologic technology profession from legal perspective and coordinates study of current issues, theories and techniques related to health care delivery; principles of dark room technology and radiation protection, and medical terminology. Offered Fall, Spring

HEA 372. Radiologic Technology History, Philosophy, Review. (1 Units)

Prerequisite: Admission to Radiologic Technology Option - CRT. Explores the foundations of the radiologic technology profession from historical and philosophical perspectives and coordinates study of current issues, theories and techniques related to concepts and practice of fundamental patient care, radiologic exposure and routine radiologic procedures. Offered Fall, Spring

HEA 373. Radiologic Technology Ethical Perspectives and Professional Review. (1 Units)

Prerequisite: Admission to Radiologic Technology Option - CRT. Explores the foundations of the radiologic technology profession from an ethical perspective and coordinates study of current issues, theories and techniques related to radiographic procedures using contrast media, topographic anatomy and positioning, and routine fluoroscopic procedures.

Offered Fall, Spring

HEA 374. Radiologic Technology Political and Social Perspectives and Professional Review. (1 Units)

Prerequisite: Admission to Radiologic Technology Option - CRT. Explores the foundations of the radiologic technology profession from a political and social perspective and coordinates study of current issues, theories and techniques related to radiation protection and federal and state regulations, radiologic physics, topographic anatomy and positioning, and routine exams in pediatrics, surgery and genitourinary room.

Offered Fall, Spring

HEA 375. Radiologic Technology Future Perspectives and Professional Review. (1 Units)

Prerequisite: Admission to Radiologic Technology Option - CRT. Explores the future of the radiologic technology profession from a technological, as well as professional perspective and coordinates study of current issues, theories and techniques related to special radiologic procedures, sub-specialties, and departmental and administrative procedures, and senior research topics.

Offered Fall, Spring

HEA 380. Darkroom Chemistry and Techniques. (1 Units)

Prerequisite: Admission to the Radiologic Technology Option. Darkroom construction, hand and automatic processing, film artifacts, processing aspects, and prevention. Quality control and darkroom chemistry.

Offered Fall

HEA 381. Patient Care Procedures Related to Radiology. (2 Units)

Prerequisite: Admission to the Radiologic Technology Option. Introduction to fundamental patient care procedures and principles in radiology departments: patient care/handling, body mechanics, aseptic technique, emergency procedures and use/care support equipment in preparation for patient contact.

Offered Fall

HEA 382. Principles of Radiographic Exposure. (3 Units)

Prerequisite: Admission to the Radiologic Technology Option. Basic radiographic principles: image formation, intensifying screens, factors affecting quality, calibration, equipment design/function, filters, electromagnetic radiation and exposure factors. Teaches mechanics of performing examinations.

Offered Fall

HEA 383. Common Radiographic Procedures Using Contrast Media. (2 Units)

Prerequisite: Admission to the Radiologic Technology Option. Positioning and exposure techniques for contrast studies (esophograms, barium enemas, etc.) fluoroscopic techniques. Introduction to the uses, contraindications, and pharmacology of contrast media.

Offered Spring

HEA 384. Topogr Anatomy & Position I. (3 Units)

Prerequisite: Admission to the Radiologic Technology Option. Introduces topographic anatomy and positioning procedures necessary to produce diagnostic radiographs of the entire body (except the skull). Exposure control techniques and exam indications.

Offered Spring

HEA 385. Radiation Protection. (3 Units)

Prerequisite: Admission to the Radiologic Technology Option. Principles of radiation safety, biological effects, x-ray production, and radiation detection devices. Emphasis on federal and state regulations.

Offered Fall

HEA 387. Clinical Practicum II. (3 Units)

Prerequisite: Admission to the Radiologic Technology Option. Supervised rotations through routine diagnostic rooms. Perform radiologic examinations on patients under direct supervision of a technologist. These will include x-rays and film critiques of the thoracic and appendicular skeleton. Rotation through emergency rooms, orthopedics, and portable radiography. Practicum 580 hours.

Offered Fall

HEA 388. Clinical Practicum III. (3 Units)

Prerequisite: Admission to the Radiologic Technology Option. Supervised rotation through routine radiographic/fluoroscopic rooms, including surgery. Perform routine diagnostic examinations (except skull), fluoroscopic and intra-operative exams. Weekend rotations begin. Film critiques. Practicum 580 hours.

Offered Spring

HEA 395. Special Topics in Health Science. (1-3 Units)

Prerequisite: Consent of instructor. Study of a topic of interest to students pursuing a career in the health professions. Topic will vary as announced. One to three hours of lecture per week.

Offered Fall, Spring

HEA 410L. Coding Procedures I Lab. (0 Units)

Offered Infrequent

HEA 411L. Coding Procedures II Lab. (0 Units)

Offered Infrequent

HEA 412L. Alternative Hlth Record Sys. (0 Units)

Offered Infrequent

HEA 413L. Computerized Hlth Info Systems. (0 Units)

Offered Infrequent

HEA 414L. Hlth Info Dept Mgmt. (0 Units)

Offered Infrequent

HEA 435. Orthotics Soft Goods Fitters Course. (1 Units)

Prerequisites: BIO 250 and BIO 251 are required. Comprehensive study of short-term, custom-fitted orthoses for the management of the spine, upper and lower limbs. It includes evaluation, assessment, treatment plan formulation, implementation of the plan and follow-up. Fittings of selected orthoses are included.

Offered As needed

HEA 445. Material Science and Laboratory Skills. (2 Units)

Prerequisites: BIO 250 and BIO 251 are required. Study of various chemical and physical properties of materials and the relationship and implications of those properties in orthotic-prosthetic design and fabrication. Development of specific laboratory competencies on O & P tools, techniques, and materials.

Offered As needed

HEA 455. Applied Anatomy. (1 Units)

Prerequisites: BIO 250 and BIO 251 are required. A focused course in human anatomy that uses a combined regional and systemic approach to examine the relationships and organization of the major structures within the body as they relate to Orthotic and Prosthetic application and design.

Offered As needed

HEA 460. Comm Health Agencies. (3 Units)

Prerequisite: HEA 201 is required. Examination and evaluation of state, federal, local and community health agencies and programs. Survey and analyze community level drug, alcohol, communicable disease, and mental health problems and programs. Students must demonstrate proficiency in the English language by successfully completing oral and written assignments.

Offered Fall

HEA 461. Community Health Needs Assessment and Program Planning. (3 Units)

Prerequisites: HEA 314, HEA 316, HEA 462, and HEA 479 are required. Examination of approaches for conducting community health needs assessments and planning of health intervention programs.

Offered Spring

HEA 462. Methods in Community Health Education. (3 Units)

Prerequisite: HEA 201 is required. Introduces principles and theories of learner-centered education to promote community health. Includes assessment of learning environment; development of curriculum and teaching plans; teaching/learning strategies, methodologies, resources; selection of aids and materials; evaluation of effectiveness. Students will plan and present lessons.

Offered Spring

HEA 463. Health Program Implementation and Evaluation. (3 Units)

Prerequisite: HEA 461 is required. Focuses on strategic approaches to implementation of community health promotion and disease prevention programs and evaluation of program processes and outcomes.

Offered Spring

HEA 464. Health Educator as Community Resource and Advocate. (3 Units)

Prerequisite: HEA 201 is required. Emphasizes role of community organizing in engaging diverse communities to advance conditions in which people can be healthy. Examines role of health educators, grassroot activists, and others in stimulating social, political, and economic approaches to promote community health.

Offered Spring

HEA 465. Introduction to Global Health. (3 Units)

Prerequisite: HEA 201 is required. Introduces approaches used by various countries in solving their health and medical care problems, and the role of major international health organizations. Analyzes some of the current important issues in international health.

Offered Spring

HEA 466. Environmental Health Problems. (3 Units)

Prerequisite: HEA 201 is required. Impact of human activities on environmental quality and resulting environmental health problems, especially local issues, public and private responses to them. Design, carry out, and analyze a study and prepare a written report of results. Students must demonstrate proficiency in the English language by successfully completing oral and written assignments.

Offered Fall

HEA 467. Health Policy Issues and Analysis. (3 Units)

Prerequisite: HEA 201 is required. Examination of the major current health policy issues in the U.S. with emphasis on the application of conceptual and procedural policy analysis tools useful for defining policy problems, assessing alternative solutions, and examining effects of health policies.

Offered Fall

HEA 468. Multicultural Health. (3 Units)

Prerequisite: SOC 101 and ANT 101 are recommended. Study of social, cultural, psychological, and biological factors affecting the distribution of health, wellness, and illness in various ethnic, cultural, and racial groups. Special attention is given to health issues of groups with special physical and mental health needs, including underserved and immigrant populations residing in California.

Offered Fall, Spring

HEA 469. Management Sciences in Healthcare Organizations. (3 Units)

Prerequisites: ECO 210, HEA 313 and HEA 318 are required. Drawing on economics, statistics, operations research, decision analysis, systems analysis, and operations management, provides an introduction to selected quantitative techniques and analytical tools applicable to improvement of management problem solving and processes, and the organizational delivery of health services.

Offered Fall, Spring

HEA 470. Legal Issues in the Health Sciences. (3 Units)

Examination of new legislation, exploration of various health law issues that impact hospitals, individuals and groups within the health care sector; including informed consent, regulation/antitrust, licensure and credentialing, and medical ethics. Students must demonstrate proficiency in the English language by successfully completing oral and written assignments.

Offered Spring

HEA 471. Law, Ethics and Social Values in Healthcare. (3 Units)

Prerequisite: HEA 201 is required. Overview of legal and ethical issues faced by society, healthcare consumers, providers, and administrators within the context of social values. Introduction to legal and ethical decision-making at the governmental, institutional, and practitioner levels.

Offered Fall, Spring

HEA 472. Survey of Healthcare Finance. (3 Units)

Prerequisites: HEA 201, ACC 230 and ECO 210 are required. Concepts and issues in financial management of healthcare organizations. Use of tools for cost effective decision-making and learn to recognize and deal with financial components of decision-making in healthcare organizations. Students must demonstrate proficiency in the English language by successfully completing oral and written assignments.

Offered Fall

HEA 474. Health Care Ethics. (3 Units)

Prerequisites: HSC 201; HEA 470 and HEA 472 are recommended. Intensive study of ethical issues raised in provision of health care and health care administration. Current and historical arguments surrounding ethical issues will be discussed and analyzed. Students will learn to recognize ethical dilemmas, apply ethical principles and resolve the dilemmas.

Offered Infrequent

HEA 475. Human Resources Management in Healthcare. (3 Units)

Emphasis on key concepts of human resources management, identifying importance of human resources in healthcare organizations, establishing need for relating strategic planning of organizations to their human resource planning, and on examining role of organizational culture in behavior and productivity.

Offered Spring

HEA 476. Managing Health Information Systems. (3 Units)

Prerequisites: HEA 201 and HEA 318 are required. Conceptual and practical aspects in the analysis, development, and utilization of health information technology and systems having clinical and business applications with the focus being on improving organizational performance.

Offered Spring

HEA 477. Long-Term Care Administration. (3 Units)

Prerequisite: HEA 201 is required. History, development, trends; major policy issues; organization of systems; principles and techniques of administration, including managing the environment of care and client/resident care services; management of institutional and community-based programs.

Offered Spring

HEA 478. Strategic Management in Health Care. (3 Units)

Prerequisites: HEA 318 and HEA 472 are required. Methods for strategic planning and marketing of health services organizations. Techniques for determining strategies for unique services, integration of strategy, structure, and administrative systems.

Offered Spring

HEA 479. Research Methods in Health Sciences. (3 Units)

Prerequisite: HEA 313 is required. Overview of research methods in health sciences, including study design, sampling, data collection and analysis, statistical techniques, and report writing. Application of research methods to development of research proposal. Critical analysis of literature. Examination of relevance of data to decision making.

Offered Fall, Spring

HEA 480. Radiological Physics. (2 Units)

Prerequisite: Admission to the Radiologic Technology Option. Emphasis of health and safety on electric circuits, generators, x-ray circuits, x-ray physics.

Offered Fall, Spring

HEA 481. Topographic Anatomy and Positioning II. (3 Units)

Prerequisite: Admission to the Radiologic Technology Option. Introduces topographic anatomy and positioning procedures necessary to produce diagnostic radiographs of the skull. Exposure control techniques and exam indications included.

Offered Fall

HEA 482. Special Radiographic Procedures. (2 Units)

Prerequisite: Admission to the Radiologic Technology Option or consent of instructor. Radiographic anatomy and physiology, positioning, film evaluation and specialized equipment applying to highly technical exams (interventional radiography, tomography, CT and MRI). Management of acutely ill patients. Fee required.

Offered Spring

HEA 483. Sub-Specialties in Radiology. (2 Units)

Prerequisite: Admission to the Radiologic Technology Option. Introduction to principles of pediatric radiography, intraoral radiography, radiation therapy and nuclear medicine. Image formation, equipment, techniques and handling of radiation and radionucleotides.

Offered Spring

HEA 485. Departmental Administrative and Office Procedures, Computer Literacy. (1 Units)

Prerequisite: Admission to the Radiologic Technology Option. Introduction to organization and budgeting of a radiology department; use of computers in radiology and basic computer principles.

Offered Spring

HEA 487. Clinical Practicum IV. (1 Units)

Prerequisite: Admission to the Radiologic Technology Option. Supervised rotations through routine radiographic/fluoroscopic, pediatric, surgical and genitourinary rooms. Performs routine exams and film critiques (except skull) in all areas. Practicum 280 hours.

Offered Fall

HEA 488. Clinical Practicum V. (3 Units)

Prerequisite: Admission to the Radiologic Technology Option. Supervised rotations through all areas of routine radiography, with student performing all routine diagnostic fluoroscopic and radiographic exams and film critiques, including skull radiography. Student will be able to perform radiologic procedures independently. Practicum 580 hours.

Offered Fall

HEA 489. Clinical Practicum VI. (3 Units)

Prerequisite: Admission to the Radiologic Technology Option. Supervised rotations through special radiographic procedures, radiation therapy, magnetic resonance imaging, nuclear medicine, mammography and ultrasound. Continued application in routine radiography, fluoroscopy and film critique. Perform radiologic procedures independently. Practicum 580 hours.

Offered Spring

HEA 490. Health Science Senior Seminar. (1-3 Units)

Prerequisites: Senior standing and HEA 479 are required of all majors. For Community Health Option: HEA 461, HEA 463 and HEA 468 are required. For Health Care Management Option: HEA 467 and HEA 478 are required. Undertake in-depth study employing concepts and principles learned in Health Science core and options. Must demonstrate analytic thinking skills and ability to synthesize disparate area knowledge in the development of an original research project. Proficiency in written and oral English language required.

Offered Fall, Spring

HEA 491. Res Sem Orth/Prosth I. (1 Units)

Prerequisites: HEA 440 and HEA 450. Background literature review, hypothesis formation, study design, development of data collection instruments and data collection as phase one of orthotic/prosthetic research project. Students must demonstrate proficiency in the English language by successfully completing oral and written assignments. One hour of seminar per week. Fee required.

Offered Fall, Spring

HEA 492. Research & Seminar in O&P. (2 Units)

Prerequisite: MAT 131, or consent of instructor. Overview of the principles and applications of research. Examination of testing and improving patient outcomes. Basic concepts in research design, including literature review, identification of research question, development of data collection instruments, data analysis. Write and present a research proposal.

Offered Fall, Spring

HEA 493S. Preceptorship in O&P. (3 Units)

Prerequisite: Consent of instructor. 125 hour placement in a private sector or institutional facility. Repeatable for credit up to 8 units. Fee required.

Offered Fall, Spring

HEA 494. Independent Study in Health Science. (1-3 Units)

Prerequisite: Consent of instructor. In-depth study of a health sciences topic under the supervision of a health sciences instructor. Requires independent study contract to be completed before enrollment.

Repeatable course.

Offered All terms, Fall, Spring

HEA 495. Spec Topics in Health Sciences. (1-3 Units)

Prerequisites: HEA 201; Consent of instructor. Intensive study of a Health Sciences topic of special interest to students pursuing a career in the health professions. Topic will vary as announced. One to three hours of lecture per week.

Offered All terms, Fall, Spring

HEA 496. Internship in Health Sciences. (1-6 Units)

Must be Health Science major; must be a senior; must be accepted in the internship program; consent of instructor required. Corequisite: HEA 497. Students will be directed to health care facilities to serve as interns. Regular meetings are scheduled with a faculty internship supervisor to assess student progress. Up to forty hours per week.

Offered Fall, Spring

HEA 497. Internship Seminar. (1 Units)

Corequisite: HEA 496 is required. Consent of instructor is required. Students discuss and conduct in-depth analysis of their personal and professional growth and problem-solving skills in relation to their internship experiences.

Offered Fall, Spring

HEA 498. Dir. Research in Hlth. Sci.. (1-3 Units)

Prerequisites: HEA 201 and consent of instructor. Advanced topics and research on specific subjects in Health Sciences. Topics of research to be approved and directed by an instructor.

Offered Fall, Spring

HEA 499. Senior Project Radiology. (1 Units)

Prerequisite: Admission to the Radiologic Technology Option. Individual research in radiology with student class presentation: learn presentation skills, use of A-V methods, oral skills, and written presentation. Students must demonstrate proficiency in the English language by successfully completing oral and written assignments. One hour of seminar activity per week. Repeatable for credit for up to one unit.

Offered Fall, Spring

HEA 508. Clinical Pathology for Orthotics and Prosthetics. (3 Units)

Prerequisites: HEA 455 or consent of instructor. Examination of the etiology, clinical signs and symptoms, treatment, prognosis and social implications of pathological conditions associated with numerous diseases and traumatic injuries that require orthotic and/or prosthetic intervention. Includes introductory Neuroscience and neural disorders encountered in practice.

Offered Fall

HEA 516. Clinical Evaluation Tools in Orthotics and Prosthetics. (2 Units)

Prerequisite: HEA 455 or consent of instructor is required. Examines the variety of standardized clinical assessment tools to be appropriately used in concert with the clinical examination, as well as evidence from literature, to determine the need for orthotic-prosthetic services and design optimal intervention strategies.

Offered Fall

HEA 535. Practice Management for Orthotics and Prosthetics. (1 Units)

Prerequisite: HSC 500 is required. Addresses general business practice within orthotic-prosthetic practice, including its role in clinical decision making, documentation, time management and compliance with regulatory agencies, reimbursement and human resource management.

Offered Summer

HEA 536. Psychological Aspects of Disability. (1 Units)

Prerequisite: HSC 500 is required. Application of psychological concepts to illness and disability. Awareness of social supports and constraints, activities across the lifespan, and integration of these factors into clinical practice. Strategies for dealing with patients in distress, and symptoms requiring referral to other professionals.

Offered Summer

HEA 540. Orthotic Management of the Upper Limb. (3 Units)

Prerequisites: HEA 508, HEA 516 and HEA 545 are required. Comprehensive study of short-and long-term upper limb orthotic management. Includes evaluation; assessment; treatment plan formulation; implementation and follow-up. Fabrication and fitting of: finger, hand, wrist, forearm, elbow, humeral and shoulder orthoses.

Offered Spring

HEA 541. Orthotic Management of the Lower Limb I. (4 Units)

Prerequisites: HEA 508, HEA 516 and HEA 545 are required. Comprehensive study of lower limb orthotic management distal to the knee. Includes evaluation and assessment; treatment plan formulation, follow-up and patient education; biomechanics; gait analysis and motor disability. Fabrication and fitting of foot and ankle-foot orthoses.

Offered Spring

HEA 542. Orthotic Management of the Lower Limb II. (5 Units)

Prerequisite: HEA 541 is required. Comprehensive study of lower limb orthotic patient management proximal to the knee. Includes evaluation and assessment; treatment plan formulation, follow-up and patient education; as well as biomechanics, gait analysis and motor disability. Fabrication and fitting of selected orthoses.

Offered Fall

HEA 544. Orthotic Management of the Spine. (4 Units)

Prerequisites: HEA 508, HEA 516 and HEA 545 are required. Comprehensive study of spinal orthotic management. Includes evaluation, assessment, treatment plan formulation, implementation of the plan, and follow-up. Fabrication and fitting of selected orthoses is included. Also, presentation of Wheelchair Seating and Cranial Remolding Helmets.

Offered Fall

HEA 545. Normal Gait and Biomechanics of Movement. (2 Units)

Prerequisites: HEA 455 or consent of instructor. Primary areas of study will include applied anatomy, anthropometry, kinematics, and kinetics, normal human locomotion, force vectors, observational and instrumented gait analysis.

Offered Fall

HEA 547. Gait Analysis and Pathomechanics for O & P. (1 Units)

Prerequisite: HEA 545 or consent of instructor. Examination and assessment of how and why an individual's gait deviates from normal human locomotion when they are utilizing an orthotic or prosthetic device designed for application distal to the knee.

Offered Fall

HEA 551. Prosthetic Management of the Upper Limb. (3 Units)

Prerequisites: HEA 508, HEA 516 and HEA 545 are required. Comprehensive study of upper limb prosthetic management, including transradial, transhumeral, partial hand, elbow and shoulder disarticulation amputations. Includes evaluation; assessment; treatment plan formulation, implementation and follow-up to promote positive outcomes using evidence-based practice.

Offered Spring

HEA 552. Prosthetic Management of the Lower Limb I. (4 Units)

Prerequisites: HEA 508, HEA 516, and HEA 545 are required. Management of amputations distal to the knee, including Transtibial, Symes and Partial Foot. Patient assessment, formulation of treatment plans, and implementation through measurement, casting, fabrication, and fitting of patients. Pathologies, surgical procedures, components, biomechanics, gait and outcome measures.

Offered Spring

HEA 554. Prosthetic Management of the Lower Limb II. (5 Units)

Prerequisite: HEA 552 is required. Management of amputations proximal to the knee, including Knee Disarticulation, Trans Femoral and Hip Disarticulation. Includes all aspects of patient assessment, formulation of treatment plans, and implementation through measurement, casting, fabrication and fitting to promote positive outcomes.

Offered Spring

HEA 580. Applied Technologies in Orthotics and Prosthetics. (1 Units)

Prerequisite: HSC 500 is required. Integration of non-traditional techniques in the measurement, fabrication, and delivery of devices in contemporary O & P practice. This includes knowledge of computer aided design, electrical circuitry, and biomechanical and biomedical engineering concepts.

Offered Summer

HEA 592. Subspecialties in Orthotics and Prosthetics. (2 Units)

Prerequisites: HEA 541, HEA 542, HEA 551 and HEA 552 are required, or consent of instructor. Student driven course in areas of advanced skills, infrequently used devices, or unique goals in O & P. Lecture and demonstration with pediatric, geriatric, recreational and special use clients. Development of evaluation, assessment, and treatment plans through case studies and live interaction.

Offered As needed

HEA 593. Culminating Activity in Orthotics and Prosthetics. (3 Units)

Prerequisites: Advancement to Candidacy MS in Health Science: Orthotics and Prosthetics Option requires a portfolio as the culminating experience. The portfolio is an accumulation of a direct research paper, practical exams, written and written simulation exams, oral exams, gait analysis and clinical patient scenarios.

Offered As needed

HEA 596. Clinical Practicum in Orthotics and Prosthetics. (1-4 Units)

Prerequisites: HEA 508 and HEA 516 are required. Fieldwork and in-depth study of discipline related topics under the direction of Division of Health Sciences faculty member. Repeatable for credit for a maximum of eleven (11) units.

Offered Fall, Spring, Summer

Health Science, Bachelor of Science Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major, no minor required

Major Requirements, Community Health and Health Care Management Options (66 - 70 units)

The following courses, or their approved transfer equivalents, are required of all candidates for the degree focusing on the Community Health or Health Care Management option.

A major in Health Science in one of these two options consists of lower division required core courses, upper division required core courses and lower and upper division courses corresponding to the option. The core courses are common to both of the options. The lower and upper division option courses vary with option chosen.

Common Core Requirements

| Code | Title | Hours |
|--|--|--------------|
| Lower Division Required Courses | | |
| HEA 201 | Healthcare Systems and Perspectives ¹ | 3 |
| MAT 131 | Elementary Statistics and Probability ¹ | 3-4 |
| or MAT 132 | Statistics and Probability with Support | |
| Upper Division Required Courses | | |
| HEA 312 | Intro To Public Health | 3 |
| HEA 313 | Introduction to Biostatistics | 3 |
| HEA 315 | Interpersonal Skills in Health Communication | 3 |
| HEA 466 | Environmental Health Problems | 3 |
| HEA 467 | Health Policy Issues and Analysis | 3 |
| HEA 468 | Multicultural Health ² | 3 |
| HEA 471 | Law, Ethics and Social Values in Healthcare | 3 |
| HEA 479 | Research Methods in Health Sciences | 3 |
| HEA 490 | Health Science Senior Seminar | 1-3 |
| HEA 496 | Internship in Health Sciences ³ | 1-6 |
| HEA 497 | Internship Seminar ³ | 1 |
| Total Hours | | 33-41 |

¹ Students are advised to take MAT 131 Elementary Statistics and Probability or MAT 132 Statistics and Probability with Support and HEA 201 Healthcare Systems and Perspectives to meet General Education requirements and the Health Science lower division requirement.

² Fulfills General Education Area D3: Integrative Studies in Social Science.

³ Must be taken concurrently.

In addition to the common core requirements, all health science majors must choose one of the following options:

Community Health Option (30-33 units)

| Code | Title | Hours |
|--|--|--------------|
| Lower Division Required Courses | | |
| BIO 102 | General Biology ¹ | 3 |
| Upper Division Required Courses | | |
| HEA 314 | Health Behavior | 3 |
| HEA 316 | Introduction to Epidemiology | 3 |
| HEA 320 | Contemporary Health and Disease | 3 |
| HEA 461 | Community Health Needs Assessment and Program Planning | 3 |
| HEA 462 | Methods in Community Health Education | 3 |
| HEA 463 | Health Program Implementation and Evaluation | 3 |
| HEA 464 | Health Educator as Community Resource and Advocate | 3 |
| Electives | | |
| Select six to nine units from the following: | | 6-9 |
| HEA 300 | Health in Public Education | |
| HEA 319 | Leadership in Healthcare | |
| HEA 465 | Introduction to Global Health | |
| HEA 477 | Long-Term Care Administration | |
| HEA 495 | Spec Topics in Health Sciences | |
| Total Hours | | 30-33 |

¹ Students are advised to take BIO 102 General Biology to meet General Education requirement in Natural Science and the Health Science lower division requirement.

Health Care Management Option (30-33 units)

| Code | Title | Hours |
|---|---|--------------|
| Lower Division Required Courses | | |
| ACC 230 | Financial Accounting | 3 |
| ECO 210 | Economic Theory 1A Micro ¹ | 3 |
| Upper Division Required Courses | | |
| HEA 318 | Health Services Management | 3 |
| HEA 319 | Leadership in Healthcare | 3 |
| HEA 469 | Management Sciences in Healthcare Organizations | 3 |
| HEA 472 | Survey of Healthcare Finance | 3 |
| HEA 476 | Managing Health Information Systems | 3 |
| HEA 477 | Long-Term Care Administration | 3 |
| HEA 478 | Strategic Management in Health Care | 3 |
| Electives | | |
| Select three to six units from the following: | | 3-6 |
| HEA 316 | Introduction to Epidemiology | |
| HEA 320 | Contemporary Health and Disease | |
| HEA 455 | Applied Anatomy | |
| HEA 495 | Spec Topics in Health Sciences | |
| Total Hours | | 30-33 |

¹ Meets General Education Requirement Area D1.

Major Requirements, Radiologic Technology Option (51 units)

Please note that BS Health Science: Radiologic Technology Option is not currently accepting new students. The option is currently being restructured into a post licensure degree which will be offered in the near future.

The following courses, or their approved transfer equivalents, are required of all candidates for the degree focusing on Radiologic Technology Option.

A Major in Health Science consists of lower division required courses, upper division core courses and lower and upper division courses in one of the options listed below. The upper division core courses are common to all Health Science Majors for those options listed below. The lower division required courses and the lower and upper division option courses vary with the option chosen.

Common Core Requirements (24 units)

| Code | Title | Hours |
|---|--|-----------|
| Lower Division Required Courses | | |
| CSC 101 | Intro.to Computer Education | 3 |
| HEA 201 | Healthcare Systems and Perspectives | 3 |
| MAT 131 | Elementary Statistics and Probability ¹ | 3 |
| Upper Division Requirements | | |
| HEA 479 | Research Methods in Health Sciences | 3 |
| Select four courses from the following: | | 12 |
| HEA 312 | Intro To Public Health | |
| HEA 314 | Health Behavior | |
| HEA 315 | Interpersonal Skills in Health Communication | |
| HEA 318 | Health Services Management | |
| CLS 308 | Pathophys for Hlth Professions | |
| Total Hours | | 24 |

¹ Students are advised to take MAT 131 Elementary Statistics and Probability to meet both the General Education quantitative reasoning requirement and the Health Science lower division requirement.

Radiologic Technology Option (42 units)**Prerequisites or Equivalents**

| Code | Title | Hours |
|--------------------|--|--------------|
| BIO 250 | Elem Hum Anat & Physiol | 3 |
| BIO 251 | Elem Hum Anatomy Phys Lab | 1 |
| ENG 110 | Freshman Composition Accelerated | 3 |
| ENG 111 | Freshman Composition II | 3 |
| PSY 101 | General Education Psychology: Understanding Human Behavior | 3 |
| or SOC 101 | The Individual In Society | |
| ANT 100 | Introduction to Cultural Anthropology | 3 |
| PHY 100 | Patterns In Nature | 3-4 |
| or PHY 120 | Elements Of Physics I | |
| CHE 110 | General Chemistry I | 5 |
| Total Hours | | 24-25 |

Required Courses

| Code | Title | Hours |
|--|---|-------|
| Lower Division Required Courses | | |
| HEA 280 | Orientation and Elementary Radiation Protection | 1 |

| | | |
|--|--|---|
| HEA 281 | Medical Terminology: Radiology | 1 |
| HEA 287 | Clinical Practicum I | 1 |
| Upper Division Required Courses | | |
| HEA 380 | Darkroom Chemistry and Techniques | 1 |
| HEA 381 | Patient Care Procedures Related to Radiology | 2 |
| HEA 382 | Principles of Radiographic Exposure | 3 |
| HEA 383 | Common Radiographic Procedures Using Contrast Media | 2 |
| HEA 384 | Topogr Anatomy & Position I | 3 |
| HEA 385 | Radiation Protection | 3 |
| HEA 387 | Clinical Practicum II | 3 |
| HEA 388 | Clinical Practicum III | 3 |
| HEA 480 | Radiological Physics | 2 |
| HEA 481 | Topographic Anatomy and Positioning II | 3 |
| HEA 482 | Special Radiographic Procedures | 2 |
| HEA 483 | Sub-Specialties in Radiology | 2 |
| HEA 485 | Departmental Administrative and Office Procedures, Computer Literacy | 1 |
| HEA 487 | Clinical Practicum IV | 1 |
| HEA 488 | Clinical Practicum V | 3 |
| HEA 489 | Clinical Practicum VI | 3 |
| HEA 499 | Senior Project Radiology | 1 |

Total Hours **41**

- Demonstrate competency in the application of communication and information technologies to discipline specific issues.
- Demonstrate proficiency in written and oral communication skills at a level commensurate with the standards of entry-level performance in the discipline.
- Apply communication theories to developing and implementing change strategies for targeted groups and populations.
- Apply theory to practice in research, planning, development, implementation, assessment, decision-making, and policy.
- Develop critical thinking and analytic skills through the logical design and systematic application of quantitative and qualitative approaches to planning and problem-solving.
- Demonstrate an understanding of professionalism and leadership qualities, through observation and self-reflection that are in keeping with acceptable moral, ethical, and legal principles.
- Analyze and address health issues and policies based on an integrated interdisciplinary approach, including the natural, behavioral, social and health sciences, and the humanities.
- Synthesize and apply knowledge from the natural, behavioral, social and health sciences, and humanities in addressing health issues from proactive and problem-solving perspectives.
- Apply theory to practice as change agents for the advancement of health, well-being, and social justice among diverse individuals, groups, and populations locally and globally.
- Demonstrate cultural competence in addressing health disparities among diverse populations in urban and rural settings locally and globally.

Community Health Option Roadmaps

4- Year Roadmap

| Course | Title | Hours |
|---|---|-----------|
| First Year | | |
| Fall | | |
| HEA 201 | Healthcare Systems and Perspectives (Satisfies GE Area E) | 3 |
| ENG 110 or ENG 112 | Freshman Composition Accelerated (Satisfies GE Area A2) or Freshman Composition Supported | 3 |
| MAT 131 or MAT 132 or MAT 134 | Elementary Statistics and Probability (Satisfies GE Area B4) or Statistics and Probability with Support or Statistics & Probability - Supported | 3 |
| GE Area C1 Arts Courses | | 3 |
| Hours | | 12 |
| Spring | | |
| THE 120 | Fundamentals of Speech (satisfies GE Area A1 Oral Communications) | 3 |
| GE Area A3 Logic/Critical Thinking | | 3 |
| GE Area D1 Perspectives on Individuals, Groups, and Society | | 3 |
| BIO 102 | General Biology (satisfies GE Area B2) | 3 |
| Elective to meet 120 units | | 3 |
| Hours | | 15 |
| Second Year | | |
| Fall | | |
| GE Area B1 Physical Science | | 3 |
| BIO 103 | General Biology Laboratory (satisfies GE Area B3) | 1 |
| GE Area C2 Letters Course | | 3 |
| GE Area D2 Global and Historical Perspectives | | 3 |
| HIS 101 | History Of United States | 3 |
| Elective to meet 120 units | | 3 |
| Hours | | 16 |
| Spring | | |
| Additional Course in GE Area C1 or C2 | | 3 |
| POL 101 | American Institutions | 3 |
| GE Area F Ethnic Studies | | 3 |
| Elective to meet 120 units | | 3 |
| Elective to meet 120 units | | 2 |
| Hours | | 14 |
| Third Year | | |
| Fall | | |
| HEA 316 | Introduction to Epidemiology * | 3 |
| HEA 312 | Intro To Public Health * | 3 |
| HEA 314 | Health Behavior * | 3 |

Health Science, Master of Science Orthotics and Prosthetics Option (64-66 units)

Orthotics and prosthetics (O&P) is a specialized healthcare profession, that combines a unique blend of clinical and technical skills to care for patients who have neuromuscular and musculoskeletal disorders and/or patients who have a partial or total absence of a limb. Orthotists and Prosthetists provide treatment that allows these individuals to lead active and independent lives by utilizing the most up-to-date technology, evidence-based medicine, and enhanced fabrication skills while collaborating with healthcare team members to create unique treatment plans that address each user's specific needs for mobility and integration. This work requires substantial clinical and technical judgment.

The principles of biomechanics, pathomechanics, gait analysis, kinesiology, anatomy, and physiology are crucial to the practitioner's ability to provide comprehensive patient care and a positive clinical outcome. Patient assessment, treatment, and education are part of the practitioner's responsibility and require collaborative communication skills.

In addition to performing orthotic and prosthetic procedures, orthotists and prosthetists are involved in clinical decision-making and patient education. The scope of practice for the orthotist and prosthetist includes, but is not limited to:

- Patient Assessment – Perform a comprehensive assessment of the patient to obtain an understanding of the patient's orthotic/prosthetic needs, cultural needs, and societal needs.
- Formulation of the treatment plan – Create a comprehensive orthotic/prosthetic treatment plan to meet the specific needs and goals of each patient.
- Implementation of the treatment plan – Perform the necessary procedures to deliver the appropriate orthotic/prosthetic services, which include fabrication of the devices required.
- Follow-up treatment plan – Provide continuing patient care and periodic evaluation to assure/maintain/document optimal fit and function of the orthosis/prosthesis.
- Practice management – Develop, implement, and/or monitor policies and procedures regarding human resource management, physical environment management, business/financial management, and organizational management.
- Promotion of competency and enhancement of professional practice – Participate in personal and professional development through continuing education, training, research, and organizational affiliations.

Program: The Masters of Science in O&P program is a cohort-based, 20-month program. Our program boasts a remarkable forty-year history of cultivating competent and highly skilled practitioners, who swiftly receive recognition for their advanced clinical abilities upon graduation. One of CSUDH's primary strengths lies in its emphasis on real-world, hands-on clinical experiences, coupled with face-to-face instruction and close mentorship with clinical faculty. With an 8 to 1 student-to-faculty ratio, we ensure an optimal learning environment for our students, complemented by 500 hours of external preceptor work to further enhance their competencies.

Our graduates' success rate is exceptional, consistently surpassing the national salary average, with a high number of residencies offered immediately after completion of the program. We firmly believe that preparing our graduates to be productive during their residency outweighs the notion of paying to gain experience. Instead, we prioritize equipping our students with the skills and expertise necessary to excel in their professional careers, setting them on a path of success from the outset. Consequently, our students are well compensated for the clinical knowledge they possess, and they can promptly begin their national board exams following graduation.

Academic Advisement

Interested students should contact the Orthotics and Prosthetics department at (562) 735-3300 or the School of Public Health and Health Sciences at (310) 243-2698 or visit <https://www.csudh.edu/oandp> (<https://www.csudh.edu/oandp/>) for program specific details, application, and additional information.

Pre-Admission Disclosure for Academic Programs Leading to Licensure or Credentialing

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or taxpayer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine after admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements is available from the American Board of Certification in Orthotics, Prosthetics, and Pedorthics <https://www.abcop.org/>.

Admission Requirements

The Prerequisites and Admission Requirements conform to CSUDH standards, and the *Standards and Guidelines for the Accreditation of Educational Programs in Orthotics and Prosthetics*, published by the National Commission on Orthotic and Prosthetic Education (NCOPE):

To be eligible for consideration, an applicant must meet the following minimum requirements:

1. A bachelor's degree, from an accredited college or university, preferably in an allied health, engineering, or health-related major.
2. A GPA of 2.75 or above in the last 60 semesters or 90 quarter units of upper-division coursework from any accredited college or university may apply.
3. **A minimum of 40 hours of volunteer work is recommended prior to admission.** Experience in an O&P facility using hand tools, light-duty power equipment, and knowledge of materials used in Orthotics and Prosthetics is an important selection criterion. The virtual experience will continue to be accepted for the current admissions cycle including online support group meetings, virtual conference attendance, or other online workshops, **HOWEVER**, a preference will be given for in-person volunteer hours.
4. Successful completion of all orthotic and prosthetic prerequisite courses with a grade of "B" or better. The prerequisites are listed in the requirements in the CSUDH M.S. in Orthotics and Prosthetics Prerequisites and Admission web page.
5. International students, please refer to the criteria for English Language Proficiency set by the CSUDH Office of International Education.

<https://www.csudh.edu/ceie-intl/intl-student-info/future-students/english-proficiency/>

Admission Procedures

Refer to the CSUDH MSOP Application web page for the application links and current instructions. <https://www.csudh.edu/oandp/msop-option/application/>

Program applications are due by February 1, for a Fall Semester program start.

Applicants who prefer to only apply to the MSOP Program at CSUDH can utilize our no-cost Program Application and submit it directly to the O&P admissions committee.

Applicants who would like to utilize a central application system can submit an application directly to the National Commission for Orthotics and Prosthetics Common Application System: <https://ncope.org/index.php/home-page-v2/academic-programs/the-orthotic-prosthetic-profession/opcas/>

Required material for either Direct or OPCAS application:

1. Official transcripts
2. List prerequisite course completion with grades.
3. List relevant experiences.
4. Complete the Personal Statement.
5. Complete the Reflection on your experience in an O&P facility.
6. Submit the 40-Hour O&P Observation Experience form.

Upon successful review of the completed application candidates will be invited to be interviewed by the admissions panel consisting of orthotics and prosthetics faculty with an admissions decision following soon after.

Upon admittance to the program applicants must submit a complete graduate admission application to the California State University system at calstate.edu/apply (<http://calstate.edu/apply/>).

Please note: Application deadlines are subject to change without notice. Check with the O&P Program for the deadlines of the current

Program Requirements

Students must complete the program with an average GPA of at least 3.0. All other university requirements for the master's degree in this University Catalog must be met (see the Graduate Degrees and Post Baccalaureate Studies (<https://catalog.csudh.edu/general-information/graduate-degree-postbaccalaureate-studies/>) section of the University Catalog).

All graduate students are required to satisfy the Graduation Writing Assessment Requirement (GWAR) established policies of the University as described in the Graduate Studies section of the University Catalog. Upon completion of the second semester after admission, or 15 units of approved coursework, the student must complete the Graduation Advisement and Advancement to Candidacy Form.

Advancement to Candidacy

Advancement to candidacy recognizes that the student has demonstrated the ability to sustain a level of scholarly competency commensurate with successful completion of degree requirements. Upon advancement to candidacy, the student is cleared for the final stages of the graduate program which, in addition to any remaining course work, will include the thesis or project.

The following are the requirements for Advancement to Candidacy:

- A minimum of 15 resident units.
- Classified standing.
- Successful completion of GWAR requirement.
- A cumulative GPA of 3.0 in all courses taken as a graduate student.
- No grade lower than a "C" in the degree program

- Completion of the Graduation Advisement and Advancement to Candidacy Form in consultation with the graduate coordinator; and
- Apply for graduation and pay graduation fees.

Capstone Activities

Degree students must complete a series of comprehensive exams/activities. The Capstone Activities involve creative application of theory and practice with real life clients who require orthotic or prosthetic intervention. The comprehensive exams are given over a 4-week period. They involve patient interaction and treatment, laboratory practical, written simulation, oral defense, gait analysis and written exams. Failure to achieve a passing score, after the third attempt, will result in a dismissal from the program.

Incomplete Courses

Students will not be permitted to enroll in new courses if they have two or more incomplete courses on their record. All other university rules about incomplete courses also apply.

Location and Registration

The CSUDH Orthotic and Prosthetic program is housed off-site at the CSUDH O&P Education Center in Los Alamitos, CA. All courses within the MSOP program are currently offered at the O&P Center which is 13 miles south of the main CSUDH campus.

Prerequisites and Course Requirements

The Prerequisites and Course Requirements conform to the Standards and Guidelines for the Accreditation of Educational Programs in Orthotics and Prosthetics, published by the National Commission on Orthotic and Prosthetic Education (NCOPE):

The prerequisite course must be College-level courses with a minimum of a 'C' grade:

- Biology/Life Sciences
- Chemistry
- Physics
- Human Anatomy & Physiology
- Psychology
- Statistics

The GRE is recommended but not required.

In addition, the following courses are recommended but not required:

- Ethics
- Developmental or Abnormal Psychology

Requirements

| Code | Title | Hours |
|-------------------------------|--|-------|
| Upper Division Courses | | |
| HEA 445 | Material Science and Laboratory Skills | 2 |
| HEA 455 | Applied Anatomy | 1 |
| Core Courses | | |
| HSC 501 | Advanced Research Methods in Health Science | 1-3 |
| HEA 508 | Clinical Pathology for Orthotics and Prosthetics | 3 |
| HEA 516 | Clinical Evaluation Tools in Orthotics and Prosthetics | 2 |

| | | |
|--|---|--------------|
| HEA 535 | Practice Management for Orthotics and Prosthetics | 1 |
| HEA 536 | Psychological Aspects of Disability | 1 |
| HEA 545 | Normal Gait and Biomechanics of Movement | 2 |
| HEA 547 | Gait Analysis and Pathomechanics for O & P | 1 |
| HEA 580 | Applied Technologies in Orthotics and Prosthetics | 1 |
| HSC 598 | Directed Research | 1 |
| Clinical Courses | | |
| HEA 435 | Orthotics Soft Goods Fitters Course | 1 |
| HEA 540 | Orthotic Management of the Upper Limb | 3 |
| HEA 541 | Orthotic Management of the Lower Limb I | 4 |
| HEA 542 | Orthotic Management of the Lower Limb II | 5 |
| HEA 544 | Orthotic Management of the Spine | 4 |
| HEA 551 | Prosthetic Management of the Upper Limb | 3 |
| HEA 552 | Prosthetic Management of the Lower Limb I | 4 |
| HEA 554 | Prosthetic Management of the Lower Limb II | 5 |
| Clinical Rotation | | |
| Complete Clinical Rotation courses including the following: ¹ | | 9-11 |
| HEA 596 | Clinical Practicum in Orthotics and Prosthetics | |
| Capstone Activities | | |
| HEA 592 | Subspecialties in Orthotics and Prosthetics | 2 |
| HEA 593 | Culminating Activity in Orthotics and Prosthetics | 3 |
| Total Hours | | 59-63 |

¹ 9 units required, 2 units optional.

The following **Program Level Outcomes** (PLOs) have been established as overarching educational objectives, and are responsive to the demonstrated needs of the O&P Program's communities of interest; including patients, the patient's families, referring physicians, therapists, and other healthcare providers, insurance companies, employers, and various governmental entities.

At the conclusion of the Orthotic and/or Prosthetic Programs at CSUDH, the student will demonstrate the ability to:

1. Perform a comprehensive assessment of the patient to obtain an understanding of the patient's orthotic/prosthetic needs.
2. Formulate a comprehensive orthotic/prosthetic treatment plan by analyzing and integrating information from patient assessment to meet the needs and goals of the patient.
3. Implement the prescribed orthotic/prosthetic treatment plan by performing the necessary procedures to deliver the appropriate orthotic/prosthetic services, including fabrication.
4. Follow up the treatment plan by providing continuing patient care and periodic evaluation to assure/maintain/document optimal fit and function of the orthosis/prosthesis.
5. Practice management effectively by developing, implementing, and/or monitoring policies and procedures regarding human resources, the physical environment, business and financial practices, and organizational management.
6. Promote competency and enhance professional practice by participating in personal and professional development through

continuing education, training, evidence-based research, and organizational affiliations.

7. Maintain a safe and secure laboratory and clinical environment on behalf of O&P patients, while ensuring structural safety, comfort, fit and patient understanding about the use and maintenance of the orthosis/prosthesis.

8. Utilize Universal Precautions and Personal Protective equipment in compliance with OSHA's Hazard Communication and Bloodborne Pathogen rulings.

9. Practice relationship-centered, culturally sensitive care with individuals and families during all phases of O&P interaction, with psycho-social awareness of patients' age, educational status, economic status, and social support.

10. Work in interdisciplinary teams during interaction with patients, peers, colleagues, supervisors, and other health team members.

11. Exhibit ethical behavior in all professional activities during interaction with patients, peers and colleagues, teachers and supervisors, and health team members/affiliates.

12. Provide evidence-based, clinically competent care by applying knowledge from theory, research, new sciences, and foundation courses such as kinesiology, anatomy, biomechanics, gait, and material science to the practice of orthotics/prosthetics.

13. Articulate how the theoretical concepts learned within the didactic coursework are exemplified in clinical settings in the domains of patient evaluation, formulation of the treatment plan, follow-up, documentation, communication, and business management functions.

Academic Advisement

Interested students should contact the Orthotics and Prosthetics department at (562) 735-3300 or the School of Public Health and Health Sciences at (310) 243-2698 or visit <https://www.csudh.edu/oandp> (<https://www.csudh.edu/oandp/>) for program specific details, application, and additional information.

Health Science, Minor

The minor in Health Science is designed for students majoring in another field that can be strengthened with a solid background in health science.

The minor in Health Science is designed for students majoring in another field that can be strengthened with a solid background in health science.

Total Hours**15**

History

College of Arts and Humanities
Department of History

Program Description

History as an academic and professional discipline continually looks for the best ways to help us understand times, people, and places very different from our own. It also provides tools to identify and analyze the processes of historical development that have shaped the world we live in today. One cannot understand the present without carefully studying the past.

The CSUDH History Department offers three degree programs: a 45-unit History Bachelor of Arts (<https://www.csudh.edu/history/program/traditional-degree-option/>), a 63-unit Bachelor of Arts History/Social Science Education Option (<https://www.csudh.edu/history/program/education-degree-option/>), and a 15-unit History minor. Students in both major degree programs complete two lower-division, pre-requisite courses in world history before attaining upper-division status. These courses introduce students to the patterns of change and continuity that shaped ancient, classical, post-classical and modern societies as they learn how historians find and evaluate evidence. Upper-division courses study specific eras and topics in greater depth. Students in both major programs complete a sequence of disciplinary methods courses (HIS 300 Theory and Practice of History, HIS 400 Proseminar in History, and HIS 490 Senior Seminar in History), in which they learn the skills necessary to engage in independent historical inquiry. HIS 400 and HIS 490 students are cohorted for completion of a two-semester research project. The 45-unit Bachelor of Arts degree program is designed to allow students maximum flexibility to tailor their course of study to their interests and needs; the 63-unit History Education Option is recommended for students interested in teaching history and social science in grades 7-12. Education Option majors complete an additional four lower-division and three upper-division requisite courses outside of History to fulfill California Teaching Commission requirements for subject-matter competency in History/Social Sciences. Completion of the Education Option degree with a GPA of 2.85 or better, a "C" or better in all courses, satisfies the California Teacher Credentialing Commission's subject matter competency requirement, enabling graduates to enter post-baccalaureate teacher credential programs without completing the California Subject Examinations for Teachers (CSET) exam in social science. To earn a minor in History, students complete fifteen units by taking five upper-division electives.

Academic Advisement

To facilitate student attainment of academic and career goals, the History Department requires all majors to meet with a faculty advisor (<https://www.csudh.edu/history/advising/>) each semester prior to class registration. Faculty advisors provide students with information about departmental requirements, course availability, coursework expectations,

internship and scholarship opportunities, and career options. Students are also strongly encouraged to consult with an advisor before applying for graduation. Faculty mentors also help students prepare for graduate work in history, education, and other related fields.

Student Life

The Department hosts two student organizations: the CSUDH History Club (<https://www.instagram.com/csudhhistoryclub/channel/>), a student organization open to all CSUDH students, and local chapter of Phi Alpha Theta, the national honor society for history majors. The CSUDH Tau Epsilon chapter of Phi Alpha Theta (<https://www.csudh.edu/history/our-students/pat/>) promotes the study of history through the encouragement of research, good teaching, publication, and the exchange of learning and ideas among historians.

The Department sponsors two annual scholarship programs for history majors: the Jack T. Kilfoil Scholarship, and the Pamela D. Emerson Environmental and Social Justice Scholarship (<https://www.csudh.edu/history/scholarships/>). Each academic year, students also have two opportunities to publish their work in *The Toro Historical Review*, the undergraduate journal of the CSUDH History Department.

Career Possibilities

The study of history emphasizes not only the acquisition of knowledge about a diverse range of global societies, it also develops transferable professional skills and a commitment to civic engagement. It thus prepares undergraduates for a wide range of career opportunities. According to a recent study by the American Historical Association, students who earn Bachelor's degrees in history work in a variety of fields, including education (as teachers and administrators), management, law, government, the non-profit sector, libraries, museums, and archives.

Approximately half of those who earn Bachelor's degrees in history go on to earn Master's degrees, professional degrees in related fields, or a Ph.D. Again, students who are preparing for a career teaching social science in grades 7-12 are encouraged to enroll in the History/Social Science Education Option. Completion of this degree option is the first step toward meeting the state's requirements for a teaching credential.

Department advisors regularly provide students with information about both career resources on campus and opportunities for study abroad, internships, and scholarships.

Undergraduate Programs

Bachelor

- History, Bachelor of Arts (p. 596)

Minor

- History, Minor (p. 600)

Graduate Programs

Subject Matter Preparation

- Specific History Subject Matter Authorization (p. 600)

Faculty

Laura Talamante, Department Chair

Faculty advisors: Kate Fawver, Joshua Jeffers, Andrea Johnson, Christopher Monty, Bianca Murillo, Daniel Santana, Kerry Shannon.

Faculty lecturers: Thomas Alvarez, Ryan Archibald, Michael Block, Michael Desrochers, Brian Kovalesky, William O'Mara IV, Anne Reid, Kirsten Resnick, Sun-Hee Yoon.

Staff

Academic Support Coordinator, Raúl Rubio

Department Office: LCH A-342, (310) 243-3328

Emeriti Faculty

Enrique Cortes, Judson A. Grenier, Donald Teruo Hata, Nancy Hollander, Howard Holter, James Jeffers, Donald A. MacPhee, Linda Pomerantz, Frank Stricker, Lynne Loeb, Clement Okafor Udeze.

Courses

HIS 101. History Of United States. (3 Units)

A study of the ideals, creeds, institutions, and behavior of the peoples of the United States . Meets the State requirement in U.S. History.

Offered Fall, Spring, Summer, All terms

HIS 120. World History I. (3 Units)

Explores the early development of societies around the world and their increasing interactions to 1500. Reviews the rise of cities and empires, and major political, social, economic and cultural developments prior to the modern period.

Offered Fall, Spring

HIS 121. World History II. (3 Units)

Explores the regional and global interactions and exchanges that have shaped the world since 1500. Treats the major demographic, socio-economic, cultural and political patterns and changes that distinguish the modern period in world history.

Offered Fall, Spring

HIS 300. Theory and Practice of History. (3 Units)

Introduces students to the theory and practice of history. Explores the major philosophies of history and reviews current trends in the field. Introduces students to disciplinary research, thinking and writing skills, including the use of library resources, the analysis and interpretation of primary and secondary sources, the forms of disciplinary composition, and documentation standards.Â

Offered Fall, Spring

HIS 301. Individual, Family, and Community in Historic Perspective. (3 Units)

Concentrates upon factors that contribute to shaping of individual, family, community, and regional history. Emphasis upon personal histories and individual relationships to immediate environment. Includes ethnic settlements, historic sites, oral histories, generations.

Offered Fall, Spring

HIS 302. Practicum In Applied History. (3 Units)

Offered Fall, Spring

HIS 305. World History for Teachers. (3 Units)

Prerequisite: HIS 120 and HIS 121 are required. Topics in world history is taught in grades 6, 7 and 10 in California schools. Emphasizes growth of world history as a field, regional and global patterns of continuity and change, and cross-cultural exchange as a source of historical development.

Offered Fall

HIS 310. The Ancient World. (3 Units)

The survey of the history of the ancient world with emphasis on the earliest civilizations of the Near East, classical Greece , and the rise and fall of the Roman Empire.

Offered Fall

HIS 311. Medieval Europe. (3 Units)

Europe from the decline of Rome in the West to the fourteenth century. Political, economic, institutional, religious, and cultural changes. The fortunes of Empire and Papacy, early Islam, the Byzantine Empire, and the renaissance of the twelfth century.

Offered Infrequent

HIS 312. Renaissance and Reformation. (3 Units)

The Italian Renaissance through the Thirty Years' War; the rise of national states, the Protestant revolt, the Counter-Reformation, the hegemony of Spain, and the attendant commercial revolution of the Atlantic World.

Offered Spring

HIS 313. The Age of Absolutism and Enlightenment. (3 Units)

Course examines the African American experience from African slave trade through emancipation. Themes include the Atlantic Slave Trade; slavery and slave resistance; the emergence of African American culture; free black communities; black abolitionism; and black participation in the military.

Offered Fall

HIS 314. Emergence Modern Europe. (3 Units)

The dissolution of traditional societies in Europe and the emergence of modern ideology, from the Enlightenment through the French and Industrial revolutions to the period of internal strife and power politics at the end of the 19th century.

Offered Fall

HIS 315. 20th Century Europe. (3 Units)

The formation of present-day Europe amid continued industrialization, war, social and political ferment from the opening of the century to the present.

Offered Spring

HIS 318. History of Medieval Russia. (3 Units)

Prerequisites: HIS 120 and HIS 121 are recommended. This course surveys the history of Russia from the founding of Kievan Rus' to the end of the seventeenth century. Topics include migrations of the Eastern Slavs; state formation; Russia under the Golden Horde; the history of Tsardom of Muscovy.

Offered Fall

HIS 319. History of Imperial Russia, 1689-1917. (3 Units)

Prerequisite: HIS 121 is recommended. This course surveys the history of Russia from 1689 to the Russian Revolution. Topics include the impact of Peter the Great; imperial responses to revolution, nationalism, and industrialization; the birth of the Russian intelligentsia; and the origins of the Revolution.

Offered Spring

HIS 320. History of the USSR and Post-Soviet Russia. (3 Units)

Prerequisite: HIS 121 is recommended. This course explores Russian history from 1917 to the present. Major topics include the origins of the Revolution; the rise of Bolshevism; the Russian Civil War; Stalinism; World War II; post-Stalin reforms; the dissolution of the USSR; and major Post-Soviet developments.

Offered All terms, Fall

HIS 330. US Colonial Period. (3 Units)

The discovery, founding and expansion of colonial settlements to 1740. The relation of European institutions and plans to American ideas, experience, and reality.
Offered Fall

HIS 331. United States: Revolutionary and Constitutional Period. (3 Units)

Evolution of the revolutionary movement in the North American colonies. Anglo-American imperial problems, culminating in the Confederation period and the drafting of the American Constitution, 1740 to 1789.
Offered Spring

HIS 332. US Early National Period. (3 Units)

A study of the national experience from the Constitution through the era of sectional conflict. Includes expansion of the Union westward, the emergence of a national character, and sectional rivalries leading to conflict at mid-century.
Offered Spring

HIS 333. United States: Civil War and Reconstruction. (3 Units)

Social, political, and economic origins of sectionalism and breakup of the Union; military campaigns and the home front in wartime; reconstruction in the South. Focus on the years 1849-1877 and their legacy to later generations.
Offered Fall

HIS 334. Emergence of Modern America. (3 Units)

The triumph of the industrial revolution in the post-Civil War period and the response of agrarian and progressive protest. The rise of the United States to world power and involvement in international affairs prior to World War I.
Offered Fall

HIS 335. United States: War and Depression. (3 Units)

Major developments in American life and institutions from the beginning of World War I to the end of World War II. Consideration of the social, economic, and political implications of prosperity, depression, and two world wars.
Offered Fall

HIS 336. United States: Recent Period. (3 Units)

Major developments in American life and institutions since World War II. Consideration of domestic politics from Truman to Reagan, effects of mass technology, the civil rights struggle, and confrontations with the communist world.
Offered Spring

HIS 340. American West. (3 Units)

Evaluates successive American wests from the pre-Columbian era to the present. Major themes include the Turner thesis, socio-economic, cultural, and political consequences of American colonization, and ways in which women, African Americans, Hispanics, and American Indians shaped the American West.
Offered Infrequent

HIS 341. California. (3 Units)

The social, political, and cultural history of California, from the period of Spanish exploration to the present; emphasis on adjustments of differing ethnic groups.
Offered Fall, Spring

HIS 342. Native American History. (3 Units)

Prerequisite: HIS 101 OR Equivalent. Survey of Native American history from the pre-contact period to the present. Examines Native histories and cultures, inter-tribal relations, European colonial and U.S. federal Indian policies, identity policies, tribal sovereignty, and modern self-determination movements.
Offered All terms, Fall

HIS 343. African American History from Africa to Reconstruction. (3 Units)

Traces principle economic, political and social trends in Latin America, post-independence. Considers the wide variety of local, regional, and national responses to questions about modernity, development, and social justice. Special attention paid to issues of class, race and gender.
Offered Infrequent

HIS 344. African American History: Reconstruction to the Present. (3 Units)

Course explores African American history from Emancipation to the present. Themes include Reconstruction; the Great Migration; the Harlem Renaissance; the Great Depression; the New Deal; World War II; the Civil Rights Movement; the Black Power Movement; and contemporary racial politics.
Offered Infrequent, All terms

HIS 345. History of the Mexican American People I. (3 Units)

Mexican American life to 1900, stressing the evolution of economic and political thought, social institutions, and cultural expressions.
Offered Infrequent

HIS 346. History of the Mexican American People II. (3 Units)

The Mexican American's contributions to the building of the Southwest; the clash between Mexicans and North Americans; the emergence of the urban Mexican American.
Offered Infrequent

HIS 348. Labor In American Society. (3 Units)

The role of labor in the political, economic, and social life of the U.S. , including growth of organized labor, rival ideologies, legal decisions, and contributions of various ethnic groups, from the colonial period to the present.
Offered Spring

HIS 352. Topics in United States Foreign Relations History. (3 Units)

Prerequisite: HIS 101 or equivalent is required. Topics in United States foreign relations history. Courses emphasize interaction of strategic, political, economic and cultural factors in policy making and implementation, as well as, impact of major international events on American and global society, economy, and government.
Offered Fall

HIS 353. Terrorism and Totalitarianism. (3 Units)

Prerequisite: HIS 121 is required. Introduction to history, definitions, tactics, uses, philosophical and socio-political origins of terrorism and terrorist organizations, and to political systems such as fascism and Marxism which have adopted elements of terrorism as a means of controlling populations and the political process.
Offered Infrequent

HIS 354. History of American Immigration. (3 Units)

Historical trends, movements, and patterns of global immigration to the United States . Topics of study include: motives for immigration; anti-immigration sentiments and activities; legal and political responses; role of distinctive cultural groups; assimilation and nonconformity.
Offered Spring

HIS 355. American Civil Rights History. (3 Units)

Prerequisite: ENG 110 or ENG 108/109 is required. Junior status is required. Covers the long history of civil rights in the United States from the antebellum to the present with special emphasis on the non-violent movements of the Cold War era.
Offered Fall, Spring

HIS 356. American Environmental History: American Environment from Pre-Contact (prior to 1500) to the Present. (3 Units)

Prerequisite: HIS 101 is required. Explores the environmental history of the continental United States from the pre-contact period (prior to 1500) to the present. Examines how humans have altered the American environment and how environmental factors have shaped the course of American history.
Offered Fall

HIS 360. African History to the 1880's. (3 Units)

African historiography and history to the 1880's, covering themes such as human origins, environment, trade, cultural exchanges and migrations in the Indian Ocean, Mediterranean and Atlantic Worlds, and Arab/Asia/European conquest and settlement in shaping diverse societies.
Offered Infrequent

HIS 361. African History from the Colonial Era to the Present. (3 Units)

African history from the 1180's to the present, including topics on European conquest, the invention of tribalism, and the creation of new settler states, nationalist movements leading to independence, and the challenges faced by post-colonial states.
Offered Infrequent

HIS 362. Traditional China. (3 Units)

The origins and evolution of Chinese civilization and the influence of China on East Asia prior to the 19th century Western impact.
Offered Infrequent

HIS 363. Modern China. (3 Units)

China from 1840 to the present. Western impact on traditional China and the Chinese response. Analysis of attempts to modernize China. A history of the Chinese communist movement since 1921. Society, politics and culture of the People's Republic of China focusing on the era of Mao Zedong (1949-1976).
Offered Infrequent

HIS 364. Traditional Japan. (3 Units)

Origins and evolution of Japanese social, cultural, intellectual, and political traditions until the 19th Century Western impact. Foundation for comparison and contrast of Japan before and after the Meiji Restoration.
Offered Infrequent

HIS 365. Modern Japan. (3 Units)

Japan from the late Tokugawa period to the present. Western impact on traditional Japan and the Japanese response; the development of a modern state, economy, and society.
Offered Infrequent

HIS 366. Colonial Latin America. (3 Units)

Latin America from conquest to independence movements of the early nineteenth century. A general overview of colonial society, culture, economics, and politics. Special attention paid to issues of gender, race, and ethnicity, and questions of history and memory.
Offered Fall

HIS 367. Modern Latin America. (3 Units)

Offered Spring

HIS 368. Mexico: Colonial. (3 Units)

Explores pre-Columbian Mexican civilizations, especially the Mexica; examines Spanish conquests and the influence of race, class, and gender on the development of colonial Mexican society; contrasts northern, central and southern regions; investigates Mexican independence.
Offered Fall

HIS 369. Mexico: National Period. (3 Units)

Traces colonial legacies, including those of race, class and gender in post-independence Mexico; analyzes the Mexican liberal tradition, nationalism, the Mexican Revolution and late 20th Century neo-liberalism; examines US-Mexican relations; investigates socio-cultural, economic and political issues.
Offered Spring

HIS 370. History of Early Monotheism. (3 Units)

The origins and development of Judaism, Christianity, and Islam through 1000 C.E. Examines key historical theories and controversies, and the mutual cultural, political, economic impacts of these religions and their societies. Explores key beliefs and practices of each faith.
Offered Spring

HIS 373. The City In History. (3 Units)

The rise of the city from earliest times to the present tracing the establishment and growth of cities as institutions and the development of the process of urbanization; comparison of selected cities.
Offered Infrequent

HIS 375. Pop Culture in History. (3 Units)

Course examines how cultural producers have used various popular mediums including art, music, theater, literature, oral traditions, and televisions to articulate identities and to challenge hegemonic discourses of class, race, ethnicity, and gender as well as the structural inequalities they support. Repeatable for credit.
Offered Spring

HIS 376. Film As History. (3 Units)

The historical analysis of films as manuscripts and source materials for social and intellectual thought in the twentieth century. Emphasis to vary from semester to semester, for example: Film as History: The Great Depression; or Film as History: Latin America.
Offered Fall

HIS 379. The Family In History. (3 Units)

Family relationships, sexual attitudes, patterns of growing up and growing old in various societies, and minority groups, as they have evolved with social and economic changes in various historical contexts.
Offered Spring

HIS 380. Women In History. (3 Units)

Changing role of women in the family, political economy and culture of various societies. Topics vary, for example, Women in History: Sex Roles in North and South America; Women in History: Women in China ; Women in History: Sex roles and Feminism in the United States.
Offered Fall

HIS 395. Special Topic In History.. (3 Units)

Intensive study of a single period, area, figure, movement, or idea in history. Topic may be either departmental or interdisciplinary, but focus is historical, and may be single instructor or team taught. Example: Special Topics: Revolution.
Offered Infrequent

HIS 400. Proseminar in History. (3 Units)

Prerequisites: C or better in HIS 300 is required. Provides advanced disciplinary training designed to prepare students to undertake independent historical research. Offers advanced instruction in historical research and writing through exercises in historiographic analysis based on intensive collective studies of important events or themes in history. A grade of C or better in this course fulfills the GWAR requirement for all History majors and minors.
Offered All terms, Fall, Spring

HIS 490. Senior Seminar In History. (3 Units)

Prerequisite: HIS 400 with grade of C or better. Collective examination of a topic in depth. Students will undertake a major research project utilizing historical skills. Three hours of seminar per week.
Offered Fall, Spring

HIS 494. Independent Study. (1-3 Units)

Prerequisite: HIS 300, HIS 400. Independent study of a particular problem under the direction of a faculty member of the History Department.
Offered Fall, Spring

HIS 498. Directed Research in History. (1-3 Units)

Prerequisite: Consent of instructor. The student develops and completes an individual study under faculty supervision. Repeatable course.
Offered As needed

HIS 500. Colloq Community History. (3 Units)

Offered Infrequent

HIS 502. Systems/Thry/Res In His. (3 Units)

Offered Infrequent

HIS 520. Sem In Hist Preservation. (3 Units)

Prerequisites: Courses in art history and appreciation are recommended. An in-depth study of such subjects as a single artist, a period, or a movement or theme in art history. Student should have a sufficient background in art vocabulary and concepts to participate. Three hours of seminar per week.
Offered Infrequent

HIS 540. Sem In Mus & Matr Cult. (3 Units)

Offered Infrequent

HIS 550. Sem Archives. (3 Units)

Offered Infrequent

History, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

No minor required.

Major Requirements (45 units)

The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

| Code | Title | Hours |
|--|--|-----------|
| Lower Division Required Courses | | |
| HIS 120 | World History I | 3 |
| HIS 121 | World History II | 3 |
| Upper Division Requirements | | |
| HIS 300 | Theory and Practice of History ¹ | 3 |
| HIS 400 | Proseminar in History ¹ | 3 |
| HIS 490 | Senior Seminar In History ¹ | 3 |
| Select three courses in non-U.S. history (representing at least two regions) from the following and 395 when the subject is appropriate: | | 9 |
| HIS 305 | World History for Teachers | |
| HIS 310 | The Ancient World | |
| HIS 311 | Medieval Europe | |
| HIS 312 | Renaissance and Reformation | |
| HIS 313 | The Age of Absolutism and Enlightenment | |
| HIS 314 | Emergence Modern Europe | |
| HIS 315 | 20th Century Europe | |
| HIS 318 | History of Medieval Russia | |
| HIS 319 | History of Imperial Russia, 1689-1917 | |
| HIS 360 | African History to the 1880's | |
| HIS 361 | African History from the Colonial Era to the Present | |
| HIS 362 | Traditional China | |
| HIS 363 | Modern China | |
| HIS 364 | Traditional Japan | |
| HIS 365 | Modern Japan | |
| HIS 366 | Colonial Latin America | |
| HIS 367 | Modern Latin America | |
| HIS 368 | Mexico: Colonial | |
| HIS 369 | Mexico: National Period | |
| HIS 395 | Special Topic In History: | |
| Select three courses in U.S. history. Two should be period courses, selected from the HIS courses numbered (330-336). One should be topical, selected from the HIS courses numbered (340-359 or 395), when the subject is appropriate. | | 9 |
| Select four additional upper-division courses, one of which must be a topical course (HIS courses numbered 301, 340-352, 354, 370-390, and 395). The other three may be any upper-division courses (12 units). | | 12 |
| HIS 348 | Labor In American Society | 3 |
| Total Hours | | 48 |

¹ **Note:** HIS 300 Theory and Practice of History, HIS 400 Proseminar in History, and HIS 490 Senior Seminar In History must be completed with a grade of C or better.

History/Social Science Education Option

| Code | Title | Hours |

| HIS 310 | The Ancient World | |
| HIS 311 | Medieval Europe | |
| HIS 312 | Renaissance and Reformation | |
| HIS 313 | The Age of Absolutism and Enlightenment | |
| HIS 318 | History of Medieval Russia | |
| Group D: Modern Europe: | | 3 |
| HIS 314 | Emergence Modern Europe | |
| HIS 315 | 20th Century Europe | |
| HIS 319 | History of Imperial Russia, 1689-1917 | |
| HIS 320 | History of the USSR and Post-Soviet Russia | |
| Social Science Requirements | | |
| ECO 210 | Economic Theory 1A Micro | 3 |
| ECO 211 | Economic Theory 1B Macro | 3 |
| GEO 350 | World Geography | 3 |

| | | |
|---------|---|---|
| POL 100 | General Education Political Science: World Perspectives | 3 |
|---------|---|---|

Select one Political Science course:

| | | |
|------------|---|---|
| POL 354 | American Political Thought | 3 |
| or POL 361 | American Constitutional Law: Civil Rights | |

Select one Comparative Religions course:

| | | |
|------------|-----------------------------|---|
| PHI 383 | Comparative Religions | 3 |
| or HIS 370 | History of Early Monotheism | |

Select one Area of Study course from the following:

| | | |
|---------|---|--|
| APP 101 | Introduction To Asian Studies | |
| APP 212 | Introduction to Comparative Ethnic and Global Societies | |
| CHS 100 | Chicana/o Cultural Roots | |
| CHS 205 | Introduction to Chicana/o Literature | |
| CHS 212 | Introduction to Comparative Ethnic Studies | |
| WMS 250 | Foundations in Women's Studies | |

Total Hours **63**

Subject Matter Competency in Social Sciences

To receive certification of Subject Matter Competency in Social Sciences for credentialing, students will be required to maintain a 2.85 GPA in the major with a "C" or better in all courses. They must also successfully complete and submit a teaching portfolio to the department.

Program Learning Outcomes

Upon completion of the Bachelor of Art's degree in History, students will be able to demonstrate:

- An understanding of the nature and goals of history as a discipline, including an awareness of the complexity of the past and the historical record.
- A broad range of historical comprehensions, including an understanding of the basic themes and issues of the history of the United States and at least two other world regions (Africa, Asia, Europe –including Russia –or Latin America).
- An understanding of the historical construction of class, race, ethnicity and gender, and the ability to critically evaluate the use of these categories in primary and secondary sources.
- Research and information literacy skills using campus library resources, including the critical use of both print and electronic research sources.
- The ability to distinguish between facts and interpretations and to identify arguments in historical scholarship and to evaluate them critically.
- The ability to communicate historical knowledge, interpretations and arguments clearly in writing and in formal oral presentations.
- The ability to properly document primary and secondary sources and to construct a bibliography.
- A capacity for life-long learning by completing an independent research project (involving the formulation of an historical question and the composition of a formal research paper exploring that question utilizing both primary and secondary sources).

History, Minor

Requirements

Electives (15 units)

Select five upper-division courses with the assistance of an advisor.

Note: Minors are not required to complete HIS 400 Proseminar in History or HIS 490 Senior Seminar In History. Minors who wish to enroll in HIS 400 Proseminar in History must pass HIS 300 Theory and Practice of History with a grade of "C" or better; minors who wish to enroll in HIS 490 Senior Seminar In History must first pass HIS 400 Proseminar in History with a grade of "C" or better.

Specific History Subject Matter Authorization

Holders of a Single Subject or Multiple Subject credential issued by the California Commission on Teacher Credentialing may secure a Specific History Subject Matter Authorization that allows the holder to teach the specific subjects in grades preschool, K-12, and classes organized primarily for adults.

For other requirements governing issuance of this authorization, consult the Teacher Education section of this catalog or contact the School of Education Student Services Center.

Requirements

Complete each of the following courses or equivalent as approved by the History Department Advisor.

| Code | Title | Hours |
|---|---|-------|
| Lower Division | | |
| HIS 101 | History Of United States | 3 |
| HIS 120 | World History I | 3 |

Human Services

College of Health, Human Services, and Nursing
Department of Human Services

For information regarding HUS program visit: <https://www.csudh.edu/human-development/human-services/>.

Mission and Goals Statement

The mission of the Human Services Department is to provide diverse members of the community with a university education that focuses on the knowledge and skills to help those in need. The Bachelor's degree in Human Services prepares students for occupations in human service settings and in social work, or for graduate training.

Program Description

The Human Services major at CSU Dominguez Hills is a single subject major (no minor required) that prepares students who earn the B.A. degree for employment in a variety of professional service careers. This major is interdisciplinary and combines courses from Human Services, Child Development, Health Sciences, Psychology, Sociology, Anthropology and other areas. It is similar to a degree in social work, and it is a great major for people who want meaningful jobs helping others and serving their communities.

Features

A unique aspect of the Human Services major is the student's involvement in actual work in the field of human services through the practicums. The practicum courses provide for on-the-job training in a variety of community settings. Fieldwork settings are provided through a wide range of government and private agencies and organizations such as mental health, family service centers, geriatric care, educational settings, the correctional system, recreation departments, alcohol and drug agencies, children services, hospitals, community group settings and many others. There are many instances when practicum experience leads to employment.

Academic Advisement

New students are required to make an appointment with an Academic Advisor for a mandatory new student workshop prior to enrolling in classes. The advisors are located in the Student Success Center (SSC), WH A-210. The SSC advisors may be reached at (310) 243-2120 / (800) 344-5484 or visit <https://www.csudh.edu/chhsn/chhsn-student-success-center/>.

Preparation

Community college transfer students are encouraged to complete general education courses and to take human biology/anatomy and statistics prior to transferring to CSUDH.

Graduation with Honors

An undergraduate student may graduate with Honors in Human Services provided that the following criteria are met:

1. A minimum grade point average of at least 3.5 in all courses used to satisfy the upper-division requirements in Human Services;
2. Recommendation by the faculty of the Human Services program.

Student Organizations

Students in the Human Services Department are eligible to join the Human Services Students Association.

Career Possibilities

The Human Services Program prepares students to work in mental health agencies, family service centers, facilities for the developmentally disabled, drug and alcohol services, geriatric care, personnel services, educational settings and other service areas. Human services workers assume many roles such as: case managers, advocates, teaching, group facilitators, outreach, mobilizers, consultants, planners, administrators, and evaluators. Students have ample opportunities to learn about community agencies and available occupations prior to graduation.

Undergraduate Programs

Bachelor

- Human Services, Bachelor of Arts (p. 603)

Certificate

- Mental Health Recovery, Certificate (p. 606)

Faculty

Phu Phan, MSW, Ph.D., Professor & Chair

Hannah Nguyen, MSW, Ph.D., Associate Professor; Annalyn Valdez-Dadia, Dr. PH, MPH, Assistant Professor; Sarah Underwood, MSW, Ph.D., Assistant Professor

Human Services (HUS) Office: Ms. Pam Curtis, ASA, SBS D-321, (310) 243-3461; email: hus@csudh.edu

Courses

HUS 195. Special Topics in Human Services. (1-3 Units)

Study of special interest for students in the selected area of study. Topic and content will vary as announced.
Offered Infrequent

HUS 295. Special Topics in Human Services. (1-3 Units)

Study of special interest for students in the selected area of study. Topic and content will vary as announced.
Offered Infrequent

HUS 300. Introduction To Human Services. (3 Units)

Introduction to human services as a profession. Exploration of social forces that contribute to human needs, issues and problems related to planning, delivering and evaluating programs. Some site visits are required.

Offered Fall, Spring

HUS 307. Principles of Mental Health Recovery. (3 Units)

Prerequisite: HUS 300. Co-requisites: HUS 380 and HUS 381. Examines the history of mental health treatment and the disparity between recent research findings and current treatment modalities. The concept of recover from mental illness will be presented with a focus on psychiatric rehabilitation (PSR) as a treatment modality support recovery.

Offered Fall, Spring

HUS 310. Helping and Professional Relationships. (3 Units)

Prerequisites: HUS 300. Co-requisites: HUS 380 and HUS 381. Course will focus on developing professional helping skills with and emphasis on ethical and professional behavior. Through research and writing in the disciplinary genres, students will develop verbal and non-verbal communication skills commonly used in the helping professions. A grade of C or better in this course fulfills the GWAR requirement for all Human Services majors.

Offered Fall, Spring

HUS 311. Interventions and Strategies of Mental Health Recovery I. (3 Units)

Prerequisites: HUS 300. Co-requisites: HUS 380 and HUS 381. Examines interventions and strategies that enhance recovery from mental illness. Tools and skills needed as a mental health practitioner will be introduced, explored and practiced during the course.

Offered Fall, Spring

HUS 315. Intercultural Communication for Human Services. (3 Units)

Prerequisite: HUS 300 is required. Course is designed to facilitate students' communication skills including becoming more sensitive to intercultural communication differences, and to provide them with the knowledge and skills that will help them interact successfully with clients, coworkers, supervisors and communities who are from different cultures.

Offered Fall, Spring

HUS 330. Human Behavior and the Social Environment. (3 Units)

Prerequisite: HUS 300. Critically applies human services theories on the assessment of human behavior in the biological, psychological and social development of people over the lifespan with special focus on diversity such as race, gender, class and disabilities.

Offered Fall, Spring, Summer

HUS 368. Interventions and Strategies of Mental Health recovery II. (3 Units)

Prerequisites: HUS 300, HUS 307 and HUS 311. Co-requisites: HUS 484 and HUS 485. This course will focus on the three major evidenced based therapies (Cognitive Behavior-CBT, Dialectical Behavioral-DBT, and Motivational Interviewing- MIT) that help people with severe and persistent mental illness.

Offered Spring

HUS 380. Fieldwork Practicum in Human Services I. (2 Units)

Corequisite: HUS 381 is required. This is the first of three supervised fieldwork experience with an emphasis on human services and educational settings. students will examine structure and functioning, observe professional relationships and discover interagency network. Students will then begin to apply their knowledge to basic level helping skills with agency clients. May not be taken concurrently with any other fieldwork courses.

Offered Fall, Spring

HUS 381. Seminar in Human Services I. (1 Units)

Corequisite: HUS 380 is required. First of three fieldwork seminar courses in Human Services, which is structured to facilitate integration of Human Services knowledge and theory with practical fieldwork application. Students will be able to examine and integrate personal and professional values and understand their personal selves as participants in professional roles. Each weekly seminar will include time to problem solve and share field experiences.

Offered Fall, Spring

HUS 390. Field Practicum in HUS II. (2 Units)

Prerequisites: HUS 300, HUS 380 and HUS 381. Co-requisites: HUS 391 and HUS 400 required. Second of three supervised fieldwork experiences with an emphasis on human services and educational settings. Students will apply their knowledge of human services theory and skills to intermediate level of helping with agency clientele. This course is taken concurrently with HUS 391 Seminary in Human Services II. May not be taken concurrently, however, with any other field work courses. CR/NC grading.

Offered Fall, Spring, Summer

HUS 391. Seminar in Human Services II. (1 Units)

Prerequisites: HUS 300, HUS 380 and HUS 381. Co-requisites: HUS 390 and HUS 400 required. Second of three fieldwork seminar courses in Human Services with is structured to facilitate integration of Human Services knowledge and theory with practical fieldwork application. Students will be able to examine and integrate personal and professional values and understand their personal selves as participants in professional roles. Each weekly seminar will include time to problem solve and share field experiences.

Offered Fall, Spring, Summer

HUS 395. Spc Topics in Human Services. (1-3 Units)

Study of a topic of interest to the Human Services profession. Topics will vary as announced but generally focus on the delivery of human services by examining theories, policies, advocacy, and methods. Three hours of lecture per week.

Offered As needed

HUS 396. Practicum in Human Services. (3 Units)

Prerequisite: HUS 300. May not be taken concurrently with any other field course. Supervised field experience, with an emphasis on human services and educational settings. Supervision emphasizes training and application of clinical, interviewing, and other helping skills, didactic methods, group techniques, methods of evaluation and/or other skills specific to fieldwork needs.

Offered As needed

HUS 400. Case Management. (3 Units)

Prerequisite: HUS 300. Co-requisites: HUS 390 and HUS 391. Models of institutional service delivery and case management systems. Principles of and critical issues in case management, including collaborative and interagency services.

Offered Fall, Spring, Summer

HUS 410. Advanced Case Management - Working with Special Populations. (3 Units)

Prerequisites: HUS 300, HUS 310, HUS 380, HUS 381, HUS 390, and HUS 400 are required. Co-requisite: HUS 480 and HUS 481 are required. Focuses on introducing students to different populations commonly seen in human services agencies. Course will address theoretical underpinnings for human services and contain the basic description of best practice that will focus the student's attention on how to carry out certain functions ethically and competently.

Offered Fall, Spring

HUS 460. Research Methods for Human Services. (3 Units)

Prerequisite: HUS 300. Elementary statistics. This course is an overview of research methods in human services, including study design, sampling data collection and analysis, statistical techniques and report writing. Also included is a critical analysis of published research and examination of relevance of data to decision making.

Offered Fall, Spring, Summer

HUS 480. Fieldwork Practicum in Human Services III. (2 Units)

Prerequisites: HUS 300, HUS 380, HUS 381, HUS 390 and HUS 391 are required. Co-requisites: HUS 410 and HUS 481 are required. Third of three supervised fieldwork experiences with an emphasis on human services and educational settings. Students will apply their knowledge of human services theory and skills at an intermediate level of helping with agency clientele. This course is taken concurrently with HUS 481 Seminar in Human Services III. May not be taken concurrently, however, with any other fieldwork courses. Students complete 180 hours in their fieldwork placement.

Offered Fall, Spring

HUS 481. Seminar in Human Services III. (1 Units)

Prerequisites: HUS 300, HUS 380, HUS 381, HUS 390 and HUS 391 are required. Co-requisites: HUS 410 and HUS 481 are required. This is the third of three fieldwork seminar courses in Human Services which is structured to facilitate integration of Human Services knowledge and theory with practical fieldwork application. Students will be able to examine and integrate personal and professional values and understand their personal selves as participants in professional roles. Each weekly seminar will include time to problem solve and share field experiences. Students must also do an oral case presentation with one of their clients. This course is taken concurrently with HUS 480 and cannot be taken concurrently with any other fieldwork course. Students complete 180 hours in their fieldwork placement.

Offered Fall, Spring

HUS 484. Practicum in MHR. (2 Units)

Prerequisites: HUS 307 and HUS 311. Co-requisites: HUS 368 and HUS 485. Supervised field experience with an emphasis on mental health recovery and working with the severely and persistently mentally ill. Students are placed in a community mental health agency where they will apply their knowledge and skills of mental health recovery. CR/NC grading.

Offered Spring

HUS 485. Seminar in Mental Health Recovery. (1 Units)

Prerequisites: HUS 307 and HUS 311. Co-requisites: HUS 368 and HUS 484. Weekly seminar course structured to facilitate the integration of mental health recovery knowledge and skills with practical field application. The seminar is designed to allow students to achieve integration of classroom learning with direct experiences in the agency setting.

Offered Spring

HUS 490. International Studies in HUS. (3 Units)

Prerequisite: HUS 300 required. The course focuses on the comparative analyses of human services policies and service between the U.S. and the host country (varies). Students will travel abroad to experience first-hand knowledge of the influences of social welfare policy on service delivery.

Offered All terms

HUS 494. Independent Study in Human Services. (1-4 Units)

Prerequisite: Consent of Instructor. A course of study designed cooperatively by student and instructor to accomplish individualized learning objectives that are appropriate to the human services profession.

Offered As needed

HUS 495. Special Topics in Human Services. (1-3 Units)

Prerequisite: Consent of instructor. Advanced course of special interest for students in the selected area of study. Topic and content will vary as announced.

Offered As needed

HUS 496. Internship in Human Services. (3-6 Units)

Prerequisites: HUS 396 Or PSY 396. May not be taken concurrently with any other fieldwork course. Survey of professional and ethical issues in the helping professions. Supervised internships in human services settings.

Offered Fall, Spring, Summer

Human Services, Bachelor of Arts Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major, no minor required or offered.

Major Requirements (57 units)

The following courses, or their approved transfer equivalents, are required of all candidates for this degree. All courses applied to the major must be satisfied with a grade of C or better.

| Code | Title | Hours |
|----------------------------|---------------------------------------|-------|
| Common Core Courses | | |

Mental Health Recovery, Certificate

Program Description

Human Services offers a 12 unit certificate program to prepare individuals to enter the field of Mental Health Recovery. There is a growing demand for individuals to be trained in Mental Health Recovery theory and interventions in the mental health arena.

The field of mental health services delivery is changing with new requirements for training and knowledge in Mental Health Recovery. Included in the course of study are principles of mental health recovery, intervention and strategies, and supervised practicum field experience which will allow individuals an opportunity to apply their knowledge of mental health recovery.

Eligibility Requirements

1. Completion of Elementary Statistics with a grade of C or better.

Career Possibilities

Individuals successfully completing the certificate program will be prepared for entry level positions in community mental health clinics, counseling centers, in-patient mental health hospitals, out-patient mental health centers, youth crisis shelters, substance abuse counseling and other mental health related fields which require mental health recovery knowledge and skills.

Humanities External Degree

College of Arts and Humanities

Program Description

The Master of Arts in Humanities offers broad interdisciplinary exposure to all of the areas of the humanities – including both area studies and traditional disciplinary fields such as history, philosophy, and literature – and the establishment of an integrative perspective among them, with emphasis on their interrelating effects and influences. The degree is offered entirely as a distance program. Courses are offered in the fall and spring semesters for 15 weeks each.

Preparation

A B.A. or B.S. degree from a regionally accredited college or university with a grade point average of 3.0 is required for acceptance into the M.A. program. Conditional admission with a grade point average of 2.5 may be considered under exceptional circumstances.

Features

The Humanities External Master's Degree program offers a fully accredited degree with no classroom attendance. The master's degree is earned by completing a curriculum of courses designed by CSU Dominguez Hills humanities professors and planning and writing a capstone thesis or project. Students have the option of designing independent studies to be guided by faculty. Some courses offer the opportunity for online instruction and engagement. The Humanities External degree is offered as a special sessions program. Admitted students pay the same per unit fee regardless of their geographic residence.

The Humanities External Master's Degree program was established in 1974 and has had students residing in all 50 states as well as many foreign countries. For four decades HUX has functioned as a university without walls.

Faculty

Matthew Luckett, Program Coordinator

The following is a partial listing of instructors who work most often with the program. Although most are full-time faculty in on-campus departments, we also utilize the talents of part-time and emeritus faculty whose years of experience and expertise teaching both on campus and through the humanities special sessions degree program make them an invaluable source of knowledge.

R. Iset Anuakan (History), Debra Best (Literature), Kimberly Bohman-Kalaja (Literature), Douglas Borcoman (Philosophy), David Bradfield (Music), Hanson Caldwell (Music), Anita Chang (Music), Patricia Cherin (Humanities and Literature), David Churchman (Behavioral Sciences), Robert Cubillos (Philosophy), William Cumiford (Philosophy), Bill DeLuca (Theatre Arts), Myrna C. Donahoe (Interdisciplinary Studies), Kirstin Ellsworth (Art), Bryan Feuer (Humanities), Kate Gale (English), Patricia Gamon (Art), Benito Gomez (Modern Languages), Jonathon Grasse (Music), Daniel Greenspan (Philosophy), Brian Gregor (Philosophy), Judson Grenier (History), William Hagan (Philosophy), Arthur Harshman (Art), Gilah Y. Hirsch (Art), Howard Holter (History), James Jeffers (History and Interdisciplinary Studies), Jim Keville (Art), Jane Lee (English), Donald Lewis (Philosophy), Jeb Middlebrook (Sociology), Ben Mijuskovic (Philosophy), Christopher Monty (History), Joanna Nacheff (Music), Helen Oesterheld (Literature), Linda Pomerantz (History), Abe C. Ravitz (Literature), Jacqueline Shannon (Music), Lyle E. Smith (Literature), Frank A. Stricker (History), Andrea White (English), Joanne J. Zitelli (Literature)

Courses

HUX 345. The Non-Western World: China and Japan. (3 Units)

Interdisciplinary study of the non-western world by focusing on some of the art, philosophy and music of China and Japan.
Offered Infrequent

HUX 346. Alienation, Estrangement, and Subcultures. (3 Units)

Survey of the elements and historical implications of alienation. Examination of Hispanic and African American cultures.
Offered Fall, Infrequent

HUX 347. Images of Humanity: World Religious Perspectives. (3 Units)

Survey of ancient and modern religious systems focusing upon general characteristics of religious belief.
Offered Spring

HUX 448. Val & Morality 20th Century. (3 Units)

Offered Infrequent

HUX 472. Key Persp: Phil. (3 Units)

Offered Infrequent

HUX 474. Age Of Revolution. (3 Units)

Offered Infrequent

HUX 500. Foundations of the Humanities. (3 Units)

Provides an overview of core ideas, research, and writing in the humanities. Traces the historical origins of humanistic ideals and examines the influence of these cultural ideals on human life across time, place and history.

Offered Fall

HUX 506. Introduction to the Humanities. (3 Units)

Provides a non-comprehensive overview of human culture, particularly literature, history, music and philosophy, with an emphasis on diverse cultural and national traditions as well as social justice and morality.

Offered Fall, Spring

HUX 507. Graduate Writing in the Humanities. (3 Units)

Teaches students how to communicate in the humanities through academic writing that is supported by primary and secondary sources. Students will explore a variety of subjects, including art, gender, labor, music and race, to understand the humanities.

Offered Fall

HUX 512. History and the Human Endeavor. (3 Units)

Explores how historians use a variety of documents to understand human thought and behavior. Students analyze and contextualize documents, find sources for their own projects and draw conclusions about the human experience in relation to cohort theme.

Offered Fall

HUX 513. Literature and the Human Experience. (3 Units)

Examines key literary works across a range of genres. Uses various literary methodologies such as structuralism, Marxism, cultural studies and postcolonial theory to explore the multiple ways literature impacts humanity.

Offered Fall

HUX 514. Music and Hearing Humanity. (3 Units)

Presents music as fundamental to human identity. Engaging hey works, students examine composers, popular movements, and music's rich meaning located through focused topics.

Offered Fall, Spring, Summer

HUX 515. Visual Expression and Humanity. (3 Units)

Special Topics course using nonstandard times and/or days to explore issues in the human behavior and attitudes. Repeatable course.

Offered Fall

HUX 516. Philosophy and Human Being. (3 Units)

Offers a philosophical examination of fundamental questions about being human, such as the good life, human nature, the mind/body relation, and the basis of personal identity. Specific attention will be devoted to the current cohort theme.

Offered Fall

HUX 521. Humanities Encounter: The Living Theatre. (3 Units)

How to recognize, appreciate and evaluate a variety of dramatic experiences. Requires extensive notebook of descriptions and analyses of five different types of theatrical performances. Three additional theatrical encounter descriptions and analyses required.

Offered Fall

HUX 522. Humanities Encounter: Concert Music. (3 Units)

Attendance and analysis of several concerts representing the general categories of symphonic, vocal and chamber music. Critical reviews required for each of four musical encounters. Reviews of two additional musical encounters required.

Offered Spring

HUX 523. Humanities Encounter: Historical Sites. (3 Units)

Exploring the historical roots of one's own community. Requires papers (including photographs) involving descriptions and analyses of three different historical sites. Papers on two additional sites required.

Offered Summer

HUX 524. Humanities Encounter: Film. (3 Units)

Watching and analyzing several films with special focus on the techniques and content of the medium. Requires extensive notebook of descriptions and analyses of five different film experiences. Three additional film experience descriptions and analyses required.

Offered Fall, Spring

HUX 525. Philosophy of Punishment. (3 Units)

Explores the theme of incarceration, including its historical roots, within advanced capitalist societies. We will study the writings of Foucault, Bentham, Gramsci, and other prominent commentators who focus critically on incarceration and living in a carceral society.

Offered Fall

HUX 526. Punishment and Popular Culture. (3 Units)

Students will reflect on an array of media sources to more deeply and critically understand popular culture's engagement with criminality and the justice system and to think about popular culture as a possible resource for criminal justice reform.

Offered Fall

HUX 527. History of American Punishment. (3 Units)

Covers the history of punishment in the United States from the 17th century through the present. Emphasizes historiography and the interconnection of different historical narratives and variables in creating the modern penal system.

Offered Fall

HUX 528. Modern Discipline. (3 Units)

Explores the contemporary manifestations of discipline through an interrogation of the diffuse nature of power. The interdisciplinary humanities texts here offer a reflection on the origins of disciplinary relationality (between the state, sovereign, and subject) and how their evolving relations are revealed in technologies of surveillance and security.

Offered Fall, Spring, Summer

HUX 533. Prisoner Movement and Theory. (3 Units)

An in-depth study of transnational social justice oriented prisoner movements. All assigned texts are written by incarcerated or formerly incarcerated peoples. Students will consider systemic roots of carceral violence while studying how incarcerated peoples have resisted and strategized for abolition.

Offered Fall, Spring, Summer

HUX 534. Race, Class and Gender. (3 Units)

Modeled after the traditional Ethnic Studies and Women's Studies course, this course offers an intersectional analysis of the law, policing, incarceration, and their function in stifling marginalized people from building together.

Offered Fall, Spring, Summer

HUX 535. Criminalization, Colonization, and Counterinsurgency. (0 Units)

Offers a historical perspective on the fluidity of criminalization and how it coalesces around specific bodies at different times to justify oppressive systems from colonization to gentrification.

Offered Fall, Spring, Summer

HUX 536. Abolitionist Futures. (3 Units)

Teases out the differences between liberal reform and abolition of prisons while exploring transformative justice, mutual aid, and how people are already working to eliminate the prison industrial complex.

Offered Fall, Spring, Summer

HUX 537. Building and Reforming the Industrial City in the United States. (3 Units)

An interdisciplinary study of cities in the United States from 1880-1920s, with a focus on the history, literature, art, and social movements of the time period. Topics include poverty, housing, labor, and legal reform, and the start of urban planning.

Offered Fall

HUX 538. Whose House Is It Anyway?: Settler Colonialism, Racial Capitalism, and the U.S. Housing Market. (3 Units)

Explores the settler colonial and racial capitalist roots of the U.S. housing market. Students will explore historical and contemporary housing policies and practices, examine empirical data on communities, and imagine how we can build an equitable housing market.

Offered Fall

HUX 539. Creating Communities: Contemporary Urban Planning and Community Development. (3 Units)

Critically assesses the role of urban planning in shaping communities. Students will examine how the regulation of the use of space impacts community formation and inequality, and how it can be used to create more equitable cities.

Offered Fall

HUX 541. The Rational Perspective. (3 Units)

The meaning of rationality from the perspectives of philosophy, history, literature, music, and art. Special emphasis on the possible differences between scientific and humanistic rationality.

Offered Summer

HUX 542. The Para-rational Perspective. (3 Units)

Interdisciplinary exploration of non-rational alternatives in modern culture, focusing on the nonlogical, the visionary, and the religious/mystical.

Offered Fall

HUX 543. The Autonomous Individual. (3 Units)

Interdisciplinary study of the nature of the creative act, including the following: the artist's vision of self; the defenses of personalism; notions of aesthetics and of symbolic thought.

Offered Infrequent

HUX 544. The Individual and Society. (3 Units)

Exploration of the position of the individual in the classic and modern models of social and political organization; conservatism, liberalism, socialism, anarchism; study of the Utopian tradition; and study of aesthetic theories that connect the artist with society.

Offered Infrequent

HUX 545. The Non-Western World. (3 Units)

Interdisciplinary examination of the non-western world by focusing on cultural characteristics of China and Japan.

Offered Infrequent

HUX 547. World Religious Perspectives. (3 Units)

A survey of ancient and modern religious systems, focusing upon an exploration of the general characteristics of religious beliefs.

Offered Summer

HUX 548. Values and Morality in Twentieth Century Thought. (3 Units)

An examination of values and morality in modern culture against a backdrop of seemingly amoral scientific and technological progress.

Offered Fall

HUX 556. Nobel Laureates: Studies in Modern World Literature. (3 Units)

Examination of representative major works by recent Nobel Laureates whose art epitomizes diverse cultural, literary, and social viewpoints. Authors include Mann, Pirandello, Camus, Kawabata, Solzhenitsyn, Neruda and Bellow.

Offered Spring, All terms

HUX 570. Key Periods and Movements, Art: Contemporary. (3 Units)

Exploration of the complex cultural development known as modern art by investigation of six major artistic movements: Cubism, Expressionism, Dada/Surrealism, Pop Art, Conceptual Art and Technological Art.

Offered Spring

HUX 572. Key Periods and Movements, Philosophy: The Biblical Movement. (3 Units)

Examination of modern scholarship on the Bible and its impact on Christianity; analysis of 3 types of Bible interpretation: Fundamentalism, liberalism and humanism.

Offered Spring

HUX 579. The Arab World: 600 AD to Present. (3 Units)

Prerequisite: HUX 501 is recommended. Political and cultural history of the Arab World from the 7th century to the present. Consideration of historiographic problems such as the "Great Man," cycles, and the influence of ideas on events.

Offered Spring

HUX 582. Seminar in History. (3 Units)

Students will learn and use historical practicum skills, including the proper use of primary sources and secondary source texts, to improve their understanding, to create sound argument, and to communicate thoughtfully about the past.

Offered Fall

HUX 586. Seminar in Philosophy. (3 Units)

Examines and evaluates a range of philosophical arguments on the current HUX cohort theme, giving students an opportunity to develop coherent positions on such philosophical issues as the nature of human existence, knowledge, ethical responsibility and human flourishing.

Offered Fall

HUX 590. Humanities Capstone. (3 Units)

This course is designed to enable students to demonstrate the integration of knowledge from various fields in the Humanities. In addition, the course launches students into their larger communities and offers them a deeper knowledge about the connection between systems of oppression, incarceration, and societal re-entry. This course is taken in the student's final semester.

Offered Fall, Spring

HUX 594A. Independent Study: Literature. (1-3 Units)

Prerequisites: Consent of instructor and program coordinator, via signed contract. Individually designed faculty-guided study of a topic in Literature, History, Philosophy, Music, Art, and Interdisciplinary topics. Repeatable for credit. A maximum of 9 units may be taken as Independent Study. No more than 6 units of Independent Study may be taken in one term.

Offered Fall, Spring

HUX 594B. Independent Study: History. (1-3 Units)

Prerequisites: Consent of instructor and program coordinator, via signed contract. Individually designed faculty-guided study of a topic in Literature, History, Philosophy, Music, Art, and Interdisciplinary topics. Repeatable for credit. A maximum of 9 units may be taken as Independent Study. No more than 6 units of Independent Study may be taken in one term.

Offered Spring

HUX 594C. Independent Study: Philosophy. (1-3 Units)

Prerequisites: Consent of instructor and program coordinator, via signed contract. Individually designed faculty-guided study of a topic in Literature, History, Philosophy, Music, Art, and Interdisciplinary topics. Repeatable for credit. A maximum of 9 units may be taken as Independent Study. No more than 6 units of Independent Study may be taken in one term.

Offered Spring, Summer

HUX 594D. Independent Study: Music. (1-3 Units)

Prerequisites: Consent of instructor and program coordinator, via signed contract. Individually designed faculty-guided study of a topic in Literature, History, Philosophy, Music, Art, and Interdisciplinary topics. Repeatable for credit. A maximum of 9 units may be taken as Independent Study. No more than 6 units of Independent Study may be taken in one term.

Offered Summer

HUX 594E. Independent Study: Art. (1-3 Units)

Prerequisites: Consent of instructor and program coordinator, via signed contract. Individually designed faculty-guided study of a topic in Literature, History, Philosophy, Music, Art, and Interdisciplinary topics. Repeatable for credit. A maximum of 9 units may be taken as Independent Study. No more than 6 units of Independent Study may be taken in one term.

Offered Spring, Summer

HUX 594F. Independent Study: Interdisc Topic. (1-3 Units)

Prerequisites: Consent of instructor and program coordinator, via signed contract. Individually designed faculty-guided study of a topic in Literature, History, Philosophy, Music, Art, and Interdisciplinary topics. Repeatable for credit. A maximum of 9 units may be taken as Independent Study. No more than 6 units of Independent Study may be taken in one term.

Offered Fall

HUX 595. Special Topics in the Humanities. (3 Units)

Prerequisite: Consent of program coordinator. Concentrated study of a specialized area in the Humanities on a selected topic of particular interest to faculty and students.

Offered As needed

HUX 598S. Final Project Proposal. (1 Units)

Prerequisites: Completion of Phases I and II; consent of instructor and program coordinator via signed contract. Required of all HUX M.A. students. Must be passed with grade of A-B before registering for Final Project (HUX 599).

Offered Fall, Spring, Summer

HUX 599A. Final Project: Thesis. (4-6 Units)

Prerequisites: Completion of Phases I and II; consent of instructor and program coordinator via signed contract. An individually planned project based on course work taken in the program and involving basic research in a single discipline or an interdisciplinary topic. Supervised Thesis (599A) or Creative Project (599B).

Offered Fall, Spring, Summer

HUX 599B. Final Proj: Creative Project. (4-6 Units)

Prerequisites: Completion of Phases I and II; consent of instructor and program coordinator via signed contract. An individually planned project based on course work taken in the program and involving basic research in a single discipline or an interdisciplinary topic. Supervised Thesis (599A) or Creative Project (599B).

Offered Fall, Spring, Summer

HUX 600. Graduate Continuation Course. (1 Units)

Graduate students who have completed their course work but not their thesis or project, or who have other requirements remaining for the completion of their degree, must maintain continuous attendance by enrolling in this course. May be taken only after Advancement to Candidacy and for a maximum of 3 times.

Offered Fall, Spring, Summer

Humanities External, Master of Arts Admission Requirements

The minimum requirements for admission to graduate and post-baccalaureate studies at a California State University campus are in accordance with University regulations as well as Title 5, Chapter 1, Subchapter 3 of the California Code of Regulations.

Specifically, a student shall at the time of enrollment:

1. have completed a four-year college course of study and hold an acceptable baccalaureate degree from an institution accredited by a regional accrediting association, or shall have completed equivalent academic preparation as determined by appropriate campus authorities;
2. be in good academic standing at the last college or university attended;
3. have earned a grade point average of at least 2.5 on the last degree completed by the candidate or have attained a grade point average of at least 2.5 (A=4.0) in the last 60 semester (90 quarter) units attempted; and
4. satisfactorily meet the professional, personal, and other standards for graduate study, including qualifying examinations, as appropriate campus authorities may prescribe.

Students who meet the minimum requirements for graduate studies may be considered for admission in either the Classified or Conditionally Classified standing:

- **Graduate Classified** - to pursue a graduate degree, applicants are required to fulfill all of the professional, personal, scholastic, and other standards, including qualifying examinations prescribed by the campus; or
- **Graduate Conditionally Classified** - Applicants may be admitted to a graduate degree program in this category if, in the opinion of appropriate campus authority, deficiencies may be remedied by additional preparation.

Only students who are currently incarcerated may apply to the program at this time.

Admission Procedures

1. Submit a paper application. Applications may be obtained through the HUX office.
2. Upon receiving and evaluating all eligible paper applications, HUX will then select a round of qualified candidates and invite them to

complete a CSU Apply paper application. Applicants will then pay the \$70.00 non-refundable application fee and submit all required transcripts to the HUX program director.

Mailing address:

California State University, Dominguez Hills
Attention: HUX Applications
1000 E. Victoria Street - North Library 5090
Carson, CA 90747

1. During the first two trimesters after admission, students must fulfill the Graduate Writing Assessment Requirement with a score of eight or better on the Graduate Writing Examination (GWE). The GWE may be repeated one time

Graduation Requirements

1. A minimum of 30-semester units.
2. Not fewer than 21 semester units completed in residency within the program. At the discretion of the program coordinator, a maximum of nine semester units of applicable graduate work may be transferred into the program.
3. An overall grade point average of 3.00 or better.
4. Passing grade on the Humanities Master of Arts in Humanities "Advancement to Candidacy" Examination, which is taken after 16 semester units in the program have been completed.
5. All course work taken in the master's degree program must be completed within the five academic years immediately preceding the date of graduation. Outdated course work completed no more than seven academic years immediately preceding the date of graduation is eligible for validation. Validation of outdated course work may be requested from the University Graduate Studies Office through the HUX Program Coordinator. The request must be accompanied by a Petition for Outdated Coursework Validation for Graduate Program from the program Coordinator that verifies that the student has demonstrated relevant knowledge and skills via an approved method of validation, such as written work or examination.
6. In addition to the major requirements, students must meet all university requirements for the master's degree. Students should consult the section of the catalog entitled "Graduate Degrees and Postbaccalaureate Studies."

Requirements

Requirements (30 units)

During the first semester of the program, students will take two required courses that help establish the scope of the humanities as a constellation of diverse academic and creative disciplines while preparing students to write at a graduate level. In the spring, students will select classes in one of three or more available "blocks." Each block presents four or more different courses that approach a common theme from multiple disciplinary and subject matter perspectives. Students must complete four classes within a single block, as well as, three other classes in one or more of the other available blocks. Students will complete a capstone project, generally during the second semester of their second year, or upon the completion of at least 21 units.

| Code | Title | Hours |
|---------|------------------------------------|-------|
| HUX 506 | Introduction to the Humanities | 3 |
| HUX 507 | Graduate Writing in the Humanities | 3 |
| HUX 590 | Humanities Capstone | 3 |

Blocks: Choose a thematic block and complete four classes within that block (12 units)

Block A: Perspectives on Punishment

| | |
|---------|--------------------------------|
| HUX 525 | Philosophy of Punishment |
| HUX 526 | Punishment and Popular Culture |
| HUX 527 | History of American Punishment |
| HUX 528 | Modern Discipline |

Block B: Abolition and Liberation

| | |
|---------|--|
| HUX 533 | Prisoner Movement and Theory |
| HUX 534 | Race, Class and Gender |
| HUX 535 | Criminalization, Colonization, and Counterinsurgency |
| HUX 536 | Abolitionist Futures |

Block C: Religion Morality and Spirituality (choose four courses)

| | |
|---------|--|
| HUX 541 | The Rational Perspective |
| HUX 542 | The Para-rational Perspective |
| HUX 547 | World Religious Perspectives |
| HUX 548 | Values and Morality in Twentieth Century Thought |
| HUX 572 | Key Periods and Movements, Philosophy: The Biblical Movement |
| HUX 579 | The Arab World: 600 AD to Present |

Block D: Expanding Horizons (Choose four courses)

| | |
|---------|---|
| HUX 521 | Humanities Encounter: The Living Theatre |
| HUX 522 | Humanities Encounter: Concert Music |
| HUX 524 | Humanities Encounter: Film |
| HUX 545 | The Non-Western World |
| HUX 556 | Nobel Laureates: Studies in Modern World Literature |
| HUX 570 | Key Periods and Movements, Art: Contemporary |

Block E: Urban Development

| | |
|---------|--|

| HUX 539 | Creating Communities: Contemporary Urban Planning and Community Development |
| HUX 582 | Seminar in History |

Electives

Choose three courses from any of the remaining blocks or the following (9 units)

| | |
|----------|------------------------------------|
| HUX 594A | Independent Study: Literature |
| HUX 594B | Independent Study: History |
| HUX 594C | Independent Study: Philosophy |
| HUX 594D | Independent Study: Music |
| HUX 594E | Independent Study: Art |
| HUX 594F | Independent Study: Interdisc Topic |
| HUX 595 | Special Topics in the Humanities |

- Examine critically a broad spectrum of texts and cultural artifacts in humanities disciplines through analysis of primary and secondary resources.
- Apply framework for organizing cultural knowledge using traditional and contemporary theoretical approaches from selected humanities disciplines.

- Compare and evaluate texts and historical events from diverse cultural and national traditions using disciplinary and interdisciplinary methods.
- Identify the applicability of rhetoric and critical thinking to both academic and non-academic situation in life and work.
- Evaluate and research strategies using electronic and/or print media to refine understanding of key question and issues.
- Interrogate the humanities to develop practicable notion of ethical values and social justice.
- Apply knowledge and values derived from the humanities to benefit communities: institutional, local, regional, and global.
- Explain the role of imagination and creativity of humanities.
- Explain human experience from multiple, diverse perspectives, including those that may challenge one's established assumptions.
- Identify and articulate how the degree is directly applicable to valued labor and to specific kinds of employment.

Information Technology

College of Natural and Behavioral and Sciences
Department of Computer Science

Program Description

Information Technology forms the technological infrastructure of modern commerce. It's the driving force of every industry and permeates everyday life. The ability to combine the power of computing with the management of multimedia information is arguable the key to obtaining ascendancy in any field.

Information Technology is an ever-evolving, expanding field. The Information Technology Program will provide students with the background, knowledge, and skills they will need to adapt to the dynamic nature of the marketplace.

The BSIT degree provides a high-quality science degree program in information technology that will prepare the student for lifelong learning as they pursue professional careers in informational technology and leadership roles in the society in which they serve. It provides our students with a strong foundational base, state-of-the-art techniques, methodologies, and tools to specify, design, and develop technology-based solutions to complex system problems. This program prepares our students to communicate well, both orally and in writing, on moral and ethical development, in the knowledge of the liberal arts, and on the commitment to services to others. IT provides opportunities for students to contribute to the body of knowledge that serves the profession, by engaging in activities that support their interests and are in agreement with the goals and objectives of the College, and the university.

Features

The University's location in the South Bay area of greater Los Angeles provides direct access to many major government contractors, manufacturers, and international centers of commerce and finance. This provides excellent opportunities for work-study and early job placement.

Our highly qualified full-time faculty are supplemented by talented and dedicated part-time faculty drawn from local firms and schools. Good teaching and easy on-campus access to professional quality computing systems enhance a degree program that provides both a solid core curriculum and a broad range of electives.

All courses are offered alternatively day and evening so that students may complete their programs by enrolling at either time exclusively.

Graduation with Honors

An undergraduate student may be a candidate for graduation with Honors in Information Technology provided he or she meets the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills at least 24 of which taken in Computer Science major;
2. A minimum GPA of 3.5 in all upper division courses in the Computer Science major completed in residence at CSUDH;

Students who achieve Honors in Information Technology will have the information recorded on their transcripts and diplomas.

Academic Advisement

Faculty guidance in the development of career goals and program planning to achieve those goals is available to all majors.

Preparation

Students entering the Information Technology program should have completed high school mathematics through trigonometry. Remediation is available but will delay the student's progress toward an Information Technology degree.

This is a program that places a premium on the student's initiative and effort.

Student Organizations

Contact departmental office for membership information, or visit the websites:

Association for Computing Machinery (ACM) ACM@csudh.edu

Institute of Electrical and Electronics Engineers (IEEE) IEEE@csudh.edu

Cyber Security CyberSec@csudh.edu

Computing Alliance of Hispanic-Serving Institutions (CAHSI)

CAHSI@csudh.edu

Career Possibilities

Bachelor of Science in Information Technology is a comprehensive program that is intended to provide students with the technology based skill set required immediately after degree completion to enter the workforce or a graduate program. Feedback and letters of support from members of our Industry Advisory Board indicate the need for professionals with the balance of practical and theoretical knowledge that extends beyond conventional information technology curricula.

Courses

ITC 101. Introduction to Information Technology. (3 Units)

Designed to introduce the fundamentals of information technology.

This includes, introduction to a variety of computer tools and computer concepts with an emphasis on information technology

Offered Fall, Spring

ITC 251. System Programming in C and Unix. (3 Units)

Prerequisite: CSC 121 is required. Provides a substantial exposure to the C programming language and the Unix programming environment for students with some prior programming experience but minimal exposure to C.

Offered Fall, Spring

ITC 300. Security in a Digital Society. (3 Units)

This course provides students with an understanding of what is involved in the journey of positioning the computer, security, privacy, internet, and cloud as a valuable service provide to the business and personal life of the digital society.

Offered Fall, Spring

ITC 310. IT Project Management. (3 Units)

Prerequisite: CSC 301 is required. Aims to provide students with the basic skills, knowledge and competence to effectively understand and manage information technology projects. This course prepares students to gain a practical and theoretical foundation for managing IT projects.

Offered Fall, Spring

ITC 395. Selected Topics in Information Technology. (1-3 Units)

Prerequisite: Consent of Instructor. Content varies. Topics in computer technology not covered by current course offerings. May be used for elective credit in departmental programs. Subject to approval.

Offered As needed

ITC 399. IT Practicum. (3 Units)

Prerequisite: Consent of instructor is required. The information technology internship program allows students to gain hands-on experience in a technology environment by spending one semester as an intern in the Information Technology Division or a related area. The internship program provides students with the opportunity to gain technical experience related to their studies and to prepare them for future career opportunities in the field. CR/NC grading only.

Offered Fall, Spring

ITC 453. Database Management Systems (DBMS). (3 Units)

Prerequisite: CSC 311 is required. Covers the design methodology process for databases and how to verify its structural correctness. Students will learn how to implement databases and applications software, primarily in the relational model. This is through using querying languages, primarily SQL, and other database supporting software; and applying the theory behind various database models and query languages. It also includes implementing security and integrity policies relating to databases working in group settings during design.

Offered Fall, Spring

ITC 459. IT Security. (3 Units)

Prerequisite: CSC 311 or consent of instructor is required. Information Technology Security aims at securing systems that remain dependable in the face of malice, error or mischance. This course covers a number of principles, methods, tools and good practices to secure systems.

Offered Fall, Spring

ITC 492. Senior Design. (3 Units)

Prerequisite: ITC 453 is required. Intensive study under the guidance of a member of the Information Technology (IT) faculty to complete a research project from start to end. Students will study system design and total project planning and management. A formal written report and oral presentation will be required.

Offered Fall, Spring

Information Technology, Bachelor of Science

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major, no minor required.

Major Requirements (73 units)

Students entering the Information Technology program must complete the following:

1. Earn an overall grade point average of 2.0 or better in courses taken outside of the department;
2. Earn a grade of "C" or better in each course taken within the department;
3. Students must take capstone course ITC 492 Senior Design at CSUDH.

The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

| Code | Title | Hours |
|------------------------------------|---|-------|
| Lower Division Requirements | | |
| ITC 101 | Introduction to Information Technology | 3 |
| CSC 121 | Introduction to Computer Science and Programming I | 4 |
| CSC 123 | Introduction to Computer Science and Programming II | 4 |

| | | |
|---|--|-----------|
| ITC 251 | System Programming in C and Unix | 3 |

Interdisciplinary Studies

College of Arts and Humanities
Department of Interdisciplinary Studies

Program Description

Interdisciplinary Studies (IDS) is a broad-based, liberal arts and sciences major that focuses on developing exemplary skills in written and oral communication, textual analysis, critical thinking, research methods, and the ability to bring a wide range of resources to bear in approaching complex problems. Because it combines knowledge systems across the meta-disciplines of the Humanities, Social Sciences, and Natural Sciences, an IDS major is great preparation for both the workplace and for entry into graduate or professional schools. IDS is part of a national network of Programs for Accelerated College Education (PACE) that are designed for working, adult students who want to earn a bachelor's degree in a reasonable period of time while they maintain a full-time job. While all admitted students are welcome, IDS/PACE students are primarily transfers who enter CSUDH with 60 units and junior-class standing.

Features

IDS/PACE offers major concentrations in four areas of study: American Studies, Comparative Cultures, Environmental Studies, and Global Studies. As a PACE program, IDS courses are scheduled at times that function well for working people, including week nights and weekends, as well as in hybrid and online formats. For students whose schedules require that they attend classes only on the weekends, IDS offers a full Weekend College format.

Academic Advising

Interdisciplinary Studies provides each student with a faculty advisor, a person who will assist the student in choosing classes, in defining a direction for the program of studies, and in coping with problems associated with both traditional and nontraditional areas of university life. The faculty advisor will expect to meet with each of his or her students at least once each semester to discuss progress-to-date and to plan the next semester's course of study. Students are encouraged to see their mentors more often during the school year as problems, concerns and new ideas arise.

Preparation

While an associate of arts degree before entering IDS/PACE is not necessary, we advise you to complete most of your lower division General Education requirements before transferring. Applicants will qualify for admission to IDS/PACE if they have completed 60 transferable semester units, have a grade point average of "C" (2.0) or better and have completed the General Education Basic Skills courses (The "Golden Four:" Speech, Composition, Critical Thinking, and a transferable math) with grades of "C-" or better. The maximum number of transferable units from

a community college is 70 semester units. Always check the University Catalog for current transfer requirements.

IDS/PACE is open to all students who are admitted to the University. Working students who find that the regular programs of the campus do not meet their specific needs should contact the IDS/PACE Office for an appointment with a faculty advisor.

Graduation With Honors

An undergraduate student may be a candidate for graduation with Honors in Interdisciplinary Studies provided he or she meets the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of at least 3.5 in all courses used to satisfy the upper division requirements in the major.

Career Possibilities and Graduate School

With its focus on critical thinking and writing and comprehensive course offerings, IDS/PACE graduates have the skills and knowledge to promote in workplace and successfully pursue graduate school. Our graduates have gone on to attend graduate school in Social Work, Public Health, English, Psychology, Public Administration, Business, Museum Studies, and Law.

Undergraduate Programs

Bachelor

- Interdisciplinary Studies, Bachelor of Arts (p. 619)

Minor

- Environmental Studies, Minor (p. 617)
- Global Studies, Minor (p. 617)
- Interdisciplinary Studies, Minor (p. 623)

Faculty

Anne Choi, Department Chair
Jenny Hall, Patricia Kalayjian, Annemarie Perez, Vivian Price

Program Office: SCC 130, (310) 243-3649, (310) 243-3640

Emeriti Faculty

Patricia Cherin, Myrna C. Donahoe, Catherine Jacobs

Courses

IDS 210. Introduction to Environmental Studies. (3 Units)

Provides students with an overview of environmental philosophy, policy, and literature examining a range of interrelated social and scientific aspects of ecological, socioeconomic, political, aesthetic, and technological factors that influence the quality of life on earth. Offered Fall, Spring, Summer

IDS 255. Lang & Meth Of Sci (PACE). (3 Units)

Offered Infrequent

IDS 295. Special Topics in Interdisciplinary Studies. (3 Units)

A broad study of an issue or a concept in Interdisciplinary Studies that is of special interest to faculty and students. Topics vary (e.g., Special Topics: Labor and the Environment, Environmental Ethics, Global Sustainability; Environmental Literature; Water in the American West). Repeatable course. Three hours of lecture per week.
Offered Fall

IDS 300. Introduction to Interdisciplinary Studies. (3 Units)

Provides an introduction to the theories and practices of interdisciplinary studies in humanities, social sciences, and natural sciences. Course includes research methods, writing for the various disciplines, and development of analytical and synthesizing skills necessary for success in Interdisciplinary Studies.
Offered Fall

IDS 304. Issues in Global Studies. (3 Units)

Explores issues confronting our global community by employing multi-disciplinary, transnational, and post colonial approaches; examines how global studies is defined and its impact historically and currently; acquaints students with regional concerns as distinct from and contributing to global issues.
Offered Fall, Spring

IDS 310. Global Climate Change. (3 Units)

Examines the history of climate science and how acceptance and denial of science impacts the geopolitical landscape, including personal, regional, national, and global responsibility to implement a transition to a just and sustainable future on a finite planet.
Offered Fall, Spring

IDS 312. Interdisciplinary Approaches to the Humanities. (3 Units)

Each topic for this course examines an important issue in the Humanities, using a methodology incorporating multiple disciplines and placing the content in a historical and cultural context.
Offered Fall, Spring

IDS 318. Interdisciplinary Approach to Cultural Pluralism. (3 Units)

Each topic for this course examines an important social issue in the Social Sciences, using a methodology incorporating multidisciplinary approaches, cultural diversity, and social interaction. Repeatable for credit with different topics.
Offered Fall, Spring

IDS 320. Interdisciplinary Topics in Human Studies. (3 Units)

Provides an in-depth study of a topic in human behavior and attitudes. The topic will be examined using interdisciplinary perspectives. Examples of topics include class and careers, immigration and cultural impact and poverty. Repeatable course. Three hours of seminar per week.
Offered Fall, Spring, All terms

IDS 321. Global Los Angeles. (3 Units)

How does a locality - Los Angeles - become identifiable as a global city? One aspect of LA's global status is its diverse population, but other influences include international trade, economic interests, popular culture, environmental entanglements, among many interrelated globalizing factors.
Offered Fall, Spring

IDS 322. Transnational Stories. (3 Units)

Using literature, film, and other visual and narrative forms, course explores the differences and commonalities of representation in the works of the human imagination in a global and historical context.
Offered Fall, Spring

IDS 325. Global Gender and Sexuality. (3 Units)

Examines the emergence and development of lesbian, gay, bisexual, transgender rights movements around the world. Course themes include the intersectionalities of race/ethnicity and class with gender and sexuality; the dynamic nature of identity; and cultural, political, religious, and historical contexts.
Offered Fall, Spring

IDS 326. Perspectives In Human Studies. (3 Units)

Special Topics course using nonstandard times and/or days to explore issues in the human behavior and attitudes. Repeatable course.
Offered Fall, Spring, All terms

IDS 330. Interdisciplinary Topics in Civilizations. (3 Units)

Provides an in-depth analysis of a major topic in the history of ideas and institutions through the study of the topic in relation to the disciplines relevant to the topic. Sample topics include archetypal patterns in literature and history of modern thought. Repeatable course.
Offered Fall, Spring, Summer, All terms

IDS 332. Global Conflict and Cooperation. (3 Units)

Using social science methods and providing an historical context, course explores ways in which globalization may generate social, political, economic, or environmental pressures and conflicts as well as elicit and even enable cooperation among individuals, localities, regions, and nations.
Offered Fall, Spring

IDS 336. American Studies in the Humanities. (3 Units)

Provides an in-depth analysis of an issue, region, perspective, or historical era of the United States from a comparative, multidisciplinary humanities perspective. Courses incorporate some of the following disciplines: literature, history, film, philosophy, art, and drama. Repeatable with different topics.
Offered Fall, Spring, All terms

IDS 340. Interdisc Perspectives. (3 Units)

Offered Infrequent

IDS 341. Developing a Digital Professional Identity. (1 Units)

Introduces writing concepts critical to transitioning into a professional writing practice. Students will learn to recognize and apply patterns of writing in professional settings. Students will assess and synthesize organizational information and compose digital compositions for public facing content.
Offered Fall, Spring

IDS 350. Interdisciplinary Topics in Environmental Studies. (3 Units)

Provides an in-depth examination of major concepts in environmental science, including ecology, evolution, diseases, loss of biodiversity, global warming, and the public policies needed to address complex contemporary problems. Courses involve methods of scientific inquiry. Repeatable with different topics.
Offered Fall, Spring

IDS 353. California Ecosystems. (3 Units)

This course will examine the diversity of California's ecosystems historically and the ways they have influenced and responded to human activities. It will also explore the current crisis that these ecosystems face due to climate change.
Offered Fall

IDS 360. Special Studies in Civilizations. (1-3 Units)

Prerequisites: Upper division status and permission of instructor. This course will investigate one or more special topics in Western and/or Non Western civilizations. Instruction will usually include off-campus activity such as, but not limited to, foreign travel. Repeatable course
Offered Infrequent

IDS 395. Special Topics. (1-3 Units)

Intensive study of a particular aspect of interdisciplinarity. Topic may provide the opportunity to pursue a creative endeavor in a seminar setting. Repeatable for credit. Exact topic will be listed in the class schedule.

Offered As needed

IDS 397. Writing Adjunct. (2 Units)

Prerequisites: ENG 108/109 or ENG 110 required. IDS 397 and IDS 398 are two linked courses that provide the opportunity for students to develop a writing practice that allows them to situate themselves as writers, readers, and students within broader disciplinary conversations.

Students will become fluent readers and writers across a variety of disciplines as they establish a writing practice. Students will learn and apply theories and scholarship from a variety of disciplines in order to write original essays and/or research projects. At the end of the IDS 397, students will create a writing portfolio to document the transformation of their writing. Students are welcome to take IDS 397 as a stand-alone course for writing support. To fulfill the GVAR requirement, students must take IDS 397 and IDS 398.

Offered Fall, Spring

IDS 398. Writing Adjunct (Competency Certification). (2 Units)

Prerequisite: IDS 397. IDS 397 and IDS 398 are two linked courses that provide the opportunity for students to develop a writing practice that allows them to situate themselves as writers, readers, and students within broader disciplinary conversations. Students will become fluent readers and writers across a variety of disciplines as they establish a writing practice. Students will learn and apply theories and scholarship from a variety of disciplines in order to write original essays and/or research projects. At the end of the IDS 398 students will create a writing portfolio to document the transformation of their writing. When both IDS 397 and IDS 398 are taken, the two courses fulfill GVAR.

Offered Fall, Spring

IDS 490. Interdisciplinary Studies Senior Seminar. (3 Units)

Students draw from their interdisciplinary perspectives and methodologies to address contemporary issues and review and apply theories and information from previous classes. A grade of C or better in this course fulfills the GVAR requirement for all Interdisciplinary Studies majors.

Offered Infrequent

IDS 491. Thematic Proj Proposal. (1 Units)

Prerequisite: Consent of instructor. Supervised development of a proposal which describes the Thematic Project. Proposal will define a problem, outline means to solve problem and describe the final product resulting from the project. Completed proposal contain advisor's justification and will be approved by committee. CR/NC grading.

Offered Fall, Spring

IDS 492. Thematic Proj Fieldwork. (1-4 Units)

Prerequisite: Consent of instructor. Supervised activity in fieldwork and/or research necessary to carry through a thematic project. Repeatable course.

Offered Infrequent

IDS 493. Them Proj:Final Product. (1-4 Units)

Prerequisite: Consent of instructor. Supervised activity in preparation of the final product necessary to carry through a thematic project.

Repeatable course.

Offered Infrequent

IDS 494. Independent Study. (2-15 Units)

Independent pursuit of a topic or project which is proposed by the student. Study must be interdisciplinary and must be approved, in advance, by faculty member supervising study. Repeatable course.

Offered Infrequent

IDS 498. Directed Research. (1-3 Units)

Prerequisite: Consent of instructor. The student develops and completes an individual study under faculty supervision. Repeatable course.

Offered Infrequent

Environmental Studies, Minor Requirements

The Minor in Environmental Studies consists of a minimum of 15 semester units of courses which must form an integrated theme in Environmental Studies.

Global Studies, Minor

A Global Studies Minor requires 18 units, of which a minimum of 12 units must be upper division coursework; at least 6 units of the minor must have the IDS prefix. Courses that fulfill General Education requirements may be double-counted for the minor. In addition to the single required courses, IDS 304 Issues in Global Studies, students who minor in Global Studies must take two courses (6 units) that focus on a single geographic region, one course (3 units) in Global Arts and Cultures, and two courses (6 units) in the study of a single global issue. All courses included as elective options are 3 units each.

A Global Studies Minor requires 18 units, of which a minimum of 12 units must be upper division coursework; at least 6 units of the minor must have the IDS prefix. Courses that fulfill General Education requirements may be double-counted for the minor. In addition to the single required courses, IDS 304 Issues in Global Studies, students who minor in Global Studies must take two courses (6 units) that focus on a single geographic region, one course (3 units) in Global Arts and Cultures, and two courses (6 units) in the study of a single global issue. All courses included as elective options are 3 units each.

Requirements

| Code | Title | Hours |
|---|--|-------|
| Geographical Area | | |
| Select two courses from one of the following geographic regions: ¹ | | 6 |
| The Americas: | | |
| CHS 100 | Chicana/o Cultural Roots | |
| AFS 311 | Afro Latinidad & the Caribbean | |
| ANT 333 | Ancient Peoples Of Mexico | |
| ANT 334 | Mesoamerica Past and Present | |
| ANT 342 | South America | |
| CHS 345 | Latina/o Identities in the Americas | |
| HIS 366 | Colonial Latin America | |
| HIS 367 | Modern Latin America | |
| IDS 318 | Interdisciplinary Approach to Cultural Pluralism | |

| | | |

Total Hours **18**

¹ Up to 6 units in the Geographical Area may be fulfilled by Study Abroad. Please consult only with the Global Studies minor advisor for evaluation.

² Other intermediate-level modern language courses (e.g., French, Japanese, Arabic) may be used to fulfill this requirement.

*Lower division coursework (100-200 level) is limited to no more than 6 units of the 18 required for the minor. Some lower division courses for the minor also fulfill General Education requirements

Interdisciplinary Studies, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major, no minor required.

Major Requirements (45 units)

Each Area of Concentration consists of a minimum of 45 semester units that are grouped in a unique structure.

Common to each of the Areas of Concentration is the following:

- Every IDS major is required to take IDS 300 Introduction to Interdisciplinary Studies during the student's first academic year in the major; each major is required to take a Senior Seminar, IDS 490 Interdisciplinary Studies Senior Seminar, in their final academic year in the major;
- There must be a minimum of 39 semester units of upper division course work, including the introductory course (IDS 300 Introduction to Interdisciplinary Studies) and Senior Seminar (IDS 490 Interdisciplinary Studies Senior Seminar);
- A minimum of 21 semester units of courses used to fulfill the Area of Concentration must be appropriate Interdisciplinary Studies courses;
- A minimum of 24 units of course work must be completed after the student has entered the Interdisciplinary Studies program and has agreed on the Area of Concentration with his/her Interdisciplinary Studies mentor;
- A minimum of nine semester units selected from each of three main areas of humanities, social sciences and natural sciences;
- A grade of "C" or better is required for all courses used to complete an Interdisciplinary Studies Area of Concentration; The completed program is then reviewed by the core faculty of Interdisciplinary Studies who must approve the program before it is submitted to meet graduation requirements.

Area of Concentration in American Studies (45 units)

| Code | Title | Hours |
|---------|---|-------|
| IDS 300 | Introduction to Interdisciplinary Studies | 3 |
| IDS 490 | Interdisciplinary Studies Senior Seminar | 3 |

Select 27 semester units of courses, with assistance of a faculty member, that form a closely related cluster or sequence of courses that cross the lines of several disciplines and provide a focused, interdisciplinary study of the United States from a variety of perspectives from multiple time periods

Select 12 semester units of courses that may relate less directly to the Area of Concentration with the assistance of a faculty mentor.

Total Hours 45

Area of Concentration in Comparative Cultures (45 units)

| Code | Title | Hours |
|---------|---|-------|
| IDS 300 | Introduction to Interdisciplinary Studies | 3 |
| IDS 490 | Interdisciplinary Studies Senior Seminar | 3 |

Select 27 semester units of courses, with assistance of a faculty member, that form a closely related cluster or sequence of courses that cross the lines of several disciplines and provide a focused, interdisciplinary study that compares and contrasts cultures across various borders - such as those of time, social institutions, and geography

Select 12 semester units of courses that may relate less directly to the Area of Concentration with the assistance of a faculty mentor.

Total Hours 45

Area of Concentration in Environmental Studies (45 units)

| Code | Title | Hours |
|---------|---|-------|
| IDS 300 | Introduction to Interdisciplinary Studies | 3 |
| IDS 490 | Interdisciplinary Studies Senior Seminar | 3 |

Select at least 21 semester units are chosen principally from the natural sciences, providing a focused Area of Concentration in Environmental Studies.

Select 18 semester units of courses that may relate less directly to the Area of Concentration with the assistance of a faculty mentor.

Total Hours 45

Area of Concentration in Global Studies (45 units)

| Code | Title | Hours |
|---------|---|-------|
| IDS 300 | Introduction to Interdisciplinary Studies | 3 |
| IDS 490 | Interdisciplinary Studies Senior Seminar | 3 |

Select 27 semester units of courses, with assistance of a faculty member, that form a closely related cluster or sequence of courses that cross the lines of several disciplines and provide a focused, interdisciplinary study of the complex relationships that underpin today's global economy.

Select 12 semester units of courses that may relate less directly to the Area of Concentration with the assistance of a faculty mentor.

Total Hours 45

Program Learning Outcomes

Upon completion of the Bachelor of Arts in Interdisciplinary Studies, a degree recipient will be able to:

- Read, analyze and interpret effectively varied sources of information, such as scientific data and research conclusions; literary, philosophical, historical, visual, and theoretical texts; and social, cultural, and political findings
- Write with clarity, organization, and precision in a variety of modes (argument, analysis, synthesis).

- Speak publicly in formal and informal settings, presenting information that is well-organized, accurate, and instructive.
- Exhibit computer and information literacy, including the skills to research with discrimination diverse topics using both the traditional library and other resources.
- Integrate information from a range of disciplines into complex problem-solving techniques that are transferable from one context to another.
- Demonstrate an understanding and appreciation of both the diversity and the multicultural heritage of our society and community.

Interdisciplinary Studies, Minor Requirements

Interdisciplinary Studies offers four minors, plus a Thematic Project, which may serve in lieu of a required minor. All minors require a minimum of 15 semester units, at least six units of which must be from Interdisciplinary Studies Courses, and at least 12 units of which must be upper division. Upon completion of an Interdisciplinary Studies Minor, students must develop a short essay that explains the thematic rationale used to develop the minor. Each student's minor is reviewed and approved by Interdisciplinary Studies core faculty prior to submission to meet graduation requirements.

At least three of the courses (9 units) used by the student to complete the minor must be taken after the student has chosen the minor and has been advised by an Interdisciplinary Studies mentor.

A grade of "C" or better is required for all courses used in Interdisciplinary Studies minors.

Japanese

College of Arts and Humanities
Department of Modern Languages

Features

The offerings in Japanese include elementary Japanese language and conversation courses. These courses are ideal choices for students minoring in Asian-Pacific Studies, as well as for those students interested in learning a non-European language.

Academic Advising

The Department of Modern Languages is eager to provide all its students with the advisement they will need to continue their studies in a foreign language. An advisor can be particularly helpful in choosing the Japanese course best suited to the background and needs of each student.

Students are urged to see an advisor upon admission, upon completion of 60 semester units, and during the first semester of their senior year.

Academic advisors may refer their students to other student services when appropriate.

Faculty

Benito Gomez, Department Chair
Sachi Johnston Katagiri
Department Office (Modern Languages): LCH C-308, (310) 243-3315

Courses

JPN 110. Beginning Japanese I. (3 Units)

An intensive audio-lingual approach to modern spoken Japanese for students who have no previous work in Japanese (with Japanese progressively replacing English as the medium of classroom communication).

Offered Fall, All terms

JPN 111. Beginning Japanese II. (3 Units)

Prerequisite: JPN 110 or equivalent. A continuation of Japanese 110. Introduction of Hiragana and Kanji (characters) gradually during the semester; elementary reading exercises accompany the spoken language materials.

Offered Spring

JPN 230. Japanese Conversation. (3 Units)

Prerequisite: One year of Japanese or consent of instructor. Speaking proficiency in standard modern Japanese. Practice through dialogue and individual presentations to develop fluency for personal, commercial, and cultural activities. May be repeated to a maximum of 6 units. Repeatable course.

Offered Infrequent

Journalism

College of Arts and Humanities
Department of Communications

Program Description

The Bachelor of Arts in Journalism degree program is dedicated to high standards in journalistic practices, skills, and specializations with a strong focus on analytical reasoning, critical thinking and problem solving. Through innovative teaching practices, the program provides a broad-based curriculum designed to promote news and information literacy; proficiency in the various journalistic forms and styles; an understanding of the new media landscape; and information dissemination practices through contemporary and emerging media tools. The program is committed to freedom of the press, freedom of expression, freedom of inquiry, and the questioning of dominant institutional practices and ideologies. It encourages dedication to ethical practices including truth, accuracy, fairness, diversity, inclusivity, and independence. Students seeking careers in digital, broadcast, print, and contemporary news media will complete the program proficient in journalistic practices including writing, research, reporting, interviewing, editing, and publishing across multiple platforms. Students will demonstrate an understanding of the technological, professional, and economic changes that transform the industry through a thorough examination of media institutions and structures. The program provides an understanding of media representations of gender, race, ethnicity, and sexual orientation, and encourages professional practice that respects all forms of diversity, equity and inclusion. It trains students to be sensitive to and provide a voice for underserved populations and communities; works in the public interest; and encourages community engagement and social responsibility to audiences and the society at large. Students who graduate with a Journalism degree compete for journalism careers regionally, nationally and globally.

Preparation

High school students are encouraged to take college preparatory English courses and become involved with their high school publications.

Students planning to transfer from a community college should consult with their counselor or advisor to identify appropriate transferable lower division courses.

Student Organizations

The Program sponsors the student organization The Society of Independent Student Journalists (SISJ). Its mission is:

1. to offer educational and professional support for student journalists;
2. to reinforce and strengthen the guiding principles of independent journalists;
3. to give student journalists the opportunity to network with industry professionals and instructors; and
4. to ensure all interested students are proficient in the principles and practices of journalism professionals.

Student membership is highly recommended.

Graduation With Honors

Undergraduate students may be candidates for graduation with Honors in Journalism if they meet the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of at least 3.5 across all courses used to satisfy the upper-division requirements in the major.

Career Opportunities

The critical thinking and writing skills that Journalism students acquire from their coursework, combined with the experience they gain by participating in internships and student groups, prepare them for many career opportunities.

The Bachelor of Arts in Journalism is designed for students interested in print, online, and broadcast journalism careers. Students who graduate with a journalism degree are prepared for a wide variety of media-related careers, already armed with industry experience. New technologies and media platforms have created many dynamic opportunities for journalism graduates who possess the skills, principles, and practices for a successful career in the diverse regional, national, and international job markets. We train students in the various practices of contemporary journalists, including news writing and reporting, feature writing, column, and opinion writing, interviewing, broadcast journalism, video podcasting, editing, and blogging.

Taught by seasoned journalists from a variety of media outlets, the curriculum focuses on the knowledge, practices, principles, and strategies of successful journalism professionals. In addition to learning effective writing, information gathering, and production techniques, students gain an understanding of how media organizations operate through hands-on internship training and in our news and broadcast production laboratories. Students also develop a keen understanding of how to decipher and navigate through an unprecedented amount of electronic information through media literacy training.

Careers include reporter, editor, features writer, sports journalist, freelance writer, columnist, correspondent, news broadcaster, editorial writer, news director, blogger, video podcaster, media management, researcher, and photojournalist.

Journalism, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Major Requirements (45-48 units)

The following courses, or their approved equivalents, are required of all candidates for this degree. The academic standards of the department require that all Journalism majors pass all required and prerequisite courses with grades of "C" or better.

| Code | Title | Hours |

¹ Note: COM 355 News Production Workshop is repeatable for credit.

Program Learning Outcomes

Upon completion of the Bachelor of Arts in Journalism program, a degree recipient will be able to:

- Apply the principles and laws of freedom of speech and press, in a global context, and for the United States.
- Demonstrate an understanding of the multicultural history and role of professionals and institutions in shaping Journalism.
- Demonstrate culturally proficient communication that empowers those traditionally disenfranchised in society, especially as grounded in race, ethnicity, gender, sexual orientation and ability, domestically and globally, across Journalism contexts.
- Present images and information effectively and creatively, using appropriate tools and technologies.
- Write correctly and clearly in forms and styles appropriate for the Journalism professions, audiences and purposes they serve.
- Demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity.
- Apply critical thinking skills in conducting research and evaluating information by methods appropriate to Journalism professions.
- Effectively and correctly apply basic numerical and statistical concepts.
- Critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness.
- Apply tools and technologies appropriate for the Journalism professions.

| COM 496 | Internship In Communications | 3 |

Students enrolled in the Journalism program can choose to complete the regular coursework sequence, or they can take the Latinx Journalism Concentration. The concentration will allow students to complete the Program Learning Outcomes as well as the two additional Concentration Learning Outcomes.

Program Learning Outcomes

1. Understand and apply the principles and laws of freedom of speech and press as well as receive instruction in and understand the range of systems of freedom of expression around the world, including the right to dissent, to monitor and criticize power, and to assemble for redress of grievances.
2. Demonstrate an understanding of the history and role of professionals and institutions in shaping communications.
3. Demonstrate an understanding of gender, race, ethnicity, sexual orientation and, as appropriate, other forms of diversity in domestic society in relation to mass communications.
4. Demonstrate an understanding of the peoples and cultures and of the significance and impact of mass communications in a global society.
5. Understand concepts and apply theories in the use and presentation of images and information.
6. Demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity.
7. Think critically, creatively and independently.
8. Conduct research and evaluate information by methods appropriate to the communications professions in which they work.
9. Write correctly and clearly in forms and styles appropriate for the communications professions, audiences and purposes they serve.
10. Critically evaluate their own work and that of others for accuracy, fairness, clarity, appropriate style and grammatical correctness.
11. Apply basic numerical and statistical concepts to coursework.
12. Apply current tools and technologies appropriate for the communications professions in which they work, and to understand the digital world.

Latinx Journalism Concentration Learning Outcomes

1. Write stories in Spanish appropriate for diverse media and audiences by conducting research within and about Latinx communities in the U.S.
2. Demonstrate an understanding of the contemporary issues in Latin American countries and their relationship to Hispanic, Chicano, and Latinx culture and media representation in the United States.

Kinesiology

College of Health, Human Services, and Nursing
Department of Kinesiology

Program Description

Kinesiology is an academic area concerned with the art and science of human movement, with particular reference to physical, intellectual, , emotional, spiritual and social variables.

Features

A large gymnasium, mirrored dance studio, mirrored activity room, mirrored weight training room, exercise laboratory, swimming pool, athletic training room, tennis courts, activity field and track are available for instructional and recreational use.

Faculty curriculum planners carefully monitor the academic programs at comparable universities as well as examine state certification programs to align existing programs with current trends and requirements.

Additionally, they forecast future specializations. The faculty also makes every effort to facilitate the transfer of students from feeder colleges to CSU Dominguez Hills and from CSU Dominguez Hills to other universities.

Faculty keep regularly scheduled office hours and are available during those hours to talk with students in person, by telephone or online.

The multicultural campus community at CSU Dominguez Hills provides opportunities for a greater understanding of various cultural and ethnic groups. This unique social environment is invaluable for students preparing for people-oriented careers.

Academic Advisement

Academic Advisors

1. Pre-Physical Therapy Option- Scott Cheatham, Coordinator; Carolyn Oudiz
2. Physical Education: Teaching- Carole Casten, Coordinator; Lee Hancock
3. Fitness Director Option- George Wing, Coordinator; Gioella Chaparro

Undergraduate Students

1. New students need to download a University Catalog.
2. Students should initiate advisement by contacting their faculty advisor.
3. During their first advisement meeting, students will be given a copy of an advisement sheet for their academic program.
4. Transfer students should schedule an appointment with their faculty advisor and bring copies of their transcripts and course descriptions.
5. Each time students meet with their advisor they should bring a copy of their academic requirements printed from the MyCSUDH webpage.
6. Advisement must be sought each semester prior to registration.
7. Students' final advisement meetings should take place just before they file for graduation.

Preparation

High school students planning to seek a Bachelor of Arts in Physical Education should:

- enroll in a physical education class each semester and develop skills in many activities.
- participate in an interscholastic sport and/or dance production.
- work on oral communication skills by enrolling in a speech class.
- work on writing skills in English classes.
- work on math skills up to, and including, Algebra II.
- study biology and physiology. Physics is also recommended.
- take advantage of elective classes in graphic design and psychology.
- master computer skills including word processing and typing.
- seek part-time employment in physical activity programs (summer camps, youth sports programs, playgrounds, private fitness clubs, recreation centers, dance studios, etc.).
- volunteer to serve at athletics and dance events as an organizer, official, score keeper, fund raiser or assistant.
- earn certification from the American Red Cross in First Aid, CPR, Lifeguarding and Water Safety Instructor.

If students are planning to transfer to CSU Dominguez Hills from a community college, the Division suggests taking courses that are equivalent to its lower division physical education requirements. These courses include Anatomy; Physiology; First Aid and CPR; and a variety of activity classes in Physical Education and Dance.

Helpful Hints

1. Students should seek advisement regularly.
2. Students should keep the advisement sheet up-to-date and bring it with them whenever they meet with their advisor. Each semester students should enroll in a physical education activity class to broaden their knowledge and keep physically active.
3. Students should begin by taking lower division courses first.
4. Single Field Teaching Option majors should consider additional coursework in science, math, since teaching proficiency in these areas is still in demand. It also would benefit future teachers to gain speaking proficiency in Spanish and mastery level proficiency in technology use.
5. Majors and minors should maintain a model level of physical fitness and wellness.
6. Students should regularly check the bulletin boards located outside the Division office for job opportunities and important announcements related to their educational goals.

Student Organizations

The faculty encourages professional participation by sponsoring The Kinesiology Student Association (KSA). The faculty also participates actively in professional organizations and activities and encourages student involvement, which translates into a broad professional support system for faculty and students.

Graduation With Honors

An undergraduate student may be a candidate for graduation with Honors in Physical Education if he or she meets the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of at least 3.5 in all courses used to satisfy the upper-division requirements in the Physical Education major.

Career Opportunities

A B.A. in Physical Education offers four options in the major. The Pre-Physical Therapy Option provides some of the prerequisites for Physical Therapy schools and can serve as a pre-medical preparation program. The Fitness Director Option enables students to assume leadership positions in fitness establishments in both public and private sectors. The Physical Education Teaching Option is designed for students seeking a teaching career in elementary or secondary physical education, or planning to enter graduate programs in preparation for teaching careers at the college or university levels.

Within the Physical Education Minor, two options are offered. The Coaching minor is for students planning to work as coaches in chosen areas of sports specialization. The Teaching minor qualifies credentialed teachers in other subject areas to teach Physical Education in grades K-9.

A Fitness Instructor Certificate is offered to meet the needs of individuals who are either presently employed or intend to seek employment as fitness instructors in health clubs, recreation centers, YM/WCAs or corporate fitness programs. Requirements for the certificate are based on guidelines established by the American College of Sports Medicine and the Association of Fitness in Business and Industry. The certificate can be completed independent of a bachelor's degree.

Faculty

Michael Ernst, Division Chair

Mary Lou Cappel, Carole M. Casten, Gioella Chaparro, Scott Cheatham, Michael Ernst, Lee Hancock, Carolyn Oudiz, Gary Sayed, George Wing, Ben Zhou

Department Office: SAC 2145, (310) 243-3761

Emeriti Faculty

Boice Bowman, John L. Johnson, Robert Pestolesi, James Poole

Courses

KIN 100. Adapt Phys Fit. (1 Units)

Physical fitness evaluation, exercise prescription and individualized programs designed for disabled students and any student with a temporary or permanent fitness need. Repeatable course. Two hours of activity per week.

Offered As needed

KIN 111. Aerobics. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.

Offered Fall, Spring

KIN 112. Aerobics: Step. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.

Offered As needed

KIN 113. Social and Folk Dance Activity. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.

Offered Fall, Spring

KIN 114. Badminton. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.

Offered Fall, Spring

KIN 116. Baseball. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.

Offered As needed

KIN 118. Basketball. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.

Offered Fall, Spring

KIN 125. Bicycling/All Levels/Velo. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.

Offered As needed

KIN 130. Golf. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.

Offered Fall, Spring

KIN 132. Gymnastics. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.

Offered Fall, Spring

KIN 134. Jogging. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.

Offered As needed

KIN 140. Lifeguard Training. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.

Offered As needed

KIN 141. Martial Arts. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.

Offered Fall, Spring

KIN 142. Physical Conditioning. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.
Offered Fall, Spring

KIN 145. Relaxation Techniques. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.
Offered As needed

KIN 148. Soccer/Indoor. (1 Units)

The following courses are designed to promote active lifestyles and are open to all university students. Prerequisites for intermediate level classes are beginning level or equivalent. Prerequisites for advanced level classes are intermediate level or equivalent. Students assume responsibility for satisfactory health status appropriate for activity classes. The courses are repeatable. Two hours of activity per week. Fee required for KIN 116-180.
Offered As needed

KIN 150. Soccer/Outdoor. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.
Offered Fall, Spring

KIN 152. Softball. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.
Offered Fall, Spring

KIN 154. Stretch & Flex. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.
Offered As needed

KIN 156. Swimming/All Levels. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.
Offered Fall, Spring

KIN 158. Swimming/Conditioning. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.
Offered As needed

KIN 162. Tennis. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.
Offered Fall, Spring

KIN 164. Volleyball. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.
Offered Fall, Spring

KIN 168. Walking For Health. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.
Offered As needed

KIN 170. Weight Training. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.
Offered Fall, Spring

KIN 171. Yoga. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.
Offered Fall, Spring

KIN 180. Intramurals. (1 Units)

Participation in competitive intramural activities. Tournaments conducted in sports such as basketball, badminton, tennis, volleyball and additional activities based upon student interest. Repeatable course. Two hours of activity per week.
Offered Fall, Spring

KIN 190. Intercollegiate Athletics - Sports Men. (1 Units)

Instruction and participation in selected major team sports such as basketball, baseball, golf, and soccer that comprise the intercollegiate athletic program. Repeatable course.
Offered Fall, Spring

KIN 191. Intercollegiate Athletics - Sports Women. (1 Units)

Instruction and participation in selected major team sports such as basketball, softball, volleyball, cheerleading, soccer, and cross country that comprise the intercollegiate athletic program. Repeatable course.
Offered Fall, Spring

KIN 218. First Aid And Cpr. (3 Units)

Provides opportunity to qualify for American Red Cross certification in Standard First Aid and CPR. Students study and practice administering first aid techniques; examine accident and injury prevention measures; and train to master cardiopulmonary resuscitation techniques. Fee required.
Offered As needed

KIN 223. Intro To Pe. (3 Units)

Examination of bodies of knowledge that make up the fields of Physical Education and Dance Education. Analysis of how disciplinary theories translate into workable practices in a diverse culture. Course includes career guidance and overview of career options. (Students entering the Physical Education major are required to enroll in this course their first semester of study.)
Offered Fall, Spring

KIN 233. Prac.in Phys.Act.Instruction. (3 Units)

Designed to provide initial instruction in a variety of pedagogical knowledge related to teaching physical education for grades K-12. Students will be provided with opportunities to learn and demonstrate current best teaching practices. Emphasis is placed on learning and practicing effective planning, teaching, and reflective behaviors. Offered Fall, Spring

KIN 235. Lifetime Fitness. (3 Units)

Examination of components of fitness; training principles, energy sources; nutrition and weight control research; stress reduction techniques; and fitness programs. Fitness assessment and development of personalized fitness program. Meets General Education requirement for Whole Person. Offered Fall, Spring

KIN 250. Analysis of Aquatics. (2 Units)

Analysis and refinement of skill requirements; examination of concepts, rules, strategies, history and appreciations; and adaptations for special populations related to swimming, diving, synchronized swimming, aqua aerobics, water games and water safety. One hour of lecture and two hours of activity per week. Fee required. Offered As needed

KIN 251. Analysis of World Dance. (0 Units)

Analysis and refinement of skill requirements; examination of concepts, movement theories, history, culture and appreciations; and adaptations for special populations related to modern dance, jazz, ballet, social dance, folk dance, ethnic dance and dance-exercise. One hour of lecture and two hours of activity per week. Fee required. Offered As needed

KIN 252. Analysis Artistic & Rhyth Gym. (2 Units)

Analysis and refinement of skill requirements; examination of concepts, movement theories, judging, history and appreciations; and adaptations for special populations related to stunts, tumbling, floor exercise; apparatus work and object manipulation required of artistic and rhythmic gymnastics. One hour of lecture and two hours of activity per week. Fee required. Offered As needed

KIN 253. Analysis Archery Bowling & Golf. (2 Units)

Analysis and refinement of skill requirements; examination of concepts, rules, strategies, history and appreciations; and adaptations for special populations related to the individual sports of archery, bowling and golf. One hour of lecture and two hours of activity per week. Fee required. Offered As needed

KIN 254. Analysis Cond & Martial Arts. (2 Units)

Analysis and refinement of skill requirements; examination of concepts, rules, strategies, underlying principles, history, culture and appreciations; and adaptations for special populations related to all components of physical conditioning, weight training and martial arts. One hour of lecture and two hours of activity per week. Fee required. Offered As needed

KIN 255. Anlys Tennis Pad Ten & Racball. (2 Units)

Analysis and refinement of skill requirements; examination of concepts, rules, strategies, history and appreciations; and adaptations for special populations related to tennis, paddle tennis, racquetball and non-traditional racquet games. One hour of lecture and two hours of activity per week. Fee required. Offered As needed

KIN 256. Anly Badminton & Team Handball. (2 Units)

Analysis and refinement of skill requirements; examination of concepts, rules, strategies, history and appreciations; and adaptations for special populations related to individual and dual sports of badminton and team handball. One hour of lecture and two hours of activity per week. Fee required. Offered As needed

KIN 257. Anly Softball & Track & Field. (2 Units)

Analysis and refinement of skill requirements; examination of concepts, rules, strategies, history and appreciations; and adaptations for special populations related to softball, track and field, and non-competitive diamond games. One hour of lecture and two hours of activity per week. Fee required. Offered As needed

KIN 258. Anlys Basketball & Volleyball. (2 Units)

Analysis and refinement of skill requirements; examination of concepts, rules, strategies, history and appreciations; and adaptations for special populations related to team sports of basketball and volleyball. One hour of lecture and two hours of activity per week. Fee required. Offered As needed

KIN 259. Anlysis Flag Football & Soccer. (2 Units)

Analysis and refinement of skill requirements; examination of concepts, rules, strategies, history and appreciations; and adaptations for special populations related to the field sports of flag football and soccer and non-traditional field activities. One hour of lecture and two hours of activity per week. Fee required. Offered As needed

KIN 260. Sports Officiating. (2 Units)

Rules, mechanics and officiating procedures for men's and women's sports at the interscholastic and intercollegiate levels. Offered As needed

KIN 290. Human Anatomy & Physiology I. (4 Units)

Introduction to human anatomy and physiology I. Structure and function of the body systems are covered, with special emphasis on body orientation and anatomic position, basic physio-chemistry, musculoskeletal, and nervous systems. Tailored majors in kinesiology and pre-allied health professions. Offered Fall, Spring, Summer

KIN 291. Human Anatomy & Physiology II. (4 Units)

A continuation of Human Anatomy & Physiology I. Body systems covered in this part are the cardiopulmonary, digestive, renal and reproductive systems. Tailored majors in kinesiology and other health professions. Offered Fall, Spring, Summer

KIN 295. Special Topics in Kinesiology. (4 Units)

Intensive study of a physical education topic of current interest. Repeatable course. Three hours lecture and three hours lab. Consent required. Offered Fall, Spring

KIN 300. Tests and Measurements in Physical Education. (3 Units)

Analysis, evaluation, interpretation, and use of tests and other assessment methods in physical education. Application of statistical procedures. Fee required. Offered Fall, Spring, Summer

KIN 301. Kinesiology. (3 Units)

Prerequisites: BIO 250 and BIO 251 and either high school or college physics. Examination of anatomical structure, function, and mechanical principles relating to human motion, including analytical and practical application of concepts. Two hours of lecture and three hours of laboratory per week. Fee required.

Offered Fall, Spring

KIN 302. Technology Methods in Physical Education and Recreation. (3 Units)

Provides students with information on, training in, and experience with various technology methods and applications related to the Physical Education and Recreation professions. One hour of lecture and two hours of laboratory activity per week.

Offered As needed

KIN 303. Exercise Physiology. (4 Units)

Prerequisites: KIN 300; BIO 250 and BIO 251 and either high school or college chemistry. Study of human function under the stress of muscular activity per week. Investigation of acute and chronic effects of exercise on the muscular, pulmonary, cardiovascular, nervous and energy systems. Examination of principles of training and nutrition. Three hours of lecture and three hours of laboratory per week. Fee required.

Offered Fall, Spring, Summer

KIN 304. Introduction to Adapted Physical Education. (3 Units)

Prerequisite: KIN 301. Study of prevalent disabilities with implications for adapted physical education program development, implementation and evaluation at the elementary and secondary levels.

Offered Fall, Spring

KIN 305. Motor Learning. (3 Units)

Prerequisite: KIN 300. Study of human development and learning in the motor domain. Examination of factors such as growth and maturation, instructional procedures, sensory and perceptual systems, motor control, and assessment of motor development.

Offered Fall, Spring

KIN 306. Biometric of Human Movement. (3 Units)

Prerequisites: Bio120/120L, KIN291, CHE 110, PHY 120, KIN 223, Degree 300's:KIN 300, 301. This course provides students with the knowledge of movements as it relates to physics. Students will learn biomedical principles and concepts as they relate to human movement, exercise, and sports.

KIN 310. Nutrition for Peak Performance. (3 Units)

Prerequisite: KIN 303 Presents principles of nutrition as they apply to sport, exercise, and peak performance. Topics presented include: energy release, metabolism, and substrate utilization during exercise, ergogenic aids, fluid intake, pre-game meals, and health issues related to nutrition.

Offered Fall, Spring, Summer

KIN 320. History and Philosophy of Physical Education. (3 Units)

Prerequisite: KIN 223. Study of historical roots and evolution of physical education, changing value systems that shape physical education philosophies, and administrative practices which lead to making informed program decisions.

Offered Fall, Spring

KIN 330. Sport and Exercise Psychology. (3 Units)

Prerequisite: PSY 101 is required. Through writing, this course examines psychological theories and research and their application to the sport/physical activity-related affect, behaviors, and cognitions of individuals. This course explores how the use of disciplinary knowledge assists individuals to better communicate within a healthcare framework.

Restricted to majors. A grade of C or better in this course fulfills the GVAR requirement for all Physical Education and Exercise Science majors.

Offered Fall, Spring, Summer

KIN 360. Prev & Treat Ath Injuries. (3 Units)

Prerequisites: BIO 250, BIO 251 and KIN 301. Prevention, examination, and treatment of athletic injuries. Includes methods of taping, bandaging, therapeutic exercises, training room equipment, protective devices and supplies. Two hours of lecture and three hours of laboratory per week.

Fee required

Offered Fall, Spring

KIN 362. Principles of Athletic Training. (3 Units)

Prerequisites: BIO 250 and BIO 251, KIN 301. The scientific and clinical foundation of the field of athletic training. Emphasis placed on athletic trainer's role and responsibilities. In depth study of risk management, prevention, evaluation, recognition, treatment, and rehabilitation of athletic injuries.

Offered Fall, Spring

KIN 363. Principles of Athletic Training Laboratory. (1 Units)

Prerequisites: BIO 250 and BIO 251. Corequisite: KIN 362. Emphasis on knowledge, skills, and taping techniques for common athletic injuries and related evaluation procedures.

Offered Fall, Spring

KIN 375. Clin Exp I. (1 Units)

Prerequisites: BIO 250, BIO 251, and KIN 218. Corequisites: KIN 362, KIN 363. Introduction to clinical experience in athletic training settings. Basic understanding of clinical aspect of the training profession. Students in this class are required a minimum 50 hours of observation and 150 hours of clinical experience (a minimum of 10 per week) in athletic training settings.

Offered As needed

KIN 376. Clinical Experience II. (1 Units)

Prerequisites: KIN 362, KIN 363, KIN 375. Application of taping, wrapping, bracing, and padding skills; risk management; assessment and evaluation; pharmacology and nutrition; therapeutic modalities; therapeutic exercise; specific injury management. Requires a minimum of 250 clinical experience hours (a minimum of 16 hours a week) in an athletic training setting.

Offered As needed

KIN 377. Clinical Experience III. (1 Units)

Prerequisites: KIN 376, KIN 461, and KIN 463. Corequisites: KIN 462 and KIN 464. The application of therapeutic exercise; surgery observation; specific injury management; clinical experience in various sports teams. Requires a minimum of 250 clinical experience hours (a minimum of 16 hours a week) in an athletic training setting.

Offered As needed

KIN 425. Pe In The Elementary Sch. (3 Units)

Prerequisite: In order to begin the hours for fieldwork in this course, you will need a valid Certificate of Clearance (fingerprints) and proof of a negative TB (within 4 months of the fieldwork course beginning). For information on submitting these documents, contact the Center for Teaching Careers. Overview of bodies of knowledge in the field of physical education and their application to elementary physical education. Analysis of educational theories and practices as they relate to effectively teaching physical education to elementary school children. Course includes peer teaching lessons. Two hours of lecture and two hours of activity per week. Fee required.
Offered Fall, Spring

KIN 426. Directed Teaching in Elementary Physical Education. (2 Units)

Prerequisites: KIN 425. In order to begin the hours for fieldwork in this course, you will need a valid Certificate of Clearance (fingerprints) and proof of a negative TB (within 4 months of the fieldwork course beginning). For information on submitting these documents, contact the Center for Teaching Careers. Planned directed teaching in elementary physical education at a cooperating elementary school under professional supervision. Repeatable course.
Offered Fall, Spring

KIN 447. Dan Educ in the Elem School. (3 Units)

Prerequisite: In order to begin the hours for fieldwork in this course, you will need a valid Certificate of Clearance (fingerprints) and proof of a negative TB (within 4 months of the fieldwork course beginning). For information on submitting these documents, contact the Center for Teaching Careers. Study of developmentally appropriate dance education activities for children. Examination of and practice in blending pedagogical content knowledge with subject matter knowledge to optimize teaching and learning. Course culminates in peer teaching lessons, reflections and self-assessment.
Offered Fall, Spring

KIN 448. Tchg Effect Sec PE. (3 Units)

Prerequisite: See lower division requirements for major. In order to begin the hours for fieldwork in this course, you will need a valid Certificate of Clearance (fingerprints) and proof of a negative TB (within 4 months of the fieldwork course beginning). For information on submitting these documents, contact the Center for Teaching Careers. Analysis and application of recent advances in teaching methodology, observation techniques, organization and management strategies, and skill and knowledge acquisition as they relate to effectively teaching secondary physical education. Course includes peer teaching lessons. Two hours of lecture and two hours of activity per week.
Offered Fall, Spring

KIN 449. Dir Tchg In Sec PE. (2 Units)

Prerequisites: KIN 448. In order to begin the hours for fieldwork in this course, you will need a valid Certificate of Clearance (fingerprints) and proof of a negative TB (within 4 months of the fieldwork course beginning). For information on submitting these documents, contact the Center for Teaching Careers. Planned directed teaching in secondary physical education at a cooperating secondary school under professional supervision. Repeatable course.
Offered Fall, Spring

KIN 450. Teaching Dance. (1 Units)

Prerequisite: Intermediate level technique class. Analysis and application of recent advances in teaching methodology, observation techniques, organization and management strategies, and skill and knowledge acquisition as they relate to effectively teaching elementary, secondary and college dance. Course includes peer teaching experience.
Offered As needed

KIN 461. Therapeutic Modalities. (3 Units)

Prerequisites: BIO 250, KIN 362, KIN 363, and KIN 375. A theoretical clinical basis for using therapeutic modalities, providing knowledge regarding the scientific basis and physiological effects of modalities in the treatment and rehabilitation of athletic injuries. Fee required.
Offered Fall, Spring

KIN 462. Therapeutic Exercise. (3 Units)

Prerequisites: BIO 250, KIN 362, KIN 363, KIN 375. A theoretical and clinical basis for implementation and intervention of therapeutic exercise; understanding the basic principles and effects of the variety of therapeutic exercise techniques; and designing therapeutic exercise programs.
Offered Fall, Spring, Summer

KIN 463. Lower Extremity Assessment. (3 Units)

Prerequisites: KIN 375. Recommended corequisite: KIN 461. Recognition and evaluation of orthopedic and athletic injuries; identifying signs, symptoms and mechanisms of injuries; performing special tests for specific orthopedic pathologies related to the lower extremity.
Offered Fall, Spring

KIN 464. Upper Extremity Assessment. (3 Units)

Prerequisites: KIN 376. Recommended corequisite: KIN 462. Recognition and evaluation of orthopedic and athletic injuries; identifying signs, symptoms and mechanisms of injuries; performing special tests for specific orthopedic pathologies related to the upper extremity.
Offered Fall, Spring

KIN 465. Administration of Athletic Training Programs. (3 Units)

Prerequisites: KIN 461, KIN 462, KIN 463, and KIN 464. Administration and management strategies of the field of athletic training and sports medicine. Organization planning ideas including principles and knowledge of program, human, financial, and information management: facility design and planning; legal aspects and ethical issues.
Offered As needed

KIN 470. Coaching Techniques for Selected Sports. (2 Units)

Prerequisites: KIN 253, KIN 256, KIN 257, KIN 258 and KIN 259; three out of five are recommended. Analysis and practical application of techniques for coaching selected sports. Emphasis on organization and conduct of athletic programs, including program development, coaching strategies, practice sessions, academic advisement, recruiting and scouting.
Offered As needed

KIN 471. Fitness Assessment and Exercise Prescription. (3 Units)

Prerequisites: Lower division requirements: Bio 120/120L, KIN 290, KIN 291, CHE 110, PHY 120, KIN 223, Degree 300s: KIN 300, 301,303,305,306,310,330,360. This course provides student with the knowledge to conduct physical fitness tests and develop an exercise prescription for different populations. Emphasis will be placed on testing and prescription for the major component of physical fitness.

KIN 473. Principles of Sport Performance Training. (3 Units)

Prerequisites: Lower division requirements: BIO 120/120L, KIN 290,291, CHE 110, PHY120,KIN 223. Degree300s: KIN 300, 301, 305, 306, 310, 330,360. This course provides student with the knowledge of sports performance assessments and program design for different athletic populations. Emphasis will be placed sports specific testing, periodizing programming, and training techniques for specific sports and athletes.

KIN 475. Complementary and Integrated Healthcare. (3 Units)

Lower division requirements: Bio 120/120L, KIN 290, KIN 291, CHE 110, PHY 120, KIN 223 Degree 300s: KIN 300, 301,302,305,310,330,360. This course will provide student with the knowledge regarding complimentary and alternative healthcare. Student will learn about different eastern and western therapeutic treatment such as acuouncture, cupping, energy medicine, yoga and more.

KIN 476. Clinical Experience IV. (1 Units)

Prerequisites: KIN 377, KIN 462, KIN 463, and KIN 464. Corequisite: KIN 465. The application of specific injury management; clinical experience in various sports teams. A minimum of 250 clinical experience hours (a minimum of 16 hours a week) in an athletic training setting are required.

Offered As needed

KIN 477. Clinical Experience V. (1 Units)

Prerequisites: KIN 476. The application of specific injury management; clinical experience in various sports teams; peer teaching and supervision. A minimum of 250 clinical experience hours (a minimum of 16 hours a week) in an athletic training setting are required.

Offered As needed

KIN 480. Athletic Training Seminar. (2 Units)

Prerequisites: KIN 465 and KIN 476. Course is designed for senior students who are preparing for he NATA BOC examination. Students in this course are senior level students who have either completed all necessary NATA competencies or are in their last semester and currently completing the necessary competencies.

Offered As needed

KIN 490. Senior Seminar in Physical Education. (1 Units)

Prerequisite: Senior year. For Physical Education majors. Practice writing and presentation skills through self-reflection, evaluation, and connecting subject matter areas. Peer and faculty evaluation of student portfolios, resume writing, curriculum development, mock interviews and program assessment will be included in the curriculum. One hour of seminar per week.

Offered Fall, Spring

KIN 493. Clinical Experiences in PT/AT. (3 Units)

Planned internship in Pre-PT at a cooperative institution, agency or clinical setting under professional supervision. Application of the principles and skills acquired in the Pr-PT program. Repeatable Course

Offered Fall, Spring

KIN 494. Physical Education: Independent Study. (1-3 Units)

Prerequisites: Physical Education Major or Minor; upper division standing. Independent study in physical education, with each student participating in a special project mutually agreed upon by student and instructor. Repeatable course.

Offered Fall, Spring

KIN 495. Special Topics:. (1-3 Units)

Intensive study of a physical education topic of current interest. May be repeated for credit to a maximum of 6.0 units. Repeatable course. One to three hours of lecture per week.

Offered As needed

KIN 496. Internship. (1-3 Units)

Prerequisites: Physical Education Major or Minor and upper division standing are required. KIN 448 is recommended. Planned internship in physical education at a cooperating institution, agency or company under professional supervision. Repeatable course.

Offered Fall, Spring

KIN 498. Directed Research. (1-3 Units)

Prerequisite: Consent of instructor. The student develops and completes an individual study under faculty supervision. Repeatable course.

Offered As needed

KIN 500. Seminar in Contemporary Issues/Topics and Trends in Physical Education. (3 Units)

Analysis of current trends, issues, and problems in Physical Education academic and athletics programs; examination and analysis of literature and research findings. Three hours of seminar per week.

Offered As needed

KIN 504. Physical Fitness Evaluation and Exercise Prescription. (3 Units)

Prerequisites: KIN 303 is required; KIN 218 is recommended. Evaluation of cardiovascular fitness, respiratory capacity, body composition, strength, muscular endurance and flexibility. Exercise prescription based upon individual needs, interests and preliminary health and fitness evaluations. Overview of American Psychological Association's research methodology.

Offered As needed

KIN 514. Seminar in Curriculum Development in Physical Education. (3 Units)

Intensive study, evaluation, and application of current developments in curriculum theory and practice for Elementary-Secondary School Physical Education. Includes designing an innovative physical education/wellness curriculum project. Three hours of seminar per week.

Offered As needed

KIN 516. Public Relations and Development. (3 Units)

The study of public relations and development issues related to the fields of physical education and athletics in K-16 school settings. The student will develop news releases, design promotional public information, develop mediated presentations addressing programs and development

Three hours of seminar per week.

Offered As needed

KIN 593. Fieldwork in Physical Ed Admin. (3 Units)

Prerequisites: GED 571 and KIN 500 are required; KIN 514 and KIN 516 are recommended. Supervised field experiences at the school level to include actual job performance in both supervision and administrative in Physical Education or Athletics. Students will demonstrate competencies required by the Educational Administration approved program. CR/NC grading.

Offered As needed

KIN 595. Special Topics in Kinesiology. (3 Units)

Prerequisite: Consent of instructor. Advanced course of special interest to graduate students. Topic and content will vary as announced.

Offered As needed

KIN 599. Thesis/Creative Project. (3 Units)

Prerequisites: KIN 500, KIN 514, KIN 516, KIN 593 are required. Student will execute an individually planned research effort or creative project. Students work under individual supervision with assigned faculty. May be repeated up to 6 units.

Offered As needed

KIN 600. KIN Grad Continuation Course. (1 Units)

Graduate students who have completed their course work but not their thesis, project, or comprehensive examination, or who have other requirements remaining for the completion of their degree, may maintain continuous attendance by enrolling in this course.

Offered Fall, Spring

Coaching, Minor Requirements

| Code | Title | Hours |
|------------------------------------|---|--------------|
| Lower Division Requirements | | |
| BIO 250 | Elem Hum Anat & Physiol | 3 |
| BIO 251 | Elem Hum Anatomy Phys Lab | 1 |

| KIN 305 | Motor Learning | 3 |
| KIN 360 | Prev & Treat Ath Injuries | 3 |
| KIN 470 | Coaching Techniques for Selected Sports | 2 |
| KIN 496 | Internship | 1-3 |
| Total Hours | | 23-25 |

Education: Physical Education Administration, Master of Arts

Please note that the Master of Arts in Education: Physical Education Administration is no longer admitting students.

Physical Education Administration Option (30 units)

The Physical Education Administration option is structured as a differential tuition program, with graduates completing a total of 30 units. Students will complete 18 units (graduate education curriculum) under state support and 12 units (physical education curriculum) through Special Sessions.

Required Courses

The following courses constitute the program of study for the Master of Arts in Education: Physical Education Administration option. Students enrolling in graduate level physical education courses must have a degree in Physical Education, Kinesiology, Exercise Science, or Human Performance or have completed the prerequisite courses (outlined in section II below). All students receiving this degree must successfully complete these courses.

| Code | Title | Hours |
|---|--|-------|
| Core Courses ¹ | | |
| GED 500 | Research Methods in Education | 3 |
| GED 501 | Seminar in Learning and Development | 3 |
| GED 503 | Socio-Cultural Issues in Education | 3 |
| Graduate Education Required Courses ¹ | | |
| Complete graduate education required courses | | 9 |
| Physical Education Required Courses ² | | |
| KIN 500 | Seminar in Contemporary Issues/Topics and Trends in Physical Education | 3 |
| KIN 514 | Seminar in Curriculum Development in Physical Education | 3 |
| KIN 516 | Public Relations and Development | 3 |

| | | |
|--------------------|--------------------------------|-----------|
| KIN 593S | Fieldwork in Physical Ed Admin | 3 |
| Total Hours | | 30 |

¹ Classes taken under state support.

² Classes taken through Special Sessions.

Program Prerequisite Courses

Students who have **not** completed a degree in Physical Education, Kinesiology, Exercise Science, or Human Performance must complete all of the following courses before enrolling in 500 level physical education courses.

| Code | Title | Hours |
|-------------------------------|--|-----------|
| Prerequisite Courses | | |
| BIO 250 | Elem Hum Anat & Physiol | 3 |
| BIO 251 | Elem Hum Anatomy Phys Lab | 1 |

Physical Education, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

No minor required.

Major Requirements (52-69 units)

The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

All courses taken for all of the majors in Physical Education must be passed with a grade of "C" or higher.

All of the majors in Physical Education must provide a valid certification of First Aid and CPR at the time of graduation.

Common Core Requirements (20 units)

| Code | Title | Hours |
|--|-------------------------------|-----------|
| Lower Division Required Courses | | |
| BIO 250 | Elem Hum Anat & Physiol | 3 |
| BIO 251 | Elem Hum Anatomy Phys Lab | 1 |
| KIN 223 | Intro To Pe | 3 |
| Upper Division Required Courses | | |
| KIN 301 | Kinesiology | 3 |
| KIN 303 | Exercise Physiology | 4 |
| KIN 330 | Sport and Exercise Psychology | 3 |
| KIN 360 | Prev & Treat Ath Injuries | 3 |
| Total Hours | | 20 |

Options

Students must select one of the options listed.

Fitness Director Option (52 units)

Athletic Training Education Option

The division is not currently accepting students into the Athletic Training Education Option. For more information, please contact the Division of Kinesiology.

Dance Concentration

The division is currently not accepting students into the Dance concentration. For more information, please contact the Division of Kinesiology.

- Demonstrate knowledge of and skills in a broad variety of motor skills and fitness activities; apply physical education knowledge to enhance motor skills and fitness in a variety of populations and conditions.
- Demonstrate knowledge and skills on biological and physical bases of movement and the changes that occur across the life span, within diverse populations, and under a variety of environmental conditions.
- Demonstrate knowledge and skills on behavioral and psychological bases of movement and the changes that occur across the life span, within diverse populations, and under a variety of environmental conditions.
- Demonstrate knowledge and skills on how motor skills are acquired and refined; how fitness is achieved and maintained across the life span and within diverse populations.
- Apply critical and creative thinking, writing, reading, oral communication, quantitative and qualitative analysis, and information management skills to movement-related questions.
- Demonstrate knowledge of the conditions of safe practice in movement-related contexts across the life span within diverse populations; respond appropriately to common injuries occurring during physical activity.
- Demonstrate the ability to use the computer and other technology to support inquiry and professional practice in movement-related fields.
- Demonstrate the ability to apply measurement instruments and principles for qualitative and quantitative assessment of human performance.
- Demonstrate understanding of the scientific method and other systematic ways of knowing relative to research and scholarship in human movement.

Physical Education, Subject Matter Preparation

The Single Field Major in Physical Education: Teaching Option serves as a waiver for the National Teacher Exam in Physical Education. Students who plan to enter the State of California Single Subject Teaching Credential Program in Physical Education must complete the Single Field Major in Physical Education: Teaching Option. Students must earn a grade of "C" or better in all courses to be given waiver credit.

Students must also complete additional requirements as listed in the Teacher Education section of this University Catalog.

Supplementary Authorization in Physical Education

This authorization is designed for individuals credentialed to teach in other subject areas in grades K-9 and wish to add Physical Education to the subjects they are credentialed to teach.

The Teaching minor, listed under "Minor Requirements," meets the State of California requirements for Supplementary Authorization in Physical Education.

Labor Studies

College of Arts and Humanities
Department of Labor Studies

Program Description

Labor Studies focus on all aspects of working life from the point of view of workers. Emphasis is placed on understanding the labor movement as it relates to historical, economic, and social issues of the twenty-first century. The Labor Studies Department offers a major, a minor, and a certificate program. In 1977, the Labor Studies program was developed at CSU Dominguez Hills to provide Southern California with the only state-supported bachelor of arts program in this field. Our program was designed with the assistance of state and local labor leaders and was coordinated with Labor Studies programs at nearby community colleges.

Features

Besides being unique in Southern California, the CSU Dominguez Hills Labor Studies Department offers students a wide variety of courses taught by professors in a range of different disciplines. Labor Studies is an interdepartmental program, which means that along with specialized courses in labor studies, students also take related classes in fields such as history, sociology and economics. The student will acquire a good liberal arts education and an education in the more practical aspects of labor studies. Such courses as LBR 412 Labor Law are taught by labor lawyers and unionists who are currently involved in the workplace.

Evening Program

Every effort is made to schedule courses in the evening and on weekends. There are also internet and hybrid classes.

Academic Advisement

The faculty members comprising the Labor Studies Committee are available for advising students. Students should first contact the chair of the Labor Studies Program for counsel or direction to someone with the expertise to assist them. Upon enrollment, a student should establish a

relationship with an advisor who can help provide continuity during the student's college years.

Preparation

Students coming from high school must meet the California State University requirements for admission to CSU Dominguez Hills. Otherwise, prospective Labor Studies majors do not need to have taken any specific courses. It is recommended that community college transfer students complete their General Education courses before entering the Labor Studies program.

Student Organizations

Labor and Social Justice Club. Students interested in the field can participate in the Labor and Social Justice Club, which organizes discussions and forums on current topics, holds social events, and advises faculty and students on aspects of the program.

Graduation With Honors

An undergraduate student may be a candidate for graduation with Honors in Labor Studies provided he or she meets the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of at least 3.5 in all courses used to satisfy the upper-division requirements in the major.

Career Possibilities

Careers for Labor Studies majors can be found within the labor movement and in private and public sector organizations that deal with labor relations. Many labor studies students are union officers or staff members seeking wider background knowledge for their current or future positions. A number of these students plan careers in the personnel and industrial relations divisions of corporations. Others wish to become professional mediators or arbitrators. Besides the careers typically sought by Labor Studies majors, a student also might consider a B.A. in Labor Studies as a background for teaching, labor journalism, or labor law.

Courses

LBR 101. Introduction to Labor Studies: Work, Wealth and Power. (3 Units)

Explore questions including: What is work's purpose? What are our rights on the job? How have labor struggles uplifted working class communities and shaped the global political economy? How can unions fight for social, racial, and gender justice across borders?

Offered Fall

LBR 200. Labor and the Environment. (3 Units)

The course will pursue an understanding of the consequences of climate policies for different categories of workers, identified by economic sector, geographic location, gender, migration and immigration, and national status.

Offered Fall, Spring

LBR 201. Work/Life: Purpose, Power, and Identity. (3 Units)

Explore: What is the role of work in a life well-lived? How do various cultures view work? Should we pursue work we love? That society needs? How do we handle workplace stress, occupational health, and integrating careers with other commitments?

Offered All terms

LBR 202. Class Struggles in Film and Popular Culture. (3 Units)

How are workers' lives portrayed in popular culture? We examine media in global context, discussing how image, text, and sound are used to tell workers' stories across gender, race, and sexual orientation as they stand up for dignity and justice.

Offered Spring

LBR 310. Success and Values. (3 Units)

Explores the various ways people and institutions in the Americas define success, with the underlying question, does one have to sacrifice one's values to achieve success.

Offered Fall, Spring

LBR 312. Decade of the Sixties. (3 Units)

Explores the sociopolitical milieu that incited the unrest of the Sixties, with the war in Vietnam at the center. Focuses on the interaction between writers, musicians, activists, labor and religious leaders, and the social movements of the time.

Offered Fall, Spring

LBR 313. The Future of Workers and Work. (3 Units)

Will the robots take our jobs? Course explores how automation, climate change, labor unions, and precarious work arrangements will affect the workplace in decades to come, and outcomes for women, immigrants and workers of color

Offered Fall, Spring

LBR 314. Key Issues: American Dream. (3 Units)

Explores the concept of the American Dream as it is expressed through literature, art, film, etc. and how people interpret the meaning of the concept in their own lives in a multiracial society.

Offered Fall, Spring

LBR 316. Working Class and Education. (3 Units)

What is the purpose of education? What functions does it perform and whose interests does it advance? Investigation of education as a network of institutions operating differently on different classes, races and genders. Evaluation of its position in relation with economy and governance.

Offered Fall, Spring

LBR 350. Research Methods for Social Change. (3 Units)

Research methods developed by social movements to guide organizing and advocacy for social, economic, and political change. Proficiency in a range of illuminating statistical survey, interview, and mapping techniques used to expose and challenge exploitation and injustice.

Offered Spring

LBR 365. Racial Capitalism. (3 Units)

Prerequisite: Upper division integrative coursework must be taken after 60 semester units and the lower division components of General Education (or their equivalent) have been completed. Focuses on the ways in which race and racism have been central to the political economic development of the U.S., with a particular focus on understanding how they were used to develop capitalism and how it impacts workers in our society.

Offered Fall, Spring

LBR 395. Special Topics in Labor Studies. (1-4 Units)

Prerequisite: Consent of instructor. Course of special interest for students in the selected area of study. Topic and content will vary as announced.

Offered As needed

LBR 411. Contracts & Negotiations. (3 Units)

The process of negotiating, writing and enforcing a labor contract.

An overview of the historical events that have affected contemporary negotiation practices. A survey and analysis of labor contracts in various sectors of industry, including a workshop in contract writing and negotiation.

Offered Fall

LBR 412. Labor Law. (3 Units)

Legal history of the American labor movement. Survey of federal and state laws regulating employment, collective bargaining, contract clauses, arbitration, collective actions, lockouts, unfair labor practices and fair employment practices.

Offered Spring

LBR 490. Seminar In Labor Studies. (3 Units)

Prerequisite: Senior standing or consent of instructor. An integrative course to study selected topics, to develop an overview of the field and to relate theory and practical application. Students will develop seminar papers as they complete an internship in a labor organization or research an area of labor studies. Three hours of seminar per week.

Offered Infrequent

LBR 494. Independent Study. (1-3 Units)

Prerequisites: Consent of the instructor Independent study of particular topics in the subject area under the direction of a member of the subject department faculty. Repeatable course.

Offered Fall, Spring, Summer

LBR 495. Special Topics. (1-4 Units)

Prerequisite: Consent of instructor. Advanced course of special interest for students in the selected area of study. Topic and content will vary as announced.

Offered Fall, Spring

LBR 496. Practicum Labor Studies. (3 Units)

Prerequisites: Consent of instructor is required. Directed field research or supervised internship. Training and research in the practice and policies of a labor organization or labor-related governmental agency. Repeatable course.

Offered Spring

LBR 590. Graduate Seminar. (3 Units)

Co-requisite: MUS 180 is required. Studio instruction in an applied area that complements and provides additional depth to that which is offered in MUS 180. In depth study of Etudes, scales, arpeggios, and supplemental solo repertoire.

Offered As needed

LBR 594. Independent Study. (3 Units)

A special project involving research or creative work in consultation with a faculty member. Repeatable for credit.

Offered As needed

LBR 595. Special Topics in Labor Studies. (3 Units)

Prerequisite: Consent of Instructor required. An intensive study of an issue or a concept in Labor Studies of special interest to faculty and students. Topics vary. Repeatable course

Offered As needed

LBR 598. Directed Research. (1-3 Units)

Independent research under direction of supervising faculty member in Labor Studies or related field. A-B/NC grading only.

Offered As needed

LBR 599. Graduate Capstone. (1-3 Units)

Supervised thesis or special project in Labor Studies.

Offered As needed

Labor Studies, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

No minor required.

Major Requirements (30 units)

The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

Students are strongly encouraged to either pass the GVAR or take The Writing Adjunct (IDS 397 Writing Adjunct and IDS 398 Writing Adjunct (Competency Certification)) when starting this program.

Core Courses (18 units)

| Code | Title | Hours |
|------------------------|--------------------------|-------|
| Required Course | | |
| LBR 490 | Seminar In Labor Studies | 3 |
| Electives | | |

| | | |
|---|---------------------------|----|
| Select five courses from the following: | | 15 |
| ECO 330 | Labor Economics | |
| HIS 348 | Labor In American Society | |
| LBR 411 | Contracts & Negotiations | |
| LBR 412 | Labor Law | |
| SOC 315 | Sociology Of Work | |

Total Hours **18**

Note: When appropriate to the focus, courses such as IDS 326 Perspectives In Human Studies, or MGT 310 Management Theory, or MGT 312 Organizational Behavior may be substituted with advisor's approval.

Related Courses in Field of Emphasis: Four courses (12 units)

With advisement students will select 4 courses related to Labor Studies organized around a theme or a focus such as "labor and political economy," "women workers," "race and ethnicity in the labor force," "labor and culture," and "legal and negotiating skills for the workplace." Students may construct a field from the following courses, from other courses not used in the core section, and from other appropriate courses with advisor's approval. For example, a student interested in "legal and negotiating skills for the workplace" might use courses from political science that deal with the law. The following courses may also be used to construct a field of emphasis:

| Code | Title | Hours |
|---------|--|-------|
| LBR 495 | Special Topics | 1-4 |
| LBR 496 | Practicum Labor Studies | 3 |
| PUB 315 | Labor-Management Relations in Government | 3 |
| ACC 230 | Financial Accounting | 3 |
| PSY 372 | Industrial and Organizational Psychology | 3 |

Program Learning Outcomes

- Demonstrate knowledge of current labor law.
- Demonstrate an understanding of collective bargaining and negotiation strategies.
- Read, analyze and interpret effectively varied sources of information drawn from several disciplines, such as Sociology, History, Women's, and Africana, Asian, and Chicano Studies, and demonstrate how the information and concepts are relevant to Labor issues.
- Write with clarity, organization, and precision and apply critical thinking skills and analyses in written and oral presentations.
- Explain the significance of labor history.
- Exhibit computer and information literacy, including the skills to research with discrimination diverse topics using both the traditional library and other resources.
- Exercise leadership in service learning and/or community or labor organizing, and reflect on leadership experience.
- Demonstrate an understanding and appreciation of both the diversity and the multicultural heritage of the US and the global society.

Labor Studies, Certificate Requirements

This certificate requires completion of eight three-unit courses. Students may receive the certificate while completing a major or minor in Labor Studies or in other fields or without attaining a B.A.

| Code | Title | Hours |
|---|---------------------------|-------|
| Core Requirements | | |
| Select four courses from the following: | | 12 |
| HIS 348 | Labor In American Society | |
| SOC 315 | Sociology Of Work | |
| LBR 411 | Contracts & Negotiations | |
| LBR 412 | Labor Law | |
| LBR 490 | Seminar In Labor Studies | |
| LBR 495 | Special Topics | |
| LBR 496 | Practicum Labor Studies | |
| Related Courses | | |
| Select four additional courses from the following or from courses listed above, but not used to satisfy the Core Requirements: ¹ | | 12 |
| ECO 330 | Labor Economics | |

| | |
|--------------------|--|
| PUB 315 | Labor-Management Relations in Government |
| PSY 372 | Industrial and Organizational Psychology |
| Total Hours | 24 |

¹ Other courses such as IDS 326 Perspectives In Human Studies may be substituted with advisor's approval when they deal with issues of work, unions, the economy, and labor-relations skills.

Labor Studies, Minor

Requirements

| Code | Title | Hours |
|---|--|-----------|
| Core Courses | | |
| Select three courses from the following: | | 9 |
| LBR 411 | Contracts & Negotiations | |
| LBR 412 | Labor Law | |
| HIS 348 | Labor In American Society | |
| SOC 315 | Sociology Of Work | |
| LBR 490 | Seminar In Labor Studies | |
| Related Courses | | |
| Select two courses from the following: ¹ | | 6 |
| ANT 346 | Anthropology Of Work | |
| ECO 330 | Labor Economics | |
| PUB 315 | Labor-Management Relations in Government | |
| Total Hours | | 15 |

¹ When they deal with issues of work, unions, the economy and labor-relations skills, other courses such as IDS 326 Perspectives In Human Studies may be substituted with advisor's approval. Courses listed above under Core Courses that are not used to fulfill the nine core units may also be used here.

Language and Linguistics

College of Arts and Humanities

Department of English

Program Description and Features

The Linguistics B.A. (36 units) provides insights about how human languages work. We cover topics such as the structure of the world's languages, the production and perception of sounds, the formation of words and sentences, the creation and understanding of meaning, how people use two languages, how languages change over time, and the connection between language-identity-society, just to name a few topics. Our program provides the tools to investigate human language and to reflect upon its function within society and educational systems. Linguistics degrees provide students with general organizational and analytical skills and help to train them in analyzing data.

These skills provide a useful foundation for many careers and graduate school. Linguistics majors pursue careers in English language instruction, speech language pathology, lexicography, communications, marketing, forensic linguistics, data analysis, law school, and administration, in addition to students moving on to graduate studies in theoretical or

applied linguistics, computational linguistics, or TEFOL/ESOL, among others.

Academic Advisement

All full-time faculty serve as academic advisors. Students may either choose their own advisor, or they might be assigned to advisors. Students who would like to be assigned to an advisor should come to the department office for assistance.

Preparation

Four years of high school college-preparatory English courses must have been completed in partial fulfillment of the admission requirements of The California State University.

Graduation with Honors

Undergraduate students who have met the following criteria will be awarded departmental honors at graduation:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. An overall grade point average of 3.6 for upper-division courses taken for the major in Language and Linguistics at CSUDH.

- Language and Linguistics, Bachelor of Arts (p. 652)

Andrew Kalaidjian, chair

Iara Mantenuto, Malik Stevenson

Emeriti Faculty

Burckhard Mohr, Vanessa Wenzell, Ed Zoerner

ENG 107. Reading & Writing LA. (3 Units)

Through reading and writing about place and identity, students are introduced to threshold concepts in writing studies to increase their metacognitive skills, deepen their sense of belonging, and strengthen their growing academic identities.

Offered Summer

ENG 108. Freshman Composition I: Stretch 1. (3 Units)

College-level reading and writing taken over two terms (ENG 108/109) that incorporates additional instruction and support to develop rhetorical knowledge and critical thinking and engage students in writing processes, research and practice of conventions. CR/NC grading.

Offered Fall

ENG 109. Freshman Composition I: Stretch 2. (3 Units)

College-level reading and writing taken over two terms (ENG 108/109) that incorporates additional instruction and support to develop rhetorical knowledge and critical thinking and engage students in writing processes, research and practice of conventions. Graded A-C/NC.

Offered Spring

ENG 110. Freshman Composition Accelerated. (3 Units)

College-level reading and writing that develops rhetorical knowledge and critical thinking and engages students in writing processes. Graded A-C/NC.

Offered Fall, Spring

ENG 111. Freshman Composition II. (3 Units)

Prerequisite: ENG 110 or equivalent. Reinforcement of basic writing skills with emphasis on persuasion and argumentation, including a documented essay. Aids in writing convincing arguments and assembling, organizing, and documenting evidence supporting a thesis. Graded A-C-/NC.

Offered Fall, Spring, All terms

ENG 112. Freshman Composition Supported. (3 Units)

College-level reading and writing that incorporates additional instruction and support to develop rhetorical knowledge and critical thinking and engage students in writing processes, research, and observation of conventions. A-C-/NC grading.

Offered Infrequent

ENG 150. Languages of the World. (3 Units)

Introduction to linguistics as a social science. Includes an overview of the world's languages and language families, with an investigation of how social issues and language impact each other. Not open for credit toward the English major.

Offered Fall, Spring

ENG 194. Independent Study in English. (1-3 Units)

Offered As needed

ENG 195. Special Topics in Composition. (1-4 Units)

Offered Infrequent

ENG 202. English Literature to 1642. (3 Units)

Survey of British poetry, drama, and prose to 1642. Offered Fall, Spring
Offered All terms

ENG 203. English Literature: 1642-1832. (3 Units)

Survey of British poetry, drama, and prose, 1642-1832. Offered Fall, Spring.

Offered Fall, Spring, Summer

ENG 204. English Literature: 1832- Present. (3 Units)

Survey of British poetry, drama, and prose, 1832- present. Offered Fall, Spring

ENG 205. Literary Genres and Devices. (3 Units)

Prerequisite: Completion of GE Area A2: Written Communication.

Introduces a series of literary genres including stories, poems, plays, essays, and the novel, with characteristic devices including point of view, symbol, plot and imagery.

Offered Fall

ENG 210. Study of Language. (3 Units)

Prerequisite: Completion of G.E. Area A2. Forms of prose fiction from different periods and national literatures. Written exercises required.

Offered Fall, All terms

ENG 230. Literature and Popular Culture. (3 Units)

Ways of reading literature and popular culture to enhance understanding, appreciation, and enjoyment. Requires frequent writing assignments.

Offered Fall, Spring

ENG 240. American Literature to 1865. (3 Units)

Offered All terms

ENG 241. American Literature after 1865. (3 Units)

Intensive study of selected American works after 1865, with reading across periods, genres, and traditions, including texts by underrepresented and marginalized groups. Offered Fall, Spring.

Offered All terms

ENG 271. Introduction to Creative Writing. (3 Units)

Experiences in creative writing through encounters with selected literary works.

Offered Fall, Spring, Summer

ENG 302. English Literature to 1642. (3 Units)

Prerequisite: Completion of G.E. Area A2 Written Communication . Survey of British poetry, drama, and prose to 1642.

Offered Fall, Spring

ENG 303. English Literature: 1642-1832. (3 Units)

Prerequisite: Completion of G.E. Area A2: Written Communication. Survey of British poetry, drama, and prose, 1642-1832.

Offered Fall, Spring

ENG 304. English Literature: 1832-Present. (3 Units)

Prerequisite: Completion of G.E. Area A.1. Composition. Survey of British poetry, drama, and prose, 1832-present.

Offered Fall, Spring

ENG 305. Critical Reading of Literature. (3 Units)

Prerequisite: Completion of G.E. Area A.1. Analysis of literature to develop critical reading skills. Intended for students in Liberal Studies and Linguistics; may not be counted toward major/minor in English with Literature option. Written exercises required.

Offered Fall, Spring, Summer

ENG 306. Backgrounds of Literature. (3 Units)

Prerequisite: Completion of G.E. Area A.1. Survey of traditional sources of world literature, including Greek and Roman mythology, Old and New Testaments, and early traditions of Asia, Africa, and the Americas

Offered Spring

ENG 307. Practice in Literary Criticism. (3 Units)

Prerequisite: Completion of G.E. Area A2: Written Communication. Practice in literary criticism from contemporary theoretical perspectives. For Literature majors and minors in English. Written exercises regularly required.

Offered Fall, Spring

ENG 308. Critical Approaches to Children's Literature. (3 Units)

Prerequisite: Completion of G.E. Area A2. Critical analysis of children's literature from its inception to the present including the concept of the child as a historical, social, cultural, and political construct. Examines genre and form in literary and visual works from various perspectives. 3 hours lecture.

Offered Fall, Spring, Summer

ENG 311. Phonology. (3 Units)

Prerequisite: Completion of G.E. Area A2. The phonetics of a variety of languages and the phonetic phenomena that occur in natural languages. Practice in the perception and transcription of such phenomena.

Introduction to the traditional and current views of phonological theory.

Offered Fall, All terms

ENG 312. Morphology. (3 Units)

Prerequisite: Completion of G.E. Area A2. Descriptive and historical (etymological) analysis of the structure of words in English and other languages: common roots, base forms, and affixes; rules of word formation; semantic change.

Offered Spring

ENG 314. English Syntax: Traditional. (3 Units)

Prerequisite: Completion of G.E. Area A2. The structure and meaning of sentences, approached through traditional models of grammar; the role of syntax in writing and composition.

Offered Fall, Spring, All terms

ENG 315. Theoretical Syntax. (3 Units)

Prerequisite: Completion of G.E. Area A.1. The structure and meaning of sentences approached through any current theoretical model of syntax. Offered Fall

ENG 317. Black English Language and Culture. (3 Units)

This course examines the linguistic features and the cultural, social, historic, and communicative aspects of Black English in the US and across the African and African American diaspora. Students will learn how to create community-based research to explore the past, present and future of Black English in a globalized society and in educational discourse. Students will then learn the writing conventions of sociolinguistics research and critically reflect on our own intersectional experiences and interactions with Black English, in order to position ourselves as sociolinguists within the broader scholarly and academic community. A grade of C or better in this course fulfills the GEAR requirement for Linguistics majors. Offered Spring, All terms

ENG 320. Literacy, Power, and Identity. (3 Units)

Exploration of literacy as a sociocultural practice. Connections between literacies, individuals and social identities, social and political power structures, and their pedagogical implications

ENG 325. Poetry. (3 Units)

Prerequisite: Completion of G.E. Area A2. Analysis of various forms of poetry, with an emphasis on American and British writers from various eras. Students will learn and apply conventions of oral poetry. Written exercises required. Offered Fall, Spring

ENG 326. Prose Fiction. (3 Units)

Offered Fall

ENG 327. Drama. (3 Units)

Prerequisite: Completion of G.E. Area A2. Forms of drama by major playwrights from different periods and national literatures. Written exercises required. Offered Spring

ENG 335. Readings in World Literature. (3 Units)

Prerequisite: Completion of G.E. Area A2. Intensive study of selected major writers from the world's literature, read in translation. Offered Fall, Spring

ENG 340. American Literature to 1865. (3 Units)

Prerequisite: Completion of G.E. Area A2. Composition. Intensive study of selected American works. Offered Fall, Spring

ENG 341. American Literature: 1865-Present. (3 Units)

Prerequisite: Completion of G.E. Area A2. Composition. Intensive study of selected American works. Offered Fall, Spring

ENG 342. African American Literature. (3 Units)

Study of works by African American authors. Historical development of the tradition from its beginnings to the present. Genres include poetry, drama, fiction, and autobiography. Key themes include connections to folk and oral traditions and the role of literature in social protest. Offered Fall, Spring

ENG 343. African-American Poetry and Drama. (3 Units)

Prerequisite: ENG 111. Historical development of African-American poetry from its roots. Study of major African-American plays. Focus on poetry and drama as media informing particular aspects and textures of the Black American experience. Offered Infrequent

ENG 344. African-American Prose. (3 Units)

Prerequisite: ENG 111. Selected African-American works of fiction and non-fiction. Analysis of themes, techniques and symbols. Special attention given to folkloric elements; i.e., blues, dozens, folktales, etc., as they are employed in the literature. Offered Infrequent

ENG 345. Latino/a Literature. (3 Units)

Prerequisite: ENG 111. Study of works by U.S. Latino/a authors. Attention to historical and cultural contexts. Comparative analyses of themes such as identity and community with respect to race, class, gender, sexuality, migration and citizenship. Offered Fall, Spring

ENG 346. Native American Literature. (3 Units)

Study of works by indigenous writers of North America in their historical, cultural, and tribal contexts. Readings across periods and multiple genres (fictions, poetry, memoir, oral traditions). Key topics include race, gender, sexuality, class nationality and sovereignty. Prerequisite: Completion of G.E. Area A.1. Composition

ENG 347. Literature of Ethnicity and Gender. (3 Units)

Prerequisite: Completion of first year composition. Readings in such areas as Latino American, Asian American, and women's literature. Topic will vary. May be repeated up to six units for the major or minor in English. Offered Fall, Spring

ENG 350. Advanced Composition. (3 Units)

Prerequisite: Completion of GE Area A2 Written Communication. Continued study of writing processes and rhetorical communication, with emphasis on literacy within and across disciplinary contexts and how to negotiate the attitudes and conventions of various discourse communities. May not be counted toward major/minor in English. Satisfies Graduation Writing Assessment Requirement (GEAR). Graded A-C/NC. Offered Fall, Spring, Summer

ENG 351. Composition for Elementary School Teachers. (3 Units)

Prerequisite: Satisfaction of the GEAR. Advanced writing course. Focus on children's writing development, writing process and techniques for teaching composition, and further development of writing abilities of prospective elementary school teachers. Offered Infrequent

ENG 352. Writing and Speaking Skills for Management. (3 Units)

Prerequisites: Satisfaction of the GEAR. Principles and skills of effective communication within organizational management. This course concentrates on eliciting desired responses through various types of business communication in writing. May be counted only once toward major/minor and twice for elective credit. Graded A-C/NC. Repeatable course. Offered Infrequent

ENG 360. Heroes and Antiheroes. (3 Units)

Prerequisite: Completion of G.E. Area A2. Composition. Students will investigate the cultural assumptions and implications lying behind the archetypes of heroism and anti-heroism. Texts will be drawn from mythology, literature, stage drama, and film, with side glances at philosophy and psychology. Offered As needed

ENG 362. Environment in Literature & Culture. (3 Units)

Prerequisite: Completion of G.E. Area A2 Composition. Analysis of the influence of environment on literature with attention to rural vs. urban spaces, nature vs. culture, climate change and environmental justice. Offered As needed

ENG 364. Literary Utopia. (3 Units)

Prerequisite: Completion of G.E. Area A2. Composition. Critical study of traditions of utopian and dystopian literature, with emphasis on genre definitions and intersections with science fiction, fantasy, history, philosophy, and politics.
Offered As needed

ENG 398. Directed Research. (1-3 Units)

Prerequisites: Senior standing and consent of instructor. Investigations in the historical and/or theoretical foundations of modern linguistics. Repeatable course. Three hours of seminar per week.
Offered Infrequent

ENG 413. History of the English Language. (3 Units)

Prerequisite: Completion of G.E. Area A2. Composition. The evolution of English from its Indo-European origins, through Old and Middle English, to the rise and spread of Modern English.
Offered Fall, All terms

ENG 414. American English. (3 Units)

Prerequisite: Completion of G.E. Area A2. Composition. American English from colonial times to the present. Contacts with native, colonial, and immigrant languages and regional, social, and ethnic dialects.
Offered Spring

ENG 419. Psycholinguistics. (3 Units)

Prerequisite: Completion of G.E. Area A2. ENG 210 or ENG 314 or one course in psychology. Current theory and research in the psychology of language and its historical background, including experiments on speech production and comprehension, acquisition of language by children, and disorders of speech and language.
Offered Infrequent

ENG 420. Linguistic Analysis. (3 Units)

Prerequisite: Completion of G.E. Area A2. ENG 311 or ENG 314. Descriptive and formal analysis of phonological, syntactic, and/or historical data from a variety of human languages. Repeatable for credit.
Offered Fall

ENG 433. Thematic Approaches to Literature. (3 Units)

Prerequisite: Completion of G.E. Area A2. An exploration of literature organized around such themes as Women Writers or Death and Dying, using works from a variety of cultures and historical periods. Repeatable course.
Offered Infrequent

ENG 451. Advanced Creative Writing. (3 Units)

Prerequisites: ENG 111 and consent of instructor. Practice in various forms of imaginative writing. Repeatable course.
Offered Spring

ENG 457. Advanced Composition for Teachers. (3 Units)

Prerequisite: Satisfaction of the G.W.A.R. Advanced writing course for prospective secondary school teachers, designed to develop understanding of writing process and techniques for teaching composition. Course also stresses development of students' own strengths as writers.
Offered Fall

ENG 465. Chaucer. (3 Units)

Prerequisite: Completion of G.E. Area A2. Composition. Chaucer's major poetry, its historical and literary background.
Offered Fall

ENG 467. Shakespeare. (3 Units)

Prerequisite: ENG 307 is required. Literary analysis of selected comedies, histories, and tragedies. Students will learn and apply performative aspects of Shakespeare's plays.
Offered Fall, Spring, All terms

ENG 472. Creative Nonfiction Workshop. (3 Units)

Practice in various forms of contemporary creative nonfiction, such as memoir, essay, literary journalism. Analysis of a wide range of models, exercises in invention techniques, discussion of writing processes, and workshopping of students' drafts and revisions. Repeatable for credit.
Offered Fall

ENG 473. Writing Center Theory and Practices. (3 Units)

The history and theoretical foundations of writing centers and writing tutoring. Frequent writing assignments as well as best practices in the teaching of writing.
Offered Spring, Summer

ENG 476. Individual Authors and Topics Pre-1700. (3 Units)

Prerequisite: Completion of G.E. Area A2. Composition. Intensive study of a major author, group of authors, or focused topic from the pre-1700 period.
Offered Fall

ENG 477. Individual Authors and Topics Post-1700. (3 Units)

Prerequisite: Completion of G.E. Area A.1. Composition. Intensive study of a major author, group of authors, or focused topic from the post-1700 period.
Offered Spring

ENG 478. Current Issues in Rhetoric and Composition. (3 Units)

Intensive study of selected topics in rhetoric and composition such as invention and teaching of writing, issues in literacy instruction, rhetoric and contemporary culture, composition and cognitive development, the composing process in a rhetoric framework, linguistic approaches to rhetoric. Three hours of seminar per week. Offered Fall.

ENG 485. Literary, Media and Culture Studies. (3 Units)

Prerequisite: Completion of G.E. Area A.1. Composition. Practice in devising strategies appropriate to the needs of students in grades 7-12. Emphasis on techniques of developing textual, media, and cultural literacies, of analyzing genres, of making literature, media, and popular culture accessible, and of generating essay topics from these sources.
Offered Spring

ENG 486. ESL Teaching Methods. (3 Units)

Prerequisite: Completion of G.E. Area A2. Composition. Investigation of approaches, methods, and techniques used in second language instruction.
Offered Spring

ENG 487. Introduction to Second-Language Learning and Teaching. (3 Units)

Prerequisite: Completion of G.E. Area A.1. Composition. Focus on linguistic, social, and cultural factors in schooling language-diverse students. Areas of concentration include first and second-language acquisition, history of second-language teaching, current second-language theoretical frameworks, and dual language teaching strategies.
Offered Fall, Spring

ENG 490. Seminar in Literature. (3 Units)

Prerequisite: Consent of instructor. Intensive study of one or more authors, a single historical period, a literary movement or genre, or an aspect of literary criticism. This course examines disciplinary discourse through formal and informal written assignments that stress the importance of literary analysis, research, and revision. Repeatable course. A grade of C or better in this course fulfills the GVAR requirement for all English Literature and English Education majors and minors. Offered Fall, Spring

ENG 492. Seminar in Linguistics. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Study of American writers, texts and topics primarily before 1900. Repeatable course. Three hours of seminar per week. Offered Spring, All terms

ENG 494. Independent Study. (1-4 Units)

Prerequisites: Consent of instructor and department chair. Intense reading or an original research project or creative writing under faculty supervision. Arrangements must be made a semester in advance of registration. Repeatable course. Offered As needed, All terms

ENG 495. Special Topics in English. (3 Units)

Variable authors and texts, literary periods, or analytical approaches and methodologies. Uses upper-division research techniques to produce sustained critical arguments. Offered As needed

ENG 496. Internship. (1-3 Units)

Prerequisite: Consent of Instructor, restricted to majors. Under the direction of the internship faculty associate, students work in various approved internship opportunities. Repeatable course. Credit/no credit grading. Offered As needed

ENG 497. Directed Reading. (1-3 Units)

Prerequisites: Consent of instructor and department chair. Extensive reading in selected areas under faculty supervision. Repeatable course. Offered Infrequent

ENG 498. Directed Research. (1-3 Units)

Offered Infrequent

ENG 501. Advanced English Studies. (3 Units)

Prerequisites: Graduate Standing or Consent of instructor. Introduces students to the interdisciplinary fields of English studies, including literature, rhetoric and composition, and linguistics. This course fulfills the Oral Requirement of the MA in English: Literature Option and MA in English: Literature Option with Rhetoric and Composition. Offered Fall

ENG 513. History of English Language. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. The evolution of English from its Indo-European origins, through Old and Middle English, to the rise and spread of Modern English. Offered Fall odd

ENG 514. American English. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. American English from colonial times to the present. Contacts with native, colonial and immigrant languages and regional, social and ethnic dialects. Offered Fall even

ENG 530. Seminar: Studies in Medieval Literature. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. A study of major works in English literature before 1500. Some focus on major continental analogues and critical methodology. Majority of the texts read in translation. Repeatable course. Three hours of seminar per week. Offered Spring

ENG 535. Seminar: Studies in Renaissance Literature. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Major works in English literature from 1500-1660. Emphasis on such representative writers as More, Spenser, Shakespeare, Marlowe, Jonson, Donne, Bacon and Milton. May include continental contemporaries such as Montaigne and Machiavelli. Repeatable course. Three hours of seminar per week. Offered Fall

ENG 540. Seminar: Studies in Restoration and Eighteenth-Century Literature (1660-1798). (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Consent of instructor and department chair. Literature of the Restoration, Neoclassic, and Sensibility eras. May include readings that provide historical, philosophical, or cultural content. Repeatable course. Three hours of seminar per week. Offered Spring even, All terms

ENG 543. Seminar: Studies in Romantic Literature (1798-1832). (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Consent of instructor and department chair. Selected studies in the Romantic movement in English literature, including such precursors as Burns and Blake. Repeatable course. Three hours of seminar per week. Offered Fall odd

ENG 545. Literary Criticism. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Major works in literary criticism selected from Plato to the present. Offered Spring, All terms

ENG 546. Seminar: Studies in Victorian Literature (1832-1901). (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. A study of major writers from the Great Reform Bill to the fin de siècle with an emphasis on literary responses to emerging scientific thought, social consciousness, and religious issues. Repeatable course. Three hours of seminar per week. Offered Fall even

ENG 549. Seminar: Modern British Literature. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Selected literary study of the modern period in England, Ireland, and the Commonwealth, as typified by such novelists and poets as Conrad, Yeats, Lawrence, Joyce, Woolf, Forster, Eliot, Auden, Thomas, Greene, and Lessing. Repeatable course. Three hours of seminar per week. Offered Spring

ENG 552. Sem: Studies In American Literature to 1900. (3 Units)

Prerequisites: Consent of instructor and department chair. Comparative study of genres, literary movements, or authors over more than one period. Repeatable course. Three hours of seminar per week. Offered Spring odd

ENG 555. Seminar: Studies in American Literature After 1900. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Study of American writers, texts, and topics primarily after 1900. Repeatable course. Three hours of seminar per week. Offered Fall

ENG 570. Seminar in Writing. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Intensive training in writing. Advanced study of techniques of prose discourse. Frequent writing assignments. Repeatable course. Three hours of seminar per week.
Offered Fall

ENG 571. Discourse Analysis. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Analysis and description of structures and functions of language beyond the sentence level. May include textual and conversational analysis; classical rhetorical canons; speech acts; scripts/information structures; cohesion, coherence, deixis; spoken and written discourse. Three hours of seminar per week.
Offered Spring

ENG 572. Creative Nonfiction Workshop. (3 Units)

Practice in various forms of contemporary creative nonfiction, such as memoir, essay, literary journalism. Analysis of a wide range of models, exercises in invention techniques, discussion of writing processes, and workshopping of students' drafts and revisions. Repeatable for credit.
Offered Fall

ENG 573. Writing Center Theory and Practices. (3 Units)

Prerequisite graduate standing or Consent of Instructor. The history and theoretical foundations of writing centers and writing tutoring. Frequent writing assignments as well as best practices in teaching of writing.

ENG 574. Research Methods and Discourses in Composition and Rhetoric. (3 Units)

Advanced study in research methodologies, scholarly discourses, and means of knowledge production in composition/rhetoric and writing studies. Frequent writing and hands-on practice in text-based and empirical approaches to inquiry. Three hours of seminar per week.

ENG 575. Teaching Of Composition. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Theory and practice in teaching composition. Three hours of seminar per week.
Offered Fall

ENG 576. History and Theories of Rhetoric. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Major theories of rhetoric from ancient Greece to the present. Role of rhetoric in the history of ideas. Emphasis on multiple notions of rhetoric and attitudes toward it. Three hours of seminar per week.
Offered Spring

ENG 577. Current Issues in Rhetoric and Composition. (3 Units)

Prerequisite: Graduate Standing or Consent of instructor. Intensive study of selected topics in rhetoric and composition such as invention and the teaching of writing, issues in literacy instruction, rhetoric and contemporary culture, composition and cognitive development, the composing process in a rhetorical framework, linguistic approaches to rhetoric. Repeatable course. Three hours of seminar per week.
Offered Fall

ENG 581. Semantics, Pragmatics and Discourse. (3 Units)

Overview of semantics and the major approaches to pragmatics and discourse analysis. Three hours of seminar per week.
Offered Spring

ENG 582. Seminar: Linguistic Analysis. (3 Units)

Seminar in the descriptive and formal analysis of phonological, syntactic, and/or historical data from a variety of human languages. Repeatable course. Three hours of seminar per week.
Offered Fall

ENG 583. Seminar: Psycholinguistics. (3 Units)

Seminar in current theory and research in the psychology of language and its historical background, speech production and comprehension, acquisition of language, disorders of speech and language. Three hours of seminar per week.
Offered Infrequent

ENG 584. Seminar: Sociolinguistics. (3 Units)

Examinations of varieties of English and social aspects of language use. Topics include dialectology, pidgin and creoles, bilingualism, code-switching, and intercultural communication. Three hours of seminar per week.
Offered Fall, Spring

ENG 585. Second Language Acquisition. (3 Units)

Prerequisites: Consent of instructor and department chair. Theories of second-language acquisition second-language learning, bilingualism, and sociocultural variables of language uses, with particular emphasis on the young adult and adult learner. Three hours of seminar per week.
Offered Fall

ENG 586. ESL Teaching Methods. (3 Units)

Prerequisites: Graduate standing. Investigation of approaches, methods, and techniques used in second language instruction.
Offered Spring

ENG 587. Seminar: Current Issues in TESL/Applied Linguistics. (3 Units)

Intensive study of selected topics in TESL/Applied Linguistics such as ESL Writing/Composition, Reading and Vocabulary Acquisition, Pedagogy of Spoken English, Curriculum and Program Design, Testing/Evaluation. Repeatable course. Three hours of seminar per week.
Offered Fall

ENG 588. Sem:Pedag Gram For TESOL. (3 Units)

Examination of areas of English grammar typically taught to non-native speakers. To familiarize prospective ESL teachers with classroom terminology, techniques and materials. Develop ability to analyze and explain grammatical phenomena in terms accessible to ESL students.
Offered Spring

ENG 590. Seminar In Literature. (3 Units)

Prerequisite: Consent of chair. Study of a writer, period, genre, theme, or problem in literature. Repeatable course. Three hours of seminar per week.
Offered Infrequent

ENG 591. Integrative Seminar in Literature. (3 Units)

Prerequisite: FRE 220 or equivalent. A reading, composition, and discussion course concerned with elements of style and syntax, with emphasis on creative writing by students.
Offered Infrequent

ENG 592. Seminar:Topics in Linguistics. (3 Units)

Prerequisites: Consent of instructor and department chair. Advanced topics in phonological, syntactic, historical-comparative or contrastive theory and analysis. Repeatable course. Three hours of seminar per week.
Offered Spring

ENG 593. Research Methods in Applied Linguistics. (3 Units)

Prerequisites: Consent of instructor and department chair. Survey of research methods in applied linguistics, including problem description, data collection and analysis, interpretation of results. Preparation of Final Project. Three hours of seminar per week. Repeatable but may count only once toward the MA degree.
Offered Infrequent

ENG 594. Independent Study. (1-3 Units)

Prerequisites: Consent of instructor and department chair. In consultation with a faculty member, the student will investigate in detail current scholarship in some area, or will undertake a project involving original research or creative writing. Repeatable course.

Offered As needed

ENG 595. Special Topics. (3 Units)

An intensive study of a selected issues in literature or linguistics. Repeatable course. Three hours of seminar per week.

Offered Infrequent

ENG 597. Directed Reading. (1-3 Units)

Prerequisites: Consent of instructor and department chair. Extensive reading in selected areas under the guidance of a faculty mentor. Repeatable course.

Offered Infrequent

ENG 600. Grad Continuation Course. (1 Units)

Graduate students who have completed their coursework but not their thesis, project, or comprehensive examination, or who have other requirements remaining for the completion of their degree, may maintain continuous attendance by enrolling in this course. Signature of graduate program coordinator required.

Offered Fall, Spring

Language and Linguistics, Bachelor of Arts

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Major Requirements (36 units)

| Code | Title | Hours |
|-----------------------------------|------------------------------------|-------|
| Lower Division Courses (6 units) | | |
| ENG 150 | Languages of the World | 3 |
| ENG 210 | Study of Language | 3 |
| Upper Division Courses (30 units) | | |
| ENG 311 | Phonology | 3 |
| ENG 312 | Morphology | 3 |
| ENG 314 | English Syntax: Traditional | 3 |
| ENG 315 | Theoretical Syntax | 3 |
| ENG 317 | Black English Language and Culture | 3 |
| ENG 413 | History of the English Language | 3 |
| ENG 414 | American English | 3 |
| ENG 420 | Linguistic Analysis | 3 |

| | | |
|---|-------------------------|---|
| ENG 492 | Seminar in Linguistics: | 3 |
| Select one additional upper division English course with the assistance of an advisor | | 3 |

Total Hours 36

- Students will apply and evaluate multiple models of language. Students will respond critically to linguistic scholarship and utilize appropriate sources in constructing critical arguments about language.
- Students will write discipline-appropriate reviews and research, using appropriate sources and documentation standards. In both individual and collaborative assignments, student will produce course-appropriate projects and papers. Students will present work orally in a discipline-appropriate format.
- Students will analyze data from a diverse variety of languages. Students will identify and analyze examples of the relationship between language, power and society.
- Students will produce linguistic analyses informed by independent research. Students will locate and evaluate appropriate sources and/or gather linguistic data, for the study of given linguistic phenomena. In writing, students will demonstrate their ability to propose an analysis and/or to reflect on the proposal made. Students will document sources and collect data ethically and appropriately.
- Engage in critical self-reflection and reflection of the material covered in each course to demonstrate an understanding their agency and social responsibility as members of a local and global community, their life-long learning experience and how their knowledge of linguistics can have an impact in society.

¹ Meets GWAR requirement.

Liberal Studies

College of Education

Program Description

Liberal Studies (LBS) is an interdisciplinary undergraduate major for students who intend to become elementary and special education teachers or to pursue related graduate work. Courses leading to the B.A. in Liberal Studies focus on the subject areas taught in elementary schools as well as professional preparation and early fieldwork. LBS is a California Commission on Teacher Credentialing (CTC) approved Elementary Subject Matter Preparation Program (ESM). LBS also offers two Integrated Teacher Education Programs (ITEP) in which students earn a B.A. and a credential for teaching elementary school (multiple subjects) or special education (education specialist mild/moderate support needs).

Highlights of a Liberal Studies Degree

Balanced Learning and a Focus on Social Justice and Racial Equity

The Liberal Studies curriculum covers a broad spectrum of liberal arts and sciences to give future teachers a solid foundation of knowledge and ideas to use in diverse Multiple Subject classrooms. Our curriculum is grounded in theoretical frameworks and sustaining pedagogies that foster critical thought around equity, access and justice.

Depth of Study

Students pursue an area of deeper learning in an approved option within the Liberal Studies Program. This allows them to add more specialized knowledge in a particular area to their well-rounded liberal arts education.

Accelerated Completion of a Credential Program

- The program is an approved Elementary Subject Matter Preparation Program (ESM) meaning that students who successfully complete the Liberal Studies major requirements with a grade of "C" or better will not need to take the CSET.
- Liberal Studies students complete the multiple subject credential program in two semesters instead of three and may also complete requirements towards a credential in special education.
- Liberal Studies also offers three Integrated Teacher Education Program Options (ITEP). Students may earn a B.A. and a credential for teaching elementary school (multiple subjects), teaching elementary school in a dual language setting (multiple subjects with bilingual authorization) or special education (education specialist mild/moderate). Note: Liberal Studies is not currently accepting

students into the Integrated Teacher Education Program Options (ITEP).

Responsive Curriculum

Faculty in the Liberal Studies department are continuously addressing the curriculum to meet the needs of students while also maintaining quality standards, high expectations and relevant, required content in all of our courses.

Preparation

Students preparing to enter the Liberal Studies major should focus on building a strong GPA to facilitate their future entry into credential programs. Community college students planning to transfer should know that several GE courses "double-count" in the Liberal Studies major. These courses are listed at www.assist.org (<http://www.assist.org/>).

Academic Advisement

Liberal Studies students should see an advisor each semester. Advising is available throughout the year. Students requiring information should email lbs@csudh.edu or call (310) 243-3832 to confirm advising schedules. Students on academic notice are required to attend STEPS (Strategies Toward Educational Progress & Success) workshops provided by the COE Student Success Center. Academic notice holds will be lifted by COE Student Success Center after satisfactory completion of STEPS. In addition to program and professional advising, advisors may refer students to other university services on campus.

All students applying to the Liberal Studies major (or current CSUDH students changing their majors) must attend a Liberal Studies Advising Meeting. The meeting includes information about: creating a LBS student file, registration for courses, important university policies, community

Graduation with Honors

Undergraduate majors are eligible to graduate with honors in Liberal Studies if they meet the following criteria:

1. Complete a minimum of 36 units in residence at CSU Dominguez Hills.
2. Maintain a minimum grade point average of 3.5 in all upper-division coursework (300 and 400 level) used to satisfy the requirements for the Liberal Studies major (Core and Option).

Overall Program Structure

The major consists of two parts:

1. **Core** Course Requirements. Students take specific courses in each of five areas: Language and Literature; Mathematics and Science; History and Social Science; Visual and Performing Arts; and Professional Development. These specific courses provide the subject matter background for elementary and special education teachers.
2. **Option** or Depth of Study Course Requirements. Students study a subject area within the major in depth and may choose any approved option. (Integrated Option also requires Depth of Study).

Career Possibilities

Liberal Studies is the preferred undergraduate major for students preparing to teach elementary or special education.

Undergraduate Programs

Bachelor

- Liberal Studies ITEP Mild/Moderated Disabilities Option, Bachelor of Arts (p. 656)
- Liberal Studies, Bachelor of Arts (p. 658)
- Liberal Studies: Integrated (Multiple Subject) Option, Bachelor of Arts (p. 675)

Courses

LBS 203. Introduction to Teaching: Becoming a Transformative Educator. (3 Units)

Students will consider the historical and philosophical foundations of education and state standards that guide effective teaching strategies in this introduction to teaching course. Students will develop the knowledge and dispositions to empower the as reflective, creative and transformative professionals.

Offered Fall, Spring, Summer

LBS 205. Child and Adolescent Development. (3 Units)

Overview of physical, cognitive, social and emotional development from conception through adolescence. Students will explore and reflect on conceptual and theoretical theories and methods as well as best practices for working with children and families in diverse/pluralistic communities.

Offered Fall, Spring, Summer

LBS 212. Service Learning in Urban Elementary Schools. (3 Units)

Introductory course utilizes a service-learning approach to explore culturally and linguistically responsive teaching and learning environments in urban elementary schools. Students will observe, participate and reflect throughout the course with linkages to learning outcomes. Requires 30 hours of service.

Offered Fall, Spring

LBS 300. Early Field Experience. (3 Units)

Prerequisite: California Commission on Teacher Credentialing Certificate of Clearance, current negative TB documentation and scores for all three sections of the CBEST. Provides Liberal Studies majors with planned, structured field experiences in classrooms at the elementary school level (K-6). A minimum of 30 hours of structured, documented observation/participation in public elementary schools (K-6) is required. CR/NC grading.

Offered Infrequent

LBS 301. Schooling in a Multicultural Society. (3 Units)

Prerequisite: LBS 203 is required. Students will explore the themes of social justice education including the complex relationship between education and the multicultural society of the U.S. They will analyze social identities and how discrimination based on these factors translates into school structures, policies and practices.

Offered All terms, Infrequent

LBS 302. Responsive Teaching and Classroom Management. (3 Units)

Prerequisites: LBS 301 and CCTC Certificate of Clearance, Negative TB Documentation and scores from all 3 sections of CBEST are required. Restricted to majors. Corequisite: LBS 303 is recommended. Students observe and think critically about culturally and linguistically responsive teaching and learning environments to develop knowledge of teaching and classroom management strategies and create inclusive, productive and well-structured learning environments. Requires 30 hours of observation in a public school.
Offered All terms, Fall, Spring

LBS 303. Teaching and Learning in Diverse Classrooms. (3 Units)

Prerequisite: LBS 301 Co-requisite: LBS 302 is recommended. Restricted to majors. Examine theory, research and practice on teaching and learning in diverse classrooms. Using knowledge of educational research, child and adolescent development, and data on students and their communities, students analyze, design, and differentiate instruction to engage and support all learners.
Offered Infrequent

LBS 310. Early Language and Literacy. (3 Units)

Concepts and theories of language development and literacy from birth through age five. Topics include language development, play, emergent literacy, and age appropriate literature. Emphasis on urban, diverse and inclusive preschool settings; second language learners and exceptional learners.
Offered Fall, Spring

LBS 330. Bridging Cultures Through Literacy and Learning. (3 Units)

Cultural dimensions of literacy and language acquisition in early years. Strategies for supporting heritage language, teaching comprehensive family literacy, English language development, and valuing culture in home and school. 10 hours of fieldwork in an urban setting with English learners.
Offered Fall, Spring

LBS 340. Early Mathematical Concepts. (3 Units)

Practice, principles and strategies in mathematics ages 0-5. Number sense, classification, measurement and geometry, patterning, mathematical reasoning; tools and manipulatives for teaching mathematics and pre-numeracy; planning, teaching, and evaluating a lesson. 10 hours of fieldwork in an urban preschool setting.
Offered Fall, Spring, Summer

LBS 355. Writing in Education. (3 Units)

Advanced grammar and composition for students preparing to be elementary school teachers. Focuses on professional writing modes and tasks for educators, including analytical educational writing, literature reviews, case studies, classroom observations, and school communications.
Offered Infrequent

LBS 360. Blended Math Methods. (5 Units)

Prerequisite: Admittance to the Integrated Option Program. Designed to develop students' mathematical content knowledge and pedagogical skills necessary for the effective teaching of elementary mathematics in the urban classroom.
Offered Infrequent

LBS 370. Multicultural Studies. (5 Units)

Prerequisite: LBS 203. Integrated Option Only. Students will critically analyze the experiences of diverse students in the U. S. schools by examining the structural and pedagogical implications on students' inter-sectional identities. They will draw on theories about child/adolescent development, learning, and differentiation to design instruction to effectively teach diverse students using the principles of social justice education. A grade of C or better in this course fulfills the GEAR requirement for Liberal Studies majors.
Offered Fall, Spring

LBS 375. The California Experience. (3 Units)

Examination of the California experience through three interrelated social science disciplines: history, geography, and government. Specifically focuses upon academic content which prepares students to teach the broad range of K-8 California Content Standards.
Offered Fall, Spring

LBS 380. Blended Science Methods. (4 Units)

Prerequisite: Admittance to the Integrated Option Program. Students develop content knowledge and pedagogical methods in the natural sciences and technologies with an emphasis on astronomy, geology, meteorology, and oceanography. Inquiry-based teaching, disciplinary skills (including the scientific method), and interdisciplinary knowledge (crosscutting concepts) will be explored and students will reflect on the impact of science and technology on society.
Offered Fall, Spring

LBS 400. Senior Seminar in Liberal Studies. (3 Units)

Prerequisite: LBS 302; must have senior standing. Students will investigate key ideas from the California Curriculum Frameworks and Academic Content Standards. They will demonstrate competence in each of the major multiple subject matter content areas by creating a website portfolio, substantiating their learning each area. Students will also demonstrate an understanding of lesson planning and complete 10 hours of observation and participation in urban school setting.
Offered Fall, Spring

LBS 402. Liberal Studies Integrated Capstone. (2 Units)

Prerequisite: Admittance to Phase 3 of the Credential. Co-requisite: TED 437 is required. This capstone is designed to link theory and practice; students reflect on their learning, connecting subject matter knowledge and teaching. Students substantiate their learning with a philosophy of education paper, website portfolio, and an instructional planning and teaching cycle in an elementary classroom.
Offered Fall, Spring

LBS 405. Engineering and the Arts in the Elementary. (3 Units)

Co-requisite: LBS 400 is recommended. Restricted to majors. Must be a senior. Students will build the theoretical background and practical skills needed to design interdisciplinary, problem-based learning lessons with a focus on engineering and the arts. This will include inquiry teaching, STEAM and the K-8 Standards for Visual and Performing Arts.
Offered Fall, Spring, Summer

LBS 494. Independent Studies in Liberal Studies. (1-3 Units)

Prerequisite: Consent of instructor and Liberal Studies Department Chair. Independent study in a topic related to the Liberal Studies Program.
Offered Infrequent

LBS 495. Special Topics in Liberal Studies. (1-4 Units)

Prerequisite: Consent of instructor and Liberal Studies Department Chair. A course in a topic related to the Liberal Studies Program of special interest to faculty and students for which no current course exists.
Offered As needed

LBS 496. Special Fieldwork in Liberal Studies. (1-3 Units)

Prerequisite: Consent of instructor and Liberal Studies department Chair. Fieldwork experience related to the Liberal Studies Program in settings other than public schools. CR/NC grading. Offered Infrequent

Liberal Studies ITEP Mild/Moderated Disabilities Option, Bachelor of Arts

The program is not currently accepting students.

The ITEP Education Specialist Mild/Moderate Support Needs (MMSN) Option integrates Liberal Studies subject matter with Special Education coursework and methods. The ITEP option leads to a Bachelor of Arts in Liberal Studies, as well as, an Education Specialist Credential in Mild/Moderate Support Needs. Students in this option must also complete a Depth of Study in *Educating Children with Disabilities* and be accepted into the Special Education Credential Program. The B.A. and Credential are a total of 135 units.

Students must complete all courses with a grade of "C" or higher to successfully meet the degree requirements.

Please see a departmental advisor for more details about the ITEP Education Specialist Mild/Moderate Support Needs.

Liberal Studies, Bachelor of Arts Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Options

Minor Requirements

Single field major, no minor required.

Major Requirements (81-92 units)

In addition, the following courses, or their approved transfer equivalents, are required of all candidates for this degree. Students must select one of the options listed.

All courses in this major must be passed with a grade of "C" or higher.

Core Requirements (75 units)

| Code | Title | Hours |
|--|---|----------|
| Area I - Language and Literature | | |
| 1. Select one course from the following: ¹ | | 3 |
| ANT 312 | Language And Culture | |
| ENG 487 | Introduction to Second-Language Learning and Teaching | |
| SPA 311 | Structure Of Spanish | |
| 2. Required Courses | | |
| ENG 305 | Critical Reading of Literature | 3 |
| ENG 308 | Critical Approaches to Children's Literature | 3 |
| TED 407 | Languages in Praxis | 3 |

Area II - Mathematics and Science

| | | |
|---------|---|---|
| BIO 102 | General Biology | 3 |
| BIO 103 | General Biology Laboratory | 1 |
| MAT 107 | Mathematics for Elementary School Teachers: Real Numbers | 3 |
| MAT 207 | Mathematics for Elementary School Teachers: Geometry & Statistics | 4 |
| PHY 300 | Physical Science for Teachers | 4 |
| EAR 416 | Earth Sciences for Teachers | 3 |

Area III - History and Social Science

| | | |
|---------|----------------------------------|---|
| LBS 205 | Child and Adolescent Development | 3 |
| HIS 120 | World History I | 3 |
| | or ANT 102 Ancient Civilizations | |
| LBS 375 | The California Experience | 3 |
| HIS 354 | History of American Immigration | 3 |

Area IV - Visual and Performing Arts

| | | |
|---|----------------------------------|----------|
| 1. Select one of the following: | | 3 |
| ART 100 | Looking At Art | |
| THE 100 | Television Film & Theatre | |
| DAN 130 | Global Dance Perspectives | |
| MUS 101 | Introducing Music | |
| 2. Select one of the following: ² | | 3 |
| ART 301 | Arts/Crafts For Non-Major | |
| DAN 440 | Dance for Children | |
| KIN 447 | Dan Educ in the Elem School | |
| MUS 340 | Music For Children | |
| MUS 440 | Intro To Orff Schulwerk | |
| THE 337 | Creative Dramatics | |
| THE 339 | Multicultural Children's Theatre | |

3. Required Course

| | | |
|--|---|---|
| LBS 405 | Engineering and the Arts in the Elementary | 3 |
| Area V - Professional Development | | |
| LBS 203 | Intersectional and Critical Foundations of Schooling and Teaching | 3 |
| LBS 212 | Service Learning in Urban Elementary Schools | 3 |
| LBS 302 | Responsive Teaching and Classroom Management | 3 |
| LBS 303 | Teaching and Learning in Diverse Classrooms | 3 |
| LBS 370 | Multicultural Studies | 5 |
| LBS 400 | Senior Seminar in Liberal Studies | 3 |
| KIN 425 | Pe In The Elementary Sch | 3 |
| SPE 480 | Educating Exceptional Children and Youth | 3 |

Total Hours **77**

¹ Students in the Spanish Option must take SPA 311 Structure Of Spanish.

² Student must choose a course in a different discipline than for the lower division visual and performing arts course.

Depth of Study (12 -14 units)

Students must select and complete one of the approved options of in-depth areas of study of a relevant subject area. Each option consists of a minimum of 12-14 units.

The courses listed below double count within the Options.

| Code | Title | Hours |
|---------|---|-------|
| ANT 312 | Language And Culture | 3 |
| SPA 311 | Structure Of Spanish | 3 |
| ENG 305 | Critical Reading of Literature | 3 |
| ENG 487 | Introduction to Second-Language Learning and Teaching | 3 |
| MAT 207 | Mathematics for Elementary School Teachers: Geometry & Statistics | 4 |
| ART 100 | Looking At Art | 3 |
| DAN 440 | Dance for Children | 3 |
| THE 337 | Creative Dramatics | 3 |
| MUS 340 | Music For Children | 3 |
| KIN 425 | Pe In The Elementary Sch | 3 |
| LBS 205 | Child and Adolescent Development | 3 |

Anthropology Option (12 units)

| Code | Title | Hours |
|---|---|-----------|
| Ethnology | | |
| Select one of the following: | | 3 |
| ANT 310 | Culture & Personality: Psychological Anthropology | |
| ANT 312 | Language And Culture | |
| ANT 315 | Magic & Religion | |
| ANT 388 | Anthro Theories Of Behav | |
| ANT 389 | Transmission Of Culture | |
| Ethnography | | |
| Select one of the following: | | 3 |
| ANT 330 | North American Indians | |
| ANT 335 | Comparative Cultures | |
| ANT 341 | Folklore | |
| ANT 370 | Peoples Of The Old World | |
| Ancient Civilizations and Prehistory | | |
| Select one of the following: | | 3 |
| ANT 333 | Ancient Peoples Of Mexico | |
| ANT 350 | Prehistory: Africa & Eurasia | |
| ANT 351 | Prehistory of the Americas | |
| Research Methods | | |
| Select one of the following: | | 3 |
| ANT 313 | Meth & Tech In Arch | |
| ANT 375 | Ethnographic Meth & Tech | |
| Total Hours | | 12 |

Art Option (12 units)

| Code | Title | Hours |
|--------------------------------|----------------|-----------|
| ART 100 | Looking At Art | 3 |
| Select three of the following: | | 9 |
| ART 150 | Ceramics 1 | |
| ART 179 | Drawing 1 | |
| ART 180 | Painting 1 | |
| ART 190 | Sculpture 1 | |
| Total Hours | | 12 |

Dance Option (12 units)

| Code | Title | Hours |
|--------------------|-----------------------------|-----------|
| DAN 210 | Ballet I | 2 |
| DAN 220 | Modern Dance I | 2 |
| DAN 330 | Dance Composition I | 2 |
| DAN 355 | Forces and Figures in Dance | 3 |
| DAN 440 | Dance for Children | 3 |
| Total Hours | | 12 |

Early Teaching and Learning Option (12 units)

| Code | Title | Hours |
|--------------------|---|-----------|
| LBS 310 | Early Language and Literacy | 3 |
| LBS 330 | Bridging Cultures Through Literacy and Learning | 3 |
| LBS 340 | Early Mathematical Concepts | 3 |
| PSY 350 | Child Psychology | 3 |
| or LBS 205 | Child and Adolescent Development | |
| Total Hours | | 12 |

Educating Children with Disabilities Option (12 units)

| Code | Title | Hours |
|--------------------|---|-----------|
| SPE 458 | Positive Classroom Environments | 3 |
| SPE 461 | Typical and Atypical development and Assessment Issues in Special and General Education | 3 |
| SPE 462 | Language, Literacy and Cognition | 3 |
| SPE 480 | Educating Exceptional Children and Youth | 3 |
| Total Hours | | 12 |

English Language and Linguistics Option (12 units)

| Code | Title | Hours |
|--------------------|---|-----------|
| ENG 317 | Black English Language and Culture | 3 |
| ENG 351 | Composition for Elementary School Teachers | 3 |
| ENG 414 | American English | 3 |
| ENG 487 | Introduction to Second-Language Learning and Teaching | 3 |
| Total Hours | | 12 |

English Literature Option (12 units)

| Code | Title | Hours |
|--------------------|-----------------------------------|-----------|
| ENG 305 | Critical Reading of Literature | 3 |
| ENG 306 | Backgrounds of Literature | 3 |
| ENG 325 | Poetry | 3 |
| ENG 341 | American Literature: 1865-Present | 3 |
| Total Hours | | 12 |

General Studies Option (18-23 units)

This option is available by consultation with the Department Chair and by petition only. The student and Department Chair will design a course of study with courses that are closely related to form an in depth area of study.

Human Development Option (12 units)

| Code | Title | Hours |
|------------|--|-------|
| PSY 350 | Child Psychology | 3 |
| SOC 322 | Social Environment of Education | 3 |
| PSY 351 | Psychology of Adolescent Experience | 3 |
| or PSY 382 | Psychological Development of the Black Child | |

| | |
|--|-----------|
| Select one of the following: | 3 |
| SOC 369 Juvenile Delinquency | |
| SOC 321 Sociology Of Education | |
| BIO 380 Biology of Childhood and Adolescence | |
| Total Hours | 12 |

Mathematics Option (13 units)

Note: MAT 171 Survey of Calculus for Management and Life Sciences or any mathematics course used to complete the mathematics major, such as MAT 191 Calculus I or MAT 193 Calculus II, may be substituted for any of the courses listed in the Mathematics Option above.

| Code | Title | Hours |
|--|---|-----------|
| MAT 207 | Mathematics for Elementary School Teachers: Geometry & Statistics | 4 |
| MAT 153 | Pre-Calculus with Trigonometry with Lab | 4 |
| Select two courses from the following: | | 6 |
| MAT 131 | Elementary Statistics and Probability | |
| MAT 141 | Computers for Mathematics Teaching | |
| MAT 143 | Problem Solving in Mathematics | |
| Total Hours | | 14 |

Natural Science Option (14 units)

| Code | Title | Hours |
|--------------------|--------------------------------------|-----------|
| PHY 300 | | 4 |
| CHE 102 | Chemistry For The Citizen | 3 |
| CHE 103 | Chemistry Lab for the Global Citizen | 1 |
| GEO 315 | The Weather | 3 |
| or EAR 100 | Physical Geology | |
| BIO 336 | Environmental Biology | 3 |
| or BIO 254 | Human Biology | |
| Total Hours | | 14 |

Physical Education Option (12 units)

| Code | Title | Hours |
|--|--|-----------|
| KIN 305 | Motor Learning | 3 |
| KIN 425 | Pe In The Elementary Sch | 3 |
| KIN 426 | Directed Teaching in Elementary Physical Education | 2 |
| Select two courses from the following: | | 2 |
| KIN 111 | Aerobics | |
| KIN 113 | Social and Folk Dance Activity | |
| KIN 132 | Gymnastics | |
| Select two courses from the following: | | 2 |
| KIN 118 | Basketball | |
| KIN 150 | Soccer/Outdoor | |
| KIN 152 | Softball | |
| KIN 164 | Volleyball | |
| Total Hours | | 12 |

Spanish Option (12 - 24 units)

| Code | Title | Hours |
|--|----------------------|-------|
| Lower Division Prerequisites ¹ | | |
| SPA 110 | Beginning Spanish I | 3 |
| SPA 111 | Beginning Spanish II | 3 |

| | | |
|---|---|-----------|
| SPA 220 | Intermediate Spanish I | 3 |
| SPA 221 | Intermediate Spanish II | 3 |
| Lower Division Required Course | | |
| SPA 280 | Grammar for Spanish Composition ² | 3 |
| Upper Division Required Courses ³ | | |
| SPA 311 | Structure Of Spanish | 3 |
| SPA 341 | Advanced Conversation | 3 |
| SPA 351 | Contemporary Hispanic Culture: Spanish-Speaking America | 3 |
| Total Hours | | 24 |

¹ Students take beginning and intermediate Spanish courses (SPA 110 Beginning Spanish I, SPA 111 Beginning Spanish II, SPA 220 Intermediate Spanish I, and SPA 221 Intermediate Spanish II) as needed - those who have completed two, three, or four years of high-school Spanish or any community college Spanish will be placed in the appropriate semester of college Spanish in consultation with a departmental advisor. Students may get credit for some of these courses through the Advanced Placement Examination in either Language or Literature, and/or by challenging them (but never in descending order), and/or by transferring equivalent courses from other institutions.

² Students must take SPA 280 Grammar for Spanish Composition at CSUDH.

³ Students must take courses at CSUDH.

Special Option (12 units)

A special option, consisting of at least four courses and a minimum of 12 units, in a relevant subject matter area, may be petitioned by the student for consideration.

Theatre Arts Option (12 units)

| Code | Title | Hours |
|--|----------------------------------|-----------|
| Upper Division Required Courses | | |
| THE 337 | Creative Dramatics | 3 |
| THE 339 | Multicultural Children's Theatre | 3 |
| Electives | | |
| Select two courses from the following: | | 6 |
| THE 320 | Speech Skills and Techniques | |
| THE 346 | Theatre Workshop | |
| THE 353 | Playwriting | |
| THE 355 | World Theatre and Drama I | |
| THE 357 | World Theatre & Drama II | |
| Total Hours | | 12 |

Program Learning Outcomes

- Acquire and reflect on knowledge related to the California Commission on Teacher Credentialing content standards for a Multiple Subject Teaching Credential Standards including: Reading, Language, and Literature; Mathematics; Natural Sciences; History and Social Sciences; Visual and Performing Arts; Human Development; and Physical Education
- Develop the ability to critically analyze educational research as it related to educational equity for diverse learners.
- Demonstrate the ability to communicate effectively in oral and written forms in a variety of contexts.

- Participate successfully in elementary field experiences and reflect thoughtfully in order to develop the foundations of critical pedagogy.
- Articulate an understanding of a variety of educational theory and best teaching practices that promote the achievement of a full range of learners.
- Demonstrate professional dispositions that reflect a commitment to promote social justice and educational equity in diverse communities.
- Demonstrate technological and informational literacies for personal academic growth and for facilitating learning in the elementary classroom.

General Studies Option Roadmap

4- Year Roadmap

| Course | Title | Hours |
|---|---|-----------|
| First Year | | |
| Fall | | |
| ANT 102 or HIS 120 | Ancient Civilizations or World History I | 3 |
| ENG 110 | Freshman Composition Accelerated | 3 |
| MAT 105 or MAT 131 or MAT 132 | Finite Mathematics or Elementary Statistics and Probability or Statistics and Probability with Support | 3 |
| THE 120 | Fundamentals of Speech | 3 |
| GE Area E Lifelong Learning and Self-Development | | 3 |
| Hours | | 15 |
| Spring | | |
| LBS 205 | Child and Adolescent Development | 3 |
| BIO 102 | General Biology | 3 |
| BIO 103 | General Biology Laboratory | 1 |
| PHI 120 | Critical Reasoning | 3 |
| HIS 101 | History Of United States | 3 |
| Elective to meet 120 units | | 2 |
| Hours | | 15 |
| Second Year | | |

Liberal Studies: Integrated (Multiple Subject) Option, Bachelor of Arts

The program is not currently accepting students.

The Integrated Option integrates Liberal Studies subject matter with Teacher Education methods. The Integrated Option leads to a Bachelor of Arts in Liberal Studies, as well as a Multiple Subject Credential. Students in this option must complete a Depth of Study and be accepted into the Multiple Subject Credential program. The total number of units for the B.A. and the Credential is 135 units.

Students must pass all courses with a grade of "C" or higher in order to successfully meet the degree requirements.

Please see an advisor for more details about the Integrated Option.

The Integrated Option integrates Liberal Studies subject matter with Teacher Education methods. The Integrated Option leads to a Bachelor of

Arts in Liberal Studies, as well as a Multiple Subject Credential. Students in this option must complete a Depth of Study and be accepted into the Multiple Subject Credential program. The total number of units for the B.A. and the Credential is 135 units.

Students must pass all courses with a grade of "C" or higher in order to successfully meet the degree requirements.

Please see an advisor for more details about the Integrated Option.

Requirements

Core Requirements (71 units)

| Code | Title | Hours |
|---|---|-------|
| Language and Literature | | |
| Select one from the following: | | 3 |
| ANT 312 | Language And Culture | |
| ENG 487 | Introduction to Second-Language Learning and Teaching | |
| SPA 311 | Structure Of Spanish | |
| SPA 311 | Structure Of Spanish (Spanish Option only) | |
| ENG 305 | Critical Reading of Literature | 3 |
| ENG 308 | Critical Approaches to Children's Literature | 3 |
| TED 407 | Languages in Praxis | 3 |
| Mathematics and Science | | |
| BIO 102 | General Biology | 3 |
| BIO 103 | General Biology Laboratory | 1 |
| LBS 380 | Blended Science Methods | 4 |
| MAT 107 | Mathematics for Elementary School Teachers: Real Numbers | 3 |
| MAT 207 | Mathematics for Elementary School Teachers: Geometry & Statistics | 4 |
| PHY 300 | Physical Science for Teachers | 4 |
| History and Social Science | | |
| LBS 205 | Child and Adolescent Development | 3 |
| HIS 120 | World History I | 3 |
| | or ANT 102 Ancient Civilizations | |
| LBS 375 | The California Experience | 3 |
| LBS 370 | Multicultural Studies | 5 |
| Visual and Performing Arts | | |
| Select one of the following: | | 3 |
| ART 100 | Looking At Art | |
| THE 100 | Television Film & Theatre | |
| DAN 130 | Global Dance Perspectives | |
| MUS 101 | Introducing Music | |
| Select one of the following: ¹ | | 3 |
| ART 301 | Arts/Crafts For Non-Major | |
| DAN 440 | Dance for Children | |
| KIN 447 | Dan Educ in the Elem School | |
| MUS 340 | Music For Children | |

Library

In addition to individual one-on-one research consultation services in the use of library resources, the University Library offers a 3 credit course, LIB 151 Fundamentals of Information Literacy, taught by our library faculty. Furthermore, library faculty teach information literacy sessions by request. These sessions may be designed to meet the research requirements of a particular course or information literacy outcomes.

Faculty

Carolyn Caffrey, Amalia Castañeda, Margaret Clarke, Hallie Clawson, Aric Haas, Hannah Lee, Wei Ma, Yoko Okunishi, Dana Ospina, Thomas Philo, Samantha Warriner

Department Office: Library South 5034, (310) 243-3700

Emeriti Faculty

E. Kenneth Bennett, Betty J. Blackman, Jeffrey Broude, Elizabeth Dales, Joanna E. Dunklee, Gail F. Hunt, James F. Hunt, Naomi Moy, Sandra Parham

Courses

LIB 150. Library Skills and Strategies. (2 Units)

Designed to acquaint students with the use of academic libraries. Practical exercises will develop skills for effectively utilizing library resources to fulfill research needs. One hour of lecture and two hours of activity per week. Offered As needed

LIB 151. Fundamentals of Information Literacy. (3 Units)

Explores how we seek, use, acknowledge, and transform information. Critically examines our behaviors and the information systems embedded in society. Focuses on psychological, sociological, and physiological relationships to information. Topics: information privilege, publishing, privacy, research practices, etc.
Offered Fall, Spring

LIB 494. Independent Studies. (1-3 Units)

Prerequisites: Consent of the instructor. Independent study of particular topics in the subject area under the direction of a member of the subject department faculty. Repeatable course.
Offered As needed

LIB 495. Special Topics in Library Research. (1 Unit)

Prerequisite: Consent of instructor. In-depth study of information retrieval in a particular format or discipline, e.g. government documents, on-line databases, business resources. One hour of lecture per week.
Offered As needed

Marital and Family Therapy

College of Health, Human Services, and Nursing
Department of Marital and Family Therapy

Program Description

The Department of Marital and Family Therapy (MFT) prepares students in systemic theory, research, and relational practice to critically and ethically engage concerns of intersectionality, equity, and social justice to improve systems of oppression and promote wellness among individuals, couples, and families of diverse and underserved communities. It offers a three-year, 64-unit MFT degree program structured to provide curriculum and clinical training that meets MFT licensure requirements, according to California Business and Professions Code (BPC) §4980.36. In addition, the Board of Behavioral Sciences (BBS) evaluated this as a qualifying Master of Science (M.S.) required to pursue a marriage and family therapist license in California. The curriculum aligns with the educational and clinical standards outlined by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE).

This degree program consists of comprehensive educational experiences in the study of theories and techniques of marriage and family therapy (MFT), along with 300 client contact hours of supervised clinical practice that applies to the 3,000 supervised hours of experience required to be eligible for the MFT licensure. The Department permits enrollment in courses solely to students admitted to the M.S. in Marital and Family Therapy program.

Features

The Master of Science in Marital and Family Therapy at CSU Dominguez Hills is one of few publicly supported programs in Southern California offering an evening course of study to accommodate those who work during the day. The cohort-model allows students to attend full-time and complete the program requirements in 3 years. Options for a part-time plan of study is available with advisement.

Pre-Admission Disclosure for Academic Programs Leading to Licensure or Credentialing

Admission into this program does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set

by the California Board of Behavioral Science that is not controlled by or affiliated with the CSUDH. Requirements for licensure may change from time to time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or taxpayer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements.

Academic Advisement

Students currently enrolled in the program receive advising from the faculty advisors. The MFT core faculty maintains current academic and clinical information on licensure guidelines and standards published by the Board of Behavioral Sciences (BBS), California Association of Marriage and Family Therapists (CAMFT), Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE), and the Southern California Consortium of MFT programs.

Preparation (Prerequisite Courses)

The following prerequisite courses - Introduction to Research Methods, Theories of Personality, and Abnormal Psychology, or other course equivalents - are required to qualify for admission to the Marital and Family Therapy program. Status of admission is contingent upon the successful completion of all the necessary prerequisite coursework or equivalent course(s). Prerequisite courses must be completed within the last five years.

Admissions Requirements

1. Completion of a bachelor's degree from an accredited college or university
2. A grade point average of 3.0 (B) or better in the most recent 60-semester units of upper division course work undertaken as a student
3. Completion of the Graduate Record Examination General Aptitude (GRE) Test. An average GPA of 3.5 OR attainment of a previous master's degree waives this requirement
4. Applicants are required to apply to the University via Cal State Apply
5. Personal Statement
6. Writing Sample
7. Three letters of recommendation.
8. Interview with the admission committee

Classified Standing and Conditionally Classified Status

Students must meet all **Preparation** requirements for the M.S. in the Marital and Family Therapy Department for consideration for admission with Classified Standing. See the **Admission Requirements** section for complete requirements for admission to the Marital and Family Therapy program.

Consideration for admission into the program with Conditionally Classified Standing may be available for students who are insufficient in any admission requirement. Acceptance with Conditionally Classified Standing permits students to enroll in the University to correct the deficiencies while allowing students to take up to nine-semester units of graduate course work towards their degree if granted. Please note that admission to Conditionally Classified Standing does not guarantee

that a student will achieve Classified Standing required to complete the program.

Requirements for Advancement to Candidacy

Candidacy status requires the successful completion of all Required Courses before the last semester of study. Upon review of students' course completion, the program will authorize students who achieve Candidacy status to enroll in and take the Comprehensive Examination. Candidacy status and eligibility to enroll in the Comprehensive Exam require a successful review of all graduate work by the department administrative coordinator. Consult the section in the catalog entitled **Graduate Degrees** (<https://catalog.csudh.edu/general-information/graduate-degree-> (<https://catalog.csudh.edu/general-information/graduate-degree-postbaccalaureate-studies/>)) in **General Information** for complete requirements for Advancement to Candidacy.

MFT Coursework Open Only to those Admitted into the MFT Program

MFT courses are only accessible to students formally admitted into the MFT Program. The MFT Department evaluates and designs its coursework and curriculum to provide a strong foundation for individuals who are interested in a career in marital and family therapy, to satisfy the requirements for licensure as stipulated by the California Board of Behavioral Science (BPC §4980.36), and to meet accreditation standards, which results in comprehensive MFT training. As a result, students not admitted to the program are unable to use these courses as elective courses.

Required Course Sequence

As part of the admission to the MFT Program, all students agree to adhere to the program's planned class sequence. The program organizes the curriculum to ensure that fundamental courses address foundational knowledge, and subsequent coursework is dependent on the prerequisite semester's experience. See Course Sequence. Failure to take classes in sequence may delay admission into Practica and or graduation. Under exceptional circumstances, students who are permitted to attend the program part-time understand that graduation will differ from the program's proposed plan of study.

Cohort Program

The CSUDH MFT program is a cohort program. The cohort model organizes students into peer learning communities to develop shared knowledge, gain better understanding in clinical skills, and progress professionally through the MFT program collectively. This model allows students to learn from a planned sequence of coursework as well as advances their professional and personal growth and development effectively.

B or Better Policy

The MFT department requires students to maintain a level of competence determined as "B or Better" in all courses, in addition to cumulative GPA requirements. The "B or Better" policy requires that students achieve an "A," "A-," "B+," or "B" in a class to receive credit and is a program requirement to advance to subsequent courses. If a student gets any grade less than a B (which includes B-, C+, C, or lower), the student will

be required to retake the course. Failure to meet this standard may cause a delay in admission into practica, and could delay the student's graduation. Each class can only be retaken one time; failure to pass a course on a second attempt will result in dismissal from the MFT program.

Assistance to Students with Disabilities

The MFT department provides accommodations for students with disabilities recognized by the Student disAbility Resource Center. The department encourages students who require additional support beyond their identified accommodations to access the University's resources, such as the Writing Center and University Library Resources.

Professional Conduct

Courses in the MFT Program can include controversial topics and perspectives that require in-depth, experiential, and reflective discussions and exercises. The nature of the program requires that students share personal beliefs and reveal aspects central to their cultural, ethnic, religious, or ability-status backgrounds. The program expects the students to maintain an environment of respect for professors and fellow students at all times. Students who are disruptive or disrespectful to the sensitive nature in a course may have their participation points deducted, given a lower grade, or even removed from the class.

Academic Dishonesty

The department does not permit academic dishonesty. Cheating, plagiarism, and other forms of unethical behavior will result in a student either being penalized by the professor, receiving a failing grade in the course, or dismissal from the MFT program.

Computer Literacy, APA Format, and Competence in Writing

Each course and syllabus in the MFT Program include requirements for computer literacy specific to graduate-level standards. The program expects that all students' papers to adhere to standards set by the American Psychological Association (APA). Furthermore, the program expects all students to submit current, comprehensive, and accurate documents, forms, or other materials required by the MFT Department. Failure to complete the materials needed may cause a delay in students' graduation.

Career Possibilities

The MFT program's primary function is to meet the educational requirements set by the California Board of Behavioral Sciences (BPC §4980.36) to become a Registered Associate Marriage and Family Therapist. Associate Marriage and Family Therapists can gain employment in the public and private sector, including private practice. Career possibilities include and are not limited to the following: Hospitals with a mental health division, counseling centers at schools, department of mental health, community counseling centers, non-profit counseling centers, dual diagnosis treatment centers, chemical abuse treatment centers, shelters for domestic violence, youth centers, and faith-based counseling centers.

Graduate Programs

- Marital and Family Therapy, Master of Science (p. 683)

Faculty

Karen Quek, PhD., LMFT., LPCC., MFT Department Chair

MFT Office: James L. Welch Hall (WH) A-300 Phone: (310) 243-2032

MFT Email: mftdept@csudh.edu

Courses

MFT 400. Foundations to Marital Family Therapy. (3 Units)

Course examines the theoretical underpinnings and fundamental concepts to marriage and family therapy. Focus will address a breadth of foundational information in Marital and Family Therapy in the following areas: Research methods, theories, and psychopathology.

Offered Summer

MFT 495. Special Topics in MFT. (1-4 Units)

A course designed of special interest topics. Topic of content will vary as announced. Repeatable course

Offered As needed

MFT 496. Internship: Practicum Training Management. (0 Units)

Practicum Training Management 0-unit course allows students to prepare, collect, manage and store essential MFT experience/information required for clinical training and proficiencies. Students will use the program's management system to document their academic knowledge and clinical skill in practical activities.

Offered Fall, Spring, Summer

MFT 515. Pre-Practicum I: Therapy Skills. (2 Units)

Prerequisites: Admission to MFT program. Co-requisite: MFT 566, MFT 570, MFT 576 Instructional seminar and demonstration of supervised basic clinical skills, clinical interviewing, assessment, and clinical intervention in the classroom. Emphasis is placed on the therapeutic alliance, the self-of-the-therapist, and collaboration.

Offered Fall

MFT 520. Group Therapy. (3 Units)

Prerequisites: MFT 525, MFT 572, MFT 584, MFT 586. Co-requisites: MFT 575, MFT 578, MFT 580. Course provides students with practical instruction and seminar in theory, therapy process and the use of empirically supported practice in group therapy. Attention is paid to group and contextual factors including age, ability, gender, sexual orientation, culture, and economic status.

Offered Fall

MFT 525. Pre-Practicum II Advanced Therapy Skills. (2 Units)

Prerequisites: MFT 515, MFT 570, MFT 566, MFT 576. Co-requisites: MFT 572, MFT 584, MFT 586. Instructional seminar and demonstration of supervised advanced therapy skills in the classroom and in mental health settings with individuals, couples and families. Include assessments, diagnosis, treatment planning, case management, safety planning, clinical documentation, and assessment of legal and ethical issues.

Offered Spring

MFT 530. Community Mental Health. (3 Units)

Prerequisites: MFT 520, MFT 575, MFT 578, MFT 580. Co-requisites: MFT 560, MFT 565, MFT 582. Instruction, seminar and activity in community mental health and case management skills. Emphasis includes competencies in mental health recovery-oriented care and resiliency in community mental health from both traditional and non-traditional MFT practices applying case management and systems of care.

Offered Spring

MFT 541. Practicum in MFT Fieldwork IV. (2 Units)

Prerequisites: MFT 500, MFT 520, MFT 521, MFT 530, MFT 531, MFT 570, MFT 572, MFT 584. Fourth practicum required for program, concurrent with field placement and training experience. 8 hours per week required. CR/NC grading.

Offered As needed

MFT 560. Life Span, Family Development, and Aging. (3 Units)

Prerequisite: MFT 520, MFT 575, MFT 578, MFT 580. Co-requisites: MFT 530, MFT 565, MFT 582. Instruction in family development and human sexuality across the lifespan; includes contextual factors (age, ability, gender, sexual orientation, culture, race/ethnicity, gender, class, socioeconomics). Addresses elder and dependent adults including biopsychosocial impacts of aging, long-term care, and treatment of abuse/neglect.

Offered Fall

MFT 565. Assessment & Mental Health Treatment. (3 Units)

Prerequisites: MFT 520, MFT 575, MFT 578, MFT 580. Co-requisites: MFT 530, MFT 560, MFT 582. A survey and supervised practice in empirically supported assessment to treat primary mental health conditions and common presenting problems in individuals, couples, and families. Includes six-hours hours on suicide prevention, evidence-based suicide risk assessments, treatments, and interventions.

Offered Spring

MFT 566. Mental Health, Diagnosis, and Systemic Treatment. (3 Units)

Required Prerequisite: Admission to MFT program. Required Co-requisites: MFT 515, MFT 570, MFT 576. Studies and analysis of human mental health as it affects the individual, couple, and family functioning. Development, identification, assessment, diagnosis, treatment planning, and techniques of common any and serious mental illness will be explored.

Offered Fall, Spring

MFT 570. Theories and Techniques of Marital and Family Therapy I. (3 Units)

Required Prerequisite: Admission to MFT program. Required Co-requisite: MFT 515, MFT 566, MFT 576. Major Marital and Family theories, research and practice used in the treatment of individual, couples and families from a systemic and biopsychosocial perspective.

Offered Fall

MFT 572. Theories and Techniques of Marital Family Therapy II. (3 Units)

Required Prerequisites: MFT 515, MFT 566, MFT 570, MFT 576. Required Co-requisites: MFT 525, MFT 584, MFT 586. A continuation of the major MFT theories, this course includes postmodern and evidence-based practices and techniques in marriage and family counseling applied to treatment of individual, couples and family.

Offered Spring

MFT 574. Human Sexual Behavior. (3 Units)

Advanced study of the psychological, physiological, and sociological aspects of human sexual behavior, with attention to the origin and treatment of sexual dysfunction in its environmental context. Examinations and/or papers used in evaluation.

Offered As needed

MFT 575. Relational Therapy: Treatment of Couples and Partners. (3 Units)

Prerequisites: MFT 525, MFT 572, MFT 584, MFT 586. Co-requisites: MFT 520, MFT 580, MFT 578. Instruction in treatment and assessment strategies necessary to treat couple/partner problem or sexual issues in conjoint therapy. Addresses issues related to age, ability, gender, sexual orientation, culture, race/ethnicity, socioeconomics, and spousal or partner dynamics associated with abuse assessments and interventions. Offered Fall

MFT 576. Human Communication, Theory, and Skill. (2 Units)

Prerequisites: Admission to MFT program. Co-requisites: MFT 515, MFT 566, MFT 570. Instruction in the purposes, theory, and skills of communication applied to intrapersonal and interpersonal experience. The course addresses personal awareness, self-of-the-therapist, bias, and stereotyping to promote equity and diversity in clinical treatment. Offered As needed

MFT 578. Treatment Approaches with Children and Adolescents. (3 Units)

Prerequisites: MFT 525, MFT 572, MFT 584, MFT 586. Co-requisites: MFT 520, MFT 575, MFT 580. Treatment focuses on diagnostic and treatment needs of children and adolescents from a systemic perspective to include familial and sociocultural considerations. Emphasis is placed on empirically supported and evidence-based treatment modalities. Includes seven-clock hours on child abuse assessment and reporting. Offered Fall

MFT 580. Sociocultural Diversity & Marginalized Communities. (3 Units)

Prerequisite: MFT 525, MFT 572, MFT 584, MFT 586. Co-requisite: MFT 520, MFT 575, MFT 578. Diversity factors (age, ability, gender, sexual orientation, culture, race/ethnicity, religion, spirituality, socioeconomics,) affecting human behavior in family and the larger community situated in complex societies. Additional emphasis is placed on clinical competency with diverse, marginalized and under-served populations in California. Offered Fall

MFT 582. Psychopharmacology and Mental Health Treatment. (3 Units)

Prerequisite: MFT 520, MFT 575, MFT 578, MFT 580. Co-requisite: MFT 530, MFT 560, MFT 565. The impact of psychotropic medications on the behavioral and emotional states of individuals and on their relationships is addressed. Emphasis is placed on the development of vocabulary, basic knowledge of medications, how to assess effects and consultation/collaboration with prescribing physicians. Offered Spring

MFT 583. Research Methods in Marital Family Therapy. (3 Units)

Prerequisites: MFT 530, MFT 560, MFT 565, MFT 582. Co-requisites: MFT 585, MFT 588, MFT 589. Emphasis will focus developing competencies in critical analysis and evaluation of published research, examining evidence-based research to improve practice, and conducting independent research. Generating hypothesis, research design, data collection, interpretation and utilization of findings in clinical practice will be summarized. Offered Spring

MFT 584. Law, Ethics, and Professional Practices. (3 Units)

Prerequisites: MFT 515, MFT 566, MFT 570, MFT 576. Co-requisites: MFT 525, MFT 572, MFT 586. Current legal and ethical professional issues in marital and family therapy. Examination and application of BBS and AAMFT ethics and legal responsibilities. Offered Fall

MFT 585. Treatment of Substance Use, Addiction, and Dependence. (3 Units)

Prerequisites: MFT 530, MFT 560, MFT 565, MFT 582. Co-requisites: MFT 583, MFT 588, MFT 589. Studies of the theories of substance use as they effect and relate to the family system. Explore advanced interviewing techniques, assessment procedures, recovery and relapse prevention, and implementation of evidence-based treatment modalities in family therapy. Offered Fall

MFT 586. Current Issues in Marital Family Therapy. (3 Units)

Prerequisites: MFT 515, MFT 566, MFT 570, MFT 576. Co-requisites: MFT 525, MFT 572, MFT 584. Current and emerging issues in the field of MFT relevant to advancements in practice and influences on family, local and larger global community. Emphasis in contextual factors such as an economic status, culture, gender, race, ethnicity, sexual orientation, and ability. Offered Spring

MFT 588. Treatment of Trauma with Individuals, Couples, and Families. (3 Units)

Prerequisites: MFT 530, MFT 560, MFT 565, MFT 582. Co-requisite: MFT 583, MFT 585, MFT 589. Treatment of trauma with individuals, couples, and family. Beginning and advanced techniques in assessment, diagnosis, treatment, and crisis intervention of child and elder abuse, domestic violence, rape, disaster, crime, and other trauma will be explored. Offered Fall

MFT 589. Advanced Therapeutic Approaches and Application. (2 Units)

Prerequisites: MFT 530, MFT 560, MFT 565, MFT 582. Co-requisites: MFT 583, MFT 585, MFT 588. An inclusive survey of major theoretical approaches, integrative psychotherapies, evidenced-based practice, research, legal and ethical issues applied to individuals, couples and families. Case conceptualization, diagnosis, assessment, treatment planning and interventions are demonstrated utilizing vignettes, role play, and video demonstration. Offered Spring

MFT 590. Career Development, Theory, and Practice. (3 Units)

Emphasis will focus on career development throughout life, to include theory, techniques and counseling practice. The interrelationship among social relationships, diversity including gender, culture, ethnicity, social class, sexual orientation, ability, and other factors, workplace, and career development will be examined. Offered As needed

MFT 594. Independent Study. (3 Units)

Prerequisites: Consent of the instructor and Program Coordinator. Student must have completed at least twelve semester units. In consultation with a faculty member, the student will investigate in detail current research and scholarship in some area relevant to the field of Marital Family Therapy, or will complete a project involving original and creative research. Content of research will be specific to the program and licensure as an MFT. Offered As needed

MFT 595. Special Topics in MFT. (1-3 Units)

A course designed of special interest topics. Topic of content will vary as announced. Repeatable course. Offered As needed

MFT 596. Practicum: Marital Family Therapy Traineeship. (3 Units)

A multi-semester course that includes fieldwork training, on-site supervision and classroom participation. Traineeship occurs over a minimum of 12 months totaling a minimum of six semester units required for graduation.
Offered Fall, Spring, Summer

MFT 597. Directed Reading MFT Comp Prep. (3 Units)

In consultation with the faculty member, completion of readings to prepare for the comprehensive exam. The course is limited to students who have completed one year of courses. CR/NC grading. Course is repeatable for a total of 6 units.
Offered As needed

MFT 599. Comprehensive Examination. (1 Units)

Prerequisite: All Required Courses must be completed excluding Practicum: MFT Traineeship. Registration in MFT 599, Comprehensive Examination is limited to students who have advanced to candidacy and completed all degree coursework requirements with a grade of a B or better and a cumulative GPA of at least 3.0. Registration in the course is required to complete the comprehensive examination. The examination evaluates content that includes theories, assessment, diagnosis, treatment, crisis intervention, and law and ethics and requires evidence of application of theory, practice, and research.
Offered Spring

MFT 600. Grad Continuation Course. (1 Units)

Graduate students who have completed their course work but not their thesis, project, or comprehensive examination, or who have other requirements remaining for the completion of their degree, may maintain continuous attendance by enrolling in this course. Signature of graduate program coordinator required.
Offered As needed

Marital and Family Therapy, Master of Science

Requirements

Graduation Requirements

In addition to the major requirements, students must meet all university requirements for the master's degree, including, but not limited to, prerequisites, required coursework, practica, culminating experience, etc. Students should also consult the section of the catalog entitled "Requirements for the Master's Degree" for additional information.

The Master of Science in Marital and Family Therapy requires completion of 64 units of course work with a minimum 3.0 grade point average. The unit-load sequence is as follows:

| Code | Title | Hours |
|-------------------------|--|------------------|
| Prerequisites | | |
| | | 3-9 units |
| PSY 235 | Intro To Research Methods | 3 |
| PSY 360 | Theories Of Personality | 3 |
| PSY 363 | Abnormal Psychology | 3 |
| Required Courses | | |
| | | 50 units |
| MFT 520 | Group Therapy | 3 |
| MFT 530 | Community Mental Health | 3 |
| MFT 560 | Life Span, Family Development, and Aging | 3 |
| MFT 565 | Assessment in Mental Health Treatment | 3 |

| | | |
|------------------------------|---|-------------------|
| MFT 566 | Mental Health, Diagnosis, and Systemic Treatment | 3 |
| MFT 570 | Theories and Techniques of Marital and Family Therapy I | 3 |
| MFT 572 | Theories and Techniques of Marital and Family Therapy II | 3 |
| MFT 575 | Relational Therapy and Human Sexuality | 3 |
| MFT 578 | Treatment Approaches with Children and Adolescents | 3 |
| MFT 580 | Sociocultural Diversity & Marginalized Communities | 3 |
| MFT 582 | Psychopharmacology and Mental Health Treatment | 3 |
| MFT 583 | Research Methods in Marital Family Therapy | 3 |
| MFT 584 | Law, Ethics, and Professional Practices | 3 |
| MFT 585 | Treatment of Substance Use, Addiction, and Dependence | 3 |
| MFT 586 | Current Issues in Marital Family Therapy | 3 |
| MFT 588 | Treatment of Trauma with Individuals, Couples, and Families | 3 |
| MFT 589 | Advanced Therapeutic Approaches and Application | 2 |
| Practica | | 13 units |
| MFT 515 | Pre-Practicum I: Therapy Skills | 2 |
| MFT 525 | Pre-Practicum II Advanced Therapy Skills | 2 |
| MFT 596 | Practicum: Marital Family Therapy Traineeship ¹ | 9 |
| Electives | | 0-11 units |
| MFT 400 | Foundations to Marital Family Therapy | 3 |
| MFT 576 | Human Communication, Theory, and Skill | 2 |
| MFT 590 | Career Development, Theory, and Practice | 3 |
| Capstone ² | | 1 unit |
| MFT 599 | Comprehensive Examination | 1 |
| Total Units | | 64 units |

¹ Students must take MFT 596 Practicum: Marital Family Therapy Traineeship for three consecutive semesters for a minimum of 9 units to complete a total of 300 client contact hours and 100 MFT clinical course instructor lead hours.

² In addition to the major requirements, students must meet all university requirements for the master's degree, including, but not limited to prerequisites, English and writing examinations, etc. Students should consult the section of the catalog entitled "Requirements for the Master's Degree."

Program Learning Outcomes

- PLO(PG) 1: Knowledge/Research - Apply foundational and relational knowledge from a wide range of family and systemic theories and treatment techniques that are informed by research. (SLO1; SLO 5)
- PLO(PG) 2: Diversity- Demonstrate awareness of intersectional identities and contextual influences within diverse communities, social systems, and marginalized groups in clinical practice. (SLO2; SLO3)

- PLO(PG) 3: Ethics- Apply legal, ethical, and professional standards required for clinical, systemic, and relational practice. (SLO4)
- PLO(PG) 4: Practice- Demonstrate competence in systems/relational practice according to MFT professional standards, as reflected in implementing, articulating, and writing up on clinical cases. (SLO1; SLO2; SLO3; SLO 4; SLO 5)

Student Learning Outcomes

SLO 1: Knowledge/Research - Students demonstrate working knowledge of traditional, contemporary and evidenced-based MFT theories to clinical case conceptualization and treatment planning that are informed by research.

SLO 2: Diversity- Students demonstrate how intersectional identities influence family functioning.

SLO 3: Diversity- Students self-reflect on the implications of own and others' social location in clinical practice.

SLO 4: Ethics- Students apply ethical standards, consistent with the current California MFT statutes and regulations, and the American Association of Marriage and Family Therapy Code of Ethics, in diverse clinical contexts.

SLO 5: Practice- Students implement appropriate and accurate clinical competencies and skills (e.g. biopsychosocial assessment, diagnosis, treatment planning and implementation) from a systemic/relational perspective.

Mathematics

College of Natural and Behavioral Sciences
Department of Mathematics

Program Description

Mathematics is about number operations and algebra, motion and change (calculus and differential equations), logical analysis, scientific visualization, structure and geometry, the prediction of random events (probability), the extraction of useful information from large sets of data (statistics), the discovery of the best ways to do things (optimization). It is abstract and theoretical, and intensely down-to-earth and practical, all at the same time.

The mathematics major and minor prepare students for exciting and rewarding work in industry, for careers in teaching, and for advanced post-baccalaureate study. Our calculus, differential equations, analysis, and probability and statistics courses enable science students to analyze data and predict outcomes in static and dynamic situations.

Our foundations, discrete math, and algebra courses give students the tools they need for rigorous logical and structural analysis and a deep conceptual understanding of quantitative situations. Our mathematics education courses prepare students to be outstanding teacher leaders with a deep knowledge of mathematics and the best practices in teaching. Our general education courses give the general student the mathematical background she or he needs to function in life as an educated and informed citizen in an increasingly quantitative and data-driven world.

The Mathematics Department makes every effort to offer its courses at times that are convenient for students.

For additional information, please visit our website <http://math.csudh.edu/> (<http://math.csudh.edu/>).

Academic Advising

Students are welcome to see a math advisor at any time when faculty are available. All full-time math faculty serve as advisors. Please call the Math department office (310) 243-3378 or drop by NSM A-124 during regular business hours to schedule an appointment with an advisor. The math department requires majors to meet with an advisor at least once each semester.

Preparation

High School students should complete Algebra II, a year of geometry and trigonometry. A mathematics course should be taken in the senior year. Transfer students should complete three semesters of calculus and one additional course if possible.

Graduation With Honors

An undergraduate student may graduate with Honors in Mathematics provided that the following criteria are met:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of at least 3.5 in all courses used to satisfy the upper-division requirements in the major.

Career Opportunities

A degree in mathematics is a key that opens the door to a world of opportunity. Students who major in mathematics are able to pursue a diverse range of careers. They are sought out by profit and non-profit institutions for their ability to use reasoning and logic and for their ability to solve problems. Many are interested in passing their learning on to future generations through teaching. Others seek advanced degrees in mathematics or other sciences and pursue cutting-edge research. Some will pursue degrees in business or economics, where the ability to work with numbers can be a great advantage. Those with mathematical training have gone on to careers as business executives at major software companies, as analysts for stock trading companies, as actuaries and risk management experts for insurance companies and the healthcare industry, as scientists and data analysts in engineering and biotech firms, as software designers and programmers, and a whole host of other careers.

Undergraduate Programs

Bachelor

- Mathematics, Bachelor of Science (p. 690)

Minor

- Mathematics, Minor (p. 693)

Graduate Programs

Subject Matter Authorization

- Introductory Mathematics, Subject Matter Authorization (p. 690)

Faculty

Matthew Jones, Department Chair
Jessalyn Bolkema, Alex Chen, Sharon Lanaghan, Ha Nguyen, Wai Yan Pong, Serban

Raianu, Cynthia Sanchez-Tapia, Kristen Stagg, Alexander Stanoyevitch, Yi Wang, Carolyn Yarnall

Emeritus Faculty

Jacqueline Barab, Frederic Brulois, Chi-lung Chang, William Gould, Garry Hart, Jackson Henry, Susan Huniu, George Jennings, Eunice Krinsky, Frank Miles, John Wilkins

Courses

MAT 100. Calculus Success Academy. (2 Units)

Preparation for MAT 103, MAT 153, and MAT 191. Students will strengthen their problem solving and algebra skills while working collaboratively on math problems arising from various STEM disciplines. For students majoring in Biochemistry, Chemistry, Computer Science, Mathematics and Physics.
 Offered All terms, Spring, Summer

MAT 102. Foundations of Statistics. (3 Units)

Preparation for MAT 105 or MAT 132. Fundamental mathematical and statistical reasoning, including linear functions, measures of center and spread, representative of data, interpreting graphs, counting methods. Not intended for science and math majors that require MAT 153 or higher.
 Offered All terms, Fall, Spring, Summer

MAT 103. Introduction to College Algebra. (4 Units)

Preparation for MAT 151 College Algebra. Graphic, numeric, analytic and applied perspectives on algebraic concepts of linear and nonlinear functions, linear programming, exponents, radicals, exponential functions and transformation of functions. Intended for science and math majors.
 Offered All terms, Fall, Spring, Summer

MAT 105. Finite Mathematics. (3 Units)

Prerequisite: Quantitative Reasoning Placement Level 2 or completion of any of MAT 131, MAT 132, MAT 134, MAT 151, MAT 153, or MAT 191. Mathematics of finance, combinatorics, probability, statistical measures of central tendency and dispersion, problem solving and mathematical reasoning, and additional topical selected by instructor e.g. linear programming, statistics, graph theory, game theory. A-C/NC grading. Satisfies the General Education Quantitative Reasoning Requirement.
 Offered Fall, Spring

MAT 107. Mathematics for Elementary School Teachers: Real Numbers. (3 Units)

Prerequisite: Quantitative Reasoning Placement Level 2 or completion of any of MAT 105, MAT 131, MAT 132, MAT 134, MAT 151, MAT 153, or MAT 191. Sets and set theoretic operations as related to counting numbers and rational numbers and arithmetic operations. Real number system and its origins, development, structure and use. Special emphasis on problem solving, and the development and application of algorithms. Does not satisfy General Education Quantitative Reasoning Requirement.
 Offered Fall, Spring, All terms

MAT 111. Discovering Mathematics. (3 Units)

Problem solving and applications of mathematics to personal and civic life involving chance and descriptive statistics and selected additional topics. Includes use of spreadsheets and other technologies. Not intended for majors that require statistics or calculus.
 Offered Fall, Spring

MAT 131. Elementary Statistics and Probability. (3 Units)

Prerequisite: Quantitative Reasoning Placement Level 2 or completion of any of MAT 105, MAT 151, MAT 153, or MAT 191. A practical course in probability and statistics including such topics as the binomial and normal distributions, confidence intervals, t, F, and chi-square tests, linear regression and correlation, and conditional probability. Satisfies the General Education Quantitative Reasoning Requirement.
 Offered Fall, Spring

MAT 132. Statistics and Probability with Support. (4 Units)

Recommended prerequisite: MAT 102 or GE Math Ready with Support (Level III) Includes the binomial and normal distributions, confidence intervals, linear regression and correlation, and conditional probability. Satisfies General Education Quantitative Reasoning Requirement.
 Offered Fall, Spring

MAT 134. Statistics & Probability - Supported. (4 Units)

MAT 134 is an introduction to statistics, including the binomial and normal distributions, confidence intervals, linear regressions and correlation, hypothesis testing, and conditional probability. Satisfies General Education Quantitative Reasoning. Not for students with credit for MAT 131 or MAT 132. Recommended for students designated "GE Ready with Support (Level III)."
 Offered Fall, Spring

MAT 141. Computers for Mathematics Teaching. (3 Units)

Quantitative Reasoning Placement Level 2 or completion of any of MAT 105, MAT 131, MAT 132, MAT 134, MAT 151, MAT 153, or MAT 191. Introduction to computers for teachers of mathematics. Topics include flowcharting, programming in LOGO on microcomputers. Applications of computers to problem solving, statistics, and other areas of mathematics relevant to teachers of mathematics. Applications packages, CAI and social issues are studied. A-C/NC grading. Does not satisfy General Education Quantitative Reasoning Requirement.
 Offered Infrequent

MAT 143. Problem Solving in Mathematics. (3 Units)

Prerequisite: be Quantitative Reasoning Placement Level 2 or completion of any of MAT 105, MAT 131, MAT 132, MAT 134, MAT 151, MAT 153, or MAT 191. Objective is to increase students abilities to use knowledge and experience when encountering new and unexpected situations. Develop higher level thinking skills, learn to formulate, analyze, and model problems. Choosing relevant information, making conjectures, devising plans and testing solutions. A-C/NC grading. Does not satisfy General Education Quantitative Reasoning Requirement.
 Offered Fall, Spring

MAT 151. College Algebra and Trigonometry. (4 Units)

Prerequisites: MAT 103 is required. Graphic, numeric, analytic and applied perspectives on topics including linear, quadratic, exponential, logarithmic and trigonometric functions, exponents and radicals, linear and nonlinear systems of equations and inequalities. Preparation for MAT 191: Calculus I. 3 units of discussion; 1 unit lab.
 Offered All terms, Fall, Spring

MAT 153. Pre-Calculus with Trigonometry with Lab. (4 Units)

Prerequisites: Math Placement Category Level 2 or completed GE Quantitative Reasoning. Topics include functions and their graphs; linear, quadratic, rational, exponential, and logarithmic functions; composition, transformation and arithmetic of functions; inverse function; inequalities; right-triangle trigonometry and circular motion; applications to contextual problems. This course is supported with Supplemental Instruction.

Preparation for MAT 191: Calculus.

Offered Fall, Spring

MAT 155. Pre-Calculus. (4 Units)

Prerequisite(s): Designation of "GE Ready (Level II)" or with permission of department. Topics include functions and their graphs; linear, quadratic, rational, exponential, and logarithmic functions; composition, transformation, and arithmetic of functions; inverse function; inequalities; right-triangle trigonometry and circular motion; applications to contextual problems. Preparation for MAT 191 Calculus.

Offered Fall, Spring

MAT 171. Survey of Calculus for Management and Life Sciences. (4 Units)

Prerequisite: Quantitative Reasoning Placement Level 2 or completion of any of MAT 105, MAT 131, MAT 132, MAT 134, MAT 151, MAT 153, or MAT 191. Not available for credit to students who have credit in MAT 191 or its equivalent or courses which have MAT 191 as a prerequisite.

Functions, linear equations, the derivative and its applications, the integral and its applications, and partial derivatives. Satisfies the General Education Quantitative Reasoning Requirement.

Offered Fall, Spring

MAT 191. Calculus I. (5 Units)

Prerequisite: MAT 151 or MAT 153 or equivalent with a grade of C or better. Limits, continuity, derivatives, differentiation formulas, applications of derivatives, introduction to integration, fundamental theorem of calculus, application of integration. Satisfies the General Education Quantitative Reasoning Requirement.

Offered Fall, Spring

MAT 193. Calculus II. (5 Units)

Prerequisite: MAT 191 or equivalent with a grade of C or better. Differentiation and integration of transcendental function. Techniques and applications of integration. Polar coordinates. Infinite sequences and series, power series, convergence. Satisfies the General Education Quantitative Reasoning Requirement.

Offered Fall, Spring

MAT 195. Selected Topics in Mathematics. (1-5 Units)

A course in a topic of special interest to both faculty and students for which no current course exists. Topic will be announced in schedule of classes. Repeatable for credit. One to four hours of lecture per week.

Offered As needed, All terms

MAT 207. Mathematics for Elementary School Teachers: Geometry & Statistics. (4 Units)

Prerequisite: Quantitative Reasoning Placement Level 2 or completion of any of MAT 105, MAT 131, MAT 132, MAT 134, MAT 151, MAT 153, or MAT 191. Primarily for prospective elementary school teachers.

Geometry from an intuitive problem solving standpoint. Constructions, symmetry, translations, rotations, patterns, area, volume, and the metric system. Topics from graph theory and topology. Two hours of lecture and two hours of activity per week. Does not satisfy General Education Quantitative Reasoning Requirement.

Offered Fall, Spring

MAT 211. Calculus III. (5 Units)

Prerequisite: MAT 193 or equivalent with a grade of C or better.

Multivariable calculus: analytic geometry, scalar and vector products, partial differentiation, multiple integration, change of coordinates, gradient, optimization, line integrals, Green's theorem, elements of vector calculus.

Offered Fall, Spring

MAT 213. Calculus IV. (4 Units)

Prerequisite: MAT 211 or equivalent with a grade of C or better. Topics covered include vector calculus, line and surface integrals, and the theorems of Green, Gauss, and Stokes.

Offered Infrequent

MAT 241. Programming and Technology for Teaching Secondary School Mathematics. (3 Units)

Prerequisite: MAT 193 or equivalent with a grade of C or better.

Introduction to application software appropriate for the teaching of secondary school mathematics. The programs include spreadsheet, geometric modeling, and statistics modeling. Writing simple programs for graphing calculators to demonstrate and solve mathematical problems.

Offered Fall

MAT 247. Elements of Linear Algebra. (3 Units)

Matrix algebra emphasizing small (2x2 and 3x3) matrices and vectors over the real numbers, solutions of systems of equations, determinants, inner product spaces, and linear transformations, with applications to other subjects, e.g. physical and computer science, economics, and operations research.

Offered Fall, Spring

MAT 271. Foundations Of Higher Math. (3 Units)

Prerequisite: MAT 193 with grade of C or better. Topics include logic, methods of mathematical proof, set theory, relations and functions. Introduction to complex numbers and proof strategies using ideas of vector algebra. Meant to prepare students for mathematics program as well as concepts of computer science.

Offered Fall, Spring

MAT 281. Discrete Mathematics. (3 Units)

Prerequisite: a) MAT 151 or MAT 153 and b) CSC 115 or CSC 121 or MAT 241 or equivalent with grade of C or better. Matrix algebra, graph theory, trees, combinatorics, Boolean algebra; with applications to computers and computer programming.

Offered Fall, Spring

MAT 295. Selected Topics In Mathematics. (1-4 Units)

Prerequisites: MAT 193 and consent of instructor. A course in a topic of special interest to both faculty and students for which no current course exists. Topic will be announced in schedule of classes. Repeatable for credit. One to four hours of lecture per week.

Offered As needed

MAT 297. Independent Study. (1-4 Units)

Prerequisites: MAT 193, consent of instructor and consent of department chair. A reading program of selected topics not covered by regularly offered courses conducted under the supervision of a faculty member.

Offered As needed

MAT 307. Foundations of Middle School Mathematics I. (3 Units)

Foundations of Mathematics related to the middle school curriculum. Course 1 includes the following topics: Reasoning with numbers, basic number proofs, understanding exponents, proportional reasoning, rates, linear functions, method of finite differences, and the theory and application of these topics.

Offered Infrequent, All terms

MAT 308. Foundations of Middle School Mathematics II. (3 Units)

Foundations of Mathematics related to the middle school curriculum. Course 2 includes the following topics: basic Euclidean facts, algebra-geometry connections, volume and surface area formulas, similarity, congruence, and scale factors, and the theory and application underlying these topics.
Offered Infrequent

MAT 309. Foundations of Middle School Mathematics III. (3 Units)

Foundations of Mathematics related to the middle school curriculum. Course 3 includes the following topics: concept of functions, inverse functions, properties of rational, trigonometric and exponential functions and fundamental concepts in Calculus.
Offered All terms, Infrequent

MAT 311. Differential Equations. (3 Units)

Prerequisite: MAT 211 and MAT 271 with a grades of C or better. Topics covered include first and second order linear equations including existence and uniqueness theorems, series solutions; nonlinear equations; systems of linear equations. Other topics may include the Laplace transform, qualitative theory.
Offered Fall

MAT 315. Introduction to Survival Analysis. (3 Units)

Prerequisites: CSC 115 or MAT 241; MAT 193, MAT 131 or MAT 132 are required. Co-requisites: MAT 323 and MAT 327 are recommended. Survival analysis is about the analysis of time-to-event data. This course will help you understand the fundamental concepts of survival analysis. Topics include, but are not limited to, time-to-event data, Log-rank test and Cox proportional hazards regression.
Offered Fall

MAT 321. Probability and Statistics. (3 Units)

Prerequisite: MAT 193 and MAT 271 or equivalent with grade C or better. A calculus based survey of topics in probability and statistics emphasizing applications.
Offered Fall, Spring

MAT 323. Statistical Inference. (3 Units)

Point and interval estimation, hypothesis testing, simple linear regression, re-sampling. Method of moments, maximum likelihood, bias and variance, mean-squared error, sufficiency, likelihood ratio tests, p-value, power calculation, analysis of variance, Neymann-Pearson lemma, uniformly most powerful tests.
Offered Fall

MAT 327. Introduction to Machine Learning with Software. (3 Units)

Required Prerequisites: MAT 281. Recommended Prerequisite: MAT 131
Machine learning uses methods and concepts to sift through data to create automated prediction and decision programs. This course will develop the underlying mathematical concepts and proficiency with R or similar software to understand, build, and apply machine learning.
Offered Spring

MAT 331. Linear Algebra. (3 Units)

Prerequisite: MAT 247 and MAT 271 or equivalent with a grade of C or better. Linear equations, vector spaces, matrices, linear transformations, determinants, eigenvalues, eigenvectors, etc.
Offered Fall, Spring

MAT 333. Abstract Algebra. (3 Units)

Prerequisite: MAT 271 or equivalent with a grade of C or better. The theory of groups, rings, ideals, integral domains, fields and related results.
Offered Fall

MAT 337. Mathematical Logic. (3 Units)

Prerequisite: MAT 191 or equivalent with a grade of C or better. Topics covered include propositional calculus, classical and intuitionistic; completeness and consistency theorems; first order predicate calculus with equality; axiomatic arithmetic; Godel's incompleteness theorem.
Offered Infrequent

MAT 347. Modern Geometry. (3 Units)

Prerequisite: MAT 271 or equivalent with a grade of C or better. Topics in synthetic and analytic geometry; transformations, similarity, congruence, distance, angles, constructions; introduction to projective and/or non-Euclidean geometry.
Offered Spring

MAT 351. Probability Theory. (3 Units)

Prerequisite: MAT 193 or equivalent with a grade of C or better. Probability as a mathematical system, set theory, conditional probability and independent events, random variables, distribution and density functions, covariance and correlation, limit theorems, convolutions, computer generation of random numbers.
Offered Infrequent

MAT 353. Stochastic Processes. (3 Units)

Prerequisite: MAT 351 or equivalent with a grade of C or better. A selection from among several topics, including Markov chains; Markov processes; queuing, branching, Poisson, and Gaussian processes; stationary processes.
Offered Infrequent

MAT 361. Finite Automata. (3 Units)

Prerequisite: MAT 281 or equivalent with a grade of C or better. Study of the abstract formalization of digital computers. Applications to computation theory and formal linguistics.
Offered Infrequent

MAT 367. Numerical Analysis I. (3 Units)

Prerequisites: Experience in BASIC, FORTRAN or Pascal and MAT 211 or equivalent with a grade of C or better. Approximation of roots of functions, interpolation formulas, numerical solutions of systems of equations, numerical differentiation and integration, numerical solutions to ordinary differential equations.
Offered Infrequent

MAT 369. Numerical Analysis II. (3 Units)

Prerequisite: MAT 367 or equivalent with a grade of C or better. A continuation of MAT 367, including approximation of eigenvalues and eigenvectors, approximation by splines, numerical solutions of parabolic, elliptic, and hyperbolic partial differential equations.
Offered Infrequent

MAT 395. Selected Topics in Math. (1-4 Units)

Prerequisites: MAT 211 and consent of instructor. A course in a topic of special interest to both faculty and students for which no current course exists. Topic will be announced in schedule of classes. Repeatable for credit. One to four hours of lecture per week.
Offered As needed

MAT 396. Practicum in Mathematics. (3 Units)

Prerequisites: Consent on Department Chair or Instructor is required. Supervised work experience, emphasizing hands-on training and application of practical and/or technical skills in mathematics, in a suitable setting. Students will submit a comprehensive report or portfolio. CR/NC grading. Repeatable course.
Offered Fall, Spring

MAT 398S. Directed Research. (1-3 Units)

Offered Infrequent

MAT 401. Advanced Analysis I. (3 Units)

Prerequisites: MAT 211 and MAT 271, or equivalent with a grade of C or better. Elements of set theory, numerical sequences and series, continuity and differentiability of functions of one and several variables.

Offered Fall

MAT 403. Advanced Analysis II. (3 Units)

Prerequisite: MAT 401 or equivalent with a grade of C or better.

Integration of functions of one and several variables, sequences and series of functions, uniform convergence, power series, differentiation of functions of several variables.

Offered Spring

MAT 411. Mathematical Modeling. (3 Units)

Prerequisite: MAT 211, MAT 241, and MAT 271 or CSC 121 or CSC 111. Flexible course content depending on interest of instructor and students. Possible topics are: epidemic and predator-prey models from differential equations; linear programming models; Arrow's theorem; and probability models.

Offered Spring

MAT 413. An Introduction to Partial Differential Equations. (3 Units)

Prerequisites: MAT 311 with a grade of C or better is required; MAT 213 is recommended. Solutions to partial differential equations by separation of variables and Fourier series. Applications to heat flow and diffusion, wave motion, and potentials. Some discussion of existence and uniqueness of solutions.

Offered Infrequent

MAT 417. Math Methods for Data Science. (3 Units)

Prerequisites: MAT 211 and MAT 247 are required; CSC 115 or MAT 241 are recommended. Methods include optimization (stochastic gradient descent, alternating direction method of multipliers (ADMM), L1 minimization) with applications to Linear Regression, K-means and Expectation-Maximization (EM) algorithm; matrix decomposition (singular value decomposition (SVD), principal component analysis (PCA) and nonnegative matrix decomposition) with applications to recommendation system, image processing and computer vision.

Offered Fall

MAT 421. Complex Analysis. (3 Units)

Prerequisites: MAT 211 and MAT 271 with a grade of C or better. MAT 331 and MAT 401 (may be taken concurrently) are recommended. Complex numbers; point sets, sequences and mappings; analytic functions; elementary functions; integration; power series; the calculus of residues; and applications.

Offered Spring

MAT 443. History Of Mathematics. (3 Units)

Prerequisite: MAT 193 with a grade of C or better. Traces the growth and development of mathematics from primitive origins to present, uses methods and concepts of mathematics to present the topics.

Offered Spring

MAT 447. Number Theory. (3 Units)

Prerequisite: MAT 271 with a grade of C or better. Divisibility, congruencies, prime number theory, Diophantine Equations, and other topics from elementary number theory.

Offered Spring

MAT 448. Cryptography. (3 Units)

Prerequisites: MAT 271 with a grade of C or better is required. CSC 115 or CSC 121 with a grade of C or better is recommended. Congruencies and number theory, history and early cryptosystems, cryptographic data structures, public key cryptography, additional cryptosystems such as DES, AES, and elliptic curve cryptography. Computer implementations will also be covered, as well any needed additional mathematical topics (e.g. finite fields.)

Offered Fall

MAT 451. Mathematical Statistics. (3 Units)

Prerequisite: MAT 351 or equivalent with a grade of C or better. Sums of independent random variables; functions of random variables; chi-square, F, and t distributions; estimation of parameters; maximum-likelihood, unbiased, consistent, minimum-variance, and minimum-mean-square error estimators; confidence intervals; central limit theorem.

Offered Infrequent

MAT 460. Graph Theory and Algorithms. (3 Units)

Prerequisites: MAT 211, MAT 271, and MAT 241, or CSC 121, or CSC 115 or equivalent with a grade of C or better are required. MAT 281 with a grade of C or better is recommended. Graphs, digraphs, multigraphs, graph modeling, degrees and degree sequences, subgraphs, isomorphisms of graphs, and digraphs, distance concepts and applications, trees, and tree algorithms, Hamiltonian and Eulerian graphs. The viewpoints will be conceptual, theoretical and algorithmic.

Offered Fall

MAT 489. Fundamental Mathematics and Teaching in Secondary Schools. (4 Units)

Prerequisite: 9 units of 300/400-level mathematics with a grade of C or better; In order to begin the hours for fieldwork in this course, you will need a valid Certificate of Clearance (fingerprints) and proof of a negative TB (within 4 months of the fieldwork course beginning). For information on submitting these documents, contact the Center for Teaching Careers. Synthesis and analysis of secondary mathematics and its teaching.

Emphasis will be placed on algebraic thinking and its teaching in high school. Forty hours of secondary classroom observations will be a required activity in this course. A Certificate of Clearance is required.

Offered Spring

MAT 490. Seminar in Mathematics Education. (3 Units)

Prerequisite: 9 units of 300/400 mathematics courses with a grade of C or better. The synthesis and analysis of the secondary mathematics curriculum from an advanced standpoint. Emphasis will be on the integration of problem solving, investigations, reasoning, and communication as recommended in state and national standards.

Offered Fall

MAT 495. Selected Topics In Math. (1-4 Units)

Prerequisites: Consent of instructor and MAT 271. A course in a topic of special interest to both faculty and students for which no current course exists. Topic will be announced in schedule of classes. Repeatable for credit. One to four hours of lecture per week.

Offered As needed

MAT 497. Independent Study. (1-4 Units)

Prerequisites: MAT 211, consent of instructor and consent of department chair. A reading program of selected topics not covered by regularly offered courses conducted under the supervision of a faculty member.

Offered As needed

MAT 500. Mathematics Education Research Design and Statistics. (3 Units)

Prerequisites: Students must have graduate standing and must have completed one year of full time secondary mathematics teaching. Includes topics such as normal distribution, confidence intervals, t, F, chi-squared tests, linear regression, and correlation. These topics are presented in the context of mathematics education research in typical classrooms.

Offered As needed

MAT 501. Foundations of Geometric Thinking. (3 Units)

Prerequisites: MAT 543 or concurrent enrollment. Students must have graduate standing and must have completed one year of full time secondary mathematics teaching. Research on Various topics in geometry. Focus on developing notions of rigorous proof and grade-appropriate explanations. Topics are chosen from the Geometry areas and standards emphasized in K-12.

Offered As needed

MAT 505. Foundations of Mathematical Structures. (3 Units)

Prerequisites: MAT 543 or concurrent enrollment. Students must have graduate standing and must have completed one year of full time secondary mathematics teaching. Topics include the algebraic properties of sets and operations applied to classical number systems, equivalence, modular arithmetic, Diophantine equations, decomposition of natural numbers, special families of natural numbers, current research on understanding and learning these topics.

Offered As needed

MAT 506. Foundations of Rational Numbers. (3 Units)

Prerequisites: MAT 543 or concurrent enrollment. Students must have graduate standing and must have completed one year of full time secondary mathematics teaching. Covers theory and applications of Rational numbers. Focus on number systems, representation of numbers, equivalence classes, rationality and irrationality, properties of the rational numbers system, central ideas of proportional reasoning, and developing intuitive models of standard rules and algorithms.

Offered As needed

MAT 515. Topics in Advanced Finite Math. (3 Units)

Prerequisites: Possession of a baccalaureate degree and one year of full-time secondary mathematics teaching. Topics from areas of Modern Mathematics which relate to the high school mathematics curriculum such as: algorithms, graph theory, coding theory, game theory, finite probability theory, difference equations, voting, recursion.

Offered As needed

MAT 517. Fractals for Teachers. (3 Units)

Prerequisites: Possession of a baccalaureate degree and one year of full-time secondary mathematics teaching. Topics from Fractal and Chaos Theory including: the Cantor Set, Koch Curve, Julia Sets, space filling curves. Brownian motion and Chaotic behavior. Selections to relate to the high school mathematics curriculum.

Offered Infrequent

MAT 521. Geometry For Teachers. (3 Units)

Prerequisites: MAT 543, graduate standing and one year of full time secondary mathematics teaching. Topics from Geometry including: points and lines in a triangle, properties of circles, collinearity, concurrence, transformations, arithmetic and geometric means, isoperimetric theorems, reflection principle.

Offered As needed

MAT 522. Foundations of Algebraic Thinking. (3 Units)

Prerequisites: Students must have graduate standing and must have completed one year of full time secondary mathematics teaching. Patterns, functions, and multiple representations; independent and dependent variables; discrete and continuous functions; linear and nonlinear relationships in context; connections to arithmetic operations; algebraic expressions and equations. Examines current research on the understanding and learning of these topics.

Offered As needed

MAT 523. Theory of Function. (3 Units)

Prerequisites: MAT 543, graduate standing and one year of full time secondary mathematics teaching. Topics from Function Theory including: mathematical models, linear functions, non-linear functions, transformations, limits, continuity, functions of several variables.

Offered As needed

MAT 525. Algebraic Structures for Teachers. (3 Units)

Prerequisites: MAT 543, graduate standing and one year of full time secondary mathematics teaching. Topics relating to the high school Algebra curriculum from an advanced standpoint including algorithms, fields, polynomials, groups, fields, and rings.

Offered As needed

MAT 543. Advanced Problem Solving. (3 Units)

Problem solving using non-routine strategies. Problems to be representative of several branches of mathematics and mathematically based disciplines.

Offered As needed

MAT 545. History of Math Education. (3 Units)

Prerequisites: Graduate standing and one year of full time secondary teaching. Traces the development of the mathematics curriculum K-12 in the United States and internationally, concentrating both on content taught at different stages and the teaching methods employed. Reviews the various mathematics reform efforts over the past 170 years.

Offered As needed

MAT 555. Research in Mathematics Education. (3 Units)

Prerequisites: GED 500 and consent of program. Integrates previous work and experience by emphasizing the application of theoretical models and research designs to the field of mathematics education. Special emphasis will be given to analyzing, organizing, and evaluating findings, and communicating the results.

Offered Infrequent

MAT 557. Research in Math Education I. (3 Units)

Prerequisites: MAT 500 and 15 units of program. Overview of the current research literature pertaining to mathematics education in elementary and secondary schools. Topics such as mathematical reasoning, communication, problem solving, algebra, and geometry will be discussed and analyzed.

Offered As needed

MAT 559. Research in Math Education II. (3 Units)

Prerequisite: MAT 557. Overview of the current research literature pertaining to mathematics education in elementary and secondary schools. Topics such as mathematical reasoning, communication, problem solving, algebra, and geometry will be discussed and analyzed.

Offered As needed

MAT 590. Graduate Seminar in Mathematics Education. (1-4 Units)

Prerequisites: Possession of a baccalaureate degree and one year of full-time secondary mathematics teaching. Presentation and discussion of selected topics in Mathematics Education. Repeatable course.

Offered Infrequent

MAT 594S. Independent Study. (1-4 Units)

Prerequisites: Consent of instructor and department chair. In consultation with a faculty member, the student will investigate in detail current scholarship in some area. Repeatable course.

Offered As needed

MAT 595. Selected Topics. (1-4 Units)

Â An intensive study of selected issues in mathematics education.

Repeatable course.

Offered As needed

MAT 597S. Directed Reading. (1-4 Units)

Prerequisites: Consent of instructor and department chair. Extensive reading in selected areas under the guidance of faculty mentor.

Repeatable course.

Offered Infrequent

MAT 598S. Directed Research. (1-4 Units)

Prerequisite: Classified graduate standing. Students will design and conduct research projects under the direct supervision of the instructor. Repeatable course.

Offered As needed

MAT 599. Masters Project. (6 Units)

Prerequisite: Advancement to Candidacy. Completion of classroom based project under the guidance of faculty advisor. The culminating learning experience of the program which emphasizes the application of the mathematics education curriculum in the classroom.

Offered As needed

MAT 600. Graduate Continuation Course. (1 Units)

Graduate students who have completed their course work but not their thesis, project, or comprehensive examination, or who have other requirements remaining for the completion of their degree, may maintain continuous attendance by enrolling in this course. Signature of graduate program coordinator required.

Offered Infrequent

Introductory Mathematics, Subject Matter Authorization

Holders of a Single Subject or Multiple Subject credential issued by the California Commission on Teacher Credentialing may secure an Introductory Mathematics Subject Matter Authorization that allows the holder to teach the subject matter content typically included in curriculum guidelines and textbooks approved for study in grades 9 and below. This allows an employer to assign a teacher with an introductory mathematics authorization to teach a class in which the curriculum is for grades 9 and below but the students in the class may be in grades K-12.

For other requirements governing issuance of this authorization, consult the Teacher Education section of this catalog or contact the School of Education Student Services Center.

1. A minimum of 32 units is required but must include at least one course in the content areas of algebra, advanced algebra, geometry, probability or statistics, and development of the real number system or introduction to mathematics.
2. The following is an extensive list of courses, and their specific content area, that can be used to satisfy the 32-unit requirement. A Mathematics Department advisor can assist you in preparing your 32-unit coursework plan.

Requirements

| Code | Title | Hours |
|---|--|-----------|
| Algebra | | |
| MAT 153 | Pre-Calculus with Trigonometry with Lab | 4 |
| MAT 307 | Foundations of Middle School Mathematics I | 3 |
| Advanced Algebra | | |
| MAT 191 | Calculus I | 5 |
| MAT 193 | Calculus II | 5 |
| MAT 309 | Foundations of Middle School Mathematics III (infrequently offered) | 3 |
| Geometry | | |
| MAT 207 | Mathematics for Elementary School Teachers: Geometry & Statistics | 4 |
| MAT 308 | Foundations of Middle School Mathematics II (infrequently offered) | 3 |
| Probability and Statistics | | |
| MAT 131 | Elementary Statistics and Probability | 3 |
| Development of the Real Number System or Introduction to Mathematics | | |
| MAT 105 | Finite Mathematics (infrequently offered) | 3 |
| MAT 107 | Mathematics for Elementary School Teachers: Real Numbers | 3 |
| MAT 143 | Problem Solving in Mathematics | 3 |
| MAT 241 | Programming and Technology for Teaching Secondary School Mathematics | 3 |
| Total Hours | | 42 |

Can be used toward earning the required 32 units once each specific content area has been met.

Mathematics, Bachelor of Science Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

No minor is required.

Major Requirements (60-66 units)

Students must select one of the options listed below. The following courses, or their approved transfer equivalents, are required of all candidates for this degree. All courses used to satisfy this major must be passed with a grade of "C" or better.

Core Requirements (38 units)

| Code | Title | Hours |
|--|----------------------------|-----------|
| Lower Division Required Courses | | |
| MAT 191 | Calculus I | 5 |
| MAT 193 | Calculus II | 5 |
| MAT 211 | Calculus III | 5 |
| MAT 247 | Elements of Linear Algebra | 3 |
| MAT 271 | Foundations Of Higher Math | 3 |
| MAT 281 | Discrete Mathematics | 3 |
| PHY 130 | General Physics I | 5 |
| Upper Division Required Courses | | |
| MAT 331 | Linear Algebra | 3 |
| MAT 333 | Abstract Algebra | 3 |
| MAT 401 | Advanced Analysis I | 3 |
| Total Hours | | 38 |

Mathematics Option - (22 units)

| Code | Title | Hours |
|--|--|----------|
| Lower Division Required Courses | | |
| CSC 121 | Introduction to Computer Science and Programming I | 4 |
| Upper Division Required Courses | | |
| MAT 321 | Probability and Statistics | 3 |
| MAT 403 | Advanced Analysis II | 3 |
| MAT 421 | Complex Analysis | 3 |
| Electives | | |
| A. Select one of the following | | 3 |
| MAT 447 | Number Theory | |
| MAT 448 | Cryptography | |
| B. Select two of the following: | | 6 |
| MAT 311 | Differential Equations | |
| MAT 323 | Statistical Inference | |
| MAT 327 | Introduction to Machine Learning with Software | |
| MAT 411 | Mathematical Modeling | |

| | | |
|--------------------|-----------------------------|-----------|
| MAT 460 | Graph Theory and Algorithms | |
| Total Hours | | 22 |

Mathematics Education Option - (28 units)

This option will satisfy the subject matter preparation necessary for a secondary teaching credential in mathematics. Students do not get Subject Matter Preparation on their diploma; the diploma says Mathematics Education option.

| Code | Title | Hours |
|--|--|-----------|
| Lower Division Required Courses | | |
| MAT 131 | Elementary Statistics and Probability | 3 |
| MAT 143 | Problem Solving in Mathematics | 3 |
| MAT 241 | Programming and Technology for Teaching Secondary School Mathematics | 3 |
| Upper Division Required Courses | | |
| MAT 347 | Modern Geometry | 3 |
| MAT 443 | History Of Mathematics | 3 |
| MAT 489 | Fundamental Mathematics and Teaching in Secondary Schools | 4 |
| MAT 490 | Seminar in Mathematics Education | 3 |
| Electives | | |
| A. Select one of the following courses: | | 3 |
| MAT 311 | Differential Equations | |
| MAT 327 | Introduction to Machine Learning with Software | |
| MAT 411 | Mathematical Modeling | |
| MAT 460 | Graph Theory and Algorithms | |
| B. Select one of the following | | 3 |
| MAT 447 | Number Theory | |
| MAT 448 | Cryptography | |
| Total Hours | | 28 |

Program Learning Outcomes

- Demonstrate skill in using mathematical symbols, standard procedures and techniques, and definitions.
- Demonstrate a sense of inquiry and perseverance in mathematics.
- Demonstrate communication skills in conjunction with mathematical literacy in each major area.
- Prove or disprove mathematical statements as appropriate.
- Use technology and programming languages to model and solve mathematical problems.
- Demonstrate an understanding of the history of early mathematics (Math Ed Option only)

Military Science

College of Business Administration and Public Policy

Program Description

The Military Science program provides professional training for students leading to a commission, upon graduation in the Active Army, Army Reserve or the Army National Guard. Through the Army Reserve Officers' Training Corps Program (AROTC), scholarship students receive full tuition and books. Scholarships are available in all majors. Scholarships are also available for Guaranteed Reserve Forces Duty. Military Science instruction is focused on hands-on leadership development and the practical application of military skills needed to produce America's future leaders. Additionally, military science courses count towards the 120 unit minimum required for the baccalaureate degree. MSL 101 Foundations of Officership and MSL 102 Basic Leadership are open to students who are not enrolled in the program, but have an interest in leadership, management, military history or military training. Enrollment in the AROTC program is open to all qualified full-time students.

Scholarship Program

All Army scholarships are merit based and are not dependent on individual financial need. Scholarships are available for both Active Duty and Guaranteed Reserve Forces Duty. Scholarships are awarded on a competitive basis to qualified applications for two-, three-, or four-year periods depending on the applicant's academic level and program of study. Scholarship cadets receive full tuition benefits, a \$1,200 annual book allowance, and a monthly allowance as detailed below.

Enrolled Cadets

Contracted cadets can receive a monthly allowance of up to \$500 per month. Contracted scholarship cadets receive an annual \$1,200 book

allowance. All enrolled scholarship and non-scholarship cadets receive uniforms and military science textbooks from the program.

Four-Year Program

The four-year military science curriculum is designed to be part of the student's undergraduate degree program. During the freshman and sophomore years, students receive introductory instruction in the theory of warfare, military history, military leadership and basic military skills. Cadets participate during their junior and senior years in a professional development program with instruction in leadership, management, military justice and advanced military skills.

Three-Year Program

The three-year program is available to qualified sophomore undergraduate students. Students may compress the first two years of the ROTC program by attending two ROTC classes per semester during their sophomore year. Scholarships are available, on a competitive basis, for students with three years remaining toward the completion of their undergraduate degree. Transfer students who meet the same criteria are also eligible for scholarships. Upon acceptance, student then follow the military science program described for the four-year program.

Two-Year Program

The two-year program is available to qualified junior and senior undergraduate students and graduate students who have two years of academic work remaining. Veterans who have achieved junior academic status and meet enrollment criteria are also eligible for this program. Students may receive credit for the first two years of the ROTC program by attending the ROTC Leaders Training Course or by previous junior ROTC participation. Active duty, Army Reserve and Army National Guard scholarships are available, on a competitive basis, for students with two years remaining toward completion of their undergraduate degrees. Transfer students who meet the same criteria are also eligible for scholarships. Upon acceptance, students then follow the military science program described for junior and senior cadets in the four-year program.

Field Training

Several military training programs are available to qualified cadets. A five-week paid Leaders Training Course at Fort Knox, Kentucky, qualifies students for the two-year program. All cadets attend a 30-day paid Leadership Development Assessment Course at Fort Lewis, Washington, after their junior year. This course provides practical application of advanced military and leadership skills required for commissioning.

Adventure Training

Qualified candidates may also receive training in Airborne school (parachuting), Air Assault school (rappelling from helicopters), Cadet Troop Leadership Training (training in Army units around the world) and in Drill Cadet Leadership Training (Training and working with Drill Sergeants).

Emeriti Faculty

Richard Beym, José S. Cuervo, Frances Lauerhass, Porfirio Sánchez, Luz Watts

Courses

MLG 195. Special Topics in Modern Languages.. (3 Units)

Study of special interest for students in the selected area of study. Topic and content will vary as announced. Repeatable for a credit.
Offered As needed

MLG 294. Independent Study in Modern Languages I. (1-3 Units)

Prerequisites: Consent of instructor and chair of Modern Languages.
Beginning/intermediate individual study and or credit by examination in a foreign language not regularly offered on campus. Arrangements must be made in advance of registration. Repeatable course.
Offered Infrequent

MLG 295. Special Topics in Modern Languages. (3 Units)

Study of special interest for students in the selected area of study. Topic and content will vary as announced. Repeatable for a credit.
Offered As needed

MLG 318. New Perspectives on Language and Sex. (3 Units)

This interdisciplinary and pluricultural course introduces students to the analysis of language and gender. Analyzes themes regarding sociolinguistic visibility and representation of gender and sex through a critical examination of the interaction and interrelation between language and gender.
Offered Fall, Spring, Summer

MLG 494. Independent Study in Modern Languages II. (1-3 Units)

Prerequisites: Consent of instructor and chair of Modern Languages. Intermediate or advanced individual study or credit by examination in a foreign language not regularly offered on campus. Arrangements must be made in advance of registration. Repeatable course. Offered Infrequent

MLG 498. Directed Research. (1-3 Units)

Prerequisite: Consent of instructor. The student develops and completes an individual study under faculty supervision. Repeatable course. Offered Infrequent

Music

College of Arts and Humanities
Department of Music

Program Description

The objectives of the music program:

1. Music students acquire the cultural knowledge and professional skills necessary for a career in music.
2. Each music student will demonstrate a broad knowledge of music history and theory as well as those within their area of specialization.
3. Each music student will demonstrate musicianship skills adequate to support the performance and pedagogy of music. These skills include: eartraining, keyboard proficiency, sight-reading, and vocal technique.
4. Music students will acquire hands-on experience with current music and media-related technologies within their area of specialization.
5. Students will demonstrate the skill set needed of professional music teachers for studios and schools.
6. Music students will perform music from the standard repertoire related to their major area of study as soloists and as ensemble members.

Features

The Music Program is accredited by the National Association of Schools of Music (NASM). The Program is distinguished by the wide range of possible experiences it offers the student: performance in multiple genres, composition, conducting, music history, and music education.

The program also is characterized by a close interaction between students and faculty. The size and quality of the department offer all of the advantages of a small, private college at a state-supported university. Student recitals each semester give the faculty the opportunity to monitor each student's progress.

The Department of Music is housed in the La Corte Hall Building, which contains the newly renovated Marvin Laser Recital Hall; a large rehearsal room for orchestra, chorus, and band; a theory and history classroom; a state-of-the-art piano classroom; and a number of teaching studios/practice rooms. Additional practice rooms are available in the nearby North Cain Library. Musical events also are held in the 485-seat University Theatre as well as the Laser Recital Hall.

Financial aid and scholarships are available through the Office of Financial Aid. Several scholarships are specifically for music majors and require a special application to the Department of Music. Auditions for scholarships are usually held in the early spring. The Music Department Scholarship Fund provides support to students who excel in music performance. Mu Phi Epsilon, the Honorary Music Fraternity, offers

scholarships to members on the basis of grade point average, music performance, and service to the department and fraternity. Additional scholarships include the Marshall Bialosky Endowment Scholarship, the New Century Scholarship for composition students, and the Rod Butler Memorial Scholarship.

Academic Advisement

Students and prospective students who have chosen CSU Dominguez Hills for the study of music should seek academic advisement from a Department of Music faculty member at the earliest opportunity.

Preparation

High school students preparing for university music study should take every opportunity to study and perform music. High school participation in band, orchestra, chorus, chamber ensembles, and musical theater productions is highly recommended. In addition, private piano lessons, as well as vocal or instrumental lessons, will help to provide the incoming student with the basic musical skills and performance competencies necessary for success in pursuing a university degree in music.

Community college transfer students preparing for university music study should be sure that their program is paralleling equivalent courses being offered to freshman and sophomore music majors at CSU Dominguez Hills.

Graduation with Honors

Undergraduate students may be candidates for graduation with Honors in Music if they meet the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills.
2. A minimum grade point average of 3.5 in all courses used to satisfy the upper-division requirements for the Music major.

Career Possibilities

Graduates currently are working in the following fields: music teaching; private music teaching in music stores, studios, and in the home; community college teaching; arts administration; symphony orchestra performance; opera performance; church music composition and performance; church choir direction; music buying and music store management; popular music and jazz performance; gospel music performance and composition. Some graduates have elected to continue postgraduate study in the areas of teaching, musicology, composition, performance, and conducting.

Courses

MUS 100. Concert Music. (1 Units)

This course provides training and support for music majors at a beginner level through in-class performances, masterclasses, music journalism essays, attendance at various music performances and department camaraderie. Required attendance in-class and at approved music performances as determined by the Department of Music. May be repeated once. CR/NC grading. Restricted to majors.

Offered Fall, Spring, All terms

MUS 101. Introducing Music. (3 Units)

The technique of listening to music. The elements of music, musical forms, and historical styles. Concert attendance and discussion will be an integral part. Satisfies a General Education Requirement. This course is restricted to 1st time Freshman going through the First Year Experience.

Offered Fall, Spring, All terms

MUS 105. Introduction to Musicianship. (1 Units)

Prerequisite: Concurrent enrollment in MUS 101 or MUS 110 is recommended. An activity course in which students will begin exercises in music perception skills, pitch matching, identification of musical patterns, beginning ear-training and sight-singing drills. Preparation for the Musicianship Proficiency Exam. Repeatable course. Two hours activity per week.

Offered Fall, Spring

MUS 106. Musicianship Skills. (1 Units)

Prerequisites: MUS 105, MUS 110, and MUS 111 are recommended. Ear training, sight-singing, rhythm, keyboard harmony, and melodic and rhythmic dictation. This course is meant to parallel work in MUS 112 and MUS 113. Repeatable course. Two hours of activity per week.

Offered Fall, Spring

MUS 110. Music Fundamentals. (3 Units)

Prerequisite: Concurrent enrollment in MUS 109 is recommended. Music rudiments taught through reading, writing, harmonizing and creating songs. Includes principles of notation, key signatures, scales, intervals, triads and chord progressions. Satisfies a General Education Requirement.

Offered Fall

MUS 111. Intro. To Music Theory. (3 Units)

Prerequisite: MUS 110 or placement test. Elements of music taught through reading, writing and harmonizing at the keyboard. Topics include key signatures, scales, intervals and basic harmony.

Offered Spring

MUS 112. Music Theory I. (3 Units)

Musical theory emphasizing materials from the Common Practice Period (1700-1900). The vocabulary of diatonic scales and modes, chords and their relationships, phrase structure and cadences, harmonic progressions, non-harmonic tones and the technique of harmonization.

Offered Fall

MUS 113. Music Theory II. (3 Units)

Prerequisites: MUS 112 and concurrent enrollment in MUS 106. Chromatic Harmony of the Common Practice Period. Harmonic analysis, secondary dominants, modulation, borrowed chords, augmented sixth chords, Neapolitan sixth chords, diminished sevenths, and ninth, eleventh and thirteenth chords.

Offered Spring

MUS 120. Beginning Voice Class. (1 Units)

Prerequisite: Consent of instructor. Fundamental principles of singing. Posture, breath control, tone production, diction and performance techniques and styles. Repeatable course. Two hours of activity per week.

Offered Fall, Spring

MUS 122. Beginning Guitar Class. (1 Units)

Prerequisite: Previous or concurrent enrollment in MUS 101 and MUS 110 or consent of instructor is recommended. Beginning instruction in guitar technique, single string melody, and chord positions. Repeatable course. Two hours of activity per week.

Offered Fall, Spring

MUS 160. Repertoire. (1 Units)

Special topics vary by section and semester. See Class Schedule for title and prerequisites. Repeatable course.

Offered Fall, Spring

MUS 167. Latin American Regional Music Ensemble. (1 Units)

Students primarily focus on the performance practices of Latina American musical traditions. Through participation in varying-sized ensembles, students will demonstrate their acquired knowledge and skills in a public performance.

Offered Fall, Spring

MUS 168. Pep Band. (1 Units)

Prepares students for performances at university and athletic events while providing them an opportunity to grow and improve in individual and ensemble performance.

Offered Fall, Spring

MUS 169. Early Music Collegium. (1 Units)

Students primarily focus on the performance of music of the Middle Ages, Renaissance, and Baroque periods. Students will receive instructions on historically informed performance practice and present a concert at the end of each semester.

MUS 170. Chamber Music. (1 Units)

Prerequisite: Consent of instructor. Study of music through small instrumental ensemble rehearsal and performance. Type of group may vary. See Class Schedule for title. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged.

Offered Fall, Spring

MUS 171. Chamber Singers. (1 Units)

Prerequisite: Consent of instructor. Study of music through small vocal ensemble rehearsal and performance. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged.

Offered Fall, Spring

MUS 172. Jubilee Choir. (1 Units)

Prerequisite: Consent of instructor. Study and performance of choral music of Afro-American culture. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged.

Offered Spring

MUS 173. Jazz Ensemble. (1 Units)

Prerequisite: Consent of instructor. Techniques of improvisation and a study and performance of instrumental jazz repertoire. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged. Offered Fall, Spring

MUS 175. Band. (1 Units)

Prerequisite: Consent of instructor. A study of music through rehearsal and performance of concert band music. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged. Offered Infrequent

MUS 176. Orchestra. (1 Units)

Prerequisite: Consent of instructor. A study of music through rehearsal and performance of music for symphony orchestra. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged. Offered Fall, Spring

MUS 177. Chorus. (1 Units)

Prerequisite: Consent of instructor. A study of music through rehearsal and performance of music for chorus. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged. Offered Fall, Spring

MUS 178. Guitar Ensemble. (1 Units)

Prerequisite: Consent of Instructor (audition). A study of music through rehearsal and performance of music for guitar ensemble. Public performance expected. Repeatable once at each level. Three hours of activity per week plus extra rehearsal and performance times to be arranged. Offered Infrequent

MUS 179. Music Theatre Workshop. (1 Units)

Prerequisites: Audition and consent of instructor. Study of roles and representative excerpts from opera, operetta, and musical comedy and the basic musical, dramatic and language technique of the musical theater. Performance of excerpts or complete musical theatrical works. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged. Offered Infrequent

MUS 180. Individual Lessons. (1 Units)

Prerequisites: Audition and consent of Department Chair and Instructor. Individual instruction in the student's major performance medium developing technique and repertoire. Individual one-half hour lesson times are arranged with the studio teacher. Public performance and jury evaluation expected. Lessons are available in voice, piano, harpsichord, organ, accordion, flute, oboe, clarinet, bassoon, saxophone, trumpet, horn, trombone, tuba, percussion, violin, viola, cello, string bass, harp, classical guitar, lute, commercial guitar, and electric bass. Primarily for performance majors. Instrument fee may be required. Repeatable course. Offered Fall, Spring

MUS 181. Introduction to Piano I. (1 Units)

Beginning instruction in keyboard technique. Repeatable course. Two hours of activity. Offered Fall, All terms

MUS 182. Introduction to Piano II. (1 Units)

Prerequisite: MUS 181 or consent of instructor. Beginning instruction in keyboard technique. Repeatable course. Two hours of activity per week. Offered Infrequent

MUS 183. Piano I. (1 Units)

Prerequisites: MUS 181 and MUS 182 are recommended. Intermediate instruction in keyboard techniques. Keyboard harmony, scales, chords and improvised accompaniments. Repeatable course. Two hours of activity per week. Offered Fall

MUS 184. Piano II. (1 Units)

Prerequisites: MUS 183 or consent of instructor. Intermediate instruction in keyboard technique. Keyboard harmony, scales, chords and improvised accompaniments. Repeatable course. Two hours of activity per week. Offered Spring

MUS 195. Special Topics in Music. (1-3 Units)

Prerequisite: Consent of instructor. Study and performance of choral music of Afro-American culture. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged. Offered As needed

MUS 200. Concert Music II. (1 Units)

Prerequisite: MUS 100. Provides training and support for music majors at a beginner-intermediate level through in-class performances, masterclasses, music journalism essays, attendance at various music performances, and department camaraderie. Required attendance in-class and at approved music performances as determined by the Department of Music. May be repeated once. CR/NC grading. Offered Fall, Spring, All terms

MUS 201. Music in Film: From the Silent Era to The Lord of the Rings. (3 Units)

Prerequisite: MUS 101 is recommended. Studies film music over the past century and is open to all majors. Through readings, lectures, listening, and film viewing, students study music's continually changing relationship with film, composition styles, and musical and cultural diversity. Offered Fall, Spring

MUS 206. Advanced Musicianship Skills. (1 Units)

Prerequisites: MUS 106 is required. MUS 112 and MUS 113 are recommended. Ear training, sight-singing, rhythm, keyboard harmony, and melodic, harmonic and rhythmic dictation. This course parallels work in MUS 310 and MUS 311 and provide preparation for the Musicianship Proficiency Exam. Repeatable course. Two hours of activity per week. Offered Fall, Spring

MUS 212. Advanced Music Theory I. (3 Units)

Structural, contrapuntal and harmonic analysis of musical forms from the Medieval through the Classical periods. A study of the literature, instrumentation, and notation. Practice includes aural analysis and creative composition. Offered Fall

MUS 213. Advanced Music Theory II. (3 Units)

Prerequisites: MUS 212 or consent of instructor is required; concurrent enrollment in MUS 206 and MUS 316 is recommended. Structural, harmonic and contrapuntal analysis of musical forms from the Romantic period through the Twentieth Century. A study of the literature, instrumentation and notation. Practice includes aural analysis and creative composition. Offered All terms, Spring

MUS 220. Intermediate Voice Class. (1 Units)

Prerequisites: MUS 101, MUS 110 and MUS 120 or Consent of instructor. Singing with an emphasis on the vocal mechanism, use of the voice in ensemble singing and style in songs. Development of solo repertoire. Repeatable course. Two hours of activity per week. Offered Fall, Spring

MUS 222. Intermediate Guitar Class. (1 Units)

Prerequisites: MUS 101, MUS 110 and MUS 122 or consent of instructor. Intermediate instruction in guitar technique, scales, chords and improvised accompaniments. Repeatable course. Two hours of activity per week. Offered Fall, Spring

MUS 223. Intermediate Flamenco Guitar. (1 Units)

Provides students with an introduction to the concepts and techniques necessary to play flamenco guitar, including tonality/mode and the workings of compas (the rhythmic structures unique to flamenco) Repeatable course. Two hours of activity per week. Offered Fall, Spring

MUS 250. History of Rock. (3 Units)

Prerequisite: MUS 101 is recommended. Studies the origins and movements of rock music including blues, R&B, soul, funk, and hip hop. Includes historical development, social contexts, associated styles and sub-genres, aesthetics, meanings, and music technology. Examines influential and innovative performers, songwriters, and producers. Offered Fall, Spring

MUS 260. Repertoire. (1 Units)

Pre-requisite: MUS 160 (two semesters) is required; Co-requisite: MUS 280. Studio instruction in an applied area that complements and provides additional depth to that which is offered in MUS 280. In depth study of Etudes, scales, arpeggios, and supplemental solo repertoire. Offered Fall, Spring, All terms

MUS 267. Latin American Regional Music. (1 Units)

Students primarily focus on the performance practices of Latina American musical traditions. Through participation in varying-sized ensembles, students will demonstrate their acquired knowledge and skills in a public performance. Offered Fall, Spring

MUS 268. Pep Band. (1 Units)

Prepares students for performances at university and athletic events while providing them an opportunity to grow and improve in individual and ensemble performance. Offered Fall, Spring

MUS 269. Early Music Collegium. (1 Units)

Students primarily focus on the performance of music of the Middle Ages, Renaissance, and Baroque periods. Students will receive instructions on historically informed performance practice and present a concert at the end of each semester. Offered All terms

MUS 270. Chamber Music. (1 Units)

Prerequisite: Consent of instructor. Music study through small instrumental ensemble rehearsal and performance. Type of group may vary. See Class Schedule for title. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged. Offered Fall, Spring

MUS 271. Chamber Singers. (1 Units)

Prerequisite: Consent of instructor. Study of music through small vocal ensemble rehearsal and performance. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged. Offered Fall, Spring, All terms

MUS 272. Jubilee Choir. (1 Units)

Prerequisite: MUS 110 or consent of instructor. An introduction to music fundamentals and techniques for dance accompaniment. Two hours of activity per week. Offered Spring

MUS 273. Jazz Ensemble. (1 Units)

Prerequisite: Consent of instructor. Techniques of improvisation and a study and performance of instrumental jazz repertoire. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged. Offered Fall, Spring, All terms

MUS 275. Band. (1 Units)

Prerequisite: Consent of instructor. Rehearsal and performance of concert band music. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged. Offered Fall, Spring

MUS 276. Orchestra. (1 Units)

Prerequisite: Consent of instructor. Rehearsal and performance of music for symphony orchestra. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged. Offered Fall, Spring

MUS 277. Chorus. (1 Units)

Prerequisite: Consent of instructor. Rehearsal and performance of music for chorus. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged. Offered Fall, Spring

MUS 278. Guitar Ensemble. (1 Units)

Prerequisite: Consent of Instructor (audition). A study of music through rehearsal and performance of music for guitar ensemble. Public performance expected. Repeatable once at each level. Three hours of activity per week plus extra rehearsal and performance times to be arranged. Offered Infrequent

MUS 279. Music Theatre Workshop. (1 Units)

Prerequisites: Audition and consent of instructor. Study of roles and representative excerpts from opera, operetta, and musical comedy and the basic musical, dramatic and language technique of the musical theater. Performance of excerpts and complete musical theatrical works. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged. Offered Infrequent

MUS 280. Individual Lessons. (1 Units)

Prerequisites: Audition and consent of department chair and instructor. Individual instruction in the student's major performance medium developing techniques and repertoire at a beginner-intermediate level. Individual one hour lesson times are arranged with the studio teacher. Public performance and jury evaluation expected. Lessons are available in voice, piano, harpsichord, organ, accordion, flute, oboe, clarinet, bassoon, saxophone, trumpet, French horn, Trombone, euphonium, tuba, percussion, violin, viola, cello, string bass, harp, classical guitar, lute, commercial guitar, and electric bass. Primarily for music majors. Instrument fee may be required. Repeatable course. Offered Fall, Spring

MUS 283. Piano III. (1 Units)

Prerequisites: MUS 101 or MUS 110 or consent of instructor. Basic principles of the early childhood music teaching methods developed by Carl Orff. Music education through movement, singing, speech and drama and use of Orff musical instruments. Two hours of lecture and two hours of activity per week. Offered Fall

MUS 284. Piano IV. (1 Units)

Prerequisites: MUS 283 or consent of instructor. Advanced instruction in keyboard technique. Development of solo repertoire and preparation for the Piano Proficiency Exam. Repeatable course. Two hours of activity per week. Offered Spring

MUS 290. Music Industry I: Survey of the Music Industry. (3 Units)

Introduces students to careers in the music industry and enhances their ability to recognize how these professions affect and impact our daily lives. Course examines the many different career fields that make the music industry profitable and progressive. Offered Fall, Spring

MUS 294. Independent Study. (1-3 Units)

Prerequisites: Consent of instructor and department chair. The student investigates a scholarly topic or undertakes directed research or a creative project with the assistance of a Music faculty member. Repeatable course. Offered Infrequent

MUS 295. Special Studies In Music. (3 Units)

Special topics vary by section and semester. See Class Schedule for title and prerequisites. Repeatable course. Offered Infrequent, All terms

MUS 300. Concert Music III. (1 Units)

Prerequisite: MUS 200 is required. Provides training and support for music majors at an intermediate level through in-class performances, master classes, music journalism essays, attendance at various music performances, and department camaraderie. Required attendance in class and at approved music performances as determined by the Department of Music Repeatable once. CR/NC grading. Offered Fall, Spring

MUS 301. Music In World Cultures. (3 Units)

Prerequisite: MUS 101 or 110 or consent of instructor. Survey of non-Western cultures from a musical point of view. Using familiar folk and popular music for comparison, students will be guided into new listening experiences, develop a vocabulary for discussing world music, and gain an appreciation of cultural pluralism. Offered Fall, Spring

MUS 302. African American Music. (3 Units)

Introduction to the music of African Americans from roots in African cultural practice to current day. Musical genres include blues, spirituals, gospel, jazz, classical, R&B, soul, funk, hip-hop, rap, etc. The course is designed for music and non-music majors. Offered Spring

MUS 305A. Music For Dance. (1 Units)

Prerequisites: MUS 101 and MUS 110 or consent of instructor. Survey and analysis of music suitable for children. History and philosophy of American music education emphasizing influences of European systems of Kodaly, Dalcroze, and Orff. Two hours of lecture and two hours of activity per week. Offered Infrequent

MUS 308. Popular & Jazz Harmony. (3 Units)

Prerequisite: MUS 210 or consent of instructor. Analysis of chords and scale patterns, chord symbols, and chord substitutions in popular music and jazz. Offered Fall

MUS 312. The Jazz Age. (3 Units)

Explores the social, cultural, and historical turbulence of the 1920s with a focus on the ways jazz aesthetics in music, literature, and the arts influenced and reflected new ways of thinking about American identity. Offered Fall, Spring

MUS 315. Counterpoint. (3 Units)

Prerequisite: MUS 211 or consent of instructor. Counterpoint as a linear mode of compositional technique in Western music. Modal, tonal and post-tonal practices. Offered Spring

MUS 316. Instrumentation. (3 Units)

Prerequisite: MUS 211 or MUS 308. Acoustical and musical characteristics of all the major orchestral and band instruments. Written assignments will include transcriptions for combination of instruments both as families and mixed ensembles. Offered Fall, All terms

MUS 320. Advanced Voice Class. (1 Units)

Prerequisites: MUS 101, MUS 110 and MUS 220 or consent of instructor. Singing with emphasis on vocal mechanism, use of the voice in ensemble singing, and style in songs. Development of solo repertoire in foreign languages. Repeatable course. Two hours of activity per week. Offered Fall, Spring

MUS 322. Advanced Guitar Class. (1 Units)

Prerequisites: MUS 101, MUS 110 and MUS 222 or consent of instructor. Advanced instruction in guitar technique. Development of solo repertoire. Repeatable course. Two hours of activity per week. Offered Fall, Spring

MUS 323. Advanced Flamenco Guitar. (1 Units)

Prerequisite: Mus 223 required Course follows up on the concepts and techniques introduced in MUS 223, allowing students to move closer to mastery of flamenco guitar. Repeatable course. Two hours of activity per week Offered Fall, Spring

MUS 325. Instrumental Conducting. (3 Units)

Prerequisite: MUS 310 or consent of instructor. An introduction to the basic techniques of conducting both instrumental groups, score reading, baton technique and fundamentals of interpretation. Repeatable course. Two hours of lecture and two hours of activity per week. Offered Spring

MUS 326. Choral Conducting. (3 Units)

Prerequisite: MUS 212 or consent of instructor is required. An introduction to the basic techniques of conducting choral groups and the international phonetic alphabet (IPA). Score reading, hand technique, study of diction, pronunciation, and fundamentals of interpretation. Repeatable course. Two hours of lecture and two hours of activity per week.

Offered Fall

MUS 333. Foundations in Music Education. (3 Units)

Prerequisite: MUS 180 and MUS 280; In order to begin the hours for fieldwork in this course, you will need a valid Certificate of Clearance (fingerprints) and proof of a negative TB (within 4 months of the fieldwork course beginning). For information on submitting these documents, contact the Center for Teaching Careers. A survey of the leading historical, technological, and pedagogical approaches to music education in the United States. This course contains an observation component in the field.

Offered Infrequent

MUS 340. Music For Children. (3 Units)

Prerequisites: MUS 282 or consent of instructor.

Offered Fall, Spring, All terms

MUS 345. Global Popular Music: Identity and Social Change. (3 Units)

Explores popular music and social change in Africa, Asia, South Asia, Southeast Asia, and Latin America. Students will consider social development, modernity, and political movements in relation to music and text as resistance and representing social change.

Offered Fall

MUS 360. Repertoire. (1 Units)

Pre-requisite: MUS 260 (two semesters); Co-requisite: MUS 380. Studio instruction in an applied area that complements and provides additional depth to that which is offered in MUS 380. In depth study of Etudes, scales, arpeggios, and supplemental repertoire. Repeatable for credit.

Offered Fall, Spring

MUS 367. Latin American Regional Music Ensemble. (1 Units)

Students primarily focus on the performance practices of Latina American musical traditions. Through participation in varying-sized ensembles, students will demonstrate their acquired knowledge and skills in a public performance.

Offered Fall, Spring

MUS 368. Pep Band. (1 Units)

Prepares students for performances at university and athletic events while providing them an opportunity to grow and improve in individual and ensemble performance.

Offered Fall, Spring

MUS 369. Early Music Collegium. (1 Units)

Students primarily focus on the performance of music of the Middle Ages, Renaissance, and Baroque periods. Students will receive instructions on historically informed performance practice and present a concert at the end of each semester.

Offered All terms

MUS 370. Chamber Music. (1 Units)

Prerequisite: Consent of instructor. Study of music through small instrumental ensemble rehearsal and performance. Type of group may vary by section and semester. See Class Schedule for title. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged.

Offered Fall, Spring

MUS 371. Chamber Singers. (1 Units)

Prerequisite: Consent of instructor. Study of music through small vocal ensemble rehearsal and performance. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged.

Offered Fall, Spring, All terms

MUS 372. Jubilee Choir. (1 Units)

Prerequisite: Consent of instructor. Study and performance of choral music of Afro-American culture. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged.

Offered Spring

MUS 373. Jazz Ensemble. (1 Units)

Prerequisite: Consent of instructor. Techniques of improvisation and a study of performance of instrumental jazz repertoire. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged.

Offered Fall, Spring

MUS 375. Band. (1 Units)

Offered Infrequent

MUS 376. Orchestra. (1 Units)

Prerequisite: Consent of instructor. A study of music through rehearsal and performance of music for symphony orchestra. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged.

Offered Fall, Spring, All terms

MUS 377. Chorus. (1 Units)

Prerequisite: Consent of instructor. A study of music through rehearsal and performance of music for chorus. Public performances expected. Repeatable once. Three hours of activity per week plus extra rehearsal and performance times to be arranged.

Offered Fall, Spring

MUS 378. Guitar Ensemble. (1 Units)

Prerequisite: Consent of Instructor (audition). A study of music through rehearsal and performance of music for guitar ensemble. Public performance expected. Repeatable once at each level. Three hours of activity per week plus extra rehearsal and performance times to be arranged.

Offered Infrequent

MUS 379A. Music Theatre Workshop. (1 Units)

Prerequisites: Audition and consent of instructor. Study of roles and representative excerpts from opera, operetta, and musical comedy and the basic musical, dramatic and language technique of the musical theater. Performance of excerpts and complete musical theatrical works. Repeatable once. Three hours of activity per week plus extras rehearsal and performance times to be arranged.

Offered Infrequent

MUS 380. Individual Lessons. (1 Units)

Prerequisites: Audition and consent of department chair and instructor. individual instruction in the student's major performance medium developing technique and repertoire at an intermediate level. Individual one hour lesson times are arranged with the studio teacher. Public performance and jury evaluation expected. Lessons are available in voice, piano, harpsichord, organ, accordion, flute, oboe, clarinet, bassoon, saxophone, trumpet, French horn, trombone, euphonium, tuba, percussion, violin, viola, cello, string bass, harp, classic guitar, lute, commercial guitar, and electric bass. Primarily for music majors. Instrument fee may be required. Repeatable course. Offered Fall, Spring, All terms

MUS 382. Advanced Piano II. (1 Units)

Prerequisites: MUS 381 or consent of instructor. Advanced instruction in keyboard technique. Development of solo repertoire and preparation for the Piano Proficiency Exam. Repeatable course. Two hours of activity per week. Offered Spring, All terms

MUS 385. Medieval and Renaissance Music. (3 Units)

Prerequisites: MUS 101 and MUS 110 or consent of instructor. Music from the Medieval period through the Renaissance. Gregorian chant, Leonin, Perotin, Machaut, Dufay, Ockeghem, Josquin, Gombert, Willaert, Palestrina, Lasso, Gabrieli and other composers. Study of styles of music to uncover the various musical, aesthetic, and social determinants underlying the musical literature. Offered Infrequent, All terms

MUS 386. Music History I: Medieval to Renaissance. (3 Units)

Prerequisites: MUS 101 and MUS 110 or consent of instructor. This course covers music from the Medieval through the Renaissance period. The study of styles of music to engage various musical, aesthetic, and social determinants underlying the musical literature.. Offered Spring

MUS 390. Music Industry II: Music Marketing, Media and Management. (3 Units)

Prerequisite: MUS 290 is required. Provides students with an understanding of the inner and outer-workings of artist and concert management, nonprofit arts management, arts enterprise management, advertising management, digital marketing, public relations, branding, merchandising, endorsements, sponsorships, promotion and touring, and big data. Offered Fall, Spring

MUS 395. Special Studies/Activities In Music. (1-3 Units)

Offered Infrequent

MUS 400. Concert Music IV. (1 Units)

Prerequisite: MUS 300 is required. Provides training and support for music majors as an advanced level through in-class performances, masterclasses, music journalism essays, attendance at various music performances, and department camaraderie. Required attendance in-class and at approved music performances as determined by the Department of Music. May be repeated once. CR/NC grading. Offered Fall, Spring

MUS 408. Advanced Songwriting. (3 Units)

Prerequisite: MUS 308 or consent of instructor. Original songs created by students will be performed, discussed, and constructively criticized. Well-known popular, show, country, rock and R and B songs will be studied as models of melodic, harmonic, rhythmic, structural and poetic composition. Field trips and guest lecturers from the industry. Publishing and copyright procedures. Offered Infrequent

MUS 415. Composition and Arranging: Art Music. (3 Units)

Prerequisite: MUS 311 or consent of instructor. Composition and arranging of art music utilizing a variety of resources, from traditional instruments and voice to new instruments, electronics and computer. Repeatable course. Offered Spring

MUS 416. Composition and Arranging: Popular and Jazz. (3 Units)

Prerequisite: MUS 308 or consent of instructor. Composition and arranging for popular and jazz ensembles with an emphasis on contemporary styles. Repeatable course. Offered Spring

MUS 421. Instrumental Methods: MUS ED. (3 Units)

Required Co-requisite: MUS 333 Intensive preparation for prospective educators with focus on teaching instrumental music in schools (elementary, middle, and high school). Includes examination of appropriate literature, classroom management, and teaching pedagogy. Course contains a field experience component. Offered Infrequent

MUS 433. Contemporary Pedagogy. (3 Units)

Prerequisites: MUS 333 and MUS 421 required. In order to begin the hours for fieldwork in this course, you will need a valid Certificate of Clearance (fingerprints) and proof of a negative TB (within 4 months of the fieldwork course beginning). For information on submitting these documents, contact the Center for Teaching Careers. Study of the contemporary principles, techniques, and procedures effective for small and large group music instruction. Emphasis on the development of philosophy, methodology, and teaching strategies. Course contains a field experience component. Offered Infrequent

MUS 440. Intro To Orff Schulwerk. (3 Units)

Prerequisite: Consent of instructor. A study of music through rehearsal and performance of music for symphony orchestra. Public performances expected. Repeatable course. Three hours of activity per week plus extra rehearsal and performance times to be arranged. Offered Infrequent

MUS 441. Marching Band Techniques. (1 Units)

Pedagogy, management and administration of a marching band program. Content will address marching percussion, marching and maneuvering, and attached units. Offered As needed

MUS 445. String Instruments. (1 Units)

Prerequisite: MUS 110 or consent of instructor. Introduction to the principles and literature of string instruments, with emphasis on skills necessary for future teachers of instrumental ensembles. Repeatable course. Two hours of activity per week. Instrument fee may be required. Offered Spring

MUS 446. Woodwind Instruments. (1 Units)

Prerequisites: MUS 110 or consent of instructor. Instrument fee may be required. Introduction to the principles and literature of woodwind instruments with emphasis on skills necessary for future teachers of instrumental ensembles. Repeatable course. Two hours of activity per week. Offered Fall

MUS 447. Brass Instruments. (1 Units)

Prerequisite: MUS 110 or consent of instructor. Introduction to the principles and literature of brass instruments with emphasis on skills, necessary for future teachers of instrumental performance times to be arranged.
Offered Spring

MUS 448. Percussion Instruments. (1 Units)

Prerequisite: MUS 110 or consent of instructor. Introduction to the principles and literature of percussion instruments with emphasis on skills necessary for future teachers of instrumental ensembles. Repeatable course. Two hours of activity per week. Instrument fee may be required.
Offered Fall

MUS 449. Vocal & Choral Techniques. (1 Units)

Prerequisites: MUS 106 or consent of instructor is required. Introduction to the principles and literature of vocal and choral instruction, with emphasis on skills necessary for future teachers of choral ensembles. Repeatable course. Two hours of activity per week.
Offered Spring

MUS 460. Repertoire. (1 Units)

Pre-requisite: MUS 360(two semesters); Co-requisite: MUS 480. Studio instruction in an applied area that complements and provides additional depth to that which is offered in MUS 380. In depth study of Etudes, scales, arpeggios, and supplemental repertoire. Repeatable for credit.
Offered Fall, Spring

MUS 467. Latin American Regional Music Ensemble. (1 Units)

Students primarily focus on the performance practices of Latina American musical traditions. Through participation in varying-sized ensembles, students will demonstrate their acquired knowledge and skills in a public performance.
Offered Fall, Spring

MUS 468. Pep Band. (1 Units)

Prepares students for performances at university and athletic events while providing them an opportunity to grow and improve in individual and ensemble performance.
Offered Fall, Spring

MUS 469. Early Music Collegium. (1 Units)

Students primarily focus on the performance of music of the Middle Ages, Renaissance, and Baroque periods. Students will receive instructions on historically informed performance practice and present a concert at the end of each semester.
Offered Fall, Spring

MUS 470. Chamber Music. (1 Units)

Prerequisite: Consent of instructor. Study of music through small instrumental ensemble rehearsal and performance. Type of group may vary by section and semester. See Class Schedule for title. Public performances expected. Repeatable course. Three hours of activity per week plus extra rehearsal and performance times to be arranged.
Offered Fall, Spring

MUS 471. Chamber Singers. (1 Units)

Prerequisite: Consent of instructor. Study of music through small vocal ensemble rehearsal and performance. Public performances expected. Repeatable course. Three hours of activity per week plus extra rehearsal and performance times to be arranged.
Offered Fall, Spring

MUS 472. Jubilee Choir. (1 Units)

Prerequisite: Consent of instructor. Study and performance of choral music of Afro-American culture. Public performances expected. Repeatable course. Three hours of activity per week plus extra rehearsal and performance times to be arranged.
Offered Spring

MUS 473. Jazz Ensemble. (1 Units)

Prerequisite: Consent of instructor. Techniques of improvisation and a study and performance of instrumental jazz repertoire. Public performances expected. Repeatable course. Three hours of activity per week plus extra rehearsal and performance times to be arranged.
Offered Fall, Spring

MUS 475. Band. (1 Units)

Offered Fall, Spring

MUS 476. Orchestra. (1 Units)

Prerequisites: Consent of department chair and instructor. Individual instruction and guidance in the technique of conducting instrumental and vocal ensembles. Individual lesson times are arranged with the instructor. Public performance and jury evaluation expected. Primarily for conducting majors. Repeatable course.
Offered Fall, Spring

MUS 477. Chorus. (1 Units)

Prerequisite: Consent of instructor. A study of music through rehearsal and performance of music for chorus. Public performances expected. Repeatable course. Three hours of activity per week plus extra rehearsal and performance times to be arranged.
Offered Fall, Spring

MUS 478. Guitar Ensemble. (1 Units)

Prerequisite: Consent of Instructor (audition). A study of music through rehearsal and performance of music for guitar ensemble. Public performance expected. Repeatable once at each level. Three hours of activity per week plus extra rehearsal and performance times to be arranged.
Offered Infrequent

MUS 479A. Music Theatre Workshop. (1 Units)

Prerequisites: Audition and consent of instructor. Study of roles and representative excerpts from opera, operetta, and musical comedy and the basic musical, dramatic and language technique of the musical theater. Performance of excerpts and complete musical theatrical works. Repeatable course. Three hours of activity per week plus extra rehearsal and performance times to be arranged.
Offered Infrequent

MUS 480. Individual Lessons. (1 Units)

Prerequisites: Audition and consent of department chair and instructor. Individual instruction in the student's major performance medium developing technique and repertoire at an advance level. Individual one hour lesson times are arranged with the studio teacher. Public performance and jury evaluation expected. Lessons are available in voice, piano, harpsichord, organ, accordion, flute, oboe, clarinet, bassoon, saxophone, trumpet. French horn, trombone, euphonium, tuba, percussion, violin, viola, cello, string bass, harp, classical guitar, lute, commercial guitar and electric bass. Primarily for music majors. Instrument fee may be required. Repeatable course.
Offered Fall, Spring

MUS 481S. Ind Lessons-Comp & Arrang. (1 Units)

Prerequisites: Consent of department chair and instructor. Individual instruction and guidance with music composition and arranging projects. Individual lesson times are arranged with the instructor. Jury evaluation expected. Primarily for composition majors. Repeatable course. Offered Fall, Spring

MUS 483A. Interpretation Of Music. (1 Units)

Prerequisite: Concurrent enrollment in upper division individual lessons or consent of instructor. Exploration of a wide variety of topics relating to the interpretation of music from various stylistic periods. Recorded examples and student performances will be analyzed and compared with particular attention given to historic authenticity and contemporary practices. Repeatable course. Two hours of activity per week. Offered Spring

MUS 485. Music History II: Baroque to Romantic. (3 Units)

Prerequisites: MUS 106 and MUS 112 or consent of instructor. Covers music from the Baroque through the Romantic period. The study of styles of music to engage various musical, aesthetic, and social determinants underlying the musical literature. Offered Fall

MUS 486. Music History III: 1880 to Contemporary. (3 Units)

Prerequisites: Two semesters of MUS 106 and 113 or consent of instructor. A critical analysis of music from the late Romantic through to the present. Students will focus on disciplinary writing on several styles of music to uncover the various technical, aesthetic, and social determinants underlying the musical literature. Students will actively refine their academic writing in music for diverse audiences, including writing for other musicians and the general public. Restricted to majors. A grade of C or better in this course fulfills the GEAR requirement for all Music majors and minors. Offered Spring

MUS 493. Recital. (1 Units)

Prerequisite: Concurrent enrollment in MUS 480 or MUS 580. Preparation and performance of a full or half music recital. Repeatable course. Offered Fall, Spring

MUS 494. Independent Study. (1-3 Units)

Prerequisites: Consent of instructor and department chair. In consultation with a Music faculty member, the student investigates a scholarly topic or undertakes a creative project. Repeatable course. Offered Fall, Spring

MUS 495. Special Studies In Music. (1-3 Units)

Special topics vary by section and semester. See Class Schedule for title and prerequisites. Repeatable course. Offered Fall, Spring

MUS 496. Music Internship. (1-3 Units)

Prerequisite: Consent of department chair. Students participate in an off-campus internship with an approved employer. Provides for an integration of academic study and related work experience. CR/NC grading. Repeatable course. Offered Fall, Spring

MUS 499. Senior Project. (3 Units)

Prerequisites: Consent of instructor and department chair. In consultation with a Music faculty member, student undertakes a major project which may be one of the following: original research and thesis on a given music history or theoretical topic, a creative project such as an original composition or a full recital with supporting scholarly program notes. Offered Fall, Spring

MUS 580. Performance, Performance Practices and Repertoire. (2 Units)

Prerequisite: Audition and consent of department chair and instructor. Ensembles. Repeatable course. Two hours of activity per week. Instrument fee may be required. Offered Infrequent

MUS 581S. Ind Lessons-Comp & Arrang. (1 Units)

Prerequisites: Consent of department chair and instructor. Individual instruction and guidance with music composition and arranging projects. Individual lesson times are arranged with the instructor. Jury evaluation expected. Primarily for composition majors. Repeatable course. Offered Infrequent

MUS 582S. Indiv Lessons-Conducting. (1 Units)

Prerequisites: NCR 290, NCR 390, and NCR 405. Preparation for application of knowledge of negotiation, conflict resolution, and peacebuilding in school settings. Explores pedagogies appropriate for the development of conflict resolution skills and techniques as basis for both elective and prescriptive training modules. Offered Infrequent

MUS 593S. Recital. (1 Units)

Prerequisite: Concurrent enrollment in MUS 580. Preparation and performance of a full or half music recital. Repeatable course. Offered Infrequent

MUS 594. Independent Study. (1-3 Units)

Prerequisites: Consent of instructor and department chair. In consultation with a Music faculty member, the student investigates a scholarly topic or undertakes a creative project. Repeatable. Offered Infrequent

Introductory and Specific Music, Subject Matter Authorization

Holders of a Single Subject or Multiple Subject credential issued by the California Commission on Teacher Credentialing may secure an Introductory Music Subject Matter Authorization that allows the holder to teach the subject matter content typically included in curriculum guidelines and textbooks approved for study in grades 9 and below. This allows an employer to assign a teacher with an introductory music authorization to teach a class in which the curriculum is for grades 9 and below but the students in the class may be in grades K-12.

Specific Music Subject Matter Authorization that allows the holder to teach the specific subjects in grades preschool, K-12, and classes organized primarily for adults.

For other requirements governing issuance of this authorization, consult the Teacher Education section of this catalog or contact the School of Education Student Services Center.

Complete each of the following courses or equivalent as approved by the Music Department Advisor

Requirements

| Code | Title | Hours |
|--|------------------------------|-------|
| Lower Division Required Courses | | |
| MUS 101 | Introducing Music | 3 |
| MUS 105 | Introduction to Musicianship | 1 |
| MUS 110 | Music Fundamentals | 3 |
| MUS 112 | Music Theory I | 3 |

| | | |
|--|--------------------------------|-----------|
| MUS 120 | Beginning Voice Class | 1 |
| MUS 122 | Beginning Guitar Class | 1 |
| MUS 180 | Individual Lessons | 1 |
| MUS 280 | Individual Lessons | 1 |
| Upper Division Required Courses | | |
| MUS 325 | Conducting | 3 |
| MUS 333 | Foundations in Music Education | 3 |
| Select one of the following: ¹ | | 3 |
| MUS 420 | | |
| MUS 421 | Instrumental Methods: MUS ED | |
| Ensemble Requirement | | |
| Complete one of the University's large performing ensembles for at least four semesters ² | | 4 |
| Total Hours | | 27 |

¹ Students wishing for an Introductory Subject Matter Authorization may select MUS 420 or MUS 421 Instrumental Methods: MUS ED. Students wishing for a Specific Subject Matter Authorization in instrumental music **must** select MUS 421 Instrumental Methods: MUS ED, while students wishing for a specific subject matter authorization in vocal music **must** select MUS 420.

² These ensembles include orchestra, chorus, chamber singers, jubilee choir, bands, and jazz ensemble (1,1,1,1). For orchestra, for example complete MUS 176 Orchestra, MUS 276 Orchestra, MUS 376 Orchestra, and MUS 476 Orchestra.

Music Education, Minor Requirements

| Code | Title | Hours |

| MUS 449 | Vocal & Choral Techniques | 1 |
| Total Hours | | 29 |

Music, Bachelor of Arts Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

No minor is required.

Major Requirements (60-72 units)

Students who major in Music must select one of three options: Music Liberal Arts, Music Education, or Music Performance. The following courses, or their approved transfer equivalents, are recommended or required of all candidates for this degree.

Recommended Courses

| Code | Title | Hours |
|-------------------------------|---------------------------|-------|
| Lower Division Courses | | |
| MUS 101 | Introducing Music | 3 |
| MUS 122 | Beginning Guitar Class | 1 |
| MUS 181 | Introduction to Piano I | 1 |
| MUS 182 | Introduction to Piano II | 1 |
| MUS 183 | Piano I | 1 |
| MUS 184 | Piano II | 1 |
| MUS 222 | Intermediate Guitar Class | 1 |

Upper Division Courses

Music majors are encouraged to broaden their knowledge of music by taking a variety of upper division electives in music. Courses beyond the minimum requirements will give a broader base for later professional development.

Common Core Requirements (24 units)

| Code | Title | Hours |
|--|---|-------|

¹ Students required to complete MUS 380 once in a fall semester and a spring semester.

² Students required to complete MUS 480 once in a fall semester and a spring semester.

³ Students required to complete MUS 493 once in a fall semester and a spring semester.

Repertory Requirements in Major Performance Area

Before being approved for graduation, students must perform at a certain level of advancement and proficiency. A detailed list of representative repertory is available from the Music Department.

Summative Exam

Every graduating student is required to pass a summative pedagogy skills exam. A detailed study guide is available for the Music Department.

- Music students acquire the cultural knowledge and the professional skills necessary for a career in music.
- Each music student will demonstrate a broad knowledge of music history and theory.
- Each music student will demonstrate musicianship skills adequate to support the performance and pedagogy of music.
- Students will acquire hands-on experience with current music and media-related technologies
- Students will demonstrate the skill set needed of music teachers for studios and private and public schools
- Music students will perform music from the standard repertoire related to their major area of study as soloists and as ensemble members.

Negotiation, Conflict Resolution and Peacebuilding

College of Arts and Humanities

Program Description

The Negotiation, Conflict Resolution, and Peacebuilding Program involves a comprehensive study of applied methods, theory, and research and a choice of various electives covering a wide range of applicable subjects. This degree program is beneficial for those who work in the following professions: counseling, law enforcement, teaching, social work, therapy, benefit labor, human resources, management government, community organizing, lobbying, foreign service, and the military, as well

as international business and peace organizations. The Master of Arts and Certificate also are offered online through distance learning delivery.

Undergraduate Features

The Bachelor of Arts in Negotiation, Conflict Resolution, and Peacebuilding is designed to be an interdisciplinary, thoroughly intercultural, Undergraduate Degree Program that emphasizes

1. intercultural communication,
2. the role of women in culture,
3. mediation, and
4. the unique perspectives, fundamentals, theories, and research methods the field.

The NCRP program has a joint 3+3 option/concentration with ABA accredited Southwestern Law School. Students electing the "3+3" modified program will be advised during their first year concerning program requirements.

Graduate Admission Requirements

Individuals with a bachelor's degree in any major and a GPA of 3.0 or above (4-point scale) in the last 60 semester or 90 quarter units of upper division course work from any accredited college or university may apply for admission to the degree program with classified status. Individuals with a master's degree in conflict resolution (or a closely related area or a JD) from any accredited college or university may apply for admission to the post-master's certificate program. All applicants must submit the standard admission application by July 15. A 500-word biographical essay and three letters of recommendation are required. The biographical statement and letters of recommendation must address:

1. what in the applicant's background indicates this subject matter and academic rigor is appropriate for this applicant;
2. why the applicant desires this degree or certificate; and
3. what does the applicant plan to do with this degree or certificate once obtained.

The biographical essay and letters of recommendation should be forwarded to the program director. Applicants will be selected to fill the vacancies in the program on the basis of grade point average (if applicable) and an evaluation of the biographical statement and letters of recommendation. Furthermore, the applicant may be required to participate in an oral interview. There is an opportunity to pursue a joint JD/MA in cooperation with Southwestern Law School. Students interested in pursuing this opportunity should consult with the program director prior to commencement of their first semester as a graduate student.

Program

Once admitted, students must complete their program (degree or certificate) with a grade point average of at least 3.0. All courses used to fulfill the requirements for the master's degree or the certificate must be passed with a grade of "B" or better. Subject to approval of the program director, no more than 10 units total can be included from other departments or universities, or be completed prior to formal admission to the master's degree program and 5 units for the post-master's certificate. Students must be in continuous attendance as defined elsewhere in this University Catalog. No course completed as part of another degree, and

no course completed more than 5 years before the date of graduation date, can be included toward the master's degree or certificate.

Each year the entering class for the degree or certificate program will be placed in a cohort for on-campus education and a cohort for distance learning delivery.

Students for the master's degree must meet the Graduation Writing Assessment Requirement (GWAR) by scoring 8 or above on University Graduation Writing Examination (GWE) or by earning at least a "B" in an approved course as described in the University Catalog. This requirement must be satisfied during the first semester in the program in order to continue in the program.

All other university requirements specified in this University Catalog must be met (see the Graduate Degrees and Postbaccalaureate Studies (<https://catalog.csudh.edu/general-information/graduate-degree-postbaccalaureate-studies/>) section).

Credit by Examination

Courses in the Negotiation, Conflict Resolution and Peacebuilding Program depend to a large degree on simulations, team learning, discussion, and papers growing out of these experiences. Therefore, credit by examination is not available. This is a rigorous program and should not be undertaken without a commitment to superior oral and written work product.

Graduation

Students must complete a Graduation Application (available from the Registrar) and a Program Approval Form (available from the program office) according to the deadlines given in the graduate section of this University Catalog under "Application for Graduation". The Program Approval Form specifies the courses to be counted toward graduation, and insures that all students are Classified and Advanced to Candidacy. This applies to both the master's degree and the post-master's certificate programs.

Advising

Full-time faculty members serve as academic advisors for NCRP majors. Students are strongly encouraged to seek faculty advisement upon admission and regularly thereafter. Faculty advisors work with students to provide information about program requirements, preparation for post-baccalaureate programs, and career options.

The Negotiation, Conflict Resolution and Peacebuilding Student and Alumni Association provides a means for students and alumni of the program to exchange ideas and job information and to extend their social and professional contacts. Students are strongly encouraged to join and participate.

Undergraduate Programs

Bachelor

- Negotiation, Conflict Resolution and Peacebuilding, Bachelor of Arts (p. 715)

Graduate Programs

Certificate

- Conflict Analysis and Resolution, Post-Master's Certificate (p. 714)

Master

- Negotiation, Conflict Resolution and Peacebuilding, Master of Arts (p. 716)

Faculty

Brian Jarrett, Program Director

Nancy D. Erbe

Emeriti Faculty

David A. Churchman, David Nasatir, A. Marco Turk

Program Office: LIB 5515, (310) 243-3237

Courses

NCR 190. Seminar: Negotiation Theory. (3 Units)

Negotiation Theory will be presented through consideration of the game and other theories used in bargaining at all levels of society, so that the student will understand why negotiation is the underlying art in human affairs. Students will acquire the ability to appropriately select and apply tools of negotiation to conflict resolution and peacebuilding in order to achieve personal, community, national and international goals.

Offered As needed

NCR 289. Key Issues in Peacebuilding. (3 Units)

Introduction to theories of peace, conflict and violence. Emphasis is on interdisciplinary character of peacebuilding and application of theories and methods. Students gain understanding of nature of social conflict, causes of violence and the meanings of peacebuilding at all levels.

Offered Fall

NCR 290. Intro to Negotiation Theory. (3 Units)

Prerequisites: Sophomore standing and instructor approval.

Consideration of theories used in bargaining at all levels of society to understand why negotiation is the underlying art in human affairs. Students will acquire ability to appropriately select and apply tools on negotiation to conflict resolution and peacebuilding.

Offered Infrequent

NCR 291. Psychology of Peacebuilding. (3 Units)

Examines how psychological processes, cognitive and emotional, individual and collective, combine with external factors in causing violence. How these psychological insights can help prevent and resolve violent conflicts is examined through consideration of peacebuilding approaches.

Offered Spring

NCR 294. Independent Study in NCR. (1-3 Units)

Prerequisites: Consent of the instructor Independent study of particular topics in the subject area under the direction of a member of the subject department faculty. Repeatable course.

Offered Infrequent

NCR 296. Undergraduate Internship: Peacebuilding I. (3 Units)

Prerequisite: Consent of instructor, restricted to majors. Under the direction of the internship faculty associate, students work in various approved internship opportunities.

Offered Infrequent

NCR 387. Environment and Peacebuilding. (3 Units)

Peacebuilding and conflict transformation combine with ecology in an effort to reconsider the human relationship system as it combines with our environment. Explores how society might foster environmental improvements and sustainable development to achieve successful peacebuilding goals.

Offered Fall

NCR 390. Fundamentals of Conflict Resolution and Peacebuilding. (3 Units)

Prerequisite: NCR 290. Introduction to fundamentals involved with interdisciplinary conflict resolution and peacebuilding. Emphasis on ways the arts and humanities shape and form its ethics and methods. Issues like truth and cultural perspective-taking will be explored along with storytelling narrative; creativity/imagination.

Offered Fall, Spring

NCR 391. Restorative Justice. (3 Units)

Restorative arts and healing within conflict resolution encourages those who have harmed another to repair their harm. Victims, including affected community, receive opportunity to encounter offender, ask questions and share how they have been harmed. Restorative Discipline included.

Offered Fall

NCR 394. Independent Study in NCRP. (1-3 Units)

Prerequisites: Consent of the instructor Independent study of particular topics in the subject area under the direction of a member of the subject department faculty. Repeatable course.

Offered Infrequent

NCR 396. Undergraduate Internship: Peacebuilding II. (3 Units)

Prerequisite: Consent of instructor, restricted to majors. Under the direction of the internship faculty associate, students work in various approved internship opportunities.

Offered Infrequent

NCR 405. Research Methods: NCRP. (3 Units)

Prerequisites: NCR 290 and NCR 390. Instructs in strategic research approaches used to develop new tools, methods or projects for analysis emphasizing theoretical, analytical, research and practical skills in writing and critical thinking in the field of negotiation, conflict resolution and peacebuilding.

Offered Fall

NCR 410. NCRP Pedagogy. (3 Units)

Prerequisite: Requires approval of program director. Addresses emerging practice of conflict resolution in cyberspace. ODR utilizes online resources as the fourth party collaborating with the traditional third party in resolving conflicts more efficiently and less expensively.

Offered Spring

NCR 490. Capstone Course: NCRP. (3 Units)

Prerequisites: NCR 290, NCR 390, NCR 405 and NCR 410. Community service learning utilizing outside internships (120 hours) plus weekly class sessions (75 minutes each). Internship will include successful completion of 25-hour mediation skills and techniques training. Requires demonstration of ability to negotiate and resolve disputes.

Offered Spring

NCR 494S. Independent Study in NCRP. (1-3 Units)

Prerequisites: Consent of the instructor Independent study of particular topics in the subject area under the direction of a member of the subject department faculty. Repeatable course.

Offered Infrequent

NCR 495. Special Topics in Negotiation, Conflict Resolution and Peacebuilding. (3 Units)

Prerequisite: Approval of Program Director. Intensive study of an issue, concept, theme or method in Negotiation, Conflict Resolution & Peacebuilding. May be taken for credit only once for the major.

Repeatable course.

Offered As needed

NCR 496. Undergraduate Intern: Peacebuilding III. (3 Units)

Prerequisite: Consent of instructor, restricted to majors. Under the direction of the internship faculty associate, students work in various approved internship opportunities.

Offered Infrequent

NCR 500. NCRP Skills Concepts & Tools. (3 Units)

Determining specific purpose and key issues when negotiating, resolving conflict, and building peace. Effective application when reading, writing, speaking, and listening. Questioning information, conclusions, and points of view with clarity, accuracy, precision and relevance. Thinking beyond the box with fairness and logic.

Offered Fall

NCR 503. Ethics of NCRP. (3 Units)

Prerequisite: NCR 500. Examines individual group values and perspectives in relation to negotiation, conflict resolution and peacebuilding processes, with special emphasis on analyzing third party intervener's ethical responsibilities and dilemmas. Case studies used to examine and formulate ethical approaches to critical issues.

Offered Spring

NCR 504. Theories of Conflict. (3 Units)

Prerequisite: NCR 500. Critical analysis of conflict theories and models among individuals, organizations and governments; exploring causes, functions and effects. Perspectives from anthropology, archaeology, biology, communications, economics, gender studies, geography, history,

Offered Fall

NCR 507. Sem. Res Desig/Intrepret. (3 Units)

Prerequisite: NCR 500, 503 and 504. Considers various research methods to be used in negotiation, conflict resolution and peacebuilding. Covers research design and the tools needed to conduct basic independent research. Students develop a compelling research proposal addressing questions of importance to them.

Offered Spring

NCR 508. Communication and Conflict. (3 Units)

Prerequisite: NCR 500, 503 and 504. Emphasizes human communication in context of conflict. Addresses challenges to effective communication caused by interpersonal, intrapersonal, intergroup or intragroup conflict, and role of communication in resolving such conflicts. Concentrates on methods of communication most effective in dealing with differences.

Offered Fall

NCR 522. Negotiation Tactics. (3 Units)

Prerequisite: NCR 500, 503 and 504. Tactics used in negotiations among individuals, institutions, and societies. Planning and conducting personal, corporate, labor, hostage, and diplomatic negotiations. Cross-cultural, ethical, and historical dimensions.

Offered Spring

NCR 525. Mediation. (3 Units)

Prerequisites: NCR 500, 503, 504, NCR 508, and NCR 522. Theory and skills including requirements for certification under the California Dispute Resolution Programs Act, especially agreement procedures, case development, consensus building, issue framing and prioritizing, orientations toward conflict, and record keeping.
Offered Spring

NCR 527. Arbitration. (3 Units)

Prerequisites: Approval of program director. Compulsory and noncompulsory arbitration of grievances in public, private, corporate, labor, and international disputes. Case studies explore the arbitration role in unique settings.
Offered Fall

NCR 529. Conflict Res Internship. (3 Units)

Prerequisites Requires approval of program director. Students will work as interns in agencies in negotiation, conflict resolution and/or peacebuilding, and will consult weekly with a faculty supervisor. A total of 120 hours of agency internship experience will be required to successfully complete the course. An internship for the Post-NCRP MA Certificate may not be the same as the internship used by the student for NCR 529 as part of the NCRP MA Degree Program.
Offered Infrequent

NCR 530. Online Dispute Resolution. (3 Units)

Examines cases of health care providers who may find that they are involved in disputes related to their profession. Considers potential categories of legal conflict in the health care industry from three sources of conflict: providers, payers, and producers.
Offered Fall

NCR 531. Marital & Family Mediation. (3 Units)

Prerequisite: Requires approval of program director. Separation problems in traditional and nontraditional relationships such as property division and child custody. Legal, tax, and financial aspects. The mediation process. Written and oral agreements.
Offered Fall

NCR 532. Dispute Resolution Clinic. (3 Units)

Prerequisite: Requires approval of program director. Provides a forum in which all students, staff, and faculty can creatively process and resolve conflict rather than allowing hostilities to build toward violence or adjudication. Each semester, conducts a basic mediation skills training for campus and surrounding communities.
Offered Infrequent

NCR 533. Labor Conflict. (3 Units)

Prerequisite: Requires approval of program director. Case and historical studies in selected industries. Past, present, and pending court decisions or national and state labor laws. Strategic planning for labor organizations. The process of negotiating a labor contract. Grievance and arbitration procedures.
Offered Fall

NCR 535. Organizational Conflict. (3 Units)

Prerequisite: Approval of program director. Origin and types of conflicts which arise within and between complex organizations. Positive and negative effects of Organizational conflict. Exploiting, preventing, containing, escalating, and resolving conflict.
Offered Fall

NCR 536. Dispute Resolution for Sports. (3 Units)

Prerequisite: Approval of program director. Examines sports law and dispute resolution utilizing particularly the processes of arbitration and mediation. Focuses on players, owners, agents and unions, as well as other areas of conflict such as free agency and player attitude and disloyalty.
Offered Spring

NCR 537. International NCRP. (3 Units)

Prerequisite: Approval of program director. Study of selected international conflicts involving complex issues such as culture, ethnicity, politics and religion. Considers common misconceptions concerning diplomacy. Encourages students to appreciate approaches to negotiation, conflict resolution and peacebuilding as vehicles for successful grassroots impact on peace efforts.
Offered Spring

NCR 538. Sem: Public Policy Conflict. (3 Units)

Prerequisites: NCR 504, NCR 507, NCR 508, NCR 522, NCR 525 and NCR 544. Considers constructive and timely approaches to resolving conflicts arising over use, conservation, and restoration of environment, natural resources, and public lands. Examines basic principles, mechanisms and strategies for engaging federal agencies in effective environmental conflict resolution and collaborative problem solving.
Offered Spring

NCR 540. Sem: Community Conflict. (3 Units)

Prerequisite: Requires approval of program director. The impact of system dynamics on conflict management in communities from neighborhoods to nations. Implications of system dynamics for specifying goals and planning interventions to achieve them, from pre-emptive to corrective. Implications for training and organization.
Offered Fall

NCR 541. Restorative Justice&Peacebldng. (3 Units)

Prerequisite: Requires approval of program director. Addresses respective needs of crime victims and offenders ignored by criminal justice system and international community. Retribution abandoned in favor of restorative model based on needs of victims, offenders and community, achieved through application of conflict resolution and peacebuilding processes.
Offered Fall

NCR 542. Collaborative Law. (3 Units)

Prerequisite: Requires approval of program director. Lawyers' and clients' cooperative voluntary conflict resolution process. Emphasizes shared belief that it is in best interest of parties to avoid adversarial proceedings. Commitment to resolving differences with minimal conflict and working together to create shared solutions to the issues.
Offered Spring

NCR 543. Conflict Resolution in Schools. (3 Units)

Prerequisite: Requires approval of program director. Practical strategies to teach students to be peacemakers to reduce violence in schools. Discusses how schools can create cooperative learning environment where students learn how to negotiate and mediate peer conflicts and teachers use academic controversies to enhance learning.
Offered Fall

NCR 544. ADR Processes. (3 Units)

Prerequisites: NCR 500, NCR 503 and NCR 504. Surveys a variety of process choices in dispute resolution. Recognizing that litigation may not be appropriate in many cases. Course examines alternatives such as negotiation, mini-trial, mediation, panel evaluation, summary jury trial, private judging, arbitration, and use of special masters.
Offered Spring

NCR 545. Intercultural Conflict. (3 Units)

Prerequisite: Requires approval of program director. Presents overview of intercultural communication negotiation and conflict resolution.

Emphasizes understanding of values of intercultural as well as interreligious diversity in our increasingly interdependent world, nation and local communities. Encourages awareness of cultural perspective and socialization.

Offered Fall

NCR 546. Conflict and the Media. (3 Units)

Prerequisite: Requires approval program director. Examines the role of mass media in conflict resolution and peacebuilding, and its influence on world's most intractable conflicts as well as support of peace initiatives. Considers how media can serve as part of the problem or part of the solution.

Offered Infrequent

NCR 547. Negotiation International Ethnic Conflict. (3 Units)

Examines basic considerations regarding negotiating ethnic conflict that present a challenge to those involved in negotiation, conflict resolution and peacebuilding. Explores relevance of negotiation theory to improvement, mangement, and resolution of these disputes by studying selected international conflicts.

Offered Fall, Spring

NCR 548. Health Care Dispute Resolution. (3 Units)

Prerequisite: 6 units in LD Philosophy or department consent. An introduction to philosophical methods, research and dialogue in order to improve students' skills at writing and analysis. Topics to be covered will address some central area or areas of philosophy and will vary from year to year.

Offered Spring

NCR 549. Critical Peacebuilding. (3 Units)

Considers the many and profound interconnections between conflict, development and peace. Examines high levels of violent protracted conflict and inexcusable and rising levels of poverty and inequality - two phenomena that are often found together intermingling in complex ways.

Offered Fall

NCR 591. Seminar: NCR Capstone Course. (3 Units)

Prerequisites: All required and elective courses. Course is designed to enable students to demonstrate integration of knowledge of the field and critical and independent thinking. Preparation and delivery (oral and written) of culminating event under supervision of instructor. Faculty approval of written portfolio and successful oral defense required for graduation. CR grade insufficient by itself. CR/NC grading. Repeatable for six units.

Offered Spring

NCR 594. Independent Study. (1-4 Units)

Prerequisites: Consent of Department Chair. Independent study undertaken under the supervision of a faculty member. Repeatable course.

Offered As needed

NCR 595. Special Topics. (1-3 Units)

Prerequisite: Requires approval of program director. Study of a current topic in Negotiation, Conflict Resolution and Peacebuilding. Repeatable for total of six units.

Offered Fall, Spring

NCR 597. Directed Reading in Negotiation, Conflict Resolution and Peacebuilding. (3 Units)

In consultation with a faculty member, completion of readings for orientation to a little known topic; or as background for writing a thesis proposal (the concept for which has previously been approved by the NCR program director). CR/NC grading. Repeatable for a total of six units.

Offered Fall, Spring

NCR 598. Directed Research. (3 Units)

Prerequisites: Requires approval of program director. Conduct of pilot studies, development of research instruments, or similar independent research in preparation for the thesis, under the supervision of a faculty member in any area of Negotiation, Conflict Resolution and Peacebuilding. CR/NC grading.

Offered Fall, Spring

NCR 599. Thesis or Project. (1-3 Units)

Prerequisites: Requires approval of program director. In consultation with a faculty member, writing of a master's thesis in Negotiation, Conflict Resolution and Peacebuilding that has previously been approved by the NCR program director. Then, if thesis approved by faculty and oral defense successful, three units replace NCR 591 as culminating event. CR grade insufficient by itself. Choice of area requires prior approval of NCR program director. CR/NC grading.

Offered Fall, Spring

NCR 600S. Grad Continuation Course. (1 Units)

Graduate students who have completed their course work but not their culminating event or who have other requirements remaining for the completion of their degree, may maintain continuous attendance by enrolling in this course. Signature of graduate program director required.

Offered Fall, Spring

Conflict Analysis and Resolution, Post-Master's Certificate

The certificate program is designed for graduates of the NCRP MA Degree program (or a closely related field), or law graduates interested in developing specialized skills useful in their field of choice for specialization through advanced comprehensive understanding of their topic or in further graduate work.

The certificate program is designed for graduates of the NCRP MA Degree program (or a closely related field), or law graduates interested in developing specialized skills useful in their field of choice for specialization through advanced comprehensive understanding of their topic or in further graduate work.

Total Hours 15

¹ With the exception of NCR 529 Conflict Res Internship, no course taken as part of the NCRP MA degree may be taken again for the NCRP post-master's certificate.

² With respect to NCR 529 Conflict Res Internship, the same internship used for the course as part of the NCRP MA degree may not be used for the certificate.

³ Offered as an optional course tailored to a student's specific interests on a selected basis, no one topic to exceed six units.

Negotiation, Conflict Resolution and Peacebuilding, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major, no minor required.

Major Requirements (48 units)

The following courses, or their approved transfer equivalents, are required of all candidates for this degree:

| Code | Title | Hours |
|-----------------------------|-----------------------------|-------|
| Required NCR Courses | | |
| NCR 289 | Key Issues in Peacebuilding | 3 |
| NCR 290 | Intro to Negotiation Theory | 3 |
| NCR 291 | Psychology of Peacebuilding | 3 |

| | | |
|---------|---|---|
| NCR 387 | Enviornment and Peacebuilding | 3 |
| NCR 390 | Fundamentals of Conflict Resolution and Peacebuilding | 3 |
| NCR 405 | Research Methods: NCRP | 3 |
| NCR 410 | NCRP Pedagogy | 3 |
| NCR 490 | Capstone Course: NCRP | 3 |

Interdisciplinary Courses

Pre-Admission Disclosure for Academic Programs Leading to Licensure or Credentialing

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or taxpayer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements is available from the School of Nursing: Dr. Terri Ares (310) 243-2644.

Program Descriptions

The School of Nursing's (SON) Nursing Program began in the spring of 1981 with two major commitments:

1. To make quality higher education in nursing more accessible to employed registered nurses and
2. To ultimately improve healthcare in California.

The undergraduate and graduate programs are designed for registered nurses who wish to further enhance their professional nursing practice, expand their nursing career opportunities, and/or prepare themselves for leadership roles. The curriculum and theory courses utilize the latest, evidence-based approaches to online learning and are specifically designed to address the unique needs of adult learners whose time, personal life commitments, or work schedules make it difficult to complete traditional face-to-face, campus-based courses of study.

The SON offers both undergraduate and graduate degree programs as well as post-masters/graduate certificate programs:

1. The RN-BSN program is designed for Registered Nurses possessing an Associate Degree in Nursing and wishing to continue their studies to earn a Bachelor of Science in Nursing (BSN) degree.

- The Master of Science in Nursing (MSN) program is for Registered Nurses possessing a Bachelor of Science in Nursing (BSN) degree who wish to specialize in an advanced area of nursing. Selection of a degree option of Nurse Administrator, Nurse Educator, Adult-Gerontology Clinical Nurse Specialist, Neonatal Clinical Nurse Specialist, Pediatric Clinical Nurse Specialist, or Family Nurse Practitioner is required at the time of application.
- Post-Masters/Graduate Certificate programs are offered for nurses already possessing a Master of Science in Nursing (MSN) or Doctor of Nursing Practice (DNP) degree who wish to pursue further graduate study for the Adult-Gerontology Clinical Nurse Specialist, Neonatal Clinical Nurse Specialist, Pediatric Clinical Nurse Specialist, Nurse Administrator, or Nurse Educator role.

The Baccalaureate degree, Masters degree, and Clinical Nurse Specialist Post-Masters Certificate programs at California State University Dominguez Hills are accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791.

A. Key Program Features

- Classes designed to meet the needs of adult learners
 - Opportunities to meet students with similar goals
 - Access to faculty with a strong track record in education, research, management, and clinical practice
 - Over 25 members of the faculty prepared at the doctoral level
 - Highly experienced preceptors and prestigious community affiliations
 - All theory courses are offered online (minimal on-site skills requirement for physical assessment and FNP courses)
 - Professional skill development and networking with a diverse group of nursing professionals.
- Preceptorships/Clinical Affiliations-** The SON maintains many affiliation agreements with prestigious healthcare agencies and other institutions for student clinical placements. Students participate in performance courses (clinical practice/skills laboratory experiences) with supervision by faculty instructors and agency preceptors. Required clinical hours vary according to the course, program, or role option. FNP role performance courses must be completed in the State of California however arrangements for other courses requiring clinical placement can many times be arranged in other states.
 - Out-of-State Students-** Students are required to reside in a state in which the School of Nursing at California State University, Dominguez Hills is permitted to deliver online education.

Academic Advisement

The School of Nursing Programs provide student advisement, beginning with general information sessions for prospective students and orientation for newly admitted students. The Director, Associate Directors, Role Option Coordinators and faculty provide ongoing support and advisement to students throughout the program of study. Much of the information needed by students can be found on the SON website, in handbooks, and in other documents. Special advisors are available for undergraduate students in the Student Service Center (SSC). These advisors can provide information and answer questions related to the general aspects of the undergraduate nursing programs, registration and enrollment, and the class schedule. The SSC advisors may be reached at 1-800-344-5484 (choose option #1) or bsnmajoradvising@csudh.edu. These advisors are dedicated to giving students the information and

assistance they need to make a smooth transition into CSU Dominguez Hills and the SON programs.

The Associate Director for Undergraduate Program serves as the advisor for BSN students and will answer questions and provide guidance upon request. Graduate student advisement is provided by the Associate Director for Graduate Program and Role Option Coordinators. Students are urged to seek advice and communicate with faculty and Student Service Center advisors as soon as issues or problems arise. If required, all persons offering advice will refer students to the appropriate person to offer advice or deal with concerns as necessary.

Preparation

All MSN and post-graduate certificate applicants/students must possess an active, unencumbered, unrestricted license as a Registered Nurse with no probation or disciplinary actions pending or imposed. It is preferred that RN-BSN students possess their RN license prior to application for admission to the University. However, students actively enrolled in regionally accredited Associate Degree in Nursing (ADN) programs may apply for admission prior to completion of their ADN program so long as they can demonstrate graduation from the ADN program before starting the RN-BSN program. Students in the RN-BSN program are required to have an active, unencumbered, unrestricted RN license with no probation or disciplinary action pending or imposed prior to entering any clinical courses. **It is the student's responsibility to immediately report in writing any change in licensure status to the Director of the School of Nursing.**

- Students are responsible for obtaining (at their own expense) clinical clearance items as required by the School of Nursing and/or an affiliating clinical agency where the student is placed. Examples include: health exams, immunizations, titers, COVID testing and vaccination, Basic Life Support (BLS) training, universal precautions and HIPAA training. Additionally clinical agencies often require criminal background checks, drug screening, and other tests. If students are not able to meet all agency requirements, they may be barred from entering the clinical area. The SON cannot guarantee alternative clinical placements. If students are not able to meet clinical course objectives, they may be subject to disqualification from the program.
- Patient confidentiality and other professional ethics must be respected.
- Students must obtain the course syllabus and course materials by logging into the online classroom for each course. Required textbooks are posted in advance of the semester in the university's online bookstore.

Undergraduate students must satisfy the Graduation Writing Assessment Requirement (GWAR) prior to completing 84 units.

Undergraduate Programs

Bachelor

- Nursing, Bachelor of Science (p. 725)

Graduate Programs

Master

- Nursing, Master of Science (p. 727)

Certificate

- Clinical Nurse Specialist, Post-Master's Certificate (p. 723)
- Neonatal Clinical Nurse Specialist, Post-Master's Certificate (p. 724)
- Nursing Administration, Post-Master's Certificate (p. 724)
- Nursing Education, Post-Master's Certificate (p. 725)

Director & Associate Directors (Faculty)

Dr. Ronald Norby, Director, School of Nursing
 Dr. Cathryn Andrade, Associate Director, Undergraduate Nursing Program
 Dr. Terri Ares, Associate Director, Graduate Nursing Programs

Graduate Program Coordinators (Faculty)

Clinical Nurse Specialist Role Options - Dr. Terri Ares

Family Nurse Practitioner Role Option -
 Nurse Administrator Role Option - Dr. Christina Recinos
 Nurse Educator Role Option - Dr. Wafa Khasawneh

Full-time Faculty

Dr. Cathryn Andrade, Dr. Terri Ares, Maria Barbosa, Dr. Linda Goldman,
 Dr. Barbara Kennedy, Dr. Wafa Khasawneh, Dr. Vera Kunte, Dr. Samira
 Moughrabi, Dr. Sally Mahmoud, Dr. Ronald Norby, Dr. Dale Mueller, Dr.
 Lauren Outland, Dr. Nop Ratanasiripong, Dr. Christina Recinos

Emeriti Faculty

Dr. Angela Albright, Dr. Kathleen Tornow Chai, Dr. Judith J. Chodil, Dr. Mary
 Cruise, Dr. Colleen Ehrenberg, Dr. Ellen Hope Kearns, Dr. Laura Inouye, Dr.
 Cynthia Johnson, Dr. Kathleen Johnston, Dr. Judith Lewis, Dr. Kathleen
 F. O'Connor, Dr. Ruth A. Pease, Dr. Carole A. Shea, Dr. Carol Snarr, Dr.
 Margaret Wallace, Dr. Jo Ann Wegmann, Dr. Rose Welch

Courses

BSN 302. Concepts of Professional Nursing Practice. (3 Units)

Focuses on concepts essential to the baccalaureate prepared nurse for socialization into the full professional role. Incorporates The Essentials of Educated Baccalaureate Education for Professional Nursing Practice (2008). Content areas include returning to school and role development, historical nursing influences, nursing theory, ethical practice, quality practice, accountability and professional nursing issues/trends.
 Offered Fall, Spring, Summer

BSN 306. Cult Diversity Healthcare. (3 Units)

Applies cultural concepts and models to explore various forms of human diversity. Analyzes how cultural diversity affects health beliefs, health care behaviors, and health/illness dynamics. Discusses ethnocentrism and bias and their impact on health care. Helps to build cultural competence and improve health care delivery.
 Offered Fall, Spring, Summer

BSN 346. Human Pathophysiology. (3 Units)

Recommended Prerequisite: BSN 302. Explores the response of the human body to various disease processes. Examines the rationale behind diagnosis and treatment of illness and injury. Contrasts the environmental and genetic components that contribute to health/illness. Emphasizes research advances in genetics and biomedical sciences, especially related to HIV/AIDS and quality of life.
 Offered Fall, Spring, Summer

BSN 381. Hlth Assess Skills Seminar. (1 Units)

Prerequisite: BSN 346 is recommended. Provides the opportunity for application of basic knowledge and the practice of skills related to performing a complete nursing health assessment of pediatric, adult, and geriatric patients. Requires 16 hours of practice in a clinical laboratory. CR/NC grading.
 Offered Fall, Spring, Summer

BSN 382. Health Assessment. (2 Units)

Recommended Prerequisite: BSN 346. Recommended Co-requisite: BSN 381. Students examine the theoretical knowledge and psycho-motor skills necessary to perform a comprehensive health history and physical examination on the pediatric, adult, and geriatric patient.
 Offered Fall, Spring, Summer

BSN 422. Community-Based Nursing. (3 Units)

Prerequisites: BSN 302, BSN 346, BSN 381, and BSN 400 or concurrent enrollment are required. Co-requisite: BSN 423 is recommended. Explores dimensions of community-based nursing from individual/family health to community's overall health levels. Explores nursing scopes and responsibilities in healthy promotion and education, disease prevention, and risk reduction. Examines how epidemiological and evidence-based practice principles may be applied in order to assess, plan, implement, and evaluate community-based nursing interventions.
 Offered Fall, Spring, Summer

BSN 423. Community-Based Nursing Role Performance. (2 Units)

Prerequisites: BSN 302, BSN 346, BSN 381, BSN 400 and BSN 422 (or concurrent enrollment) are required. Provides an opportunity for application of the knowledge and the skills of the community-based nurse in a community setting. Requires 90 hours of clinical practice with a preceptor for the Public Health Nurse Certificate.
 Offered Fall, Spring, Summer

BSN 452. Management and Leadership in Health Care Systems. (3 Units)

Required Prerequisite: BSN 302. Recommended Prerequisite: BSN 460. Introduces concepts of leadership, management, advocacy and roles of the professional nurse in relation to career planning, organizational and system-wide change. Topics include professionalism, ethics, power, quality, safety, inter-professional collaboration, change, group dynamics, finance, technology, and strategic planning.
 Offered Fall, Spring, Summer

BSN 460. Nursing Research Utilization. (3 Units)

Prerequisite: BSN 405 may be taken concurrently. Examines scientific clinical nursing rationale for research utilization and theory-based practice. Presents concepts of research methods and processes. Analyzes relevant nursing problems for clinical effective practice.
 Offered Fall, Spring, Summer

BSN 494. Independent Study. (1-3 Units)

A course of study designed cooperatively by student and instructor, and approved by the Program Director, to accomplish individualized learning objectives that are appropriate to the role of the professional nurse. (Students should contact their advisor prior to enrolling to determine the appropriateness of this course for degree completion.)
 Offered Fall, Spring, Summer

BSN 495. Special Topics/Colloquia. (1-3 Units)

These courses offer student groups an opportunity to explore a topic of current interest to the nursing profession with colleagues, faculty and special guest speakers.
 Offered Fall, Spring, Summer

MSN 502. Advanced Nursing Roles. (3 Units)

Introduces competencies and other foundational components of advanced nursing practices such as history, roles, options and choices that are associated with career development and professional practice. Aspects of advanced practice include the impact upon various roles of uses of technology, evidence-based decision making, organizational leadership, systems change, collaboration and outcomes evaluation. Offered Fall, Spring, Summer

MSN 513. Healthcare Policy/Economics. (3 Units)

Prerequisite: MSN 502 is recommended. Online course exploring Healthcare Policy/Economics and public policy making at the state, national and international levels as it relates to the current healthcare and economic environment. Evidence-based strategies and policy models will be introduced to apply the policy making process. Offered Fall, Spring, Summer

MSN 514. Health Promotion and Disease Prevention. (3 Units)

Prerequisite: MSN 502 is recommended. Examines traditional and alternative theoretical and conceptual bases of wellness from the perspective of nursing and health. Focuses on assessment, diagnosis, intervention and outcome evaluation of wellness and disease prevention needs and issues encountered in advanced nursing roles. Offered Fall, Spring, Summer

MSN 521. Advanced Health Assessment. (2 Units)

Prerequisite: MSN 502 is recommended. Co-requisite: MSN 522 is required. Examines theoretical knowledge to perform a comprehensive health history and advanced health assessment. Analysis and synthesis of subjective and objective data to identify health problems and develop management plans. Health promotion risk factor identification and recognition of common abnormalities explored. Offered All terms, Fall, Spring, Summer

MSN 522. Advanced Health Assessment Lab. (1 Units)

Prerequisite: MSN 502 is recommended. Co-requisite: MSN 521 is required. Application of advanced physical assessment skills and knowledge necessary to perform a comprehensive health assessment. Hands-on supervised skills workshop integrates systematic assessment principles, appropriate health assessment techniques, guidelines and considerations for patients across the lifespan. Offered All terms, Fall, Spring, Summer

MSN 523. Family Assessment: Theory and Practice. (3 Units)

Prerequisites: MSN core courses; MSN 526, 527 and 528 can be taken concurrently with instructor permission; Corequisite: MSN 541 for PC Role Option Students only. Focuses on the theoretical underpinnings specific to the biopsychosocial and developmental aspects of the family during the childbearing and child rearing years. Examines the conceptual basis of advanced practice nursing within the context of family assessment, interventions and strategies. Places emphasis on the family unit within a culturally diverse environment. Offered Fall

MSN 526. Pharmacology. (3 Units)

Prerequisites: MSN 502 is recommended or permission of Director. Examines theoretical basis for pharmacological treatment of common health problems. Discusses selected classification of drugs with emphasis on pharmacokinetic principles, pathophysiological basis for therapeutic use, adverse effects, drug interactions, contraindications for use, patient education and issue of compliance. Offered Fall, Spring, Summer

MSN 528. Advanced Pathophysiology. (3 Units)

Prerequisite: Upper-division undergraduate Pathophysiology course. Focuses on application of advanced knowledge of the complex physiological functions and pathophysiological processes related to the care of individuals with health care problems. Discusses alterations in function, and adaptive, integrative and regulatory mechanisms at the molecular, cellular, organ and system levels. Offered Fall, Spring, Summer

MSN 529. Nurse Educator: Curriculum and Teaching. (3 Units)

Prerequisite: MSN 502; Corequisite: MSN 559 is recommended. Prepares the student for the nursing role of educator in a variety of academic and community settings. Analyzes and synthesizes curriculum development and teaching/learning strategies. Develops curriculum and teaching strategies using current nursing and education theory and research designed to meet the needs of diverse learners. Offered Infrequent

MSN 530. Research Utilization in Advanced Nursing Practice. (3 Units)

Prerequisite: MSN 502 is recommended. Prepares the nurse to critique and apply research findings in nursing practice. Critical thinking is related to problem identification, assessment of data, and outcome evaluation. Research methodologies, including qualitative and quantitative approaches, are examined and related to nursing informatics. Offered Fall, Spring

MSN 531. Nursing Ethics. (3 Units)

Prerequisite: MSN 502 is recommended. Examines the theoretical and conceptual bases of ethics from a nursing perspective, including the moral development of nurses. Focuses on analysis, synthesis and resolution of ethical issues encountered in advanced practice nursing. Uses critical thinking to explore ethical relationships involved in delivering health care to diverse populations. Offered Fall, Spring, Summer

MSN 532. Nurse Administrator: Societal Institutions. (3 Units)

Prerequisite: MSN 502; Corequisite: MSN 560 is recommended. Examines the advanced role of the nurse administrator within the context of health care organizations, scientific enterprises, government and industry. Investigates current developments in the health care delivery system, including system management. Emphasizes the nurse administrator's leadership in providing health care to diverse populations by diverse providers within multi-level care settings. Offered Infrequent

MSN 533. Theoretical Aspects of Aging. (3 Units)

Prerequisites: MSN 502 is required. Corequisite: MSN 549 is required for for CNS Adult-Gerontology Role Option students only. Provides comprehensive information on the aging population. Covers normal and abnormal aging changes. The components of Geriatric Syndromes are identified. Learners explore clinical assessment tools, standards of care and client outcomes, including palliative and end-of-life care. Offered Spring

MSN 535. Clinical Management and Differential Diagnosis of Adult Acute Health Problems. (3 Units)

Prerequisites: MSN 550 and MSN 547 are required. Co-requisite: MSN 548 is required. Focuses on clinical decision making in advanced practice nursing. Students will learn the application of critical thinking and clinical judgment to differentiate diagnosis and management of common acute care problems in the acute and critically ill adult patient. Offered All terms, Spring

MSN 536. Advanced Neonatal Nursing I. (2 Units)

Prerequisites: MSN 521, MSN 522, MSN 526, and MSN 528 are required.
Co-requisite: MSN 548 is recommended. Advanced nursing management of well and ill neonates focusing on health promotion and maintenance. Evidence-based strategies for anticipatory planning, screening, support of development, and family-centered care will be explored. Covers symptom management and reviews common medications or the neonate.
Offered All terms, Spring

MSN 537. Advanced Neonatal Nursing II. (4 Units)

Prerequisites: MSN 521, MSN 522, MSN 526 and MSN 528 are required.
Co-Requisite: MSN 548 is recommended. Advanced nursing management of well and ill neonates focusing on health promotion and maintenance. Evidence-based strategies for anticipatory planning, screening, support of development, and family-centered care will be explored. Covers symptom management and reviews common medications for the neonate.
Offered All terms, Fall

MSN 538. Nurse Administrator: Resource Management. (3 Units)

Prerequisite: MSN 502; Corequisite: MSN 570 is recommended. Examines the advanced role of the nurse administrator within the context of resource management. Investigates current developments in health care delivery, including financial management, labor relations, and human resource management. Emphasizes leadership development within multi-level care settings.
Offered Fall, Spring

MSN 539. Nurse Educator: Testing and Evaluation. (3 Units)

Prerequisite: MSN 502; Corequisite: MSN 569 is recommended. Prepares the student for the nursing role of educator in a variety of academic and community settings. Analyzes and synthesizes testing and evaluation strategies. Examines current topics and issues related to student assessment and evaluation of learning outcomes using nursing and education theory and research designed to meet the needs of diverse learners.
Offered Fall, Spring

MSN 540. Clinical Management of Acute Pediatric Health Problems. (4 Units)

Prerequisite: MSN 550 Emphasis on advanced practice nurse clinical decision making for pediatric patients. Student will learn the application of critical thinking and clinical judgment to develop differential diagnoses and manage common problems in the acute and critically ill pediatric patient.
Offered Fall

MSN 547. Clinical Nurse Specialist Role Performance I. (3 Units)

Prerequisites: MSN 502, MSN 513, MSN 514, MSN 521, MSN 522, MSN 526, MSN 528, MSN 530 and MSN 531 are required. 144 hour practicum to apply theories for execution of CNS role in clinical settings with a specialty/population focus. Under supervision, the student is provided opportunities for role socialization, exploration of CNS responsibilities, and development of novice competencies. CR/NC grading only.
Offered Fall

MSN 548. Clinical Nurse Specialist Role Performance II. (4 Units)

Prerequisites: MSN 550 and MSN 547 are required. MSN 513, MSN 514, MSN 526 and MSN 531 are recommended. Corequisites: MSN 523 or MSN 535 is required. This 144 Hour practicum requires the application of evidence based practice and education principles in the clinical setting. Students will focus on health problems commonly encountered in the population of focus. CR/NC grading only.
Offered Spring

MSN 549. Clinical Nurse Specialist Role Performance III. (3 Units)

Prerequisites: MSN 547, MSN 548, and MSN 550 are required. This 144 hour practicum focuses on the CNS role in managing clinical outcomes. Students will provide consultation and wellness services, explore clinical concerns at the organizational level, and prepare for professional practice as a CNS.
Offered Fall

MSN 550. Theoretical Foundations of Clinical Nurse Specialist Practice. (3 Units)

Prerequisites: MSN 502, MSN 513, MSN 514, MSN 521, MSN 522, MSN 526, MSN 528, MSN 530, and MSN 531 are required. Co-requisite: MSN 547 is required. A conceptual basis of advanced nursing practice for the Clinical Nurse Specialist (CNS) role is established. Students will learn CNS practice models, family theories, leadership theories, decision-making models, organizational theories, change management, care coordination and management of transitions care.
Offered All terms, Fall

MSN 554. Applied Nursing Science VI. (2 Units)

Co-requisite: MSN 553 is required. Focuses on providing evidence-based, culturally competent nursing care for children and their families. Requires 96 hours of supervised practice in skills lab, and pediatric and community clinical settings.
Offered Infrequent

MSN 555. Quality Improvement in Health Care. (3 Units)

Prerequisite: MSN 502 is recommended. Explores the historical evolution of quality initiatives in health care and defines current concepts in quality assessment and improvement. Emphasizes organizational performance, outcomes assessment, management and effectiveness, and the role of the advanced practice nurse.
Offered Fall, Spring

MSN 556. Primary Care of the Family I. (4 Units)

Prerequisite: MSN 526, MSN 527 or permission of Director. Concurrent enrollment in MSN 558 is recommended. Examines theoretical basis for pharmacological treatment of common health problems. Emphasis will be placed on comprehensive assessment and management of common acute health problems seen in the care of clients across the life span.
Offered Fall, Spring, Summer

MSN 558. FNP: Role Perform I. (3 Units)

Corequisite: MSN 556 is recommended. Emphasizes comprehensive assessment and management of common acute health problems seen in the primary care of clients across the life span. Focuses on the primary care of the individual as a member of the family within a culturally diverse environment. Requires 144 hours of clinical practice under supervision by a faculty instructor and an individual preceptor. CR/NC grading.
Offered Fall

MSN 559. Nurse Educator: Role Performance I. (3 Units)

Prerequisite: MSN 502. Corequisite: MSN 529 is recommended. Provides the opportunity for implementing the nurse educator role in an education or health care setting. Applies curriculum development and didactic and clinical teaching/learning concepts and strategies, under supervision by the instructor and a preceptor. Requires 144 hours of practice in teaching. CR/NC grading.
Offered Infrequent

MSN 560. Nurse Administrator: Role Performance I. (3 Units)

Prerequisite: MSN 502; Corequisite: MSN 532 is recommended. Provides the opportunity to implement the nurse administrator role in a selected health care setting by focusing on forces shaping the role of the departmental nurse leader and institutional governance. Applies valid and reliable measures of evaluation to organizational and nurse administrator performance, under supervision by the instructor and a preceptor. Requires 144 hours of practice in administration. CR/NC grading. Offered Infrequent

MSN 561. Primary Care of the Family II: Pediatric Health. (2 Units)

Prerequisites: MSN 556 and MSN 558 are required. Co-requisites: MSN 568 or MSN 548 is required. Theoretical and conceptual basis for advanced practice nurses focusing on children, newborn through adolescence. Emphasis on assessment, diagnosis, and management of common age-related wellness and acute health conditions seen in pediatric settings. Culturally sensitive health promotion and maintenance of children. Offered All terms, Spring

MSN 562. Primary Care of the Family II: Women's/Gender Health. (2 Units)

Prerequisites: MSN 556 and MSN 558 are required. Co-requisite: MSN 568 is required. Theoretical and conceptual basis for advanced practice nursing diagnosis and management of common and acute gender-related health conditions. Male and female reproductive health, pregnancy, contraception, infertility, menopause and sexuality will be explored, including culturally sensitive health promotion and maintenance. Offered All terms, Spring

MSN 565. Pathopharmacology for Nurse Educators. (3 Units)

Integrates advanced pathophysiology with pharmacotherapeutics for nurse educators, enhancing knowledge and skills of pharmacodynamics and pharmacokinetics as they relate to pathophysiological processes in each body system. Offered Fall

MSN 568. Family Nurse Practitioner: Role Performance II. (3 Units)

Prerequisites: MSN 556 and MSN 558. Corequisite: MSN 566 is recommended. Emphasizes comprehensive assessment and management of common acute health problems seen in women and children. Focuses on the primary care of the individual as a member of the family within a culturally diverse environment. Includes reproduction, pregnancy, contraception, growth and development, as well as health promotion and health maintenance for women and children. Requires 144 hours of clinical practice under supervision by a faculty instructor and individual preceptor. CR/NC grading. Offered Spring

MSN 569. Nurse Educator: Role Performance II. (3 Units)

Prerequisite: MSN 502; Corequisite: MSN 539 is recommended. Provides the opportunity for implementing the nurse educator role in an education or health care setting. Applies assessment and evaluation concepts and strategies in didactic and clinical teaching/learning situations, under supervision by the instructor and a preceptor. Requires 144 hours of practice in teaching. CR/NC grading. Offered Spring

MSN 570. Nurse Administrator: Role Performance II. (3 Units)

Prerequisite: MSN 502; Corequisite: MSN 538 is recommended. Provides the opportunity to implement the nurse administrator role in a selected health care setting according to professional and regulatory requirements. Focuses on formulating a nursing service plan for integrating quality measures with cost control and case management practice, under supervision by the instructor and a preceptor. Requires 144 hours of practice in administration. CR/NC grading. Offered Infrequent

MSN 576. Primary Care of the Family III. (4 Units)

Prerequisite: MSN 566, MSN 567 or permission of Director. Corequisite: MSN 578 is recommended. Examines theoretical and conceptual basis for advanced practice as Family Nurse Practitioner. Emphasis is on comprehensive assessment and management of increasingly complex acute and chronic health problems across the life span for culturally diverse individuals and families. Offered Fall, Spring, Summer

MSN 578. Family Nurse Practitioner: Role Performance III. (3 Units)

Prerequisites: MSN 566 and MSN 568. Corequisite: MSN 576 is recommended. Emphasizes growth in independent practice in providing comprehensive assessment and management of common chronic health problems seen in the primary care of clients across the life span. Focuses on the primary care of the individual as a member of the family within a culturally diverse environment. Requires 144 hours of clinical practice under supervision by a faculty instructor and an individual preceptor. CR/NC grading. Offered Infrequent

MSN 583. Clinical Nurse Leader Role Performance II. (3 Units)

Prerequisite: MSN 580 and MSN 581 are required. Co-requisite: MSN 582 is required. Restricted to majors. Focuses on implementation of the CNL role in a selected healthcare microsystem. In this 150 hour clinical experience, the student will develop expertise in clinical leadership with a focus on aggregates. With guidance from a nurse preceptor, students will implement strategies to address identified problems requiring quality improvement, risk reduction and patient safety management. CR/NC grading. Offered All terms, Summer

MSN 588. Family Nurse Practitioner: Role Performance IV. (3 Units)

Prerequisites: MSN 576 and MSN 578. Provides an opportunity to integrate evidence based research into clinical evaluation and implementation of primary health care of clients across the life span. Emphasizes evaluation of the impact of community, cultural, socioeconomic, and psychosocial factors on the health care needs of individuals and families within a culturally diverse environment. Requires 144 hours of clinical practice under supervision by a faculty instructor and individual preceptor. CR/NC grading. Offered Spring

MSN 594. Independent Study. (1-3 Units)

A course of study designed cooperatively by student and instructor, and approved by the Director, to accomplish individualized learning objectives that are appropriate to the role of the professional nurse. (Students should contact their advisor prior to enrolling to determine the appropriateness of this course for degree completion.) Offered As needed

MSN 595. Special Topics/Colloquia. (1-3 Units)

This course offers student groups an opportunity to explore a topic of current interest to the nursing profession with colleagues, faculty and special guest speakers. Offered As needed

MSN 600. Project Continuation Course. (1 Units)

Students who have not completed their culminating experience by the end of the term may enroll in the following term to maintain continuous enrollment.

Offered Fall, Spring

Clinical Nurse Specialist, Post-Master's Certificate

The School of Nursing offers a Post-Master's Certificate in Adult-Gerontology Clinical Nurse Specialist (CNS), Neonatal CNS, or Pediatric CNS for nurses with a master's or doctorate degree in nursing. Included in the APRN course of study are advanced health assessment, advanced pathophysiology, pharmacology, health promotion, and management of complex care for children and families or for the adult population (from young adult to older adult, including the frail elderly) in various clinical and community settings. The Certificate Program consists of a total of 31 units.

Prior to application for the Certificate Programs, individuals are strongly encouraged to consult with the CNS Program Coordinator (advisor) regarding previous graduate coursework completed to determine the best semester to apply for entry. Cohorts for the Adult-Child CNS specialty and clinical phase begin annually each Fall semester. Cohorts for the Neonatal CNS and Pediatric CNS specialty and clinical phase begin Fall semester of even years (every other year).

Eligibility Requirements

1. Completion of a master's degree in nursing or doctor of nursing practice from a regionally accredited institution and Accreditation Commission for Education in Nursing (ACEN) or Commission on Collegiate Nursing Education (CCNE) accredited nursing program.
2. Overall grade point average of 3.0 (on a four-point scale) in units attempted.
3. Registered nurse licensure in the United States, unencumbered, unrestricted, with no disciplinary action pending or imposed.
4. Minimum of two years recent clinical professional nursing experience with the specialty population (neonatal, pediatric, or adult/geriatric) acute care experience.
5. Health clearance (immunity, etc.) is required prior to enrolling in a role performance course. A background check or drug screen may be required by the clinical location.
6. Residence in a state in which the School of Nursing at California State University, Dominguez Hills is permitted to deliver online education.

Requirements

The School of Nursing offers a Post-Master's Certificate in Adult-Gerontology Clinical Nurse Specialist (CNS), Neonatal CNS, or Pediatric CNS for nurses with a master's or doctorate degree in nursing. Included in the APRN course of study are advanced health assessment, advanced pathophysiology, pharmacology, health promotion, and management of complex care for children and families or for the adult population (from young adult to older adult, including the frail elderly) in various clinical and community settings. The Certificate Program consists of a total of 31 units.

Prior to application for the Certificate Programs, individuals are strongly encouraged to consult with the CNS Program Coordinator (advisor) regarding previous graduate coursework completed to determine the best

semester to apply for entry. Cohorts for the Adult-Child CNS specialty and clinical phase begin annually each Fall semester. Cohorts for the Neonatal CNS and Pediatric CNS specialty and clinical phase begin Fall semester of even years (every other year).

Eligibility Requirements

1. Completion of a master's degree in nursing or doctor of nursing practice from a regionally accredited institution and Accreditation Commission for Education in Nursing (ACEN) or Commission on Collegiate Nursing Education (CCNE) accredited nursing program.
2. Overall grade point average of 3.0 (on a four-point scale) in units attempted.
3. Registered nurse licensure in the United States, unencumbered, unrestricted, with no disciplinary action pending or imposed.
4. Minimum of two years recent clinical professional nursing experience with the specialty population (neonatal, pediatric, or adult/geriatric) acute care experience.
5. Health clearance (immunity, etc.) is required prior to enrolling in a role performance course.

Gap Analysis and Certificate Requirements

Upon admission a "gap analysis" will be done by the faculty to determine if any previous graduate level nursing coursework satisfies any of the required courses for the specific certificate. The gap analysis is documented and a list of all courses required for the certificate are clearly indicated. Additionally, the semester and year that the certificate student should enroll in each course is indicated to create a individualized plan of study.

Pediatric Clinical Nurse Specialist Post-Master's Certificate

| Code | Title | Hours |

Neonatal Clinical Nurse Specialist, Post-Master's Certificate

Specialist, Neonatal Clinical Nurse Specialist, or Pediatric Clinical Nurse Specialist for nurses with a master's degree in nursing or Doctorate of Nursing Practice degree. Included in the APRN course of study are advanced health assessment, advanced pathophysiology, advanced pharmacology, health promotion, and management of complex care for neonatal or pediatric patients and families or for the adult population, from young adult to older adult, including the frail elderly, in various clinical and community settings. The Certificate Program consists of a total of 31 units, 19 units are specific only to the CNS.

Prior to application for the Certificate Programs, individuals are strongly encouraged to consult with the Nurse Administrator Program Coordinator (advisor) regarding previous graduate coursework completed to determine the best semester to apply for entry.

Eligibility Requirements

1. Completion of a master's degree in nursing or doctor of nursing practice from a regionally accredited institution and ACEN or CCNE-accredited nursing program.
2. Overall grade point average of 3.0 (on a four-point scale) in units attempted.
3. Registered nurse licensure in the United States, unencumbered, unrestricted, with no disciplinary action pending or imposed.
4. Clinical experience preferences or requirements are posted on the School of Nursing website (<https://www.csudh.edu/son/>).
5. Health clearance (immunity, etc.) is required prior to enrolling in a role performance course.
6. A background check or drug screen may be required by the clinical location.

Gap Analysis and Certificate Requirements

Upon admission a "gap analysis" will be done by the faculty to determine if any previous graduate level nursing coursework satisfies any of the required courses for the specific certificate. The gap analysis is documented and a list of all courses required for the certificate are clearly indicated. Additionally, the semester and year that the certificate student should enroll in each course is indicated to create a individualized plan of study.

Requirements

| Code | Title | Hours |
|---------|---|-------|
| MSN 514 | Health Promotion and Disease Prevention | 3 |
| MSN 521 | Advanced Health Assessment | 2 |
| MSN 522 | Advanced Health Assessment Lab | 1 |

| | | |
|---------|---|---|
| MSN 526 | Pharmacology | 3 |
| MSN 528 | Advanced Pathophysiology | 3 |
| MSN 536 | Advanced Neonatal Nursing I | 2 |
| MSN 537 | Advanced Neonatal Nursing II | 4 |
| MSN 547 | Clinical Nurse Specialist Role Performance I | 3 |
| MSN 548 | Clinical Nurse Specialist Role Performance II | 4 |
| MSN 549 | Clinical Nurse Specialist Role Performance III | 3 |
| MSN 550 | Theoretical Foundations of Clinical Nurse Specialist Practice | 3 |

Total Hours 31

Nursing Administration, Post-Master's Certificate

The School of Nursing offers a Post-Master's Certificate in Nursing Administration for nurses with a master's in nursing who want to develop advanced knowledge and skills as a nurse manager or administrator in health care institutions. The study of various health care systems and all areas of management are included with emphasis on quality improvement and evidence-based administrative practices. The certificate program consists of 15 units.

Prior to application for the Certificate Programs, individuals are strongly encouraged to consult with the Nurse Administrator Program Coordinator (advisor) regarding previous graduate coursework completed to determine the best semester to apply for entry.

Eligibility Requirements

1. Completion of a master's degree in nursing or doctor of nursing practice from a regionally accredited institution and ACEN or CCNE-accredited nursing program.
2. Overall grade point average of 3.0 (on a four-point scale) in units attempted.
3. Registered nurse licensure in the United States, unencumbered, unrestricted, with no disciplinary action pending or imposed.
4. Clinical experience preferences or requirements are posted on the School of Nursing website (<https://www.csudh.edu/son/>).
5. Health clearance (immunity, etc.) is required prior to enrolling in a role performance course.

Gap Analysis and Certificate Requirements

Upon admission a "gap analysis" will be done by the faculty to determine if any previous graduate level nursing coursework satisfies any of the required courses for the specific certificate. The gap analysis is documented and a list of all courses required for the certificate are clearly indicated. Additionally, the semester and year that the certificate student should enroll in each course is indicated to create a individualized plan of study.

Nursing Education, Post-Master's Certificate

The School of Nursing offers a Post-Master's Certificate in Nursing Education for nurses with a master's degree in nursing or doctor of nursing practice who want to develop advanced knowledge and skills in curriculum development, student and program assessment, teaching and learning. Advanced health assessment, advanced pathopharmacology, curriculum development, teaching strategies, testing and evaluation, and practice teaching with a faculty preceptor are included in the program. The Certificate Program consists of a total of 21 units.

Prior to application for the Certificate Programs, individuals are strongly encouraged to consult with the Nurse Educator Program Coordinator (advisor) regarding previous graduate coursework completed to determine the best semester to apply for entry.

Eligibility Requirements

1. Completion of a master's degree in nursing or doctor of nursing practice from a regionally accredited institution and NLNAC or CCNE-accredited nursing program.
2. Overall grade point average of 3.0 (on a four-point scale) in units attempted.
3. Registered nurse licensure in the United States, unencumbered, unrestricted, with no disciplinary action pending or imposed.
4. Clinical experience preferences or requirements are posted on the School of Nursing website (<https://www.csudh.edu/son/>).
5. Health clearance (immunity, etc.) is required prior to enrolling in a role performance course. A background check or drug screen may be required by the clinical location.
6. Residence in a state in which the School of Nursing at California State University, Dominguez Hills is permitted to deliver online education.

The School of Nursing offers a Post-Master's Certificate in Nursing Education for nurses with a master's degree in nursing or doctor of nursing practice who want to develop advanced knowledge and skills in curriculum development, student and program assessment, teaching and learning. Advanced health assessment, advanced pathophysiology, curriculum development, teaching strategies, testing and evaluation, and practice teaching with a faculty preceptor are included in the program. The Certificate Program consists of a total of 21 units.

Prior to application for the Certificate Programs, individuals are strongly encouraged to consult with the Nurse Educator Coordinator (advisor) regarding previous graduate coursework completed to determine the best semester to apply for entry.

Nursing, Bachelor of Science

The RN-BSN program prepares registered nurses as generalists in professional nursing practice. Graduates are equipped to function as leaders, managers, and resource persons in a variety of healthcare settings. Critical thinking and decision-making are informed through both general and discipline-specific education.

Requirements

Admissions Requirements

Minimum of 60-semester units of transferable college credit with a cumulative grade point average of at least 2.0 (C) or better and grades of C or better in all transferable course work and have satisfied any high school subject deficiency in English and mathematics by equivalent course work (the maximum transferable credit accepted from a two-year college is 70 semester units). A 2.5 GPA is required for second baccalaureate applicants.

Nursing Program Prerequisite Course CSU GE-Breadth Area

- Oral communication A1
- Written communication A2
- Critical thinking A3
- Chemistry: general, inorganic, organic or integrated B1, (B3) (with associated lab if required at the institution where the course was taken)
- Human anatomy (with required lab) B2, B3

- Human physiology (with required lab) B2, B3
- Microbiology (with required lab) B2, B3
- Statistics B4
- **Registered Nurse Licensure:** *Students may apply to the University in the third or fourth semester of their Associate Degree Program. Licensure is required before taking the Community-Based Role Performance course. California RN licensure must be unencumbered, and unrestricted, with no probation or disciplinary action pending or imposed.*

Program Structure

The BSN program comprises classes that include content essential for professional nursing practice. These courses must be taken through the normal schedule.

Academic Regulations

A cumulative grade point average of 2.0 or better is required in all courses taken to satisfy the degree requirements. A student will be placed on probation if, in any term, he or she has failed to earn a grade point average of 2.0 or higher for the work taken that term. During the subsequent probationary term, the student must achieve a grade point average of 2.0 or better. Failure to do so may result in dismissal from the program.

All integrated nursing and support courses must be completed with a grade of "C" or better. A course may be repeated once according to University policy. Any student receiving a grade of "D" or lower must meet with an advisor before proceeding to enroll in additional courses.

Courses must be successfully completed according to the sequence in the student's approved program of study.

General Education

For Nursing students only the scheduled courses are approved to fulfill upper-division General Education requirements as specified:

| Course | Title | GE Category | Semester Units |
|---------|------------------------------------|-------------|----------------|
| BSN 306 | Cultural Diversity and Health Care | D3 | 3 |
| BSN 346 | Human Pathophysiology | B5 | 3 |

BSN Degree Requirements

A total of a minimum of 120 semester units are required for the degree. In addition to the major, students must complete general education requirements. Students transferring from a community college can transfer a maximum of 70 units and students from a four-year institution may transfer a maximum of 96 units. Electives are not required unless necessary to complete degree requirements.

| Code | Title | Hours |
|---------------------------------|---|-------|
| Support Courses | | |
| BSN 306 | Cult Diversity Healthcare ¹ | 3 |
| BSN 346 | Human Pathophysiology ² | 3 |
| Required Nursing Courses | | |
| BSN 302 | Concepts of Professional Nursing Practice | 3 |
| BSN 381 | Hlth Assess Skills Seminar | 1 |
| BSN 382 | Health Assessment | 2 |

| | | |
|-----------------|--|-----|
| BSN 422 | Community-Based Nursing | 3 |
| BSN 423 | Community-Based Nursing Role Performance | 2 |
| BSN 452 | Management and Leadership in Health Care Systems | 3 |
| BSN 460 | Nursing Research Utilization | 3 |
| Elective | | |
| BSN 494 | Independent Study | 1-3 |

NCLEX Credit

Students may be granted up to 24 units of NCLEX credit once the RN license is verified. Student who have fewer than 120 units after all other transfer BSN, and NCLEX credit has been granted will need to complete additional upper division courses through CSUDH.

Total Hours **48-50**

¹ Meets GE Area D3.

² Meets GE Area B5

Note: Students may earn additional 3-6 units from a Humanities course and/or an English Composition course.

Program Learning Outcomes

Upon completion of the B.S. degree program in Nursing, graduates will be able to:

1. Design competent, patient-centered professional nursing care for individuals, families, and populations across the health continuum in a variety of community-based settings and institutions, emphasizing patient safety and quality.
2. Integrate knowledge from the physical and behavioral sciences, and informatics into professional nursing practice.
3. Demonstrate cultural competence in providing care and working with others.
4. Implement health promotion and disease prevention plans for individuals, families, and populations.
5. Use critical thinking, evidence-based practice, and research findings in professional nursing practice.
6. Form interdisciplinary collaborative relationships to improve professional nursing practice and the quality of healthcare for all.
7. Demonstrate ethical and professional nursing roles, values, social justice, and human dignity.
8. Participate in political regulatory processes to influence healthcare systems and quality improvement policies.
9. Exhibit effective communication skills for professional nursing practice.
10. Demonstrate commitment to a lifelong learning plan for professional development.

Nursing, Master of Science

The MSN Program prepares nurses for advanced roles of Nurse Educator, Nurse Administrator, Clinical Nurse Specialist, and Family Nurse Practitioner. Courses involve advanced knowledge and the critique and application of theory and research as a scientific base for nursing.

Requirements

Role Options

The MSN curriculum allows RN students to choose one of a variety of nursing role options: Nurse Administrator, Nurse Educator, Family Nurse Practitioner, Adult-Gerontology Clinical Nurse Specialist, Neonatal Clinical Nurse Specialist, or Pediatric Clinical Nurse Specialist. Each student must select one of the role options upon application to the university.

MSN Program Admission Requirements for RNs

1. Completion of a baccalaureate degree program with an ACEN or CCNE accredited upper division major in nursing (BSN) from a regionally accredited institution or the equivalent.
2. Overall grade point average of 3.0 (on a four-point scale) or higher in the last 60 semester (90 quarter) units of upper division course work attempted.
3. Registered nurse licensure in the United States, unencumbered, unrestricted, with no disciplinary action pending or imposed.
4. Completion of a statistics course including probability and inferential; an introductory research course or equivalent; and an upper division (BSN level) health assessment course, including a "hands on" (not computer simulation) skills lab.
5. The various role options may have clinical experience preferences or requirements. Refer to information posted on the School of Nursing website (<https://www.csudh.edu/son/>) for that role option.
6. Residence in a state in which the School of Nursing at California State University, Dominguez Hills is permitted to deliver online education.

Program Structure

The MSN program consists of 15 units of core courses, plus role/specialty courses. The total number of units varies according to the role option:

- Nurse Administrator (30 units)
- Nurse Educator (36 units)¹
- Adult-Gerontology Clinical Nurse Specialist (43 units)
- Neonatal Clinical Nurse Specialist (43 units)
- Pediatric Clinical Nurse Specialist (43 units)
- Family Nurse Practitioner (48 units)

¹ Nurse educators develop expertise in a nursing clinical practice area by selecting a three-unit elective in an advanced clinical focus related to family or gerontology nursing. The course should be taken prior to entry

into role-emphasis courses. A direct patient care clinical experience is included in the final role performance (clinical) course.

Courses should be completed in the sequence suggested in the MSN plans of study on the School of Nursing website (<https://www.csudh.edu/son/>). Some courses are offered only once per year or every other year. Students wishing to accelerate their study or pursue full time study should seek advice and approval from their Advisor and the Assistant Director of Graduate Programs.

The practice-based role performance (clinical) courses provide students an opportunity to apply knowledge, practice skills, acquire competencies, and learn the full scope of the role. The School maintains affiliations with a wide variety of healthcare agencies. The clinical sites vary according to the program requirements and students' personal goals. Program faculty take responsibility for approvals of the clinical sites and specific preceptor(s). The selection of the preceptor is a collaborative effort by the School of Nursing, the health care agency, and the student. Most preceptorships take place during business hours Monday through Friday. We recommend that students begin the process of securing a preceptorship two semesters in advance. Students are required to purchase a subscription to an online system that houses clinical placement information and clinical documents needed for the clinical agencies. Details of the mandatory clinical compliance documents (immunizations, physical exam, health insurance, CPR card, etc.) and the deadlines are outlined in the current Graduate Clinical Handbook posted on the School of Nursing website.

All students conclude their 30-48 units of master's preparation with a culminating activity (See MSN Degree Requirements).

Academic Regulations

Students that do not attend mandatory program orientations or class/clinical meetings, whether on-campus or virtual meetings, will be disenrolled.

To be eligible for automatic progression to the next semester a graduate student must:

- Earn a minimum of a B or Credit grade in each graduate course
- Maintain a 3.0 GPA or better on a 4.0 scale in all MSN courses

A student who earns a grade of **B- or less** or No Credit in a course has not successfully completed that course and must contact the Role Option Coordinator to discuss program planning and progression status. It is expected that the failed course will be repeated immediately (the next semester it is offered). For the few courses that are not offered in both the fall and spring, the student may be allowed to progress for one additional semester until he/she can enroll in the course needing to be repeated.

The role/specialty didactic and role performance (clinical/practicum) courses are sequenced; therefore, if a role/specialty or role performance course is not successfully completed, continuation in the role/specialty course sequence is not permitted until the course is successfully repeated. Because the role option is structured as a cohort group, membership in the subsequent cohort and enrollment to repeat the failed class will be on a space available basis.

A course may be repeated only once. Failure to successfully complete a course on the second attempt will result in an automatic dismissal from the nursing graduate program. A maximum of two courses may be repeated in the program; a third failure will result in automatic dismissal.

A student may not graduate from the MSN degree program with a cumulative GPA of less than 3.0.

Transfer Request

A student may fail one MSN core course or prerequisite course and seek transfer to another MSN role option only once and after meeting with the new faculty advisor. Transfer requests are not permitted after two failed courses. Approval of the transfer is dependent upon posted required criteria such as acceptance by the new faculty advisor, professional experience, GPA of 3.0 on a 4.0 scale, and in good standing. The student may be required to take additional prerequisites and/or elective coursework for the new role option.

MSN Degree Requirements (30-48 units)

The program requires 30-48 units of approved graduate study that includes six role options. The curriculum consists of core courses, role/specialty courses, role performance (clinical/practicum) courses, electives and the culminating activity.

Graduate Course Prerequisites

Some MSN courses require the successful completion of prerequisites not offered as part of the graduate program. However, the prerequisite courses are available as undergraduate nursing courses. See the course descriptions.

Core Courses

| Code | Title | Hours |
|--------------------|---|-----------|
| MSN 502 | Advanced Nursing Roles | 3 |
| MSN 513 | Healthcare Policy/Economics | 3 |
| MSN 514 | Health Promotion and Disease Prevention | 3 |
| MSN 530 | Research Utilization in Advanced Nursing Practice | 3 |
| MSN 531 | Nursing Ethics | 3 |
| Total Hours | | 15 |

Culminating Activity

The culminating activity consists of an oral presentation supported by PowerPoint slides documenting the student's achievement of the MSN program learning outcomes. The presentation is delivered via conferencing technology to a panel of faculty. MSN students who elect to do the culminating activity in the semester following completion of MSN coursework must register in MSN 600 Project Continuation Course to meet the continuous enrollment requirement.

Role Option Courses (15-33 units)

Nurse Administrator Option (15 units)

| Code | Title | Hours |
|--------------------|--|-----------|
| MSN 532 | Nurse Administrator: Societal Institutions | 3 |
| MSN 538 | Nurse Administrator: Resource Management | 3 |
| MSN 555 | Quality Improvement in Health Care | 3 |
| MSN 560 | Nurse Administrator: Role Performance I | 3 |
| MSN 570 | Nurse Administrator: Role Performance II | 3 |
| Total Hours | | 15 |

| Total Hours | | 28 |

Family Nurse Practitioner Option (33 units)

| Code | Title | Hours |
|--------------------|--|-----------|
| MSN 521 | Advanced Health Assessment | 2 |
| MSN 522 | Advanced Health Assessment Lab | 1 |
| MSN 526 | Pharmacology | 3 |
| MSN 528 | Advanced Pathophysiology | 3 |
| MSN 556 | Primary Care of the Family I | 4 |
| MSN 558 | FNP: Role Perform I | 3 |
| MSN 561 | Primary Care of the Family II: Pediatric Health | 2 |
| MSN 562 | Primary Care of the Family II: Women's/Gender Health | 2 |
| MSN 568 | Family Nurse Practitioner: Role Performance II | 3 |
| MSN 576 | Primary Care of the Family III | 4 |
| MSN 578 | Family Nurse Practitioner: Role Performance III | 3 |
| MSN 588 | Family Nurse Practitioner: Role Performance IV | 3 |
| Total Hours | | 33 |

Program Learning Outcomes

Upon completion of the M.S. degree program in Nursing, graduates will be able to:

1. Integrate advanced nursing knowledge and theories/models with a focus on improving direct/indirect person-centered and population health outcomes.
2. Synthesize, translate, apply, and disseminate scientific evidence to improve health and health care delivery.
3. Appraise and utilize healthcare technology and information systems to enhance nursing decision making and quality of care, including risk reduction and patient safety.
4. Use leadership and systems thinking skills to collaborate with interprofessional team members and stakeholders to coordinate safe, quality, and equitable care to diverse individuals and populations.
5. Demonstrate role specific professional identity, ethical practice, and personal/professional development.

Clinical Nurse Specialist – Adult/Gerontology

1. Demonstrate advanced clinical practice for the adult-gerontology population in the three spheres of the clinical nurse specialist: client/patient, nursing, and organization/system.

Clinical Nurse Specialist – Neonatal

1. Demonstrate advanced clinical practice for the neonatal population in the three spheres of the clinical nurse specialist: client/patient, nursing, and organization/ system.

Clinical Nurse Specialist – Pediatric

1. Demonstrate advanced clinical practice for the pediatric population in the three spheres of the clinical nurse specialist: client/patient, nursing, and organization/ system.

Family Nurse Practitioner

1. Utilize advanced practice nursing and primary care knowledge and skills, to assess, diagnose, and provide safe and effective care

to diverse patients of all ages and their families in primary care settings.

2. Demonstrate readiness to take the national certification examinations for Family Nurse Practitioners.

Nurse Administrator

1. Apply concepts and theories of organizational management and nursing administration to the design of complex healthcare delivery systems.
2. Integrate concepts of health policy, regulation, and financing to the organization of healthcare delivery, with a focus on responsible management of resources.

Nurse Educator

1. Apply teaching and learning strategies based on educational theory, evidence-based practices, and knowledge of nursing education trends and professional standards in the selected role performance setting.
2. Demonstrate entry-level nurse educator competencies in the selected role performance setting.

Occupational Therapy

College of Health, Human Services, and Nursing

The Profession of Occupational Therapy

Occupational Therapy is the therapeutic use of everyday life occupations with persons, groups, or populations (i.e., the client) for the purpose of enhancing or enabling participation. Occupational therapy practitioners use their knowledge of the transactional relationship among the client, the client's engagement in valuable occupations, and the context to design occupation-based intervention plans. Occupational therapy services are provided for habilitation, rehabilitation, and promotion of health and wellness for clients with disability- and non-disability-related needs. These services include acquisition and preservation of occupational identity for clients who have or are at risk for developing an illness, injury, disease, disorder, condition, impairment, disability, activity limitation, or participation restriction (AOTA, 2011).

Occupational Therapy Department

The Occupational Therapy (OT) Program at CSUDH started off with a degree in Bachelor of Science (BSOT), which was awarded accreditation status by the Accreditation Council for Occupational Therapy Accreditation (ACOTE) in 1998. The BSOT transitioned to an entirely new entry-level Master of Science in Occupational Therapy (MSOT) in 2004 with accreditation awarded by ACOTE in 2006. Since then, the MSOT Program has grown from the first graduating class of 23 in 2007 to more recent graduating cohorts of approximately 66-69 per year. The continued growth of the OT Program displays how the department is valued by the University and supported by our community and clinical affiliates. In 2019, the passing of AB 829 into law allowed our department to further expand and make accessible advanced education in occupational therapy at the doctoral level.

We are very proud of our curricula for both entry-level MSOT and Occupational Therapy Doctorate (OTD) programs. We are confident that they will provide a great foundation for occupational therapy professional competence and success. Through team effort, the OT department faculty, students, and staff strive for the highest level of achievements. Together, we are quite enthusiastic in being part of our students' journey towards becoming occupational therapy practitioners and leaders aligned

with the following department mission, core values, and commitment to diversity, equity, and inclusion.

Mission: We educate and prepare students on best practice, scholarship, research, advocacy and innovation to address the complex human needs of health, wellness, restoration and adaptation for optimal life engagement throughout the lifespan. We prioritize building collaborative communities, diversifying the profession and facilitating a culture of service to all populations.

Core Values:

Advocacy – We emphasize educating students in advocating on behalf of all whom we serve to receive the highest quality service relative to the needs of individuals, populations and policies.

Altruism – We invest in the welfare of others to improve the lived experience of those we serve.

Collaboration – We seek partnerships across the university, within the occupational therapy profession, in our local communities, and globally to expand opportunities for our students, staff and faculty.

Compassion – We respond to the actions and context around us with an understanding that we can support others and learn from a moment in time for the long-term well-being of all.

Confidence & Competence – We value balanced self-reflection to leverage our strengths in service to others and in developing our existing practice and potential.

Courage – We value informed risk-taking for the evolution of our practice in service to society.

Ethics – We are accountable to uphold the ethical principles of the profession.

Inclusion – We welcome all individuals and perspectives to inform our understanding of human occupation.

Justice – We believe in fair and equitable opportunities to live healthy and satisfying lives. We provide fair and just opportunities for all students.

Leadership – We develop leaders who will advocate on behalf of individuals and populations.

Mutual Respect – We choose to act in a manner that supports the best interests and well-being of all in our department, our university and the communities we serve.

Diversity, Equity, and Inclusion:

The University is committed to equity, diversity, and social justice. The Department of Occupational Therapy seeks to promote health equity and resist systemic and medical racism by preparing students from diverse backgrounds and perspectives to provide equitable services at all levels: individual, organizational, community, and societal. The curricula aspire to promote population health and anti-racist education and practices. This includes topics, materials, activities, and clinical case methods that embrace diversity in all forms, such as: race, ethnicity, culture, age, gender, sexuality, education, occupation, socioeconomic status, personality, physical appearance, body function, diagnosis, intellect or mental health status.

Graduate Programs

Master

- Occupational Therapy, Master of Science (p. 738)

Doctorate Programs

Doctorate

- Occupational Therapy, Doctorate (p. 741)

Faculty

Terry Peralta-Catipon, PhD, OTR/L - Department Chair
 Sheryl Ryan, PhD, OTR/L - OTD Program Coordinator
 Abbie Bryant, OTD, OTR/L - OTD Academic Fieldwork Coordinator
 Eric Hwang, PhD, OTR/L - OTD Capstone Coordinator
 Heather Kitching, OTD, OTR/L, FAOTA - MSOT Program Coordinator
 Amber Borchert, MS, OTR/L - MSOT Academic Fieldwork Coordinator

Tracy Becerra-Culqui, PhD, MPH, OT/L; Yan-hua Huang, PhD, OTR/L; Mary Medina, OTD, OTR/L; Daniel Swiatek, OTD, OTR/L

Department Staff

Laura Deary, BS, COTA/L - Occupational Therapy Analyst
 Desirae Terrell, MS - Administrative Coordinator

Program Office WH A-320, (310) 243-2726

Faculty Offices and Activity Centers: WH A-320, WH D445, WH 142, EAC 400, EAC 500

Courses

OTR 205. OT Act Across the Life Span. (0 Units)

Offered Infrequent

OTR 206. Human Growth and Development. (0 Units)

Offered Infrequent

OTR 295. Spec Top in Occup. Therapy. (0 Units)

Offered Infrequent

OTR 301A. Individual & Group Skills. (0 Units)

Offered Infrequent

OTR 314. Conditions of Human Dysfunc.. (0 Units)

Offered Infrequent

OTR 317L. Neuroanatomy & Physiology Lab. (0 Units)

Offered Infrequent

OTR 319A. Evaluation & Interpretation. (0 Units)

Offered Infrequent

OTR 320A. Theory & Application I. (0 Units)

Offered Infrequent

OTR 410. Introduction to the Scope of Practice and Conceptual Foundations of Occupational Therapy. (2 Units)

Overview of the complex scope, philosophical foundation, history, practice areas, professional and ethical roles and responsibilities, models of practice, service deliver, professional development, and career growth in occupational therapy. Also explores client populations across the lifespan in various practice settings.

Offered Spring, Summer

OTR 414. Human Dysfunction II. (0 Units)

Offered Infrequent

OTR 422A. Theory & Application II. (0 Units)

Offered Infrequent

OTR 424A. Theory & Application III. (0 Units)

Offered Infrequent

OTR 430S. Practicum & Seminar I. (0 Units)

Offered Infrequent

OTR 432S. Practicum & Seminar II. (0 Units)

Offered Infrequent

OTR 480S. Field Work II Experience I. (0 Units)

Offered Fall, Spring, Summer

OTR 482S. Field Work II Experience II. (0 Units)

Offered Fall, Spring, Summer

OTR 495. Special Topics in Occupational Therapy. (1-3 Units)

Prerequisite: Consent of instructor and additional course prerequisites depending on topic. Special interest topics related to Occupational Therapy. Content will vary as announced. Repeatable course. Offered All terms, As needed

OTR 500. Person-Environment-Occupation. (2 Units)

Co-requisites: OTR 502, OTR 504, OTR 506, OTR 508, OTR 510, and OTR 512. Emphasizes the importance of occupational engagement to health and the relationship that exists between individuals, occupations and environments. Students will be challenged to explore the person-environment-occupation model centered on persons and the occupations they fulfill within their everyday environment. Offered Spring

OTR 502. History of Occupation. (2 Units)

Co-requisites: OTR 500, OTR 504, OTR 506, OTR 508, OTR 510, and OTR 512. A historical survey of the development of the profession and the study of the occupational nature of human beings. Review of how leaders of the profession have articulated occupation and the therapeutic applications across time. Offered Spring

OTR 504. Activities Across the Lifespan. (3 Units)

Co-requisites: OTR 500, OTR 502, OTR 506, OTR 508, OTR 510, and OTR 512. Introduction to how activities used as meaningful occupations can be used as therapeutic interventions. Individual and group experience with media and how to identify, analyze and adapt activities for their potential as treatment modalities is emphasized. Offered Spring

OTR 506. Interactive Reasoning. (3 Units)

Co-requisites: OTR 500, OTR 502, OTR 504, OTR 508, OTR 510, and OTR 512. Introduction to the historical, theoretical underpinnings and application of group work to populations spanning the lifespan. Offered Spring

OTR 508. Professional Development Seminar - Portfolio I: Introduction to E-Portfolio. (1 Units)

Co-requisites: OTR 500, OTR 502, OTR 504, OTR 506, OTR 510, and OTR 512 are required. Introduces process of professional portfolio development; orients students to the steps toward portfolio completion; introduces critical thinking and reflective learning methods; provides students with experiences in self-directed learning; reviews the development of a research proposal in planning research. Offered Spring

OTR 510. Introduction to Frameworks for Occupational Therapy Practice. (2 Units)

Co-requisites: OTR 500, OTR 502, OTR 504, OTR 506, OTR 508, OTR 512
Introduction to fundamental theoretical concepts of occupational therapy practice; philosophy; terminology; professional roles delineation; ethics; scope and models of practice.
Offered Spring

OTR 512. Human Anatomy. (3 Units)

Co-requisites: OTR 500, OTR 502, OTR 504, OTR 506, OTR 508, OTR 510 or Admission to OTD program. Advanced study of human body by means of review of Web based materials specific to dissection and identification of select specimens and structures of the body.
Offered Spring

OTR 515. Occupation Across the Lifespan I: Adolescence. (3 Units)

Prerequisites: OTR 500, OTR 502, OTR 504, OTR 506, OTR 508, OTR 510, OTR 512. Co-requisites: OTR 517, OTR 519, OTR 521, OTR 523, OTR 525, OTR 527, OTR 529, and OTR 530. Explores development of activity patterns associated with adolescent occupational choice, roles, routines, habit formation and attributed meaning. Focus is on adolescent development and life transition.
Offered Summer

OTR 517. Assessments in Occupational Therapy Practice: Adolescence. (1 Units)

Prerequisites: OTR 500, OTR 502, OTR 504, OTR 506, OTR 508, OTR 510, and OTR 512 or OTD student group. Co-requisites: OTR 515, OTR 519, OTR 521, OTR 523, OTR 525, OTR 527, OTR 529, and OTR 530. Focuses on OT clinical evaluation with the adolescent population. Students will develop clinical reasoning and skill to select and administer standardized and non-standardized interview, observational, self-report and assessment tools in the processes of referral, screening, evaluation and documentation.
Offered Summer

OTR 519. Interventions in Occupational Therapy Practice - Adolescence. (2 Units)

Prerequisites: OTR 500, OTR 502, OTR 504, OTR 506, OTR 508, OTR 510, OTR 512 or OTD student group. Focus on OT clinical interventions with the adolescent population. Students will develop clinical reasoning and skill in treatment planning, implementation, reviewing progress, discharge planning and documentation.
Offered Summer

OTR 521. Conditions Affecting Health I - Adolescents. (2 Units)

Prerequisites: OTR 500, OTR 502, OTR 504, OTR 506, OTR 508, OTR 510, OTR 512. Co-requisites: OTR 515, OTR 517, OTR 519, OTR 523, OTR 525, OTR 527, OTR 529, OTR 530. Theoretical approaches and models of practice commonly used with this population will be discussed in association with conditions that affect adolescents' ability to engage in meaningful occupations common to this development level.
Offered Summer

OTR 523. Case Seminar I - Adolescent. (1 Units)

Prerequisites: OTR 500, OTR 502, OTR 504, OTR 506, OTR 508, OTR 510, OTR 512. Co-requisites: OTR 515, OTR 517, OTR 519, OTR 521, OTR 525, OTR 527, OTR 529, OTR 530. Seminar format to provide opportunities for students to hear first-hand occupational profiles and personal narratives of adolescents and their families as they are engaged in discussions of issues relative to problems in domains of occupational engagement.
Offered Summer

OTR 525. OT Research I - Qualitative Research Methods for Health Professionals. (2 Units)

Prerequisites: OTR 500, OTR 502, OTR 504, OTR 506, OTR 508, OTR 510, and OTR 512 are required. Co-requisites: OTR 515, OTR 517, OTR 519, OTR 521, OTR 523, OTR 527, OTR 529, and OTR 530 are required. Explores the role of qualitative research in developing a deeper understanding of client populations and the development of theory in occupational therapy. Research design, data collection strategies, and methods of analysis will be discussed.
Offered Summer

OTR 527. Foundations of Kinesiology for Occupational Therapy. (4 Units)

Prerequisites: OTR 500, OTR 502, OTR 504, OTR 506, OTR 508, OTR 510, OTR 512 or OTD student group. Co-requisites: OTR 515, OTR 517, OTR 519, OTR 521, OTR 523, OTR 525, OTR 529, OTR 530. The course consists of lectures, activity analyses, and case studies designed to provide students with diverse opportunities to integrate key concepts of kinesiology into an understanding of how movement and loss of movements may impact performance of complex, everyday occupations.
Offered Fall, Summer

OTR 529. Fieldwork I Adolescents. (1 Units)

Prerequisites: OTR 500, OTR 502, OTR 504, OTR 506, OTR 508, OTR 510, OTR 512. Co-requisites: OTR 515, OTR 517, OTR 519, OTR 521, OTR 523, OTR 525, OTR 527, OTR 530. Fieldwork offers on-site clinical experiences with populations commonly served in OT practice settings for adolescent. Clinical experiences support co-requisite coursework and will rely on first semester course materials.
Offered Summer

OTR 530. Professional Development Seminar - Portfolio II: Ethics. (1 Units)

Prerequisites: OTR 500, OTR 502, OTR 504, OTR 506, OTR 508, OTR 510, and OTR 512 are required. Co-requisites: OTR 515, OTR 517, OTR 519, OTR 521, OTR 523, OTR 525, OTR 527, and OTR 529 are required. Introduction to ethics theory and principles as applied to common occupational therapy clinical situations and opportunities to analyze and solve ethical dilemmas. Overview of legal principles that may impact ethical decision-making.
Offered Summer

OTR 535. Conditions Affecting Health I - Adolescents. (3 Units)

Prerequisites: OTR 515, OTR 517, OTR 519, OTR 521, OTR 523, OTR 525, OTR 527, OTR 529, OTR 530. Co-requisites: OTR 537, OTR 539, OTR 541, OTR 543, OTR 547, OTR 550, OTR 552. Provides the theoretical foundations and frames of reference to understand pediatric populations and their family's occupations. Explores the developmental impact of contexts, family, and child factors that promote or limit engagement in occupations and co-occupations from infancy through school age.
Offered Fall

OTR 537. Assessments in Occupational Therapy Practice: Pediatrics. (2 Units)

Prerequisites: OTR 515, OTR 517, OTR 519, OTR 521, OTR 523, OTR 525, OTR 527, OTR 529, OTR 530 or OTD Student Group. Co-requisites: OTR 535, OTR 539, OTR 541, OTR 543, OTR 547, OTR 550, OTR 552 or OTD Student Group. Focuses on OT clinical evaluation with the pediatric population. Students will develop clinical reasoning and skill to select and administer standardized and non-standardized interview, observational, self-report and assessment tools in the processes of referral, screening, evaluation and documentation.
Offered Fall

OTR 539. Interventions in Occupational Therapy Practice - Pediatrics. (2 Units)

Prerequisites: OTR 515, OTR 517, OTR 519, OTR 521, OTR 523, OTR 525, OTR 527, OTR 529, OTR 530 or OTD Student Group. Focuses on OT clinical interventions with the pediatric population. Students will develop clinical reasoning and skill in treatment planning, implementation, reviewing progress, discharge planning, and documentation.
Offered Fall

OTR 541. Conditions Affecting Health II - Pediatrics. (2 Units)

Prerequisites: OTR 515, OTR 517, OTR 519, OTR 521, OTR 523, OTR 525, OTR 527, OTR 529, 530. Co-requisites: OTR 535, OTR 537, OTR 539, OTR 543, OTR 547, OTR 550, OTR 552. The application of knowledge of at-risk and diagnostic conditions to the occupational performance of children and their families. The role of genetics, body structures, functions, and the environment in the presence of developmental issues from conception through adolescence will be addressed.
Offered Fall

OTR 543. Case Seminar II Pediatrics. (1 Units)

Prerequisites: OTR 515, OTR 517, OTR 519, OTR 521, OTR 523, OTR 525, OTR 527, OTR 529, OTR 530. Co-requisites: OTR 535, OTR 537, OTR 539, OTR 541, OTR 547, OTR 550, OTR 552. Seminar provides opportunities for students to hear first-hand from families and children with special needs and discuss issues relative to diagnosis, occupational therapy assessment and interventions, service delivery, as well as the contexts in which children and their families participate.
Offered Fall

OTR 545. OT Research II - Quantitative Research Methods for Health Professions. (3 Units)

Prerequisites: OTR 535, OTR 537, OTR 539, OTR 541, OTR 543, OTR 552, OTR 547, and OTR 550 are required. Co-requisites: OTR 553, OTR 555, OTR 557, OTR 559, OTR 561, OTR 563, and OTR 571 are required. A review of clinical research methodology and designs with emphasis on interpreting and utilizing research results and the impact of research on evidence-based practice in occupational therapy. Students will develop feasible research proposals related to occupational therapy practice.
Offered Spring

OTR 547. Neurological Foundations of Oc. (5 Units)

Prerequisites: OTR 515, OTR 517, OTR 519, OTR 521, OTR 523, OTR 525, OTR 527, OTR 529, and OTR 530 or OTD student group. Co-requisites: OTR 535, OTR 537, OTR 539, OTR 541, OTR 543, OTR 550, and OTR 552. Foundational knowledge of how the human nervous system serves as the foundation for occupational choice and occupational engagement. Designed to provide opportunities to learn the structures and functional organization of the nervous system related to the performance of everyday occupations.
Offered Fall, Spring

OTR 550. Level I Fieldwork - Pediatrics. (1 Units)

Prerequisites: OTR 515, OTR 517, OTR 519, OTR 521, OTR 523, OTR 525, OTR 527, OTR 529, and OTR 530. Co-requisites: OTR 535, OTR 537, OTR 539, OTR 541, OTR 543, OTR 547, and OTR 552. Fieldwork offers on-site clinical experiences with populations commonly served in OT practice settings with infants and toddlers. Clinical experiences support co-requisite coursework and will rely on first semester course materials.
Offered Fall

OTR 552. Professional Development Seminar - Portfolio III: Qualitative Research Project. (1 Units)

Prerequisites: OTR 515, OTR 517, OTR 519, OTR 521, OTR 523, OTR 525, OTR 527, OTR 529, and 530 are required. Co-requisites: OTR 535, OTR 537, OTR 539, OTR 541, OTR 543, OTR 547, and OTR 550 are required. Independent and self-reflective learning fundamental to competent practice. Students mentored in completion of portfolio process including the development and approval of the learning contract, the role of a proposal in guiding activities, and selection of activities for the portfolio.
Offered Fall

OTR 553. Professional Development Seminar - Portfolio IV: Evidence-Based Practice in Occupational Therapy. (1 Units)

Prerequisites: OTR 535, OTR 537, OTR 539, OTR 541, OTR 543, OTR 547, OTR 550, and OTR 552 are required. Co-requisites: OTR 545, OTR 555, OTR 557, OTR 559, OTR 561, OTR 563 and OTR 571 are required. Portfolio IV links student interests with coursework and the understanding of the concept of Evidence-Based Rehabilitation as applied to occupational therapy practice. Simultaneously, the student is mentored through planned learning activities and the development of an evidence-based research paper.
Offered Spring

OTR 554. Professional Development Seminar - Portfolio V: Quantitative Research Project. (1 Units)

Prerequisites: OTR 553, OTR 545, OTR 555, OTR 557, OTR 559, OTR 561, OTR 563, and OTR 571 are required; Co-requisites: OTR 567, OTR 569, OTR 575, OTR 577, OTR 579, OTR 581, OTR 583 and OTR 591 are required. Portfolio V involves completion of a quantitative research project as part of the professional development portfolio. The course also provides an opportunity to present written and oral summary of completed portfolio activities and research papers to faculty and students.
Offered Summer

OTR 555. Occupation Across the Lifespan III - Adult. (3 Units)

Prerequisites: OTR 535, OTR 537, OTR 539, OTR 541, OTR 543, OTR 547, OTR 550, and OTR 552. Co-requisites: OTR 545, OTR 553, OTR 557, OTR 559, OTR 561, OTR 563 and OTR 571. Provides the theoretical foundations and frames of reference to understand adult populations and their families occupations. Explores the impact of contexts, family, and other factors that promote or limit engagement in occupations and co-occupations of adult populations.
Offered Spring

OTR 557. Assessments in Occupational Therapy Practice: Adult. (2 Units)

Prerequisites: OTR 535, OTR 537, OTR 539, OTR 541, OTR 543, OTR 547, OTR 550, and OTR 552 or OTD student group. Co-requisites: OTR 545, OTR 553, OTR 555, OTR 559, OTR 561, OTR 563 and OTR 571. Development of skills of assessment and evaluation of occupational performance in the context of current frames of reference, and the exploration of the impact that physical and psychosocial dysfunction can have on performance roles, tasks, and activities of adulthood.
Offered Spring

OTR 559. Interventions in Occupational Therapy Practice: Adult. (2 Units)

Prerequisites: OTR 535, OTR 537, OTR 539, OTR 541, OTR 543, OTR 547, OTR 550, and OTR 552 or OTD student group. Co-requisites: OTR 545, OTR 553, OTR 555, OTR 557, OTR 561, OTR 563 and OTR 571. Focuses on OT clinical interventions with the adult population. Students will develop clinical reasoning and skill in treatment planning, implementation, reviewing progress, discharge planning and documentation.
Offered Spring

OTR 561. Conditions Affecting Health III - Adults. (2 Units)

Prerequisites: OTR 535, OTR 537, OTR 539, OTR 541, OTR 543, OTR 547, OTR 550, and OTR 552. Co-requisites: OTR 545, OTR 553, OTR 555, OTR 557, OTR 559, OTR 563 and OTR 571. A professional course that focuses on common occupational performance dysfunctions secondary to medical, biophysical, and psychosocial conditions in adults 18-55 years old.

Offered Spring

OTR 563. Case Seminar III Adult. (1 Units)

Prerequisites: OTR 535, OTR 537, OTR 539, OTR 541, OTR 543, OTR 547, OTR 550, and OTR 552. Co-requisites: OTR 545, OTR 553, OTR 555, OTR 557, OTR 559, OTR 561 and OTR 571. Seminar format to provide opportunities for students to hear first-hand the life stories of adults living with disabilities acquired through illness, disability or trauma.

Offered Spring

OTR 567. Administration & Management in Occupational Therapy. (2 Units)

Prerequisites: OTR 545, OTR 553, OTR 555, OTR 557, OTR 559, OTR 561, OTR 563 and OTR 571. Co-requisites: OTR 554, OTR 569, OTR 575, OTR 577, OTR 579, OTR 581, OTR 583, OTR 591. Presentation and discussion of current concepts and trends in the administration and management in occupational therapy practice. Challenges students to explore the various facets of occupational therapy management in a constantly changing health care environment.

Offered Summer

OTR 569. Adaptive & Assistive Tech. (2 Units)

Prerequisites: OTR 545, OTR 553, OTR 555, OTR 557, OTR 559, OTR 561, OTR 563 and OTR 571. Co-requisites: OTR 554, OTR 567, OTR 575, OTR 577, OTR 579, OTR 581, OTR 583, OTR 591. RESNA technology competencies for occupational therapists, state and federal laws effecting availability or acquisition of assistive technology, assessments used in evaluation for technology prescription, seating and wheelchair measurements, computer input devices, augmentative communication, environmental controls, use of universal design.

Offered Summer

OTR 571. Level I Fieldwork - Adults. (1 Units)

Prerequisites: OTR 535, OTR 537, OTR 539, OTR 541, OTR 543, OTR 547, OTR 550, and OTR 552. Co-requisites: OTR 545, OTR 553, OTR 555, OTR 557, OTR 559, OTR 561 and OTR 563. Offers on-site clinical experiences with populations commonly served in OT practice settings with adult clients. Clinical experiences support co-requisite coursework and will rely on first semester course materials.

Offered Spring

OTR 575. Occupation Across the Lifespan IV - Geriatrics. (3 Units)

Prerequisites: OTR 545, OTR 553, OTR 555, OTR 557, OTR 559, OTR 561, OTR 563 and OTR 571. Co-requisites: OTR 554, OTR 567, OTR 569, OTR 577, OTR 579, OTR 581, OTR 583, and OTR 591. Focused on theoretical foundations of occupational therapy used in working with the geriatric population. Explores the value and meaning of occupation to the health and well being of elderly and frail elderly adults within cultural and temporal contexts.

Offered Summer

OTR 577. Assessments in Occupational Therapy Practice: Geriatrics. (1 Units)

Prerequisites: OTR 545, OTR 553, OTR 555, OTR 557, OTR 559, OTR 561, OTR 563 and OTR 571 or OTD student group. Co-requisites: OTR 554, OTR 567, 569, OTR 575, OTR 579, OTR 581, OTR 583, and OTR 591. Focuses on OT clinical evaluation with the geriatric population. Students will develop clinical reasoning and skill to select and administer standardized and non-standardized interview, observational, self-report and assessment tools in the processes of referral, screening, evaluation and documentation.

Offered Summer

OTR 579. Interventions in Occupational Therapy Practice: Geriatrics. (2 Units)

Prerequisites: OTR 545, OTR 553, OTR 555, OTR 557, OTR 559, OTR 561, OTR 563 and OTR 571 or OTD Student Group. Co-requisites: OTR 554, OTR 567, OTR 569, OTR 575, OTR 577, OTR 581, OTR 583, and OTR 591. Focuses on OT clinical interventions with the geriatric population. Students will develop clinical reasoning and skill in treatment planning, implementation, reviewing progress, discharge planning and documentation.

Offered Summer

OTR 581. Conditions Affecting Health IV - Geriatrics. (2 Units)

Prerequisites: OTR 545, OTR 553, OTR 555, OTR 557, OTR 559, OTR 561, OTR 563 and OTR 571. Co-requisites: OTR 554, OTR 567, OTR 569, OTR 575, OTR 577, OTR 579, OTR 583, and OTR 591. A professional course focused on common occupational performance dysfunctions secondary to medical, biophysical, and psychosocial conditions in the elderly and frail elderly adult (older than 55 and 85 years respectively).

Offered Summer

OTR 583. Case Seminar IV Geriatrics. (1 Units)

Prerequisites: OTR 545, OTR 553, OTR 555, OTR 557, OTR 559, OTR 561, OTR 563 and OTR 571. Co-requisites: OTR 554, OTR 567, OTR 569, OTR 575, OTR 577, OTR 579, OTR 583, and OTR 591. Life narratives of elders and frail elders and their family members will be facilitated to engage in discussions on issues relative to their personal life situations, occupational history and profile.

Offered Summer

OTR 591. Level I Fieldwork - Geriatrics. (1 Units)

Prerequisites: OTR 545, OTR 553, OTR 555, OTR 557, OTR 559, OTR 561, OTR 563 and OTR 571. Co-requisites: OTR 554, OTR 567, OTR 569, OTR 575, OTR 577, OTR 579, OTR 583, and OTR 591. Fieldwork offers on-site clinical experiences with populations commonly served in OT practice settings with elderly clients. Clinical experiences support co-requisite coursework and will rely on first semester course materials.

Offered Summer

OTR 592. Fieldwork II A. (9 Units)

Prerequisites: OTR 554, OTR 567, OTR 569, OTR 575, OTR 577, OTR 579, OTR 581, OTR 583, OTR 591. Completion of 12 weeks or approximately 480 hours of supervised Fieldwork Level II practicum in a community or clinical setting. Documentation of client evaluations, progress notes, and reports as well as provision of resources and delivery of OT services will be explored. CR/NC grading.

Offered Fall, Spring, Summer

OTR 593. Fieldwork II B. (9 Units)

Prerequisite: OTR 592. Completion of 12 weeks or approximately 480 hours of supervised Fieldwork Level II practicum in a community or clinical setting. Documentation of client evaluations, progress notes, and reports as well as provision of resources and delivery of OT services will be explored. CR/NC grading.
Offered Fall, Spring, Summer

OTR 595. Advanced Special Topics in Occupational Therapy. (1-3 Units)

Prerequisites: Consent of instructor and possible course prerequisites depending on topic. Advanced course of special interest in Occupational Therapy. Topic and content will vary as announced. Repeatable course.
Offered As needed

OTR 596. Graduate Internship. (1-4 Units)

Prerequisite: Completion of one International FW I rotation in MSOT; membership in ICOT; department chair approval. Supervised internship, in the occupational therapy, with a participating agency or company involved in international service-learning fieldwork experience. CR/NC grade.
Offered Fall, Spring, Summer

OTR 599. Graduate Capstone. (2 Units)

Prerequisite; completion of at least the first three semesters of the 7 semester MSOT program. Supervised thesis, special project, or comprehensive examination in occupational therapy. Repeatable course.
Offered Fall, Spring, Summer

OTR 600. Graduate Continuation Course. (1 Units)

Graduate students in MSOT who have other requirements remaining for the completion of their degree or who have completed their course work but not their fieldwork and/or comprehensive exam may maintain continuous attendance by enrolling in this course. Signature of MSOT program director required.
Offered Fall, Spring, Summer

OTR 701. The Historical Analysis of Occupational Therapy Profession. (2 Units)

Analysis of OT history, sociopolitical climate and its importance in meeting society's current and future needs. Introduction to OT practice philosophical base, terminologies, scope of practice, professional roles and associations, certification/licensure, regulation, and accreditation as a baseline for professional development. Admission to Occupational Therapy Doctorate required.
Offered Summer

OTR 713. OT Frameworks and Models of Practice. (2 Units)

Corequisites: OTR 512, OTR 701, OTR 714, OTR 715, and OTR 719 are required. Introduction to the OT Practice Framework and fundamental concepts of OT practice. Analysis of the development and application of theories, models of practice, and frames of reference in achieving desired intervention outcomes in a variety of practice contexts and environments.
Offered Summer

OTR 714. Introduction to Population Health. (2 Units)

Corequisites: OTR 512, OTR 701, OTR 713, OTR 715 and OTR 719 are required. Introduction to the social determinants of health as well as health promotion and disease prevention at the community and global levels. Explores impact of sociocultural, socioeconomic, political, demographic, diversity factors, lifestyle choices, and epidemiological factors to public health and welfare of populations. Restricted to majors.
Offered Summer

OTR 715. OTD Research Portfolio 1 Introduction to Research Portfolio: Literature Review. (1 Units)

Corequisites: OTR 512, OTR 701, OTR 713, OTR 714, and OTR 719 are required. Introduction to an individual e-portfolio focused on the completion of high quality research projects that contribute to occupational therapy practice. As the first of five courses, the focus is to review literature as a foundation to developing research questions and research proposals in succeeding courses.
Offered Summer

OTR 719. Therapeutic Activities and Group Dynamics Across the Lifespan. (3 Units)

Corequisites: OTR 512, OTR 701, OTR 713, OTR 714, and OTR 715 are required. Introduction to how activities, as meaningful occupations, are used as interventions in OT practice. Identify, analyze, and adapt activities using various media in both individual and group therapeutic experiences. Discuss the historical and theoretical underpinnings of arts & crafts as a treatment.
Offered Summer

OTR 722. Clinical Fieldwork I in a Pediatric Setting. (1 Units)

Prerequisites: OTR 512, OTR 701, OTR 713, OTR 714, OTR 715, and OTR 719 are required. Co-requisites: OTR 527, OTR 725, OTR 780, OTR 537, OTR 539, OTR 723, and OTR 724 are required. On-site and/or simulated clinical experience with infants and/or children. Parallels with didactic course content to bridge classroom learning with clinical practice through observations of the OT process, such as screening, evaluation, intervention, re-evaluation, discharge planning and application of OT theories. Restricted to majors
Offered Fall

OTR 723. Clinical Reasoning in Occupational Therapy: Pediatric Conditions and Case Analysis. (3 Units)

Prerequisites: OTR 713, OTR 714, OTR 715, OTR 719 and OTR 701 are required. Co-requisites: OTR 527, OTR 725, OTR 780, OTR 537, OTR 538, OTR 722, AND OTR 724 are required. Case analysis using simulated and first-hand narratives of children and their families. Examine effects of various developmental, physical and/or psychosocial conditions commonly seen in pediatric populations and employ clinical reasoning skills in identifying and addressing OT needs within varying service delivery models. Restricted to majors.
Offered Fall

OTR 724. Person, Environment, Occupation and Health Promotion in Pediatric Populations. (2 Units)

Prerequisites: OTR 512, OTR 713, OTR 714, OTR 715, OTR 719, and OTR 701 are required. Co-requisites: OTR 527, OTR 725, OTR 780, OTR 537, OTR 530, OTR 722, and OTR 723 are required. Explore the values and meanings of occupations, within varying environmental contexts to the health and wellness of infants, toddlers and children. Review service delivery models, policy issues, social systems, related to both traditional and emerging areas of practice for the pediatric population.
Offered Fall

OTR 725. OTR Research Portfolio 2 - Methodologies in Quantitative Research. (3 Units)

Prerequisites: OTR 512, OTR 713, OTR 714, OTR 715, OTR 719 and OTR . Co-requisites: OTR 572, OTR 780, OTR 537, OTR 539, OTR 722, OTR 723, and OTR 724 are required. Comparison of quantitative research methodologies. Students will select appropriate methods and design a scholarly proposal aligned with the ethical policies and procedures necessary to conduct human-subject research. Restricted to majors.
Offered Fall

OTR 732. Clinical Fieldwork I in an Adult Setting. (1 Units)

Prerequisites: OTR 527, OTR 725, OTR 780, OTR 537, OTR 539, OTR 722, OTR 723, and OTR 724 are required. Co-requisites: OTR 547, OTR 735, OTR 781, OTR 557, OTR 559, OTR 733, and OTR 734 are required. On-site and/or simulated clinical experience with adolescents. Parallels with didactic course content to bridge classroom learning with clinical practice through observations of the OT process such as screening, evaluation, intervention, re-evaluation, discharge planning and application of OT theories.

Offered Spring

OTR 733. Clinical Reasoning in Occupational Therapy: Adult Conditions & Case Analyses. (3 Units)

Prerequisites: OTR 527, OTR 725, OTR 780, OTR 537, OTR 539, OTR 722, OTR 723, and OTR 724 are required. Corequisites: OTR 547, OTR 547, OTR 781, OTR 557, OTR 559, OTR 732, and OTR 734 are required. Case analyses using simulated and first-hand personal narratives of adults and/or family members. Examine effects of various physical and/or psychosocial conditions commonly seen in adult populations and employ clinical reasoning skills in identifying and addressing OT needs within varying service delivery models. Restricted to majors.

Offered Spring

OTR 734. Person, Environment, Occupation, and Health Promotion in Adult Populations. (2 Units)

Prerequisites: OTR 527, OTR 725, OTR 780, OTR 537, OTR 539, OTR 722, OTR 723, and OTR 724 are required. Corequisites: OTR 547, OTR 736, OTR 781, OTR 557, OTR 559, OTR 732, and OTR 733 are required. Explore the values and meanings of occupations within varying environmental contexts to the health and wellness of adults. Review service delivery models, policy issues, social systems, related to both traditional and emerging areas of practice for the adult population. Restricted to majors.

Offered Spring

OTR 735. OTD Research Portfolio 3 - Quantitative Research Project. (2 Units)

Prerequisites: OTR 527, OTR 725, OTR 780, OTR 537, OTR 539, OTR 722, OTR 723, and OTR 724 are required. Corequisites: OTR 547, OTR 781, OTR 557, OTR 559, OTR 732, OTR 733, and OTR 734 are required.

Completion of a scholarly quantitative research report that supports clinical practice. Students are encouraged to submit for professional or public audience presentation or publication. Restricted to majors.

Offered Spring

OTR 742. Clinical Fieldwork I in and Adolescent Setting. (1 Units)

Prerequisites: OTR 547, OTR 735, OTR 781, OTR 557, OTR 559, OTR 732, OTR 733 and OTR 734 are required. Corequisites: OTR 745, OTR 782, OTR 790, OTR 517, OTR 519, OTR 743, and OTR 744 are required. On-site and/or simulated clinical experience with adolescents. Parallels with didactic course content to bridge classroom learning with clinical practice through observations of the OT process such as screening, evaluation, intervention, re-evaluation, discharge planning and application of OT theories. Restricted to majors.

Offered Summer

OTR 743. Clinical Reasoning in Occupational Therapy: Adolescent Conditions and Case Analyses. (3 Units)

Prerequisites: OTR 547, OTR 735, OTR 781, OTR 557, OTR 559, OTR 732, OTR 733 and OTR 734 are required. Corequisites: OTR 745, OTR 782, OTR 790, OTR 517, OTR 519, OTR 742, and OTR 744 are required.

Case analyses using simulated and first-hand personal narratives of adolescents and/or family members. Examine effects of various developmental, physical and/or psychosocial conditions commonly seen in adolescent populations and employ clinical reasoning skills in identifying and addressing OT needs within varying service delivery models. Restricted to majors.

Offered Summer

OTR 744. Person, Environment, Occupation and Health Promotion in Adolescent Populations. (2 Units)

Prerequisites: OTR 547, OTR 735, OTR 781, OTR 557, OTR 559, OTR 732, OTR 733 and OTR 734 are required. Corequisites: OTR 745, OTR 782, OTR 790, OTR 517, OTR 519, OTR 742, and OTR 742 are required. Explore the values and meanings of occupations within varying environmental contexts to the health and wellness of adolescents. Review service delivery models, policy issues, social systems, related to both traditional and emerging areas of practice for the adolescent population. Restricted to majors.

Offered Summer

OTR 745. OTD Research Portfolio 4 - Methodologies in Qualitative Research. (2 Units)

Prerequisites: OTR 547, OTR 781, OTR 557, OTR 559, OTR 732, OTR 733 and OTR 734 are required. Corequisites: OTR 781, OTR 790, OTR 517, OTR 519, OTR 742, OTR 743 and OTR 744 are required. Comparison of qualitative research methodologies. Students will select appropriated methods and design a scholarly proposal aligned with the ethical policies and procedures necessary to conduct human-subject research. Restricted to majors.

Offered Summer

OTR 753. Clinical Reasoning in Occupational Therapy: Geriatric Conditions & Case Analyses. (3 Units)

Case analyses using simulated and first-hand personal narratives of older adults, family members or caregivers. Examines effects of various physical and/or psychosocial conditions commonly seen in geriatric populations and employ clinical reasoning skills in identifying and addressing OT needs within varying delivery models.

Offered Fall

OTR 754. Person, Environment, Occupation, and Health Promotion in Geriatric Populations. (2 Units)

Explore the values and meanings of occupations within varying environmental contexts to the health and wellness of older adults. Review service delivery models, policy issues, and social systems, related to both traditional and emerging areas of practice for the geriatric population.

Offered Fall

OTR 755. OTD Research Portfolio 5: Qualitative Research Project. (2 Units)

Completion of a scholarly qualitative or mixed methods research report that supports clinical practice. Submission for professional or public audience presentation or for publication in a peer-reviewed journal is required.

Offered Fall

OTR 780. OT Professional Development Seminar: OT Code of Ethics. (1 Units)

Prerequisites: OTR 512, OTR 713, OTR 714, OTR 715, OTR 719, and OTR 701 are required. Corequisites: OTR 527, OTR 725, OTR 537, OTR 539, OTR 722, OTR 723, and OTR 724 are required. Principles and constructs of the American Occupational Therapy Association (AOTA) Occupational Therapy Code of Ethics and AOTA Standards of Practice. Analysis of ethical dilemmas and case study scenarios of clinical situations, decision-making, professional interactions, client interventions, employment settings, and personal and organizational ethical conflicts. Restricted to majors.
Offered Fall

OTR 781. OT Professional Development Seminar: The Reflective Occupational Therapist. (1 Units)

Prerequisites: OTR 527, OTR 725, OTR 780, OTR 537, OTR 539, OTR 722, and OTR 724 are required. Corequisites: OTR 547, OTR 735, OTR 557, OTR 559, OTR 732, OTR 733, and OTR 734 are required. Apply the concept of therapeutic use of self in the OT process with self-reflection on ones personality, insights, perceptions, and judgements. Explore skills and knowledge needed to promote inclusiveness, diversity, justice, equity, sensitivity and responsiveness to societal and cultural differences in practice. Restricted to majors.
Offered Spring

OTR 782. OT Professional Development Seminar: Effective Communication and Team Dynamics. (1 Units)

Prerequisites: OTR 547, OTR 735, OTR 781, OTR 557, OTR 559, OTR 732 and OTR 733, and OTR 734 are required. Corequisites: OTR 745, OTR 790, OTR 517, OTR 519, OTR 742, OTR 743, and OTR 744 are required. Introduction to the principles of interprofessional team dynamics, effective communication, and effective intraprofessional collaboration. Restricted to majors.
Offered Summer

OTR 783. OT Professional Development Seminar - Program Development & Funding of OT Services. (1 Units)

Overview of important aspects and processes in developing programs that address occupational therapy needs, including funding sources, such as reimbursement systems and documentation as well as locating and securing grants.
Offered Fall

OTR 784. OT Professional Development Seminar: Administration and Management. (1 Units)

Administration and management concepts and trends that influence service delivery to patients, families, student, and others in community and clinical settings, including supervision of personnel, quality improvement methods, and oversight of credentialing and licensure requirements consistent with federal and state laws.
Offered Fall

OTR 785. OT Professional Development Seminar - Adaptive and Assistive Technology and Devices. (1 Units)

Assessment, selection, fabrication, application, fitting and training of adaptive and assistive technology and devices that enhance occupational performance and foster participation and well-being of persons experiencing limitations due to personal or environmental barriers. Discuss state and federal laws affecting its availability or acquisition.
Offered Fall

OTR 786. OT Professional Development Seminar - Group Interventions. (1 Units)

Historical, theoretical underpinnings and application of group work to populations spanning the lifespan. Focus on group dynamics and understanding human behavior in a variety of contexts to develop appropriate selection, planning, facilitation of group interventions.
Offered Fall

OTR 787. OT Professional Development Seminar-Ergonomics. (1 Units)

Specialized area of ergonomic evaluation and interventions for daily activities at home and in work environments, including body mechanics, work/rest cycles, application of traditional and alternative work environments, application and use of commercially available ergonomic equipment, and development of novel ergonomic applications.

OTR 788. OT Professional Development seminar- Leadership and Advocacy. (1 Units)

Discussion of personal and professional responsibilities as occupational therapist, including ongoing professional development as well as engagement in advocacy, systems and structures that create legislation, and work in an academic setting.

OTR 789. OT Professional Development Seminar: Business Aspects of Practice. (1 Units)

Business aspects of occupational therapy practice, which include the development of business plans, financial management, program evaluation models, and strategic planning.

OTR 790. OTD Capstone Portfolio 1 Needs Assessment: Identifying OT Problem. (1 Units)

Introduction to an individual e-portfolio for the OTD Degree capstone. As the first of five courses, the focus is to perform a needs assessment to identify an OT problem as a baseline for the development of a research or evidence-based capstone project in succeeding courses.
Offered Summer

OTR 791. OTD Capstone Portfolio 2 - Evidence-based Practice: Reviewing Best Intervention. (1 Units)

Evidence-based rehabilitation as applied to occupational therapy practice. The student is mentored through the development of an evidence-based program proposal for a potential capstone experience placement site. A research project proposal may also be acceptable as approved by the academic advisor.
Offered Fall

OTR 792. OTD Capstone Portfolio 3 Capstone Experience. (9 Units)

A 14-week in-depth exposure to one or more of the following: clinical practice skills, research skills, administration, leadership program and policy development, advocacy, education, and theory development. Fulfills the capstone experience requirement of the OTD degree.
Offered Fall

OTR 793. OTD Capstone Portfolio 4 Capstone Project 1. (3 Units)

The first phase of the capstone project completion. The student is mentored through (1) the selection of doctoral capstone project committee, (2) development of a capstone project proposal for committee review and approval, (3) facilitation of the research or evidence-based program.
Offered Fall

OTR 797. OTD Capstone Portfolio 5 Capstone Project 2. (3 Units)

Completion of the capstone project, which includes both a written report and an oral presentation. Capstone committee approval required.
Offered Spring

Occupational Therapy, Master of Science

Program Description

The Entry-level Master of Science in Occupational Therapy (MSOT) Program prepares students for a professional career focused on helping people achieve skills and utilize resources to live independent and meaningful lives. The MSOT degree is a full-time Cohort Program. Students within a specific cohort matriculate together and are expected to take the same courses every semester and to complete the requirements of the program at the same time. MSOT students are assigned to specific sections and are given their class schedule by the department. One cohort of 66-69 students is admitted per year, and the program starts every spring semester.

Academic Advisement

Interested students should contact the Department of Occupational Therapy at (310) 243-2726 or visit <https://www.csudh.edu/ot/> for program specific details, application, and additional information.

Pre-Admission Disclosure for Academic Programs Leading to Licensure or Credentialing

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or taxpayer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from **Heather Kitching: WH A320 - (310) 243- 2726**.

Accreditation

The MSOT Program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 7501 Wisconsin Avenue, Suite 510E Bethesda, MD 20814. TEL: (301) 652-AOTA.

Certification

Graduates of the MSOT Program are eligible to sit for the national certification examination for occupational therapists administered by the National Board of Certification in Occupational Therapy (NBCOT). After successful completion of this examination, the graduate will be an Occupational Therapist Registered (OTR).

Licensure

Graduates wishing to practice in the state of California must apply for a state license to practice. A state license is based on successful completion of the NBCOT Certification Examination.

Credentialing Requirements

A felony conviction may affect a graduate's ability to sit for the certification examination administered by the NBCOT or to attain state licensure. NBCOT's certification examination application contains character review questions that must be answered by all exam candidates applying for the certification examination. Applicants who answer "yes" to any of these questions must submit an explanation and official documentation regarding their background to NBCOT's Regulatory Affairs Department at the time of application to take the examination. This information will be reviewed by the NBCOT on an individual basis prior to determining exam eligibility.

An individual who is considering entering an educational program or has already entered an educational program can request an early determination review to have their background reviewed prior to the application for the certification exam. If you have additional questions or would like additional information, you may contact the Credentialing Services at NBCOT, located at One Bank Street, Suite 300, Gaithersburg, Maryland 20878; TEL: (301) 990-7979. Email: info@nbcot.org

Admission to the Master of Science in Occupational Therapy (MSOT) Program

Applicants must submit an application to the MSOT Program through CalStateApply at <https://www2.calstate.edu/apply> (<https://www2.calstate.edu/apply/>).

Applications to the program are accepted one time each year. Students planning to seek admission to the program should submit a complete application - including all supporting materials - no later than September 15 preceding a spring semester admission to the program. For additional information about the admissions process for the MSOT program, please contact the Department of Occupational Therapy at (310) 243-2726, msotadmissions@csudh.edu (email) or refer to the website <https://www.csudh.edu/ot/>.

MSOT Application opens: **August 1st**

Application (ALL documents) deadline: **September 15th**

Admission Requirements

1. A completed and awarded Bachelor of Arts or Sciences degree from a regionally accredited college or university.
2. Completion of the following prerequisites (must be within the last ten years, minimum 3 semester units each, a minimum of B average in all prerequisite courses, and a minimum of C for each course).
 - a. Human Anatomy with laboratory (3 Credits) (<https://www.csudh.edu/ot/>)
 - b. Human Physiology with laboratory (3 Credits)
 - c. Developmental Psychology or Human Development (Across the Lifespan) (3 Credits)
 - d. Abnormal Psychology (3 Credits)
 - e. Statistics (3 Credits)
 - f. Medical Terminology (academic credit or certificate, taken from an accredited institution)
 - i. **Notes:**
 - Combined Human Anatomy and Human Physiology courses are acceptable as long as each are offered with

Lab components, total at least 6 semester units, focus on general gross human structures, and taken from an accredited institution.

- For applicants who completed a 4-unit combined Anatomy and Physiology course with lab that covers all systems, you could take the 2-unit OTR 595 Case-Based Analysis of Anatomical Structures and Functions course offered through CSUDH College of Extended and International Education to meet both Human Anatomy and Human Physiology prerequisite requirements. For inquiries, email: msotadmissions@csudh.edu. (msotadmissions@csudh.edu)
 - It is acceptable to combine two or more Development courses that focus on different life stages, e.g. a course on Childhood Development from infancy to adolescence and a course on Adulthood and Aging.
 - The CSUDH OT Department offers a Medical Terminology in OT Practice Workshop that meets the Medical Terminology prerequisite requirement. For inquiries, email: msotadmissions@csudh.edu
3. A minimum cumulative GPA of 3.0 in bachelor's degree and prerequisite coursework.
 4. Completion of 80 hours of documented volunteer experience under the supervision of a registered occupational therapist; or Successful completion of the department workshop: Foundations of Occupational Therapy <https://www.csudh.edu/ot/curriculum/electives/> To register, (<https://www.csudh.edu/ot/curriculum/electives/>) kindly email the department at msotadmissions@csudh.edu. (msotadmissions@csudh.edu)
 5. Three letters of recommendation: one letter from the occupational therapist supervising volunteer hours and two from professionals that can attest to student's ability to complete graduate coursework.
 6. A minimum combined Verbal and Quantitative GRE Scores of 286, with required minimum scores of 140 on the Quantitative Reasoning and 146 on the Verbal Reasoning sections. A minimum Analytic Writing score of 4 is required. (**Note:** GRE scores must be within the last five years.)
 7. Attendance of an MSOT Information Session prior to applying to the program.
 8. Download and complete Application Checklist (https://www.csudh.edu/Assets/csudh-sites/ot/docs/2022%20OT%20Dual-Application%20Checklist%20Form_.pdf)
 9. Applicants who meet the aforementioned qualifications might be invited for a personal interview with members of the Occupational Therapy Program Admissions Committee. (A decision about admission interviews is to be made by the Committee on a yearly basis.)
 10. If accepted, completion of the CSUDH medical history questionnaire and physical examination with proof of required immunizations are mandatory.

11. If accepted, student must sign up for all fieldwork management, background screening and/or compliance tracking systems being utilized by the program prior to admission.

For additional information about the admissions process for the MSOT program, please contact the Department of Occupational Therapy at 310-243-2726 or refer to the website <https://www.csudh.edu/ot/>

Graduation Requirement

The entry-level Master of Science in Occupational Therapy (MSOT) Program is comprised of 98 units of entry-level professional didactic and clinical coursework offered in a semester format (including summer sessions). Courses are listed by course number and title as a sequence of seven consecutive semesters, five didactic and two full-time clinical internships.

Requirements

MSOT Required Courses for Graduation

All courses listed below are required for the MSOT Program and need to be taken in the prescribed sequence.

Total Course Requirements for the Master's Degree (98 units)

- Completion of a B.S. or B.A. in another field of study.
- Completion of specific prerequisites for admission to the program.
- Completion of the following didactic and clinical courses in the sequence offered:

The entry level Master of Science in Occupational Therapy Program is comprised of 98 units of entry-level professional didactic and clinical coursework offered in a semester format including Summer Sessions. Courses are listed by course number and title as a sequence of seven consecutive semesters, five didactic and two full-time clinical internships.

Requirements

| Code | Title | Hours |
|--|---|-------|
| Semester One - Foundations (16 units) | | |
| OTR 500 | Person-Environment-Occupation | 2 |
| OTR 502 | History of Occupation | 2 |
| OTR 504 | Activities Across the Lifespan | 3 |
| OTR 506 | Interactive Reasoning | 3 |
| OTR 508 | Professional Development Seminar - Portfolio I: Introduction to E-Portfolio | 1 |
| OTR 510 | Introduction to Frameworks for Occupational Therapy Practice | 2 |
| OTR 512 | Human Anatomy | 3 |
| Semester Two - Adolescence (17 units) | | |
| OTR 515 | Occupation Across the Lifespan I: Adolescence | 3 |

| Total Hours | | 98 |

¹ Capstone Clinical Project consists of a comprehensive evidence-based clinical paper, an oral and clinical competence presentation.

Other Requirements

Transportation

Students will be responsible for transportation and housing during Fieldwork Levels I and II and may be required to attend a Fieldwork II experience in neighboring states.

Uniforms

Uniforms or a CSUDH polo shirt, and/or laboratory coats may be required in some fieldwork settings. Purchase of a lab coat, CSUDH polo shirt/uniform and name tag are the responsibility of the student.

Health Insurance/Immunizations

Student must have evidence of health insurance and a record of current and past immunizations at the time of admission into the program.

Fingerprinting and Background Check

Students may be required to complete and submit a Live Scan Fingerprint and criminal background check as preparation for some Fieldwork Levels I and II. Many centers hosting Fieldwork students serve vulnerable populations that by law require the background check of all service providers and student affiliates. The results of the Live Scan will be held in strict confidentiality.

Physical Examination

Students admitted to the program will be required to supply evidence of a completed physical examination and immunization records. Physical exams can be completed by the family physician or Student Health Center if the student is a member of the student health program. A form will be provided at the time of admission into the program.

Program Learning Outcomes

Upon completion of the entry-level MSOT, students will be able to...

1. demonstrate entry-level knowledge of the basic and clinical sciences and skills essential to practice occupational therapy;
2. use knowledge of how humans construct meaning and seek adaptation through occupation across the lifespan;
3. demonstrate mastery of entry-level professional clinical skills specific to all areas identified in the Practice Frameworks for Occupational Therapy;
4. serve the needs of diverse and underserved populations with demonstrated sensitivity to psychosocial identity and cultural and ethnic heritage;
5. implement occupational therapy services that maintain health and wellness and remediate dysfunction;
6. apply principles and constructs of ethics to individual, institutional and societal problems and demonstrate competence in developing appropriate resolutions to these problems;
7. identify researchable problems, advocate for and participate in research, and incorporate findings into clinical practice;
8. provide scholarly contributions to the knowledge base of the profession through written and oral communication;
9. relate theory with practice and use research evidence to think critically about or adapt new and existing practice environments based on population needs and research evidence;
10. participate in advocacy and educational roles with patients and their families, students, and others in community and clinical settings;

11. serve as practitioners and leaders who can influence practice, education, and policy development;
12. assume leadership roles at the local, state, national and international levels in occupational therapy and in health professions.
13. achieve success in Fieldwork settings, the national board examination and become licensed to practice occupational therapy.

Occupational Therapy, Doctorate

Program Description

The Entry-level Occupational Therapy Doctorate (OTD) Program prepares students for a professional career focused on helping people achieve skills and utilize resources to live independent and meaningful lives.

The OTD program aims to meet the increasing demand for highly skilled occupational therapy practitioners within the dynamic nature of contemporary health and human services delivery systems. The program is structured towards producing client-centered occupational therapists with enhanced critical thinking abilities. It aims to produce professionals who can research, develop, implement, and evaluate procedures utilizing a high degree of independent judgment and to consult where appropriate with other members of the health care team. The OTD Program educate occupational therapists that possess advanced knowledge and skills as direct care providers, consultants, educators, managers, leaders, researchers, and advocates for the profession and the consumer, as defined and prescribed by the Accreditation Council for Occupational Therapy Education (ACOTE).

Academic Advisement

Interested students should contact the Department of Occupational Therapy at (310) 243-2726 or visit <https://www.csudh.edu/ot/> for program specific details, application and additional information.

Pre-Admission Disclosure for Academic Programs Leading to Licensure or Credentialing

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or taxpayer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from **Eric Hwang: WH A320 - (310) 243- 2726**.

Accreditation

The Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA) has granted the OTD Program approval of candidacy status in February 2023 (step 1), which allows the Program to admit students. Although the "Candidacy Status" designation does not guarantee that the program will be accredited, it indicates that the resource allocation and plan for development of the proposed program appear to demonstrate the

ability to meet ACOTE Standards. With the granted Candidacy Status, the program will submit a Report of Self-Study for review by ACOTE (step 2) and will have an on-site evaluation (step 3). The Program anticipates attaining its full accreditation in August 2025. The AOTA is located at 7501 Wisconsin Avenue, Suite 510E Bethesda, MD 20814. TEL: (301) 652-AOTA.

Certification

Upon the Program's full accreditation by the ACOTE, graduates are eligible to sit for the national certification examination for occupational therapists administered by the National Board of Certification in Occupational Therapy (NBCOT). After successful completion of this examination, the graduate will be an Occupational Therapist Registered (OTR).

Licensure

Graduates wishing to practice in the state of California must apply for a state license to practice. A state license is based on successful completion of the NBCOT Certification Examination.

Credentialing Requirements

A felony conviction may affect a graduate's ability to sit for the certification examination administered by the NBCOT or to attain state licensure. NBCOT's certification examination application contains character review questions that must be answered by all exam candidates applying for the certification examination. Applicants who answer "yes" to any of these questions must submit an explanation and official documentation regarding their background to NBCOT's Regulatory Affairs Department at the time of application to take the examination. This information will be reviewed by the NBCOT on an individual basis prior to determining exam eligibility.

An individual who is considering entering an educational program or has already entered an educational program can request an early determination review to have their background reviewed prior to the application for the certification exam. If you have additional questions or would like additional information, you may contact the Credentialing Services at NBCOT, located at One Bank Street, Suite 300, Gaithersburg, Maryland 20877; TEL: (301) 990-7979. Email: professional.conduct@nbcot.org (character.review@nbcot.org).

Admission to the Entry-Level Occupational Therapy Doctorate (OTD) Program

Applications to the OTD program are accepted one time each year. Students planning to seek admission to the program should complete the on-line application and submit a complete application packet including all supporting materials by February 28 preceding a summer semester admission to the program.

Applications for admission to CSU Dominguez Hills must be completed on-line at <https://www2.calstate.edu/apply> (<https://www2.calstate.edu/apply/>).

OTD Application opens: **February 1st**

Application (ALL documents) deadline: **February 28th**

Admissions Requirements

- A completed and awarded Bachelor of Arts or Sciences degree from a regionally accredited college or university.
- Completion of the following prerequisites (must be within the last ten years, minimum 3 semester units each, a minimum of B average in all prerequisite courses, and a minimum of C for each course).
 - Human Anatomy with laboratory (3 Credits)
 - Human Physiology with laboratory (3 Credits)
 - Developmental Psychology or Human Development (Across the Lifespan) (3 Credits)
 - Abnormal Psychology (3 Credits)
 - Statistics (3 Credits)
 - Medical Terminology (academic credit or certificate, taken from an accredited institution)
 - **Notes:**
 - Combined Human Anatomy and Human Physiology courses are acceptable as long as each are offered with Lab components, total at least 6 semester units, focus on general gross human structures, and taken from an accredited institution.
 - For applicants who completed a 4-unit combined Anatomy and Physiology course with lab that covers all systems, you could take the 2-unit OTR 595 Case-Based Analysis of Anatomical Structures and Functions course offered through CSUDH College of Extended and International Education to meet both Human Anatomy and Human Physiology prerequisite requirements. For inquiries, email: otdmissions@csudh.edu.
 - It is acceptable to combine two or more Development courses that focus on different life stages, e.g. a course on Childhood Development from infancy to adolescent and a course on Adulthood and Aging.
 - The CSUDH OT Department offers a Medical Terminology in OT Practice Workshop that meets the Medical Terminology prerequisite requirement. For inquiries, email: otdmissions@csudh.edu.
- A minimum cumulative GPA of 3.0 in bachelor's degree and prerequisite coursework.
- Completion of 80 hours of documented volunteer experience under the supervision of a registered occupational therapist.
- Three letters of recommendation: one letter from the occupational therapist supervising volunteer hours and two from professionals that can attest to student's ability to complete graduate coursework.
- A minimum combined Verbal and Quantitative GRE Scores of 286, with required minimum scores of 140 on the Quantitative Reasoning and 146 on the Verbal Reasoning sections. A minimum Analytic Writing score of 4 is required. (**Note:** GRE scores must be within the last five years.)
- Attendance of an OTD Information Session prior to applying to the program.
- Download and complete Application Checklist (https://www.csudh.edu/Assets/csudh-sites/ot/docs/2022%20OT%20Dual-Application%20Checklist%20%20Form_.pdf)

- Applicants who meet the aforementioned qualifications will be invited for a personal interview with members of the Occupational Therapy Program Admissions Committee.
- If accepted, completion of the CSUDH medical history questionnaire and physical examination with proof of required immunizations are mandatory.
- If accepted, student must sign up for all fieldwork management, background screening and/or compliance tracking systems being utilized by the program prior to admission.

For additional information about the admissions process for the Occupational Therapy Doctorate program, please contact the Department of Occupational Therapy at 310-243-2726, otdmissions@csudh.edu or refer to the website <https://www.csudh.edu/ot/>

Semester One (Summer) - Foundations (13 units - 6 courses)

| OTR 799 | Capstone | 1-3 |

ENTRY-LEVEL OTD PROGRAM LEARNING OUTCOMES

Upon completion of the entry-level OTD, students will be able to...

1. demonstrate mastery of entry-level clinical assessment and intervention skills needed for evidence-based occupational therapy services that address all areas identified in the Occupational Therapy Practice Framework;
2. use research evidence to think critically on how to address client population needs;
3. apply occupational therapy theory related to how humans across the lifespan construct meaning and seek adaptation through occupation to achieve expected outcomes;
4. demonstrate in-depth knowledge of service delivery models, policies, and systems related to practice settings in both traditional and emerging areas;
5. apply the principles and constructs of the occupational therapy code of ethics in responding to individual, institutional, and societal problems;
6. demonstrate clear and effective communication, both written and verbal, to display professionalism and contribute to the enhancement of practice;
7. display sensitivity and responsiveness to societal and cultural differences to better serve the needs of diverse and underserved populations;
8. initiate and conduct high-quality research that contributes to the understanding and promotion of health and well-being of individuals within occupational therapy practice;

9. contribute to the profession by submitting scholarly work to peer reviewed professional publications and/or for presentation at clinical or scientific meetings;
10. assume leadership, management, and administrative roles that influence service delivery to patients, families, students, and others in community and clinical settings;
11. participate in advocacy, education, and policy development that promote the advancement of occupational therapy profession;
12. demonstrate in-depth knowledge in one or more of the following areas: clinical practice specialty skills, research skills, administration, leadership, program and policy development, advocacy, education, and theory development.

Organizational Leadership Studies

College of Business Administration and Public Policy

Program Description

The Bachelor of Science in Organizational Leadership Studies is a specially designed online degree program that meets the needs of diverse students who have significant work experience and/or have made progress toward or achieved associate degrees that they may readily transfer to pursue upper-division coursework. This program emphasizes workplace applications of academic subjects enabling students to obtain a Bachelor of Science degree with advanced coursework preparing them for management and/or leadership roles in their professions.

Academic Advisement

This program is dependent upon close and careful advising. The development and maintenance of close advising relationships between students and the Program Office is the key factor in assuring that the Organizational Leadership Studies program meets the needs of the students that it was designed to serve. Students should contact the Program Office for a pre-application advising appointment.

Preparation

Students are recommended to have significant lower-division courses and/or general education courses completed (minimum 56 semester or equivalent units) prior to admission to the Organizational Leadership Studies major. An applicant who does not already possess an Associate Degree will be counseled to meet the minimum number of units for transfer. The University works closely with community colleges throughout the region to ensure that potential Organizational Leadership Studies majors are appropriately counseled to facilitate their transition to upper-division status. Work experience, while highly desirable, is not specifically required for admission to the Organizational Leadership Studies degree program.

Graduation with Honors

An undergraduate student may be a candidate for graduation with Honors in Organizational Leadership Studies provided he or she meets the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of at least 3.5 in all courses used to satisfy the upper division requirements in the major.

Undergraduate Programs

Bachelor

- Organizational Leadership Studies , Bachelor of Science (p. 745)

Faculty

Organizational Leadership Studies is part of the Public Administration Department in the School of Public Service and Justice within the College of Business Administration and Public Policy.

Courses

OLS 300. Ethos Libl Arts & Role of Work. (3 Units)

Examines the relationship between liberal arts and sciences education and the competencies required to function effectively in social and occupational settings. Readings and assignments emphasize integration and application of skills, knowledge, perspectives, and values acquired through liberal arts and sciences.

Offered Fall, Spring

OLS 490. Sem in Occupational Leadership. (3 Units)

Prerequisites: OLS 300, satisfaction of GVAR and Senior Standing. Required of all applied studies majors. Interdisciplinary analysis of leadership in selected occupational areas. Creation and presentation of student portfolios demonstrating occupational accomplishment. Three hours of seminar per week.

Offered Fall, Spring

OLS 494. independent Study in Organizational Leadership Studies. (3 Units)

Prerequisite: Consent of the program director. Independent research or other study under the direction of a full-time faculty member of the Applied Studies Program. CR/NC grading.

Offered As needed

OLS 495. special Topics in Organizational Leadership Studies. (3 Units)

Prerequisite: Consent of the program director. Advanced seminar on a topic of current interest to the discipline of Organizational Leadership Studies. Three hours of seminar per week. Repeatable Course.

Offered Infrequent

OLS 496. Internship in Organizational Leadership Studies. (3 Units)

Prerequisite: Consent of Program Director. Under direction of the Internship Coordinator, students work in an organization applying skills and knowledge learned in the classroom. CR/NC grading. Repeatable course.

Offered Infrequent

Organizational Leadership Studies , Bachelor of Science

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

The Bachelor of Science in Organizational Leadership Studies will consist of a minimum of 120-semester units, based on the assumption that the majority of applicants will have completed a 60 unit Associate of Science (or equivalent) degree. The major will consist of 51 semester units. All courses require a "C" or better grade to complete the major. The structure of the program is:

1. Associate of Science degree from an accredited community college, or the equivalent.
2. Common Core Requirements (21 units)
3. Organizational Leadership Studies Major Courses (6 units)
4. Major Requirements (24 units)
 - Public Sector Management Track or
 - Strategic Communications Track

Each element of the program's structure is discussed briefly below.

A. Associate of Science or Equivalent Degree

Most potential students will come with an associate degree or the equivalent completed. Up to 18 units of lower-division technical coursework may be integrated as a part of the degree program. Depending on their lower division majors and the requirements for associates' degrees from different community colleges, some students may also be required to pursue additional lower-division course work beyond 60 units. Thus, an applicant will need to have completed a minimum of 38 units of regularly transferable course work at the lower division level.

B. Organizational Leadership Studies Required Courses (6 units)

| Code | Title | Hours |
|---------|--------------------------------|-------|
| OLS 300 | Ethos Libl Arts & Role of Work | 3 |
| OLS 490 | Sem in Occupational Leadership | 3 |

C. Common Core Courses (21 units)

| Code | Title | Hours |
|--|-------------------------|-------|
| Select seven courses from the list below: 21 | | |
| ANT 335 | Comparative Cultures | |
| BUS 300 | Business Communications | |

| | |
|---------|---|
| COM 365 | Introduction to Public Relations |
| ENG 352 | Writing and Speaking Skills for Management |
| HIS 301 | Individual, Family, and Community in Historic Perspective |
| HIS 348 | Labor In American Society |
| MGT 310 | Management Theory |
| MGT 416 | Leadership |
| POL 310 | Current Issues in American Government |
| POL 335 | Introduction to International Relations |
| PSY 372 | Industrial and Organizational Psychology |
| THE 320 | Speech Skills and Techniques |

D. Major Requirements (24 units)

Students select either the Strategic Communication Track or the Public Sector Management Track to satisfy major requirements (24 units):

1. Strategic Communications Track (24 units)¹

| Code | Title | Hours |
|---|--|-------|
| Strategic Communications Electives | | |
| Select eight courses from the following: ¹ | | 21 |
| BUS 300 | Business Communications | |
| HRM 313 | Human Resources Management | |
| HRM 316 | Labor & Industrial Relations | |
| LBR 411 | Contracts & Negotiations | |
| LBR 412 | Labor Law | |
| MGT 310 | Management Theory | |
| MGT 312 | Organizational Behavior | |
| MGT 416 | Leadership | |
| MGT 430 | Strategic Communication | |
| MKT 350 | Principles Of Marketing | |
| PSY 372 | Industrial and Organizational Psychology | |
| SOC 315 | Sociology Of Work | |
| Any upper division Communications course | | |
| Any upper division Economics course | | |
| Any upper division Law course | | |
| Any upper division Public Administration course | | |
| BUS 300, COM 365, MGT 310, MGT 416, or PSY 372 may be selected if not taken in the Common Core. | | |

¹ In case of course unavailability or time conflicts, please consult the academic advisor for substitution approval.

2. Public Sector Management Track (24 units)¹

| Code | Title | Hours |
|---|------------------------------|-------|
| Public Sector Management Electives | | |
| Select eight courses from the following: | | 18 |
| BUS 300 | Business Communications | |
| HRM 313 | Human Resources Management | |
| HRM 316 | Labor & Industrial Relations | |
| LBR 411 | Contracts & Negotiations | |
| LBR 412 | Labor Law | |
| MGT 310 | Management Theory | |
| MGT 312 | Organizational Behavior | |
| MGT 416 | Leadership | |

| | |
|--|---|
| MKT 350 | Principles Of Marketing |
| PSY 372 | Industrial and Organizational Psychology |
| SOC 315 | Sociology Of Work |
| Any upper division Communications course | |
| Any upper division Economics course | |
| Any upper division Law course | |
| Any upper division Public Administration course ² | |
| BUS 300 | Business Communications ² |
| COM 365 | Introduction to Public Relations ² |
| MGT 310 | Management Theory ² |
| MGT 416 | Leadership ² |
| PSY 372 | Industrial and Organizational Psychology ² |

Total Hours 18

¹ In case of course unavailability or time conflicts, consult the advisor for substitution approval.

² May be selected if not taken in the Common Core.

Program Learning Outcomes

1. Display Critical Thinking Skills through the application of ideas to real world concepts, as well as theoretical and practical problems related to an occupation.
2. Demonstrate understanding of occupational leadership skills in exams, in course papers, through group discussions, and in final project.
3. Exhibit Writing Skills that enable them to organize and explain ideas and solve problems using conventions of academic and professional writing
4. Design a professional development plan for a future career which may include changes in careers or objectives.
5. Demonstrate integration of technical, management, and liberal arts knowledge and skills in the current work settings.

4 Year Roadmap

Philosophy

College of Arts and Humanities
Philosophy Department

Program Description

The Philosophy Department offers a major and a minor in Philosophy and a minor in Religious Studies. The program provides a strong foundation in the history of Western thought and deals with a variety of ongoing philosophical and religious issues, tracing them from their origins in early Greek and other historical sources to current theories and disputes. The department offers a variety of courses in contemporary philosophy, including phenomenology and applied ethics. The department recognizes the importance of cultural diversity and through its course offerings addresses multicultural concerns.

Features

The faculty members of the Philosophy Department bring with them a deep interest in their subjects and together provide a wide spectrum of interests and expertise in the areas of both philosophy and religious studies. All of the faculty members hold their doctoral degrees from highly respected universities and are active in research and writing.

In scheduling classes, the department endeavors to provide sufficient course offerings to permit working students the opportunity to complete the major in a timely manner. For full-time students, courses necessary to fulfill the major are offered within a four-semester period.

Academic Advisement

Students should consult an advisor as early as possible to plan the most suitable combination of courses in advance.

Assessment

Students in the Philosophy program are involved in ongoing assessment. As part of the requirements of core courses, journals are required in addition to other written assignments such as research papers. The PHI 490 Seminar functions as a capstone experience in which work generated from previous courses in philosophy is reviewed to assist in determining the overall progress of the student in the Philosophy program.

Preparation

High school students are encouraged to take four years of English and courses in the humanities and sciences.

Transfer students should contact their Advising Center or the CSU Dominguez Hills Philosophy Department to identify appropriate lower-division major/minor preparatory courses.

Graduation With Honors

An undergraduate student may be a candidate for graduation with Honors in Philosophy provided that he or she meets the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of 3.5 in all courses used to satisfy the upper-division requirements in the major;
3. Four upper-division courses, including PHI 490 Seminar, taken in the Philosophy Department.

Career Possibilities

The study of Philosophy provides students with the mental tools and skills necessary for clear thinking and analysis. This training provides students with the skills to understand the intricacies of virtually any area chosen as a basis for livelihood. For those students interested in doing graduate work in the field or in closely related fields, the major offers a well-rounded preparation for more advanced studies. Furthermore, the bachelor's degree in Philosophy provides quality preparation for advanced studies in fields such as law, medicine, and theology, among others. Our majors have found careers in business consulting, law, teaching, higher education, counseling, financial advising, public service, seminary, humanitarian organizations, and environmental organizations. Students might also consider Philosophy as a "second major," providing a balance for their primary major, be it in the humanities or the sciences.

Undergraduate Programs

Bachelor

- Philosophy, Bachelor of Arts (p. 749)

Minor

- Philosophy, Minor (p. 752)
- Religious Studies, Minor (p. 752)

Courses

PHI 101. Moral Problems. (3 Units)

The role of morals as motivations and goals in our lives. General knowledge of what values are and how they influence us on individual and societal levels. Students will construct solutions to moral problems, for example, problems of justice.
Offered Fall, Spring, All terms

PHI 102. Humanity, Nature & God. (3 Units)

Critical examination of perennial philosophical issues such as the nature of philosophy, the existence of God, free will, truth. Both Western and non-Western perspectives are discussed. Gives student general understanding of his/her societal context. Essays as well as exams.
Offered Fall, Spring

PHI 120. Critical Reasoning. (3 Units)

Introduction to methods of critical thinking including the nature of arguments, formal and informal fallacies, deductive and inductive arguments. Provides student with critical skills in both academic and non-academic context. A-C-/NC grading.
Offered Fall, Spring, Summer, All terms

PHI 201. The Good Life. (3 Units)

Prerequisite: ENG 110 is recommended. Explores philosophical approaches to the art of living. Readings will focus on ancient Greek and Roman philosophy as a way of life, along with a selection of religious and non-Western philosophies of the good life.
Offered Spring

PHI 202. The Devil You Don't Know. (3 Units)

Prerequisite: ENG 110 is recommended. The development of the idea of the Devil and related ideas such as sin, evil, temptation, and the nature of the human. Investigates the Devil in scripture, philosophy, literature, and film. Includes Jewish, Christian and Muslim sources.
Offered Fall, Spring

PHI 220. Symbolic Logic. (3 Units)

Introduction to symbolic logic and its relation to everyday language. Students study deductive and inductive reasoning, the logical content and consistency of statements, truth-functional operations, analysis of arguments for validity and invalidity, logical fallacies, and elementary quantification theory.
Offered Spring

PHI 300. Proseminar. (3 Units)

Prerequisite: 6 units in LD Philosophy or department consent. An introduction to philosophical methods, research and dialogue in order to improve students' skills at writing and analysis. Topics to be covered will address some central area or areas of philosophy and will vary from year to year.
Offered Fall, Spring

PHI 301. Ancient Greek and Roman Philosophy. (3 Units)

A critical study of the foundations of Western civilization as found in ancient Greek and Roman thought.
Offered Fall

PHI 302. Medieval Philosophies: Jewish, Christian and Muslim. (3 Units)

Offered Spring even

PHI 303. Modern Philosophy: Descartes To Kant. (3 Units)

Western thought as manifest through the evolution of the philosophical systems of Rationalism, Empiricism and Critical Philosophy.
Offered Spring

PHI 304. 19th Century Philosophy: Hegel To Nietzsche. (3 Units)

A study of nineteenth century European philosophy focusing on thinkers such as Hegel, Kierkegaard, Marx and Nietzsche.
Offered Fall

PHI 305. Contemporary Philosophy. (3 Units)

Study of contemporary American and European philosophical concepts, movements, or key figures. Specific topic indicated in class schedule. Repeatable for credit.
Offered Spring odd

PHI 308. Existentialism. (3 Units)

Prerequisites: PHI 101 or PHI 102 is recommended. Examines key existential philosophers, such as Kierkegaard, Nietzsche, Heidegger, Marcel, Sartre, de Beauvoir, and Camus. Also explored are existentialist themes in the history of philosophy, literature, poetry, and film such as Dostoyevsky, Rilke, Bergman, Kurosawa, and Woody Allen.
Offered Fall odd

PHI 316. Ethical Theories. (3 Units)

A critical inquiry into the groundwork of ethics by exploring such basic questions in ethics as the nature of good, the criteria for right action, the language of moral discourse, ontology and morality, and religion and ethics.
Offered Fall

PHI 321. The Nature of Beauty: Aesthetics. (3 Units)

A critical examination of our beliefs about the nature of beauty in the context of art, music, literature and film. Topics include artistic creativity, aesthetic experience, criticism and evaluation. Specific topic indicated in class schedule. Repeatable course.
Offered Spring even

PHI 331. Social & Political Philosophy. (3 Units)

Prerequisite: PHI 300 is highly recommended. Historical and contemporary theories on the scope and legitimacy of political authority: discussion of various contract theories of the state and of the relationships between rights of individuals and rights of states. Repeatable course.
Offered Fall odd

PHI 340. Environmental Ethics. (3 Units)

Inquiry into philosophical theories and methods that assess how humanity should relate to Earth, how we view ourselves ecologically, whether consumption practices are logical and moral. Topics include deep ecology, Eco-feminism, anthropocentric v. non-anthropocentric Ethics, animal rights and sustainability.
Offered Spring

PHI 350. Theories of Cognition. (3 Units)

Prerequisite: PHI 120 or equivalent. PHI 300 is highly recommended. This course will approach the question of mind from disciplines in humanities, sciences, and social sciences. Several standpoints such as: classical philosophy, cognitive science, neurology, computer science and artificial intelligence, cognitive ethology, and evolutionary linguistics will be discussed.
Offered Infrequent

PHI 351. Death and Dying. (3 Units)

Introduction to psychological, medical, cultural, and ethical aspects of death and dying. A cross-cultural approach to perceptions of death and dying, how and why they have changed over time, how various authors, poets, and artists represent death and dying.
Offered Fall, Spring

PHI 352. Myth as Reality. (3 Units)

Explores the nature of myth, its relationship to ritual, dream, and folktale, and its manifestations in literature and the individual. Although the course will have a primary literary focus, it will draw on the disciplines of philosophy, religious studies, anthropology, and psychology.
Offered Fall, Spring

PHI 353. Age of Revolt. (3 Units)

Investigation of the spirit of revolt in the historical period of the Spanish Conquest; the American, French, Haitian, Russian and Algerian revolutions; Black Power and Zapatista: through history, philosophy and the arts.

Offered Fall, Spring

PHI 365. Mind, World and Language. (3 Units)

A critical examination of the relation between knowledge and reality, with a particular interest in the role of language. Readings include a variety of historical and contemporary perspectives, such as analytic philosophy, pragmatism, and phenomenology.

Offered Spring even

PHI 370. Philos of Africa & Diaspora. (3 Units)

Prerequisite: PHI 300 is highly recommended. A critical study of African and afrocentric philosophies, including Bantu, Akan, and Yoruba traditions. African American philosophers such as Alain Locke and other third world African peoples are also covered in depth. Topics include personhood, time, causality, value theory, black aesthetics, and black feminist epistemologies.

Offered Spring

PHI 371. African World Religions. (3 Units)

Prerequisite: PHI 300 is recommended A critical study of traditional religious experience and expression among peoples of the African continent including the Akan, Yoruba and Ibo as well as manifestations of Christianity and Islam as expressed both in Africa and in the Americas .

Offered Fall

PHI 378. Philosophy of Religion. (3 Units)

Prerequisite: PHI 300. A critical, comprehensive study of the nature and value of religion. Includes such issues as the relationship between Religion, Philosophy, Theology, and Science; the existence of a deity, revelation(s), faith, the problem of evil, scriptural myths, and religious experience and language.

Offered Spring

PHI 379. Contemporary Moral Issues. (3 Units)

Prerequisite: PHI 300 is highly recommended. Philosophical inquiry into basic moral problems relevant today such as morality versus non-morality, human responsibility, individual versus societal values, morality versus legality, ethnic identity versus social conformity, abortion versus right to life, and the euthanasia decision. Repeatable for Credit.

Offered Fall

PHI 383. Comparative Religions. (3 Units)

Prerequisite: PHI 300 is highly recommended. A study of the relationship of the various religious perspectives of the world, their rituals, their influence on society and their philosophical implications.

Offered Fall

PHI 384. Philosophies of India, China and Japan. (3 Units)

The evolution and meaning of various non- Western traditions will be discussed. Selected topics will include Hinduism, Buddhism, Zen Buddhism, Shintoism, Confucianism. Emphasis on significance in India, China and Japan . Repeatable course.

Offered Spring

PHI 386. Analytical Methods of Biblical Study. (3 Units)

Prerequisite: PHI 300 is highly recommended. The Bible in light of modern scholarship; principles and methods of its interpretation. Emphasis is given to the Pentateuch, the Gospels, and other key portions for their philosophical and theological views.

Offered Fall odd

PHI 480. Religion and Violence. (3 Units)

Prerequisite: PHI 383 is recommended. A critical examination of fundamentalist movements in various religious traditions. Explores the intrinsic relationship among four key variables: religion, secularization, fundamentalism, and the consequences of religious fundamentalization. Finally, we will ask whether fundamentalist principles legitimate new forms of religious violence.

Offered Fall odd

PHI 490. Seminar. (3 Units)

Prerequisite: PHI 300. A critical analysis and interpretation of a major philosophical or religious system or issue in respect to its presuppositions, task, method, problems and solutions. Repeatable course. Course is writing intensive. Three hours of seminar per week.

Offered Spring

PHI 494. Independent Study. (1-3 Units)

Prerequisite: PHI 300 is highly recommended. Study of a particular philosophical or religious problem, individually or as a team or group, under the direction of a faculty member. Only three units may be used for Philosophy major and minor requirements.

Offered Fall, Spring

PHI 495. Special Topics:. (3 Units)

Prerequisite: PHI 300 is highly recommended. An intensive study of a concept, movement or individual in Philosophy. Intended for students with senior standing and having fulfilled major requirements. Specific topic listed in class schedule. Repeatable course. Three hours of seminar per week.

Offered Infrequent

PHI 580. Religion and Violence. (3 Units)

Prerequisite: PHI 383 is recommended. A critical examination of fundamentalist movements in various religious traditions. Explores the intrinsic relationship among four key variables: religion, secularization, fundamentalism, and the consequences of religious fundamentalization. Finally, we will ask whether fundamentalist principles legitimate new forms of religious violence.

Offered Fall odd

PHI 595. Special Topics:. (3 Units)

Prerequisite: PHI 300 is highly recommended. An intensive study of a concept, movement or individual in Philosophy. Intended for students with senior or graduate standing. Specific topic listed in class schedule. Repeatable course. Three hours of seminar per week.

Offered Infrequent

Philosophy, Bachelor of Arts Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Major Requirements (45 units)

The following core courses, or their approved transfer equivalents, are required of all candidates for this degree.

| Code | Title | Hours |
|--|---|-----------|
| Core Courses | | |
| PHI 120 | Critical Reasoning | 3 |
| PHI 300 | Proseminar | 3 |
| PHI 301 | Ancient Greek and Roman Philosophy | 3 |
| PHI 302 | Medieval Philosophies: Jewish, Christian and Muslim | 3 |
| or PHI 305 | Contemporary Philosophy | |
| PHI 303 | Modern Philosophy: Descartes To Kant | 3 |
| PHI 304 | 19th Century Philosophy: Hegel To Nietzsche | 3 |
| PHI 316 | Ethical Theories | 3 |
| PHI 490 | Seminar | 3 |
| Select two of the following lower division courses in the area of Philosophy or Religious Thought: | | 6 |
| PHI 101 | Moral Problems | |
| PHI 102 | Humanity, Nature & God | |
| PHI 201 | The Good Life | |
| PHI 202 | The Devil You Don't Know | |
| Options | | |
| Select five courses in one of the following Options: | | 15 |
| Philosophy Option: | | |
| PHI 308 | Existentialism | |
| PHI 321 | The Nature of Beauty: Aesthetics | |
| PHI 331 | Social & Political Philosophy | |
| PHI 340 | Environmental Ethics | |
| PHI 365 | Mind, World and Language | |
| PHI 379 | Contemporary Moral Issues | |
| Religious Thought Option: | | |
| PHI 308 | Existentialism | |
| PHI 371 | African World Religions | |
| PHI 378 | Philosophy of Religion | |
| PHI 379 | Contemporary Moral Issues | |
| PHI 383 | Comparative Religions | |
| PHI 384 | Philosophies of India, China and Japan | |
| PHI 386 | Analytical Methods of Biblical Study | |
| PHI 480 | Religion and Violence | |
| Total Hours | | 45 |

Program Learning Outcomes

1. Demonstrate knowledge of the views of some historically important philosophers (e.g., Plato, Aristotle, Kant, Nietzsche).

2. Demonstrate knowledge of the main concepts and theories of ethics (e.g., egoism, altruism, rights, duties, utilitarianism, Kantianism, virtue ethics) through the application of these concepts and theories to case studies and contemporary moral issues.

3. Identify and reflect on values and intellectual and intuitive responses to ethical issues through analysis of case studies in such areas as justice, abortion, and the impact of humans on the environment.

4. Articulate an understanding of connections between reason and feeling and between cultural and intellectual traditions.

5. Express conclusions with awareness of the degree to which these conclusions are supported by evidence.

6. Demonstrate imaginative, creative, and reflective abilities by articulating philosophical insights.

7. Present effectively in writing an extended argument on a topic of ethical importance.

8. Articulate counter-arguments to one's own position.

9. Ask questions to clarify problems further.

10. Demonstrate openness and intellectual humility by approaching situations involving a conflict of views in a spirit of inquiry.

11. Demonstrate increasing awareness of the complexity of issues and of the necessity of examining issues from many different perspectives.

Physics

College of Natural and Behavioral Sciences
Department of Physics

Program Description

Physics is the study of the natural world at its foundation. As such it is the basis of other disciplines such as biology, medicine, chemistry, computer science, geology, astronomy, and engineering. Physicists study the world from the smallest particles of matter (quarks and leptons), nuclei, atoms, and molecules; through forces and motions which determine the properties of solids, liquids, gases, and plasmas; to descriptions of the behavior of matter on all scales up to stars, galaxies, and even the origin and fate of the universe. Other researchers explore how physics itself can be learned. Physics is also

For the traditional physics baccalaureate degree, the department offers a General Physics Option, which provides access to advanced theoretical and technical careers. In addition, students may gain experience by participating in research projects (e.g. neutrino experiments, nuclear physics experiments, Physics Education Research, Nuclear Counter-Terrorism and Homeland Security, and Biophysics).

Since many physics majors find their niche in teaching, the department offers a Physical Science Option tailored to meet education standards and satisfy waiver requirements for a single subject teaching credential. The Physics faculty are committed to teaching excellence, and to teacher education in the sciences. The department provides essential laboratory hands-on experience in understanding and demonstrating science.

For students intending to pursue graduate work or employment in Electrical Engineering, the department offers an Electrical Engineering option, intended to facilitate a seamless transition after graduation. A new agreement with the CSU Long Beach's College of Electrical Engineering, through the use of the concurrent enrollment program, allows students to gain the specific skill to open their opportunities for careers in fields associated with Electrical Engineering as well as foundations to allow them to apply to Electrical Engineering graduate

programs. This partnership requires students to take 5 upper-division EE courses with the CSULB EE department starting their junior year.

The Physics Minor has flexible upper division requirements to encourage students majoring in other fields to broaden their expertise to fit a niche in contemporary technology or research. Students are invited to meet with a physics advisor to map areas of interest and expertise. The most successful physics minors distinguish themselves as mathematics majors in applied math, computer science majors in computer hardware, chemistry students in physical chemistry, music majors in electronics and instrumentation, and clinical science majors with elements of nuclear physics (modern physics).

The Physics Department offers a Master's of Science in Systems Engineering (MSSE), the first degree-granting program on the CSUDH campus. This program is designed for professionals who are interested in gaining deeper knowledge and/or training in Systems Engineering. The MSSE program at CSUDH provides students with the latest, cutting-edge skills and design methods for the realization and management of the complex, interdependent systems required to develop and maintain today's products and systems in rapidly changing environments. The curriculum balances theory with practical projects and case studies, enabling students to understand and implement applicable models to enhance and complement systems engineering activities throughout a project's life cycle.

Features

The CSUDH Physics department is the most diverse physics department in the country in terms of its faculty. We pride ourselves on our ability to utilize our diverse backgrounds and lived experiences to connect with all students in our courses and within our campus as a whole. Our full-time faculty's research represents a broad range of specialties and we welcome all physics and STEM students to join our research groups to advance the work we do locally as well as nationally. Our department is dedicated to creating a welcoming and supportive environment for all students who decide to join our major or take our courses in the pursuit of their academic goals. We are particularly in tune with the experiences of 1st generation college students, variety of socioeconomic status, educational and mathematical preparation levels, and what is often described as non-traditional students, students who come to college later in life, work full-time or have other home obligations like caretaking of family members. Our non-tenure-track faculty are highly valued and supported in the physics department. In addition to their teaching contributions, they often share their expertise and knowledge through workshops and professional development sessions in other areas of research as well as through their industry professional careers.

Another attractive feature of the department is its small class size, allowing students to interact frequently and effectively with instructors within and outside of class. It also permits instructors to easily identify students in need of additional assistance and to supply such assistance. Many of our majors work part-time in local high-tech organizations. Upper-division courses are often offered in the late afternoon or evening to make courses more accessible for these students.

Progress in this science often depends on our innovation in designing advanced experimentation to observe natural phenomena (when driven to its limits), or in computational or mathematical modeling to match a complex phenomenological response. Since new discoveries and techniques are instantly shared with the global community, the department is committed to introducing students to computer analysis

techniques and internet web literacy. Excellent computer facilities are available on campus.

We support the development of a physics identity and a physics community by encouraging our students to join and participate in our physics club, a campus-recognized student organization. Though our physics club is student-run, the department supports professional development, peer-mentoring, and social activities through the guidance of a faculty advisor.

Academic Advising

All prospective students should meet with a Physics department faculty member to learn more about the physics major and minor and to receive assistance in planning a schedule of courses. All physics majors must review their course list with a physics advisor prior to registration each semester.

Preparation

Prior to beginning, a program in physics students are required to complete two years of high school algebra, one year of trigonometry, and one year of geometry. Two years of laboratory science and four years of college preparatory English are required. Prior courses in computer programming and calculus are recommended.

Students transferring from an articulating community college should have completed three semesters of calculus (through differential and integral calculus of several variables), two semesters of calculus-based physics, and one semester of general chemistry. If those students have not had an introduction to modern physics and/or mathematical physics, they must take PHY 134: General Physics III and PHY 306 Math Methods In Physics as soon as possible upon arrival at CSUDH. Transfer students are responsible for checking in advance that their general electives will meet transfer requirements. A transfer student who has effectively completed their calculus and calculus-based introductory physics sequence is given credit for the lower division courses and should be able to complete our physics upper-division requirements in two years.

Scholarships for Full-time Physics Majors

Contact the Physics Department Office, NSM B-202, for information on available scholarships that the department offers each year.

Graduation with Honors

An undergraduate student may be a candidate for graduation with Honors in the Physics major provided he or she has fulfilled the following:

1. Has filed an approved graduation check for a B.S. in Physics during the current academic year with the General Physics, Physical Science, or Electrical Engineering option;
2. Has attained an overall CSUDH GPA of 3.35 and a GPA in the Physics major of 3.25;
3. Has or will have taken upon graduation the last 12 semester units of upper-division requirements and the last 20 units overall in residence at CSUDH. Transfer units may be included if they help the student satisfy the GPA requirements.

Departmental-Professional Organizations, and Co-curricular Activities

The CSUDH Physics Club, Society of Physics Students, and Sigma Pi Sigma (National Physics Honor Society) cooperate in offering lectures,

social programs and field trips to promote student participation in and enjoyment of the sciences. These activities are enriching and greatly enhance our students' growth within our community of scholars. In addition, faculty are often willing to sponsor inexpensive student memberships in national physics organizations that publish ongoing research in various areas of physics and engineering. The department sponsors a colloquium series with talks a few times each semester on various topics in physics and engineering.

Career Possibilities

Graduates find technical positions in industry, government, or teaching; or pursue advanced degrees for research, design, or analysis in physics, engineering or related fields. The campus is surrounded by electronics, aerospace, and semiconductor companies, among others, who hire physicists to work in applications of optics, electrical engineering, biophysics, computer science, geophysics, aerospace, and astronomy.

Undergraduate Programs

Bachelor

- Physics, Bachelor of Science (p. 756)

Minor

- Physics, Minor (p. 760)

Faculty

John W. Price, Department Chair
 Antonia Boadi, Horace Crogman, James (Jim) Hill, Ximena Cid, Miguel Rodriguez

Full-Time Staff

To Dang, Technician
 Angela Johnson, Administrative Support Coordinator

Emeritus Faculty Courses

Michael Durand, Kenneth Ganezer, H. Keith Lee, Samuel L. Wiley

Courses

PHY 100. Patterns In Nature. (3 Units)

Unifying principles of elastic, sound, light and matter waves. Models of nature. Successes and failures of wave and particle models and their synthesis. Designed for non-science students. Partially meets the lower division General Education requirement in Natural Sciences.

Offered Fall, Spring

PHY 110. Computer Methods in Applied Physics. (3 Units)

Prerequisite: MAT 151 or MAT 153. Introduction to programming with physics applications. Students will gain insight into physical phenomena. They will learn to relate theory to experiment through the use of interactive physics simulations.

Offered All terms, Spring

PHY 120. Elements Of Physics I. (4 Units)

Prerequisite: High school or college algebra. Motion, energy, waves and heat treated from a non-calculus point of view. Three hours of lecture and three hours of laboratory per week.

Offered Fall, Spring, Summer

PHY 122. Elements Of Physics II. (4 Units)

Prerequisite: PHY 120. Electricity, magnetism and light. Nuclear radiation. Quantum phenomena. Atomic structure. Three hours of lecture and three hours of laboratory per week.

Offered Fall, Spring

PHY 130. General Physics I. (5 Units)

Prerequisite: MAT 191 or concurrent enrollment. Kinematics and dynamics of particles, rigid bodies and fluids. Kinetic theory, temperature and thermodynamics. Calculus-based course. Four hours of lecture and three hours of laboratory per week.

Offered Fall, Spring

PHY 132. General Physics II. (5 Units)

Prerequisites: MAT 193 or concurrent enrollment, and PHY 130. Waves, light, electricity and magnetism. Four hours of lecture and three hours of laboratory per week.

Offered Fall, Spring

PHY 134. General Physics III. (4 Units)

Prerequisite: PHY 132 or consent of instructor. Twentieth century physics, including concepts of relativity and quantum theory and particle classification. Applications to radiation, atoms, elementary particles and nuclei. Three hours of lecture and three hours of laboratory per week.

Offered Fall, Spring

PHY 195. Selected Topics in Physics. (1-4 Units)

Prerequisites: Consent of instructor. The study of an area of Physics that is not normally available in other courses. Repeatable course.

Offered As needed

PHY 201. Experimental Methods. (3 Units)

Fabrication techniques applicable in the laboratory per week. Properties of materials. Three hours of laboratory per week.

Offered Infrequent

PHY 207. Physics W/Clin Sci App. (4 Units)

Prerequisites: High school algebra, CHE 110 and CHE 112. Electricity, magnetism and electromagnetic waves. Light, including the photon model. Laboratory emphasis on solid state devices and electronic instrumentation. Designed for students in the Clinical Sciences. Three hours of lecture and three hours of laboratory per week.

Offered Infrequent

PHY 210. Physical Science for Teachers. (4 Units)

Prerequisite: Admission to the Liberal Studies major. Designed specifically for future elementary and middle school teachers. Emphasis on the fundamental concepts of physical science and their applications. Laboratory experiments use mostly low cost everyday objects. Topics include mechanics, fluids, heat, waves, electromagnetism, light, atoms, periodic table and chemical bonding. Three hours of lecture and three hours of laboratory per week.

Offered Fall, Spring, Summer

PHY 295. Selected Topics in Physics. (3 Units)

Prerequisites: Consent of instructor. The study of an area of Physics that is not normally available in other courses. Repeatable course.

Offered As needed

PHY 302. Wrkshp Phys Sci Fr Teachr. (3 Units)

Lecture-demonstration-laboratory covering fundamental concepts in physical science, designed especially for in-service teachers (K-12). Class emphasizes on hands-on activities using everyday objects. Two hours of lecture and three hours of laboratory per week. Not for physics majors or minors. CR/NC grading.

Offered Infrequent

PHY 306. Math Methods In Physics. (3 Units)

Prerequisite: MAT 211. Application of the following techniques to physics: vectors, Gauss' and Stokes' theorems, series solutions of differential equations, Sturm - Liouville theory, and Fourier Series. Offered Fall, Spring

PHY 310. Theoretical Mechanics I. (3 Units)

Prerequisites: PHY 130, PHY 306 and MAT 211. Newtonian dynamics of one and two particles. Introduction to Lagrange's equations. Includes computer simulations. Offered Fall

PHY 320. Physical Optics. (3 Units)

Prerequisite: PHY 132 or consent of instructor. Scalar wave equations, interference and diffraction, spacial filtering, coherence and holography. Offered Spring

PHY 331. Audio Electronics. (3 Units)

Prerequisite: PHY 100 or consent of instructor. Selection and utilization of electronic components and instrumentation. Solid state circuit design and construction. Fundamental electronics through linear amplifiers, power supplies, filters and feedback. A project is required. Designed for students interested in audio techniques. Two hours of lecture and three hours of laboratory per week. Offered Infrequent

PHY 333. Analog Electronics. (3 Units)

Prerequisite: PHY 122 or PHY 132 or consent of instructor. Selection and utilization of electronic components and instrumentation. Solid state circuit design and construction. Amplifiers, feedback techniques, operational amplifiers, SCRs, FETs, etc. A project is required. Two hours of lecture and three hours of laboratory per week. Offered Fall, Spring

PHY 335. Digital Electronics. (3 Units)

Prerequisites: PHY 122 or PHY 132 or consent of instructor is required, PHY 333 is recommended. Design and use of systems employing digital integrated circuits. Gates, Boolean algebra, combinatorial and sequential design. Multiplexers, flip-flops, shift registers, ALUs and memories. Two hours of lecture and three hours of laboratory per week. Offered Spring

PHY 337. Microprocessors. (3 Units)

Prerequisite: PHY 335 or consent of instructor. Architecture, programming and interfacing of microcomputers. Input/output, instruction sets, subroutines, interrupts, serial communications and process control. Two hours of lecture and three hours of laboratory per week. Offered Infrequent

PHY 339. Instrumentation. (3 Units)

Prerequisite: PHY 333. Measurement techniques, transducers, noise reduction, signal processing in the analog and digital domains. Computer controlled instrumentation and data acquisition. Bus configurations and interfacing. Two hours of lecture and three hours of laboratory per week. Offered Infrequent

PHY 341. Advanced Laboratory. (2 Units)

Prerequisites: PHY 132 (or 122) and 333. Advanced experimental work, including data acquisition and error analysis techniques. Experiments are taken from several of the major areas of physics, such as optics and spectroscopy, solid state, acoustics, nuclear physics and electronics. Course may be repeated for credit with instructor's approval. One hour of lecture and one three hours laboratory period per week. Offered Spring

PHY 346. Thermal Physics. (3 Units)

Prerequisites: PHY 130 and MAT 211. Laws of thermodynamics. Equations of state, entropy, free energies, kinetic theory and concepts of statistical physics. Offered Spring

PHY 350. Electromagnetic Theory I. (3 Units)

Prerequisites: PHY 132, PHY 306 and MAT 211 are required; MAT 213 is recommended. Electro- and magnetostatics. Electromagnetic properties of matter, Faraday's law of induction, direct and alternating currents. Includes computer simulations. Offered Fall

PHY 352. Electromagnetic Theory II. (3 Units)

Prerequisite: PHY 350. Derivation and applications of Maxwell's equations in vacuum and material media. Electromagnetic radiation. Includes computer simulations. Offered Spring

PHY 356. Astrophysics. (3 Units)

Prerequisites: PHY 132 and PHY 134. Quantitative study of stellar astronomy with emphasis on stellar evolution and cosmology. Includes computer simulations. Offered Spring even

PHY 380. Non-Linear Phenomena. (3 Units)

Prerequisites: MAT 311 or PHY 306; PHY 310 recommended. Linear systems, iterated maps, differential flows, conservative systems, routes to chaos, strange attractors, fractals, coherent structures, and pattern formation. Visits to computer lab will be included. Offered Spring

PHY 395. Selected Topics in Physics. (1-4 Units)

Prerequisites: Consent of instructor. The study of an area of Physics that is not normally available in other courses. Repeatable course. Offered As needed

PHY 460. Quantum Mechanics I. (3 Units)

Prerequisites: PHY 134, PHY 306 and MAT 211. Quantum phenomena; postulates and interpretation; Schroedinger's equation in one, two and three dimensions. Applications to atoms and barrier penetration. Offered Fall

PHY 462. Quantum Mechanics II. (3 Units)

Prerequisite: PHY 460. Spin, identical particles. Applications of quantum mechanics to problems of current interest in physics, such as solid state, nuclear, astrophysics and particle physics. Offered Spring odd

PHY 494. Independent Study. (3 Units)

Prerequisites: Upper division standing and completion of an independent study contract are required. A reading program on a specialized topic in Physics under the supervision of a faculty member. Repeatable course. Offered Fall, Spring

PHY 495. Selected Topics Physics. (3 Units)

Prerequisites: Upper division standing and consent of instructor. The study of an area of Physics that is not normally available in other courses. Repeatable course. Offered As needed

PHY 498. Directed Research. (1-3 Units)

Prerequisites: Upper division standing and consent of instructor. Advanced laboratory work in an area related to physics or instrumentation. The student participates in an independent investigation under faculty supervision. Repeatable course. Three to nine hours of laboratory per week. Offered Fall, Spring

PHY 595. Special Topics in Physics. (1-4 Units)

Prerequisite: Consent of instructor. Advanced course of special interest to graduate students. Topic and content will vary as announced.
Offered As needed

Physics, Bachelor of Science

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major, no minor required.

Major Requirements (75-80 units)

Students must select one of the options listed. The following courses, or their approved transfer equivalents, are required of all candidates for this degree. All courses used to satisfy this major must be passed with a grade of "C" or better.

Each student must select one of the options listed.

Electrical Engineering Option (77 units)

The Electrical Engineering Option provides a broad understanding of physical principles and a solid preparation for advanced study in electrical engineering as well as theoretical and experimental physics including problem-solving. This option should be undertaken by those planning on pursuing continued studies towards an advanced degree in electrical engineering or other fields within engineering, physics, or related fields as well as careers as a technical staff member in a government or industrial lab. By virtue of an agreement with the CSU Fullerton College of Electrical Engineering and Computer Science, this option satisfies all of the course requirements for admission to an MS program in electrical engineering at CSU Fullerton.

| Code | Title | Hours |
|------------------------------------|---------------------|-------|

| PHY 494 | Independent Study | |
| PHY 498 | Directed Research | |
| EE 498 | 1 | |

Total Hours **77**

¹ Taken in the Electrical Engineering department at CSU Fullerton.

Note: This option requires taking 11-13 units of electrical engineering courses at CSU Fullerton during regular or summer sessions through concurrent enrollment while a student at CSUDH. Advising for the Electrical Engineering option will be provided by CSUDH as well as CSU Fullerton.

General Physics Option (78-79 units)

The General Physics Option provides a broad understanding of physical principles and a solid preparation in both theoretical and experimental problem-solving in physics. This option should be chosen by students planning a technical career in industry or government laboratories, or planning to continue study toward an advanced degree in physics, engineering or a related field. PHY 306 Math Methods In Physics should be taken as early as possible in preparation for the upper division courses in Physics.

| Code | Title | Hours |

| Total Hours | | 75-76 |

¹ Consult with a physics advisor to choose classes consistent with the requirements for the subject matter preparation program in physical science.

Program Learning Outcomes

- Demonstrate understanding of classical mechanics
- Demonstrate understanding of classical electromagnetism
- Demonstrate understanding of basic quantum mechanics
- Demonstrate understanding of thermal physics
- Demonstrate understanding of classical optics
- Demonstrate understanding of analog electronics
- Demonstrate understanding of modern physics experiments

Political Science

College of Natural and Behavioral Sciences
Department of Political Science

Program Description

The Political Science Program at CSU Dominguez Hills offers excellent opportunities for the study of government and politics.

Over 30 courses cover all the major aspects of the discipline. Students develop an understanding of human behavior as it relates to politics. They learn to discuss and analyze critically current public policy issues facing the United States and the world. They are taught how to critically observe and understand world affairs and comparative politics. They

are trained in appropriate research techniques for the study of political processes.

The General Political Science Concentration is a relatively "open" one, allowing students to choose from a wide range of courses and subjects within a general framework. It is designed for students seeking broad exposure to the diverse subjects of the discipline.

A five-course minor in political science also is available. While the minor most often is used in conjunction with such majors as communications, human services, history, economics, and sociology, it can be paired with almost any major offered at this university.

Features

The political science faculty is an interesting and diverse group of scholars actively involved in their own research projects. Most have traveled extensively in this country and abroad.

Political science internships are available. One opportunity at the state level is the Sacramento Semester Program, which brings students from all 23 California State University campuses to Sacramento for one semester to take advantage of a unique learning experience at the State capital. Another is The Washington Center program in the nation's capital. Through the International Education Center, students can participate in study abroad programs. The Lyman G. Chaffee Endowment includes, in addition to a \$1.5 million Chair of Global and Comparative Politics, includes \$100,000 to fund political science studies abroad. The Department of Political Science is classified as an "Engaged Department" for outstanding work in the community. This classification is granted by the campus office of community engagement (Center for Service Learning, Internships, and Civic Engagement).

The department offers annually the Lori Cardenas Memorial Scholarship and Michael O'Hara Memorial Scholarship to outstanding students majoring in political science, sponsors the active Association of Political Science Students and participates in Model United Nations conferences.

Students who work during the day should know that class scheduling permits the completion of a political science major in the late afternoon and evening hours.

Academic Advisement

Political Science faculty recommend that new and continuing students visit the department for information regarding graduation requirements, transfer of credit, program planning, lifting of academic holds, and graduation approval. Student records and graduation change of major, add/drop, and other forms are kept in the department office.

Students needing assistance for more specialized interests should see specific faculty members for supplementary academic advising. For prelaw preparation contact Salvatore Russo; for internship opportunities, see Salvatore Russo; for American politics see Jay Kaplan, Salvatore Russo or Annie Whetmore, and for international and comparative politics see the chair of the department.

Preparation

High school students are encouraged to take English composition and social science courses, including civics, economics and history. Experience in journalism, debating activities, and student government are helpful. A foreign language is not required for the degree. However,

students who plan further study at the graduate level are encouraged to take a foreign language.

Community college transfer students should contact their counseling office or the CSU Dominguez Hills Political Science office to identify appropriate lower division major/minor preparatory courses. Typically, these would include a basic course in American political institutions, which would fulfill the state code requirements for U.S. Constitution and California state and local government. Transfer students must take POL 300 (Quantitative Methods of Political Analysis) at CSUDH as community colleges do not offer an equivalent course. Other lower-division courses introducing students to the discipline of political science, international relations and comparative politics also are highly recommended.

Students at CSU Dominguez Hills should complete both POL 100 General Education Political Science: World Perspectives and POL 101 American Institutions as a preparation for the major.

Career Planning

Graduates with Political Science majors or minors from CSUDH have pursued a broad variety of careers. These include teaching, law, law enforcement, public administration, business, journalism, and international service. CSUDH graduates, including those with advanced graduate and law degrees, are employed as attorneys, public administrators, business executives, and teachers in schools and universities. Others work as labor union officials and a few have been elected to public office. Graduates from our program are employed both within and outside the United States.

The best undergraduate education for all careers develops critical thinking, communication, and research skills. Course work and extra-curricular activities such as participation in Model United Nations conferences, writing for the campus newspaper and experiential internships will improve these skills. Some professions require graduate or law school training after the Bachelor's degree. Faculty advisers in the department will help you select the courses and an academic programs most appropriate for your career goals. They also will explain interesting extracurricular opportunities supported by the department.

Teaching

An undergraduate degree in Political Science is recommended for entrance to graduate school in Political Science, with the doctorate essential for teaching at the four-year college or university level. Students may prepare for a career in teaching History/Social Science at the secondary level (junior high or high school) by completing an approved "Subject Matter Preparation Program." Completion of such a program is the first step in meeting the state requirements for a teaching credential.

As the program requirements for the "Subject Matter Preparation Program" in Social Science have changed recently, interested students should contact the History Department for current information.

Law

Many Political Science majors intend to practice law as a career.

We advise pre-law students to select the General Political Science Concentration and work closely with a pre-law adviser who will explain law school undergraduate preparation, entrance requirements, school choice, and career possibilities.

Public Administration

A major in Political Science with a public administration or public policy emphasis can prepare students for civil service careers at international, national, and local levels of government. These careers require both specialized skills and a general understanding of political processes. The General Political Science Concentration, internship experience, and possibly graduate training are recommended for those interested in public administration.

Journalism

A Political Science major can prepare students for an attractive career in journalism. The General concentration along with practical experience working on the university newspaper is highly recommended.

Business

Many Political Science graduates have found employment in business. Preparation for this career involves a broad liberal arts background, combined with knowledge of governmental processes and organization, public administration, finance, decision-making, organizational behavior, and the processes by which political decisions are made about economic policy. Political Science majors interested in business should consider selecting a business minor.

Other

Enterprising individuals can use their Political Science degree to pursue a variety of interests in the field of politics. These include international and foreign service as well as political campaign management, speech writing, survey research, policy research, public relations, lobbying, fundraising, and so forth. Opportunities result from the initiative of the individual, proper skill development, and academic advising. All students should regularly discuss their academic and career plans with faculty advisers and fellow students, including members of the Association of Political Science Students. The Association maintains a small library of materials on career and internship opportunities, law and graduate school catalogs, and courses texts.

Graduation With Honors

An undergraduate student may be a candidate for graduation with Honors in Political Science provided the student meets the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of at least 3.5 in all courses used to satisfy the upper-division requirements in the major.

Undergraduate Programs

Bachelor

- Political Science, Bachelor of Arts (p. 765)

Minor

- Political Science, Minor (p. 770)

Faculty

Salvatore Russo, Department Chair

Hyo Joon Chang, David Dixon, Christopher Hallenbrook, Yea Ji Kim,

Hamoud Salhi, Annie Whetmore

Department Office: SBS G-322, (310) 243-3435

Emeriti Faculty

Alan Fisher, Linda Groff, Jay Kaplan, Wayne Martin, Richard Palmer

Courses

POL 100. General Education Political Science: World Perspectives. (3 Units)

An introduction to world affairs and the role of the individual in an increasingly complex and interdependent international system. Both the conceptual and practical aspects of problem solving and decision making are examined as they relate to international cooperation and conflict.

Offered Fall, Spring

POL 101. American Institutions. (3 Units)

A study of contemporary political institutions, with emphasis on the philosophy, structure, and behavior of the American political system, including the State of California. Meets State requirement in U.S. Constitution and California State and Local government.

Offered Fall, Spring

POL 300. Research Design in Political Science. (3 Units)

The first course of a two-course sequence - POL 300 and POL 301 - that examines the fundamentals of research design in political science. Satisfies Graduation Writing Assessment Requirement (GWAR). A grade of C or better in this course fulfills the GWAR requirement for all Political Science and Behavioral Science majors and minors.

Offered Fall, Spring

POL 301. Statistical Analysis in Political Science. (3 Units)

Prerequisite: POL 300 is required. Focuses on introducing students to elementary statistical techniques and their applications to problems in Political Science.

Offered Fall, Spring

POL 304. Basic Concepts of Law: Substantive. (3 Units)

An examination of conflict situations which arise in contemporary life and the way in which the law and legal institutions address these conflicts. Statutory law and common law will be studied with an emphasis on case analysis, torts, crimes, property, contracts, and landlord-tenant.

Offered Infrequent

POL 305. Basic Concepts of Law: Procedural. (3 Units)

A basic course in understanding the legal system with a focus on basic procedural law. Emphasis will be placed on civil procedure, evidence, and litigation, probate and corporation, partnership and agency.

Offered Infrequent

POL 310. Current Issues in American Government. (3 Units)

Analysis and critical evaluation of recent major issues, conflicts and problems in American government and institutions. Current issues might include social and health services, energy, environment, multinational corporations, military spending, taxation, political economy, criminal justice, and civil rights.

Offered Fall, Spring

POL 312. State and Local Government: Organization and Problems. (3 Units)

Analysis of functions of state and local government with particular emphasis on California. Examination of state-federal and state-local relations and the policy choices available for solving current problems. The course meets the statutory requirement for state and local government.

Offered Fall, Spring

POL 314. American Political Parties and Elections. (3 Units)

A study of the dynamics of American political behavior, including the legal regulation of parties and of elections. Analysis of voting behavior and public opinion. Study of political party organization, membership, and leadership in the context of the contemporary political scene.

Offered Fall, Spring

POL 315. Congress and the President. (3 Units)

An analysis of development and operation of the elected decision-making structures of the United States government. Particular focus on the interrelationships between the Congress and the President.

Offered Fall, Spring

POL 318. Public Policy Choices: Distribution of Wealth. (3 Units)

A study of wealth and redistribution, including the causes and consequences of inequalities in the United States and other countries. Considers how economic inequality affects citizens' participation in political activities, interest groups, political parties, social movements, and civic associations.

Offered Fall, Spring

POL 319. Horror and Politics. (3 Units)

Prerequisite(s): POL 101 required. Co-requisite(s): POL 315 recommended. In addition to scene of terror, many times horror films deliver political commentary. What do horror films say about the times in which they were created, as well as our own time? This course will explore these issues and more.

Offered Fall

POL 320. Urban Government and Policy Choices. (3 Units)

A survey of the structures of American municipal, county, and special districts within the context of a systematic evaluation of the public policy choices facing these units of government.

Offered Fall, All terms

POL 323. Black Politics. (3 Units)

An analysis of the structure of power within the Black community and political interaction between activists, moderates, and conservatives. Evaluation of styles within the Black sub-political culture and manipulative aspects and tactics; e.g., coalition, confrontation, establishment politics.

Offered Fall

POL 325. Women and Politics in the United States. (3 Units)

Examination of the expansion across time of women's rights in the United States. Considers the limitation of rights, feminist movements/theory, and ongoing problems. Also examines roles of specific women who have lead movements and/or pushed for legal change.

Offered Spring

POL 328. Cultural Pluralism in American Politics. (3 Units)

Discusses the issues of political socialization and cultural differences in the American political arena. Analyzes the political orientations of various ethnic groups in the United States, their cultural and socioeconomic backgrounds, and their levels of political participation and interaction with American political institutions.

Offered Infrequent

POL 331. International Terrorism. (3 Units)

Analysis of the concept of terrorism, root causes and forms. Examination of theories and counter-terrorism strategies at different levels of analysis; individuals, groups, societal, states and transnational. Special emphasis on specific terrorism cases, terrorist organizations and cyber-terrorism in the Digital Age.

Offered Fall

POL 332. International Security. (3 Units)

Analysis of the theory and practice of international conflict, crisis, and war management. Special emphasis on the contemporary concerns of deterrence, limited war, guerrilla warfare, foreign commitments, arms races, and arms control.

Offered Fall, Spring

POL 333. International Relations of East Asia. (3 Units)

Analysis of contemporary international relations of East Asia, including the rise of China, its affects on US-China relations and implications in the region concerning foreign policy issues for countries such as Japan, North and South Korea, Vietnam, Indonesia, and Thailand.

Offered Spring

POL 334. American Foreign Policy. (3 Units)

The formulation and execution of foreign policy in the United States, including an analysis of competing ideological concepts, the role of President and Congress, and the influence of public opinion.

Offered Fall, Spring, All terms

POL 335. Introduction to International Relations. (3 Units)

Introduction to international relations. Students will learn theories, concepts, principles and practices of international politics. Topics include war/peace, international political economy, and international institutions. Global issues such as terrorism, human rights, environment, and global health will also be examined.

Offered Fall, Spring

POL 336. Theories of International Relations. (3 Units)

Analysis of action and interaction of states, decision-making, capability analysis, balance and imbalance, systems analysis, communication, crisis, and game theory.

Offered Fall, Spring

POL 337. European International Relations. (3 Units)

An analysis of European international relations and foreign policies including the impact of Western European economic integration, the foreign policies of the Russian Commonwealth with Eastern and Western Europe, and the changing role of NATO.

Offered Infrequent

POL 339. Model United Nations. (3 Units)

Examination of the role of international organizations and the issues addressed by these international actors while preparing students to participate in intercollegiate Model United Nations simulations. May be repeated for credit to a maximum of 9.0 units.

Offered Infrequent

POL 340. Introduction to Comparative Politics. (3 Units)

Study of domestic politics in different regions of the world by focusing on topics, such as economic development, democratization and regime change, political institutions, income redistribution, and political representation.

Offered Fall, Spring

POL 341. Gov and Politics of East Asia. (3 Units)

China, Japan, and Korea : political behavior, ideas, and institutions of societies of East Asia. Political parties and organizations, role of competing ideologies and systems of behavior, interaction of domestic and foreign policies.

Offered Fall, Spring

POL 342. Government and Politics of the Middle East. (3 Units)

Analysis and explanation of political processes, governments, political issues and foreign relations of the Middle East. Discussion of influence of religion, oil, revolutions and conflicts on Middle East politics.

Offered Fall

POL 343. Political Behavior in Latin America. (3 Units)

Analysis of political and cultural behavior in South America with a focus on Brazil, Argentina, Chile, Peru, Colombia, and Venezuela. Their sociopolitical institutions, elites, and interest groups; and the impact of national and cross-national cultural pluralism upon political life in the region.

Offered Fall, Spring

POL 344. Latin America: The Revolutionary Tradition. (3 Units)

A comparative analysis of the revolutionary process in Mexico, Central America and Cuba, encompassing the dimensions of the socio-political, cultural and economic characteristics. An emphasis on post-revolutionary developmental politics in Mexico, Nicaragua, Cuba, and on the current social unrest in Central America, including an analysis of ideas, institutions, groups and economic conditions.

Offered Fall, Spring

POL 345. Democratization. (3 Units)

Students examine the basic principles, theories, and comparative methods useful for understanding the challenges of democracy and democratization and provides insights into the range of practical policy recommendations which could be adopted to strengthen the process of democratic governance.

Offered Fall, Spring

POL 347. Comparative Political Parties. (3 Units)

For more than a century, democratic politics has been synonymous with party politics. This class provides an understanding of the origins or parties and party systems, the reasons for their successes and failures, and their impact on political outcomes.

Offered Fall, Spring

POL 349. Government and Politics in Sub-Saharan Africa. (3 Units)

A study of the dynamics of government and politics in Africa south of the Sahara Desert with special emphasis on South Africa. Imperialism and colonial administration, nationalism, and decolonization treated as background to the problems of modernization and nation-building in the region.

Offered Fall, Spring

POL 350. History of Political Ideas. (3 Units)

A critical analysis of the major political philosophies and schools of thought from Plato to the sixteenth century. Examination of the political concepts of Plato, Aristotle, St. Augustine, St. Thomas Aquinas, and Machiavelli.

Offered Fall, Spring

POL 351. Modern Political Thought. (3 Units)

A study of principal political philosophers from the seventeenth century to the present. Special emphasis is given to writers such as John Stuart Mill and Karl Marx, whose concepts of political criticism have become predominant in the modern world.

Offered Spring

POL 352. Democratic Theory. (3 Units)

A comprehensive examination of the theory and practice of democracy. Students engage with various theoretical justifications for democracy, analyzing the various understandings of its strengths and weaknesses. Using these theories, students examine the various forms of democracy historically and globally.

Offered Spring

POL 354. American Political Thought. (3 Units)

A critical analysis of the political ideas that have emerged within the United States. Special attention is given to twentieth century political theories that aim to achieve social justice and/or alternative life styles through a restructuring of the economy.
Offered Fall, Spring

POL 355. Politics and Political Theory through Film. (3 Units)

Focuses on political theory and politics as presented through film. Students examine the various ways artists critique existing political and social structures, provide alternative visions, and challenge audiences to rethink their unexamined assumptions regarding human existence.
Offered Fall

POL 356. Political Theory and Science Fiction. (3 Units)

Explores how science fiction has explored perennial questions of political theory. Students engage with the books, films, and TV shows of the genre, and how they challenge existing political structures and develop alternative visions.
Offered Fall

POL 357. Food Politics. (3 Units)

Explores the political, social, and ethical concerns surrounding food and food culture. Topics examined include: the ethics of consumption, food media, cultural appropriation, and race, identity and the representation in the restaurant industry.
Offered Fall

POL 360. American Constitutional Law: Distribution of Power. (3 Units)

An examination of the nature and development of the United States constitutional system. Emphasis on the role of the courts in interpreting the concepts of separation of powers, federalism, the police power, and the commerce clause.
Offered Spring

POL 361. American Constitutional Law: Civil Rights. (3 Units)

A study of fundamental rights as protected by the U.S. Constitution and other legal provisions. The role of the courts in interpreting freedom of expression and conscience, due process, and equal protection of the laws.
Offered Fall

POL 366. Criminal Law and Procedures. (3 Units)

Materials and cases treating Criminal Law and procedures within the context of the American policy. Systematic analysis of the role of the citizen in relationship to operational legal principles and procedures of Criminal Law. An emphasis on contemporary problems and recent court decisions.
Offered Infrequent

POL 370. Public Opinion and Propaganda. (3 Units)

The nature of public opinion and its manipulation by propaganda in modern society. Relations between government and other social institutions and the opinions of groups and individuals; the press, pressure groups.
Offered Spring

POL 371. Conflict, Violence, Nonviolence and Peace. (3 Units)

Examination of relevant theories and instances of aggression, sociopolitical conflict and conflict resolution, various types of political violence (as terrorism, revolution, urban riots) and nonviolence. Course will present an overview of all these topics, or focus on one topic in detail, such as terrorism, revolution, or nonviolence.
Offered Fall, Spring

POL 372. International Institutions. (3 Units)

Prerequisite(s): POL 335 required. An examination of the theories and practices of international institutions. The origins, structures, functions, and effectiveness of international institutions will be discussed. Major issues include war and conflict, global economy, environment, human rights, and global health.
Offered Fall

POL 373. International Political Economy. (3 Units)

An examination of the theoretical approaches to the study of international political economy and contemporary issues in the global economy. Major topics include international trade, international finance, economic development, multinational corporations, and globalization.
Offered Fall, Spring

POL 374. International Human Rights. (3 Units)

Prerequisite(s): POL 335 required. An examination of the historical evolution and practices of human rights in world politics. Emphasis on the dynamic interaction between governments, and international and domestic human rights institutions. The topics include political rights, torture, refugees, racism, environment, and women's rights.
Offered Fall, Spring

POL 375. Technical Policy and the Future. (3 Units)

Various humanistic, ethical, legal, and political-economic policy issues surrounding the use and future development of technology, in such areas as energy, food production, transportation, computers, communications, electronic surveillance, medicine, weaponry, and space. The issue of high technology vs. appropriate technology also global restructuring trends from technological change. Course will focus on one or more such technological topics depending upon the instructor.
Offered Infrequent

POL 380. Mock Trial I. (3 Units)

Students will be taught the basics of how to present a case in a simulated trial environment. Students will create opening and closing statements, and cross-examinations and direct examinations. Students will have the opportunity to participate as witnesses. Upper division status is recommended or consent of instructor is required.
Offered Infrequent

POL 401. Political and Public Sector Leadership. (3 Units)

Prerequisite: 12 units of upper division courses are required. This is an applied techniques, skills-development course. It blends ideas from several different sectors of political theory, public policy, public relations, conflict negotiation, and intercultural communication to teach students skills that are necessary for leadership roles.
Offered Spring

POL 494. Independent Study. (1-3 Units)

Prerequisites: Consent of instructor and department chair. Independent study of a particular problem under the direction of a member of the Political Science Department. Course is not repeatable for credit in the Political Science major or minor.
Offered Fall, Spring

POL 495. Special Topics in Political Science. (1-3 Units)

An intensive study of an issue or a concept in political science that is of special interest to both the faculty member and the students. Repeatable course. Three hours of seminar per week.
Offered Fall, Spring

POL 496. Internships in Political Science. (3 Units)

Practical application of coursework in political science through supervised work and field experience in politics, government administration, public and private paralegal agencies such as offices of lawyers and judges, and community agencies. Repeatable course. Offered Fall, Spring

POL 498. Directed Research. (1-3 Units)

Prerequisite: Consent of instructor. The student develops and completes an individual study under faculty supervision. Repeatable course. Offered Infrequent

Political Science, Bachelor of Arts Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major, no minor required.

Major Requirements (45 units)

The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

| Code | Title | Hours |
|---|---|-----------|
| Core Requirements | | |
| 1. Research Methods ¹ | | 6 |
| POL 300 | Research Design in Political Science | 3 |
| POL 301 | Statistical Analysis in Political Science | 3 |
| 2. Cornerstone Requirements. Take one course from each area of Political Science as follows: | | 12 |
| a. American Government | | |
| POL 315 | Congress and the President | |
| b. International Relations | | |
| POL 335 | Introduction to International Relations | |
| c. Comparative Politics | | |
| POL 340 | Introduction to Comparative Politics | |
| d. Political Theory | | |
| POL 350 | History of Political Ideas | |
| 3. Depth in Political Science | | 12 |
| Select one course from each group a through d below | | 12 |
| a. American Government, Law and Politics | | |
| Select one course from the following; | | |

| | |
|---------------------------------------|---|
| POL 310 | Current Issues in American Government |
| POL 312 | State and Local Government: Organization and Problems |
| POL 314 | American Political Parties and Elections |
| POL 325 | Women and Politics in the United States |
| POL 360 | American Constitutional Law: Distribution of Power |
| POL 361 | American Constitutional Law: Civil Rights |
| POL 370 | Public Opinion and Propaganda |
| b. International Relations | |
| Select on course from the following: | |
| POL 332 | International Security |
| POL 334 | American Foreign Policy |
| POL 372 | International Institutions |
| POL 373 | International Political Economy |
| c. Comparative Politics | |
| Select one course from the following: | |
| POL 341 | Gov and Politics of East Asia |
| POL 342 | Government and Politics of the Middle East |
| POL 343 | Political Behavior in Latin America |
| POL 344 | Latin America: The Revolutionary Tradition |
| POL 345 | Democratization |
| POL 347 | Comparative Political Parties |
| d. Political Theory: | |
| Select one course from the following: | |
| POL 319 | Horror and Politics |
| POL 351 | Modern Political Thought |
| POL 352 | Democratic Theory |
| POL 354 | American Political Thought |
| POL 355 | Politics and Political Theory through Film |
| POL 356 | Political Theory and Science Fiction |
| POL 357 | Food Politics |

Concentrations

| | |
|--|---|
| American Government, Law and Politics Concentration | 45 |
| A. Common Core | |
| See all "Common Core" requirements above | |
| B. Required Courses | |
| Select three courses from the following (9 units) | |
| POL 310 | Current Issues in American Government |
| POL 312 | State and Local Government: Organization and Problems |
| POL 314 | American Political Parties and Elections |
| POL 325 | Women and Politics in the United States |
| POL 360 | American Constitutional Law: Distribution of Power |
| POL 361 | American Constitutional Law: Civil Rights |
| POL 370 | Public Opinion and Propaganda |
| C. Upper-division Electives (6 units) | |
| Select two additional upper-division political science courses with departmental advisement. Also see "Political Science Electives" below. | |
| International Relations and Comparative Politics Concentration | 45 |
| A. Common Core (30 units) | |
| See all "Common Core" requirements above. | |
| B. Required Courses (12 units) | |

Select four courses from the following IR/CP courses. Courses chosen for Depth in Political Science may not be double-counted for the concentration.²

| | |
|---------|--|
| POL 332 | International Security |
| POL 333 | International Relations of East Asia |
| POL 334 | American Foreign Policy |
| POL 336 | Theories of International Relations |
| POL 337 | European International Relations |
| POL 339 | Model United Nations |
| POL 341 | Gov and Politics of East Asia |
| POL 342 | Government and Politics of the Middle East |
| POL 343 | Political Behavior in Latin America |
| POL 344 | Latin America: The Revolutionary Tradition |
| POL 345 | Democratization |
| POL 347 | Comparative Political Parties |
| POL 372 | International Institutions |
| POL 373 | International Political Economy |
| POL 374 | International Human Rights |

C. Upper Division Electives (3 units)

Select one additional upper-division Political Science course with departmental advisement. Also see "Political Science Electives" below.

Political Theory Concentration 45

A. Common Core (30 units)

See all "Common Core" requirements above.

B. Upper-division Required Courses (9 units)

Select three courses from the following Political Theory courses. Courses chosen for Depth in Political Science may not be double-counted for the concentration.

| | |
|---------|--|
| POL 319 | Horror and Politics |
| POL 351 | Modern Political Thought |
| POL 352 | Democratic Theory |
| POL 354 | American Political Thought |
| POL 355 | Politics and Political Theory through Film |
| POL 356 | Political Theory and Science Fiction |
| POL 357 | Food Politics |

C. Upper-Division Electives (6 units)

Select two additional upper-division political science courses with departmental advisement. Also see "Political Science Electives" below.

General Political Science Concentration 45

A. Common Core (30 units)

See all "Common Core" requirements above.

B. Upper-division Electives (15 units)

Select five additional upper-division political science courses with departmental advisement (15 units). Courses chosen for Depth in Political Science may not be double counted for the concentration. Also see "Political Science Electives" below.

Political Science Electives

Any upper-division Political Science course, including from any concentration above, may count as an elective for degree satisfaction, with the following exceptions.

Other Elective Courses

Availability of "other" elective courses varies. See the schedule of classes and/or consult with the department chair about availability.

| | |
|---------|---|
| POL 304 | Basic Concepts of Law: Substantive |
| POL 305 | Basic Concepts of Law: Procedural |
| POL 318 | Public Policy Choices: Distribution of Wealth |
| POL 320 | Urban Government and Policy Choices |
| POL 323 | Black Politics |
| POL 328 | Cultural Pluralism in American Politics |
| POL 331 | International Terrorism |
| POL 349 | Government and Politics in Sub-Saharan Africa |
| POL 366 | Criminal Law and Procedures |
| POL 371 | Conflict, Violence, Nonviolence and Peace |
| POL 375 | Technical Policy and the Future |
| POL 401 | Political and Public Sector Leadership |
| POL 494 | Independent Study |
| POL 495 | Special Topics in Political Science |
| POL 496 | Internships in Political Science |

- Courses counted towards the Common Core or as upper-division required courses within any concentration may not also be counted as electives for degree satisfaction (no double-counting of any course is allowed).
- Only one POL 494 (independent study) course may be counted as an elective for degree satisfaction.
- POL 495 (variable subject) courses may be counted more than once only if the subject matter of any subsequent course taken is significantly different than the first POL 495 course counted as an elective for degree satisfaction. Consultation with the department chair is advised.
- A maximum of two POL 496 (internship) courses may be counted as electives for degree satisfaction.

¹ POL 300 must be completed by the student within the first two semesters of taking any upper-division course for the major. POL 301 should be completed as soon as possible thereafter, preferably in the semester following successful completion of POL 300. POL 300 and POL 301 may not be taken concurrently. POL 300 is a prerequisite for POL 301.

² POL 33X courses and POL 37X courses in this section are International Relations courses and POL 34X courses are Comparative Politics courses. However, the chosen four courses may come from either area or any combination of the two.

Pre-Health Professions Program

College of Natural and Behavioral Sciences

Examples of Health Professions

- Chiropractic
- Dentistry
- Medicine (MD, DO, ND)
- Optometry
- Physician Assistant
- Pharmacy
- Podiatry
- Veterinary Medicine
- Physical Therapy

Program Description

An important component of the CSUDH undergraduate curriculum is the preparation of students for medicine and other health professional programs, e.g. dentistry, pharmacy, veterinary medicine, physician assistant, etc. This preparation can include a major in the sciences as well as a major in other disciplines, e.g. music, history, English, etc. In fact, a "well rounded" education is viewed very favorably by many health professional school admissions committees, so for even those who major in a science, it is important to obtain a broad liberal arts education by taking electives in the humanities, fine arts and social and behavioral sciences. However, it must be recognized that majoring in a non-science discipline does require completing, and doing well, in the science courses that are pre-requisites for admissions to the health professional schools.

Since many of the professional health schools (e.g. medicine, dentistry, pharmacy, optometry, podiatry) require similar courses as requirements for admissions, this sheet describes the basic CSUDH courses for many "pre-health professional" programs. Generally, the requirements for these health professional schools include one-year lecture and laboratory in general chemistry, organic chemistry, physics and general biology. In addition, health professional schools may require or recommend additional courses in math, cell biology, genetics and biochemistry.

To reiterate, students **must** meet these prerequisites, in addition to those courses of their major.

Students who already have a bachelor's degree in an area other than the sciences may, of course, fulfill the minimum requirements for entrance into these health schools by completing the core requirements through a post-baccalaureate course of study.

Faculty in the sciences, i.e. biology, chemistry and physics often teach the required courses; importantly, CSUDH, students taking these courses benefit from small class size, close instructor contact and active advising programs.

Academic Advising

Regardless of their major, pre-professional health students should be advised by a campus Pre-health Advisor, who has knowledge of the admission requirements of the health professional schools so as to assist them best in meeting the entrance requirements for the professional school/program.

Since the entrance requirements vary, it is important that the student works with the advisor to determine the specific requirements of each school to which they plan to apply. Notably, Community College transfer students often complete some of the lower division prerequisite courses required at their community college. However, they should consult with the Pre-health advisor, the Advising Center and the University Catalog relative to articulation agreements.

Drs. Thomas Landefeld, from the biology department, and Patrick Still, from chemistry, are the designated CSUDH Pre-health Advisors. Students who are interested in a career in the health professions should make an appointment with them at any stage of their education, preferably as early as possible once they have made that decision. Appointments are made through the Biology office in NSM A-143 and/or by calling (310) 243-3381.

Preparation

It is strongly advised that the student check with individual schools/programs for their requirements and recommendations as some schools may have specific requirements.

The following list represents some general requirements.

Pre-Health Courses

Required courses

- 1 year general biology with lab (e.g. BIO 120 Principles of Biology I/BIO 122 Principles of Biology II)
- 1 year general chemistry with lab (e.g. CHE 110 General Chemistry I/CHE 112 General Chemistry II)
- 1 year organic chemistry with lab (e.g. CHE 310 Organic Chemistry I/CHE 311 Organic Chemistry Lab I/CHE 312 Organic Chemistry II/CHE 313 Organic Chemistry Laboratory II)
- 1 year college math- some schools require statistics while others may require calculus (e.g. MAT 171 Survey of Calculus for Management and Life Sciences or MAT 191 Calculus I)
- 1 year physics with lab (e.g. PHY 120 Elements Of Physics I/PHY 122 Elements Of Physics II or PHY 130 General Physics I/PHY 132 General Physics II)
- 1 year college English (composition)

Recommended courses

- Biochemistry, some require the lab (e.g. CHE 450 Biochemistry I/CHE 451 Biochemistry I Lab) while others do not require the lab- the

lecture is strongly recommended, especially for students taking the MCAT

- Spanish (particularly for CA and TX schools, but others may also recommend) – strongly recommended
- Cellular and molecular biology, endocrinology, microbiology, immunology, genetics, developmental biology, psychology represent some other recommended courses
- Several programs require a human anatomy course (with lab) and a human physiology course (with lab), neither of which are offered here at CSUDH

Other possible recommendations

- Dentistry – psychology (may be required), sculpture or fine arts or drafting
- Optometry – psychology (made be required), physiology, neurophysiology
- Veterinary – animal/human nutrition, vertebrate physiology
- Pharmacy – economics and composition (often required); experience in a pharmacy
- Osteopathic medicine – A letter of recommendation from a D.O. (sometimes required)

Additional Experiences that strengthen an application

- Scientific research
- Hospital/health care volunteer services, e.g. COPE Program, Atlantis Project

It is critical that the student speak to the Pre-health advisor to not only discuss a specific career plan but also to better prepare their application regarding such things as a personal statement, obtaining letters of recommendation and choosing schools. Also it is advisable to join the student Pre-health Society (PHS) to participate in activities related to the health professions. However, in addition, the student must familiarize themselves with as much information as possible regarding not only the health professional schools but also about the career itself. An excellent resource for researching health careers is www.explorehealthcareers.org (<http://www.explorehealthcareers.org>).

Pre-Law

College of Business Administration and Public Policy

Planning Undergraduate Coursework

CSU Dominguez Hills offers extensive and varied opportunities to plan for a future career in law. There are many courses in various disciplines that contribute to the skills students will need as a lawyer. For help in choosing your courses, contact a pre-law advisor after admission to the university.

Skills Pre-Law Students Must Develop

Several broad objectives of pre-legal education are set forth by the Association of American Law Schools. These include the oral and written command of language; an understanding and appreciation of social, political and economic values, institutions, problems and frames of reference; and an ability for creative, innovative, critical and analytical thinking.

Choosing a Major or Minor

The selection of a major and minor should depend on the student's personal interest or goals. Traditionally, students bound for law school

majored in political science. More recently, with new social trends, students also major in such varied areas as public administration, sociology, business, economics, history, English, philosophy.

The Stanley Mosk Undergraduate Moot Court Competition

CSU Dominguez Hills has the only undergraduate moot appellate court that permits students to argue before Supreme and Appellate Court Justices. Each spring a competition is held in which students are given research materials, trained in oral argument, and compete in rounds. Courses are presently available, though not required for participation, in political science and sociology.

Law School Admissions Test & Letters of Recommendation

Applicants for admission to most law schools are expected to have a B.A. or a B.S. Degree and to have taken the Law School Admission Test (LSAT). The LSAT is a specialized test designed to measure cognitive skills that are used in legal reasoning and argument. Test preparation courses can help raise student scores; but such preparation is best done well in advance. A manual is available, through the pre-law advisors, which explains LSAT preparation and relates it to upper division coursework. See a pre-law advisor as close as possible to the beginning of your junior year or earlier to take best advantage of LSAT preparation. Many law schools require that the LSAT be taken by December of the year preceding law school entry. A packet of information about the LSAT is available from any pre-law advisor, the Information Center or by writing directly to the Law School Admission Services, Box 2000, Newtown, PA 18940.

Letters of recommendation, and even personal statements require early planning. A manual on how to write requests for letters of recommendation and how to strengthen personal statements is available to students. Students should obtain these manuals and plan their applications with their advisors during their junior year.

Credit/No Credit Courses and Law School Admission Policy

Most law schools require applicants to take the Law School Admissions Test and also subscribe to the Law School Data Assembly Service (LSDAS), which reviews academic transcripts and standardizes undergraduate records to simplify the work of law school admission committees. Grades are converted to one system that allows law schools to compare applicants from many different campuses on a uniform basis. Note the LSDAS counts a "NC" grade in a CR/NC class as a failing grade. Students planning to apply to law school must either complete the course for "Credit" or withdraw. Do not simply drop the course and allow a "No Credit" to appear on the transcript.

Phi Alpha Delta

Students are encouraged to join the university's chapter of Phi Alpha Delta, a pre-law society.

Sources of Additional Information

There are special financial benefits and educational programs available to minority students through the Council on Legal Education Opportunity, 1800 M. Street, N.W., Suite 290, North Lobby, Washington, D.C. 20036.

For general law information, a student should see the bulletins or catalogs of various law schools or the official Pre-Law Handbook, current edition, prepared by the Law School Admission Test Council and the Association of American Law Schools. This handbook may be obtained at most college bookstores or ordered from Educational Testing Services, Princeton, N.J. 08540. Usually a copy of the latest edition of the Pre-Law Handbook will be on reserve in the library.

Courses

LAW 240. Legal Environment of Business. (3 Units)

Analysis of the legal process; functions and operations within a federal system; contracts; sales; tort liability as it impacts business; government regulation of business.

Offered Fall, Spring, Summer

LAW 340. Law Of Bus Organizations. (3 Units)

Legal consequences of selection of one form of business organization over another; analysis of the law of corporations, partnerships, and agencies; law of the workplace; corporate ethics and social responsibilities.

Offered Fall, Spring, Summer

LAW 342. Employment Law. (3 Units)

Prerequisites: LAW 240 is recommended. Overview of the laws impacting the workplace; anti-discrimination law; employee safety, health and privacy; the employer-employee contract; labor law; regulatory agencies; retirement compensation; other statutory rights.

Offered Fall, Spring

LAW 440. Legal Issues in E-Commerce. (3 Units)

Prerequisites: LAW 240. This course covers the legal aspects of doing business on-line. Topics covered will include: on-line contracts, e-crimes, privacy, intellectual property, e-commerce taxation and e-payment systems.

Offered Infrequent

LAW 495. Special Topics in Law. (1-4 Units)

Study of current topics in Law. Repeatable course

Offered Infrequent

LAW 595. Selected Topics in Law. (3 Units)

Prerequisites: Graduate Standing. Intensive study of a specialized area of Law on a selected topic of particular interest to faculty and students. Three hours of seminar per week. Specific topic listed in class schedule. Repeatable course.

Offered Infrequent

Psychology

College of Natural and Behavioral Sciences
Department of Psychology

Program Description

Psychology is about people's behavior and experience. Psychologists teach, provide clinical services, and do research or other applied work on subjects relating to the social and behavioral sciences. In order to discover more about behavior, psychologists study both humans and animals. Psychology covers a wide range of topics, from the way our social environment influences us to the inner workings of our bodies. This diversity of topics is reflected in the psychology curriculum.

The Department of Psychology sees its mission as offering a solid foundation in the theories and scientific methods of psychology to diverse and nontraditional students who choose to study Psychology at

the undergraduate and graduate level. The department offers courses in the empirical knowledge and research methods of scientific psychology and applied psychology for psychology majors and graduate students. Furthermore, the department helps meet the needs of those studying other subjects, such as Human Services majors, Liberal Studies majors, people minoring in Psychology, and other individuals. The department sees its mission as offering these educational experiences within a framework which values and encourages diversity. Within this broad mission, the department develops, evaluates, and alters, as needed, a set of specific goals and objectives for the psychology major.

The department publishes its goals and objectives for all Psychology students to review. It also engages in an ongoing Outcomes Assessment program to evaluate its success in achieving these goals and objectives. Psychology majors are required to participate in the Outcomes Assessment program in order to evaluate both the effectiveness of the department and student competencies.

Features

At the undergraduate level, the Department of Psychology provides opportunity for the study of three different aspects of the field. For students interested in the research and scientific aspects, courses on the application of the scientific method to the study of human and animal behavior are offered. For those with applied interests, courses relating to counseling, clinical psychology, health psychology and behavioral medicine, industrial and organizational psychology, computers, and service in community agencies are offered. For students with a general interest in psychology, many courses provide knowledge that is useful in understanding one's self and in understanding and relating to others effectively.

Requirements for the Bachelor of Arts in Psychology can be completed by attending class during the day or evening hours. At present, it may take six or more semesters to complete the upper division courses in the evening.

Pre-Admission Disclosure for Academic Programs Leading to Licensure or Credentialing

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements.

Academic Advisement

The Psychology Department Sears Peer Advising Center (<https://www.csudh.edu/psychology/current-students/advising/>) and the faculty provide advising for the psychology major, minor, and electives as well as General Education advisement for psychology majors.

Students who are contemplating or have decided upon a major or minor in psychology or who have an interest in taking psychology courses

as electives should see a peer advisor in the Psychology Department Sears Peer Advising Center (<https://www.csudh.edu/psychology/current-students/advising/>) at their first opportunity. Although not required, it is in each student's best interest to see a peer advisor once a semester and to keep his or her files in the Sears Center up to date.

Preparation

High school students are encouraged to take four years of English and three years of mathematics including algebra. Courses in biology and psychology and the other social and behavioral sciences are recommended. Knowledge of computers is helpful for some courses.

Transfer students should contact their counseling center or advisor to identify appropriate lower division major/minor preparatory courses. Whenever possible, transfer students who do not plan to transfer until their junior year should take the lower division equivalents of PSY 101 General Education Psychology: Understanding Human Behavior, PSY 230 Elementary Statistical Analysis in Psychology, and PSY 235 Intro To Research Methods.

Student Organizations

The department has multiple clubs (<https://www.csudh.edu/psychology/current-students/activities/>), including a SPSS Training Club (<https://www.csudh.edu/psychology/current-students/activities/>), Toro Psych Club (<https://torolink.csudh.edu/organization/Toropsychclub/>) and a chapter of Psi Chi (<https://www.csudh.edu/psychology/psichi/>), the International Honor Society for Psychology. There are also numerous opportunities for student involvement in research (<https://www.csudh.edu/psychology/current-students/research/>) and service.

Graduation With Honors

An undergraduate student may be a candidate for graduation with Honors in Psychology by meeting the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills.
2. A minimum grade point average of at least 3.5 in all courses used to satisfy the upper division requirements in the major.

Psychology Skill-Building Elective Course Clusters

Some students may be interested in gaining skills and knowledge in Psychology, but might not want to major in Psychology. Students with interests in gaining psychology-related skills are encouraged to use their general elective courses to take advantage of one of the following skill-building clusters. These clusters are designed to build a foundation in a key area of psychology-oriented skills, such as:

- Business-related Skills:

| Code | Title | Hours |
|---------|--|-------|
| PSY 314 | Behavior Modification | 3 |
| PSY 340 | Social Psychology: Psychological Perspective | 3 |
| PSY 367 | Effective Communication Skills | 3 |
| PSY 372 | Industrial and Organizational Psychology | 3 |

- Counseling and Related Services:

| Code | Title | Hours |
|---------|----------------------------------|-------|
| PSY 342 | Interpersonal and Group Dynamics | 3 |
| PSY 360 | Theories Of Personality | 3 |

| | | |
|---------|---|---|
| PSY 363 | Abnormal Psychology | 3 |
| PSY 367 | Effective Communication Skills | 3 |
| PSY 464 | Introduction to Clinical Psychology | 3 |
| PSY 470 | Community Psychology: Issues and Practice | 3 |

- Diversity/Community Issues:

| Code | Title | Hours |
|---------|---|-------|
| PSY 363 | Abnormal Psychology | 3 |
| PSY 368 | Human Sexuality | 3 |
| PSY 376 | Psychology Of Gender | 3 |
| PSY 380 | Psychology of the Mexican American I | 3 |
| PSY 383 | Black Psychology | 3 |
| PSY 464 | Introduction to Clinical Psychology | 3 |
| PSY 470 | Community Psychology: Issues and Practice | 3 |

- Family Affairs:

| Code | Title | Hours |
|---------|---|-------|
| PSY 350 | Child Psychology | 3 |
| PSY 351 | Psychology of Adolescent Experience | 3 |
| PSY 352 | Psychology of Adult Development and Aging | 3 |
| PSY 353 | The Experience of Death and Dying: Psychological Perspectives | 3 |
| PSY 382 | Psychological Development of the Black Child | 3 |

- Interpersonal Skills:

| Code | Title | Hours |
|---------|--|-------|
| PSY 340 | Social Psychology: Psychological Perspective | 3 |
| PSY 342 | Interpersonal and Group Dynamics | 3 |
| PSY 360 | Theories Of Personality | 3 |
| PSY 367 | Effective Communication Skills | 3 |

- Children and Adolescents:

| Code | Title | Hours |
|---------|--|-------|
| PSY 350 | Child Psychology | 3 |
| PSY 351 | Psychology of Adolescent Experience | 3 |
| PSY 314 | Behavior Modification | 3 |
| PSY 367 | Effective Communication Skills | 3 |
| PSY 382 | Psychological Development of the Black Child | 3 |

For Psychology majors, the following cluster is suggested for those who plan to apply to graduate school:

- Graduate School Preparation:

| Code | Title | Hours |
|---------|--|-------|
| PSY 240 | Biopsychology | 3 |
| PSY 322 | Cognitive Psychology | 3 |
| PSY 324 | Sensation & Perception | 3 |
| PSY 330 | Intermediate Statistics and Research Design | 3 |
| PSY 340 | Social Psychology: Psychological Perspective | 3 |
| PSY 360 | Theories Of Personality | 3 |
| PSY 363 | Abnormal Psychology | 3 |
| PSY 490 | Senior Seminar Psychology | 3 |

additional upper-division Lecture/Laboratory courses

Career Possibilities

In addition to preparing students for graduate study in psychology and other professions, an undergraduate degree can lead directly to multiple careers (<https://www.csudh.edu/psychology/current-students/careers/>), including employment in business and industry, education, counseling, human services, and several other areas.

Psychology courses also can be used to develop and strengthen adaptive or intellectual skills, and add to students' knowledge base and facilitate development of behavioral traits and attitudes linked to career success. The adaptive skills that are most directly fostered within the psychology curriculum are: interpersonal and human relations skills, thinking and problem solving skills, communication skills.

Psychology is an excellent major or minor for students who are interested in careers in management, communication, marketing or other positions that require understanding of human behavior and human interactions. Many students who are interested in careers in law or medicine choose a psychology degree for their undergraduate major. The psychology degree is pursued by many students who wish to engage in graduate study in psychology at the master's or doctoral degree level as preparation for careers in mental health, psychological research, industrial and organizational psychology and college teaching. Additional competencies recommended for the major include computer literacy and a second language.

Courses

PSY 101. General Education Psychology: Understanding Human Behavior. (3 Units)

An introduction to psychology emphasizing the personal, cognitive and social development and functioning of the individual, and the influence of both physiological and social factors. Consideration of basic concepts and applications.

Offered Fall, Spring, Summer

PSY 110. Critical Thinking and Problem Solving. (3 Units)

Course is designed to improve critical thinking and problem solving skills such as deductive and inductive reasoning, probabilistic reasoning and decision-making. May include computer-assisted instruction. A-C-/NC grading.

Offered Fall, Spring, All terms

PSY 230. Elementary Statistical Analysis in Psychology. (3 Units)

The application of descriptive and inferential statistics to the design and analysis of psychological research.

Offered Fall, Spring, All terms

PSY 235. Intro To Research Methods. (3 Units)

Prerequisite: PSY 230 or MAT 131. Examination of the design, conduct and interpretation of research studies, both experimental and non-experimental, as demonstrated in a wide range of psychological phenomena. Includes a consideration of philosophy of science and preparation of research reports. Two hours of lecture and three hours of laboratory per week.

Offered Fall, Spring

PSY 240. Biopsychology. (3 Units)

Prerequisite: PSY 101 required. PSY 230, PSY 235 recommended. Course introduces the biological basis of human behavior providing information on the different physiological systems involved in behavior and cognition. An understanding of the human nervous system is central to this course.

Offered Fall, Spring

PSY 305. History and Systems of Psychology. (3 Units)

The study of the development of psychology as a discipline, and the influence of principal leaders and modern psychology.

Offered Fall, Spring

PSY 306. Design Your Life. (3 Units)

Prerequisite: PSY 101 required. Course is designed to help students prepare for the transition from the university to your first career. Students will critically examine their beliefs, build skills needed to achieve their career goals, and design plans for several careers.

Offered Fall, Spring

PSY 312. Theories Of Learning. (3 Units)

Consideration of the major theories of learning and their experimental bases.

Offered Infrequent

PSY 314. Behavior Modification. (3 Units)

Prerequisite: PSY 101 or equivalent. The application of principles and concepts from the experimental analysis of behavior to problems outside the laboratory. Each student will successfully complete a project.

Offered Fall, Spring

PSY 316. Behavioral Neuroscience. (3 Units)

AAAdvanced study of the relationship between the brain and behavior.

Focus on neuroanatomy, psychology, pharmacology and their application to cognition, emotion, learning, motivation, attention, executive function, perception and memory. Analysis of model organism and their application to neurodegenerative disease and the neurobiology of mental illness.

Foundational experiments and recent discoveries in the field will be reviewed and discussed with a focus on how these findings relate to broader theories in the field.

Offered Fall, Spring, Summer

PSY 318. Stress Psychobiology. (3 Units)

This course cover the behavioral neurobiology of stress, including what stress is mentally and physically, how stress affect physiology and contributes to physical disease, and what factors moderate the stress experience and improve stress management (such as biofeedback).

PSY 320. Psychopharmacology. (3 Units)

Effects of drugs on mood, personality and behavior. Drug use in treatment of mental disorders in children, adults, and the elderly.

Offered Fall, Spring, Summer

PSY 322. Cognitive Psychology. (3 Units)

An introduction to theory and research in human information processing.

Topics include attention, memory, neurocognition, mental representation, imagery, problem solving, reasoning, language, and other higher mental processes.

Offered Fall, Spring, Summer

PSY 324. Sensation & Perception. (3 Units)

Prerequisites: PSY 101 required. PSY 230, PSY 235 recommended.

Study of sensory and perceptual processes in vision, touch, and hearing. Emphasis placed in how basic perceptual principles operate in everyday life as well as in lab settings.

Offered Fall, Spring

PSY 326. Neuropharmacology. (3 Units)

Required Prerequisites: PSY 101, PSY 230, PSY 235, PSY 240.

Recommended Prerequisites: PSY 320. Advanced study of the chemical basis of behavior and mechanism by which drugs impact the biological aspects of an organism. Focus on pharmacokinetic and pharmacodynamic elements of neurochemical signaling, examining major drug classifications, with an emphasis on the biological dimensions of their action.

Offered Fall, Spring

PSY 328. Music and the Mind. (3 Units)

Survey of topics in the psychology and cognition of music/ Student will explore topics such as memory, attention, perception, imagery, language, and thinking as they relate to music, with special attention to cognitive, social dimensions, and identity.

Offered Fall, Spring, Summer

PSY 330. Intermediate Statistics and Research Design. (3 Units)

Prerequisites: PSY 230 or MAT 131 is required. The applications of statistical techniques to problems in the behavioral sciences. Discussion of problems in hypothesis formulation, sampling techniques, distribution-free statistics, multivariate data analysis, and presentation of results.

Two hours of lecture and two hours of laboratory per week.

Offered Fall, Spring

PSY 331. Measurement In Psychology. (3 Units)

Prerequisite: PSY 230 or MAT 131. Fundamentals of psychological measurement. Reliability, validity, item analysis, norms, and test construction and selection. Experience in administering, scoring, and interpreting tests of intelligence, aptitude, and personality. Two hours of lecture and two hours of laboratory per week.

Offered Fall, Spring, All terms

PSY 340. Social Psychology: Psychological Perspective. (3 Units)

A broad survey of theories and research areas in social psychology. Including such topics as aggression, prejudice, person perception, leadership and conformity.

Offered Fall, Spring, Summer, All terms

PSY 341. Social Cognition. (3 Units)

A review of theory and research focusing on mental processes that underlie how people make sense of themselves and others. Social cognition focuses on social interactions that involve people's judgments, beliefs, decisions, and behaviors in social situations.

Offered Fall, Spring, Summer

PSY 342. Interpersonal and Group Dynamics. (3 Units)

Methods, theories and research findings concerning interpersonal dynamics and the dynamics of small groups. The class will learn communication skills and participate in various aspects of group experience.

Offered Fall, Spring, All terms

PSY 350. Child Psychology. (3 Units)

The cognitive, psychological and social development of the child from birth to adolescence. Fieldwork at discretion of instructor.

Offered Fall, Spring, Summer

PSY 351. Psychology of Adolescent Experience. (3 Units)

Consideration of the major theories and research concerning development during adolescence. Emphasis on the development of personal identity as it relates to social roles in adolescence.

Offered Fall, Spring

PSY 352. Psychology of Adult Development and Aging. (3 Units)

Theories and research in adult development and aging, including the effects of physiological and socio-economic changes on psychological variables within an aging population.

Offered Fall, Spring

PSY 353. The Experience of Death and Dying: Psychological Perspectives. (3 Units)

Readings, discussion, and case studies in the psychodynamics of reactions to death and behavior patterns, coping with impending or recent death, loss, and grief; attitudes towards death and dying; the fear of death; children's responses to death.

Offered Spring

PSY 360. Theories Of Personality. (3 Units)

A study of basic theories of personality including type theories; trait theories; psychoanalytic, learning, biosocial, self and holistic-integrative theories.

Offered Fall, Spring, Summer, All terms

PSY 363. Abnormal Psychology. (3 Units)

The causes and manifestations of abnormal behavior. Field study and case study.

Offered Fall, Spring, Summer, All terms

PSY 367. Effective Communication Skills. (3 Units)

Training and practice in effective communication skills, such as active listening, accurate empathy, respect, genuineness, concreteness, assertion and message sending. Lecture will provide theoretical and empirical rationale for applied skills and techniques. Supervised small group practice will provide experience and feedback on applying such skills.

Offered Fall, Spring, All terms

PSY 368. Human Sexuality. (3 Units)

Course will cover the physiological and psychological aspects of human sexuality. The origin and treatment of sexual dysfunction will also be discussed.

Offered Fall, Spring, All terms

PSY 370. Health Psychology. (3 Units)

Prerequisite: PSY 101. Survey of the major findings and theories from the field of health psychology. Includes consideration of psychological, social, and cultural effects on health.

Offered Fall

PSY 371. Forensic and Legal Psychology. (3 Units)

Prerequisite: PSY 101 required. A survey of forensic and legal psychology including interrogations, eyewitness memory, forensics, the death penalty, the insanity defense, competency to stand trial, jury decision-making, and more. Emphasizes research on the importance of understanding and preventing wrongful convictions.

Offered Fall, Spring

PSY 372. Industrial and Organizational Psychology. (3 Units)

Survey of the application of psychology to organizations, personnel, work environments, buying, and selling, with particular attention to current issues.

Offered Fall, Spring

PSY 376. Psychology Of Gender. (3 Units)

Prerequisite: PSY 101 is recommended. Theory and research on the development of gender identity and gender differences and similarities. Includes role of ethnicity, cross-cultural evidence, and analysis of status and power differences favoring males.

Offered Fall, Spring

PSY 380. Psychology of the Mexican American I. (3 Units)

Prerequisite: PSY 340 is recommended. The psychological development and socialization of the Mexican American. The Mexican American as unique from both mother culture and dominant culture, especially a consideration of how language, color, and socio-economic class affect the individual.

Offered Infrequent

PSY 382. Psychological Development of the Black Child. (3 Units)

Unique environmental influences on the psychological development of the Black child, from the prenatal period through elementary school. Emphasis on social, intellectual and emotional growth.

Offered Spring

PSY 383. Black Psychology. (3 Units)

An investigation into the dynamics of the Black personality, and the influence of American social institutions. Focus on the various types of psychological adaptations, identity conflicts, problems of self esteem, and evaluation of Black consciousness.

Offered Fall

PSY 396. Practicum In Psychology. (3 Units)

Prerequisite: HUS 300 or consent of instructor. May not be taken concurrently with any other fieldwork course. Supervised work experience in applied psychology, with emphasis upon human services and educational settings. Supervision emphasizes training and application of clinical, interviewing, and other helping skills, didactic methods, group techniques, methods of evaluation and/or other skills specific to fieldwork needs. CR/NC grading. Repeatable course.
Offered Infrequent, All terms

PSY 411. Advanced Research Methods in Personality and Social Psychology. (3 Units)

Prerequisites: PSY 230, PSY 235, and PSY 340 or PSY 360; concurrent enrollment in PSY 412. Examination of selected areas of personality and social psychology, such as interpersonal attraction, self concept, and attitudes. Equips students to understand, evaluate and independently conduct research.
Offered Fall, Spring

PSY 412. Research Seminar in Personality and Social Psychology. (3 Units)

Prerequisites: PSY 230 and PSY 235; concurrent enrollment in PSY 411. Development of research skills in personality and social psychology including conception, design and conduct of studies, analyzing, organizing and evaluating findings and communicating results. Three hours of seminar per week.
Offered Fall, Spring

PSY 413. Advanced Research Methods in Learning and Evolutionary Psychology. (3 Units)

Prerequisite(s): PSY 235 & PSY 230 required. Corequisite: PSY 414. An examination of the scientific synthesis of evolutionary biology of modern psychology, which offers a novel approach to such issues as short-term and long-term human mating strategies, short-term sexual strategies, conflict between the sexes, parental investment, aggression, and social dominance.
Offered Fall, Spring

PSY 414. Research Seminar in Learning and Evolutionary Psychology. (3 Units)

Prerequisites: PSY 230 and PSY 235 are required. Co-requisite: PSY 413 is required. Development of research skills for studying human behavior from the perspective of evolutionary biology, behavioral adaptations, and comparisons with other species. The course includes conception, design and conduct of studies, analyzing, organizing and evaluating findings and communicating results.
Offered Fall, Spring

PSY 415. Advanced Research Methods in Cognitive Psychology. (3 Units)

Prerequisites: PSY 230 and PSY 235. Survey of cognitive psychology including intelligence, cognitive development, perception, reasoning, memory, problem solving, language, comprehension and decision making. Consideration of both Piagetian and information processing perspectives. Three hours of seminar per week.
Offered Fall, Spring, All terms

PSY 416. Research Seminar in Cognitive Psychology. (3 Units)

Prerequisites: PSY 230 and PSY 235; concurrent enrollment in PSY 415. Development of research skills in cognitive psychology, including conception, design and conduct of studies, analyzing, organizing and evaluating findings and communicating results. Three hours of seminar per week.
Offered Fall, Spring, All terms

PSY 417. Advanced Research Methods in Biological Psychology. (3 Units)

Prerequisites: PSY 230 and PSY 235. Study of biological mechanisms underlying human behavior including physiology of various systems including nervous system, sensory and motor systems, endocrine system, with attention to applications and current advances in neuroscience.
Offered Fall, Spring

PSY 418. Research Seminar in Biological Psychology. (3 Units)

Prerequisites: PSY 230 and PSY 235; concurrent enrollment in PSY 417. Development of research skills in biological psychology, including conception, design and conduct of studies, analyzing, organizing and evaluating findings and communicating results. Three hours of seminar per week.
Offered Fall, Spring

PSY 419. Advanced Research Methods in Forensic and Legal Psychology. (3 Units)

Prerequisite: PSY 230 and PSY 235 required. PSY 330 or PSY 331 recommended. Co-requisite: PSY 420 required. Explores the field of forensic and legal psychology including interrogations, eyewitness memory, forensics, the death penalty, the insanity defense, competency to stand trial, jury decision-making. Emphasizes research on preventing wrongful convictions and research methods employed to study
Offered Infrequent

PSY 420. Research Seminar in Forensic and Legal Psychology. (3 Units)

Prerequisites: PSY 230 and PSY 235 required. PSY 330 or PSY 331 recommended. Co-requisites: PSY 419 required. Development of research skills in forensic and legal psychology, including conception, design and conduct of studies, analyzing, organizing and evaluating findings and community results. Three hours of lab per week.
Offered Infrequent

PSY 464. Introduction to Clinical Psychology. (3 Units)

Prerequisite: PSY 363. An overview of psychology in the clinical situation. The scope, ethics, theories, and methods of clinical psychology.
Offered Fall, Spring, All terms, Fall

PSY 470. Community Psychology: Issues and Practice. (3 Units)

Prerequisite: PSY 363. Introduction to issues and concepts in community psychology, including the study of community organization and intervention programs.
Offered Fall, All terms

PSY 480. Sport Psychology. (3 Units)

An in-depth analysis and application of psychological principles and research in motivation, psychophysiology, personality, cognition, and emotion in sport settings.
Offered Fall, Spring

PSY 481. Applied Sport & Fitness Psychology. (3 Units)

Scientific research results in the field of psychology are used to illustrate how participation in sports and physical activity can facilitate psychological development and physical well-being.
Offered Infrequent

PSY 482. Psychology of Coaching and Team-Building. (3 Units)

Group processes, team-building techniques, leadership skills and interpersonal communication skills will be applied to enhancement of team spots performance and individual well-being.
Offered Infrequent

PSY 483. Contemp Issues in Sports and Fitness Psychology. (3 Units)

Psychological theories will be applied to the identification and treatment of problems people who participate in sports may have as well as applied to the promotion of mental health.

Offered Infrequent

PSY 486. Internship in Sport and Fitness Psychology. (3 Units)

Supervised application of psychological principles applied to sports and fitness to promote performance and optimal well-being. There are four prerequisite courses (PSY 480, PSY 481, PSY 482, PSY 483) that must be completed before registering for PSY 486S, Internship in Sport and Fitness Psychology. One of the four prerequisite courses sometimes can be taken concurrently with PSY 486S. Also, please notify the instructor of PSY 486S one semester before intending to register for this course so she can approve an internship site and supervisor for you plus you will need this instructor's consent before registering for PSY 486S.

Offered Infrequent

PSY 490. Senior Seminar Psychology. (3 Units)

Prerequisites: PSY 230, PSY 235, and PSY 330 or PSY 331 and senior standing. A seminar designed to integrate previous work and experience by emphasizing the application of theoretical models and research designs and the relationship among theory, research, and the dissemination of research findings. Three hours of seminar per week.

Offered Fall, Spring, Summer

PSY 494. Independent Study. (1-3 Units)

Prerequisite: Consent of instructor. A reading program of selected topics conducted under the supervision of a faculty member. Repeatable course.

Offered Fall, Spring

PSY 495. Seminar Special Topics:. (3 Units)

Prerequisite: Consent of instructor. An intensive study of a psychological topic which commands the current focus of interest of both the faculty member and the students. If repeated, the course will count only once toward the major. Repeatable course. Three hours of seminar per week.

Offered Infrequent

PSY 496. Internship. (3-6 Units)

Prerequisites: PSY 396 or consent of instructor. May not be taken concurrently with any other fieldwork course. Survey of professional and ethical issues in the helping professions. Supervised internships in human services setting.

Offered Infrequent

PSY 497. Seminar in Peer Advising. (3 Units)

Prerequisite: Senior standing and completion of 15 units of Psychology. Training, supervision, and experience in peer advising. Emphasis on how to provide effective academic assistance and planning, with other helping and administrative skills also taught. Repeatable course. Three hours of seminar per week.

Offered Fall, Spring

PSY 498. Directed Research. (1-3 Units)

Prerequisite: Consent of instructor. The student develops and completes an individual study under faculty supervision. Repeatable course.

Offered Fall, Spring

PSY 510. Career Development in Clinical and Counseling Psychology. (3 Units)

Examines career development theories and techniques in clinical and counseling psychology. Course content will explore decision-making models and interrelationships among and between work, family and other life roles and factors, including the role of multicultural issues in career development.

Offered All terms, Fall

PSY 512. Professional and Legal Issues in Clinical and Counseling Psychology. (3 Units)

This course covers ethical standards for clinical and counseling psychology. The course will cover ethical standards of professional organizations and credentialing and licensing entities. Also included will be partner abuse assessment, detection and intervention strategies, and child abuse detection and reporting.

Offered As needed

PSY 516. Perceptual Processes. (3 Units)

Offered Infrequent

PSY 517. Seminar in Physiological Psychology. (3 Units)

Prerequisites: PSY 230 or MAT 131; PSY 417 and PSY 418. An advanced study of the physiological correlates of psychological phenomena including learning, motivation, emotion, sleep and personality. Three hours of seminar per week.

Offered Infrequent

PSY 520. Seminar in Psychopharmacology. (3 Units)

Prerequisite: PSY 320 and PSY 417 are recommended. The role of drugs on cognition, emotion, and behavior, with reference to their biochemical actions. Emphasis will be placed on psychoactive drugs, such as psychiatric medications, recreational drugs and over-the-counter drugs.

Offered Fall

PSY 530. Advanced Analysis of Variance and Multivariate Techniques. (3 Units)

Prerequisites: PSY 330 or equivalent. PSY 235 is recommended.

Corequisite: PSY 535 is recommended. Advanced analysis of variance including multifactor randomized groups and repeated measures designs, nested designs, analysis of covariance, multiple regression, multiple discriminant function, factor analysis.

Offered Fall

PSY 535. Advanced Research Methods. (3 Units)

Prerequisites: PSY 230 or MAT 131; PSY 235; PSY 330 or equivalent is required; PSY 530 is recommended. Advanced research methodology; including experimental design, correlational and ex post facto studies: problems in research, e.g., generalization, significance, reliability; critique of research; and philosophy of science. Will include a directed research project.

Offered Fall

PSY 540. Seminar In Social Psych. (3 Units)**PSY 550. Seminar in Developmental Psychology. (3 Units)**

Prerequisites: PSY 230 or MAT 131; PSY 235; PSY 350 or equivalent. Exploration and discussion of recent theoretical and research literature on topics such as early experience, intelligence vs cognition, gerontology, imitation and social development, and research on adolescence. Three hours of seminar per week.

Offered Spring

PSY 551. Child and Adolescent Treatment: Theories and Practice. (3 Units)

Prerequisite(s): PSY 563 required. Co-requisite(s): PSY 550 recommended. An examination of major theories, research studies, and clinical interventions for working with children and adolescents. Highlighted throughout the course will be a focus on biopsychological and cultural factors that impact the mental health of children and adolescents.

Offered Spring

PSY 555. Psychology and Aging. (3 Units)

Examination of psychological aspects of the aging process, with special emphasis on applied issues in aging research. Topics include: biological aspects of aging, health context of aging, mental health and aging, culture and spirituality, and care giving issues.
Offered Fall

PSY 560. Seminar In Personality. (3 Units)

Offered Infrequent

PSY 563. Seminar in Psychopathology. (3 Units)

Prerequisite: PSY 363. Intensive analysis of theory and research in psychopathology. Various orientations, such as behavioral, psychophysiological, and existential will be explored. Three hours of seminar per week.
Offered Fall

PSY 564. Advanced Psychotherapy Techniques. (3 Units)

Prerequisite: PSY 464 or PSY 563. Course will include an indepth coverage of techniques from two or more psychotherapeutic approaches. These approaches include the psychodynamic, humanistic, cognitive, and behavioral approaches. Emphasis is on concrete application of these approaches in short term counseling situations.
Offered Spring

PSY 565. Psychology of Clinical Groups. (3 Units)

Exploration of different approaches to therapeutic intervention on a group level. Course will include an experiential laboratory component where students will have experience in leading groups using different theoretical orientations. Two hours of lecture and two hours of activity per week.
Offered Spring

PSY 566. Indv Intellectual Assess. (3 Units)

Prerequisite: PSY 331. Techniques for administering, analyzing, and interpreting individual intellectual tests (such as the Wechsler and the Stanford- Binet) and psychomotor tests. Intensive supervised practice in administering the tests will be provided. Two hours of lecture, two hours of activity and fieldwork by arrangement per week.
Offered Fall

PSY 567. Individual Assessment. (3 Units)

Prerequisites: PSY 563 and PSY 570. Study of techniques for administering, analyzing and interpreting personality tests and reporting test results. Supervised intensive practice in administering tests will be provided. Two hours of lecture with two hours of activity and fieldwork by arrangement per week.
Offered Spring

PSY 570. Community Psychology: Current Theory and Issues. (3 Units)

Prerequisite: PSY 363 or PSY 470. Theory of the interaction between individual functioning and social system variables with emphasis on the changing role of the community mental health specialist and the community psychologist.
Offered Fall

PSY 571. Practicum in Clinical-Community Psychology. (3 Units)

A case approach to issues in clinical community psychology coordinated with supervised experience. Some of the topics covered are diagnosis, interventions, ethics, laws, and cross-cultural counseling. Three hours of seminar plus supervised field work per week.
Offered Fall, Spring

PSY 572. Sem Industrial/Organ Psy. (3 Units)

Offered Infrequent

PSY 573. Crisis and Trauma: Theories and Interventions. (3 Units)

Prerequisite(s): PSY 563 required. Introduces students to crisis and trauma counseling and includes examining: crisis theory; multidisciplinary responses to crises, emergencies, and/or disasters; effects of trauma; assessment strategies and treatment approaches; and interventions for individuals with mental or emotional disorders.
Offered Spring

PSY 574. Practicum: Diversity Issues in Clinical and Health Psychology. (3 Units)

Examination of the impact of culture on mental health and on the therapeutic relationship. Race/ethnicity, culture, class, sexual/affective orientation, ability status, and gender issues will be explored.
Offered Fall

PSY 575. Theories of Health and Behavior. (3 Units)

Overview of the relationships among psychosocial factors, illness and health, based on research and theory from psychology, sociology, anthropology and biology. Topics include: stress, obesity and life-threatening illness.
Offered Spring

PSY 576. Seminar in Health Psychology Research. (3 Units)

Analysis and discussion of research in health psychology. Areas of research study will include: health promotion, coping mechanisms in chronic illness chronic pain, psychocardiology, immigrant and refugee health/psychosocial adjustment, and cultural issues in specific disease processes.
Offered Spring

PSY 580. Advanced Sport Psychology. (3 Units)

Prerequisites: Graduate standing and permission of instructor. Psychological principles and research in motivation, psychophysiology, personality, cognition, development, emotion and group behavior applied to sport settings.
Offered Fall

PSY 585. Neuropsychology. (3 Units)

Overview of neuroanatomy, neuropathology, and clinical and experimental data on brain-behavior relationships.
Offered Fall

PSY 586. Addictions Counseling. (3 Units)

Co-requisite(s): PSY 585 recommended. Students will examine substance abuse and addiction disorders in multiple client populations. Additionally, co-occurring disorders, the effects of substances and addictions, and best practices for counseling and treatment will be examined.
Offered Fall

PSY 592. Teaching Psychology. (3 Units)

Prerequisites: Graduate standing and permission of Graduate coordinator. Discussion of teaching/learning styles, educational issues, technological advances, teaching methods and materials, curriculum development, and evaluation of course, teacher and student. Repeatable course.
Offered Fall

PSY 595. Special Topics:. (3 Units)

Advanced course of special interest for psychology graduate students. Topic and content will vary as announced. Repeatable course. Three hours of seminar per week.
Offered Fall

PSY 596. Clinical Psychology Practicum. (3 Units)

Prerequisites: PSY 571 or PSY 574 is required; PSY 546 is recommended. Field placement and clinical training in the applied use of theory, working with individuals and families and documentation skills. Students must have completed 12 units of coursework before beginning practicum and site must be approved by the MA Psychology program. Repeatable for credit.

Offered Infrequent

PSY 597. Directed Reading. (1-3 Units)

Prerequisite: Classified graduate standing. Assignment of a reading list formulated under the supervision of the instructor. Repeatable course. Offered Fall, Spring

PSY 598. Directed Research. (1-3 Units)

Prerequisite: Classified graduate standing. Students will design and conduct research projects under the direct supervision of the instructor. Repeatable course.

Offered Fall, Spring

PSY 599. Thesis. (1-3 Units)

Prerequisite: Advancement to Candidacy. Thesis. Repeatable course. Offered Fall, Spring

PSY 600. Grad Continuation Course. (1 Units)

Graduate students who have completed their coursework but not their thesis, project, or comprehensive examination, or who have other requirements remaining for the completion of their degree, may maintain continuous attendance by enrolling in this course. Signature of graduate program coordinator required.

Offered Fall, Spring

Psychology, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

No minor required. Students completing this major do not need to complete a minor in another field. However, Psychology majors are encouraged to use their general elective courses to take advantage of the Skill-Building Elective Clusters described above. This will further enhance their psychology-related skills.

Major Requirements (42 units)

The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

| Code | Title | Hours |
|---|---|-------|
| Core Courses | | |
| PSY 101 | General Education Psychology: Understanding Human Behavior ¹ | 3 |
| PSY 230 | Elementary Statistical Analysis in Psychology ¹ | 3 |
| PSY 235 | Intro To Research Methods ¹ | 3 |
| Select one Quantitative Methods course from the following: ² | | 3 |
| PSY 330 | Intermediate Statistics and Research Design | |
| PSY 331 | Measurement In Psychology | |
| Upper Division Major Electives | | |
| Select one course from Groups 1 - 6: | | |
| Group 1: Biopsychology: | | 3 |
| PSY 240 | Biopsychology | |
| PSY 320 | Psychopharmacology | |
| PSY 324 | Sensation & Perception | |
| Group 2: Cognitive: | | 3 |
| PSY 312 | Theories Of Learning | |
| PSY 322 | Cognitive Psychology | |
| Group 3: Social Community: | | 3 |
| PSY 306 | Design Your Life | |
| PSY 340 | Social Psychology: Psychological Perspective | |
| PSY 371 | Forensic and Legal Psychology | |
| PSY 376 | Psychology Of Gender | |
| PSY 380 | Psychology of the Mexican American I | |
| PSY 383 | Black Psychology | |
| PSY 470 | Community Psychology: Issues and Practice | |
| Group 4: Developmental: | | 3 |
| PSY 350 | Child Psychology | |
| PSY 351 | Psychology of Adolescent Experience | |
| PSY 352 | Psychology of Adult Development and Aging | |
| PSY 382 | Psychological Development of the Black Child | |
| Group 5: Individual Abnormal: | | 3 |
| PSY 360 | Theories Of Personality | |
| PSY 363 | Abnormal Psychology | |
| PSY 368 | Human Sexuality | |
| PSY 370 | Health Psychology | |
| PSY 464 | Introduction to Clinical Psychology | |
| Group 6: Select one course from groups 1-5 or from the following: | | 3 |
| PSY 305 | History and Systems of Psychology | |
| PSY 314 | Behavior Modification | |
| PSY 342 | Interpersonal and Group Dynamics | |
| PSY 353 | The Experience of Death and Dying: Psychological Perspectives | |
| PSY 367 | Effective Communication Skills | |
| PSY 372 | Industrial and Organizational Psychology | |
| PSY 480 | Sport Psychology | |
| PSY 494 | Independent Study | |
| PSY 497 | Seminar in Peer Advising | |
| PSY 498 | Directed Research | |
| Group 7: Select one course from either Group 3, Group 4, or Group 5 | | 3 |
| Research Experience | | |
| Select one of the following: | | 6 |

| | |
|-------------------|--|
| PSY 411 & PSY 412 | Advanced Research Methods in Personality and Social Psychology and Research Seminar in Personality and Social Psychology |
| PSY 413 & PSY 414 | Advanced Research Methods in Learning and Evolutionary Psychology and Research Seminar in Learning and Evolutionary Psychology |
| PSY 415 & PSY 416 | Advanced Research Methods in Cognitive Psychology and Research Seminar in Cognitive Psychology |
| PSY 417 & PSY 418 | Advanced Research Methods in Biological Psychology and Research Seminar in Biological Psychology |
| PSY 419 & PSY 420 | Advanced Research Methods in Forensic and Legal Psychology and Research Seminar in Forensic and Legal Psychology |

Senior Seminar

| | | |
|---------|---------------------------|---|
| PSY 490 | Senior Seminar Psychology | 3 |
|---------|---------------------------|---|

Total Hours **42**

¹ Should be taken in the order listed prior to taking other courses in the major.

² Both courses listed in the Quantitative Methods section are recommended for students planning to pursue graduate Studies. PSY 230 Elementary Statistical Analysis in Psychology or MAT 131 Elementary Statistics and Probability is a prerequisite for both courses.

Program Learning Outcomes

Critical Understanding of Psychology

- The objective of Learning Outcome #1 is that psychology professors provide clear, up-to-date information and appropriate learning contexts so that psychology majors can describe, explain and apply knowledge in the following domains:
 - 1.1 Historical events of importance in psychology
 - 1.2 The major theories and schools of psychological thought
 - 1.3 Models of the person
 - 1.4 Basic descriptive and inferential statistics, written and oral skills, quantitative analysis, professional behavior
- The objective of Learning Outcome #2 is that psychology professors will provide opportunities to learn, and psychology majors will exhibit progress in attaining an understanding of and demonstrating the ability to do the following:
 - 2.1 Explain behavior using different psychological theories or models
 - 2.2 Use the basic terminology of the discipline
 - 2.3 Understand the general underlying logic of conducting research and have a beginning applied knowledge of how to do it. Scientific method, personal and professional ethics and values
- The objective of Learning Outcome #3 is that psychology professors will model, and thus psychology majors will (a) be exposed to the value and worth of, and (b) describe and apply the following:
 - 3.1 Scientific methods and reasoning
 - 3.2 Knowledge of individual differences and diversity, including but not limited to

- 3.2a self and others as people with a set of skills
- 3.2b the perspectives of others
- 3.2c studying the causes and effects of racism, sexism and other "isms"
- 3.3 Personal and professional ethics, including academic integrity and professional codes of behavior
- 3.4 Consideration of education and life itself to be a process of lifelong learning
- 3.5 Some of the skills of taking multiple perspectives and relativistic thinking, scientific method, personal and professional ethics and values

Psychology, Master of Arts

Master of Arts in Psychology

At CSUDH, we offer two tracks for our MA in Psychology – Clinical and Health. Both options provide students with a solid academic background by giving them an opportunity to complete advanced coursework and further develop their research skills by working closely with a faculty mentor on a research project or thesis. A wide variety of practicum sites are available for students to learn about direct service provision to clients, employees, and patients for students pursuing the clinical

psychology option. The MA in Psychology program is designed for students who want to strengthen their academic record in preparation for applying to doctoral programs. Others choose to begin careers in industry, mental health, community agency and education settings.

Clinical Psychology Option (MACP)

The Clinical Psychology option is designed to meet the professional needs of college graduates who plan careers in community mental health or who are already employed as paraprofessionals and desire to further their education and opportunities for advancement. The student is offered a unique opportunity to obtain solid academic knowledge of clinical psychology coupled with extensive research and supervised experience in the application of such knowledge. Students who are interested in pursuing licensure as a Licensed Professional Clinical Counselor (LPCC) may opt to take additional approved coursework beyond that required for the MA. Specific coursework and requirements will be provided by the Psychology Department and must be completed prior to graduating from the program.

In the Psychology M.A. (clinical) the student is required to complete 33 units of credit, plus 400 hours of supervised practicum in a clinical setting and/or supervised research and teaching in an academic setting. In addition, the student must successfully complete a written comprehensive examination or a thesis. Students seeking the LPCC are required to complete 63 units of specified coursework in our program and a minimum of 280 hours of face-to-face clinical work supervised by a licensed therapist. These 280 hours are included in the 400-practicum hour requirement not in addition to it.

Health Psychology Option (MAHP)

The Health Psychology Option will provide students with a solid academic background in health psychology. This specialized track is designed to meet the professional needs of college graduates who plan careers in community health and other health care settings such as rehabilitation centers, primary care centers and hospices. In addition, students enrolled in the Health Psychology Option will learn how to promote wellness in individuals and within organizations, and how to evaluate the effectiveness of prevention and treatment programs. The goal of a concentrated study in health psychology is to provide the student with an understanding of the relationships among biological, psychological, and social factors as they interact to influence mental and physical health. This goal is accomplished through an integrated program of coursework and research training. Students can earn up to 3 units of credit per semester for directed research (PSY 598) and thesis research (PSY 599). Our graduate students have been very successful securing funding for their graduate studies through several opportunities at California State University, Dominguez: Graduate Studies and Research travel fellowships, Graduate Equity Fellowship, and RA/TA fellowships. In the Psychology M.A. (Health Psychology track) the student is required to complete 36 units of credit. In addition, the student must successfully complete a thesis.

Admission Procedures

Admissions application deadline is **February 1st** at 11:59pm PST. **Any application after this deadline will not be considered.**

Prospective students should use the Cal State Apply application to apply to either the Clinical or Health Psychology option. Students must apply on or before February 1st to be considered for admission. Due to processing time, we strongly recommend that you complete your Cal State Apply application and submit official transcripts at least four weeks in advance of the department's February 1st application deadline.

Students will apply to and submit all materials via Cal State Apply: <https://www2.calstate.edu/apply/graduate> (<https://www2.calstate.edu/apply/graduate/>)

Below is a checklist of all the supplemental documents that you will need to upload and submit online.

All materials must be uploaded and submitted to Cal State Apply by February 1st

- Personal Statement
- CV/Resume
- Unofficial Transcripts of all institutions previously attended
- Unofficial Copy of Graduate Record Examination Scores (*check MA Program webpage (<https://www.csudh.edu/psychology/academic-programs/graduate/>) for GRE requirements for your application year*)
- One Writing Sample
- Three Letters of Recommendation
- All Official transcripts must be submitted to The Office of Admissions

Please refer to the Psychology MA Prospective Students webpage (<https://www.csudh.edu/psychology/academic-programs/graduate/prospective-students/>) for more details about the admission process, including an information packet, admission requirements (required courses, GPA, GRE... etc.), FAQ, and other helpful information.

Classified Standing and Conditionally Classified Standing

Only students who have met all requirements as noted under Admission Procedures - M.A. Programs for the Psychology Department (<https://www.csudh.edu/psychology/academic-programs/graduate/prospective-students/>) will be considered for admission into the M.A. in Psychology Program with Classified Standing.

Students who lack some of the admission requirements may be considered for admission into the program with Conditionally Classified Standing. This would allow them to enroll in the University to correct their deficiencies, and also permit them to take up to nine semester units of graduate coursework which could apply toward their degree if and when Classified Standing has been established. Please note that admission to Conditionally Classified Standing does not assure that a student will achieve Classified Standing in the program.

Requirements

Clinical Psychology Option (33 units)

Admission Requirements

1. A Bachelor's Degree from a fully accredited institution of higher education.
2. Graduate Record Examination (GRE) General Test (*check MA Program webpage (<https://www.csudh.edu/psychology/academic-programs/graduate/>) for GRE requirements for your application year*)
3. At least a "B" average in the last 60 semester units attempted
4. Successful completion of the following undergraduate courses or their equivalent, with at least a "B" average

| Code | Title | Hours |
|------------|---|-------|
| PSY 230 | Elementary Statistical Analysis in Psychology | 3 |
| PSY 235 | Intro To Research Methods | 3 |
| PSY 330 | Intermediate Statistics and Research Design | 3 |
| or PSY 331 | Measurement In Psychology | |

| | | |
|---------|-------------------------------------|---|
| PSY 360 | Theories Of Personality | 3 |
| PSY 363 | Abnormal Psychology | 3 |
| PSY 464 | Introduction to Clinical Psychology | 3 |

5. Special consideration concerning the waiving of some of the above requirements is possible (e.g., if the student has had extensive previous experience in the community or clinical area).

Degree Requirements

| Code | Title | Hours |
|--------------------------------|---|-------|
| PSY 535 | Advanced Research Methods | 3 |
| PSY 550 | Seminar in Developmental Psychology | 3 |
| PSY 563 | Seminar in Psychopathology | 3 |
| PSY 564 | Advanced Psychotherapy Techniques | 3 |
| PSY 565 | Psychology of Clinical Groups | 3 |
| PSY 567 | Individual Assessment | 3 |
| PSY 570 | Community Psychology: Current Theory and Issues | 3 |
| PSY 571 | Practicum in Clinical-Community Psychology | 3 |
| PSY 574 | Practicum: Diversity Issues in Clinical and Health Psychology | 3 |
| PSY 597 | Directed Reading | 3 |
| or PSY 599 | Thesis | |
| Select one from the following: | | 3 |
| PSY 510 | Career Development in Clinical and Counseling Psychology | |
| PSY 520 | Seminar in Psychopharmacology | |
| PSY 530 | Advanced Analysis of Variance and Multivariate Techniques | |
| PSY 555 | Psychology and Aging | |
| PSY 566 | Indv Intellectual Assess | |
| PSY 575 | Theories of Health and Behavior | |
| PSY 576 | Seminar in Health Psychology Research | |
| PSY 585 | Neuropsychology | |
| PSY 595 | Special Topics: | |
| PSY 596 | Clinical Psychology Practicum | |
| PSY 597 | Directed Reading | |
| PSY 598 | Directed Research | |

Total Hours 33

Additional program requirements include:

1. Comprehensive written examination or completion of a thesis. Students should register for PSY 597 Directed Reading (3 units) during the semester they plan to take the comprehensive examination. Students who choose to complete a thesis should register for PSY 599 Thesis in the semester they plan to defend.
2. A minimum of 400 hours of supervised practicum experience.
3. In addition to the major requirements, students must meet all university requirements for the master's degree indicated in the section of the catalog entitled "Graduate Degrees and Postbaccalaureate Studies (<https://catalog.csudh.edu/general-information/graduate-degree-postbaccalaureate-studies/>)."

Health Psychology Option (36 units)

Admission Requirements

1. A Bachelor's Degree from a fully accredited institution of higher education.

2. **Graduate Record Examination (GRE) General Test** (*check MA Program webpage (<https://www.csudh.edu/psychology/academic-programs/graduate/>) for GRE requirements for your application year*)
3. **At least a "B" average in the last 60 semester units attempted**
4. **Successful completion of the following undergraduate courses or their equivalent, with at least a "B" average**

| Code | Title | Hours |
|------------|---|-------|
| PSY 230 | Elementary Statistical Analysis in Psychology | 3 |
| PSY 235 | Intro To Research Methods | 3 |
| PSY 330 | Intermediate Statistics and Research Design | 3 |
| or PSY 331 | Measurement In Psychology | |
| PSY 363 | Abnormal Psychology | 3 |

Select one of the following:

| | | |
|-------------------------------------|-------------------|--|
| PSY 370 | Health Psychology | |
| Coursework in biological psychology | | |

5. **Special consideration concerning the waiving of some of the above requirements is possible (e.g., if the student has had extensive previous experience in the health psychology area)**

Degree Requirements

| Code | Title | Hours |
|---------|---|-------|
| PSY 520 | Seminar in Psychopharmacology | 3 |
| PSY 530 | Advanced Analysis of Variance and Multivariate Techniques | 3 |
| PSY 535 | Advanced Research Methods | 3 |
| PSY 555 | Psychology and Aging | 3 |
| PSY 563 | Seminar in Psychopathology | 3 |
| PSY 570 | Community Psychology: Current Theory and Issues | 3 |
| PSY 574 | Practicum: Diversity Issues in Clinical and Health Psychology | 3 |
| PSY 575 | Theories of Health and Behavior | 3 |
| PSY 576 | Seminar in Health Psychology Research | 3 |
| PSY 585 | Neuropsychology | 3 |
| PSY 599 | Thesis | 3 |

Select one from the following:

| | | |
|---------|--|---|
| PSY 510 | Career Development in Clinical and Counseling Psychology | 3 |
| PSY 550 | Seminar in Developmental Psychology | 3 |
| PSY 564 | Advanced Psychotherapy Techniques | 3 |
| PSY 565 | Psychology of Clinical Groups | 3 |
| PSY 566 | Indv Intellectual Assess | 3 |
| PSY 567 | Individual Assessment | 3 |
| PSY 595 | Special Topics: | 3 |
| PSY 597 | Directed Reading | 3 |
| PSY 598 | Directed Research | 3 |

Total Hours 36

Additional program requirements include:

1. Students must write a thesis as the culminating experience for awarding the degree Master of Arts in Psychology (Health Psychology Option).
2. In addition to the major requirements, students must meet all university requirements for the master's degree indicated in the section of the catalog entitled "Graduate Degrees and

Postbaccalaureate Studies (<https://catalog.csudh.edu/general-information/graduate-degree-postbaccalaureate-studies/>)."

Advancement to Candidacy

A student must be advanced to candidacy before taking the comprehensive examination or enrolling in PSY 599 Thesis. The requirements for advancement to candidacy are as follows:

1. Classified Standing in the Psychology M.A.
2. Completion of a minimum of 24 semester units of required courses.
3. Approved Program of Study.
4. A cumulative GPA of 3.0 in all courses taken as a graduate student.
5. No grade lower than a "C" in the degree program.

1. To apply psychological theories and principles (including the biopsychosocial approach) in the areas of lifespan development, health, psychopathology, psychological assessment, community psychology, and clinical psychology.
2. To use psychological research methods and statistical analyses to reach logical conclusions.
3. To apply ethical and legal principles to the practice of psychology.
4. To demonstrate appreciation of diversity among people and to structure teaching and psychotherapeutic as well as applied interventions to meet the educational, health needs, and mental health needs of diverse populations.
5. To display interpersonal skills and personal qualities (such as self-awareness, professional integrity, flexibility, compassion, and personal presence) important in the psychotherapeutic relationship.

Psychology, Minor Requirements

Select five upper division psychology courses, except the following:

| Code | Title | Hours |
|---------|---|-------|
| PSY 481 | Applied Sport & Fitness Psychology | 3 |
| PSY 482 | Psychology of Coaching and Team-Building | 3 |
| PSY 483 | Contemp Issues in Sports and Fitness Psychology | 3 |
| PSY 486 | Internship in Sport and Fitness Psychology | 3 |
| PSY 490 | Senior Seminar Psychology | 3 |
| PSY 497 | Seminar in Peer Advising | 3 |

Only one course may be selected from:

| Code | Title | Hours |
|---------|-------------------------|-------|
| PSY 396 | Practicum In Psychology | 3 |
| PSY 494 | Independent Study | 1-3 |
| PSY 496 | Internship ¹ | 3-6 |
| PSY 498 | Directed Research | 1-3 |

¹ A maximum of three units may apply to the minor.

PSY 235 Intro To Research Methods may be substituted for one upper division course.

Public Administration

College of Business Administration and Public Policy
Department of Public Administration

Features Undergraduate

The Bachelor of Science in Public Administration is designed to provide professional preparation for administrative or managerial positions in public service organizations. The degree program requires completion of a set of core courses common to all public administration students and a concentration.

The Bachelor of Science in Public Administration Degree is a single-field major, which means that students are not required to complete a minor for graduation.

The Minor in Public Administration is designed to provide a basic foundation in public management. The minor is especially appropriate for students who major in the Social and Behavioral Sciences. It is an attractive option to students with majors in fields that lead to public sector employment, like recreation or health science.

In addition to full-time faculty, the department has part-time faculty who are practicing public managers in their areas of specialization. Several of the full-time faculty also have lengthy careers as public managers.

To complement the traditional classroom instruction, the Department of Public Administration offers a number of activities that enhance the total educational experience of students. The department sponsors speakers and professional symposia. The faculty also sponsors the Pi Alpha Alpha, a renowned national honor society for outstanding Public Administration students.

Graduate

The Master of Public Administration (MPA) program is designed to provide quality professional education for persons entering or working in public service professions. The MPA program prepares students for careers as professional managers of public sector or nonprofit organizations, as well as for research, consulting, and teaching careers. The MPA curriculum provides a theoretical foundation for the practice of public management.

After meeting prerequisite requirements, students can finish all other program requirements in two and a half academic years if they complete two courses per semester and two summer courses (depending upon summer scheduled courses). The MPA program is accredited by the Network of Schools of Public Policy, Affairs and Administration (NASPAA), the professional association responsible for evaluating the quality of MPA degree programs. NASPAA is located at 1029 Vermont Ave., N.W., Ste. 1100, Washington, DC 20005-3517.

MPA Criminal Justice Policy and Administration Concentration

This program is designed to provide criminal justice agency professionals with coursework in policy-making, administration, and the managerial operations of the criminal justice system. The curriculum offers students who may be new to the field the insight and background needed to begin successful public sector careers, while preparing experienced professionals to assume positions that demand additional responsibility.

MPA Health Care Policy and Administration Concentration

This program is designed to provide a quality graduate professional education for individuals entering or currently employed in health services agencies. It prepares graduates for careers in health services administration, planning, policy, evaluation, consulting, and related careers.

MPA Nonprofit Management Concentration

Nonprofit Management concentration was developed to meet the needs of the growing nonprofit arena. This concentration offers students a program that addresses the social, political, and economic landscape of the sector, its origin, size, composition, and its role in American Society and elsewhere. The coursework will review the size, scope, and dimensions of the U.S. nonprofit sector and examine theories of the sector and its conceptual underpinnings in some depth along with historical and religious foundations. This concentration also looks at such issues as why people organize, give financial support, and donate time. The concentration examines key aspects of the fundraising process for nonprofit organizations, major theoretical foundations, and general fundraising principles as well as a variety of marketing and fundraising techniques, sources of donations, and aspects of managing the fundraising process. The concentration combines applied and conceptual readings and provides students with opportunities to apply concepts and techniques through a series of service-learning portfolio assignments in collaboration with area nonprofit organizations.

MPA Public Management Concentration

The Public Management concentration is designed to provide the Master of Public Administration program with an emphasis in the structure, functioning, and skill competencies required for contemporary managers in the public and nonprofit sectors. This concentration offers our students a program that addresses the social, political, and economic landscape of the public sector, and its history and role in American Society. This concentration provides a broad examination of theoretical perspectives, the environmental context, and management functions that can be used to analyze organizations and to improve organizational effectiveness. The concentration combines applied and conceptual readings and provides students with opportunities to apply concepts and techniques to issues experienced in various workplace settings.

Academic and Professional Advisement Undergraduate

Candidates for the Bachelor of Science (B.S.) degree receive academic advisement for designing and completing their program of study. Specialized professional advisement can be obtained from the CBAPP Student Success Center. Undergraduate students seeking professional advisement should contact department faculty, who are available to discuss career options and current policy issues in professions within the areas of Public Administration and Public Policy.

Graduate

Candidates for the Master of Public Administration (MPA) degree receive academic advisement through the College's Graduate Business and Public Administration Advising Office. Students seeking academic advisement should contact the MPA Advising Office at (310) 243-3646, or mpafacultyadvisor@csudh.edu.

Preparation Undergraduate

High school students should take college preparatory courses in the social and natural sciences, English and mathematics. Students taking their first two years of study at a community college are advised to complete lower division general education requirements.

Graduation with Honors for Undergraduate Students

An undergraduate student may be a candidate for graduation with Honors in Public Administration by meeting the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of 3.5 in all courses used to satisfy the upper division requirements in the major.

Career Possibilities Undergraduate

The job opportunities for students in public administration include employment in the public, non-profit, and private sector professions, as well as in federal, state, and local agencies in the field of public administration and related public services. Students may be employed in fields such as law enforcement, human services, education and transportation. The degree also prepares students for graduate and professional education in public administration, public policy and law.

Graduate

The Master of Public Administration (MPA) degree provides students with the educational background and professional competencies needed to secure upper level administrative/managerial positions in a variety of public sector and nonprofit organizations, or in firms with close ties to governments such as utilities or defense contractors.

The majority of MPA students at CSU, Dominguez Hills are already employed by public agencies when they begin their graduate education and use their Master's degrees for professional advancement within their organizations. Other students with little or no work experience, or those with no managerial experience, use the MPA degree to obtain entry-level administrative or management positions. Students also use the MPA degree as preparation for doctoral study, law school, and careers in teaching and research.

Courses

PUB 195. Special Topics in Public Administration. (3 Units)

This course provides an overview of special topics the field of public administration, which is concerned with the study of the implementation of public policies and the management of public organizations. Topic and content will vary as announced
Offered As needed

PUB 300. Foundations of Public Administration. (3 Units)

Analysis of the role of public administration within the American political system and of the concordant functions and responsibilities of public sector administrators; discussion of administrative ethics; overview of public sector administrative and managerial processes.
Offered Fall, Spring, Summer, All terms

PUB 301. Administrative Leadership and Behavior. (3 Units)

Study of human behavior in organizational settings; examination of how managerial/supervisory functions impact employee morale and productivity and overall organizational effectiveness. Primary areas of analysis include motivation, leadership, interpersonal and group dynamics, communication, and organizational power.
Offered Fall, Spring, Summer

PUB 302. Public Financial Administration. (3 Units)

Administrative and political considerations of fiscal policy, the budgetary process and fiscal controls, financial management and planning, government and the economy, intergovernmental fiscal relations and nature of grants-in-aid, alternate revenue sources, contemporary issues.
Offered Fall, Spring

PUB 303. Public Personnel Administration. (3 Units)

Study of policies, methods, and techniques in Public Personnel Administration; government personnel systems; manpower management; values in public career systems; concepts of man and work; motivation and morale; training; labor-management relations; contemporary issues. Offered Fall, Spring

PUB 304. Administration of Public Policy. (3 Units)

Policy decisions and their implementation and evaluation, relationship of the branches of government and characteristics of bureaucracy. Offered Fall, Spring, Summer

PUB 305. Applied Statistics in Public Administration. (3 Units)

Prerequisite: MAT 131. Role and application of statistical analysis in public management; review of mathematics and statistical functions; use of statistics in planning and decision-making functions; introduction to the uses and application of computer technology. Offered Fall, Spring, All terms

PUB 306. Research Methods in Public Administration. (3 Units)

Introduction to research methods in social science and their application in public administration, including formulating research questions, reviewing literature, designing data collection processes, describing sample and population, conducting statistical analysis and writing research papers. Offered All terms

PUB 307. Public Sector Ethics. (3 Units)

Introduction to government ethics, providing opportunities to develop ethical competence for careers in government and serves as a foundation for further study of government ethics. Offered All terms

PUB 314. Compensation, Staffing, and Appraisal. (3 Units)

Prerequisite: PUB 303 or MGT 313. Review of concepts, approaches and techniques used to develop compensation programs in public organizations. Emphasis will be upon practices, legal requirements and guidelines for these specialized areas of personnel management. Offered Fall, Spring, Summer

PUB 315. Labor-Management Relations in Government. (3 Units)

Developments in public employee unionization, collective bargaining laws and strategies, bargaining as a technical and political process, strikes and impasse machineries, employee organizations and public policy, administrative implication of public service unionism. Offered Fall, Spring

PUB 324. Analytic Decision-Making. (3 Units)

Analytic and quantitative approaches to planning, evaluation, and decision-making; rational decision-making process as analytic framework for comparing alternative public policies and actions; public sector applications of selected quantitative methods, such as forecasting and cost-benefit analysis. Offered Fall, Spring

PUB 329. Local Government Administration. (3 Units)

Introduction to the history, theory and practice of U.S. local government administration, including the changing structure, forms, and functions of local governments; the dynamics of intergovernmental, intersectoral, and interpersonal relationships; the tools and strategies that contribute to effective local government management and solution of problems. Offered All terms

PUB 330. Urban Administration. (3 Units)

Structures and processes of administrative agencies in the urban setting, interagency relationships, administration of urban public services, functions and problems of the urban public executive. Offered Fall, Spring

PUB 371. Introduction to Health Services Administration. (3 Units)

Basic administrative practices; concepts and theory of administration; role and responsibilities of management in planning, organizing, directing and controlling a health services program; examination of current policy issues; study of public policy formulation process; politics as a force of change. Offered Fall, Spring

PUB 373. Health Policy. (3 Units)

Examination of current issues, trends, and problems in health care, including public policy on the national, state and local community levels. Emphasis will be given to the changing nature of medical care delivery, the policy formation process, professional dominance, and new developments in organizational forms. Offered Fall

PUB 401. Economics for Public Service. (3 Units)

Introduction to the economics concepts for those interested in a career in public service. This course explores the economic principles behind societal problems and offers insights into how to solve them; how markets and prices allocate scarce resources to achieve efficiency and prosperity; discuss how markets can fail, and what the public can do to intervene and solve these market failures to improve social welfare. Offered All terms

PUB 426. Intergovernmental Relations and Grant-Writing. (3 Units)

Analysis of financial and administrative relationships between different levels of government and between the public, non-profit, and private sectors. Discussion of developments in grants-in-aid, grantmanship strategies, grants management, resource development and evaluation. Application of knowledge through a grant proposal writing project. Offered Spring

PUB 434. Administrative Planning. (3 Units)

A review of the techniques of administrative planning to include normative forecasting, planning and policy formation. The future environment of government services to include demands and resources will be explored within the framework of systems analysis and policy sciences. Offered Fall, Spring

PUB 450. Nonprofit & Voluntary Sector. (3 Units)

Provides broad overview of the sector, its origin, size, composition, and role in American Society and elsewhere. This course also reviews theories of the sector and its conceptual underpinnings (i.e., its philosophical, political, economic, and social basis in American society) in some depth along with historical and religious foundations. We will also look at such issues as why people organize, give financial support and donate time. Offered Fall, Spring

PUB 451. Managing the Nonprofit Organization. (3 Units)

Prerequisite: PUB 450 (recommended). This course aims to understand the important role of nonprofit organizations in American society and the growing impact of non-governmental agencies around the world. It addresses the opportunities for and challenges to organizational effectiveness and is designed to reflect the interests and needs of nonprofit staff, board members, volunteers, and those who are seeking to make an impact with their financial contributions. Offered Fall

PUB 452. Fundraising & Fund Development. (3 Units)

Prerequisites: PUB 450; PUB 451 (recommended). This course examines key aspects of the fundraising process for nonprofit organizations- major theoretical foundations and general fundraising principles as well as a variety of fundraising techniques, sources of donations, and aspects of managing the fundraising process. The course combines applied and conceptual readings and provides students with opportunities to apply concepts and techniques through a series of service-learning portfolio assignments in collaboration with area nonprofit organizations.

Offered Infrequent

PUB 490. Senior Seminar in Public Administration. (3 Units)

Prerequisite: Senior status. Integrative course emphasizing application of administrative concepts and principles through use of case study analyses and simulation. Based upon student interest, course may be structured to address specific concentration areas. Three hours of seminar per week.

Offered Fall, Spring

PUB 494. Independent Study. (1-3 Units)

Prerequisite: Consent of department chair. Independent investigation of a research problem or directed readings in a selected area of public administration. CR/NC grading.

Offered Fall, Spring, Summer

PUB 495. Special Topics. (1-3 Units)

Prerequisite: Consent of instructor. An intensive study of an issue, concept or administrative technique that is of interest to both students and faculty of public administration.

Offered Fall, Spring

PUB 496. Internship Practicum. (3 Units)

Prerequisite: Consent of department chair. Supervised internship in a public agency. A written project related to the internship experience is required. CR/NC grading.

Offered Fall, Spring

PUB 498. Directed Research in Pub Admin. (1-3 Units)

Prerequisite: Consent of instructor. The student develops and completes an individual study under faculty supervision. Repeatable course

Offered Infrequent

PUB 500. Environment and Practice of Public Administration. (3 Units)

History and development of the field of public administration, and the context of operations and the functions of management. The practice of management will focus on the political environment, management theory, planning, organizational structure, resources, decision-making and policy analysis.

Offered Fall, Spring

PUB 501. Public Management. (3 Units)

Structural overview of the functioning and skill requirements for contemporary managers in public and nonprofit sectors; examination of the basic management functions from a comparative perspective; emphasis on communication and critical thinking through action-based approaches.

Offered Fall, Spring

PUB 502. Administrative Theory and Behavior. (3 Units)

Prerequisites: PUB 500 and PUB 501 are recommended. Historical overview of Organizational Theory and Public Administrative Theory and analysis of the theoretical perspectives that have characterized these fields; discussion of various theories, concepts, and models that can be used to analyze organizations and to improve organizational effectiveness.

Offered Fall, Spring

PUB 503. Introduction to Research Methods in Public Administration. (3 Units)

Introduction to empirical research design in the social sciences, and public administration in particular. Students will learn to assess the use of both qualitative and quantitative research in social sciences and discuss the epistemological principles that underlie different approaches to research.

Offered All terms

PUB 504. Quantitative Methods in Public Administration I. (3 Units)

The first course in a two-course sequence on quantitative methodology in Public Administration (the subsequent course is PUB 505). The goal of this two-course sequence is to explore a variety of statistical methods that are useful for managerial planning, decision-making, and public policy analysis.

Offered Fall, Spring

PUB 505. Quantitative Analysis in Public Administration II. (3 Units)

Required Prerequisite: PUB 504. This is the second course in a two-course sequence on quantitative methodology in Public Administration (the previous course is PUB 504). The goal of this two-course sequence is to explore a variety of statistical methods that are useful for managerial planning, decision-making, and public policy analysis.

Offered Fall, Spring, Summer

PUB 506. Administration and Public Policy Analysis. (3 Units)

Prerequisite: PUB 505. Application of analytical tools to the solution of public management problems, introduction to general models of policy analysis, integration of solutions into administrative processes in government; policy studies cases.

Offered Fall, Spring

PUB 508. Public Human Resources Management. (3 Units)

Managing the human resources of a public agency with emphasis on selected activities of recruiting, staffing, evaluating, compensating, motivating and training the work force. Procedures and legal requirements for collective bargaining, affirmative action, and equal opportunity will be explored. Three hours of seminar per week.

Offered Fall, Spring

PUB 510. Public Budgeting. (3 Units)

Examination of methods, processes and problems in the budgeting and administration of public revenues, revenue generation, forecasting, cost control; emphasis on the political, economic and managerial aspects of public budgeting.

Offered Fall, Spring

PUB 512. Foundations of Ethical Administration. (3 Units)

Examination of the foundations of ethical administration, including evaluation and application of ethical theories to public sector issues. Course provides opportunities for students to think reflectively, recognize ethical problems, and gain skills to effectively deal with political and administrative problems.

Offered Fall, Spring

PUB 520. Leadership in the Public Sector. (3 Units)

Prerequisites: PUB 501 and PUB 502 are required. Overview of the theoretical and practical foundations of leadership in the public sector. Emphasizes the knowledge and skills needed to effectively lead within public and nonprofit organizations.

Offered Fall, Spring

PUB 522. Financial Management in the Public Sector. (3 Units)

Prerequisite: PUB 510. Course offers survey of financial management functions in state and local government such as accounting, fund structures, debt and cash management, and financial reporting. Course provides a theoretical and practical introductions to financial analysis and management in the public sector.

Offered All terms

PUB 524. Strategic Management and Planning in Public and Non-Profit Organizations. (3 Units)

Course aims to prepare current and future managers of public and/or non-profit organizations by focusing in the knowledge, skills, values, and perspectives needed to manage organizations strategically. The course provides an introduction to the theory and application of strategic planning and management in the public and non-profit sectors.

Offered All terms

PUB 526. Collab Governance. (3 Units)

Course examines theoretical foundations and practical models of collaborative management in local government. Students will collect and review relevant literature fro inter-government relations, public management, and public/private partnerships, and apply findings to a policy issue in local government.

Offered All terms

PUB 527. Fundamentals of Qualitative Research. (3 Units)

Prerequisite: PUB 500 is required. Introductory course on the most important concepts and methods of qualitative research. Involves reading and discussion of presentations and examples of qualitative research and a qualitative research project.

Offered Spring

PUB 528. Economics for Public Managers. (3 Units)

This course aims to demystify economics for managers in the public and nonprofit sectors. This course will provide you with the economic principles to better analyze and understand problems facing public managers. You will learn why markets can be so successful in allocating scarce resources and achieving efficient market and social welfare outcomes. You will learn how individuals, firms and government, as producers, consumers, and regulators, interact at the microeconomic level, and why macroeconomic concepts such as inflation, unemployment, economic growth, interest rates, and are important to understand. You will also learn how governments can intervene to solve market failures and hence improve social welfare.

Offered All terms

PUB 570. Administration of Health Care Organizations. (3 Units)

This course will examine issues associated with health care management responsibilities, functions and leadership. This course will analyze the administrative process, accountability, equity, ethics, and diversity issues in health care administration.

Offered Fall, Spring

PUB 572. Legal Issues in Health Care Administration. (3 Units)

This course defines the foundation, scope, and boundaries of health care policy with an emphasis on public health care systems and the Patient Protection and Affordable Care Act. Students will explore the differences between local, state, and federal health policy levels.

Offered Fall, Spring

PUB 574. Health Care Financial Management. (3 Units)

This course provides a comprehensive overview of the financial structure, market forces, and techniques in health care financial management. The courses is intended for students without a background in financial management.

Offered Fall, Spring

PUB 580. Nonprofit Leadership and Management. (3 Units)

Prerequisites: PUB 500 and PUB 501 are recommended. Provides an overview of the nonprofit sector and addresses leadership and management issues. Emphasizes the context, institutional setting of the sector and nonprofit governance, leadership, ethics, marketing, strategic communications, advocacy, lobbying, program evaluation and human resource management.

Offered Fall, Spring

PUB 582. Public and Nonprofit Financial Management. (3 Units)

Prerequisite: PUB 510 is required. Examines financial management functions in government and nonprofit organizations, such as financial planning, accounting, cost control, fund structures, debt and cash management, financial reporting, and financial trend monitoring.

Offered Fall, Spring

PUB 584. Fundraising and Development for Nonprofit Organizations. (3 Units)

Prerequisites: PUB 500 and PUB 502 are required. Examines key aspects of the fundraising process, techniques and management, such as sources of donations, planning, development, fund goal-setting, major gifts, capital campaigns, trustee participation, and managing the fundraising process.

Offered Fall, Spring

PUB 592. Capstone: Integrative Seminar in Public Administration. (3 Units)

Prerequisite: Completion of MPA Core courses. Integrative course that emphasizes the interrelationships between the academic field of public administration and administrative practice. Course includes case study analysis and individual and group integrative projects. Three hours of seminar per week.

Offered Fall, Spring

PUB 594. Independent Study. (1-3 Units)

Prerequisite: Consent of MPA Program coordinator. Independent investigation of a research problem or directed readings in a selected area of public administration. CR/NC grading. Repeatable course.

Offered Fall, Spring

PUB 595. Special Topics In Public Administration. (3 Units)

Prerequisite: Consent of MPA Program coordinator. Intensive study of a specialized area of Public Administration (e.g., Urban Administration, Criminal Justice Administration) or a selected topic in contemporary public management. Three hours of seminar per week. Repeatable course.

Offered Fall, Spring

PUB 596. Internship Practicum. (3 Units)

Prerequisite: Consent of MPA program coordinator. Supervised internship working with a cooperating government agency in a function germane to public administration. Sessions are held to discuss and analyze the problems with which interns are concerned. A written project related to the internship is required. CR/NC grading.

Offered Fall, Spring

PUB 599. Honors Thesis. (3 Units)

Prerequisites: Grade point average greater than 3.80 and consent of MPA program coordinator. Thesis relating to public administration. CR/NC grading.

Offered Fall, Spring

PUB 600. Grad Continuation Course. (1 Units)

Graduate students who have completed their coursework but not their thesis or comprehensive examination, or who have other requirements remaining for the completion of their degree, may maintain continuous attendance by enrolling in this course. Signature of the MPA coordinator required.

Offered Fall, Spring

Criminal Justice Administration, Minor

Public Administration, Bachelor of Science

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major, no minor required.

Major Requirements (48 units)

Students must select one of the concentrations listed. The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

Note: The Administration Management concentration is being phased out. Continuing students and students admitted in fall 2020 may elect to change to the new program: B.S. Public Administration: Public Management. Please consult the program coordinator/advisor for additional information."

Common Core Requirements (36 units)

| Code | Title | Hours |
|--|---|--------------|
| Lower Division Required Courses | | |
| CIS 270 | Info Sys/Tech Fundamentals | 3 |
| Select one of the following: | | 3-4 |
| MAT 105 | Finite Mathematics | |
| MAT 131 | Elementary Statistics and Probability | |
| MAT 132 | Statistics and Probability with Support | |
| Upper Division Required Courses | | |
| Select one of the following options: | | 3 |
| Option 1 | | |
| BUS 300 | Business Communications ¹ | |
| Option 2 | | |
| BUS 301 | Employment Communications ¹ | |
| BUS 302 | Written Communications ¹ | |
| BUS 303 | Oral Communication ¹ | |
| PUB 300 | Foundations of Public Administration | 3 |
| PUB 301 | Administrative Leadership and Behavior | 3 |
| PUB 302 | Public Financial Administration | 3 |
| PUB 303 | Public Personnel Administration | 3 |
| PUB 304 | Administration of Public Policy | 3 |
| PUB 305 | Applied Statistics in Public Administration | 3 |
| or CJA 341 | Statistics in Criminal Justice Administration | |
| PUB 306 | Research Methods in Public Administration | 3 |
| or CJA 339 | Research Methods and Communication in Criminal Justice Administration | |
| PUB 307 | Public Sector Ethics | 3 |
| PUB 490 | Senior Seminar in Public Administration | 3 |
| Total Hours | | 36-37 |

¹ BUS 301 Employment Communications, BUS 302 Written Communications, and BUS 303 Oral Communication are accepted instead of BUS 300 Business Communications.

Concentrations

Each student must select one of the concentrations listed below:

Public Management Concentration (12 units)

| Code | Title | Hours |
|------------------------------|---|-----------|
| PUB 324 | Analytic Decision-Making | 3 |
| PUB 329 | Local Government Administration | 3 |
| Select two of the following: | | 6 |
| PUB 401 | Economics for Public Service | |
| PUB 426 | Intergovernmental Relations and Grant-Writing | |
| PUB 434 | Administrative Planning | |
| Total Hours | | 12 |

Criminal Justice Administration Concentration (12 units)

| Code | Title | Hours |
|--|---|-----------|
| PUB 324 | Analytic Decision-Making | 3 |
| CJA 340 | Crim Justice & Community | 3 |
| CJA 342 | Legal and Ethical Foundations of Justice in Criminal Justice Administration | 3 |
| Select one CJA 300-level or CJA 400-level course | | 3 |
| Total Hours | | 12 |

Health Services Administration Concentration (12 units)

| Code | Title | Hours |
|--------------------|--|-----------|
| PUB 324 | Analytic Decision-Making | 3 |
| PUB 371 | Introduction to Health Services Administration | 3 |
| PUB 373 | Health Policy | 3 |
| PUB 426 | Intergovernmental Relations and Grant-Writing | 3 |
| Total Hours | | 12 |

Nonprofit Management Concentration (12)

| Code | Title | Hours |
|--------------------|---|-----------|
| PUB 324 | Analytic Decision-Making | 3 |
| PUB 426 | Intergovernmental Relations and Grant-Writing | 3 |
| PUB 450 | Nonprofit & Voluntary Sector | 3 |
| PUB 451 | Managing the Nonprofit Organization | 3 |
| Total Hours | | 12 |

Public Financial Management Concentration (12 units) - *Admission is currently suspended for this concentration.*

| Code | Title | Hours |
|---|---|-------|
| ACC 230 | Financial Accounting | 3 |
| ACC 231 | Managerial Accounting | 3 |
| PUB 426 | Intergovernmental Relations and Grant-Writing | 3 |
| Select one additional course from the following | | 3 |
| ACC 431 | Govt & Nonprofit Acctg | |

Public Administration, Master of

Public Administration

Degree Requirements

Core Curriculum (33 units)

Core courses are designed to give a thorough background in each of the major areas of Public Administration.

| Code | Title | Hours |
|--------------------|---|-----------|
| PUB 500 | Environment and Practice of Public Administration | 3 |
| PUB 501 | Public Management | 3 |
| PUB 502 | Administrative Theory and Behavior | 3 |
| PUB 503 | Introduction to Research Methods in Public Administration | 3 |
| PUB 504 | Quantitative Methods in Public Administration I | 3 |
| PUB 505 | Quantitative Analysis in Public Administration II | 3 |
| PUB 506 | Administration and Public Policy Analysis | 3 |
| PUB 508 | Public Human Resources Management | 3 |
| PUB 510 | Public Budgeting | 3 |
| PUB 512 | Foundations of Ethical Administration | 3 |
| PUB 592 | Capstone: Integrative Seminar in Public Administration | 3 |
| or PUB 599 | Honors Thesis | |
| Total Hours | | 33 |

Concentration Area (9 units)

Each student must select one concentration area from the following (9 units)

Criminal Justice Policy and Administration Concentration

| Code | Title | Hours |
|--------------------------------|---|----------|
| CJA 563 | Administrative Law, Policy and Analysis | 3 |
| CJA 565 | Issues in Police Administration and Ethics | 3 |
| Select one from the following: | | 3 |
| CJA 566 | Issues in Homeland Security and Terrorism | |
| CJA 540 | Adv. Criminal Justice Issues | |
| CJA 595 | Special Topics in Criminal Justice Administration | |
| CJA 596 | Internship Practicum | |
| Total Hours | | 9 |

The NASPAA five universal required competencies are defined as follows:

- To lead and manage in public governance: Examine the theory and practice of the discipline of public administration; Assess the role of environmental context in leading and managing public organizations (including political, legal, economic and social factors); Develop competencies and skills to effectively and ethically lead and manage in public organizations; and Evaluate different reform strategies aimed at effective management in the public sector.
- To participate in and contribute to the public policy process: Explain the public policy processes; Evaluate the roles of public administrators in the public policy processes; Integrate theoretical and applied knowledge in public policy analysis and/or program evaluation; and Use data to conduct public policy analysis and/or program evaluation, and provide recommendations to policy makers and public managers.

- To analyze, synthesize, think critically, solve problems and make decisions: Utilize critical thinking to construct and deconstruct arguments; Synthesize applied social science research; Conduct applied social science research using qualitative and/or quantitative analytical tools to assess the validity of research hypotheses and generate meaning and understanding; and Integrate information to facilitate recommendations, decision making, and problem solving for administrative and policy processes.
- To articulate and apply a public service perspective: Apply the normative frameworks to make ethical decisions in the public sector; Practice democratic values that contribute to effective public service and responsible citizenship; Value and demonstrate commitment to social equity and justice; and Demonstrate professionalism and respect for citizens.
- To communicate and interact productively with a diverse and changing workforce and citizenry: Examine multicultural and global work environments; Utilize various communication and information technology tools and strategies (e.g., written reports, PowerPoint, Excel, SPSS, emails, and internet) to manage [sic] public organizations; Collaborate with stakeholders of diverse age, cultural, educational, professional backgrounds, and interests to reach consensus; and Analyze workforce-related issues and policies and articulate appropriate courses of action.

Public Administration, Minor Requirements

| Code | Title | Hours |
|--|--------------------------------------|-----------|
| PUB 300 | Foundations of Public Administration | 3 |
| PUB 303 | Public Personnel Administration | 3 |
| Complete three additional courses in Public Administration, to be chosen with the assistance of an advisor | | 9 |
| Total Hours | | 15 |

Quality Assurance

College of Natural and Behavioral Sciences

Program Description

Quality Assurance is an interdisciplinary profession practiced by management personnel who are responsible for planning and assuring the quality of products and services. The career opportunities in this rapidly growing field are excellent. Quality professionals are members of management teams where their specialized skills promote organizational excellence, reduce wastes, and improve existing processes. The traditional applications of Quality as related to product performance have evolved to most every industry, such as healthcare, finance, hospitality, and non-profits.

The online Master of Science in Quality Assurance (MSQA) degree program is designed to prepare professionals in quality, engineering, science, management, health care, government and service industries for career advancement. Topics covered include Total Quality Management (TQM), Six Sigma, ISO 9000, reliability, benchmarking, process improvement, quality control, human factors in quality assurance, measurement and testing techniques, quality project management, productivity, quality function management, and customer satisfaction.

The degree programs are supported by local members of the ASQ- Global Voice of Quality Organization.

Features

Undergraduate

The B.S. in Quality Assurance (BSQA) and the B.S. in Quality Assurance with Measurement Sciences option incorporate an interdisciplinary approach that blends the basic sciences, technologies, management principles, quality concepts and statistics. Skills and knowledge in these areas are obtained in the context of a well-rounded learning experience consistent with the University's mission and the needs of industry. The coursework develops problem-solving skills with a customer-focus. An ability to implement continuous improvement of processes, products, and services is a key goal of the Quality professional. For students interested in technical areas of Quality and metrics, an option in Measurement Sciences is offered.

Online and on-site versions of the degree are designed to serve working adults in related quality fields who wish to complete a four year degree. The online and on-site BSQA programs are designed primarily as upper division transfer programs for students who have completed the majority of their lower division general education courses. On-campus attendance is not required to complete requirements in the online BSQA and BSQA Measurement Science programs.

Graduate

The Master of Science in Quality Assurance (MSQA) is designed to prepare professionals in quality, engineering, science, and/or management for career advancement. Quality professionals are members of management teams where their specialized skills promote organizational excellence, reduce wastes, and improve existing processes. The traditional applications of Quality as related to product performance have evolved to most every industry, such as healthcare, finance, hospitality, and non-profits. The curriculum is designed to meet the needs and interests of the working professional.

The program of study provides theoretical knowledge and analytical techniques, as well as management and communication skills that will enable the student to function in an active, decision-making capacity in the implementation of policies and practices. A unique feature of the MSQA program is that it gives students the ability to customize their program of study to include their areas of interest. During the course of the program students will acquire knowledge and skills in the following areas: managing a Quality organization; planning and implementing a Quality program; troubleshooting and solving quality problems; incorporating quality concepts and human factors techniques in the design of manufacturing operations; performing vendor surveys and assessing vendor quality; developing and analyzing statistical process control charts; developing and analyzing acceptance sampling plans; design of experiments; design and engineering of reliable products and processes; performing process capability studies; performing quality cost analyses; understanding and working with human behavior in the organization; performing reliability, maintainability, and safety systems reviews; performing quality system audits; and performing statistical studies and analyzing statistical reports. Options for a concentration in traditional manufacturing-focused Quality concepts, as well as applications specific to Healthcare and Service Industries are available.

Online and on-site versions of the degree are available to serve working adults. The degree program is supported by local chapters of the ASQ- Global Voice of Quality Organization.

Academic Advisement

For general questions about admission or degree requirements for the Quality Assurance programs, students and perspective applicants may contact Student Support Coordinator, Karla Martinez.

For academic advisement, students can contact the MSQA Advising Consultant, Dr. Milton Krivokuca.

Preparation

The Master of Science in Quality Assurance (MSQA) is designed to prepare professionals in quality, engineering, science, management, health care, government and service industries for career advancement

In order to help manage and lead today's organizations toward the objective of "total quality," an interdisciplinary approach is taken to blend study in management, quality concepts, and statistical tools. The curriculum is designed to meet the needs and interests of the working professional. Relevant theoretical and practical course work, independent study, interaction with fellow students and leading learning experience.

A unique feature of the MSQA program is the opportunity students have to customize their program of study to include areas of personal and professional interest.

Participating in the MSQA course work will help prepare professional to take the examinations leading to the Certified Quality Auditor (CQA), Certified Quality Engineer (CQE), Certified Quality Manager (CQM), and Certified Reliability Engineer (CRE) certifications.

Admission Requirements

To be admitted to the MAster of Science in Quality Assurance program, applicant must meet the following requirements:

1. Meet all CSU Dominguez Hills graduate admission requirement;
2. A baccalaureate degree from a four-year accredited institution is required. An undergraduate major in engineering or science is preferred (please see note below);
3. A grade point average of at least 2.50 in the last 60-semester units of upper division coursework attempted;
4. Good standing at the last institution attended; and
5. Meet all other university admission requirements.

The baccalaureate degree should have included the following:

- 6 semester units of Calculus (integral and differential)
- 3 semester units of Chemistry (genera)
- 3 semester units of Physics
- 6 semester units of Mathematical Statistics & Theories of Probability (upper division)
- 3 semester units of Principles of Computer Technology

Note: Individuals from other undergraduate disciplines who demonstrate exceptional promise may be admitted to the program, pending completion of additional undergraduate prerequisites coursework or other demonstrations of competence as determined by the Quality Assurance Academic Program Committee. All special admissions are subject to approval by the Quality Assurance Academic Program Committee.

Undergraduate Programs

Bachelor

- Quality Assurance, Bachelor of Science (p. 802)

Graduate Programs

Master

- Quality Assurance, Master of Science (p. 803)

Faculty

Lynda Willson, Interim Program Coordinator

Program Office: EE 1300, (310) 243-3880

Courses

QAS 200. Fundamentals of Quality. (3 Units)

A study of the fundamentals of Quality with an emphasis on the current international standards, planning, organizations, methods and tools.

Emphasizes the works of leading international Quality theorists, especially Juran and Deming.

Offered Fall, Spring, Summer

QAS 220. Fundamentals of Measurement Science. (3 Units)

Prerequisites: MAT 131. Introductory overview of the fundamentals of measurement with emphasis on application of measurement science concepts to quality management. Upper Division

Offered Fall, Spring, Summer

QAS 312. Interpretation of Technical Documentation. (3 Units)

Prerequisites: MAT 153, QAS 200, QAS 220. Interpretation of basic engineering drawing concepts, including all related common symbolism and formatting. Emphasis on dimensions, tolerances, and configuration management. Introduction to Military and Federal Specifications/ Handbooks, ANSI, IEC, and ISO documents, specifications and recommended practices issued by private organizations.

Offered Spring

QAS 325. Technical Communications. (4 Units)

Prerequisites: ENG 110, THE 120. Technical communications, written and oral, and how they differ from non-technical writing and speech. Emphasizes methods for the positive and unambiguous transfer of technical ideas so that they can be clearly understood by the reader or listener.

Offered Summer

QAS 330. Statistical Quality Control and Inspection. (3 Units)

Prerequisites: MAT 131, QAS 200, QAS 220. Introduction to the application of statistical methodologies to the analysis and solution of quality and management problems (including probability concepts, control charts, and sampling). Focus will be on application of these tools to the inspection process.

Offered Fall

QAS 331. The Manufacturing Process. (3 Units)

Prerequisites: QAS 312. Introduction to the fundamentals of manufacturing, where the conversion of raw materials and sub-assemblies into more useful entities adds value to the converted materials in the most efficient manner, using the least amount of time, money, space and manpower.

Offered Fall

QAS 332. Electrical Metrology. (3 Units)

Prerequisites: MAT 131, PHY 122, QAS 200, QAS 220. Electrical measurement concepts, circuits and devices; applications to DC and AC measurements. Theory of coupled circuits in magnetic and capacitive environments, and electrical laboratory practices, with analysis, construction, and troubleshooting of circuits. Documentary control procedures for calibrations and other measurements.

Offered Spring

QAS 335. Quality Auditing. (3 Units)

Prerequisites: QAS 200. The fundamental principles for preparing and planning, conducting, reporting and closing quality audits. Quality audit tools and techniques are introduced, with an emphasis on generally-accepted quality audit practices that support business performance.

Offered Fall

QAS 340. Measurement Uncertainty. (3 Units)

Prerequisites: MAT 131, MAT 153, QAS 200, QAS 220. Theoretical versus actual measurements. Probability and statistical concepts to define accuracy, precision, error, uncertainty, and bias. Differences between measurement accuracy and measurement error; random and systematic error; uncertainty interval; tolerance limits; accuracy ratio; relative errors; and propagation of measurement errors.

Offered Spring

QAS 347. Dimensional Metrology. (3 Units)

Prerequisites: PHY 122, QAS 200, QAS 220. Measurement of length, angularity, relative position, flatness, parallelism, concentricity, squareness, and threads. Lasers and optical tooling in large-scale measurements; also gauges, comparators, and measurement machines. Measurement uncertainties pertinent to dimensional metrology; sources of error; the effect of the measurement environment.

Offered Infrequent

QAS 350. Physical Metrology. (3 Units)

Prerequisites: PHY 122, QAS 200, QAS 220. Theoretical and practical applications of measurement principles as applied to various physical properties. Measurement of pressure, mass, force, torque, temperature, humidity, flow, and rotational motion. Identifying sources of error, techniques to minimize errors and maintaining measurement traceability.

Offered Infrequent

QAS 355. Safety and Reliability. (3 Units)

Prerequisites: MAT 131, MAT 153, QAS 200, QAS 220. Reliability, maintainability, and safety technology with practical industrial applications. Basic models; metrics; testing; methods of implementing improvements; accelerated life testing. Failure mechanisms for chemical, electro-chemical, electronics, electro-mechanical and opto-electronics systems. Introduction to software reliability. Focus on qualification for ISO 9000.

Offered Spring

QAS 360. Fundamentals of Lean Manufacturing. (3 Units)

Prerequisites: QAS 200, QAS 220. Deals with the strategies and practices of lean production, as well as assess with areas of waste, interrelationships among the various components of a system, theories of leadership and management of people, and process variation.

Offered Spring

QAS 395. Selected Topics in Quality Assurance. (1-4 Units)

Prerequisite: Consent of Instructor. An intensive study of an issue, concept, or theory in Quality Assurance that is of special interest to both the faculty member and the student. Repeatable course.

Offered As needed

QAS 427. Quality Improvement. (3 Units)

Prerequisites: QAS 200, QAS 220. Quality factors involving customer satisfaction, demonstrating that meeting quality needs requires and active role by all the major sectors of an organization. Operational and statistical techniques most often used to monitor, control, and improve the quality of products or services.

Offered Fall

QAS 445. Systems Failure Analysis. (3 Units)

Prerequisites: QAS 200 and QAS 220. Integrates Quality, Manufacturing and Procurement efforts to identify and eliminate the root causes of failures in systems, sub-systems and components, emphasizing fault tree and Pareto analyses. Hardware and statistical analysis, design of experiments, and technical data package evaluations.

Offered Fall

QAS 450. Value Based Quality. (3 Units)

Prerequisites: QAS 200, QAS 220 and consent of instructor. Used value received, as perceived by the customer, as the primary measure of quality in the development of cohesive enterprise-wide quality management systems. A systemic approach to establishing the correct things to do and a measurement -based process for implementation.

Offered Spring

QAS 494. Independent Study. (1-3 Units)

Prerequisites: Consent of instructor. Independent study of a particular problem under the direction of a member of the Quality Assurance Department. Repeatable course.

Offered Infrequent

QAS 495. Selected Topics in Quality Assurance. (1-4 Units)

Prerequisites: Consent of instructor. An intensive study of an issue, concept, or theory in Quality Assurance that is of special interest to both the faculty member and the students. Repeatable course. Three hours of lecture per week.

Offered Fall, Spring

QAS 496. Internship in Quality Assurance. (3 Units)

Prerequisites: Completion of all 300 level courses in the major. Assignment in an off-campus internship with a cooperating organization, to be selected in consultation with the program coordinator. Emphasis on the role of professionalism and ethics in the life of the quality professional.

Offered Infrequent

QAS 498. Directed Research in Q.A.. (3 Units)

Prerequisites: Completion of all 300 level courses in the major. Directed research on one or more topics to be selected in consultation with the program coordinator. Emphasis on the role of professionalism and ethics in the life of the Quality professional.

Offered Fall, Spring

QAS 499. Senior Project. (3 Units)

Prerequisites: QAS 496 or QAS 498. A capstone project focusing on the role of leadership in relation to professionalism and ethical standards in the field of Quality Assurance. Graduate

Offered Fall, Spring

QAS 510. Advanced Probability and Statistics. (3 Units)

Prerequisites: undergraduate calculus, Probability and statistics. A study of measures of central tendency and dispersion, important discrete and continuous probability distributions, sampling theory, hypothesis testing and estimation. Linear regression and correlation will also be covered. The uses of statistics in testing, inspection, and production will be identified.

Offered Fall, Spring

QAS 511. Quality Function Management and TQM. (3 Units)

A study of the functions and responsibilities of the quality organization. TQM concepts, quality function deployment, and the tools for continuous improvement are analyzed for sequence of use and development.

Offered Fall, Spring, Summer, All terms

QAS 512. Reliability. (3 Units)

Prerequisite: QAS 510. Overview of reliability engineering. Use of mathematical models of predictions, confidence assessment, and systems reliability. Emphasis on practical applications for product or system design.

Offered Fall

QAS 513. Statistical Quality Control and Sampling. (3 Units)

Prerequisite: QAS 510. The application of advanced statistical methodologies to the analysis and solution of quality and management problems, including probability theory, control charts, sampling, regression analysis and the design of experiments. Focus on statistical process control and related quality technologies.

Offered Fall, Spring, Summer

QAS 514. Advanced Experimental Design. (3 Units)

Prerequisite: QAS 510. Analysis of statistical experimental design strategies. Planning of experiments for the best strategy and objectives.

Offered Fall, Spring, Summer

QAS 515. Human Factors in Quality Assurance. (3 Units)

A comprehensive survey of human factors engineering theory, research and applications which are of particular relevance to quality assurance. A systems framework will be utilized, emphasizing feedback and interrelations among system components, including the human operator. Emphasis will be placed on operator constraints in the design of work processes, workplaces and instrumentation.

Offered Fall, Spring, Summer

QAS 516. Measurement and Testing Techniques. (3 Units)

Prerequisite: QAS 510 or consent of instructor. In-depth discussion of equipment, principles and techniques of measurement assurance.

Offered Fall, Spring, Summer

QAS 518. Quality Project Management and Productivity. (3 Units)

An in-depth examination of current theory and techniques in QA project management. Topics include description of project management techniques as well as procedures for evaluating their overall effectiveness and contributions to production and service quality.

Offered Fall, Spring, Summer, All terms

QAS 521. Process Control and Capability. (3 Units)

Prerequisites: QAS 513 and QAS 514. Detailed study of procedures and methods for performing machine and process capability studies, troubleshooting production and test problems, and maintaining continuous production and process evaluation in manufacturing operations.

Offered Infrequent

QAS 522. Applied Systems Reliability, Maintainability and Safety. (3 Units)

Prerequisite: QAS 512. Advanced and detailed analysis of appropriate reliability models, life-cycle reliability prediction and assessment, accelerated test models and techniques, test parameter variation studies, test tailoring and program plans for various reliability test types, maintainability concepts, prediction and assessment techniques, and safety programs.

Offered Infrequent

QAS 523. Software Reliability. (3 Units)

A study of the theory and applications of reliability concepts as they relate to software design and implementation.

Offered Fall

QAS 525. ISO 9000 & The Audit Function. (3 Units)

Prerequisite: QAS 511 is recommended. A study of the ISO 9000 series of quality system standards with emphasis on manufacturing and service industry applications. The studies address the standards interpretation, documentation and implementation including preparation for and creation of internal and external audits.

Offered Fall

QAS 526. Supplier Quality Assurance. (3 Units)

Prerequisite: QAS 511. Encompasses a study of the fundamental quality requirements attendant to the successful procurement and delivery of end item products or services. It includes the basic supplier issues of specifications, site inspection, selection, rating, certification, and related quality audits.

Offered Spring

QAS 527. Quality Measurement. (3 Units)

Prerequisite: QAS 511. Study of Quality Metrics and their application throughout the life cycle of a product or service in a business entity. The study includes Quality Standards, Customer Satisfaction, Quality Tools, Continuous Improvement, Cost of Quality, Supplier and System auditing.

Offered Summer

QAS 530. Statistical Quality Control (SQC) for Service Professionals. (3 Units)

Techniques for applying Statistical Quality Control (SQC) in controlling processes and delivering customer services. Examines methods for establishing and maintaining SPC, QC auditing and sampling and continuous improvement in various service industries.

Offered Fall, Spring

QAS 531. Customer Satisfaction and Quality Assurance. (3 Units)

In-depth study of current methods for obtaining customer satisfaction. Examines techniques of determining customer needs and development of customer service strategy Quality Control criteria.

Offered Fall, Spring

QAS 532. Quality Assurance of the Service Delivery Process. (3 Units)

Analyze processes used to deliver service and methods used to assure satisfaction. Examines the relationship of Strategic Quality Planning, the Delivery process, and the usage of TQC and Quality Assurance to achieve strategic goals.

Offered Fall, Spring

QAS 534. Change Management. (3 Units)

Prerequisite: QAS 511 is recommended. In depth analysis of current theory, empirical research and best practices related to effective implementation of Quality improvement methodologies that result in desired organizational change, both cultural and operational.

Offered Summer

QAS 535. Lean Manufacturing. (3 Units)

Prerequisite: QAS 511 is recommended. In depth study of the theory and practices of lean production. Covers waste minimization, interrelationships among various components of a system, theories of leadership and management, and process variability reduction.

Offered Spring

QAS 536. Six Sigma Principles and Applications. (3 Units)

Prerequisite: QAS 510 OR QAS 511 are required. QAS 511 is recommended. In depth study of the application of the six sigma process; covers content of the methodology areas of Define Measure, Analyze, Improve and Control (DMAIC) including team concepts, project management, advanced statistical process control and techniques, and measurement systems analysis.

Offered Summer

QAS 537. Quality Function Deployment: Understanding Customer Requirements. (3 Units)

Prerequisite: QAS 511 is recommended. In depth study of the theory and application of the quality management process, Quality Function Deployment, for designing customer requirements into products and services. Course will evaluate the tools of QFD and study their application in analysis of customer requirements.

Offered Summer

QAS 538. Evaluation and Outcome Analysis for Healthcare Delivery. (3 Units)

Examines operational and statistical techniques used to monitor, control, and improve the quality of services provided by healthcare. Considers the tools of Quality and their direct application to practical situations and healthcare processes.

Offered Spring

QAS 539. Good Manufacturing Practices. (3 Units)

Prerequisite: QAS 511 is recommended. Current Good Manufacturing Practice regulations to assure quality of medical devices and pharmaceutical products. Covers development, manufacturing, Quality management and organizational requirements of medical devices. Pharmaceutical regulations include personnel, facilities and equipment, process and product controls, laboratory and reporting.

Offered Spring

QAS 540. Food and Drug Law. (3 Units)

Prerequisite: QAS 511 is recommended. This course is designed to provide a practical interpretation of the food and drug laws and interpretations for professionals who are providing products or services in industries regulated by the Federal Food & Drug Administration.

Offered Spring

QAS 541. Biomedical Quality Control Methods. (3 Units)

In depth study of quality control discipline as applied to medical device, pharmaceutical and/or biologics regulated environments. Topics include influencing discipline and applying models; methods that monitor, maintain and/or improve product or service quality; and operational efficiency.

Offered Fall

QAS 542. Risk Management in FDA Regulated Industries. (3 Units)

Prerequisite: QAS 511 is recommended. Risk Management as applied to FDA-regulated and other industries (product and process-related); emphasizes application of risk management tools, plan and program from inception of product and process including manufacturing process and field experience of the product, process or service.

Offered Spring

QAS 543. Identification and Mitigation of Suspect and Counterfeit Items. (3 Units)

Prerequisite: QAS 511 is required. Designed to distinguish the characteristics of suspect/counterfeit items (S/CI) and how to mitigate and prevent their occurrences through the development of corrective and preventative action plans into common quality management systems by applying quality tools and methodologies.

Offered Summer

QAS 544. Digital Transforming Quality 4.0 with Industry 4.0. (3 Units)

Prerequisite: QAS 511 is required. Examines contemporary process-related issues and assesses how to develop a digital organizational self-assessment through the application of quality tools and methodologies that contribute to continuous improvement and organizational excellence as appropriate in Industry 4.0.

Offered Fall

QAS 545. Laboratory Conformity Assessment. (3 Units)

Prerequisite: QAS 511 is required. Evaluates the various systems for laboratory accreditation and certification in compliance with industry and government regulatory requirements to assure safe and reliable products and services are provided for both industry and consumers through assessment and appraisal techniques.

Offered Fall

QAS 546. Case Studies in Quality. (3 Units)

Prerequisite: Completion of 18 units in MSQA program. Provides students an opportunity to apply their MSQA acquired skills to encourage and enhance dialogue, reinforce comprehension, bridge the gap between theory and practice, develop analytical and critical thinking skills, and to solve practical industry-related problems.

Offered Fall, Spring

QAS 553. Lean Accounting & Financial Analysis. (3 Units)

Focus on the application of Lean Six Sigma concepts and techniques to help in the problem-solving challenges that confront today's quality professionals. Builds a strong foundation for the quality professional in any sector.

Offered Fall, Spring

QAS 591. Credit for Prior Learning: Quality Auditing. (3 Units)

The Certified Quality Auditor (CQA) is a professional certification from the American Society of Quality (ASQ). Students holding this certification satisfy the elective course QAS 525. The ASQ CQA must be current when entered into the student transcripts.

Offered As needed

QAS 592. Credit for Prior Learning (CPL) Quality Measurement. (3 Units)

The Certified Manager of Quality-Organizational Excellence (CMQ-OE) is a professional certification from the American Society of Quality. Students holding this certification satisfy the elective course QAS 527. The ASQ CMQ-OE must be current when entered into the student transcript.

Offered As needed

QAS 593. Credit for Prior Learning (CPL) Six Sigma Principles and Applications. (3 Units)

The Certified Six Sigma Black Belt (CSSBB) is a professional certification from the American Society of Quality (ASQ). Students holding this certification satisfy the elective course QAS 536. The ASQ CSSBB must be current when entered into the student transcript.

Offered As needed

QAS 594. Ind Study In Assurance Science. (1-4 Units)

Prerequisites: Instructor and program Coordinator approval; QAS 510, QAS 511 and a minimum of five QAS courses recommended. Independent research or special project to be conducted in consultation with an instructor.

Offered Infrequent

QAS 595. Special Topics by Directed Study: Quality Assurance Applications. (3 Units)

A course of study designed cooperatively by student and instructor, and approved by the Program Coordinator, in which students apply quality assurance theory and principles to a particular occupational setting relevant to their professional interests and aspirations. Repeatable course. Three hours of lecture per week.

Offered Infrequent

QAS 598. Directed Research. (3 Units)

Prerequisites: Completion of 18 units toward degree and GWAR. Directed reading and research, designed cooperatively by student and instructor and approved by the program coordinator, emphasizing application of Quality Assurance theory and principles to a particular occupational setting.

Offered Fall, Spring, Summer

QAS 599. Project. (3 Units)

Prerequisites: Completion of all other coursework in the degree program.

The goal of all students enrolled in this culminating experience course is to complete a project under the guidance of an assigned instructor. It is the culminating learning experience of the program, and includes a significant written report. To meet the standards established by the faculty, the project must demonstrate a rigorous scientific approach to the quality profession.

Offered Fall, Spring

QAS 600. Grad Continuation Course. (1 Units)

Graduate students who have completed their coursework but not their thesis, project, or comprehensive examination, or who may have other requirements remaining for completion of their degree, may maintain continuous attendance by enrolling in this course. Signature of graduate program director required.

Offered Fall, Spring, Summer

Quality Assurance, Bachelor of Science

The Quality Assurance program is currently not accepting students into the Bachelor of Science in Quality Assurance (BSQA). For more information, please contact the Quality Assurance program office.

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

The Quality Assurance program is currently not accepting students into the Bachelor of Science in Quality Assurance (BSQA). For more information, please contact the Quality Assurance program office.

Minor Requirements

Single field major, no minor required.

Major Requirements (66 units)

Degree Requirements (66 units)

| Code | Title | Hours |
|------------------------------------|--|-----------|
| Lower Division Requirements | | |
| BIO 102 | General Biology | 3 |
| CHE 108 | Introduction to College Chemistry | 5 |
| MAT 131 | Elementary Statistics and Probability | 3 |
| MAT 153 | Pre-Calculus with Trigonometry with Lab | 4 |
| PHY 120 | Elements Of Physics I | 4 |
| PHY 122 | Elements Of Physics II | 4 |
| QAS 200 | Fundamentals of Quality | 3 |
| QAS 220 | Fundamentals of Measurement Science | 3 |

| Total Hours | | 66 |

Quality Assurance, Master of Science Requirements

Admission Requirements

- To be admitted into the Master of Science in Quality Assurance Program, students must meet the following requirements:
- Meet all CSU Dominguez Hills graduate admission requirements.
- A baccalaureate degree from a four-year accredited institution is required. An undergraduate major in engineering or science is preferred. Please see the note below.
- A grade point average of at least 2.75 in the last 60 semester units of upper division course work attempted.
- Good standing at the last institution attended.
- Meet all other university admission requirements.

The baccalaureate degree should have included the following:

| Code | Title | Hours |
|--------------------|--|-----------|
| | Calculus (integral and differential) | 6 |
| | Chemistry (general) | 3 |
| | Physics | 3 |
| | Mathematical Statistics & Theories of Probability (upper division) | 6 |
| | Principles of Computer Technology | 3 |
| Total Hours | | 21 |

Note: Individuals from other undergraduate disciplines who demonstrate exceptional promise may be admitted to the program, pending completion of additional undergraduate prerequisite coursework or other demonstrations of competence as determined by the Quality Assurance Academic Program Committee. All special admissions are subject to approval by the Quality Assurance Academic Program Committee.

Degree Requirements

- Complete 30 semester units of approved graduate work.
- Complete at least 24 semester units in residence.
- Successfully complete the major courses listed below.
- Complete all coursework with a grade point average of at least 3.0 (B).
- Complete a culminating project or thesis.
- Successfully complete the Graduation Writing Assessment Requirement (GWAR).
- In addition to the major requirements, students must meet all university requirements for the master's degree. Students should consult the section of the University Catalog entitled "Requirements for the Master's Degree."

MSQA students choose from one of the following two programs. Each student should contact the MSQA coordinator prior to taking classes.

Master of Science in Quality Assurance (30 units)

| Code | Title | Hours |
|---|---|-------|
| Common Courses | | |
| QAS 511 | Quality Function Management and TQM | 3 |
| QAS 515 | Human Factors in Quality Assurance | 3 |
| QAS 518 | Quality Project Management and Productivity | 3 |
| QAS 599 | Project | 3 |

1.

Radiologic & Imaging Sciences

College of Health, Human Services, and Nursing
School of Public Health and Health Sciences

Program Description

The graduate program in Radiologic and Imaging Sciences offers both a master's degree and two post-baccalaureate certificates.

The Master of Science in Radiologic and Imaging Sciences (RIS) program provides professional advancement tracts in RIS administration and RIS education for individuals already in the profession. These two tracks are open only to applicants with certification in radiography, nuclear medicine, radiation therapy, sonography, dosimetry, cardiovascular interventional technology, or PACS administration. Currently, the MS degree is approved for additional tracks in Ultrasound, MRI, CT, PET/CT, and Radiation Therapy, but these tracks are **not** accepting applications.

This executive-style program is one year in length and is offered fully online. Part-time enrollment is an option.

The Post Baccalaureate Certificate in Radiologic and Imaging Sciences allows professionals interested in obtaining additional skill sets in RIS Administration or RIS Education but do not desire a graduate degree.

Features

The master's degree and certificates enhance Radiologic and Imaging Sciences professionals' careers by equipping them to move into management or educational roles within the profession. Additionally, the MS degree expands the student's knowledge of the basic physical principles and instrumentation for all RIS disciplines as well as develops skills in utilizing science-based literature to modify clinical and educational practices. Certificates are concentrations focusing on specific RIS management skill sets or RIS education skill sets.

Academic Advisement

Interested students should contact Radiologic and Imaging Sciences at (310) 243-2550 or the School of Public Health and Health Sciences at (310) 243-2698 or visit <https://www.csudh.edu/radiologic-imaging-sciences-ms/> (<http://www.csudh.edu/radiologic-imaging-sciences-ms/>) for program specific details, application, and additional information.

Preparation

Procedures and Admission Criteria

Students applying to the MS-RIS program must:

1. Hold a bachelor's degree from a regionally accredited university in any discipline.
2. Have an undergraduate GPA of 2.5 or higher.
3. Be certified/registered in one of the Radiologic and Imaging Sciences. Specifically, Radiography (RTR), Radiation Therapy (RTT), Nuclear Medicine (RTN or CNMT), Sonography (RDMS, RSCS, or RVT), Magnetic Resonance Imaging (ARMRIT), Cardiovascular

Interventional Technology (RCES, RCIS), Dosimetrist (CMD) or PACS Administrator (ABII, PARCA)

Advancement to Candidacy

Advancement to candidacy recognizes that the student has demonstrated the ability to sustain a level of scholarly competency commensurate with successful completion of degree requirements. Upon advancement to candidacy, the student is cleared for the final stages of the graduate program which, in addition to any remaining course work, will include the thesis or project.

The following are the requirements for Advancement to Candidacy:

- A minimum of 15 resident units;
- Classified standing;
- A cumulative GPA of 3.0 in all courses taken as a graduate student;
- No grade lower than a "B-" in the degree program.

Advancement to Candidacy must be certified on the appropriate form to the Graduate Dean by the department prior to the final semester, prior to enrolling in the thesis or project.

Post-Baccalaureate Certificate

- Radiologic Imaging Sciences, Certificate (p. 807)

Graduate Programs

Master

- Radiologic and Imaging Sciences, Master of Science (p. 806)

Faculty

Elwin Tilson, Program Coordinator

Program Office: WH A-330, (310) 243-3748

CHHSN Student Success Center - Advising: WH 220 (Welch Hall Building, 2nd Floor), (310) 243-2120

Courses

RIS 501. RIS Physics and Instrumentation. (3 Units)

Basic sciences of radiologic professions including physics, instrumentation, data capture and management. Includes discussions of modalities in radiography, nuclear medicine, radiation therapy, ultrasound, and CVIS.

Offered Fall, Spring

RIS 502. RIS Sciences I. (3 Units)

Imaging techniques, technological advances in the radiologic/imaging sciences, patient care trends, and the role of a radiologic and imaging sciences professional.

Offered Fall, Spring

RIS 503. RIS Sciences II. (3 Units)

Integrated modalities in the radiologic professions such as CT, MRI, SPECT/CT, PET/MRI, IMRT, 3D imaging and teleradiology. Healthcare legal, regulatory, and ethical issues are also discussed.

Offered Summer

RIS 510. RIS Research Methods and Data Analysis. (3 Units)

Introduction to radiologic and imaging science research methods, data analysis, as well as current research trends and publications in the field.

Offered Fall, Spring

RIS 511. Informatics in Radiologic Imaging Sciences. (3 Units)

Introduction to Health Information Technology (HIT), Radiology Information Systems (RIS) and Picture Archive and Communication Systems (PACS). Includes basic information system technology as well as clinical and administrative application of healthcare information systems in radiologic and imaging sciences.

Offered Fall, Spring

RIS 520. RIS Management. (3 Units)

Introduction to principles of management with emphasis on it applications in radiologic and imaging department administration.

Offered Fall, Spring

RIS 521. RIS Leadership. (3 Units)

Introduction to principles of leadership with emphasis on its applications in radiologic and imaging department administration.

Offered Fall, Spring

RIS 522. Clinical Practice Accreditation. (3 Units)

Application for and maintenance of clinical professional accreditation of clinical operations. Emphasis is on the role of the radiology administrator.

Offered Fall, Spring

RIS 530. Pedagogy and Andragogy in RIS. (3 Units)

Principles and practice of effective teaching, curriculum development and evaluation in radiologic and imaging sciences.

Offered Fall, Spring

RIS 531. Radiologic and Imaging Sciences Program Administration. (3 Units)

Orientation to academic program directorship, faculty development, student affairs, academic affairs, the higher education system in the US and how colleges and universities in the US work. Topics include scholarship, advisement, teaching as well as faculty recruitment retention and development.

Offered Fall, Spring

RIS 532. RIS Academic Program Accreditation. (3 Units)

An introduction to accreditation of radiologic and imaging sciences academic programs. Topics include outcome assessments, benchmarking, Self-Study preparation, applying for and maintaining accreditation, and accreditation site visits.

Offered Fall, Spring

RIS 540. CT Physics, Instrumentation and Procedures. (3 Units)

In-depth study of the physical principles and instrumentation in CT.

Offered Fall, Spring

RIS 541. Advanced Topics in CT. (3 Units)

CT artifacts, reconstruction algorithms, 3-D imaging, angiography and radiation safety are discussed.

Offered Fall, Spring

RIS 542. CT Clinical Applications. (3 Units)

A discussion on clinical application of CT. Topics include central nervous system, cardiovascular, gastrointestinal, genitourinary, hepatobiliary, musculoskeletal, and cardiac systems.

Offered Fall, Spring

RIS 550. MRI Physics & Instrumentation. (3 Units)

In-depth study of the physical principles and instrumentation in MRI.

Offered Fall, Spring

RIS 551. Advanced Topics in MRI. (3 Units)

MRI artifacts, magnetic resonance angiography and MRI safety are discussed.

Offered Fall, Spring

RIS 552. MRI Clinical Applications. (3 Units)

A discussion on clinical application of MRI. Topics include central nervous system, cardiovascular, gastrointestinal, genitourinary, hepatobiliary, musculoskeletal, and cardiac systems.

Offered Fall, Spring

RIS 560. Ultrasound Physics and Instrumentation. (3 Units)

Emphasizes principles of physics and instrumentation of diagnostic ultrasound. Topics including sound wave parameters, energy transfer through wave propagation, surface reflection processes, and transducer construction. Includes an overview of A-mode, B-mode, and M-mode.

Offered Fall, Spring

RIS 561. Advanced Topics in Ultrasound. (3 Units)

Discussion of computer technology and the instrumentation used to create and store the ultrasound image and introduction to fluid dynamics, and the spectral, color and amplitude related to Doppler. Includes discussions about echo cardiology.

Offered Fall, Spring

RIS 562. Ultrasound Clinical Applications. (3 Units)

Topics include abdominal, OB/GYN, cardiac and vascular sonographic techniques.

Offered Fall, Spring

RIS 570. PET/CT Physics and Instrumentation. (3 Units)

Introduces the physical principles and instrumentation used in computed tomography and PET. Topics include the physics associated with PET, PET technology, an overview of computed tomography technology, and computer reconstructions algorithms.

Offered Fall, Spring

RIS 571. PET Radiopharmaceuticals. (3 Units)

A discussion of the radiopharmaceuticals and CT contrast used in PET/CT. Emphasis is on chemistry of positron-emitting nuclides and radiopharmaceuticals, the physiological interactions of radiopharmaceuticals, and iodinated contrast media in patients. Patient safety, patient screening, and radiation safety are included.

Offered Fall, Spring

RIS 572. PET/CT Clinical Applications. (3 Units)

Encompasses the interrelated aspects of performing PET/CT procedures. Includes anatomy, physiology and pathology of the organ systems, patient preparation and care, imaging instrumentation and protocols.

Offered Fall, Spring

RIS 580. Radiation Therapy Physics and Treatment Planning. (3 Units)

Basic principles of ionizing radiation, radiation dosimetry, imaging equipment, radiation therapy equipment and radiation detectors.

Offered Fall, Spring

RIS 581. Principles and Practices of Radiation Therapy I. (3 Units)

The fundamentals of clinical radiation oncology are discussed including the medical, biological, and pathological aspect as well as technical aspects. Topics also include the diagnosis, interpreting and implementing the treatment prescription, and documentation of treatment parameters for various physiological systems.

Offered Fall, Spring

RIS 582. Principles and Practices of Radiation Therapy II. (3 Units)

A continuation of RIS 581. Introduces Proton beam therapy, Intraoperative Radiotherapy (IORT), and Gamma Knife radiosurgery.

Offered Fall, Spring

RIS 590. Practicum. (1-3 Units)

Observing and applying discipline specific clinical, educational or managerial principles in a patient care or academic setting. Restricted to majors.

Offered Fall, Spring, Summer

RIS 597. Directed Reading. (3 Units)

Extensive reading in selected areas under the guidance of a faculty mentor. Restricted to majors. Repeatable course.

Offered Fall, Spring, Summer

RIS 598. Directed Research. (3 Units)

Extensive research on a subject related to the student's area of concentration under the guidance of a faculty advisor. Restricted to majors. Repeatable course.

Offered Fall, Spring, Summer

RIS 599. Capstone Project. (3 Units)

Prerequisite: Enrolled in the final semester of the degree program. A radiologic science related, practical project proposed by the student and approved by the advisor.

Offered Fall, Spring, Summer

RIS 600. Grad Continuation Course. (1 Units)

Graduate students who have completed course work but not their thesis, project, or comprehensive examination, or who have other requirements remaining for completion of their degree, may maintain continuous attendance by enrolling in this course. Signature of graduate program coordinator required.

Offered Fall, Spring

Radiologic and Imaging Sciences, Master of Science

Program Outcomes

The MS degree in Radiologic and Imaging Sciences is designed to teach students to:

1. Critically read and comprehend scientific literature in radiologic and imaging sciences.
2. Evaluate research design and statistical analyses tools reported in the scientific literature.
3. Express graduate-level professional ideas orally.
4. Demonstrate a general knowledge base of radiologic and imaging sciences.
5. Describe in detail the current knowledge in one discipline within radiologic and imaging sciences.
6. Write manuscripts for submission to scholarly journals.
7. Demonstrate the ability to integrate graduate-level theoretical, analytical, research and practical skills into professional practice.

Radiologic Imaging Sciences, Certificate

The Post-Baccalaureate Certificates in Radiologic and Imaging Sciences allow licensed RIS professionals to obtain additional skill sets in RIS Administration or RIS Education. These advanced-practice certificates are limited to individuals already licensed or certified in one of the Radiologic and Imaging Sciences disciplines (RTR, RTT, RTN, CNMT, RDMS, ARMRIT, RCES, RCIS, or CMD) and hold a Bachelor's degree from an accredited university.

School Leadership

College of Education

Division of Graduate Education

Program Description

The School Leadership Program admits credentialed teachers who have at least four years of full-time teaching or services experience and will complete their fifth year of teaching while in the program to obtain their Preliminary Administrative Services Credential. Students become part of a cohort, taking courses in fall, spring and summer. Students become part of a cohort, taking a total of 32 units, with no more than 6 units taken in the summer. Courses are offered in face-to-face, on-line and hybrid formats. In addition, all students complete a field-based project and Master's students take a comprehensive exam. For the field-based project, students collect data and implement change that is driven by an equity gap at their school sites.

The School Leadership Program also offers the Clear Administrative Services Credential. To learn more about the two-tier credential structures offered, click here. (p. 573)

Features

The School Leadership curriculum is designed to meet the needs of full-time working professionals by offering a full program of courses in the late afternoon, evening and some weekends. Courses are offered so degree requirements may be completed in one year. The university's urban location provides a unique opportunity for working with a diverse cultural and ethnic population in classes and in field experiences.

Academic Advisement

Students will work with an advisor when they are admitted to the Division of Graduate Education. Students must confer with their advisor each semester prior to registration to ensure that they are taking the appropriate coursework in the proper sequence.

Requirements for Admission to the Graduate Program

Admission as a classified graduate student in education requires:

- Admission to the University
- Five years of full-time teaching and/or service experience in a public or private school (i.e. five years' experience in pupil personnel services) or students with four years of full-time teaching and/or service experience in a public or private school must complete their fifth year of full-time teaching and/or service experience during the SLP program

- A 3.0-grade point average in the last 60 units of college work. If less than a 3.0, a score of 500 or better on the MAT or a score of 300 or better on the GRE.
- Possession of a valid California teaching credential, designated subjects teaching credential, or services credential. (See CTC Requirements ([https://www.ctc.ca.gov/credentials/leaflets/admin-services-credential-california-\(cl-574c\)/](https://www.ctc.ca.gov/credentials/leaflets/admin-services-credential-california-(cl-574c)/)) for more details)
- Attendance at SLP Orientation and Summer Institute
- Must have passed the California Basic Educational Skills Test (CBEST) or meet basic skills requirement
- Two letters of recommendation, one from the applicant's site supervisor.

Admission Procedures

The application deadline for the School Leadership Program is June 1st. Dates are subject to change.

All prospective graduate students, including CSU Dominguez Hills graduates, must do the following:

1. Apply for graduate admission to the University through Cal State Apply. Students can find the applications at: <https://www.csudh.edu/coe/apply> (<https://www.csudh.edu/coe/apply/>)
2. Submit one set of official transcripts from all colleges and universities attended other than CSU Dominguez Hills to the CSU Dominguez Hills Admissions Office.

A decision regarding admission will be made upon completion of university and program admission requirements.

Classified Standing

Students who satisfy all the requirements of program admission will be admitted with Classified Standing. Students accepted with Conditional Standing will have a semester to meet the conditions for Classified Standing. Upon completion of specified conditions, students must request that a Postbaccalaureate/Graduate Change of Objective form be filed by their advisor on their behalf.

Graduate Programs

Master

- School Leadership, Master of Arts (p. 809)

Faculty

Gary Rhodes, Department Chair

Rene Castro, Yesenia Fernandez, Kitty Fortner, Leena Furtado, Jeremy Hart, Julie Jhun, Margarita Landeros, Adreian Mancillas, Gary Rhodes

Department Office: COE 1446, (310) 243-3524

Emeriti Faculty

Charmayne Bohman, Edith Buchanan, Muriel P. Carrison, James L. Copper, Peter Desberg, Farah Fisher, Jitsu Furusawa, Marjorie Holden, Antonia Issa-Lahera, Judith Jackson, Rita Lee, Susanne Medina, Sean R. Morgan, Anthony Normore, Pamela Robinson, Karlton Skindrud, Judson H. Taylor, George Walker

Courses

SLP 550. Induction Preliminary Leaders. (2 Units)

Students will develop an induction plan designed to meet the individual's needs as an instructional leader. The induction plan will include the assessment of the individual's professional needs to become an urban school leader. Students will analyze the CCTC Program Standards and the ISLLC national standards and plan and create their professional development plan.

Offered Fall

SLP 551. Visionary Leadership. (3 Units)

Recommended prerequisite: SLP 550 or concurrent enrollment. Students facilitate the development, articulation, implementation and stewardship of a vision of teaching and learning that is shared and supported by the school community. Coursework and fieldwork focus on the vision audit through collecting data, constructing profiles, and aligning resources.

Offered Fall

SLP 552. Instructional Leadership. (3 Units)

Recommended prerequisites: SLP 550 and SLP 551 or concurrent enrollment. Students learn how to advocate, nurture and sustain a school culture and instructional program conducive to student learning and staff professional growth. Coursework and fieldwork focus on the implementation of state adopted academic content standards, frameworks as well as assessment and accountability systems.

Offered Fall

SLP 553. Organizational Leadership and Resource Management. (3 Units)

Recommended prerequisites: SLP 550, SLP 551 and SLP 552 or concurrent enrollment. Students learn how to ensure the management of the organization, operations and resources for a safe, efficient, and effective learning environment. Coursework and fieldwork focus on the study and application of organizational theory that reflects effective leadership.

Offered Spring

SLP 554. Collaborative Leadership. (3 Units)

Recommended prerequisites: SLP 550, SLP 551, SLP 552, and SLP553. Students will learn to work effectively with families, caregivers and community members; recognize the goals and aspirations of diverse families; respond to diverse community interests and needs. Through coursework and fieldwork, student will examine and evaluate their attitudes toward people of different races, cultures, and ethnic backgrounds. Students will focus on improving student achievement regardless of race, culture, or socio-economic status.

Offered Spring

SLP 555. Ethical Leadership. (3 Units)

Prerequisites: SLP 550, SLP 551, SLP 552 and SLP 553. Students will examine, practice and model a personal code of ethics, including protecting the rights and confidentiality of students, staff, and families. Students will practice professional leadership capacity, including shared decision-making, problem-solving and conflict management and foster those skills in others. Through coursework and fieldwork, students will have multiple opportunities to model personal and professional ethics, integrity, justice and fairness.

Offered Spring

SLP 556. Political, Social, Economic, Legal and Cultural Leadership. (3 Units)

Prerequisites: SLP 550, SLP 551, SLP 552 and SLP 553. The student will learn about political, societal, economic, legal and cultural influences on schools. Through these interconnections, the student develops the ability to understand, respond to, and influence the larger political, social, economic, legal and cultural context of schools and leadership. The student will learn how to view himself or herself as a leader and as a member of a team by engaging in course work and field work that provide opportunities to both lead and work collaboratively.
Offered Fall

SLP 557. Post-Assessment, Preliminary Leadership. (2 Units)

Prerequisites: SLP 554, SLP 555, and SLP 556 or concurrent enrollment. Students provide evidence of their competency in all CCTC Program Standards and all six of the CPSELs. The course-ending formative assessment and program-ending summative assessments of their field-based project and portfolio will become part of the students' school leadership electronic portfolios. CR/NC grading.
Offered Spring

SLP 560. Fieldwork A, Preliminary Leadership. (2 Units)

Recommended corequisite: SLP 550, SLP 551, SLP 552, and SLP 553. Supervised field experiences at the school level to include actual job performance in both supervision and administrative work. Students will demonstrate competencies specified in approved programs. CR/NC grading.
Offered Fall

SLP 561. Fieldwork B, Preliminary Leadership. (2 Units)

Recommended corequisite: SLP 554, SLP 555, SLP 556 and SLP 557. Supervised field experiences at the school level to include actual job performance in both supervision and administrative work. Students will demonstrate competencies specified in approved programs. Second semester of two part course. CR/NC grading.
Offered Spring

SLP 580. Professional School Leadership: Pre-Assessment, Induction. (2 Units)

The candidate, the university faculty member, and the site mentor together develop a professional credential induction plan for the support and professional development for the candidate based on the six themes of the 2004 CCTC Professional Standards.
Offered Fall, Spring, Summer

SLP 581. Principles of Professional Administrative Practice: Six Themes. (3 Units)

Corequisite: SLP 580. This course has a strong conceptual base and is organized to address principles of administrative practice per CCTC's six thematic areas. Specialization and individualization occur by determining specialized strands and individualized learning opportunities as specified in the candidate's induction plan. CR/NC grading.
Offered Fall, Spring, Summer

SLP 582. Professional School Leadership: Post-Assessment. (2 Units)

Prerequisite: SLP 580 and SLP 581. The expectations developed in candidate's induction plan aligned are assessed to determine if the CCTC professional standards are satisfied. Candidate expectations will be different for each candidate, depending on past experiences, current job assignments, and future development goals and plans.
Offered Fall, Spring, Summer

School Leadership, Master of Arts Requirements

The Master of Arts in School Leadership requires completion of 32 units or more of course work with a minimum 3.0 grade point average. A minimum of 21 semester units must be completed in residence. Courses taken previously may be used to meet the course content requirements of a graduate program if they have been completed within the seven years immediately preceding the completion of the requirements for the degree or credential. However, no courses may apply toward the required number of units of approved graduate work that have been used to meet the requirements of another degree.

Students may take up to seven years to complete the course work, including exams. Course work that does not meet the seven-year deadline will have to be repeated and/or replaced by other courses with the approval of the program advisor.

In addition to the major requirements, students must meet all university requirements for the master's degree. Students should consult the section of the catalog entitled "Requirements for the Master's Degree."

Completion of Degree

1. Complete an approved program of 32 units of course work and meet specific GPA requirements.
2. Pass a comprehensive written examination. After completion of all course work or during the last semester of course work, the M.A. degree candidate may apply to take the comprehensive examination. There is only one retake opportunity.

Degree Requirements

| Code | Title | Hours |
|-------------------------|--|-----------|
| Core Courses | | |
| GED 500 | Research Methods in Education | 3 |
| GED 501 | Seminar in Learning and Development | 3 |
| Required Courses | | |
| SLP 550 | Induction Preliminary Leaders | 2 |
| SLP 551 | Visionary Leadership | 3 |
| SLP 552 | Instructional Leadership | 3 |
| SLP 553 | Organizational Leadership and Resource Management | 3 |
| SLP 554 | Collaborative Leadership | 3 |
| SLP 555 | Ethical Leadership | 3 |
| SLP 556 | Political, Social, Economic, Legal and Cultural Leadership | 3 |
| SLP 557 | Post-Assessment, Preliminary Leadership | 2 |
| SLP 560 | Fieldwork A, Preliminary Leadership | 2 |
| SLP 561 | Fieldwork B, Preliminary Leadership | 2 |
| Total Hours | | 32 |

Culminating Experience

Under the supervision of a program cohort leader and a school site administrator, each student engages in an action-research field-based project. Within this project the development of the knowledge, dispositions, and skills of an effective leader are measured in multiple ways throughout the program. All culminating projects are presented on CSUDH campus at the end of the spring semester to the larger school community. Each project is subsequently evaluated by a panel of

practicing school administrators who assess the leadership effectiveness of the Field Based Project.

The culminating project for the Master's is a 4.5 hour comprehensive exam consisting of four distinct tasks.

Social Work

College of Health, Human Services, and Nursing
Department of Social Work

Program Description

The Master of Social Work (MSW) program at California State University, Dominguez Hills is dedicated to pursuing a more just, global society through a critical, theoretical approach to social work education, research, and community-centered practice. Specifically, the program is dedicated to advancing anti-racist social work education that addresses societal dynamics stemming from intersectional oppression based on race, ethnicity, culture, gender, immigration, socioeconomic status, and membership in other categories historically subjected to oppression, discrimination, and indifference. Located in a diverse, complex urban setting, the program prepares Master level social workers to professionally and ethically deliver social work practice grounded in analysis, intervention, evaluation, and advocacy, which addresses racial oppression and other forms of structural inequality to enhance the well-being of individuals, families, and communities.

A core aim of the Department of Social Work is to advance antiracist social work education. The CSUDH program, grounded in Critical Race Theory and Intersectionality, is committed to dismantling racism. CRT/I framework provides an interdisciplinary and critical approach to social work education that allow the CSUDH MSW program to train practitioners to understand that the conditions that a service user presents before the social worker have just as much, if not more, to do with institutions and systems than with the client themselves. Using a CRT/I perspective allow our students to understand individual clients' issues through the barriers of institutional racism and the intersections of multiple layers of oppression. With the support of these theoretical frameworks, our students are well poised to enter the social work field with the tools to affect systems-level change in their communities. The curriculum is developed and organized as a coherent and integrated whole consistent with program goals and objectives. California State University, Dominguez Hills offers one concentration: Social Work Practice in Communities (SWPC), and three specializations that students can choose from: Children, Youth and Families, Community Mental Health, and Community Capacity Building.

The MSW program requires completion of 60 semester credit hours, which can be accomplished through the following program options: A two-year full-time program with classes that meet on campus on Tuesdays and Thursdays throughout the day, with fieldwork hours on Monday, Wednesday, and some Fridays; or a three-year part-time program with year-round classes held in the evenings and weekends and fieldwork occurring in the second and third years during normal business hours on weekdays. The curriculum is organized around the following core areas: Human Behavior in the Social Environment, Practice, Policy, Research, and Field Education. At the end of the foundation year, students are expected to have acquired a sense of professional responsibility and the ability to use the knowledge on behalf of individuals, groups, and communities. In the advanced year, the curriculum is planned to combine the concentration around major intervention systems, or specializations that build on a generalist base

obtained in the first year of study. This combination enables graduates to move into the social work community with a combination of knowledge and skills in a broad area, as well as in-depth knowledge and skills in a particular method or area of service.

Academic Advisement

Interested students should visit <https://www.csudh.edu/social-work/> or contact the Department of Social Work at (310) 243-3170 for more information. **Students and applicants are strongly advised to consult the website for updated information, prior to contacting the Department of Social Work.**

Pre-Admission Disclosure for Academic Programs Leading to Licensure or Credentialing

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or taxpayer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements is available from **Iris A'Hirataro: WH 385 - (310) 243-3068.**

Admission to the Master of Social Work Program

Applicants must apply to both the University and the Department of Social Work via the Cal State Apply online system: <https://www.calstate.edu/> (<https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.calstate.edu%2Fapply%2F&data=05%7C01%7Cwjashley%40csudh.edu%7Cfde44f9d518646e62ed608dac9af94e1%7C1a66a72773894727a8cbf249ac8e7ff%7CTWFpbGZsb3d8eyJWljoimC4wLjAwMDAiLCJQljoiv2luMzliLCJBTiI6Ik1haWwiLC%7C3000%7C%7C%7C&sdata=%2B48kFIITs8XJdVDuugnD4%2Bx3tYXpnFyubNpCoqhTKc%3D&reserved=0>)(<https://www.calstate.edu/apply/> ([https://www.calstate.edu/apply/](https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.calstate.edu%2Fapply%2F&data=05%7C01%7Cwjashley%40csudh.edu%7Cfde44f9d518646e62ed608dac9af94e1%7C1a66a72773894727a8cbf249ac8e7ff%7CTWFpbGZsb3d8eyJWljoimC4wLjAwMDAiLCJQljoiv2luMzliLCJBTiI6Ik1haWwiLC%7C3000%7C%7C%7C&sdata=%2B48kFIITs8XJdVDuugnD4%2Bx3tYXpnFyubNpCoqhTKc%3D&reserved=0) (

application guidelines that are available on the Department of Social Work's website (<https://www.csudh.edu/social-work/> (<https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.csudh.edu%2Fsocial-work%2F&data=05%7C01%7Cwjashley%40csudh.edu%7Cfde44f9d518646e62ed608dac9af94e1%7C1a66a72773894727a8cbf249ac8e7ff8%7C0%7C0%7C638044053196210144%7CUnknown%7CTWFpbGZsb3d8eyJWljiMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6IklhaWwWLiJCXVClomn0%3D&reserved=0>)), questions about the MSW program, application requirements, review process, and decisions may be directed to: mswadmissions@csudh.edu.

Admission Requirements

1. Completion of a baccalaureate degree from a regionally accredited, four-year institution or equivalent academic preparation as determined by appropriate campus authorities (a liberal arts foundation is preferred). Applicants without a baccalaureate degree may be eligible to apply, as long as they meet certain eligibility requirements, as outlined by the CSU Office of Admissions.

2. A GPA of 2.75 (on a scale of 4.0) or better in the last 60 semester/90 quarter units is preferred. However, applications with a lower GPA are still considered.

3. Satisfactory completion (earned a minimum grade of "C", not a "C-" or below) of prerequisite courses. Pass, Satisfactory, Credit, or other equivalent grades representing successful completion are also acceptable. However, grades representing unsuccessful completion (e.g. "C-" or below, Fail, Unsatisfactory, or No Credit, etc.) will not be accepted. Prerequisite coursework consists of the following:

a. One (1) Elementary Statistics course, or its equivalent (visit [https://\(https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.csudh.edu%2Fsocial-work%2Fadmissions%2F&data=05%7C01%7Cwjashley%40csudh.edu%7Cfde44f9d518646e62ed608dac9af94e1%7C1a66a72773894727a8cbf249ac8e7ff8%7C0%7C0%7C638044053196210144%7CUnknown%7CTWFpbGZsb3d8eyJWljiMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6IklhaWwWLiJCXVClomn0%3D&reserved=0](https://(https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.csudh.edu%2Fsocial-work%2Fadmissions%2F&data=05%7C01%7Cwjashley%40csudh.edu%7Cfde44f9d518646e62ed608dac9af94e1%7C1a66a72773894727a8cbf249ac8e7ff8%7C0%7C0%7C638044053196210144%7CUnknown%7CTWFpbGZsb3d8eyJWljiMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6IklhaWwWLiJCXVClomn0%3D&reserved=0))) www.csudh.edu/social-work/admissions (<https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.csudh.edu%2Fsocial-work%2Fadmissions%2F&data=05%7C01%7Cwjashley%40csudh.edu%7Cfde44f9d518646e62ed608dac9af94e1%7C1a66a72773894727a8cbf249ac8e7ff8%7C0%7C0%7C638044053196210144%7CUnknown%7CTWFpbGZsb3d8eyJWljiMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6IklhaWwWLiJCXVClomn0%3D&reserved=0>)) for a list of equivalent examples);

b. One (1) Human Lifespan Development course, or its equivalent (visit [https://\(https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.csudh.edu%2Fsocial-work%2Fadmissions%2F&data=05%7C01%7Cwjashley%40csudh.edu%7Cfde44f9d518646e62ed608dac9af94e1%7C1a66a72773894727a8cbf249ac8e7ff8%7C0%7C0%7C638044053196210144%7CUnknown%7CTWFpbGZsb3d8eyJWljiMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6IklhaWwWLiJCXVClomn0%3D&reserved=0](https://(https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.csudh.edu%2Fsocial-work%2Fadmissions%2F&data=05%7C01%7Cwjashley%40csudh.edu%7Cfde44f9d518646e62ed608dac9af94e1%7C1a66a72773894727a8cbf249ac8e7ff8%7C0%7C0%7C638044053196210144%7CUnknown%7CTWFpbGZsb3d8eyJWljiMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6IklhaWwWLiJCXVClomn0%3D&reserved=0))) www.csudh.edu/social-work/admissions (<https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.csudh.edu%2Fsocial-work%2Fadmissions%2F&data=05%7C01%7Cwjashley%40csudh.edu%7Cfde44f9d518646e62ed608dac9af94e1%7C1a66a72773894727a8cbf249ac8e7ff8%7C0%7C0%7C638044053196210144%7CUnknown%7CTWFpbGZsb3d8eyJWljiMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6IklhaWwWLiJCXVClomn0%3D&reserved=0>)) for a list of equivalent examples);

%7CTWFpbGZsb3d8eyJWljiMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6IklhaWwWLiJCXVClomn0%3D&reserved=0) for a list of equivalent examples);

c. Two (2) courses in the humanities (philosophy, U.S. history, literature, religious studies, performing or visual arts, etc.); and

d. Three (3) social / behavioral science courses (e.g. social work, sociology, cultural anthropology, psychology, child development, human services, economics, political science, and gender, ethnic or disabilities studies, etc.).

4. Submit an official transcript from every institution you have attended outside of CSUDH, even if the courses were transferred or whether you withdrew before completing a term. Official transcripts must be submitted to the Office of Admissions by the designated deadline. The following circumstances may apply to some applicants:

- **Current and former CSUDH students** do not need to order CSUDH transcripts. Only transcripts of non-CSUDH courses need to be submitted. You will need to submit an official transcript from every institution you have attended outside CSUDH, even if you withdrew before completing a term and whether the courses are transferable.

- **Applicants with remaining coursework at the time of application** must submit an initial set of official transcripts of all college coursework completed to date, then submit updated transcripts reflecting successful completion of remaining coursework, including prerequisites and/or conferral of baccalaureate degree, if applicable.

- **Submit official transcripts (electronic transcripts preferred) by the designated deadline to:**

CSU Dominguez Hills
Office of Admissions & Records
1000 East Victoria Street
Carson, CA 90747

Please direct transcript-related questions to admissions@csudh.edu (admit@csudh.edu).

5. Applicants must be in good standing at the last college or university attended.

6. In addition to other information, applicants must submit the following (NOTE: full details of guidelines and instructions are available at <https://www.csudh.edu/social-work/> (<https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.csudh.edu%2Fsocial-work%2Fadmissions%2F&data=05%7C01%7Cwjashley%40csudh.edu%7Cfde44f9d518646e62ed608dac9af94e1%7C1a66a72773894727a8cbf249ac8e7ff8%7C0%7C0%7C638044053196210144%7CUnknown%7CTWFpbGZsb3d8eyJWljiMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6IklhaWwWLiJCXVClomn0%3D&reserved=0>)) www.csudh.edu/social-work/admissions (<https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.csudh.edu%2Fsocial-work%2Fadmissions%2F&data=05%7C01%7Cwjashley%40csudh.edu%7Cfde44f9d518646e62ed608dac9af94e1%7C1a66a72773894727a8cbf249ac8e7ff8%7C0%7C0%7C638044053196210144%7CUnknown%7CTWFpbGZsb3d8eyJWljiMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6IklhaWwWLiJCXVClomn0%3D&reserved=0>))

- Personal statement (12-font, 4-6 double-spaced pages), using the question prompts outlined in the application guidelines.
- Statement of Time Management;
- Statement of Financial Management;
- Experience Profile;
- Names and contact information of three (3) professional and/or academic references who can evaluate the applicant's potential for graduate study. Personal references will not be accepted.

Program Office: WH A-385, (310) 243-3170

Courses

MSW 500. Human Behavior and the Social Environment I. (3 Units)

Co-requisites: MSW 510, MSW 520, MSW 523, and MSW 540. Focus on individual and family life span. Examine individual and family development in the context of social, political, historical, and cultural variables. Individual and family behavior is examined for its unique expressions of strength and abilities in the course of achieving psychosocial, cognitive, moral, and spiritual developmental tasks. Offered Fall

MSW 501. Human Behavior and Social Environment II. (3 Units)

Prerequisites: MSW 500, MSW 510, MSW 520, MSW 523, and MSW 540. Co-requisites: MSW 511, MSW 521, MSW 530, and MSW 541. HBSE II, the second of two companion courses, examines the interrelationships among social institutions, social structure and social processes, on the one hand, and the realities of the lives of individuals, families, groups, communities, organizations and societies, on the other. Offered Spring

MSW 510. Social Welfare Policy I. (3 Units)

Co-requisites: MSW 500, MSW 520, MSW 523 and MSW 540. The structure, functions and components of US social welfare policy are identified and critically analyzed to reveal its scope, reach and limitations; current and historically successful approaches and tools to improve policies, increase social justice and reduce inequalities are reviewed. Offered Fall

MSW 511. Social Welfare Policy II. (3 Units)

Prerequisites: MSW 500, MSW 510, MSW 520, MSW 523 and MSW 540. Co-requisites: MSW 510, MSW 511, MSW 530 and MSW 541. Preparation to engage in policy practices advancing social and economic well-being of individuals, families, organizations and administrative and legal aspects of policy provisions and advancing social justice. Offered Spring, Summer

MSW 520. Generalist Social Work Practice I. (3 Units)

Co-requisites: MSW 500, MSW 510, MSW 523, and MSW 540. Focuses on theories, models, and interventions of generalist social work practice when working with individuals and families. Emphasis is placed on effective and equitable multicultural and contextual service delivery and interventions with poor, vulnerable and oppressed populations. Offered Fall

MSW 521. Generalist Social Work Practice II. (3 Units)

Prerequisites: MSW 500, MSW 510, MSW 520, MSW 523, and MSW 540. Co-requisites: MSW 501, MSW 511, MSW 530, and MSW 541. Focuses on theories, models and principles for generic social work practice with groups, communities and organizations. Emphasis is placed on effective and equitable multicultural and contextual service delivery and interventions with poor, vulnerable and oppressed populations. Offered Spring

MSW 522. Clinical Interventions with Youth, Children and Families in Social Work. (3 Units)

Prerequisites: MSW 500, MSW 501, MSW 510, MSW 511, MSW 520, MSW 521, MSW 530, MSW 540 and MSW 541 are required. Examines theories, principles and practices of family counseling, the life cycle and role of counselor in promoting change in families, utilizing CRT and Intersectionality. Ethical, legal and other professional issues related to family counseling will be covered. Restricted to Majors. Offered Fall

MSW 523. Social Justice in Social Work Practice. (3 Units)

Prerequisites: MSW 500, MSW 510, MSW 520, MSW 530 and MSW 540. Co-requisites: MSW 501, MSW 511, MSW 521 and MSW 541. Examines the history and consequences of different definitions of social justice. Social justice within human rights, culture, values, and ethics will be explored including related theory, social policy and movements and development of effective strategies promoting social justice. Offered Fall, Spring

MSW 524. Critical Race Studies in Social Work Practice. (3 Units)

In-depth overview of Critical Race studies (CRS) in social work fields. Examination of the causes and symptoms of structural racism and social/racial hierarchies in underserved communities. Analysis of the history and development of CRS' application to practice issues. Restricted to MSW Program.
Offered Fall

MSW 530. Social Welfare Research. (3 Units)

Co-requisites: MSW 500, MSW 510, MSW 520 and MSW 540. Critical assessment and mastery of research methodologies to systematically evaluate one's own social work practices, focusing on those used to evaluate published research studies, assess service and program delivery, and participate in conducting research as a professional social worker.
Offered Fall

MSW 531. Advanced Research. (3 Units)

Required Prerequisites: MSW 500, MSW 501, MSW 510, MSW 511, MSW 520, MSW 521, MSW 524, MSW 530, MSW 540, MSW 541. Community-based participatory action (CPAR) research skills and knowledge are acquired and applied to a topic relevant to a social work organization to generate a collaborative research proposal with a client participation component.
Offered Fall

MSW 540. Fieldwork Practicum I. (3 Units)

Co-requisites: MSW 500, MSW 510, MSW 520, and MSW 523. Supervised agency experience designed to develop generalist practice skills in working with individuals, families, groups and communities with emphasis on cross cultural practice. Two hours weekly seminar and 16 hours in agency placement. CR/NC grading.
Offered Fall

MSW 541. Fieldwork Practicum II. (3 Units)

Prerequisites: MSW 500, MSW 510, MSW 520, MSW 523, and MSW 540. Co-requisites: MSW 501, MSW 511, MSW 521, and MSW 530. Supervised agency experience designed to apply the knowledge, skills and values learned in MSW 520 and MSW 521 and activities of MSW 540. Two hours of seminar and 16 hours in agency placement. CR/NC grading.
Offered Spring

MSW 550. Advanced Social Work Practice in Communities. (3 Units)

Prerequisites: Completion of foundation year courses. Corequisite: MSW 570 and MSW 581. This course provides in depth overview of Social Work from a Community Practice perspective. It highlights contextual models of practice with communities as well as developmental, organizing, and planning approaches that are applicable to diverse populations. It will examine skills used by social workers to conduct culturally competent interventions.
Offered Fall, Spring

MSW 551. Social Policy III: Community Capacity Building. (3 Units)

Prerequisites: Advanced year status and declaration of Community Capacity Building as specialization. Corequisite: MSW 570. Community Capacity Building's growing influence on social policies and achievements improving the well-being of individuals and families in poor urban neighborhoods are described and analyzed to prepare professional social workers to advance social, economic and environmental justice.
Offered Spring

MSW 553. Multicultural Perspectives of Practice. (3 Units)

Prerequisites: Completion of foundation year courses. Corequisite: MSW 570. Theory and practice with ethnically, racially, religiously diverse populations utilizing a multidimensional, cross-cultural framework and case materials to analyze treatment issues and empowerment strategies.
Offered Fall

MSW 555. Advanced Practice in Administration and Leadership. (3 Units)

Prerequisites: MSW 510, MSW 520, MSW 521, MSW 550, MSW 540, MSW 541, MSW 550, MSW 570. Corequisite: MSW 571. Introduces the concepts and theories involved in leadership, administration and management of a human services organization. Leadership styles will be examined, paying close attention to those who recognize diverse cultural styles and incorporate contextually competent approaches to administration.
Offered Spring

MSW 560. Social Welfare Policy III: Children, Youth and Families. (3 Units)

Prerequisite: Advancement to Candidacy and completion of foundation year courses. Co-requisites: MSW 550, MSW 553, MSW 570 and MSW 598. Provides students with an advanced understanding of key issues, concepts and of key issues, concepts and skills associated with policy analysis and development of policy alternatives and political action on behalf of children, youth and families.
Offered Spring

MSW 561. Social Welfare Policy III: Community Health/Mental Health. (3 Units)

Prerequisite: Advancement to Candidacy and completion of foundation year courses. Co-requisites: MSW 550, MSW 553, MSW 570 and MSW 598. Community mental health policies, programs, services and initiatives identified and critically assessed for quality, utilization, social justice considerations, and social work impact, using specialized policy analyses, professional activities and political actions focusing on populations-at-risk within and across affiliated organizations.
Offered Spring

MSW 570. Fieldwork Practicum III. (3 Units)

Prerequisites: Completion of foundation year courses. Co-requisites: MSW 550 or MSW 551. Continued supervised agency experience at an advanced level in both direct and administrative program development areas within the student's area of concentration, with an emphasis on cross-cultural practice. One hour weekly seminar and 20 hours in agency placement. CR/NC grading.
Offered Fall

MSW 571. Fieldwork Practicum IV. (3 Units)

Prerequisites: Completion of foundation year courses and MSW 550 or MSW 551, MSW 553, MSW 570, and MSW 598. Corequisite: MSW 555. Continued supervised agency experience at an advanced level in both direct and administrative program development areas within the student's area of concentration, with an emphasis on cross-cultural practice. One hour weekly seminar and 20 hours in agency placement. CR/NC grading.
Offered Spring

MSW 574. Seminar in Health Care and Gerontology. (3 Units)

Prerequisites: MSW 500, MSW 501, MSW 510, MSW 511, MSW 520, MSW 521, MSW 524, MSW 530, MSW 540, and MSW 541 are required. Examines advanced social work practice in health care settings with persons of varying ages and advanced social work practice with older adults.
Offered Spring

MSW 575. Grant Research and Proposal Writing. (3 Units)

Prerequisites: MSW 500, MSW 501, MSW 510, MSW 511, MSW 520, MSW 521, MSW 524, MSW 530, MSW 540, and MSW 541 are required. Provides students with the knowledge and skills necessary to develop the fundamental components of a grant proposal to include needs assessment, program planning and development, abstract, background and significance, goals and objectives, project design and methods, evaluation, sustainability, outreach/marketing plan, budget and justification. Students will develop skills in researching and locating private and public funding opportunities.
Offered Spring

MSW 576. Youth Empowerment or Community Change. (3 Units)

Prerequisites: MSW 500, MSW 501, MSW 510, MSW 511, MSW 520, MSW 521, MSW 540, and MSW 541 are required. Examines strategies or engaging and empowering young people, with an emphasis on approaches in urban, racially segregated, and economically disinvested areas. Draws upon best practices from grassroots organizing, civic engagement, youth development, and child welfare.
Offered Spring

MSW 580. Child Welfare Issues. (3 Units)

Prerequisite: Advancement to candidacy. Identifies and critically analyzes a broad range of welfare issues related to children, youth and families, such as child maltreatment, poverty, race, gender, sexual orientation, and gang violence, focusing on contributing factors, recent research, policies and treatment modalities.
Offered Fall

MSW 581. Seminar in Community Capacity Building. (3 Units)

Prerequisite: Advanced year status and declaration of Community Capacity Building as Specialization. Co-requisites: MSW 550 and MSW 570. Focus is on the collaboration, assessment, implantation and evaluations of various strategies utilized to build capacity within communities. Students will apply the tenets of Asset and Social development to support/aid in the development of families, neighborhoods and communities.
Offered Fall

MSW 582. Seminar in MH Issues. (3 Units)

Prerequisite: Advancement to candidacy. Examines mental health from a community perspective. Cast in the context of the recovery model, theoretical perspectives examine assessment, treatment planning and approached to recovery and wellness. Critical Race Theory, cultural implications and outcomes will be examined.
Offered Fall

MSW 590. Graduate Seminar in Integrative Learning. (3 Units)

Prerequisite: Completion of all foundation-level MSW courses including Foundation Year field practicum. Students integrate mastery across course work and showcases key learning experiences and social work competencies. CR/NC grading.
Offered Spring

MSW 592. Diagnostic Assessment in Social Work Practice. (3 Units)

Restricted to majors. Overview of assessment for contextually and culturally competent social work practice using the DSM 5. A principle goal is to address, from a social justice standpoint, issues of social hierarchies and power in the use of diagnosis of mental health disorders.
Offered Summer

MSW 594. Independent Study in Social Work. (3 Units)

Independent pursuit of a topic or project which is proposed by the student. Study must be interdisciplinary and must be approved, in advance, by faculty member supervising study. Repeatable course. Non-repeatable.
Offered As needed

MSW 595. Special Topics in Social Work. (1-3 Units)

Advanced course of special interest for Social Work graduate students. Topic and content will vary as announced.
Offered As needed

MSW 598. Directed Research. (3 Units)

Prerequisite: Advancement to candidacy and consent of program coordinator. Co-requisites: MSW 551 or MSW 551, MSW 553, MSW 560 or MSW 561, and MSW 570. Extensive research on a subject related to the student's area of concentration under the guidance of a faculty member. Designed to prepare students for the Project, Thesis or their Comprehensive Examination. CR/NC grading.
Offered Fall

MSW 599. Social Work Thesis. (3 Units)

Prerequisite: Completion of all foundation-level MSW courses, including Foundation Year field practicum. Thesis option requires the student to design, implement, analyze and write up a formal research paper about an investigation into a topic relevant to the social work profession, which includes flexibility in terms of creativity and methodology. CR/NC grading
Offered Spring

MSW 600. Graduate Continuation Course. (1 Units)

Students who have completed their course work but not their directed project may maintain continuous enrollment by registering for this course with permission of the program coordinator.
Offered Infrequent

Social Work, Master of Social Work Requirements

Total Course Requirements for the Master's Degree (60 units)

The students must maintain a 3.0 grade point average to remain a student in good standing in the Social Work program. A student will be placed on academic notice if, in any term, he or she fails to earn a grade point average of 3.0 or higher for work taken through that term. During a subsequent term of one semester, the student must achieve a grade point average sufficiently high enough to bring the cumulative grade point average to 3.0 or better. Failure to do so will result in disqualification from the program.

Students may not earn social work course credit for life experience or previous work experience.

See the "Requirements for the Master's Degree" in the University Catalog for complete details on general degree requirements.

- Demonstrate Ethical and Professional Behavior
- Advance Human Rights and Social, Racial, Economic, and Environmental Justice
- Engage Anti-Racism, Diversity, Equity, and Inclusion (ADEI) in Practice

- Engage in Practice-Informed Research and Research-Informed Practice
- Engage in Policy Practice
- Engage with Individuals, Families, Groups, Organizations, and Communities
- Assess Individuals, Families, Groups, Organizations, and Communities
- Intervene with Individuals, Families, Groups, Organizations, and Communities
- Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Sociology

College of Natural and Behavioral Sciences
Department of Sociology

Program Description

The study of Sociology offers students the opportunity to develop a critical understanding of society, its processes, and structures, so as to understand and intervene in life and work in our diverse global society. Students apply the tools of social analysis to a broad range of social and institutional situations such as those of the family, schooling, and policing. The methods and knowledge developed by sociologists reflect the complexity of human organization, social life, inequalities, and social justice. The newly emerging patterns of social change continue to alter our life, making the effective applications of social analysis more important than ever before in solving problems of inequalities, human organization, and justice at a local and global level.

The department of Sociology at CSUDH is committed to its mission, “sociology in service to the community.” The department is composed of a diverse, innovative and stimulating faculty who teach and pursue research in a variety of areas that are important in today’s global societies. The sociology department offers undergraduate and graduate programs with several emphases that respond directly to the needs of today’s students. We offer a wide range of opportunities to engage in theory building, service learning, applied research, community studies, and organizing.

Undergraduate majors, minors, and graduate students may concentrate their studies in a variety of areas including theory building, applied research, community studies, criminology, justice studies, the helping professions, and social change in a global context. Sociology prepares students for careers in social work, law, criminal justice, government, non-profit and community and international organizations, education, gerontology, medicine, community service, urban planning, politics, business, academia, human resources, and applied research.

Undergraduates majoring in sociology may elect to concentrate their studies in any of the areas mentioned above or in an area designed in consultation with faculty to best fit their academic or professional goals. Students majoring in other disciplines or professional programs may tailor a minor in sociology to complement their major field of study. A minor in Sociology complements a wide range of majors, including psychology, political science, computer science, liberal studies, human services, public administration, and many others. Graduate students often plan their studies in the context of more specific career and professional goals, or to augment their current professions.

Academic Advisement

Sociology faculty provide advisement for majors, minors, and graduate students in sociology. Students are advised to meet with a faculty advisor early, in order to take the best advantage of the opportunities offered by the Department. Although undergraduates may go to any faculty member for Sociology advising, each term an instructor has extended office hours dedicated to Sociology advising. Contact information for faculty and GE advisors can be found on the department website. For graduate studies, Dr. LaTanya Skiffer should be contacted. Faculty are available for both daytime and night students. For faculty office hours and general questions, please call the department office at (310) 243-3431.

Preparation

High school students contemplating a major in sociology are encouraged to take college preparatory courses, including English, mathematics, and social sciences. Courses in computers, logic, and life science also are recommended.

Students planning to transfer from a community college should consult with their counselor or advisor to assure that appropriate lower-division courses are completed before the transfer.

Student Internships

Student internships are made available in locations related to the subject areas in the Sociology Department including criminology and justice studies, helping professions, social change in global contexts, social inequalities and applied research and community studies and others where faculty research and professional practice provide such opportunities. Students interested in internships can enroll in the SOC 381 Field Studies in Urban Problems course which is offered in the Fall and Spring semesters. Internships can also be arranged under special circumstances with individual faculty. Interested students should talk with faculty involved in such areas.

Student Organizations

The department has a chapter of Alpha Kappa Delta, the International Sociology Honor Society, for students who meet honor society requirements. There is a Sociology Student Club and a Pre-Law Club.

Graduation with Honors

An undergraduate student may be a candidate for graduation with honors in Sociology by meeting the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum GPA of at least 3.5 in all courses used to satisfy the upper-division requirements in the major.

Career Possibilities

The Sociology Department's programs are designed to prepare students for graduate study in sociology and for professional positions and careers in a variety of fields in federal, state, and local agencies as well as for jobs in private business and non-profit institutions and applied research. Studies in sociology provide great preparation for careers in academia, social work, counseling, law, probation, and criminology as well as community organizing, labor unions and public service. In addition to career advancement in the preceding areas and other areas, students completing a master's degree in sociology can teach at a community college and work toward a Ph.D. A degree in sociology also complements technical and administrative programs by broadening

students' understanding of social organizations, social inequalities, social structures, global and local processes, and human behavior. Contact the department office to for a list of faculty advisors to help you with your career choices and planning.

Undergraduate Programs

Bachelor

- Sociology, Bachelor of Arts (p. 821)

Minor

- Sociology, Minor (p. 826)

Certificate

- Community Organizing, Certificate (p. 820)
- Social Research, Certificate (p. 821)
- Social Research, Graduate Certificate (p. 821)

Graduate Programs

Master

- Sociology, Master of Arts (p. 824)

Certificate

- Community Organizing, Certificate (p. 820)
- Social Research, Certificate (p. 821)
- Social Research, Graduate Certificate (p. 821)

Department Office: SBS B-334, (310) 243-3431

Emeriti Faculty

Faye Arnold, William R. Blischke, Robert M. Christie, Charles Hohm, Fumiko Hosokawa, John C. Quicker, Steve Riskin

Courses

SOC 101. The Individual In Society. (3 Units)

An introduction to the study of self, socialization, and social interaction. Interpersonal relations and the structure of social roles; deviance and normality in everyday life.

Offered Fall, Spring, All terms

SOC 102. Understanding Social Relationships in a Global Perspective. (3 Units)

Dynamics and histories of basic institutions of society such as the family, work, economy, education, class, crime, race, culture and gender. Course content focuses on the global and comparative aspects of these institutions.

Offered Fall, Spring, All terms

SOC 220. Analytical Statistics. (4 Units)

Prerequisite: Algebra I is recommended. Statistical techniques for the description and analysis of sociological data. Tabular, graphic, and parametric analytical procedures. Three hours lecture and three hours laboratory per week.

Offered Fall, Spring, All terms

SOC 302. Workshop in Social Research. (3 Units)

Prerequisites: Consent of instructor is required; SOC 220, SOC 305, SOC 355 are recommended. Workshop in research methods and theory applied to actual research projects culminating in public reports. Repeatable course. Six hours of workshop per week.

Offered Fall, Spring, All terms

SOC 303. Qualitative Methods. (3 Units)

Use and application of unstructured, structured, and participant observation methods to sociological phenomena. Unobtrusive and non-reactive procedures of research.

Offered Infrequent

SOC 304. Computer Applications. (3 Units)

Prerequisite: SOC 220 or its equivalent is recommended. Applications of computers in the Social Sciences; data processing, modeling, simulation, data base management, bibliographic searches. On-line and batch applications. One hour of lecture and four hours of activity per week.

Offered Infrequent

SOC 305. Methods Of Soc Research. (4 Units)

Prerequisite: SOC 220. Examination of methods employed in the investigation of sociological phenomena. Consideration of the research process as a whole, including quantitative and qualitative techniques. Includes supplemental workshop. Three hours of lecture and two hours of activity per week.

Offered Fall, Spring, All terms

SOC 306. Program Evaluation. (3 Units)

Emphasis on the role of program evaluation in decision making, improvement, and accountability. Students will become involved in evaluation activities.

Offered Infrequent, All terms

SOC 307. Micro Computer Data Base Applications in Social Science. (3 Units)

Exploration of individualized data base systems for social science. Creation and management of data base files, both user generated and commercial software. Emphasis on the usefulness of the microcomputer in storing, accessing and analyzing social science data, report generation and accessing mainframe archives. One hour of lecture and four hours of activity per week.

Offered Infrequent

SOC 308. Field Applications Socio. (3 Units)

Offered Infrequent

SOC 309. Writing Skills in Sociology. (3 Units)

Introduction to basic research and presentational skills of sociology and social and behavioral sciences. Skills development in research and writing, using library and other data sources, organizing projects, writing reports. One hour of lecture and four hours of activity per week.

Offered Infrequent

SOC 310. Social Stratification. (3 Units)

Offered Infrequent

SOC 311. Global Organizations and Social Processes. (3 Units)

Examination of processes of globalization and contemporary social systems in a global context. This includes corporations, education, the family, the global economy, the military, religion and social movement organizations. Attention given to patriarchy, post-colonialism, race and ethnicity.

Offered Fall, Spring, All terms

SOC 315. Sociology Of Work. (3 Units)

Sociological analysis of work in industrial society. Examination of the labor force, industrial organization, occupational roles, and careers. Consideration of impact of technological change.

Offered Fall, Spring, Summer, All terms

SOC 316. Sociology Of Adult Life: Aging. (3 Units)

Prerequisite: SOC 101 or SOC 102 is required. The developmental processes occurring throughout the life-cycle with special focus on problems and issues surrounding middle and old age. Utilization of demographic, cross-cultural, family, community, and societal studies to explore the social dimensions of aging.

Offered Fall, Spring

SOC 317. Class Status Power & Work. (3 Units)

Offered Infrequent, All terms

SOC 320. The Family. (3 Units)

Study of the social processes and structural patterns affecting contemporary family life in American society.

Offered Fall, Spring, Summer, All terms

SOC 321. Sociology Of Education. (3 Units)

Examination of the organization and functions of educational institutions, comparison of American educational systems with educational systems in industrial and developing nations. Special attention given to the impact of schools on the life choices of culturally diverse groups.

Offered Fall, Spring

SOC 322. Social Environment of Education. (3 Units)

An integrative study of socialization factors of the young child from various backgrounds and patterns of relationships between the teacher, parent, and community figures in culturally diverse situations.

Offered Fall, Spring, All terms

SOC 325. Sociology Of Religion. (3 Units)

Study of religion from sociological perspective: how religions are enacted and expressed as social and cultural events; the relation of religion to social structures; emphasis of the awareness of religion as an aspect of complex multiethnic society.

Offered Infrequent

SOC 326. Sociology Of Medicine. (3 Units)

Social and cultural aspects of health, health behavior, and health organizations. Research on the distribution of disease in society, organization of health professions, social change, health care, stress and disease. Examination of social and cultural factors affecting utilization and structure of health services.

Offered Fall, Spring

SOC 327. Sociology of Sports. (3 Units)

In this course, sports is examined as a social institution. This course provides an analysis of the organization and social functions of sport, popular sports media and history. It examines how sports challenges and reproduces cultural ideas about masculinity, femininity, sexual orientation, race/ethnicity, social class, work, fun, achievement, competition, violence and aggression.

Offered Infrequent

SOC 328. Social Agencies: Practice and Power. (3 Units)

Study of the sources of power and the practical function of social agencies evaluated in their social context and for their impact upon the individual.

Offered Spring

SOC 331. Minority Racial and Ethnic Relations. (3 Units)

Investigation of current American racial and ethnic problems in world-wide and historical perspective.

Offered Fall, Spring, All terms

SOC 334. Women In Society. (3 Units)

Analysis of the changing role of women in different historical and cultural settings. Emphasis on the conflict women face from the value and belief systems of their cultures, those of their broader society and their social identity as women. The course will draw on material from diverse cultures, including both industrialized and developing countries.

Offered Fall, Spring

SOC 335. Social Movements. (3 Units)

A study of major social movements with varying specific emphasis on topical problems or relevant issues from semester to semester. For example, a specific semester may be devoted to Social Movements: Black Awareness; or Social Movements: Utopias. Repeatable course.

Offered Fall, Spring, Summer

SOC 337. Critical Sociology Through Film. (3 Units)

Students will examine how documentary and non-documentary film depicts and addresses social issues while communicating sociological theories and concepts in tangible visual formats. Through this process students will learn to critically examine media images using a sociological lens.

Offered Spring, Summer

SOC 340. Social Psychology: Sociological Perspective. (3 Units)

The reciprocal influence that individuals and groups exert on one another from a sociological perspective. Focus on language and other symbolic processes, role taking and role playing, and the importance of the self-concept in interpersonal behavior.

Offered Fall, Spring, All terms

SOC 341. Seminar In Small Groups. (3 Units)

Study and discussion of social interaction in small groups. Historical and theoretical background, research findings, leadership, and the small group as a social system. Classroom exercises in group dynamics. Three hours of seminar per week.

Offered Fall

SOC 355. Modern Sociological Theories. (4 Units)

Analysis of contemporary sociological theories with attention to historical origins. Relationship of theory to research and theory construction. Includes supplemental theory building workshop. Three hours of lecture and two hours of activity per week.

Offered Fall, Spring, All terms

SOC 362. Gangs and Adolescent Subcultures. (3 Units)

Examines gang phenomena nationally and regionally. Focus on organizational, behavioral, etiological, and preventive factors associated with development and perpetuation. Street, motorcycle, prison, ethnic and other subcultural formations are examined.

Offered Fall, Spring, Summer

SOC 363. Sociology of Alcohol and Other Drug Use. (3 Units)

Introduction to drugs and alcohol as a contemporary social problem. Sociological analysis of drug use and abuse. Course includes systematic review of policy implications and therapeutic applications of sociology of drug use, especially chemical dependency and alcoholism.

Offered Fall, Spring, Summer

SOC 364. Corrections. (3 Units)

Analysis of various sociological aspects of correctional operations: correctional settings, institutional life, types of correctional programs, rehabilitation, recidivism, alternatives to prisons, probation and prevention, the adjudicative process, and theoretical and empirical considerations of correctional systems.

Offered Fall, Spring

SOC 365. Deviant Behavior. (3 Units)

Consideration of deviant behavior. Study of the forms and processes of deviance, and the distribution of its occurrence. A systematic analysis of particular kinds of violations of normative rules as related to general processes of interaction in everyday social activities.

Offered Fall, Spring, Summer

SOC 367. Sociology Of Law. (3 Units)

The social context within which legal systems function, the effectiveness of law as a mechanism of social control, the relationship between law and social change, and the social basis for the administration of justice and punishment.

Offered Spring, Summer

SOC 368. Criminology. (3 Units)

Theories of the genesis of crime: patterns of criminal behavior; nature of criminal organizations; analysis of relationship of crime to the social structure; criminal statistics and crime rates: police and the criminal justice system.

Offered Fall, Spring, All terms

SOC 369. Juvenile Delinquency. (3 Units)

Social context, definition, implications, and causes of juvenile delinquency as a social phenomenon; analysis of factors associated with delinquent behavior. Problems of adjustment of delinquents and factors in treatment and in post-treatment adjustment.

Offered Fall, Spring, Summer, All terms

SOC 370. Moot Court. (3 Units)

Prerequisites: POL 304 and THE 120 are recommended. Training course of the Stanley Mosk Moot Court Competition. Case study of a selected problem and its progress through the legal system. Emphasis on difference between social and legal solutions. Students argue case before attorneys and judges. Repeatable course for up to three times.

Two hours of lecture and two hours of activity per week.

Offered Infrequent

SOC 380. Urban Sociology. (3 Units)

This class examines the general courses, processes, and consequences of urban development. Interdisciplinary perspectives and research methodologies for studying urban settings will be reviewed.

Offered Fall, Spring

SOC 381. Field Studies in Urban Problems. (3 Units)

Field experiences in the urban setting, with special emphasis upon investigation and understanding of the human and social dimensions of urban problems. Two hours of lecture and two hours of activity per week.

Offered Fall, Spring, All terms

SOC 382. Sociology of Latina/o Communities. (3 Units)

Offers introductory discussion and analysis of topics that pertain to Latinas/os throughout North, Central, and South America and the Caribbean. Explores experiences of different Latina/o communities. These include colonialism, post-colonialism, gender, immigration, race, etc.

Offered Infrequent

SOC 383. Black Communities: Class, Status and Power. (3 Units)

An analysis of the structure of the Black community: class, economic and political power, the role of leadership, and the conditions for social development.

Offered Fall, Spring, All terms

SOC 384. Community Organizing. (3 Units)

Study and project of community change. Analysis of the global context of local community organizing, including economic restructuring, environmental justice, immigration and the role of the state. Theories of community engagement and multi-cultural alliances, with an emphasis on women's roles.

Offered Fall, Spring

SOC 386. Sociology of the Helping Professions. (3 Units)

Analysis of the importance of social and environmental factors within the helping context. Particular emphasis on variety of settings for helping, and on issues of social ethics and cultural sensitivities.

Offered Fall, Spring, All terms

SOC 387. Theory and Research in Globalization. (3 Units)

This course provides students with an understanding of the basic theories and concepts related to the economic, social, political, and cultural processes of globalization. Students will work on a research project on a global issue.

Offered All terms, Fall, Spring

SOC 395. Special Topics In Sociology. (3 Units)

Intensive sociological analysis of a topic of special interest to both the faculty member and students. Repeatable course.

Offered Fall, Spring

SOC 401. Inferential Statistics. (4 Units)

Prerequisites: SOC 220 or its equivalent is required; algebra is recommended. Inferential statistical techniques as tools for analysis of sociological data. The logic of statistical inference. Parameter estimation and hypothesis testing. Three hours lecture and three hours laboratory per week.

Offered Infrequent

SOC 402. Multivariate Analysis. (4 Units)

Prerequisites: SOC 220 or its equivalent is required; SOC 401 is recommended. Consideration of the integral involvement of statistics in research, with special emphasis on multivariate techniques. Criteria for selection of appropriate techniques. Three hours of lecture and three hours laboratory per week.

Offered Infrequent

SOC 408. Survey Research. (3 Units)

Recommended Prerequisite: SOC 220. Emphasis on the skills of survey research in decision making, improvement, and data collection. Students will become involved in survey research activities.

Offered Infrequent

SOC 494. Independent Study. (1-3 Units)

Prerequisite: Consent of instructor. A reading program of selected topics conducted under the supervision of a faculty member. Repeatable course.

Offered Fall, Spring

SOC 496. Internship in Sociology. (3-6 Units)

Provides students with supervised pre-professional experience in a community agency, social justice or human rights organization. This internship introduces students to employment possibilities and social change work while they receive valuable field experience and build community contacts. Repeatable up to 9 units.

Offered As needed

SOC 498. Directed Research. (1-3 Units)

Offered Infrequent

SOC 500. Professional Development. (3 Units)

Provides an overview of university and department requirements for degree, campus resources, and exploration of career paths for Sociologists

Offered Fall, Spring

SOC 502. Graduate Workshop in Research and Theory. (3 Units)

Practicum in theory and research culminating in preparation of a public report. Entire experience is based on professional research projects in the Social Systems Research Center. Student is expected to assume some supervisory responsibility. Repeatable course. Six hours of workshop per week.

Offered Spring

SOC 503. Seminar in Ethnographic Analysis in Sociology. (3 Units)

Ethnographic fieldwork and analysis in Sociology. Theories and techniques of field observations and methods of analysis of observational data, including field notes, documents, and audio-visual records. Concentration on methods of doing sociology so as to extrapolate principles of social behavior from observation of on-going activities in organized settings. Three hours of seminar per week.

Offered Spring

SOC 505. Seminar in Sociological Research. (3 Units)

Prerequisites: SOC 305 or equivalent are required; SOC 401 or SOC 402, SOC 403 and SOC 407 are recommended; concurrent enrollment in SOC 506 required for Sociology graduate students, recommended for all others. Advanced study of sociological research techniques and strategies. Consideration of research design and analysis as they relate to theory testing. Three hours of seminar per week.

Offered Spring

SOC 506. Laboratory in Sociological Research. (1 Units)

Co-requisites: SOC 505 is required for Sociology graduate students and recommended for all others. Laboratory exercises in the application of research techniques, including formulation of the research problem, case selection, instrument design, observation, data reduction and processing, analysis, and interpretation. Three hours of laboratory per week.

Offered Spring

SOC 511. Seminar in Social Organizations. (3 Units)

An examination of the basic forms of social organization in historical and comparative perspective. The basic social scientific conceptions of social organization will be compared and contrasted in terms of methodological and policy implications. Three hours of seminar per week.

Offered Fall

SOC 518. Seminar in Marriage and the Family. (3 Units)

A sociological examination of contemporary social issues and changes affecting marriage and family life in American society. Normative and alternative family and marital life styles will be explored. Three hours of seminar per week.

Offered Fall

SOC 529. Seminar in Social Gerontology. (3 Units)

A detailed sociological discussion and presentation of theoretical and methodological issues and problems in the field of social gerontology. Fieldwork will be conducted. Three hours of seminar per week.
Offered Infrequent

SOC 550. Seminar in Interaction Processes. (3 Units)

Experience in both the theoretical and practical study of microsociology. Stress on the small group, with specific concern for problems such as communication, leadership, decision-making, gamesmanship, equilibrium, and change. Relevant research literature reviewed, and laboratory experiments in interaction processes conducted. Three hours of seminar per week.
Offered Spring

SOC 555. Seminar in Sociological Theory. (3 Units)

Prerequisite: SOC 355. A detailed examination of classical and contemporary sociological theory. Three hours of seminar per week.
Offered Fall

SOC 560. Seminar in the Sociology of Racial and Ethnic Relations. (3 Units)

A systematic inquiry into the experience of racial and ethnic minorities in the United States. Analysis of the sociological literature on interethnic relations, ethnic stratification and inequality. Implications for social policy. Three hours of seminar per week.
Offered Spring

SOC 561. Seminar in Aging: Minorities and Special Groups. (3 Units)

Analysis of the situation of the elderly within selected population groups including the black aged, Mexican-American aged, the aging woman, the rural and urban poor aged. Community resource persons will be invited to participate. Three hours of seminar per week.
Offered Infrequent

SOC 563. Seminar in the Sociology of Alcohol and Other Drug Use. (3 Units)

Social scientific approach to chemical substance use, misuse and dependency. Analysis of contemporary and historical definitions of alcohol and drug use. Origin, maintenance and transformation of patterns of drug use. Social responses to abuse and politics of use and abuse. Three hours of seminar per week.
Offered Infrequent

SOC 567. Sem In Sociology Of Law. (3 Units)

Offered Infrequent

SOC 568. Seminar In Criminology. (3 Units)

Analysis of specific issues in criminology. Issues that may be considered include the following: causative theories, major types of crime, formal crime control agencies, and prevention and control. Three hours of seminar per week.
Offered Spring

SOC 569. Seminar in Juvenile Delinquency. (3 Units)

Investigation of the causes, nature and consequences of Juvenile Delinquency from a sociological perspective. Reading and discussion of theoretical studies and empirical research. Three hours of seminar per week.
Offered Fall

SOC 595. Special Topics in Sociology. (3 Units)

A course designed to consider sociological analysis of a variety of special interest topics. The repeatable nature of the course makes it possible for students to work with more than one instructor on a topic of particular interest to the student. Course may be repeated once for a total of 6 units. Three hours of seminar per week.
Offered As needed

SOC 596. Practicum In Teaching Sociolog. (3 Units)

Prerequisite: Classified graduate standing. Supervised experience in teaching Sociology. Techniques and skills appropriate to instruction at the college level. Instructional and evaluative experiences under supervision of sociology faculty. Repeatable for credit for a maximum of six units.
Offered Fall, Spring

SOC 597. Directed Reading. (1-3 Units)

Independent reading under direction of supervising faculty member in Sociology. Repeatable course.
Offered Fall, Spring

SOC 598. Directed Research. (1-3 Units)

Independent research under direction of supervising faculty member in Sociology. Repeatable course.
Offered Fall, Spring

SOC 599. Graduate Capstone in Sociology. (1-5 Units)

Prerequisites: SOC 505, SOC 555, SOC 511 or SOC 550 and Advancement to Candidacy in Sociology Graduate Program is required. Supervised thesis, special project, or comprehensive examination in sociology. Repeatable course.
Offered Fall, Spring

SOC 600. Grad Continuation Course. (1 Units)

Graduate students who have completed their coursework but not their thesis, project, or comprehensive examination, or who have other requirements remaining for the completion of their degree, may maintain continuous attendance by enrolling in this course. Signature of graduate program coordinator required.
Offered Fall, Spring

Community Organizing, Certificate

This certificate examines theories and perspectives on organizing with an emphasis on preparing students to bridge differences and become community leaders for social and gender justice. Inequalities of race, class, gender, sexuality, ability, age and citizenship are just some of the differences that shape ways in which organizing is carried out and communities are formed. Through this certificate, students will learn theoretical approaches to organizing and community work and will, through experiential learning in the area of community organizing, apply these theoretical approaches. Furthermore, students are trained in practical aspects of community organizing from managing funds to utilization of technology. An Internships with a community-based organizations in the Los Angeles area will be central to completion of the certificate.

Inequalities of race, class, gender, sexuality, ability, age and citizenship are just some of the differences that shape ways in which organizing is carried out and communities are formed. Through this certificate, students will learn theoretical approaches to organizing and community work and will, through experiential learning in the area of community organizing,

apply these theoretical approaches. Furthermore, students are trained in practical aspects of community organizing from managing funds to utilization of technology. An Internships with a community-based organizations in the Los Angeles area will be central to completion of the certificate.

Requirements

| Code | Title | Hours |
|--|-------------------------|--------------|
| Required Courses | | |
| SOC 335 | Social Movements | 3 |
| SOC 384 | Community Organizing | 3 |
| SOC 496 | Internship in Sociology | 3-6 |
| Electives | | |
| Select one elective Sociology course in consultation with an advisor | | 3 |
| Total Hours | | 12-15 |

Social Research, Certificate

The Undergraduate Certificate in Social Research is designed to qualify recipients to participate fully in all phases of research projects from the initial conceptualization to the final report writing. To qualify for the certificate candidates must demonstrate their competence in conceptualization, research design, sampling design, instrument design, data collection, data analysis and report writing. This program is open to non-sociology majors.

Requirements

| Code | Title | Hours |
|--|--|-----------|
| Required Courses | | |
| SOC 220 | Analytical Statistics ¹ | 4 |
| SOC 303 | Qualitative Methods ¹ | 3 |
| Select one of the following: | | 3 |

| SOC 402 | Multivariate Analysis ¹ | 4 |
| Urban Community Research Center | | |
| SOC 302 | Workshop in Social Research ² | 12 |
| Total Hours | | 41 |

¹ May be applied to the major in Sociology.

² Must be taken in the Urban Community Research Center.

Note: Appropriate courses from other disciplines may be substituted with the assistance of an advisor.

Social Research, Graduate Certificate

The Graduate Certificate in Social Research is designed to qualify recipients to supervise researchers in all phases of research projects

from the initial conceptualization to the final report writing. To obtain the certificate, candidates must demonstrate their competence to teach and supervise researchers in conceptualization, research design, sampling design, data collection, data analysis and report writing. Note: The student in the certificate program must meet the admission requirements for the Sociology Master's Degree Program and must maintain a 3.0 ("B") average.

Note: Appropriate courses from other disciplines may be substituted with consent of advisor.

Sociology, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

Single field major, no minor required.

Major Requirements (42 units)

The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

| Code | Title | Hours |
|---|---|-----------|
| Lower Division Required Courses | | |
| SOC 101 or SOC 102 | The Individual In Society Understanding Social Relationships in a Global Perspective | 3 |
| SOC 220 | Analytical Statistics | 4 |
| Upper Division Required Courses | | |
| SOC 305 | Methods Of Soc Research | 4 |
| SOC 309 | Writing Skills in Sociology | 3 |
| SOC 311 | Global Organizations and Social Processes | 3 |
| SOC 340 | Social Psychology: Sociological Perspective | 3 |
| SOC 355 | Modern Sociological Theories | 4 |
| Select six additional upper division courses in sociology with the assistance of an advisor | | 18 |
| Total Hours | | 42 |

Basic Areas of Study

The Sociology Department recommends that each student select an area for the major or minor. At least **six** elective courses should be taken from that chosen area of study (Upon consultation with an advisor a student may elect to substitute another course for one in his/her specialty).

The basic areas of study are as follows:

- Applied Research
- Community Studies
- Criminology and Justice Studies
- Helping Professions
- Social Change in Global Contexts
- Social Inequalities

Applied Research

The applied research area emphasizes practical skills needed to conduct research projects in diverse social settings. Courses cover such topics as statistical analysis, research methods, feminist methods, program evaluation, and ethnographic data analysis. The goal of the area is to provide students with hands-on research experiences from a sociological perspective. Students will gain many of the technical skills needed to conduct community research, program evaluation, and data analysis projects. These skills are increasingly important in non-profit agencies as well as in large university and private research centers.

Select 6 courses from the below list (18-20 units)

| Code | Title | Hours |
|---------|-----------------------------|-------|
| SOC 220 | Analytical Statistics | 4 |
| SOC 302 | Workshop in Social Research | 3 |
| SOC 303 | Qualitative Methods | 3 |
| SOC 304 | Computer Applications | 3 |

| | | |
|---------|---|---|
| SOC 305 | Methods Of Soc Research | 4 |
| SOC 306 | Program Evaluation | 3 |
| SOC 408 | Survey Research | 3 |
| SOC 503 | Seminar in Ethnographic Analysis in Sociology | 3 |

Community Studies

The area of community studies uses multiple methodologies to explore social justice issues in diverse communities. It is designed to provide students with an overview of different approaches to the field. Classes address theories of community, issues in community studies, ethics, and data analysis. Many of the classes include practical fieldwork requirements such as internships, service learning, and research with community partners. This area will prepare students for careers in research, program evaluation, social work, non-profit management, urban planning, and public policy among others.

Select 6 courses from the below list (18 units)

| Code | Title | Hours |
|---------|---|-------|
| SOC 302 | Workshop in Social Research | 3 |
| SOC 306 | Program Evaluation | 3 |
| SOC 326 | Sociology Of Health | 3 |
| SOC 331 | Minority Racial and Ethnic Relations | 3 |
| SOC 334 | Women In Society | 3 |
| SOC 335 | Social Movements | 3 |
| SOC 340 | Social Psychology: Sociological Perspective | 3 |
| SOC 341 | Seminar In Small Groups | 3 |
| SOC 362 | Gangs and Adolescent Subcultures | 3 |
| SOC 363 | Sociology of Alcohol and Other Drug Use | 3 |
| SOC 380 | Urban Sociology | 3 |
| SOC 381 | Field Studies in Urban Problems | 3 |
| SOC 383 | Black Communities: Class, Status and Power | 3 |
| SOC 384 | Community Organizing | 3 |
| SOC 503 | Seminar in Ethnographic Analysis in Sociology | 3 |

Criminology and Justice Studies

This area of study utilizes a social scientific lens to examine various institutions associated with the criminal justice system. Specifically, this area explores criminological theories regarding the etiology of crime, juvenile delinquency, ganging, and deviant behavior as they relate to policing, courts, corrections, and laws. The courses will delve into issues such as social inequality and power relations between correctional institutions and communities. With an emphasis on social justice, this area will give students the tools to analyze these topics from feminist, global, and critical race theory perspectives, preparing students for graduate school, law school, or government employment.

Additionally, students educated within a social justice framework are prepared to contribute to the justice professions through evaluation, research, ethical practice, and dedicated service.

Select 6 courses from the below list (18 units)

| Code | Title | Hours |
|---------|--------------------------------------|-------|
| SOC 331 | Minority Racial and Ethnic Relations | 3 |
| SOC 362 | Gangs and Adolescent Subcultures | 3 |
| SOC 364 | Corrections | 3 |
| SOC 365 | Deviant Behavior | 3 |
| SOC 367 | Sociology Of Law | 3 |
| SOC 368 | Criminology | 3 |

| | | |
|---------|---------------------------------|---|
| SOC 369 | Juvenile Delinquency | 3 |
| SOC 380 | Urban Sociology | 3 |
| SOC 381 | Field Studies in Urban Problems | 3 |

Helping Professions

This area of study looks at the social service resources in the community as they link up with diverse populations in society. Community agencies provide social services, mental health services and health services as they interface with ethnic communities, the elderly and families from all walks of life. Understanding the theories of helping and the methods of service delivery become important in assessing the effectiveness of social agencies. Community fieldwork and hands-on experience at agencies provide the student with opportunities to view the function of these agencies and their purpose in serving communities.

Select 6 courses from the below list (18 units)

| Code | Title | Hours |
|---------|--|-------|
| SOC 306 | Program Evaluation | 3 |
| SOC 316 | Sociology Of Adult Life: Aging | 3 |
| SOC 320 | The Family | 3 |
| SOC 326 | Sociology Of Health | 3 |
| SOC 328 | Social Agencies: Practice and Power | 3 |
| SOC 363 | Sociology of Alcohol and Other Drug Use | 3 |
| SOC 381 | Field Studies in Urban Problems | 3 |
| SOC 383 | Black Communities: Class, Status and Power | 3 |
| SOC 384 | Community Organizing | 3 |
| SOC 386 | Sociology of the Helping Professions | 3 |

Social Change in Global Contexts

This area of study focuses on the relationship between global processes (political, economic, and cultural) and social institutions and communities. Students will develop analytical skills that pertain to the changing social environments on a local, regional, and global level. This area highlights how collective and individual social factors shape and are shaped by the shifting conditions brought about by globalization. The goal of this area is to prepare students for further study in the area of global studies as well as careers in which knowledge of the global dimensions of social life are required. Topics included but are not limited to: the social impact of immigration, the environment, labor issues, race, gender, sexuality, ethnicity, human rights, and new forms of citizenship and governance.

Select 6 courses from the below list (18 units)

| Code | Title | Hours |
|---------|---|-------|
| SOC 311 | Global Organizations and Social Processes | 3 |
| SOC 315 | Sociology Of Work | 3 |
| SOC 321 | Sociology Of Education | 3 |
| SOC 326 | Sociology Of Health | 3 |
| SOC 334 | Women In Society | 3 |
| SOC 335 | Social Movements | 3 |
| SOC 384 | Community Organizing | 3 |
| SOC 387 | Theory and Research in Globalization | 3 |

Social Inequalities

This area of study focuses on forms of racial formation, the social construction of gender and inequality, class and domination and subordination. Students will develop the skills to critically understand the intersections of race, class, gender, sexualities, citizenship and inequalities that shape social lives. Furthermore, students will acquire an

understanding of resistance and social movements aimed at addressing inequalities. The study of social inequalities prepares students for a wide range of careers where sensitivity to diversity and advocacy are called for.

Select 6 courses from the below list (18 units)

| Code | Title | Hours |
|---------|--|-------|
| SOC 311 | Global Organizations and Social Processes | 3 |
| SOC 321 | Sociology Of Education | 3 |
| SOC 322 | Social Environment of Education | 3 |
| SOC 327 | Sociology of Sports | 3 |
| SOC 331 | Minority Racial and Ethnic Relations | 3 |
| SOC 334 | Women In Society | 3 |
| SOC 335 | Social Movements | 3 |
| SOC 362 | Gangs and Adolescent Subcultures | 3 |
| SOC 383 | Black Communities: Class, Status and Power | 3 |
| SOC 384 | Community Organizing | 3 |

Program Learning Outcomes

1. Sociology department seeks to provide the appropriate learning contexts that will enhance students' basic skill in writing, reading and critical thinking
2. Introduce students to a sociological perspective ie to conceptualize and theorize sociologically
3. To instruct students to rigorously qualitative and quantitative research methods and recognize the importance of linking method to theory
4. To cultivate in students in students an appreciation of how strong academic skills can enhance career opportunities and serve community needs
5. To inform students of the importance of personal and professional ethics.
6. Evaluate the validity and reliability of data
7. Design and Execute a research project
8. Write and clear sociological analysis
9. Demonstrate the difference between theory and methods
10. Ability to conduct statistical analysis

Sociology, Master of Arts Graduate Studies in Sociology

The department offers an established graduate program leading to the Master of Arts in Sociology. The program is designed to provide all students with a strong foundation in sociological theory and research methodology. The graduate program is designed to allow for a substantial degree of student choice. Students may choose a macro or micro-based program of study and select from several areas for further specialization or experience. These areas include, but are not restricted to, such concentrations as community studies; family; race and ethnicity; social research; sociology of education; law and society; criminology and deviance; and general sociology. Finally, students may choose one option to complete their graduate study program: comprehensive exam, thematic project, or thesis. Students with an interest in applied fields the degree are encouraged to complete via project or comprehensive examination. Those with research interests or who may wish to pursue advanced graduate study toward a doctoral degree are encouraged to opt for the thesis or thematic project options. All students are encouraged to take their learning outside of the classroom to prepare for graduate education and career development.

The Department of Sociology has an established record of success in graduate education. Many of the department's graduates have found careers in research, teaching, higher education, nonprofit and public service sectors, evaluation research, and a wide range of other fields. Special emphasis is placed on practical and policy-relevant research participation by graduate students. Students are encouraged to take an active role in the department, the discipline, and the wider community. Students may participate in one or more of the many advanced forms of social scientific research, including evaluation research, social impact analysis, ethnographic field research, internships, or teaching practicums.

Requirements

Admissions Requirements and Procedures

To be considered for admission to the Sociology Graduate Program, applicants must complete the appropriate forms and pay the established fees through the Office of Admissions. Successful applicants must possess a bachelor's degree from an accredited college or university and a grade point average of 3.0 in the last 60 semester units (90 quarter

units) of upper division undergraduate course work (excluding units earned in extension studies). The applicant should have two letters of recommendation forwarded to the program coordinator. Applicants not possessing the above qualifications may apply directly to the Sociology Graduate Committee for special consideration.

Only those applicants who show promise of success and fitness will be admitted to the graduate program, and only those who continue to demonstrate a satisfactory level of scholastic competence and fitness shall be eligible to continue in the program.

Requirements for Classified Standing

To become classified in the Sociology Graduate Program, a student must demonstrate a background in social science theory and methods. This usually entails a theory and a methods course taken at the undergraduate level. Students in need of this exposure will be required to take appropriate undergraduate theory and/or methods course(s) in order to be classified. Students eligible for classification should contact the graduate coordinator.

Requirement for Advancement to Candidacy

Candidacy status denotes the successful completion of a major portion of the graduate academic program.

To be advanced to candidacy students must have completed the following:

1. Meet graduate writing assessment requirement
2. The following core courses with a minimum grade of "B" in each course

| Code | Title | Hours |
|--------------------|-------------------------------------|-----------|
| SOC 505 | Seminar in Sociological Research | 3 |
| SOC 506 | Laboratory in Sociological Research | 1 |
| SOC 511 | Seminar in Social Organizations | 3 |
| or SOC 550 | Seminar in Interaction Processes | |
| SOC 555 | Seminar in Sociological Theory | 3 |
| Total Hours | | 10 |

3. Completion of two additional graduate seminars in sociology with a minimum grade point average of 3.0
4. Approval of the student's eligibility for the comprehensive exam by the graduate coordinator; or
5. Approval of a thesis or thematic project proposal by a committee consisting of at least two members of the full-time faculty of the sociology department. Proposals are submitted in writing and the title is registered with the department

Degree Requirements

General Sociology Option (30 units)

| Code | Title | Hours |
|---|---|-------|
| Required Core Courses ¹ | | |
| SOC 505 | Seminar in Sociological Research ² | 3 |
| SOC 506 | Laboratory in Sociological Research | 1 |
| SOC 555 | Seminar in Sociological Theory ² | 3 |
| SOC 511 | Seminar in Social Organizations | 3 |
| or SOC 550 | Seminar in Interaction Processes | |
| Electives | | |

Complete 20 additional units from sociology course offerings (a maximum of nine units may be taken from 300 or 400 level courses and only with the consent of the graduate coordinator)³

Additional Requirement

Complete one of the following:

| | |
|--------------------|-----------|
| Comprehensive Exam | |
| Thesis | |
| Thematic project | |
| Total Hours | 30 |

¹ Core courses must be completed with an overall grade point average of 3.0 or better with no grade lower than a "B".

² Classified students are required to take this course during their first year in the program.

³ At least three units should be graduate seminars, those students selecting the thesis or the project may include five units of SOC 599 Graduate Capstone in Sociology. Those students selecting the comprehensive examination option must include two units of SOC 599 Graduate Capstone in Sociology.

Research Skills Option (30 units)

The following courses are prerequisites and must be completed before classified standing in the program will be granted.

| Code | Title | Hours |
|----------------------|---|----------|
| Prerequisites | | |
| SOC 304 | Computer Applications | 3 |
| or SOC 307 | Micro Computer Data Base Applications in Social Science | |
| SOC 402 | Multivariate Analysis | 4 |
| Total Hours | | 7 |

Research Skills Option: This option will also satisfy requirements for the Graduate Research Certificate.

| Code | Title | Hours |
|-------------------------------------|---|--------------|
| Core Courses | | |
| SOC 505 | Seminar in Sociological Research | 3 |
| SOC 506 | Laboratory in Sociological Research | 1 |
| SOC 555 | Seminar in Sociological Theory | 3 |
| SOC 511 | Seminar in Social Organizations | 3 |
| or SOC 550 | Seminar in Interaction Processes | |
| Required Courses | | |
| SOC 503 | Seminar in Ethnographic Analysis in Sociology | 3 |
| Complete 12 units of the following: | | 12 |
| SOC 502 | Graduate Workshop in Research and Theory ¹ | |
| SOC 302 | Workshop in Social Research | |
| SOC 598 | Directed Research | 1-3 |
| Total Hours | | 26-28 |

¹ Must take at least nine units in SOC 502 Graduate Workshop in Research and Theory.

Additional requirements:

1. Serve as project director (or co-director) of a selected Urban Community Research Center sponsored project for the minimum of

one term and the submission of an approved written report of the project

2. A grade point average of 3.0 or better in graduate study

1.

Master's Requirement

In addition to the major requirements, students must meet all university requirements for the master's degree. Students should consult the section of the catalog entitled "Graduate Degrees and Postbaccalaureate Studies (<https://catalog.csudh.edu/general-information/graduate-degree-postbaccalaureate-studies/>)."

Outdated Coursework

Students usually complete the program within two or three years. However, some students do not maintain continuous attendance and, hence, take considerably longer. Students must complete the entire program within seven years. Courses taken in the eighth year are subject to a validation process. According to California State University policy, courses taken more than eight years before the student graduates must be repeated. Consult the general regulations regarding "outdated coursework" elsewhere in the catalog.

- Demonstrate responsible ethical and professional conduct related to sociological research and in professional life.
- Demonstrate advanced writing skills reflective of sociological styles (e.g. research papers, literature reviews, research proposal, or program evaluations) at the graduate level.
- Demonstrate skills designed to contribute to the development of their discipline or profession at the economic, social and civic policy levels.
- Demonstrate an ability to perform independently, both intellectually and professionally, within sociology at a graduate level.
- Demonstrate an ability to express advanced ideas orally at a graduate level.
- Engage in research, scholarly or creative activity within sociology or make meaningful contributions to field of sociology at a graduate level.

Sociology, Minor Requirements

Five courses selected upon advisement (a maximum of three lower division units may apply toward the minor). The department also provides advisors who pay particular attention to the professional needs of students working in the technical, administrative and business fields. Minor areas may be "tailor-made" to meet the specific educational interests and career needs of students (see previous academic advisement section).

Spanish

College of Arts and Humanities

Department of Modern Languages (<https://www.csudh.edu/modern-languages/>)

Program Description

The Spanish Language has become an important global language and those who hold a degree in Spanish are of an invaluable asset in California, across the country, and the world. Over 534 million people worldwide speak Spanish as a first and second language. More than 41

million people in the U.S. speak Spanish. The US Census Bureau reports that the population of Latino origin is expected to jump to 119 million by 2060.

Moreover, the employment opportunities for Spanish majors continue to grow with both the passage of Proposition 58, which removes restrictions on bilingual education programs for California and the Global California 2030 Initiative which calls for the expansion of the teaching and learning of world languages and the number of in more than one language over the next 12 years.

Spanish Programs

The Department of Modern Languages offers students a Spanish major with two concentration options: Linguistics or Literature. Both options prepare students who intend to teach Spanish in high schools and students who plan to continue their studies in graduate school either in the academic fields of Spanish Linguistics, Romance Linguistics, Spanish Literature, and Latin American literature. Additionally, the B.A. in Spanish also provides opportunities for employment to those who want to become:

1. academic counselor,
2. criminal justice administrator,
3. customs inspector,
4. importer/exporter,
5. international marketing representative,
6. international student advisor,
7. interpreter or translator,
8. language consultant
9. lawyer,
10. librarian,
11. NGO employee, etc.

Additionally, the Department offers four Minors in Spanish:

1. Spanish Culture,
2. Spanish Grammar and Writing,
3. Spanish Linguistics and
4. Spanish Literature.

These minors complement and enhance all majors. It is particularly useful to students majoring in business, in the public and health service fields, in paralegal work, criminal justice, etc.

Due to the passage of Proposition 58, the most urgent need for majors in Spanish is in public-school teaching, from K-12. For students who plan to teach at the elementary level and who are majoring in Liberal Studies, the Spanish program offers a Spanish option and the Bilingual Authorization. The Spanish option in Liberal Studies provides an in-depth study of Spanish. This option is particularly helpful for those potential elementary teachers who intend to seek bilingual certification.

The Bilingual Authorization is an additional program that students of the Multiple and Single Subject Credential Programs can add to their teaching credentials. This Bilingual Authorization permits candidates and teachers to teach in a K-12 bilingual immersion setting. The Subject Matter Preparation Program in Spanish (also known as the Single Subject Waiver Program in Spanish) is designed for students who plan to teach the Spanish language at the secondary school level. Additionally,

the Spanish Subject Matter Authorization is designed for teachers who would like to teach Spanish in middle school.

Academic Advisement

The Department of Modern Languages is eager to provide all its students with the advisement they will need to continue their studies in a modern language. An advisor is vital in choosing the Spanish course best suited to the background and needs of each student. Students must see an advisor upon admission, upon completion of 60-semester units, and during the first semester of the senior year.

Preparation

High school students who plan to major or minor in Spanish are encouraged to take at least two years of Spanish in high school. Students who have taken AP Spanish, French or Japanese may receive credit for some lower-division courses.

Community college transfer students planning to take upper-division Spanish courses at CSU Dominguez Hills should have completed four semesters of college-level Spanish successfully. All students are required to take SPA 280. Those who have taken fewer than four semesters of Spanish in a community college will be placed at an appropriate level by means of advisement.

Student Organizations

Sigma Delta Pi: Membership in our Nu Psi Chapter of Sigma Delta Pi, the Spanish National Honorary Society, is open to students who have completed at least 18 upper-division semester units in Spanish including at least one upper-division course in literature or culture, and who have a 3.0-grade point average in all classes, including a 3.0-grade point average in all Spanish courses. Sigma Delta Pi seeks to honor those who seek and attain excellence in the study of Spanish language, literature, and culture; to honor those who strive to make Hispanic contributions to modern culture better known in the world in general; to encourage college students to acquire a greater interest in and deeper understanding of Hispanic culture, and to foster friendly relations and mutual respect between Spanish speaking nations and other peoples of the world. Students interested in applying for membership should consult the Department of Modern Languages chair.

Graduation With Honors

An undergraduate student may graduate with Honors in Spanish provided that the following criteria are met:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of at least 3.5 in all courses used to satisfy the upper division requirements in the major.

Emeriti Faculty

Richard Beym, José S. Cuervo, Frances Lauerhass, Porfirio Sánchez, Luz Watts

Courses

SPA 110. Beginning Spanish I. (3 Units)

Prerequisite: Grade of C or better in SPA 100. Basic instruction in Spanish. Training in speaking, listening, reading, and writing for students who have had no previous work in Spanish.
Offered Fall, Spring, All terms

SPA 111. Beginning Spanish II. (3 Units)

Prerequisite: SPA 305 or equivalent. Translation from Spanish to English and English to Spanish with practical application for journalistic, advertising, commercial, and governmental activities. Introduction to the art of consecutive translation.
Offered Fall, Spring, All terms

SPA 115. Intensive Beginning Spanish. (6 Units)

Prerequisite: Grade of C or better in SPA 100. An accelerated course in beginning Spanish; emphasis on speaking and listening comprehension. Development of elementary reading and writing skills. Active participation and engagement. The equivalent of SPA 110 plus SPA 111.
Offered Infrequent

SPA 151. Introduction to Hispanic Culture. (3 Units)

Introduction to Hispanic Culture. A designated geographical area studies course focusing on patterns of culture in the Spanish-speaking world. Topics will vary from semester to semester; for example, Mexico and the Southwestern U.S., or Contemporary Spain. Conducted in English.
Offered Fall, Spring

SPA 220. Intermediate Spanish I. (3 Units)

Prerequisite: SPA 111 or equivalent. A continuation of Spanish 111, with emphasis on oral communication skills.
Offered Fall, Spring, All terms

SPA 221. Intermediate Spanish II. (3 Units)

Prerequisite: SPA 220 or equivalent. A continuation of Spanish 220, with emphasis on reading and writing.
Offered Fall, Spring

SPA 230. Spanish Conversation. (3 Units)

Intermediate-level Spanish conversation with special emphasis on increasing the oral proficiency of second-language learners of Spanish. Conversational functions practiced will include describing and identifying people, places, things and events, requesting and providing information, and expressing opinions. Students will be exposed to various aspects of Spanish-speaking cultures.
Offered Fall

SPA 280. Grammar for Spanish Composition. (3 Units)

Students advance their knowledge of Spanish grammar in the areas of orthography, accentuation, punctuation, parts of speech, verb morphology, sentence types. Students will study essay types, with an emphasis on narration.
Offered Fall, Spring

SPA 302. Business Spanish. (3 Units)

The principal objective of this course is to prepare students to use Spanish for business. Topics for this course include: 1) informal vs. formal Spanish; 2) the communicative purpose: informative vs persuasive presentations; 3) technology and business; 4) the language of finance; 5) legal language for business; and 7) ethical considerations and their reflection on language use.
Offered Spring

SPA 305. Advanced Composition, Syntax and Stylistics I. (3 Units)

Prerequisite: SPA 280 or equivalent. A reading, composition, and discussion course concerned with elements of style and syntax, with emphasis on expository and argumentative writing by the students.
Offered Fall, Spring

SPA 306. Advanced Composition, Syntax and Stylistics II. (3 Units)

Prerequisite: SPA 280 or equivalent is required. A reading, composition and discussion course that focuses on expository writing and literary or linguistic analysis. Three hours of lecture per week.
Offered Fall, Spring

SPA 310. Romantic Love in the Western Tradition. (3 Units)

Students evaluate the construct of love using historical, aesthetic, and social perspectives, how it defines psychological patterns, develops styles in literature, is the center of some philosophical approaches, and is linked to values and ethical definitions in contemporary movements.
Offered Infrequent

SPA 311. Structure Of Spanish. (3 Units)

Prerequisite: SPA 280. An analysis of the sounds, formations, and routines of the language, focusing on global characteristics of Spanish that English speakers need to acquire. Selected language acquisition problems of English speakers featured.
Offered Fall

SPA 312. Hispanic Literature, Art and Culture. (3 Units)

Historical development and the cultural artistic production created by Hispanic authors and artists through an interdisciplinary perspective. Study of artwork, historical texts, music, and literature to expand by discussing the links of cultural production that develop in Latin America.
Offered Spring

SPA 313. Encountering the Other. (3 Units)

Analysis of major contemporary issues will be undertaken from a humanistic perspective about encountering the other in the Western tradition. Historical, literary, musical, philosophical, and art works will be introduced to develop critical thinking about how diverse groups interact.
Offered Spring even

SPA 318. Movements of Latin America. (3 Units)

This interdisciplinary and pluricultural course introduces students to the contemporary social and sociolinguistic movements of Latin America. It analyzes the indigenous movements for linguistic and cultural rights, and populist movements and other movements through their cultures, narratives, rhetoric, and discourse.
Offered Fall, Spring, Summer

SPA 330. Interpreting Hispanic Literature. (3 Units)

Prerequisite: SPA 305. Analysis and interpretation of representative Hispanic prose, poetry, and drama.
Offered Fall

SPA 340. Practical Spanish for Interpreters and Translators. (3 Units)

Intensive study of a single author, a literary movement, a literary genre, or a single literary work, or an issue/topic in linguistics. Repeatable with different topics for credit. Three hours of seminar per week.
Offered Spring

SPA 341. Advanced Conversation. (3 Units)

Prerequisite: SPA 221 or equivalent. Intensive conversation leading to fluency in the use of academic Spanish. The course aims to develop a comprehensive vocabulary which prepares the student for persuasive and oratory speeches, as well as for upper division linguistics and literature courses. Useful for public service and the bilingual/cross-cultural credential program.
Offered Fall, Spring

SPA 350. Contemporary Hispanic Culture: Spain. (3 Units)

Prerequisite: SPA 280 or equivalent, or concurrent enrollment. An area studies course focusing on patterns of culture in contemporary Spain .
Offered Spring

SPA 351. Contemporary Hispanic Culture: Spanish-Speaking America. (3 Units)

Prerequisite: SPA 280 or equivalent, or concurrent enrollment. A designated geographical area studies course focusing on patterns of culture in the Spanish-speaking world. Specific topics may vary from semester to semester. Norms, intergroup relations, institutions, language, and societal values of rural and urban people.
Offered Infrequent

SPA 353. Cinema of the Spanish-Speaking World. (3 Units)

Prerequisites: SPA 280 and SPA 305 are required. SPA 351 is recommended. This course is designed to introduce students to the cultures and societies of Spain and Latin America through the cinematic work of Spanish-speaking film productions.
Offered Fall

SPA 398S. Directed Research in Spanish. (1-3 Units)

Offered Infrequent

SPA 400. Teaching School Subject Matter in Spanish. (3 Units)

Prerequisite: Knowledge of Spanish or consent of instructor. Vocabulary and materials used in elementary or secondary schools for teaching reading, writing, mathematics, science, and social studies in Spanish. Aspects and problems of language acquisition and linguistic transitions made by English speakers acquiring Spanish proficiency. Required for credential candidates.
Offered Fall, Spring

SPA 414. Spanish Phonology. (3 Units)

Prerequisite: SPA 311. A beginning course in the segmental and suprasegmental phonetic systems: phonological pronunciation phenomena of standard and regional Spanish.
Offered Spring

SPA 430. Spanish Morphology. (3 Units)

In-depth introduction to selected topics of Morphology. Topics include inflection, derivation, and compounding, as well as the relation of morphology to phonology, syntax and the lexicon.
Offered Fall

SPA 435. A Sociolinguistic Approach to Chicano/Latino Dialect. (3 Units)

Identification of characteristic linguistic difficulties of Spanish-speaking children correlated to social-cultural background. Contrastive analyses of the linguistic competencies and performances for these children learning English. Repeatable course.
Offered Infrequent

SPA 440. Spanish Syntax. (3 Units)

Study of the formation and structure of phrases, clauses, and sentences in Spanish, informed by the Generative Syntax theoretical framework.
Offered Fall

SPA 450. History of the Spanish Language. (3 Units)

History of the development of the Spanish language from Vulgar Latin to the present.
Offered Fall

SPA 453. Literature Of Spain. (3 Units)

Prerequisites: SPA 330. Readings and analysis of Spanish literary works in all genres. Topic varies from semester to semester. Repeatable course.
Offered Fall

SPA 454. Cervantes: Don Quijote. (3 Units)

Prerequisite: SPA 330 or equivalent. Reading and analysis of the major work of Spanish literature.
Offered Spring

SPA 456. Literature of Spanish America. (3 Units)

Prerequisites: SPA 330. Readings and analysis of selected works of Spanish American literature. Course content may cover a single country or a literary movement or genre as represented in various Spanish American countries. Topic varies from semester to semester. Repeatable course.
Offered Fall, Spring

SPA 461. Lecturas Mexicanas y Chicanas. (3 Units)

Reading and analysis of Mexican and Chicano literary works in all genres. Specific genre and country will vary from semester to semester. Three hours of lecture per week.
Offered Spring

SPA 490. Seminar in Special Topics in Literature and Linguistics. (3 Units)

Prerequisite: SPA 305, SPA 306, SPA 311, SPA 330, SPA 340, SPA 350, SPA 351 are required. Intensive study of a single author, a literary movement, a literary genre, or a single literary work, or an issue/topic in linguistics. Repeatable with different topics for credit. Three hours of seminar per week.
Offered Spring

SPA 494. Independent Study. (3 Units)

Prerequisites: B average in Spanish; consent of instructor and department chair. Independent study of a literary or linguistic problem, an author, or a literary movement. Repeatable course.
Offered Fall, Spring

SPA 495. Special Topics in Spanish. (3 Units)

Prerequisites: Senior Standing and consent of the instructor. Intensive study of a topic in Spanish literature, linguistics or culture. May be repeated with a different topic for up to six units.
Offered Infrequent

SPA 498. Directed Research in Spanish. (1-3 Units)

Offered Infrequent, All terms

SPA 594S. Independent Study. (1-3 Units)

Prerequisites: Consent of department chair and faculty advisor. In consultation with a faculty member, the student will investigate, in detail, current scholarship in selected area(s) or will undertake a project involving original research or creative study. Repeatable course.
Offered Infrequent

SPA 595. Special Topics in Spanish. (3 Units)

Prerequisites: Two upper division courses in Spanish Literature, two upper division courses in Spanish Linguistics, or consent of the instructor. Intensive study of a topic of current interest to the disciplines of Spanish Literature and Spanish Linguistics. Topic and content will vary each term. New topics will be offered each term. Course may be repeated with different topic.
Offered Infrequent

SPA 597S. Directed Reading. (1-3 Units)

Prerequisites: Consent of department chair and faculty advisor. Extensive reading in selected areas under the guidance of a faculty member. Repeatable course.
Offered Infrequent

SPA 599S. Final Project. (3 Units)

Offered Infrequent

PRE-SERVICE TEACHER BILINGUAL AUTHORIZATION IN SPANISH, CERTIFICATE

Preliminary Credential Bilingual Authorization Applicants (Spanish)

Bilingual Authorization applicants must demonstrate language competencies in Spanish by **one** of the following methods:

1. Completion of SPA 280 Grammar for Spanish Composition and SPA 341 Advanced Conversation, with grade expectations adhering to the departmental policy (e.g., Liberal Studies, Teacher Education, Special Education).
2. Passing score on CSET: Subtest III. (See CSET Website: <http://www.ctcexams.nesinc.com> (<http://www.ctcexams.nesinc.com/>));

Bilingual applicants must demonstrate methods competencies through two courses: TED 439 and TED 440 (add course titles)

1. Multiple Subject candidates will enroll in the bilingual sections of TED 403 Elementary Reading/Language Arts I: K-3, TED 410 Elementary Mathematics Methods, TED 416 Elementary Science Methods, and TED 412 Teaching History-Social Studies and Content Area Literacy in the Elementary Classroom, when available.

Bilingual Authorization applicants must demonstrate bilingual/dual language practicum competencies for at least 20 hours in a clinical practice setting (i.e., TED 433/453 or during your university internship).

Bilingual Authorization Alternate Pathways

1. Masters in Education, Option: Dual Language Learning (31 units)
2. Certificate – Dual Language Learning (12 units)

Note: Bilingual Authorization applicants must demonstrate bilingual/dual language practicum competencies for at least 20 hours in a clinical practice setting

Classified Standing

Successful admission to the university with the following conditions:

- Candidates who satisfy all the requirements for university and program admission will be admitted with Classified Standing.
- Candidates accepted with Conditional Standing will have one semester to meet the conditions for Classified Standing

For details about the requirements for the Bilingual Authorization, visit the link below.

- Pre-Service Teacher Bilingual Authorization in Spanish, Certificate (p. 865)

Spanish Culture, Minor

Required courses and electives (12 units)

| Code | Title | Hours |
|--|---|-----------|
| Lower Division Required Course (3 units) | | |
| SPA 151 | Introduction to Spanish-Speaking Cultures | 3 |
| Upper Division Required Courses (6 units) | | |
| SPA 350 | Contemporary Culture of Spain | 3 |
| SPA 351 | Contemporary Culture of Spanish-Speaking America | 3 |
| Electives – Choose 1 of the following courses (3 units) | | |
| SPA 310 | Romantic Love in the Western Tradition | 3 |
| SPA 312 | Literature, Art and Culture of Spanish-Speaking Countries | 3 |
| SPA 318 | Movements of Latin America | 3 |
| SPA 353 | Cinema of the Spanish-Speaking World | 3 |
| SPA 435 | A Sociolinguistic Approach to Chicano/Latino Dialect | 3 |
| Total Hours | | 24 |

¹ Students without sufficient proficiency in Spanish will need to take beginning and/or intermediate Spanish courses prior to taking the courses for the minor, chosen with the guidance of an advisor.

Students choosing this minor may also complete the BA in Spanish in the Literature and Linguistics Option or the Spanish for the Professions Option. If they choose to do so, they may count SPA350 and SPA351 towards both this minor and the BA.

Spanish Grammar and Writing, Minor

Requirements

| Code | Title | Hours |
|-------------------------------|-----------------------------------|-------|
| Lower Division Courses | | |
| Prerequisite Courses: | | 0-12 |

| SPA 221 | Intermediate Spanish II ¹ | 0-3 |
| SPA 280 | Grammar for Spanish Composition ² | 3 |
| Upper Division Required Courses | | |
| SPA 341 | Advanced Conversation ² | 3 |
| SPA 351 | Contemporary Hispanic Culture: Spanish-Speaking America ² | 3 |
| SPA 435 | A Sociolinguistic Approach to Chicano/Latino Dialect ² | 3 |
| Total Hours | | 12-24 |

¹ Note: Students take beginning and intermediate Spanish courses as needed - those who have completed two, three or four years of high-school Spanish or any community college Spanish will be placed in the appropriate semester of college Spanish in consultation with a departmental advisor. Students may get credit for some of these courses through the Advanced Placement Examination in either Language or Literature, by challenging them (but never in descending order), and/or by transferring equivalent courses from other institutions.

² Must take a CSUDH.

Spanish, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Minor Requirements

While the department does not require a minor for graduation, it is strongly suggested that the student consider one in consultation with an advisor.

Major Requirements (39-51 units)

Common Core Requirements

| Code | Title | Hours |
|---|----------------------------------|-------|
| Lower Division Required Courses (0-3 units) ¹ | | |
| SPA 110 | Beginning Spanish I ¹ | 3 |

| | | |
|---------|--|---|
| SPA 111 | Beginning Spanish II ¹ | 3 |
| SPA 220 | Intermediate Spanish I ¹ | 3 |
| SPA 221 | Intermediate Spanish II ¹ | 3 |
| SPA 280 | Grammar for Spanish Composition ^{2,3} | 3 |

Upper Division Required Common Core Courses

| | | |
|---------|---|---|
| SPA 305 | Advanced Composition, Syntax and Stylistics I | 3 |
| SPA 306 | Advanced Composition, Syntax and Stylistics II | 3 |
| SPA 311 | Structure Of Spanish | 3 |
| SPA 330 | Interpreting Hispanic Literature | 3 |
| SPA 340 | Practical Spanish for Interpreters and Translators | 3 |
| SPA 350 | Contemporary Hispanic Culture: Spain | 3 |
| SPA 351 | Contemporary Hispanic Culture: Spanish-Speaking America | 3 |

Total Hours **36**

¹ Students take beginning and intermediate Spanish courses as needed; those who have completed two, three or four years of high-school Spanish or any community college Spanish will be placed in the appropriate semester of college Spanish in consultation with a departmental advisor. Students may get credit for some of these courses through the Advanced Placement Examination in either Language or Literature, by challenging them (but never in descending order), and/or by transferring equivalent courses from other institutions.

² The Modern Languages Department strongly recommends those students who need additional fluency in Spanish to travel to a Spanish-speaking country (under the guidance of an advisor) or to take SPA 230 Spanish Conversation before they take this course.

³ All Spanish majors must take this course at CSUDH.

Linguistics Option (39-51 units)

Recommended Additional Language

Those students who intend to pursue graduate work in Spanish literature or linguistics are also strongly encouraged to take a year of language other than English or Spanish. In addition to courses in Spanish, the Department of Modern Languages also currently offers courses in both French and Japanese.

- Students will read and write in Spanish at the beginning, intermediate and advanced levels.
- Students will understand Spanish language literatures and linguistics as they relate to Latin American, Spain and other Spanish-speaking countries.
- Students will interpret, analyze and evaluate textual and linguistic productions within their specific historical and sociocultural contexts.
- Students will utilize literary and linguistic research methodologies and skills in using traditional and electronic sources for both oral and written projects.
- Students will utilize and apply literary and linguistic theories in explaining linguistic and literary productions.
- Students of Spanish as a Second Language will achieve basic to intermediate proficiency levels in listening, speaking, reading, and writing

Spanish, Subject Matter Preparation

The Subject Matter Preparation Program in Spanish is designed for students interested in a career in teaching Spanish at the secondary school level. It satisfies the requirements set by the State Commission on Teacher Credentialing for demonstrating substantive preparation in the subject matter field of Spanish. Completion of an approved waiver program or passing The National Teachers Examination in the subject matter field fulfills one part of the requirements leading to the Single Subject Teaching Credential in Spanish. While the waiver in Spanish is not an academic major, credits earned toward a major in Spanish can be used to meet most of the requirements of the waiver program. Students interested in pursuing a teaching career at the secondary level should meet regularly with the designated departmental waiver program advisor.

¹ Students take beginning and intermediate Spanish courses as needed; those who have completed two, three or four years of high-school Spanish or any community college Spanish will be placed in the appropriate semester of college Spanish in consultation with a departmental advisor. Students may get credit for some of these courses through the Advanced Placement Examination in either Language or Literature, by challenging them (but never in descending order), and/or by transferring equivalent courses from other institutions.

² All Single Subject Students must take this course at CSUDH.

³ UNV 300 Early Field Experience is optional.

Special Education

College of Education
Division of Teacher Education

Special Education Program Description

The Special Education Program is designed to offer candidates both core and advanced specialization in the delivery of special education services from infancy to adulthood. The program meets the needs of college graduates who wish to pursue careers in special education. Candidates can obtain the following: Master of Arts degree in Special Education, Education Specialist Instruction Preliminary Credentials (Mild/Moderate Support Needs, Extensive Support Needs, and Early Childhood Special Education), Teacher Induction Program (Clear Credential), Early Childhood Special Education Added Authorization, and Assistive Technology Certificate. Credential, authorization, and certificate coursework combines theory, methods, and field experiences that enrich candidates teaching practices. Master degree level courses combine theory, field assignments, and a culminating experience that enhances candidates' professional expertise and specialized knowledge.

The following information is described in detail on the California Commission on Teacher Credentialing (CCTC) website at <https://www.ctc.ca.gov/credentials/assignment-resources/special-education-credentials> (<https://www.ctc.ca.gov/credentials/assignment-resources/special-education-credentials/>). The Education Specialist Instruction Credential authorizes the holder to conduct Educational Assessments related to the candidate's access to the academic core curriculum and progress towards meeting instructional academic goals, provide instruction, and Special Education Support to individuals in the area of specialization listed on the credential in the following settings:

- General education settings
- Resource rooms or services
- Special education settings
- Non-public, schools and agencies
- Home/hospital settings
- Correctional facilities

The Education Specialist Instruction Credentials require specific course work to meet teacher performance expectations and competencies established by the California Commission on Teacher Credentialing (CCTC). CSUDH Special Education programs are accredited by CCTC. The requirements of the Individuals with Disabilities Education Act (IDEA),

ESSA (2016), California Curriculum Framework and Standards, and California Reading Initiative also serve as underpinnings for instruction, field supervision, and evaluation.

Pre-Admission Disclosure for Academic Programs Leading to Licensure or Credentialing

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or taxpayer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements is available from the **College of Education Dean's Office: COE 1490 - (310) 243-3510**.

Master of Arts in Special Education

The MA program prepares candidates to assume advanced roles in the field of Special Education. Current research and evidence-based practices in the field of Special Education underpin the curriculum. The program consists of a core of advanced coursework, electives, and a culminating experience (project or thesis) that supports advanced study in the field of Special Education. There are 30 units of course work with a minimum of 19-semester units completed in residence. Candidates who apply to both the Master of Arts Degree and the Teacher Induction Program must adhere to the requirements for both programs (e.g., GPA and course grade requirements).

Preliminary Credentials

The Special Education Program offers the following Education Specialist Instruction Credentials:

- Mild/Moderate Support Needs (MMSN), authorizes the holder to conduct assessments specific to student progress in the core academic areas and to provide services to students who have Autism (Autism), Emotional Disturbance (ED), Intellectual Disability (ID), Multiple Disabilities (MD), Other Health Impairment (OHI), Orthopedic Impairment (OI), Specific Learning Disability (SLD) and Traumatic Brain Injury (TBI) and authorizes service in grades K-12 and classes organized primarily for adults through age 22.
- Extensive Support Needs (ESN), authorizes the holder to work with students who have Autism (Autism), Deaf-Blindness (DB), Emotional Disturbance (ED), Intellectual Disability (ID), Multiple Disabilities (MD), Other Health Impairment (OHI), Orthopedic Impairment (OI), Specific Learning Disability (SLD) and Traumatic Brain Injury (TBI) and authorizes service in grades K-12 and classes organized primarily for adults through age 22.
- Early Childhood Special Education (ECSE), authorizes the holder to work with children who have mild/moderate support needs and extensive support needs listed above and traumatic brain injury; and authorizes the provision of services to infants,

toddlers, and young children from birth to age 5 with stated disabilities and their families.

CSUDH offers two credential pathways: Intern and Student Teaching. Both programs consist of pre-service, general and special education coursework, robust field experiences, and a culminating experience.

Student Teaching is a traditional credential pathway that allows candidates to student teach in public school P-12 classrooms under the guidance of a Master Teacher while completing university coursework. The University works with the candidate to match the candidate with Master Teachers in schools we have formal agreements with.

The Intern pathway allows candidates to work in P-12 schools as teachers of record while they complete the needed university coursework to become fully credentialed teachers. The Special Education program has formal agreements with school districts, non-public schools (NPS), and charter schools where interns are employed.

Integrated Teacher Education Program (ITEP) Education Specialist Mild/Moderate Support Needs

The ITEP Program for the Education Specialist Mild/Moderate Support Needs Credential is an option within the undergraduate Liberal Studies major wherein students earn a BA degree in Liberal Studies while also earning an Education Specialist Credential-Mild/Moderate Support Needs (Student Teaching Option only). To meet all requirements for the ITEP program, students must also complete a depth of study in Educating Children with Disabilities and be accepted into the Special Education Credential Program. The total number of units for the BA and Credential is 135 units. Please see the Liberal Studies section of the catalog, as well as an advisor in the Liberal Studies Office for more information about the ITEP Option. **Note: Liberal Studies is not currently accepting students into the Integrated Teacher Education Program - Education Specialist Mild/Moderate Support Needs Program.**

Teacher Induction Program (Clear Credential)

The California Commission on Teacher Credentialing (CCTC) established a two-tier special education teaching credential structure. A five-year Preliminary Education Specialist Instruction Credential is the first document issued after an individual has met basic credential requirements. The Clear Credential is issued on completion of a CCTC approved Teacher Induction Program that focuses on the teacher's needs to expand and deepen knowledge, skills, and abilities targeted to the teacher's employment and career goals in their development as a special education teacher. An individual with special education preliminary teaching credentials completes the Clear Credential requirements through the development of an Individual Learning Plan (ILP) in the Teacher Induction Program. The ILP includes appropriate professional development and/or coursework designed to expand and apply the candidate's skills and knowledge based on the California Standards for the Teaching Profession. The ILP identifies the coursework, experiences, and/or tasks that must be completed and assessed while guiding the activities to support the growth and improvement of professional practice.

Admission Requirements

Below are the general program admissions requirements for entry into the Special Education programs followed by program specific requirements. Candidates may apply to the Preliminary or Teacher Induction Program, the MA, or the MA and Teacher Induction Program. Candidates must hold a Preliminary credential to enroll in the Induction Program.

Candidates who desire to enroll in the Teacher Induction Program and MA are advised to do so simultaneously. In addition to the admission requirements listed below, candidates are advised to follow the detailed requirements on the Special Education program application.

General Program Admission Requirements

1. Admission to the university.
2. Application (with resume) to specific credential and/or MA degree program.
3. A bachelor's degree from an accredited college or university; official transcripts of all college course history including degree posted.
4. Acceptable grade point average (GPA): Preliminary credential programs require a 2.75 GPA in the last 60 semester units of upper-division and the Teacher Induction Program and MA degree require a 3.0 GPA in the last 60 semester units of upper-division and post-baccalaureate work.
5. Two professional references from supervisory individuals acquainted with the applicant's professional work with children or adolescents and his/her ability to complete successfully a graduate-level program.

Master of Arts in Special Education Admission Requirements

In addition to the General Program Admission Requirements the following MA requirements must be met:

1. Valid initial and/or advanced Special Education credential (e.g., California Level I/II, Preliminary/Clear, or Life Special Education Teaching Credential; hold closely aligned certification or demonstration of content knowledge in the field; out of state or international candidates must have equivalent credentials, or demonstration of deep content knowledge).
2. Candidates who are applying to both the MA and Teacher Induction Program must do so simultaneously.
3. Successful admission to the university with the following conditions:
 - Candidates who satisfy all the requirements for university and program admission will be admitted fully with Classified Standing.
 - Candidates accepted with Conditional Standing will have one semester to meet the conditions for Classified Standing.
4. The Graduation Writing Assessment Requirement (GWAR) must also be met in order to advance to Classified status.
5. The Graduation Writing Assessment Requirement can be met on the CSU Dominguez Hills campus by one of the following:
 - A baccalaureate degree from an accredited college or university in the United States.
 - A baccalaureate degree from an accredited non-US institution where English is the primary language of instruction.

- Graduate students who earned a 4 or above on the analytical writing component of the Graduate Record Examinations (GRE) or the Graduate Management Admission Test (GMAT).
- Students from a baccalaureate program offered in non-English speaking university settings can qualify to enter a graduate program by meeting one of the following options: take the Test of English as a Foreign Language (TOEFL) and achieve a score of 550 (paper-based); 80 (internet-based); 213 (computer-based); or achieve an International English Language Testing System (IELTS) score of 6.5.

Preliminary Credentials Admission Requirements

In addition to the general program admission requirements, the following prerequisites are common to all Preliminary credential programs (Intern and Student Teaching Options):

1. Verification of Basic Skills Requirement (BSR may be met by a passing score on the CBEST, verification of coursework, or other qualifying exams). See options for meeting basic skills at <https://www.csudh.edu/coe/resources-links/meeting-the-basic-skills-requirement/>
2. Verification of Subject Matter through the CSET Exam or through a CTC-approved Subject Matter Program or coursework (for additional information please see Ways to Meet Subject Matter (csudh.edu) (<https://www.csudh.edu/coe/info-students/ways-to-meet-subject-matter/>) **Notes:** 1. Subject Matter is not required for the ECSE credential. 2. Subject Matter is required to enter Final Fieldwork in the Student Teaching Option. 3. Subject Matter is required to apply for an Intern Credential in both MMSN and ESN programs.
3. Verification of U.S. Constitution requirement through university coursework with a minimum grade of C or passage of the US Constitution Exam.
4. Valid Certificate of Clearance.
5. Tuberculosis test and vaccination verifications.

In addition to the general program admission requirements, the following are specific for the Intern Option only:

1. Verification of full-time employment in an appropriate teaching position in a public school district, non-public school (NPS), or charter school with CSUDH Memorandum of Understanding (Intern Agreement).
2. Successful completion of the three pre-service courses (SPE 480 Educating Exceptional Children and Youth; SPE 458 Positive Classroom Environments and SPE 462 Language, Literacy and Cognition) or the equivalent with a grade of "B-" or better for advancement to Intern status. Candidates who hold a Preliminary or Level I credential in another specialization or General Education may take the Pre-services classes in the first semester of their Internship.
3. Proof of advisement from Special Education Faculty or Advisor prior to applying for the Intern Credential.
4. Submission of Intern Credential Application **and** obtaining verification of the Intern Credential issued by CCTC.

Teacher Induction Program Admission Requirements

In addition to the general program admission requirements, the following are specific for the Teacher induction Program (Leading to a Clear Credential):

1. Initial credential (e.g., California Level I or Preliminary; out-of-state candidates must have equivalent credentials).
2. Verification of full-time employment in an appropriate teaching position in a public school district, non-public school (NPS), or charter school.
3. Agreement by the employer to provide a site-based mentor.
4. Certificate of Clearance.
5. Tuberculosis test and vaccination verification

Program Requirements

All programs require candidates to adhere to specific requirements throughout the length of the program. Foremost, candidates must adhere to all ethical and professional standards required by the university, professional organizations, and/or accrediting affiliations associated with the degree and credential. Candidates must, at all times, demonstrate high-quality interpersonal skills with faculty, staff, fellow candidates, and others. If candidates fail to meet this requirement, they are subject to disqualification from the program. The following are the requirements for the MA degree and credential programs.

Master of Arts in Special Education Program Requirements

1. A minimum GPA of "B" in all coursework. Candidates must maintain a "B" average in all coursework. No course grade lower than a "C" may be used toward the MA. However, for candidates who are simultaneously in the Clear and MA, no course grade lower than a "B-" may be used toward the Clear credential.
2. Continuous Enrollment. Candidates are required to maintain enrollment throughout their MA program. Candidates who have completed the maximum number of required units but have not completed their culminating activity (e.g., thesis or comprehensive examination) must enroll in SPE 600 Graduate Continuation Course every semester, not to exceed two semesters. As per University Policy graduate courses may only be take two times. In order to enroll in SPE 600 Graduate Continuation Course, candidates must submit an application form (available online) prior to enrollment (see University Policy on Continuous Attendance Requirement).
3. Transfer Credit. A maximum of 12 units of coursework from an accredited college or university; coursework must be no older than seven (7) years from the date of MA degree completion.
4. Time Limit on Coursework. Candidates must complete all of the requirements for the degree or credential within seven (7) years. This time limit commences with the semester of the earliest course used on the candidate's program of study. Outdated coursework must be validated or repeated (see University Policy on Outdated Coursework).
5. Capstone Requirement for the Master's Degree. Candidates have the option of completing an approved project or a thesis and are required to make this decision when applying for classified standing. Once candidates have advanced to candidacy, they may not change from one option to the other.
6. Candidates completing a thesis must enroll in SPE 599 Graduate Capstone in Special Education for a minimum of one semester. To

satisfy the continuous enrollment policy, students are expected to enroll in SPE 600 Graduate Continuation Course unless they are enrolled in other courses.

Preliminary Credentials Program Requirements

1. A minimum GPA. Candidates must maintain an overall "B" average in all Special Education coursework. No course grade lower than a "B-" may be used toward any credential. **Note:** TED courses in the Preliminary credential must have a grade of "C" or higher.
2. Field Experience. Candidates must have access to classrooms to complete field experience coursework.
3. Transfer Credit. A maximum of 9 units of coursework from an accredited college or university; coursework must be no older than seven (7) years from the date of credential completion.
4. Time Limit on Coursework. Candidates must complete all of the requirements for the degree or credential within seven (7) years. This time limit commences with the semester of the earliest course used on the candidate's program of study. Outdated coursework must be repeated and validated (see University Policy on Outdated Coursework).

Early Childhood Special Education Authorization

The Early Childhood Special Education Added Authorization (ECSE AA) is designed for credentialed Special Education teachers who are interested in teaching young children (birth to pre-kindergarten) with special needs. The ECSE AA allows the credential holder to conduct educational assessments and evaluate progress toward meeting the instructional goals of these children who are eligible for special education services across a continuum of service options.

Admission Requirements

1. Possession of a valid Level I, Preliminary, Level II, Clear, or Life Special Education Teaching Credential.
2. A 2.75-grade point average in the last 60 semester units of college work.
3. Three professional references from supervisory individuals acquainted with the applicant's work with children.

Preliminary Education Specialist: Early Childhood Special Education, Intern Option, Credential

Preliminary Credentials Admission Requirements

In addition to the general program admission requirements, the following prerequisites are common to all Preliminary credential programs (Intern and Student Teaching Options):

1. Verification of Basic Skills Requirement (BSR may be met by a passing score on the CBEST, verification of coursework, or other qualifying exams). See options for meeting basic skills at <https://www.csudh.edu/coe/resources-links/meeting-the-basic-skills-requirement/>
2. Verification of Subject Matter through the CSET Exam or through a CTC-approved Subject Matter Program or coursework (for additional information please see Ways to Meet Subject Matter ([csudh.edu](https://www.csudh.edu/coe/info-students/ways-to-meet-subject-matter/)) (<https://www.csudh.edu/coe/info-students/ways-to-meet-subject-matter/>) **Notes:** 1. Subject Matter is not required for the ECSE credential. 2. Subject Matter is required to enter Final Fieldwork in the Student Teaching Option. 3. Subject Matter is required to apply for an Intern Credential in both MMSN and ESN programs.
3. Verification of U.S. Constitution requirement through university coursework with a minimum grade of C or passage of the US Constitution Exam.
4. Valid Certificate of Clearance.
5. Tuberculosis test and vaccination verifications.

In addition to the general program admission requirements, the following are specific for the Intern Option only:

1. Verification of full-time employment in an appropriate teaching position in a public school district, non-public school (NPS), or charter school with CSUDH Memorandum of Understanding (Intern Agreement).
2. Successful completion of the three pre-service courses (SPE 480 Educating Exceptional Children and Youth; SPE 458 Positive Classroom Environments and SPE 462 Language, Literacy and Cognition) or the equivalent with a grade of "B-" or better for advancement to Intern status. Candidates who hold a Preliminary or Level I credential in another specialization or General Education may take the Pre-services classes in the first semester of their Internship.
3. Proof of advisement from Special Education Faculty or Advisor prior to applying for the Intern Credential.
4. Submission of Intern Credential Application and obtaining verification of the Intern Credential issued by CCTC.

Preliminary Credentials Program Requirements

1. A minimum GPA. Candidates must maintain an overall "B" average in all Special Education coursework. No course grade lower than a "B-" may be used toward any credential. **Note:** TED courses in the Preliminary credential must have a grade of "C" or higher.

4. Time Limit on Coursework. Candidates must complete all of the requirements for the degree or credential within seven (7) years. This time limit commences with the semester of the earliest course used on the candidate's program of study. Outdated coursework must be repeated and validated (see University Policy on Outdated Coursework).

| Code | Title | Hours |
|---|---|-----------|
| A. Required Courses | | |
| SPE 403 | Reading and Language Arts Instruction for K-12 Students with Disabilities ² | 3 |
| SPE 405 | Collaboration with Families and School Personnel | 3 |
| SPE 451 | Biomedical Information and Technological Interventions with Children with Disabilities | 3 |
| SPE 458 | Positive Classroom Environments | 3 |
| SPE 461 | Typical and Atypical development and Assessment Issues in Special and General Education | 3 |

| SPE 581 | Collaborative Planning, Implementing Evaluating Educational Programs for Students with Disabilities | 3 |
| SPE 582 | Current Trends and Issues in Special Education | 3 |
| SPE 583 | Education Law and Policy: Serving Students with Disabilities | 3 |
| SPE 584 | Research I: Evidenced Based Inquiry and Practice | 3 |
| SPE 585 | Research II: Evidenced Based Inquiry and Practice | 3 |

Electives

Candidates should select Electives from their Preliminary credential category as follows:

Early Childhood Special Education:

| | | |
|---------|--|--|
| SPE 405 | Collaboration with Families and School Personnel | |
| SPE 454 | Curriculum and Instruction in Early Childhood Special Education | |
| SPE 458 | Positive Classroom Environments | |
| SPE 467 | Assessment in Special Education | |
| SPE 552 | Communicative and Collaborative Partnerships with Families and Professionals | |
| SPE 522 | Teaching Bilingual Learning in Inclusive Dual Settings | |
| CUR 520 | Seminar in Ethnic Studies in Education | |

Mild/Moderate Support Needs:

| | | |
|---------|--|--|
| SPE 405 | Collaboration with Families and School Personnel | |
| SPE 458 | Positive Classroom Environments | |
| SPE 467 | Assessment in Special Education | |
| SPE 468 | Curriculum and Instruction Mild Moderate Support Needs: STEAM | |
| SPE 522 | Teaching Bilingual Learning in Inclusive Dual Settings | |
| SPE 552 | Communicative and Collaborative Partnerships with Families and Professionals | |
| SPE 553 | Assessment in Early Childhood Special Education and Moderate-Severe Disabilities | |
| CUR 520 | Seminar in Ethnic Studies in Education | |

Extensive Support Needs:

| | | |
|---------|--|--|
| SPE 405 | Collaboration with Families and School Personnel | |
| SPE 458 | Positive Classroom Environments | |
| SPE 465 | Instructional Strategies Extensive Support Needs | |
| SPE 467 | Assessment in Special Education | |
| SPE 522 | Teaching Bilingual Learning in Inclusive Dual Settings | |
| SPE 552 | Communicative and Collaborative Partnerships with Families and Professionals | |

Total Hours **30**

Early Childhood Special Education Credential: Intern Option (53 units)

B. Field Experience Requirements

The following course requires candidates to submit an application in the semester prior to enrolling in the course:

| | | |
|---------|--|---|
| SPE 566 | Directed Teaching of Individuals with Moderate/Severe Disabilities | 6 |
|---------|--|---|

Total Hours 56

Program Learning Outcomes

1. Demonstrate an in-depth, advanced knowledge base that reflects the current theories and best practices within special education at a graduate level.
2. Demonstrate advanced writing skills reflective of styles predominant in special education at a graduate level, i.e., APA.
3. Demonstrate an ability to express advanced ideas orally at a graduate level.
4. Engage in research, scholarly, or creative activity within their discipline or make meaningful contributions to their field/organization at a graduate level.
5. Demonstrate responsible ethical, legal, and professional conduct related to special education in all facets of their education and professional lives.

Teacher Induction Program (Clear Credential)

The California Commission on Teacher Credentialing (CCTC) established a two-tier teaching credential structure. A five-year preliminary credential is the first document issued after an individual has met basic credential requirements. The CSUDH College of Education Teacher Induction Program is designed for Multiple Subject, Single Subject, and/or Education Specialist teachers with CA Preliminary Credentials who seek a Commission-approved Induction program that will support and advance their professional knowledge, skills and abilities, beyond what was necessary for the preliminary credential, through the lens of the *California Standards for the Teaching Profession*. The Teacher Induction Program in the College of Education leads to a Clear Credential.

The CSUDH Teacher Induction program utilizes a unique hybrid mentoring approach: candidates receive mentoring support from their professor-mentor and their site-mentor. Both mentors meet individually and regularly with their candidates on “just in time issues” of teaching

practice, as well as the development, implementation, and reflection on the candidate’s Individual Learning Plan (ILP).

Two Year Program

Candidates may enter the Induction program in Fall or Spring semester. For the first, second and third semesters, candidates enroll in EDU 470 (Individual Learning Plan Development). For the last semester in the program, candidates enroll in EDU 474 (Individual Learning Plan Completion). Note that EDU 470 is a repeatable course. Candidates must complete each class with a passing grade of B or better to maintain good standing in the program.

Early Completion Option Track

An Early Completion Option (ECO) is a one year, two semester option, available to those candidates who are Experienced and Exceptional while teaching in their credentialed area. An experienced candidate is defined as having two or more years of teaching experience, while holding an intern or preliminary credential, as the teacher of record, prior to entering the Induction program. An Exceptional candidate is verified by providing a letter of recommendation from the candidate’s current principal, as well as maintaining a B or better grade in the Induction class. Candidates may apply for ECO at the end of their first semester in the program. Candidates must maintain a grade of B or better to remain in the Early Completion Option Track.

Teacher Induction Program Admission Requirements

In addition to the general program admission requirements, the following are specific for the Teacher Induction Program (leading to a Clear Credential):

1. Valid initial credential (e.g., California Level I or Preliminary; out-of-state candidates must have equivalent credentials).
2. Verification of full-time employment in an appropriate teaching position in a public school district, non-public school (NPS), or charter school.
3. Agreement by the employer to provide a site-based mentor.
4. Certificate of Clearance.
5. Tuberculosis test and vaccination verification.

| EDU 474 | Individual Learning Plan Completion | 3 |

Special Major

Office: WH D-440, (310) 234-3308

General Description

Students who have academic or professional goals that are not easily met by one of the regular degree programs at CSU Dominguez Hills may find that the undergraduate Special Majors program or Graduate Interdisciplinary Studies/Special Major is more suitable to their unique needs and interests. Through these programs, students will integrate studies from two (or more) departments or colleges, either concentrating on each equally or choosing one department or option as the primary emphasis with the other(s) as secondary.

Both undergraduate Special Major and Graduate Interdisciplinary Studies/Special Major programs are intended to be focused, pre-planned progressions toward well-defined objectives. A Special Major or Minor student will need an appropriate advisory committee chosen from the departments involved. The program of study for either the undergraduate Special Major/Minor or the Graduate Interdisciplinary Studies Major must be chosen from the represented departments and must be supportable by:

1. courses already offered in the regular degree programs; and
2. the expertise of members of CSU Dominguez Hills permanent faculty.

Restrictions

There are some restrictions with regard to the Special Major/Minor. Specific restrictions are described under each program; general restrictions include the following:

Undergraduate Special Major

This major is not to be used to:

- substitute for a recognized undergraduate major offered by the University.
- bypass normal graduation requirements.
- serve as an alternative to a program in which the student is in academic difficulty.

Graduate Interdisciplinary Studies/Special Major

This graduate option cannot be granted if the student's objective(s) can be met by regular programs offered by other colleges or universities in the Los Angeles area, nor can it be used in place of degree requirements or graduate degree programs already offered on campus.

A student working toward the Graduate Interdisciplinary Studies/Special Major is subject to the University's policies and must complete all academic requirements prescribed by the University.

Features

For selected students, the Special Major Programs provide an opportunity to pursue an individualized course of study in order to attain a Bachelor of Arts/Science or a Master of Arts/Science Degree. Thus, such a program would enable students to cut across regular academic areas to develop an integrated major, minor or graduate option tailored to their own educational and career goals.

Each Special Major (or Minor) or Graduate IDS has a specially appointed faculty Advisory Committee. This committee works with and gives special attention to the student. With careful planning, most programs of study can be completed by attending evening and/or daytime classes.

Programs at both the bachelor's and master's level provide students with three unique features:

- the ability to create an educationally sound and intellectually rich program of study that answers the student's own particular needs, including career needs;
- a course of study that draws upon the diverse curriculum of the University yet focuses on study areas of particular interest;
- the opportunity to work closely with a selected group of faculty advisors.

Academic Advisement

Undergraduate

Undergraduate students who wish to pursue a Special Major or Minor should contact the Office of Academic Programs at (310) 243-3308 for more information.

Graduate

The Office of Graduate Studies will assist the Graduate Interdisciplinary Studies major. Students interested in pursuing this program should phone (310) 243-3693 for an appointment.

Undergraduate Special Major/Minor

Preparation

Since students must prepare a proposal in consultation with a faculty advisor and obtain approval from that advisor, and members of the Advisory Committee, before taking the courses comprising the major/minor, it is imperative that they do the necessary planning and paperwork as early as possible. Students should complete all lower division General Education requirements before beginning Special Major or Minor coursework.

Procedures for Declaring an Undergraduate Special Major or Minor

To initiate a Special Major or Minor, contact an appropriate faculty advisor directly. In consultation with this advisor, prepare a proposal for either the undergraduate Special Major or Minor Program.

The proposal must include:

1. a written statement giving reasons for undertaking the Special Major or Minor in terms of academic and professional goals and explaining
 - a. why these goals cannot be met through the standard programs of the campus and
 - b. how they may be best pursued in a special program;
2. The proposal is then forwarded to Graduate Studies for approval. The student is not enrolled as a Special Major or Minor until this formal procedure is complete.

Graduation with Honors

An undergraduate student may be a candidate for graduation with honors in Special Major provided he or she meets the following criteria:

1. A minimum of 36 units in residence at CSU Dominguez Hills;
2. A minimum grade point average of at least 3.5 in all courses used to satisfy the upper division requirements in the major.

Major Requirements - B.A./B.S. (minimum 24 units)

Special Major Guidelines

1. Students must formally request admission to a Special Major Program following the procedures described above for declaring a Special Major or Minor.
2. Students may not use a Special Major to substitute for a recognized degree program not offered at CSU Dominguez Hills, e.g. Psychobiology.
3. The Special Major may not be used to bypass normal graduation requirements.

- Students may not substitute the Special Major for a major in which they are having academic difficulty.
- A student working toward the Special Major is subject to university-wide policy relative to admission, scholastic standards and graduation requirements.
- In order to be admitted to the Special Major Program, students are required to have more than one full year of academic work still to be completed to meet minimum degree requirements. That is, students will not be admitted to the undergraduate Special Major unless they have 31 or more semester units to complete out of a total of 120 semester units.
- The minimum requirement for the Special Major Degree is a program of at least 24 semester units of upper division work recommended by a student's major advisor.
- Students cannot use the following types of courses to meet the minimum degree requirements for the undergraduate Special Major:
 - neither upper division or lower division courses used to meet General Education requirements,
 - nor professional educational courses,
 - nor graduate courses (500 level).
- Students may not also pursue a Special Minor.

Minor Requirements (15 units)

- Students must follow the formal procedures for declaring a Special Major or Minor.
- Students may not pursue a Special Minor if they also have a Special Major.
- A Special Minor must contain at least 15 upper division semester units, at least 10 of which must be taken after the proposal is approved.
- Students cannot use the following types of courses to meet the minimum requirements for the Special Minor:
 - neither upper division or lower division courses used to meet General Education requirements,
 - nor professional educational courses.

Major Requirements - M.A./M.S.

Admission Requirements

To be admitted into the Interdisciplinary Studies/Special Major graduate program the student must:

- possess a baccalaureate degree from an accredited college, with a grade point average of 3.0 or better in the last 60 semester units attempted (not including lower division or extension units);
- submit two letters of recommendation from individuals who can evaluate the student's potential for graduate school;
- schedule an interview with the Coordinator of the Graduate Special Major Program;
- submit, along with the formal application to the program, 150-200 word, typed Statement of Purpose which describes the academic qualifications and educational goals of the applicant, and explains how the Special Major will support those goals;
- be able to demonstrate the eligibility to take proposed graduate level courses;
- complete the GRE General Test and score at least 4 on the GRE Analytical Writing Test;
- demonstrate above average writing skills;

Degree Requirements

The Advisory Committee, which consists of at least three faculty members including the coordinator of the Graduate Special Major, helps the student prepare a program of study. The program of study must:

- be in support of the student's major objectives as specified in the accepted program; (If a bachelor's degree and/or background does not adequately prepare the student for the proposed program, he/she may be required to take additional prerequisite coursework before admission to the program.)
- include a minimum of 30 upper division and graduate level semester approved units;
- include a minimum of 21 semester units of 500 level courses;
- include no lower division courses;
- include no undergraduate courses in lieu of comparable graduate level courses;
- include no more than 18 units from any one department;
- make provision for a capstone activity (thesis or project); satisfactory completion of this requirement will be determined and certified by the Advisory Committee and the Associate Vice President of Academic Programs;
- include no more than three thesis units; descriptions of the Capstone Activity courses, signed by the faculty advisor must be attached to the program-of-study;
- include no more than nine units of work completed prior to approval of this program;¹
- include no more than six units of independent study type courses; descriptions of these courses, signed by the faculty advisor must be attached to the program-of-study;¹
- be approved by the Associate Vice President of Academic Programs, the faculty committee and the chair of the departments involved;
- meet all university requirements for the master's degree. Students should consult the section of the catalog entitled "Graduate Degrees and Postbaccalaureate Studies (<https://catalog.csudh.edu/general-information/graduate-degree-postbaccalaureate-studies/>)."

¹ Any units in excess of the maximum cannot be counted in the required 30 units.

The student's transcript will read: Master of Arts/Master of Science in Interdisciplinary Studies in the focus or theme of study in three words or less; the use of the name of an academic unit must first be approved by the unit and the Associate Vice President of Academic Programs.

Students wishing to alter their program after it has been approved must repeat the same review process: they need to secure the approval of their Advisory Committee, the approval of the appropriate graduate coordinator(s), and the Associate Vice President of Academic Programs, prior to any change.

Program Learning Outcomes

-

Bachelor of Arts and Sciences Special Major Learning Outcomes

- Ability to construct and complete an interdisciplinary curriculum that is cohesive and meets the idiosyncratic needs of a unique focus of study.

2. Ability to apply the methods, theories and protocols of research in the work products of the various courses selected for the program.
3. Ability to think critically and to express oneself clearly and thoughtfully in the work products of the various courses selected for the program.
4. Ability to apply an interdisciplinary focus of two or more disciplines to the work product of the various courses selected for the program.

Systems Engineering

College of Natural and Behavioral Sciences
Department of Physics

Program Description

The MSSE program at CSUDH provides students with the latest, cutting-edge skills and design methods for the realization and management of the complex, interdependent systems required to develop and maintain today's products and systems in rapidly changing environments. These include Model-Based Systems Engineering, Systems Architecting, System-of-Systems Engineering, and Complex and Resilient Systems. The curriculum balances theory with practical projects and case studies, enabling students to understand and implement applicable models to enhance and complement systems engineering activities throughout a project's life cycle.

The CSUDH MSSE program draws upon case studies, methodologies, and tools from several engineering industries, providing experienced professionals as well as those new to the field with exposure to real-world systems engineering case studies. Students access contextualized case studies within their industries and complete their degree with a culminating project that prepares them for complex, real-life projects.

Students will learn how to apply systems engineering knowledge and techniques to problems from the automotive, commercial aviation, defense, electronic communications, and space industries. They will learn the importance of implementing Model-Based Systems Engineering in the development of complex, interdependent systems that may be comprised of a combination of legacy and new components.

Features

The MSSE program was established in response to regional and national workforce needs. Systems engineers possess analytical skills required to support a broad range of job functions: from the development of systems that facilitate split-second trading on Wall Street to the integration of satellite surveillance systems that support the collection, analysis, and fusion of heterogeneous multimedia sources.

The MSSE program is a Practitioner's program. Assignments are based on case studies and conventional exams are not administered in most courses. Instead, students propose solutions to Engineering Design Challenges (EDCs). An Engineering Design Challenge requires a student to apply theoretical concepts to a problem characterized by specific technical, fiscal, and operational constraints. Depending upon the complexity of the EDC, students will be allowed 3-10 days to develop a solution. The product of each EDC becomes part of the student's graduate project portfolio.

Students in many degree programs may not begin to develop their projects/theses until the end of their curriculum. The MSSE curriculum employs a model that allows students to develop their projects incrementally. Each semester students enroll in a 1-unit course entitled Systems Engineering Project Phase (I, II, III, and IV). The product of each

of these courses corresponds to a chapter in the final project report. This approach facilitates the organic development of the project because each project component builds upon work completed during the previous term.

Admission Requirements

The admission requirements for the MSSE Degree Program are as follows:

- A **Bachelor's degree** from a fully accredited institution.
- Coursework in computer programming, calculus, probability & statistics, as well as a capstone experience related to engineering design fundamentals.
- **Good standing** at the last institution attended.
- A **grade point average (GPA) of at least 2.5** on the last degree completed or at least 2.5 in the last 60 semester (90 quarter) units attempted.

Depending on the type of the undergraduate course completed, the applicant may be admitted with either a **classified or conditional admission status**.

Classified Admission: In order to be admitted with a classified status, the applicant must meet all program admission requirements.

Conditional Admission: Applicants who have not completed coursework in computer programming, calculus, probability & statistics, as well as a capstone experience related to engineering design fundamentals, may be considered for conditional admissions. Those applicants may have fulfill additional requirements before they attain a classified status. These additional requirements will be determined by evaluating the applicant's transcripts and work-related experience. The student must also earn a minimum grade of B or better in all courses attempted during the first year, (3 terms) of conditionally classified admission.

Graduate applicants, regardless of citizenship, who do not possess a bachelor's degree from a postsecondary institution where English is the principal language of instruction or who have not attended schools at the secondary level or above for at least three years full-time where English is the principal language of instruction must present one of the following:

- A minimum score of 80 on the internet-based TOEFL exam (iBT),
- A minimum score of 213 on the computer-based TOEFL exam
- A score of 6.5 or higher on the IELTS Academic Test, or
- A score of 53 or higher on the Pearson Test of English (PTE) Academic

Graduate applicants who have met all admission requirements except English Proficiency may apply for conditional admission through the CSUDH American Language and Culture Program (ALCP). Once they have improved their English skills and pass TOEFL/IELTS OR qualify for an ALCP English Proficiency Waiver, they can start their degree program.

Admission Procedures

The following materials are required for admission review by the submission deadline: **Please note that the cut-off date for admission to the Fall Term is June 1. Applications are not accepted for the Spring or Summer Terms.**

Please note: **do not be confused by the Admissions Office dates; the dates they state apply for on-campus courses only.** Internet Terms are not the same as the on-campus terms. The applicant must have been accepted to the university before the first class meeting in order to be

considered a graduate student in the MSSE program rather than an open enrollment student or an Extended Education student. Students accepted after the first class meeting will not be able to enroll in courses, and their acceptance will be revoked for non-attendance by the Admissions Office. At this point, you will need to re-apply with a new application for the next term.

Academic Advising

Students will be advised once each semester, prior to registration. Students develop their capstone projects incrementally, beginning in their first term. Student research progress will be reviewed during each academic advising session.

Departments, Professional Organizations, and Co-curricular Activities

The CSUDH Science Society, Society of Physics Students and Sigma Pi Sigma (National Physics Honor Society) cooperate in offering lectures, social programs and field trips to promote student participation in and enjoyment of the sciences. These activities are enriching and greatly enhance our students' growth within our community of scholars. In addition, faculty are often willing to sponsor inexpensive student memberships in national physics organizations that publish ongoing research in various areas of physics and engineering. The department sponsors a colloquium series with talks a few times each semester on various topics in physics and engineering.

Career Possibilities

Systems Engineering has been implemented in nearly every field, including:

- Aerospace
- Automotive Design and Manufacturing
- Biotechnology
- Counter-Terrorism
- Critical Infrastructure
- Cyber Security
- Defense
- Environmental/Green Engineering
- Healthcare
- Homeland Security
- Manufacturing
- Next Generation Farming
- Oil and Gas
- Power and Energy Systems
- Quality Assurance
- Safety/Security Engineering
- Social Network Systems Architecture
- Space Systems
- Telecommunications
- Transportation

Graduate Programs

Master

- Systems Engineering, Master of Science (p. 851)

Faculty

John Price, Department Chair
 Antonia Boadi, Ximena Cid, Horace Crogman, James (Jim) Hill, Maryam Maleki, Miguel Rodriguez

Department Office: NSM B-202, (310) 243-3591

Full-Time Staff

To Dang, Technician
 Angela Johnson, Administrative Support Coordinator

Emeritus Faculty Courses

Michael Durand, Kenneth Ganezer, H. Keith Lee, Samuel L. Wiley

Courses

SEE 500. The Practice of Systems Engineering. (3 Units)

The course provides an overview Systems Engineering professional competencies. Content and case studies present Systems Engineering as a multi-faceted discipline that draws upon human, organizational and technical resources to define, develop and deploy systems.

SEE 510. Introduction to Systems Engineering I. (3 Units)

Co-requisite: SEE 501 required. Systems engineering processes, principles and tools used during a project's life cycle. Risk assessment that addresses technical, schedule, cost, and performance risks. Role of engineering sub-disciplines in the fulfillment of mission requirements. Risk and reliability in complex systems. A-B/NC grading.
 Offered Fall

SEE 515. Introduction to System Engineering II. (3 Units)

Course covers processes, principles and tools utilized throughout a system's life cycle. Topics include the role of requirements engineering, risk management, supportability and logistics in the development of complex systems.

SEE 520. Analytics in Systems Engineering. (3 Units)

Prerequisites: SEE 500, MAT 131 or MAT 321 or an introductory course in statistics and probability; CSC 121 or an introductory programming course. Statistical methods used in data analytics with a focus on decision making in engineering applications.
 Offered Fall

SEE 530. Quantitative Methods in Systems Engineering. (3 Units)

Prerequisite: MAT 131 or MAT 132 or an introductory course in probability and statistics and SEE 510. Probability and statistics for engineering project cost estimates, system risk assessments, life cycle models and management plans.
 Offered Spring

SEE 540. Economic Factors in Systems Engineering. (3 Units)

Co-requisite: SEE 510 required. Principles of engineering economics; impact of economic factors for systems engineers, tools for understanding and analyzing these factors, fundamental quantitative analysis of cash flow, system life-cost estimating; parametric cost models.
 Offered Fall

SEE 550. Modeling and Simulation. (3 Units)

Prerequisite: SEE 530 required. Application of computer simulation to engineering (sub)systems; systems structure, system analysis, model construction, data collection, and computer simulations tools.
 Offered Summer

SEE 560. Model Based Systems Engineering. (3 Units)

Prerequisite: SEE 530, SEE 540, SEE 550. Co-requisite: SEE 550 required. Application of model curation, model repositories and model integration in MBSE; distinction between engineering models and model-based systems engineering is emphasized. Offered Summer

SEE 570. Complex Systems Architecture. (3 Units)

Prerequisite: SEE 515 required. Holistic approach to the process of architecting systems in various engineering disciplines. Architectural as they relate to adaptive, complex and resilient systems. Offered Spring

SEE 580. System-of-Systems Engineering. (3 Units)

Prerequisite: SEE 550, SEE 560, SEE 570 required. Critical issues associated with the integration of systems and/or systems-of-systems. Offered Fall

SEE 590. Master's Project. (3 Units)

Prerequisite: SEE 504, SEE 505 (may be taken concurrently) and consent of graduate advisor. Co-requisite: SEE 585 required. Individual research on a systems engineering topic under the direction of graduate faculty. Repeatable course. Offered Spring

SEE 600. Graduate Continuation Course. (1 Units)

Prerequisite: Signature of graduate program coordinator required. Graduate students, who have completed their course work but not their thesis, project, or comprehensive examination, or who have other requirements remaining for the completion for their degree, may attain continuous enrollment by enrolling in this course.

Systems Engineering, Master of Science

Requirements

Core Curriculum (34 units)

| Code | Title | Hours |
|--------------------|---|-----------|
| SEE 500 | The Practice of Systems Engineering | 3 |
| SEE 510 | Introduction to Systems Engineering | 3 |
| SEE 515 | Introduction to Systems Engineering II | 3 |
| SEE 520 | Analytics in Systems Engineering | 3 |
| SEE 530 | Quantitative Methods in Systems Engineering | 3 |
| SEE 540 | Economic Factors in Systems Engineering | 3 |
| SEE 550 | Modeling and Simulation | 3 |
| SEE 560 | Model Based Systems Engineering | 3 |
| SEE 570 | Complex Systems Architecture | 3 |
| SEE 580 | System-of-Systems Engineering | 3 |
| SEE 590 | Master's Project | 3 |
| Total Hours | | 33 |

Graduates of the Systems Engineering program will:

- Apply the appropriate mathematical, science and engineering techniques to systems engineering problems.
- Identify the proper application of Systems Engineering processes, tools and methodologies to interdisciplinary problems.
- Generate, collect and articulate user needs and requirements for complex systems.

- Define the role of Systems Engineering processes and tools in each phase of a system's life cycle: from inception through retirement.
- Compare and contrast the impact of engineering solutions and design alternatives in the context of acquisition, environmental, ethical, fiscal, operational, schedule and technological constraints.
- Describe how to plan and manage complex systems engineering projects.
- Outline professional and ethical responsibility in engineering efforts.
- Compare and contrast system and component-level alternatives using appropriate system analysis tools.
- Articulate technically complex ideas and concepts in oral as well as in written format.

Teacher Education

College of Education
Division of Teacher Education

Pre-Admission Disclosure for Academic Programs Leading to Licensure or Credentialing

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or taxpayer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements is available from the **College of Education Dean's Office: COE 1490 - (310) 243-3510**.

Preliminary Credential Programs

The Preliminary Multiple Subjects Credential authorizes its holder to teach in a self-contained classroom, usually grades kindergarten through six. The Single Subject Preliminary Credential authorizes its holder to teach in departmental classes, usually in the middle or high school.

Both the Multiple and Single Subject programs fulfill the California state requirements for English Language Authorization and, for qualified applicants, the Bilingual Authorization in Spanish. Certification in other authorized languages is available by examination through CCTC.

Both Multiple Subjects and Single Subject programs offer a traditional student teaching option as well as a university intern option. Candidates enrolled in the University Intern Option are contracted teachers (without a preliminary credential) currently teaching K-12 students and are supervised for fieldwork in their own classroom by trained university supervisors and site-based coaches who provide support and guidance. Candidates enrolled in the Student Teaching Option are not contracted teachers and are assigned to master teachers in a public school setting for their supervised field experiences. In addition, student teachers receive support and guidance from a university supervisor (in some cases, the master teacher also serves as a university field supervisor).

Each program option is organized into phases, university semesters, that include courses and field experiences. The program sequence allows candidates to complete their coursework and exit requirements in one year if the candidate begins the program during the summer when summer is offered.

Coursework and field experiences effectively prepare candidates to teach K-12 students and understand the contemporary conditions of schooling. Because the majority of teacher candidates enrolled in the TED credential program are or will be, teaching in urban schools with multicultural and multilingual students, the program's coursework and field experiences are designed to prepare candidates to effectively meet the needs of those students. Courses are designed to address issues of second language learners and diverse styles of learning. The program provides extensive opportunities for candidates to learn to teach the content of the California K-12 academic content standards, to use state-adopted instructional materials, assess student progress, and apply these understandings in teaching K-12 students.

Through the carefully sequenced courses and field experiences, candidates develop a series of pedagogical competencies represented by the Teaching Performance Expectations (TPEs). Within each phase of the program, courses are designated to address specific TPEs that must be applied and practiced during each field experience. The TPEs are assessed throughout the program using fair, valid, and reliable methods and measures. There are ongoing formative assessments, embedded signature assignments, and a summative assessment, the California Teaching Performance Assessment (CalTPA).

CSU Dominguez Hills' credential programs are accredited by the California Commission on Teacher Credentialing (CCTC, 1900 Capitol Street, Sacramento, CA, 95814.)

Note: Students who wish to teach in TK classrooms need 24 units in early childhood education.

Master of Art in Education Program

The MA program prepares candidates to assume advanced roles in the field of education. The coursework provides broad conceptions of curriculum theories and design, development, and instruction supported by evidence-based best practices through critical and justice-oriented frameworks. Students develop and engage in real-time intervention studies to demonstrate critical thinking and research writing skills. The program consists of a core of advanced coursework, electives, and a culminating experience (thesis or comprehensive exam) that supports advanced study in the field of education. There are 30 units of course work with a minimum of 21-semester units completed in residence. The MA program in Education offers two different options: 1) Option in Curriculum and Instruction; 2) Option in Dual Language Learning.

Curriculum and Instruction Option

The MA in Education Curriculum and Instruction Option is designed for individuals committed to justice and equity in education. We engage cutting edge interdisciplinary research, critical educational theories, and practical applications across all PK-12 content areas. Develop expertise in curriculum design and instructional practices to examine school systems through frameworks related to: power and resistance, intersectionality, critical pedagogies, educational justice, and critical literacies.

Dual Language Learning Option

The MA in Education Dual Language Learning Option focuses on bilingualism and biliteracy in Spanish in school and societal contexts. The program is designed to prepare teacher leaders to examine and refine their own pedagogy and instruction and to promote social justice through an inquiry approach in Spanish. Providing instruction in two languages, this approach develops students' competencies in bilingualism, biliteracy, and biculturalism/multiculturalism. Students who complete this option can earn their Bilingual Authorization.

Transitional Kindergarten Option

The MA in Education Transitional Kindergarten Option prepares candidates for specialized roles in the field of teaching young children. The Division is currently not accepting students into the MA in Education: Transitional Kindergarten Option. For more information, please contact the Division of Teacher Education (310) 243-3496.

Liberal Studies Students (Undergraduate Students)

Qualified undergraduate students may start a preliminary credential program, student teaching option during their senior year. They must apply and meet the admissions criteria and complete the required documentation. They must consult with their undergraduate subject matter advisor and teacher education advisor and attend a College of Education Information Meeting.

Liberal Studies students at CSUDH with catalog rights starting in Fall 2016 complete all of the prerequisite classes as part of the major and apply to the program upon graduation.

Features

The location of the University allows an ongoing, intensive interaction with a wide variety of local school districts, providing an excellent opportunity for working with a diverse population. Graduates of basic credential programs and the Masters of Arts in Education are in high demand by principals and superintendents who have come to respect the quality of the programs and the competence of their graduates. Teaching methods classes reflect the most up-to-date and effective approaches to instruction. The program is designed to meet the needs of individuals seeking only a preliminary credential, as well as full-time working professionals seeking a master's degree. Most courses are offered in the late afternoon and evening.

Academic Advisement

Students will work with an advisor when they are admitted to the Teacher Education Division for a specific program (master's degree, credential, or certificate). Students who are uncertain about which program best meets their professional goals may meet with the department chairperson or faculty advisor to discuss the range of options.

The student must confer with the advisor each semester prior to registration to ensure that the student is taking the appropriate course work in the proper sequence.

Scholarships

The College of Education is committed to preparing teachers, counselors, and school leaders. In the College of Education, we understand that training to become an educator often requires a full-time course load as well as a significant fieldwork commitment. There are a number of

financial aid options, including loans, grants, and scholarships available to make it more affordable for aspiring teachers and educators to focus on completing their training. Please visit the COE website (<https://www.csudh.edu/coe/>) for information on student scholarships.

Preparation for Credential Programs

Multiple Subjects (Elementary)

Students planning to teach children in a self-contained classroom usually in grades transitional kindergarten through six will need to earn a Multiple Subjects Credential. Students planning to earn a Multiple Subject Credential must meet subject matter by passing the California Subject Examination for Teachers (CSET): Multiple Subject Examinations or by completing an Elementary Subject Matter Program. For undergraduate students, it is recommended that students planning to pursue a Multiple Subjects Credential complete course requirements for the Liberal Studies major, which is a CTC-approved Elementary Subject Matter Program.

Single Subject (Middle and High School)

Students planning to teach in departmentalized classes, usually at the middle or senior high school levels, will need to earn a Single Subject Credential. Students planning to earn a Single Subject Credential must meet subject matter by passing the appropriate California Subject Examination for Teachers (CSET): Single Subject Examination for their subject matter area or by completing an approved Subject Matter Preparation Program in their area. Undergraduate students should contact the appropriate department in order to seek program advising regarding completing course requirements for one of the Subject Matter Preparation Programs offered on campus. Subject Matter Preparation Programs offered at CSUDH are: English, Chemistry, Mathematics, Music, Kinesiology, Spanish, Biology, and History/Social Studies. Please see separate entries in the University Catalog for contact information to these departments.

Before admission to all credential programs, students are required to meet the Basic Skills requirement either with a passing score on California Basic Educational Skills Test (CBEST) or by an alternative method (see [https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-\(cl-667\)](https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)) ([https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-\(cl-667\)/](https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/))).

The CSU prepares teachers for positions in California as well as other states. It is in the students' best interest to be knowledgeable about credential or licensure requirements of the state in which they intend to teach.

Application and Admission Requirements

Multiple and Single Subject Credential Program (Student Teaching) Admission Requirements

Follow program advisement procedures. Refer to the Teacher Education link on the College of Education website, www.csudh.edu/coe/ (<http://www.csudh.edu/coe/>) (<http://www.csudh.edu/coe/>) (<http://www.csudh.edu/coe/>) (<http://www.csudh.edu/coe/>) for the most current information.

1. University admission.
2. Application to specific credential program.
3. Official transcripts of all college course history (one copy for University Admissions and one copy for Program Admissions to be uploaded online).

4. For post-baccalaureate students, a degree from a regionally accredited college or university is required and should be posted on transcripts.
5. Evidence of meeting the basic skills requirement (CBEST or see CTC website for other ways to meet basic skills).
6. A 2.67 cumulative undergraduate grade point average or 2.75 in the last 60 attempted undergraduate semester units.
7. Evidence of meeting the U.S. Constitution requirement.
8. Fingerprint Clearance Requirement: Either a valid Certificate of Clearance, valid California Teaching Credential, or a current Substitute Teaching Permit.
9. Evidence of subject matter competency (CSET, approved program, by major, or through coursework).
10. Current negative tuberculosis test or chest x-ray.
11. Two recommendations from individuals familiar with the applicant's work and character (to be completed before Phase II – candidate provide emails of recommenders on Phase II application).
12. Valid CPR card (Adult, Child, Infant). Online CPR certification is not acceptable.
13. Interview program plan signed by a TED Advisor. ITEP students should see an LBS advisor.

Note: CSUDH undergraduate students may start a preliminary credential program, student teaching track before graduation but must apply to the program and meet the other requirements. A baccalaureate degree is required to apply for a California Teaching Credential. Liberal Studies students, please see an LBS advisor. Other undergraduate students should see a TED Advisor.

University Intern (Multiple and Single Subject) Admission Requirements

In addition to the multiple and single subject credential program admission requirements the following requirements are common for all Preliminary Credential Intern Option Candidates:

- Valid CPR (Adult, Child, and Infant). Online CPR certification is not acceptable.
- Completion of pre-service courses TED 400 Introduction to Education, TED 414 Cultural Ecology in the Classroom, and TED 507 Language Learning: Theory and Practice.
- A one-year employment contract from a public school.
- A letter from school district personnel indicating that the applicant has been screened and interviewed by human resource professionals.
- Basic knowledge of technology and its appropriate use in various educational settings.
- Evidence that the candidate has successfully completed the district's 40-hour training program prior to assuming a full-time classroom teaching assignment.
- Complete Intern Credential Request application online: https://csudh.qualtrics.com/jfe/form/SV_ebQetgE2KE9a766 (https://csudh.qualtrics.com/jfe/form/SV_ebQetgE2KE9a766/)

Master of Arts in Education Admission Requirements

1. Admission to the university.
2. Application to the specific MA degree program; Candidates who are applying to both the MA and Preliminary Credential must do so simultaneously and meet all Preliminary Credential requirements.
3. Baccalaureate degree from a regionally accredited college or university.
4. Official transcripts of all college course history with degree posted; (one copy for University Admissions and one copy for Program Admissions to be uploaded online).
5. A minimum of 2.75-grade point average (GPA) in the last 60 units attempted or a Miller's Analogies Test (MAT) score of 40 or above.
6. Two letters of recommendation from individuals who can evaluate the applicant's potential for graduate study (student will provide the email of the recommenders and they will be contacted by email).
7. Statement of Purpose: 2-4 pages double-spaced stating purpose, relevant experience, qualities/aspirations; connection to justice and equity in our mission; and any relevant additional information for evaluating your preparation and aptitude for graduate study at CSUDH.

Curriculum and Instruction Option

- Statement of Purpose: 2-4 pages double-spaced stating purpose, relevant experience, qualities/aspirations; connection to justice and equity in our mission, and any relevant additional information for evaluating your preparation and aptitude for graduate study at CSUDH.

Dual Language Learning Option

- Statement of Purpose: 2 pages written in Spanish.
- Demonstration of bilingual proficiency or six (6) college semester units of Spanish or verified equivalent.

Preliminary Credential Bilingual Authorization Applicants (Spanish)

Bilingual Authorization applicants must demonstrate language competencies in Spanish by **one** of the following methods:

1. Completion of SPA 280 Grammar for Spanish Composition and SPA 341 Advanced Conversation, with grade expectations adhering to the departmental policy (e.g., Liberal Studies, Teacher Education, Special Education).
2. Passing score on CSET: Subtest III. (See CSET Website: <http://www.ctcexams.nesinc.com> (<http://www.ctcexams.nesinc.com/>));

Bilingual applicants must demonstrate methods competencies through two courses: TED 439 Heritage Language Learner Pedagogies with Plurilingual TK-12 Students and TED 440 Critical Biliteracy with Plurilingual Communities.

1. Multiple Subject candidates will enroll in the bilingual sections of TED 403 Elementary Reading/Language Arts I: K-3, TED 410 Elementary Mathematics Methods, TED 416 Elementary Science Methods, and TED 412 Teaching History-Social Studies and Content Area Literacy in the Elementary Classroom, when available.

Bilingual Authorization applicants must demonstrate bilingual/dual language practicum competencies for at least 20 hours in a clinical practice setting (i.e., TED 433/453 or during your university internship).

Bilingual Authorization Alternate Pathways

1. Masters in Education, Option: Dual Language Learning (30 units)
2. Certificate – Dual Language Learning (12 units)

Note: Bilingual Authorization applicants must demonstrate bilingual/dual language practicum competencies for at least 20 hours in a clinical practice setting

Classified Standing

Successful admission to the university with the following conditions:

- Candidates who satisfy all the requirements for university and program admission will be admitted with Classified Standing.
- Candidates accepted with Conditional Standing will have one semester to meet the conditions for Classified Standing

Certificates

- Dual Language Learning, Certificate (p. 860)
- Pre-Service Teacher Bilingual Authorization in Spanish, Certificate (p. 865)
- Transitional Kindergarten, Certificate (p. 868)

Credentials

- Multiple Subject Preliminary: Student Teaching Option, Credential (p. 864)
- Multiple Subject Preliminary: University Intern Option, Credential (p. 864)
- Preliminary Education Specialist: Early Childhood Special Education, Intern Option, Credential (p. 839)
- Preliminary Education Specialist: Early Childhood Special Education, Student Teaching Option, Credential (p. 840)
- Preliminary Education Specialist: Extensive Support Needs, Intern Option, Credential (p. 841)
- Preliminary Education Specialist: Extensive Support Needs, Student Teaching Option, Credential (p. 842)
- Preliminary Education Specialist: Mild to Moderate Support Needs, Intern Option, Credential (p. 842)
- Preliminary Education Specialist: Mild to Moderate Support Needs, Student Teaching Option, Credential (p. 843)
- Single Subject Preliminary: Student Teaching Option, Credential (p. 866)
- Single Subject Preliminary: University Intern Option, Credential (p. 866)

Graduate Programs

Master

- Education, Master of Arts (p. 861)

Faculty

Jarod Kawasaki, Chair of Teacher Education

Nallely Arteaga, Gwen Brockman, Stephanie Cariaga, Heather Clark, Edward Curammeng, Glenn DeVoogd, Kamal Hamdan, Jarod Kawasaki, Irene Osioma, Pablo Ramirez, Elexia Reyes McGovern, Kirk Rogers Jr., Jeffrey Sapp, Minhye Son

Marica Reed, Multiple Subjects Clinical Coordinator

Debbie Evers Allen, Single Subject Clinical Coordinator & Intern Coordinator

Devin Beasley, CalTPA Coordinator

Department Office: COE 1410, (310) 243-3496

Emeriti Faculty

Jill Aguilar, Ingeborg Assmann, Joseph Braun, John A. Brownell, James Cantor, Joel Colbert, Lenora Cook, John Davis, Peter D. Ellis, Suzanne Gemmell (in memoriam), Richard Gordon, Dru Ann Gutierrez, Diane Hembacher, Susan Johnston, Mimi Kalland-Warshaw, Shirley Lal, Ruth Larson, Nada Mach, Cynthia McDermott-LaCorte, John McGowan, Deandrea Nelson, Priscilla Porter, R.H. Ringis, Lilia Sarmiento, Kathleen Taira, Kim Trimble, Diana Wolff

Courses

Curriculum & Instruction (CUR)

CUR 510. Process of Curriculum Development. (3 Units)

Prerequisite: TED 505 or GED 501 is required. Designed to review contemporary developments in curriculum theory and practice through a framework centered in Critical Theory and Social Justice Education. Will include experience in the development of units of instruction and the evaluation of published curriculum materials.
Offered Fall, Spring

CUR 513. Literature for Child & Adolesc. (3 Units)

Principles of instructional and curricular theory as they apply to the teaching of literature in preschool and grades K-12. Analysis of literary devices and sequential development of ability to analyze and appreciate good literature. Emphasizes development of critical and analytic skills in diverse school environments.
Offered Infrequent

CUR 514. Trauma and Healing Informed Pedagogy. (3 Units)

Prerequisite: CUR 510 is recommended. Designed to review contemporary developments in the theory and practice of trauma and healing-informed pedagogies. Includes research, reflection, and innovative design of curriculum and/or school policies to address adverse childhood experiences in diverse school environments.
Offered Fall even

CUR 515. Seminar in Curriculum Development in Reading and the Language Arts. (3 Units)

Review of current developments in curriculum theory and practice for Reading and the Language Arts. Includes development of instructional units and use of evaluation criteria for published materials. Three hours of seminar per week.
Offered Fall

CUR 516. Sem Curr Dev Science Math. (3 Units)

Review of current developments in curriculum theory and practices for science and math. Includes development of instructional units and use of evaluation criteria for published materials. Three hours of seminar per week.
Offered Spring

CUR 517. Sem Curr Dev Hum Soc Sci. (3 Units)

Review of current development in curriculum theory and practice for the humanities and social sciences. Includes development of instructional units and use of evaluation criteria for published materials. Three hours of seminar per week.
Offered Infrequent

CUR 518. Research for the Teacher Scholar. (3 Units)

Development of conceptual and practical understanding of designing and conducting research and evaluation for education research in a classroom and education settings. Topics include critical qualitative and quantitative research, action research, research design, and research proposal writing.
Offered Fall, Spring

CUR 519. Adv Stud in Curric Practices. (3 Units)

Prerequisite: CUR 510. Intensive study and evaluation of research in selected curriculum areas. Emphasizing designing and implementing innovative curricular and related instructional improvements. Requires student to demonstrate effective instructional leadership and problem solving skills in multiethnic school environments. May be repeated up to six units.
Offered Fall, Spring, Summer

CUR 520. Seminar in Ethnic Studies in Education. (3 Units)

Prerequisite: CUR 510 is recommended. Designed to review contemporary developments in the curriculum theory and instructional practices through an interdisciplinary lens at the nexus between the fields of Ethnic Studies and Education. Seminar will provide a comparative analysis of issues of pedagogy and curriculum and the development of tools to support educators praxis.
Offered Spring odd

CUR 521. Seminar in Critical Race Praxis in Education. (3 Units)

Prerequisite: CUR 510 is recommended. Designed to review contemporary developments in the curriculum theory and instructional practices through an analytical framework called Critical Race Theory in Education. Seminar will provide an overview of critical race theory as it developed in the field of education and will include research, reflection, and practical applications through curricular and pedagogical development.
Offered Fall even

CUR 555. Intro to National Board Prep. (3 Units)

This course specifically targets candidates applying for certification by the National Board for Professional Teaching Standards. These standards will be utilized throughout the course in establishing what accomplished teachers should know and be able to do. Students will develop clear and convincing evidence that Standards are being employed in their own practice.
Offered Infrequent

CUR 556. Advan Prep for National Board. (3 Units)

Prerequisite: CUR 555 with grade of A or B. This course specifically provides ongoing, advanced preparation for candidates applying for certification by the National Board for Professional Teaching Standards. Students complete portfolio entries based on rigorous standards published by the Board, including videos, action research and documentation of effective and reflective practice. Students should be preparing to take National Board exam during semester in which they take CUR 556.
Offered Infrequent

CUR 595. Special Topics in Curriculum & Instruction. (1-3 Units)

An examination of a specific topic and/or subject area of the critical study of education, curriculum, and instruction, language and learning. Offered Fall, Spring

Dual Language Learning (DLL)**DLL 520. Foundations of Critical (Bi) Literacy in Dual Language & Immersion Education. (3 Units)**

Explores critical approaches to (bi)literacy instruction in dual language classrooms with attention to literacy learning experiences of LatinX students in U.S. PreK-12 schools. Students will develop a research study to disentangle the sociocultural aspects of literacy learning. Course taught in Spanish. Offered Fall

DLL 521. Contrastive Linguistics and Assessment for Dual Language Educators. (3 Units)

Focuses on the contrastive analysis of the structures of the Spanish and English languages through the disciplines of Phonology, Morphology, Semantics and Syntax to address issues related to (1) dialectal variation in Spanish and English and (2) linguistic and educational assessments of levels of language acquisition of Spanish and English. Offered Fall

DLL 523. Academic Discourse and Socio-Emotional Learning. (3 Units)

Course is designed to prepare teachers to think deeply and critically as to how content is taught using academic/professional Spanish as instructors in dual language programs in elementary and secondary schools. The course will also examine issues and interventions related to the social-emotional growth and development of children and youth and encourage reflection on school and community practices. Course taught in Spanish. Offered Spring

DLL 524. Emergent Learning for Young Dual Language Learners. (3 Units)

To foster leadership skills in elementary bilingual teachers in dual language instruction, research-based practices in dual immersion programs, curriculum design, culturally responsive instructional practice and assessment appropriate for young children. Course taught in Spanish. Offered Spring

DLL 525. Practices and Strategies for Bi-Literacy Development in Bilingual/Dual Settings. (3 Units)

Course is designed to prepare teachers to be leaders in the field of curriculum design and professional development in dual language instruction in elementary and secondary schools. The focus of the course is on the best practices that develop bi-literacy. Participants will plan and develop curricula both in Spanish and/or sheltered English based on the principles of dual language. Course taught in Spanish. Offered Spring

Teacher Education (TED)**TED 400. Introduction to Education. (3 Units)**

Prerequisite: Admission to Teacher Education. Includes 30 hours of early field experience in K-12 classrooms. Topics include California Teacher Performance Expectations, state content standards, lesson planning / teaching / reflection, and professional, legal and ethical responsibilities of teachers. Computer applications used to complete course tasks. Offered Fall, Spring

TED 402. Educational Psychology. (3 Units)

Prerequisite: Admission to Teacher Education. Psychology of learning and motivation related to instruction; emphasis on application of learning principles to classroom learning situations, including multicultural settings. Survey of applicable research from educational psychology and psychology. Mainstreaming students with special needs. Offered Fall, Spring

TED 403. Elementary Reading/Language Arts I: K-3. (3 Units)

Prerequisite: Admission to Multiple Subject Program. A balanced approach to teaching reading/language arts grades K through 3. Focus on the foundational skills and strategies needed in the developmental phase of learning to read. Addresses research-based knowledge and instructional practices aligned with the California Reading/Language Arts Framework. Offered Fall, Spring, All terms

TED 404. Elem. Reading/Language Arts II: (3 Units)

Prerequisite: TED 403. A balanced, integrative and interactive perspective to teaching reading/language arts grades 4 through 8. Focus on skills and strategies needed in reading and learning for life. Addresses research-based knowledge and instructional practices aligned with the California Reading/Language Arts Framework. Offered Fall, Spring, All terms

TED 405. Mainstreaming Children With Special Needs. (3 Units)

A course to facilitate the integration of handicapped children into the regular classroom. Covers legal responsibilities, diagnostic/prescriptive teaching, problem solving and visits to special education facilities. Offered As needed

TED 406. Teaching Secondary Reading. (3 Units)

Prerequisite: Admission to Single Subject Program. Procedures, materials for teaching content related reading/writing. Includes use of multicultural literature, instructional technology, interpretation of research in reading comprehension; reading/writing for language diverse populations, classroom based diagnostic tools, cross curricular reading/writing strategies. Microteaching or field experience. Offered Fall, Spring

TED 407. Languages in Praxis. (3 Units)

Prerequisite: LBS 302 is required. Co-requisites: LBS 400 or LBS 405 required. Restricted to LBS majors. Focus on linguistic, social, and cultural factors in schooling language minority students; how factors considered for effective learning practices. Areas of concentration include primary language development, second language acquisition, evaluation, current research. Offered Fall, Spring

TED 408. Elementary Art and Music Methods. (2 Units)

Prerequisite: Admission to Multiple Subject Program. Multicultural methods, materials and strategies for elementary art and music including instructional planning, lesson design and use of appropriate media materials and resources that are culturally and linguistically diverse. Offered Fall, Spring

TED 410. Elementary Mathematics Methods. (3 Units)

Prerequisite: Admission to Multiple Subject Program. Methods and materials for elementary math education. Includes instructional planning, unit development, selection and preparation of curriculum materials, assessment procedures, problem-solving strategies and sheltered mathematics instruction. Offered Fall, Spring, All terms

TED 411. Classroom Management Methods. (2 Units)

Prerequisite: Admission to Teacher Education. Focus on culturally and linguistically sensitive discipline strategies, management and effective teaching of techniques identified by recent research. A minimum of 15 hours field application required.
Offered Fall, Spring

TED 412. Teaching History-Social Studies and Content Area Literacy in the Elementary Classroom. (4 Units)

Prerequisite: Admission to Phase 2 Multiple Subject Program; TED 403 is required. An inquiry-based approach to teaching elementary social studies integrated with reading/language arts, aligned with Common Core standards and California Subject Matter Frameworks. Candidates learn strategies to develop social studies content, concepts, and analysis skills, and expository and narrative literacy skills.
Offered Fall, Spring, All terms

TED 413. Elementary Physical Education, Visual and Performing Arts Methods. (3 Units)

Methods, materials and strategies for visual and performing arts, physical education, and health, in multiple subject classroom settings; including instructional planning, lesson design and use of appropriate media materials and resources that are culturally and linguistically diverse.
Offered All terms, Fall, Spring

TED 414. Cultural Ecology in the Classroom. (3 Units)

Co-requisites: TED 400, TED 402 and TED 407 are recommended. Integrates knowledge of cultural ecologies from the home, school and community. The course of study includes creating learning environments that reflect diversity, positive interactions between students and teacher, culturally responsive classroom management, multiple perspectives as well as a foundational approach to classroom rules, routines, procedures and norms.
Offered Fall, Spring

TED 415. Multicultural Ed in Urban Cont. (3 Units)

Prerequisite: Admission to Teacher Education. Analysis and application of the concepts of cultural diversity with emphasis on current issues in education in an urban context. Prepares teachers for multicultural environments and utilization of appropriate materials and methods for culturally, ethnically, and language diverse students.
Offered Fall, Spring

TED 416. Elementary Science Methods. (3 Units)

Prerequisite: Admission to Phase 2 of Multiple Subject Credential Program. Methods and materials for project-based elementary science education. Emphasizes inquiry-based instruction and includes instructional planning, multi-day lesson development, selection and preparation of curriculum materials, assessment procedures, problem-solving strategies, sheltered science and language instruction and health.
Offered Fall, Spring

TED 417. Seminar In Adult Education. (1 Units)

Prerequisites: Concurrent enrollment in TED 423 is required; TED 418, TED 419 and TED 421. Addresses beginning adult education intern needs for working in ethnically, culturally and language diverse adult school settings. It emphasizes problem solving and discussion of competency checklists used in intern fieldwork. One hour of seminar per week.
Offered As needed

TED 418. Methods and Materials of Adult Education, Part I. (2 Units)

Course covers instructional techniques; evaluation of student achievement and the learning process in adult education.
Offered As needed

TED 419. Methods and Materials of Adult Education, Part II. (2 Units)

Prerequisite: TED 418. Covers instructional techniques, instructional technology, strategies to address the needs of diverse learners and resources in the Adult Education community. Emphasis will be placed on three specific groups: ESL students, older adults and exceptional adults.
Offered As needed

TED 420. Computer Literacy for Teachers. (1 Units)

Prerequisite: Admission to Teacher Education. Focuses on computer basics, terminology, operation and care of computer-related hardware, trouble-shooting techniques, legal and ethical issues, copyright issues, and interacting with others using email and threaded discussion. Credit/no credit grading.
Offered Fall, Spring

TED 421. Principles Of Adult Education. (2 Units)

Course is designed to meet the requirements for the Designated Subject Credential. Topics include scope and function of adult education, knowledge of cultural differences in students and communities, curriculum, media and community relationships.
Offered As needed

TED 423. Super Fld Exper. Adult Ed. (2 Units)

Prerequisites: TED 421 and TED 422 are recommended. Course is designed to give student practical experiences in teaching adults. Includes participation in classroom, school and communities, and individualized assignments to fulfill the particular needs of each credential applicant. Evaluation of field experience in scheduled seminars. Credit/no credit grading.
Offered As needed

TED 424. Counseling and Guidance for Teachers of Adult Education. (2 Units)

Topics will cover counseling techniques to meet special needs of adult students and interpersonal relations/communication skills.
Offered As needed

TED 425. Workshop In Teaching Methods. (1-3 Units)

Study of various approaches, methods, and materials related to a selected area of the curriculum. Development of applications at elementary and/or secondary level. Two to six hours of activity per week.
Offered As needed, All terms

TED 426. Foundations of Education. (6 Units)

Co-requisite: TED 427 and TED 428 are required. Introduction to the TTT online teacher education program and the teaching profession, with a focus on foundations of education. Topics include the history of education, classroom management, language development for English learners and standard English learners, and students with special needs.
Offered All terms, Fall, Spring

TED 427. Content Pedagogy I. (6 Units)

Co-requisites: TED 426 and TED 428 are required. Focuses on lesson planning, standards and objectives, assessment, literacy development, problem-based learning in math and science, online resources, and application of principles of effective instruction in real-world contexts.
Offered All terms, Fall, Spring

TED 428. Early Field Observation and Participation. (3 Units)

Co-requisites: TED 426 and TED 427 are required. Consists of a minimum of 40 hours of observation and participation. Candidates will draw on content and strategies from TED 426 and TED 427 in planing lessons for their early field experience. CR/NC grading.
Offered All terms, Fall, Spring

TED 429. Supporting All Students. (6 Units)

Prerequisites: TED 426, TED 427 and TED 428 are required. Co-requisites: TED 430 and TED 431 are required. Focuses on developing strategies for supporting every learner, including those with disabilities and special needs. Explores the student Study Team. Addresses school health issues. Offered Fall, Spring

TED 430. Content Pedagogy 2. (6 Units)

Prerequisites: TED 426, TED 427 and TED 428 are required. Co-requisites: TED 429 and TED 431 are required. Focuses on universal access, inductive and deductive teaching strategies, and models of teaching. Compares Direct Instruction with Problem-Based Learning. Offered Fall, Spring

TED 431. Lab School Fieldwork Seminar. (3 Units)

Prerequisites: TED 426, TED 427, and TED 428 are required. Co-requisites: TED 429 and TED 430 are required. Consists of a minimum of 40 hours of observation and participation, plus the completion of specific tasks that develop the candidates' capacity to plan, instruct, assess and reflect in their content area. CR/NC grading. Offered Fall, Spring

TED 432. Interdisciplinary Teaching. (6 Units)

Prerequisites: TED 429, TED 430, and TED 431 are required. Co-requisites: TED 438 and TED 465 are required. Focuses on culture and ways in which teachers broaden their understanding of what students bring to their educational experience so as to build upon it for student success. Expands on concept of Project-Based Learning. Offered Fall, Spring

TED 433. Teaching Practices Seminar. (3 Units)

Prerequisite: Admission to Phase Two. Student teaching candidates observe and participate in a Multiple Subject classroom with an experienced teacher, accompanied by reflective seminar. Credit/no credit grading. Offered Fall, Spring

TED 434. Student Teach: Elem I. (3 Units)

Prerequisite: TED 400 and TED 411. Student teaching with a master teacher at an urban multilingual/multicultural public elementary school. Done in conjunction with methods coursework. Focuses on Teacher Performance Expectations 1 through 13. Credit/no credit grading. Offered Fall, Spring

TED 435. Elementary Student Teaching. (12 Units)

Prerequisite: TED 433. Consists of one semester of supervised classroom practice with a master teacher at an urban multilingual/multicultural public elementary school. Done in conjunction with methods coursework. Focuses on Teacher Performance Expectations 1 through 14. Credit/no credit grading. Offered Fall, Spring

TED 436. Seminar: Elementary Student Teachers. (1 Units)

Problem solving and use of competency checklists in student teaching at the elementary level. Credit/no credit grading. One hour of seminar per week. Offered As needed

TED 437. Elem Stu Teaching (integrated). (9 Units)

Prerequisite: TED 433. Consists of one semester of supervised classroom practice with a master teacher at an urban multilingual/multicultural public elementary school. Done in conjunction with methods coursework. Focuses on Teacher Performance Expectations 1 through 13. Credit/no credit grading. Offered Fall, Spring

TED 438. Teaching Event and Assessment. (3 Units)

Prerequisites TED 429, TED 430, and TED 431 are required. Corequisites: TED 432 and TED 465 are required. Candidates complete the Teaching Event, the required summative, assessment, by demonstrating competency in all Teacher Performance Expectations. Candidates focus on student learning, select a learning segment, submit teaching artifacts and analysis, and assess the teaching event. CR/NC grading. Offered Fall, Spring

TED 439. Heritage Language Learner Pedagogies with Plurilingual TK-12 Students. (3 Units)

This course explores native and heritage language learning pedagogies in dual language classrooms with attention to TK-12 Latinx student experiences. Students engage in transformative curricular design with an emphasis on translanguaging. Course taught in Spanish. Offered Fall, Spring

TED 440. Critical Biliteracy with Plurilingual Communities. (3 Units)

This course explores asset based critical biliteracy pedagogies in multilingual TK-12 school communities. Students engage in collective curricular design process with an emphasis on developing critical biliteracy across content areas with students and families. Course taught in Spanish. Offered Fall, Spring

TED 445. Fieldwork: Elementary Interns. (6 Units)

Prerequisite: Admission to Fieldwork. Consists of two semesters of supervised classroom practice. Credit/no credit grading. Offered Fall, Spring

TED 446. Introduction to Internship: Multiple Subject University Intern. (1 Units)

Prerequisite: Admission to Fieldwork. Introduction to Critical Friends Inquiry Groups for elementary University Interns. Focus on reflective teacher inquiry, cognitive coaching, peer review and self-assessment. A-B/no credit grading. Offered Infrequent, All terms

TED 447. Intern Performance Assessment: Multiple Subject. (4 Units)

Prerequisite: TED 404. Assessment Seminar. Critical reflection on intern performance and student achievement correlated with the 13 Teacher Performance Expectations. Offered As needed

TED 448. Teaching Event: Multiple Subject. (2 Units)

Prerequisite: Admission to Phase Two. Candidates complete the Teaching Event, the required summative assessment, by demonstrating competency in all Teacher Performance Expectations. Candidates focus on student learning, select a learning segment, submit teaching artifacts and analysis, and assess the teaching event. Credit/no credit grading. Offered Fall, Spring

TED 453. Teaching Practices Seminar. (3 Units)

Prerequisite: Admission to Phase Two. Student teaching candidates observe and participate in a single subject classroom with an experienced teacher accompanied by reflective seminar. Credit/no credit grading. Offered Fall, Spring

TED 454. Student Teaching Secondary I. (3 Units)

Prerequisite: TED 400 and TED 411. Student teaching with a master teacher at an urban multilingual/multicultural public secondary school. Done in conjunction with methods coursework. Focuses on Teacher Performance Expectations 1 through 13. Credit/no credit grading. Offered As needed

TED 455. Student Teaching: Secondary. (12 Units)

Prerequisite: TED 453. Consists of one semester of supervised classroom practice with a master teacher at an urban multilingual/multicultural public secondary school. Done in conjunction with methods coursework. Focuses on Teacher Performance Expectations 1 through 13. Credit/no credit grading.
Offered As needed

TED 456. Seminar: Secondary Student Teachers. (1 Units)

Problem solving and discussion of competency check lists used in student teaching in multilingual, multiethnic, and multicultural secondary settings. CR/NC grading.
Offered As needed

TED 457. Student Teaching:Secondary II. (9 Units)

Prerequisite: TED 454. Consists of one semester of supervised classroom practice with a master teacher at an urban multilingual/multicultural public elementary school. Done in conjunction with methods coursework. Focuses on Teacher Performance Expectations 1 through 13. Credit/no credit grading.
Offered As needed

TED 460. Creating a Supportive Healthy Environment for Secondary Student Learning. (1 Units)

Prerequisite: Admission to Single Subject Program. Single Subject credential candidates learn how to create a supportive healthy environment for secondary student learning.
Offered Fall, Spring

TED 465. Fieldwork: Secondary Interns. (6 Units)

Prerequisite: Admission to Fieldwork. Consists of two semesters of supervised classroom practice. Credit/no credit grading.
Offered Fall, Spring

TED 466. Introduction to Internship: Single Subject University Intern. (1 Units)

Prerequisite: Admission to Fieldwork. Introduction to Critical Friends Inquiry Groups for secondary University Interns. Focus on reflective teacher inquiry, cognitive coaching, peer review and self-assessment.
Offered Infrequent

TED 467. Secondary Teaching Methods I. (3 Units)

Prerequisite: Admission to Single Subject Program. Principles of effective instruction, critical thinking/questioning skills, lesson design, cooperative learning, sheltered instruction, guided discovery; curriculum materials for culturally, ethnically, and language diverse content classrooms.
Offered Fall, Spring

TED 468. Secondary Teaching Methods II. (3 Units)

Prerequisite: Admission to Single Subject Program. Taken in single subject credential area. Explores methods and materials for planning instructional units and lessons. Presents alternative strategies of instruction and evaluation to assure high-level learning with ethnically, culturally, and language diverse students.
Offered Fall, Spring

TED 469. Interdisciplinary Teaching Methods. (3 Units)

Prerequisite: Acceptance to intern status in single subject program or advancement to fieldwork status; TED 467 and TED 468; TED 406 recommended. Explores interdisciplinary teaching methods for the multicultural, multilingual classroom including psychological, philosophical perspectives. Presents strategies, practices, and resources for developing an integrated curriculum.
Offered As needed

TED 470. Critical Perspectives in Urban Education. (2 Units)

Prerequisite: TED 444. Capstone experience. Focuses on the professional obligations of teachers in society and the role of families and the community in the education of children. Addresses the historical, philosophical, cultural, and sociological foundations of American education from an equity perspective.
Offered As needed

TED 471. Secondary Methods III: Curriculum and Assessment. (3 Units)

Prerequisite: TED 467; concurrent enrollment in TED 468 recommended. Focus on interdisciplinary curriculum and assessment. Includes diagnostic, formative, and summative assessment. Focuses on evaluation, grading procedures, and use and interpretation of standardized exams as tools for instruction and monitoring of achievement.
Offered As needed

TED 472. Intern Performance Assessment: Single Subject. (4 Units)

Assessment Seminar. Critical reflection on intern performance and student achievement correlated with the 13 Teacher Performance Expectations.
Offered As needed

TED 476. Summative Assessment Seminar: Phase Two Multiple Subject Student Teachers. (2 Units)

Prerequisite: TED 475. Summative Assessment Seminar to complete reflective essay and performance task. Credit/no credit grading.
Offered As needed

TED 481. Summative Assessment Seminar: Phase Two Single Subject Student Teachers. (2 Units)

Summative Assessment Seminar to complete reflective essay and performance task. Credit/no credit grading
Offered As needed

TED 488. Teaching Event: Single Subject. (2 Units)

Prerequisite: Admission to Phase Two. Candidates complete the Teaching Event, the required summative assessment, by demonstrating competency in all Teacher Performance Expectations. Candidates focus on student learning, select a learning segment, submit teaching artifacts and analysis, and assess the teaching event. Credit/no credit grading.
Offered Infrequent

TED 490. Seminar: Issues in Education. (1-3 Units)

Identification of significant and persistent issues in education, to evaluate policy statements and published opinions with an awareness of elements involved. Repeatable course. One to three hours of seminar per week.
Offered As needed

TED 494. Independent Study. (1-3 Units)

Prerequisite: Consent of instructor. Independent study taken under the supervision of a faculty member. Repeatable course.
Offered As needed

TED 495. Special Topics in Teacher Education. (1-6 Units)

Selected topics in teacher education. Repeatable course up to six units.
Offered As needed

TED 501. Lesson Study: Engaging all Students in Learning. (3 Units)

Prerequisites: GED 500 is required. Introduction to the foundations of lesson study and its analysis for induction candidates. Collaboration in designing, observing and discussing lessons to provide universal access and engage all students in learning. Focus on English Learners, GATE students and students with special needs. Course is restricted to majors.
Offered Spring

TED 502. Advanced Lesson Study II: Using Data to Improve Achievement. (3 Units)

Prerequisites: GED 500 is required. Advanced lesson study and its analysis for induction candidates. Collaboration in collecting, analyzing and using data to improve student learning. Focus on students who may be at risk. Course is restricted to majors.

Offered Fall

TED 503. Teacher Action Research Project. (3 Units)

Teacher action research methods course for induction teachers working in urban diverse classrooms. Candidates conduct inquiries on professional practices using scientific methods to improve student achievement.

Offered Spring

TED 504. Colloquium. (3 Units)

Prerequisite: GED 500 is required. Induction candidates do an in-depth intervention to increase student achievement. Multimedia presentation disseminating findings. Focus on students who may be at risk. Course is restricted to majors.

Offered Spring

TED 505. Educational Psychology. (3 Units)

Explores theory, research, and practice related to learning, motivation, and effective and cognitive development. Emphasis on the application of learning principles to classroom learning situations and individual differences.

Offered Fall, Spring

TED 506. Multicultural and Social Foundations of Education. (3 Units)

An investigation and analysis of cultural influences and constructs such as race, gender and class to provide insight into the relationship among the individual, society and school in US education.

Offered Fall, Spring

TED 507. Language Learning: Theory and Practice. (3 Units)

Focuses on theory, research, and teaching practices that concern language in education. using sociocultural theory as a lens, evaluate research and teaching practices that explore how people acquire language in multilingual and multimodal contexts within community, home and school settings.

Offered Fall, Spring

TED 551. Supportive Learning Environments. (3 Units)

Co-requisite: SPE 570. Candidates develop integrated systems for academic and social skills instruction for all students. Course includes study of behavior, positive behavioral interventions and supports, social skills instruction, crisis management, at the school-wide, classroom and individual student level.

Offered Fall, Spring

TED 553. Curriculum Planning, Implementation and Assessment. (3 Units)

Prerequisites: TED 551 and SPE 570 are required. Co-requisite: SPE 571 is required. In-depth study of the processes of curriculum planning, implementation and assessment, and application of these processes to student-generated lessons and units of instruction. Addresses California Standards for the Teaching Profession, data-driven decision making, differentiated instruction, problem-based learning, and instructional leadership.

Offered Fall, Spring

TED 560. MA in Education: Curriculum and Instruction Capstone. (1 Units)

Prerequisites: CUR 510 and CUR 519 are required. Preparation for the M.A. in Education Comprehensive Exam. Consists of small group, candidate presentations of specific TED, GED, and CUR course material.

Offered Fall, Spring

TED 594. Independent Study. (1-6 Units)

Prerequisite: Consent of instructor. Independent research under the supervision of a faculty member.

Offered Fall, Spring, Summer

TED 599. Thesis. (1-6 Units)

Prerequisite: Consent of Advisor. The student will execute an individually planned research effort or a creative project. Students work under individual supervision with assigned faculty. May be repeated up to six units.

Offered Fall, Spring

TED 600. Grad Continuation Course. (1 Units)

Graduate students who have completed their course work but not their thesis, project, or comprehensive examinations, or who have other requirements remaining for the completion of their degree, may maintain continuous attendance by enrolling in this course. Signature of graduate program coordinator required.

Offered Fall, Spring

Dual Language Learning, Certificate

The Dual Language Learning Certificate is designed for educators committed to justice and equity in Dual Language/Bilingual – Spanish & English settings. We engage cutting edge interdisciplinary research, critical educational theories, and practical application across PK-12 content areas. Develop expertise in translanguaging and multilingualism through frameworks related to: power and resistance, intersectionality, critical pedagogies, educational justice, ethnic studies, and critical literacies. All courses will be conducted in Spanish.

The Dual Language Learning Certificate is designed for educators committed to justice and equity in Dual Language/Bilingual – Spanish & English settings. Education, Master of Arts Requirements

Degree Requirements: Master of Arts in Education

- Completion of 30 units of course work with a minimum of "B" in all coursework with a 3.0 GPA. No course grade lower than a "C" may be used toward the MA. Candidates must complete coursework in the Core Requirements as well as coursework in one of the Options listed below.
- Continuous Enrollment. Candidates are required to maintain enrollment throughout their MA program. Candidates who have completed the maximum number of required units or have not completed their culminating activity (e.g., thesis, project, or comprehensive examination) must enroll in TED 600 Grad Continuation Course every semester until the degree is awarded. In order to enroll in TED 600 Grad Continuation Course, candidates must submit an application form prior to enrollment (see University Policy on Continuous Attendance Requirement). Enrollment in TED 600 Grad Continuation Course for more than two semesters requires permission of the Program Coordinator and the department chair.
- Transfer Credit. A maximum of 9 units of graduate level coursework from an accredited college or university; coursework must be no older than seven (7) years from the date of MA degree completion. However, no courses may apply toward the required number of units of approved graduate work that have been used to meet the requirements of another degree.
- Time Limit on Coursework. Candidates must complete all of the requirements for the degree within seven (7) years. This time limit commences with the semester of the earliest course used on the candidate's program of study. Course work that does not meet the seven-year deadline will have to be repeated and/or replaced by other courses with the approval of the program advisor.
- Capstone Requirement for the Master's Degree. Candidates must complete a comprehensive examination or thesis and are required to make this decision prior to the completion of 21 semester units, including core courses. Candidates may retake the comprehensive examination one time provided the retake is within the 7-year limit. The thesis is not an option for someone who selected the exam option, but was unable to pass.
- In addition to the major requirements, students must meet all university requirements for the master's degree. Students should consult the section of the University Catalog entitled "Requirements for the Master's Degree."

Completion of Master of Arts in Education (30 units)

Prior to the completion of 21 semester units (including core courses) the graduate student must select one of the following alternatives unless otherwise specified:

Alternative I: Course Work and Examinations (30 or more units)

- Complete an approved program of 30 units of course work with at least a "B" (3.0) average (including core courses).

- Pass a comprehensive written examination. After completion of all course work or during the last semester of course work, the M.A. degree candidate will apply to take the comprehensive examination. There is only one retake opportunity.

Alternative II: Course Work and Thesis/Project (30 or more units)

- Complete approved program with a minimum of 30 units of course work with at least a B (3.0) average (including core courses).
- Complete approved thesis or creative project. See advisor for thesis preparation guidelines. Students must have the approval of a faculty thesis advisor prior to enrolling for thesis credit (TED 599 Thesis). Complete Intent to Submit Thesis/project form through the Graduate Studies website <https://www.csudh.edu/gsr/graduate-studies/current-students/thesis/>. Note that the thesis is not an option for someone who selected the exam option but was unable to pass.

Core Requirements (15 units)

Students are required to complete the following courses and select one of the options listed below to complete the degree requirements.

| Code | Title | Hours |
|--------------------|---|-----------|
| CUR 510 | Process of Curriculum Development | 3 |
| CUR 518 | Research for the Teacher Scholar | 3 |
| CUR 519 | Adv Stud in Curric Practices | 3 |
| TED 506 | Multicultural and Social Foundations of Education | 3 |
| TED 507 | Language Learning: Theory and Practice | 3 |
| Total Hours | | 15 |

Curriculum and Instruction Option (15 units)

| Code | Title | Hours |
|---|--|----------|
| A. Select one course from the following (3 units): | | 3 |
| CUR 514 | Trauma and Healing Informed Pedagogy | |
| CUR 516 | Sem Curr Dev Science Math | |
| NOTE: Students may also use CUR 514 or CUR 516 as an elective if not used in section A. | | |
| B. Electives (12 units) | | |
| CUR 520 | Seminar in Ethnic Studies in Education | 3 |
| CUR 521 | Seminar in Critical Race Praxis in Education | 3 |
| TED 505 | Educational Psychology | 3 |
| TED 599 | Thesis | 1-6 |

NOTE: Students completing Alternative I course work will complete comprehensive examination in CUR 519. Students in Alternative II course work will complete 6 units of Thesis course work.

CURRICULUM AND INSTRUCTION OPTION: SCIENCE EDUCATION EMPHASIS (31 UNITS)

The Division is currently not accepting students into the MA in Education Curriculum and Instruction: Science Education Emphasis Option. For more information, please contact the Division of Teacher Education (310) 243-3496.

Dual Language Learning Option (15 units)

| Code | Title | Hours |

| Total Hours | | 15 |

Urban Teacher Residency Program

The Division is currently not accepting students into the Urban Teacher Residency Program.

For more information, please contact the Division of Teacher Education.

Residents blend the rigor and theory of a master's degree in curriculum and instruction with the practice and pragmatism of a single-subject (secondary) credential in math or science, combined with a year-long residency in the classroom of an experienced, trained mentor teacher in partner schools.

1. PHASE ONE (12 UNITS)

| Code | Title | Hours |
|--------------------|-------------------------------------|-----------|
| TED 400 | Introduction to Education | 3 |
| TED 414 | Cultural Ecology in the Classroom | 3 |
| GED 501 | Seminar in Learning and Development | 3 |
| GED 503 | Socio-Cultural Issues in Education | 3 |
| Total Hours | | 12 |

Requirements for Advancement to the Residency

- Completion of Phase One courses with an overall grade point average of 3.0 and no grade lower than C.
- Bilingual Authorization candidates: completion of written and culture competencies. (Consult with the Bilingual Authorization advisor for information on how to meet these competencies.)

2. PHASE TWO (15 UNITS)

| Code | Title | Hours |
|--------------------|-----------------------------------|-----------|
| GED 500 | Research Methods in Education | 3 |
| CUR 510 | Process of Curriculum Development | 3 |

Designated Subject Adult Education Teaching Credential

The Division is currently not accepting students into the Designated Subjects Adult Education Teaching Credential program. For more information, please contact the Division of Extended Education (310) 243-3741.

The Designated Subject Adult Education Teaching Credential Program is designed for students who meet requirements for a Two-Level Preliminary Adult Education Credential and would like to fulfill requirements for a Professional Clear Adult Education Credential. Graduates find employment in public and private schools, community agencies, private industry, health services, government agencies, military settings, correctional and religious institutions, volunteer agencies, and centers for older adults.

Requirements for the Two-Level Preliminary Adult Education Teaching Credential

1. Qualifying Experience and/or Education
 - Academic Subjects
 - English as a Second Language
 - Elementary and Secondary Basic Skills
 - A Language Other Than English
 - English
 - Fine Arts
 - Life Science, including General Science
 - Physical Science, including General Science
 - Mathematics
 - Social Science Qualifying education for an adult education credential authorizing the teaching of an academic subject shall include a baccalaureate or higher degree completed at a regionally accredited college or university and completion of 20 semester units or 10 upper division semester units in the subject to be taught.
 - Non-Academic Categories
 - Adults with Disabilities
 - Older Adults
 - Health and Safety
 - Parent Education
 - Home Economics
 - Vocational Education
- Qualifying experience, or experience and education, or education, for an adult education credential authorizing the teaching of a

non-academic subject shall meet one of the criteria described in the table below:

| Yrs of Subject- Related Education and/or Training | Experience Required |
|---|--|
| High school diploma or equivalent | + 5 years |
| 24 semester units of college course work | + 4 years including a minimum of 4 semester units in the subject to be taught |
| 48 semester units of college course work | + 3 years including a minimum of 8 semester units in the subject to be taught |
| 72 semester units of college course work | + 2 years including a minimum of 12 semester units in the subject to be taught |
| 96 semester units of college course work | + 1 year including a minimum of 16 semester units in the subject to be taught |
| Bachelor's or higher degree completed at a regionally accredited college or university with 20 semester units, or 10 upper division units in the subject to be taught | + 0 years |

2. Knowledge of the Constitution of the United States: Competency of the U.S. Constitution requirement (POL 101 American Institutions or equivalent).
3. Passage of the California Basic Education Skills Test (CBEST). Applicants for the adult credential in **non-academic** subjects are exempt from this requirement.

Professional Clear Adult Education Teaching Credential (14 units)

The Division is currently not accepting students into the Professional Clear Adult Education Teaching Credential program. For more information, please contact the Division of Extended Education (310) 243-3741.

Requirements

1. A valid Preliminary Adult Education Teaching Credential.
2. Verification of Level I completion.
3. Verification of four terms or two years of successful teaching adult learners authorized by the preliminary adult education teaching credential while holding the valid preliminary credential.
4. Completion of Level I and Level II Course work for the Professional Clear Credential

| TED 419 | Methods and Materials of Adult Education, Part II | 2 |
| TED 421 | Principles Of Adult Education | 2 |
| Total Hours | | 6 |

Professional clear credential candidates must complete the Level I classes within the first two years of the two-level preliminary credential.

LEVEL II COURSES

| Code | Title | Hours |
|--------------------|---|----------|
| TED 420 | Computer Literacy for Teachers | 1 |
| TED 417 | Seminar In Adult Education | 1 |
| TED 423 | Super Fld Exper: Adult Ed | 2 |
| TED 424 | Counseling and Guidance for Teachers of Adult Education | 2 |
| HEA 300 | Health in Public Education | 3 |
| Total Hours | | 9 |

Professional clear credential candidates must complete the Level II classes by the end of the fifth year of the preliminary credential.

PLO1. Demonstrate intersectional approaches to advanced knowledges reflecting foundational and current critical pedagogies/theories that are responsive/sustaining within education at a graduate level.

PLO2. Interrogate power and resistance from critical perspectives as teacher/scholar practitioners through reflexivity and writing (APA) - while sustaining the multilingual and multiliterate repertoires of the students and communities we serve at a graduate level.

PLO3. Graduate students are expected to articulate advanced (and original) ideas associated with the guiding principles of critical pedagogy at a graduate level through multi-modal expressions. They will share these critical perspectives in class, in student, local/global, and community conferences, and in other related spaces.

PLO4. Engage in collaborative, critical implementation and introspection as a teacher/scholar within their discipline and make meaningful contributions to their field, organizations, and communities at a graduate level

PLO5. Demonstrate abilities to contribute to the development of their discipline and work in responsive, intersectional, and justice-focused ways.

Plan of study

Multiple Subject Preliminary: Student Teaching Option, Credential

The Multiple Subject Preliminary Credential authorizes its holder to teach in a self-contained classroom, usually grades transitional kindergarten through six.

Student Teaching Option (51 units)

Candidates enrolled in the Student Teaching Option are not contracted teachers and are assigned to master teachers in a public school setting for their supervised field experiences. In addition, student teachers receive support and guidance from a university supervisor. In the Student Teaching Option, there are three phases. The program sequence in the Student Teaching Option allows candidates to complete their coursework and exit requirements in one year, if they begin the program in the summer semester.

PHASE ONE (12-18 UNITS)

CSUDH LBS students with catalog rights beginning Fall 2016 are exempt from Phase I courses (for credential only). After being accepted to the program, proceed directly to Phase II.

| Code | Title | Hours |

| TED 506 | Multicultural and Social Foundations of Education ¹ | 3 |
| TED 507 | Language Learning: Theory and Practice | 3 |

Footnotes

¹Can be taken in Phase I or Phase II.

Requirements for Advancement to Phase Two

- Submit Phase II Student Teaching Application by April 1 for fall and November 1 for spring.
- Include: Program Plan sheet signed by an advisor, verification of completed CSET or Subject Matter Competence Letter
- Provide two emails for letters of recommendations, and valid CPR card (infant, child, and adult) valid for at least two more semesters. Phase II application is semester specific; if you do not attend, you will need to reapply.
- Completed CSET scores for Phase II application (documents only, application must be submitted by phase II deadline) are due by July 15 for fall and November 15th for spring.

Multiple Subject Preliminary: University Intern Option, Credential

The Multiple Subject Preliminary Credential authorizes its holder to teach in a self-contained classroom, usually grades transitional kindergarten through six.

University Intern Option (41-50 units)

Candidates enrolled in the University Intern Option are contracted teachers, without a preliminary credential, currently teaching K-12 students. They are supervised for fieldwork in their own classroom by trained university supervisors and site-based coaches who provide support and guidance. There are three phases in the University Intern Option. Courses in each phase must be completed before enrolling in the next phase.

| TED 412 | Teaching History-Social Studies and Content Area Literacy in the Elementary Classroom | 4 |
| TED 416 | Elementary Science Methods | 3 |
| TED 445 | Fieldwork: Elementary Interns | 6 |
| TED 448 | Teaching Event: Multiple Subject | 2 |

Summary of Multiple Subject Preliminary Credential Requirements

A recommendation of a Multiple Subject Preliminary Credential may be made when the candidate has:

1. Completed a bachelor's degree from an accredited university;
2. Completed all the education courses for the program with an overall grade point average of 2.75 with no grade lower than a C;
3. Completed the CalTPA, successfully;
4. Demonstrated subject matter competence;
5. Completed US Constitution requirement; and
6. Passed the Reading Instruction Competence Assessment (RICA).

Pre-Service Teacher Bilingual Authorization in Spanish, Certificate Preliminary Credential Bilingual Authorization Applicants (Spanish)

Bilingual Authorization applicants must demonstrate language competencies in Spanish by **one** of the following methods:

1. Completion of SPA 280 Grammar for Spanish Composition and SPA 341 Advanced Conversation, with grade expectations adhering to the departmental policy (e.g., Liberal Studies, Teacher Education, Special Education).
2. Passing score on CSET: Subtest III. (See CSET Website: <http://www.ctcexams.nesinc.com> (<http://www.ctcexams.nesinc.com/>));

Bilingual applicants must demonstrate methods competencies through two courses: TED 439 and TED 440 (add course titles)

1. Multiple Subject candidates will enroll in the bilingual sections of TED 403 Elementary Reading/Language Arts I: K-3, TED 410 Elementary Mathematics Methods, TED 416 Elementary Science Methods, and TED 412 Teaching History-Social Studies and Content Area Literacy in the Elementary Classroom, when available.

Bilingual Authorization applicants must demonstrate bilingual/dual language practicum competencies for at least 20 hours in a clinical practice setting (i.e., TED 433/453 or during your university internship).

Bilingual Authorization Alternate Pathways

1. Masters in Education, Option: Dual Language Learning (31 units)
2. Certificate – Dual Language Learning (12 units)

Note: Bilingual Authorization applicants must demonstrate bilingual/dual language practicum competencies for at least 20 hours in a clinical practice setting

Classified Standing

Successful admission to the university with the following conditions:

- Candidates who satisfy all the requirements for university and program admission will be admitted with Classified Standing.
- Candidates accepted with Conditional Standing will have one semester to meet the conditions for Classified Standing

Requirements

| Code | Title | Hours |
|--|---|-----------|
| Upper Division Required Courses | | |
| SPA 280 | Grammar for Spanish Composition | 3 |
| SPA 341 | Advanced Conversation | 3 |
| TED 433 | Teaching Practices Seminar | 3 |
| TED 439 | Heritage Language Learner Pedagogies with Plurilingual TK-12 Students | 3 |
| TED 440 | Critical Biliteracy with Plurilingual Communities | 3 |
| Total Hours | | 15 |

Note: Students must take these courses at CSUDH.

Single Subject Preliminary: Student Teaching Option, Credential

The Single Subject Preliminary Credential authorizes its holder to teach in departmentalized classes, usually in the middle or high school.

Individuals wishing to teach only physical education, art, or music at either the elementary or secondary level are generally also required to hold a Single Subject Preliminary Credential, as well.

Student Teaching Option (44 units)

Candidates enrolled in the Student Teaching Option are not contracted teachers and are assigned to master teachers in a public school setting for their supervised student teaching field experiences. In addition, student teachers receive support and guidance from a university supervisor. In the Student Teaching Option, there are three phases. The program sequence in the Student Teaching Option allows candidates to complete their coursework and exit requirements in one year if they begin the program in the summer semester.

PHASE ONE (12-18 UNITS)

CSUDH LBS students with catalog rights beginning Fall 2016 are exempt from Phase I courses (for credential only). After being accepted to the program, proceed directly to Phase II.

Subject Matter Authorizations

Holders of a Single Subject or Multiple Subject credential issued by the California Commission on Teacher Credentialing may secure an Introductory Subject Matter Authorization that allows the holder to teach the subject matter content typically included in curriculum guidelines and textbooks approved for study in grades 9 and below. This allows an employer to assign a teacher with an Introductory Subject Matter Authorization to teach a class in which the curriculum is for grades 9 and below but the students in the class may be in grades K-12.

To qualify, individuals must satisfy all of the following requirements:

1. Possess a valid prerequisite teaching credential
2. Complete one of the following:
 - 32-semester units of non-remedial course work in the subject, including a minimum of three semester units of course work in each content area. The balance of the units may be in any course within the subject category. (Exception: the subject of Science requires at least six semester units in each of the four science content areas [biological sciences, chemistry, geosciences, and physics]). (See CCTC website www.ctc.ca.gov/ (<https://www.ctc.ca.gov/>) (<https://www.ctc.ca.gov/>))

(<http://www.ctc.ca.gov/>) for a list of subjects and content areas within subjects.);

- a degree major from a regionally-accredited college or university in a subject directly related to the subject to be listed on the credential.

Holders of a Single Subject or Multiple Subject credential issued by the California Commission on Teacher Credentialing may secure a Specific Subject Matter Authorization that allows the holder to teach the specific subject in grades preschool, kindergarten-12, and classes organized primarily for adults.

To qualify, individuals must satisfy all of the following requirements:

1. Possess a valid prerequisite teaching credential
2. Complete one of the following:
 - 32-semester units of non-remedial coursework (Exception: the subject of History requires a minimum of 16-semester units in both world history and U.S. history.) See CCTC website www.ctc.ca.gov/ (<https://www.ctc.ca.gov/>) (<https://www.ctc.ca.gov/>) for a list of subjects.);
 - a degree major from a regionally-accredited college or university in a subject directly related to the subject to be listed on the credential.

Course Work Requirements for Subject Matter Authorizations

Acceptable course work must be:

1. Completed with a grade of "C" or better ("credit", "passing", or "satisfactory" grades are acceptable).
2. Applicable toward a bachelor's degree or a higher degree (elective or non-elective, non-remedial).
3. Taken at a regionally accredited institution.
4. Granted regular semester or quarter-hour credit.
5. Taken from the subject department of the subject matter authorization being sought.

The following coursework may be used as long as it meets the criteria listed above:

1. Community college, correspondence, online, or extension course work.
2. Advanced placement unit (requires an official transcript of the course and written verification from the college or university admission or registrar's office that the units were used towards a bachelor's degree and are in the subject category of the requested subject matter authorization).

Unacceptable course work includes:

1. Course work that is not applicable toward a bachelor's degree or higher degree.
2. Professional development or continuing education units.
3. In-service training or workshop.
4. Education and education methodology course work unless a letter is provided by the chair of the subject area department stating that the course is equivalent to one offered by that department.

5. Course work from a department other than the subject matter authorization is being sought unless a letter is provided from the chair of the subject area department stating that the course is equivalent to one offered by that department.

Subject Matter Authorization Programs include:

- Biology, Subject Matter Preparation (p. 410)
- Chemistry, Subject Matter Authorization (p. 447)
- English, Subject Matter Preparation (p. 553)
- Introductory and Specific Music, Subject Matter Authorization (p. 703)
- Introductory Mathematics, Subject Matter Authorization (p. 690)
- Physical Education, Subject Matter Preparation (p. 641)
- Spanish, Subject Matter Preparation (p. 834)
- Specific History Subject Matter Authorization (p. 600)
- Subject Matter Authorizations (p. 867)

Transitional Kindergarten, Certificate

Theatre Arts

College of Arts and Humanities (<https://www.csudh.edu/cah/>)
Department of Theatre and Dance (<https://www.csudh.edu/theatre-arts/>)

Program Description

The Bachelor of Arts in Theatre Arts prepare students in the areas of Performance, Theatrical Design and Technology, and Literature/History. Our program is multi-cultural and multi-ethnic by nature and offers a wide range of theatre techniques to explore. The Theatre Performance Minor focuses on acting and directing, while the Theatre Education Minor doubles as both a general program and preparation for future teachers.

The B.A. in Theatre Arts offers courses in the field of acting and directing, design and technical theatre, theatre history, dramatic literature, multicultural children's theatre, speech, and drama for the classroom. Students and faculty often collaborate with other departments including Art, Dance, Music, Digital Media, English and Humanities.

Features

Theatre Arts Majors and Minors participate in the department's ambitious production program through acting; scenic, lighting, and costume design;

set construction; stage management; and theatre production. Students receive academic credit for their participation. Freshperson and sophomore Theatre Arts majors have the opportunity to secure roles in Theatre productions. The department presents four shows each year, in the University Theatre or Edison Studio Theatre that range in styles from Contemporary, Multicultural, Shakespeare to Musical Theatre. Students have the opportunity to participate each year at KCACTF (Kennedy Center American College Theatre Festival), USITT (United States Institute for Theatre Technology, Forensics Competitions, and other performance venues throughout the year.

The Department of Theatre and Dance maintains active membership in KCACTF (Kennedy Center American College Theatre Festival), USITT (United States Institute for Theatre Technology, and ACDA (American College Dance Association). The Theatre Arts Program is accredited by the National Association of Schools of Theatre (NAST). NAST is located at

11250 Roger Bacon Drive, Ste. 21,
Reston, VA 22090.

Academic Advisement

The Theatre Arts Program places great importance on the advisement process. We request that students meet with their respective advisors for consultation. To obtain an advisor, students should contact Bill DeLuca, Katie Dowse, or Shaunté Caraballo to schedule a first meeting. Educational goals and previous theatre experience will be discussed during the first advisement meeting. Based on this discussion, the progression of the student's major and minor requirements will be planned. Career opportunities will also be discussed.

Dedication and commitment are the keys to the successful pursuit of a career in theatre. To help students achieve high academic and production standards, the department requires all majors and minors to pass their required classes with a "C" grade or better. Students who receive lower than a "C" will need to "Repeat and Cancel" that course in the following semester.

Preparation

The B.A. in Theatre Arts strongly suggests that students wishing to major in theatre arts be able to deal effectively with the English language. Six to eight courses of college preparatory English are advised. In addition, students should have a strong background in vocal skills and basic movement capabilities. Since the theatre affects and makes use of the whole person, awareness and development of the human body and voice are equally important as the development of the human mind. Students are urged to take courses in speech, diction, singing, dance, fencing, stage combat, yoga, Pilates, and other recreational activities.

Student Organizations

- Toro Forensics- is an award-winning Speech team that competes annually in Public Speaking, Debate, Oral Interpretation, and theatrical performance tournaments held throughout Southern California. Students acquire excellent training in speech support, articulation, organization, and non-verbal delivery skills.
- Teatro Dominguez is open to all students and provides high-quality theatrical programs that inform, delight and promote cross-cultural understanding in the Dominguez communities. As actors and directors, discussion leaders, stage managers, playwrights, and business managers, members receive a full

experience in developing life skills that will make them effective leaders in today's pluralistic society.

- The New African Grove Black Theatre Program (BTP) is a performing arts company comprised of students, alumni, and guest artists. The BTP offers performances, industry showcases, and community outreach that illuminates the Black experience for people of all ages and ethnic groups.

Graduation with Honors

An undergraduate student may graduate with Honors in Theatre Arts if the following criteria are met:

1. A minimum of 36 units in residence at CSU Dominguez Hills.
2. A minimum GPA of at least 3.5 in all courses is used to satisfy the upper-division requirements.

Career Possibilities

Opportunities in the field of acting are expanding as a result of the establishment of year-round professional acting companies, the growth of summer and winter stock companies, outdoor and regional theatre, repertory companies, and dinner theatre. Commercial television, cable television, the Public Broadcast System (PBS), and the movie and music industry employ many actors, as well as other talented personnel. Opportunities also exist in university and community theatre programs.

Related careers available to graduates include the following occupations: actor, playwright, drama coach, dramaturge, theatre historian, critic, designer (set, lighting, sound, costume), make-up artist, technician, theatre manager, director, producer, announcer, recreation director, dancer, musician, entertainer, arts administrator, sales representative, model, and dramatic agent.

Many graduates from the Theatre Art Program find secondary careers in the field of education. Our majors and Theatre Education minors learn how to adapt theatre games, improvisation, pantomime, and storytelling, to help their students in primary and secondary classrooms to develop social, communication, creative, and problem-solving skills.

Courses

THE 100. Television Film & Theatre. (3 Units)

Appreciation of the performing arts of television, film, and the live theatre through the viewing of films and videotapes, as well as attendance at plays and musicals.

Offered Fall, Spring

THE 120. Fundamentals of Speech. (3 Units)

Introduction to the basic principles of speech communication. Classes cover the use of organization and evidence in speech preparation, and emphasize research and performance techniques. Students develop speeches for a variety of topics and situations. A-C-/NC grading.

Offered Fall, Spring, Summer

THE 160. Acting For Non-Majors. (3 Units)

Introductory course for non-majors who wish to develop awareness and control of the voice and body while building self-confidence, and improving concentration and imagination.

Offered Fall, All terms

THE 251. Script Analysis. (3 Units)

A study of classical and contemporary dramas in terms of plot, character, theme, and language. Students analyze one script per week.

Offered Fall

THE 264. Acting I. (3 Units)

An integrative approach to the actor's emotional, intellectual, physical, and vocal tools. Exercises in characterization, voice, and movement will be emphasized.

Offered Fall

THE 269. Voice and Movement. (3 Units)

Foundational course for anyone interested in performing in Theatre, Film, or Television, or improving their speaking voice and strengthening their body. Voice and Movement allows students to engage their voices and body to effectively speak and communicate.

Offered All terms, Spring

THE 313. Voices of Contemporary Women Playwrights. (3 Units)

Prerequisite: Upper division integrative coursework must be taken after 60 semester units and the lower division components of General Education (or their equivalent) have been completed. By analyzing their dynamic writings, this course investigates the contributions of women to the modern dialogue on gender issues. Students will demonstrate how female playwrights have continually crossed boundaries to break with traditions and sculpt new cultural conventions.

Offered Fall, Spring

THE 315. Key Concepts: The American Musical. (3 Units)

Participation in any aspect of campus theatre or television production including (but not limited to) acting, stage management, scenery, lighting, costume, construction, audio, properties, box office, promotion, and running crews. This participation includes attendance at Theatre Arts productions for the semester enrolled.

Offered Infrequent

THE 317. Theatre of Revolt. (3 Units)

Prerequisites: Upper division integrative coursework must be taken after 60 semester units and the lower division components of General Education (or their equivalent) have been completed. Investigates the revolutionary impulse that has promoted modern drama in African, European, American and Asian/Pacific societies. Students learn how modern playwrights have continually crossed boundaries to break with traditions and sculpt new conventions.

Offered Fall

THE 319. The Power of Masks. (3 Units)

Prerequisites: Upper-division integrative coursework must be taken after 60 semester units and the lower division components of General Education (or their equivalent) have been completed. Covers the significance and function of ritual masks in African, European, American and Asian/Pacific societies; mask usage in literature, and the visual and performing arts; and the integration of psychological masking in human behavior.

Offered Fall

THE 320. Speech Skills and Techniques. (3 Units)

Effective and persuasive oral communication in a variety of situations: formal address, group discussion interviews, chairing of meetings, and others. Of particular value for Liberal Studies majors, managers and business persons.

Offered Spring

THE 322. Oral Interpretation of Literature. (3 Units)

Principles and practice in the effective delivery of readings in drama, poetry, and prose.

Offered Spring

THE 323. Interpersonal Communication. (3 Units)

Prerequisite: THE 120. Introductory study of interpersonal communication in face-to-face interaction; consideration of interpersonal roles, needs, barriers, perceptions, and adaptation.

Offered Infrequent

THE 326. Persuasion. (3 Units)

Discussion of techniques in argumentation and debate; logic, reasoning, and fallacies of reasoning; gathering and testing of evidence, construction of bases, and skills of refutation; practical application through debates about current issues.

Offered Infrequent

THE 329. Forensics Workshop. (3 Units)

Introduces the basic principles used in debate, persuasive speaking, oral interpretation, reader's theatre, and other competition events. Students discuss the use of organization and evidence in speech preparation, and research and performance techniques. Students participate in local intercollegiate competition events.

Offered Spring

THE 337. Creative Dramatics. (3 Units)

Creating, planning and assessing dramatic exercises, including theatre games, pantomime, and improvisation. Of particular value to prospective teachers of young children.

Offered Spring, All terms

THE 339. Multicultural Children's Theatre. (3 Units)

Analysis of educational theatre, multicultural plays, and folktales. Students discuss educational theatre production and how to create culturally-enriching programs at K-12 schools.

Offered Fall

THE 340. Costuming. (3 Units)

An introduction to the principles, elements and practicalities of costume design and their relation to design in the Theatre. Lectures on the elements and procedures in costume design, combined with practical exercises from individual skill-building projects.

Offered Spring odd

THE 341. Makeup and Hair. (3 Units)

An introduction to the principles, elements and practicalities of Makeup and Hair for theatre production. Students learn how to communicate design choices both visually and verbally through research, drawing and three dimensional makeup.

Offered Spring

THE 342. Fundamentals of Theatre Design. (3 Units)

A course in Theatre Arts Utilizing research, discussion and workshop demonstrations in order to integrate the six major areas of theatre design: scenery, costume, lighting, makeup, properties and audio.

Offered Fall

THE 343. Design/Tech II: The Design Experience. (3 Units)

Prerequisites: THE 243. Students are assigned design projects both on and off campus, where they can apply their skills. Students will work under the supervision of lead and/or master designers.

Offered Spring

THE 344. Stagecraft. (3 Units)

Study of basic skills and procedures used to realize a design idea into a finished stage production. Explores practical applications of artistic and structural design, project management, term development, construction techniques, and resource coordination.

Offered All terms, Spring

THE 345. Scene Design. (3 Units)

The basic techniques of the principles and practices of scenic design for stage. Included are design functions, construction, painting, modeling, history and theories of design.

Offered All terms, Spring

THE 346. Theatre Workshop. (3 Units)

Prerequisites: Consent of instructor and department chair. Investigation of a single topic, chosen in consultation with a faculty member, culminating in a paper, presentation, or project. Repeatable course.

Offered Fall, Spring

THE 347. Stage Lighting and Sound. (3 Units)

A course in the design of theatrical lighting and sound, and in the practical application of those designs. Learning in this course will be done via lectures as well as hands-on experience and selected reading.

Offered Fall

THE 353. Playwriting. (3 Units)

Theory and practice in writing for the stage. Students explore plotting, characterization, and dialogue; scenes and short plays are submitted for discussion and evaluation.

Offered Fall, All terms

THE 355. World Theatre and Drama I. (3 Units)

History and literature of the theatre from its origins through the 16th century. Emphasis on production styles, cultural background and literary trends.

Offered Fall, Spring, All terms

THE 357. World Theatre & Drama II. (3 Units)

History and literature of the theatre from the 16th century to the present with emphasis on production styles, cultural background and literary trends.

Offered Spring

THE 364. Acting II. (3 Units)

Prerequisites: THE 264 or consent of instructor. The actor's approach to a role, including text and character analysis. Performance of scenes from plays. Vocal work on dialects with concentration on melody, rhythm, and sound substitutions. Beginning movement work in body alignment, centering and balance.

Offered Spring

THE 367. Acting For The Camera. (3 Units)

Prerequisites: THE 160 or consent of instructor. Techniques of directing and performing before the camera. Scenes and presentations will be videotaped both in the studio and on location.

Offered Infrequent

THE 374. Stage Directing. (3 Units)

Prerequisites: THE 264 is recommended. Theories and techniques of directing for professional or educational play production. Students develop the ability to research, analyze and conceptualize in order to plan the rehearsal and performance of a play script. Attendance at the Theatre Arts two mainstage productions is required.

Offered Fall odd

THE 376. Stage Management. (3 Units)

Techniques of stage management, with practical applications. Covers stage manager responsibilities, pre-show preparations, scheduling, communication, and techniques for auditioning, rehearsing and running a production of live theatre. Attendance at department shows required.

Offered Fall

THE 440. Rehearsal and Performance. (1 Units)

Prerequisite: Audition or Approval of the Instructor Supervised activity as a performer or theatre technician in a Theatre Program approved, University sponsored production. Repeatable for credit.

Offered Fall, Spring

THE 453. Contemporary Drama. (3 Units)

A study of plays by American and international writers from the last twenty-five years. Emphasis on the works of playwrights from traditionally underrepresented groups.

Offered Infrequent

THE 464. Acting III. (3 Units)

Prerequisites: THE 264 and THE 364 or consent of instructor. Study and performance of period scenes involving methods of approaching various types of plays and specific problems they present the actor. Emphasis on the synthesis of analysis, action, characterization, subtext, vocal problems posed by verse and exploration of advanced movement techniques.

Offered Fall

THE 490. Seminar In Theatre Arts. (3 Units)

Prerequisite: Consent of instructor. Discussion and exploration of advanced problems in Theatre Arts. Intensive study of one or more subjects relating to the theatre and drama. Three hours of seminar per week.

Offered Spring

THE 494. Independent Study. (1-3 Units)

Offered Fall, Spring

THE 495. Special Topics In Theatre. (1-3 Units)

Study of a single topic in drama and theatre, to be determined by the instructor. Topic varies each offering. Repeatable course. One to three hours of lecture per week.

Offered Infrequent

THE 496. Off Campus Internship. (1 Units)

Prerequisites: THE 326 and THE 328. Directed work experience in the industries of local professional theatre, cable television, broadcast stations and networks, production houses, or motion picture studios under the supervision of a professionally-qualified mentor. CR/NC grading only. Repeatable course. Ten hours of work experience per week.

Offered Infrequent

THE 499. Senior Project. (2 Units)

A capstone course culminating in the production of a final, collaborative project. Selected in consultation with and evaluated by a faculty panel.

Offered Fall, Spring

Theatre Arts, Bachelor of Arts Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Major Requirements (56-units)

The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

| Code | Title | Hours |
|---|----------------|-------|
| A. Lower Division Courses (11 units) | | |
| 1. Select one course from the following (2) | | |
| DAN 200 | Jazz I | 2 |
| DAN 210 | Ballet I | 2 |
| DAN 220 | Modern Dance I | 2 |
| 2. Lower Division Required Courses (9) | | |

| THE 499 | Senior Project | 2 |
| 2. Select two courses from the following (6 units) | | |
| THE 340 | Costuming | 3 |
| THE 344 | Stagecraft | 3 |
| THE 345 | Scene Design | 3 |
| THE 347 | Stage Lighting and Sound | 3 |
| C. Elective Courses (9 units) | | |
| Select three courses from the following | | |
| THE 322 | Oral Interpretation of Literature | 3 |
| THE 329 | Forensics Workshop | 3 |
| THE 337 | Creative Dramatics | 3 |
| THE 339 | Multicultural Children's Theatre | 3 |
| THE 353 | Playwriting | 3 |
| THE 367 | Acting For The Camera | 3 |
| THE 376 | Stage Management | 3 |
| THE 490 | Seminar In Theatre Arts | 3 |
| THE 494 | Independent Study | 1-3 |
| THE 495 | Special Topics In Theatre | 1-3 |
| THE 496 | Off Campus Internship | 1 |

- Cultural Literacy: Demonstrate the significance of theatre as a cultural expression in African, European, American, and Asian/Pacific countries; Recognize the contributions of other cultures; Apply tolerance for those of different backgrounds; Defend the value of culture as a source of personal enrichment; Support opportunities for enriching society through extending cultural chances to others; Deduce the advanced social function of world theatre in rituals, myths, ceremonies, and drama.
- Criticism Literacy: Analyze, critique, and assess works of theatre and dance: Identify the clear use of composition and staging of performers and theatrical elements; Recognize and distinguish effective vocal and physical expressions by actors and dancers; Judge the success or failure of theatrical performances and defend positions.
- Aesthetic Knowledge: Formulate and develop basic ballet, modern, and jazz techniques and/or acting and directing styles: Conceptualize and artistic vision; Differentiate between realistic and presentational theatrical styles; Choose an artistic approach to performing a particular play or dance.
- Leadership Skills: Exhibit leadership and organizations skills: Communicate artistic concepts to others; Solve problems in scheduling, stage management, or construction processes of creating theatre or dance; Organize a production crew and plan the accomplishment of constructing props, scenery, lights, costumes, or makeup for a show.
- Performance Skills: Design, construct, and produce theatre and dance productions: Apply play productions skills in a public performance, either as an actor, director, designer or technician; Demonstrate awareness of the intricacies of human behavior by analyzing characterization.
- Disciplinary Proficiency: Demonstrate understanding of the key theories, concepts, and historical practices of theatre, including works of leading playwrights, actors, dancers, choreographers, directors, and designers, both past and present: Synthesize historical trends into clear interpretations of important plays; Explain the interplay of literature, art, philosophy, and performance in theatre history; Recall well-known theatre theorists and practitioners and describe significant concepts; name the works of major dramatists and choreographers in American of the last 25 years.
- Social Skills: Develop intra- and inter-personal skills through involvement on group processes: Cooperation: Demonstrate the ability to compromise, ask appropriate questions, and take direction non-defensively; Socialization: Apply the values of collaboration, be able to empathize and give supportive feedback, and gain tolerance for diversity; Creativity: Express oneself through an art form (e.g., design, perform, direct), and demonstrate skill in problem solving; Discipline: Demonstrate adherence to rehearsal schedules and meet all deadlines.
- Written Communication: Show improved writing skills: Demonstrate competence in using language through written skills (e.g., playwriting, term papers, etc.); Organize paragraphs around a main idea; Use proper methods for documentation and bibliographical entries; Write smooth sentences without errors in punctuation, spelling, or grammar; Plan well structured writings that use introductions and conclusions effectively.
- Oral Communication: Show improved speaking skills: Demonstrate competency in oral language in speech presentations, forensics competencies, acting, directing, and stage management; Provide informative and insightful messages in a public setting: Organize presentations around a single idea; Devise main points and supporting evidence clearly; Create introductions and conclusions that gain focus; Show effective verbal techniques (precise diction, adequate volume, and variety of pitch and rate); Show effective non-verbal techniques (purposeful movement and gestures, eye contact, and strong posture).
- Research Skills: Demonstrate research skills applicable to history of theatre and design technology: Discuss the function and meaning of theatre for an historical culture that produced it; Compare and contrast the works of two playwrights, actors, choreographers, designers, etc.
- Information Literacy: Demonstrate computer competency capable of handling e-mail, using word processing, accessing the internet, creating PowerPoint presentations, and using databases.
- Critical Thinking: Show critical thinking in being able to prove claims with objective insights: Synthesize research and analysis into an assessment of the importance of historical trends in theatre; Conduct independent study to make judgements and evaluate results; Summarize and integrate research to support claims.

Women's Studies

College of Arts and Humanities
Division of World Cultural and Gender Studies

Program Description

Women's Studies is an interdisciplinary program preparing students to critically explore the social construction of gender and how it intersects with racism, classism, homophobia, transphobia, ableism, and other systemic oppressions. Our curriculum is rooted in a decolonial pedagogy centering the theories and activism of women of color and queer, non-binary, and trans people of color. Women's Studies faculty are committed to social justice work both on and off campus, and Women's Studies students are offered a wide-range of cutting edge courses to explore their research interests through pop culture, art, queer theory, literature, and activism. Students in the program acquire the knowledge and skills to understand the history and structures of gender inequalities and how to advocate for women's rights and freedoms, learning the importance of interconnecting local and global communities.

Academic Advisement

The Women's Studies Program is designed to allow students maximum flexibility and to be tailored to their interests and needs. Students should seek faculty advisement upon entering the program and routinely thereafter. Faculty advisors work with students to provide information about program requirements, course availability, coursework, and career options. Advisors will also help students prepare for graduate work in Women's Studies and related fields. Students should contact the Department Chair, Dr. Jenn Brandt (jbrandt@csudh.edu), to set up advising appointments.

Preparation

No specific high school or community college courses are required as prerequisites. Students are expected to have college-level reading and writing skills and an interest in understanding the complex forces that determine gender roles.

Career Paths

Understanding the gendered dynamics of society and the workforce gives students a competitive edge in meeting the challenges of the contemporary world. Women's Studies helps students evaluate their own choices and options in a rapidly changing society and understand where and how their talents and skills may best serve their own and society's needs.

Women's Studies helps students prepare for the professional world in a number of ways. As an interdisciplinary program, Women's Studies exposes students to a number of different schools of thought, theories, and methodologies. Students who study Women's Studies go on to a variety of careers in the arts, business, social services, community organizing, and government agencies. Women's Studies can help

students specialize their careers with a focus on women and gender. It can enhance students' job prospects in counseling, education, law, medicine, technology, creative fields, and other business endeavors.

Undergraduate Programs

Bachelor

- Women's Studies, Bachelor of Arts (p. 876)

Minor

- Women's Studies, Minor (p. 877)

Faculty

Jenn Brandt, Ph.D., Professor and Chair of Women's Studies
LCH A-329

Tahereh Aghdasifar, Ph.D., Assistant Professor of Women's Studies
LCH B-337

Program Office: Library, 4th Fl (310) 243-3273

Courses

WMS 100. Gender, Sex, the Body, & Politics: An Introduction. (3 Units)

An introduction to the rapidly expanding body of literature related to the gendered aspects of health and sexuality with an emphasis on women. Offered Fall, Spring

WMS 200. Foundations in Queer Studies. (3 Units)

An introduction to the field of Queer Studies by analyzing the role of gender, race, class, ability, and nationalism in the construction of modern lesbian, gay, bisexual, and trans (LGBT) identities, and it considers how queerness can operate as a disruption, expansion, or refusal of these identity categories.

Offered Fall, Spring, Summer

WMS 250. Foundations in Women's Studies. (3 Units)

Introduces students to Women's Studies. Students learn about gender from a multicultural, multiracial feminist and global perspective. Emphasis is on women's history; gender, culture, and nation; social institutions; sexuality, sexism, and violence; and local and transnational women's movements.

Offered Fall, Spring, Summer

WMS 295. Special Topics in Women's Studies. (3 Units)

An introductory study of an issue or a concept in Women's Studies that is of particular interest to both the faculty member and the students. Repeatable course with different topics.

Offered As needed

WMS 310. The Witch in Literature. (3 Units)

Examines representation of the witch and witchcraft in literature and culture in different historical periods and cultures.

Offered Fall, Spring, Summer

WMS 311. Comedy, Sex and Gender. (3 Units)

Examines representations of gender and sexuality in comedy and humor from multicultural perspectives. Topics include feminist humor and comedy as vehicles of social criticism and advocacy, and the relationships of the comedic to ethnicity, race and class.

Offered As needed

WMS 314. Feminism and Film. (3 Units)

Introduces issues that feminist theory poses for the analysis of film and culture. It focuses on women's contributions to, and representations in, film.

Offered As needed

WMS 315. Literary Topics in Gender Studies and Sexuality Studies. (3 Units)

Provides comparatist perspectives on the representation of women's roles and rights as expressed in a variety of writings from different historical periods and cultures. Students will gain an understanding of women's differential treatment in legal systems and social institutions from antiquity to present.

Offered As needed

WMS 318. Race, Class and Gender. (3 Units)

This cross-cultural, interdisciplinary course introduces students to women's issues as these interface with race and class. Students will recognize, analyze and evaluate the socio-political and economic forces that affect women's lives through a critical examination of race, class and gender.

Offered Fall, Spring, Summer

WMS 320. Feminist Principles. (3 Units)

Prerequisite: WMS 250 is required. A primer to principles of feminist philosophy, history, thought, methodology and current issues pertaining to women.

Offered Fall

WMS 330. Queer Art and Visual Culture. (3 Units)

Offers a reflection on key art practices and theories which develop an understanding of queerness. Stepping away from 'queer' as an identity marker, the readings and work offered will articulate how queer operates as a verb to subvert or wholly turn away from the conventional understandings of life to cultivate radical alternatives. Each week a theoretical text is paired with a 'case study' to offer an opening conversation on the political implications of queering art.

Offered Fall, Spring, Summer

WMS 340. Politics of Women's (Un)Paid Labor. (3 Units)

Focuses on women's labor participation in the family and society. Topics include women in professional and domestic labor markets, the politics of mothering and maternal labor, sex work, family policies, labor rights, wage gaps, and invisible work.

Offered Fall, Spring, Summer

WMS 350. Feminist Research Methods. (3 Units)

Prerequisites: WMS 250 and WMS 320 required. A primer to feminist research methods. Students will be introduced to a variety of ways in which feminists question and approach the production of knowledge.

Offered Spring

WMS 380. Gender and Sexuality in Popular Culture. (3 Units)

Introduction to contemporary US popular culture, with a focus on the ways popular culture production, consumption and representation reinforce and resist ideologies about gender, race, and sexual orientation.

Offered Fall, Spring, Summer

WMS 390. Transnational Feminisms. (3 Units)

Leaning away from older models of Global "Sisterhood" which privilege a singular western-focused model of democracy and gender, transnational feminisms are interested in respecting difference to understand local, historical, economic, and (post)-colonial conditions that women draw on to articulate resistance. This course offers differences between global feminism and transnational feminisms by moving through examples and case studies of how transnational feminisms look on the ground and in response to different modes of oppression.

Offered Spring

WMS 400. Feminist Theories. (3 Units)

Prerequisites: WMS 350 required. Advanced study in feminist theory. Course addresses major concepts and assumptions of feminist study in order to better understand how to address societal and power inequalities and to improve women's status globally.

Offered Fall

WMS 410. Queer of Color Critique. (3 Units)

Brings Women of Color Feminisms to bear on Queer theory to understand that people have (political or intimate) desires and attachments which are not always legible. Familiarizes students with the cultural, political and economic concerns of QoCC and how it interrupts socially dominant categories of sexuality.

Offered Fall, Spring, Summer

WMS 490. Senior Capstone. (3 Units)

Prerequisite: WMS 400 required. A critical analysis and interpretation of major feminist theories and contemporary issues in women's studies. Special attention will be paid to different discourse communities - academic, internet, personal - as they relate to feminism and the women's movement, in order to help students think more deeply about being a reader and writer of feminist scholarship. Students will be exposed to influential and emergent feminist theories in order to produce original research projects, papers, and/or creative works. A grade of C or better in this course fulfills the GVAR requirement for all Biology majors and minors

Offered Spring

WMS 494. Independent Study. (1-3 Units)

Prerequisites: Consent of instructor and program coordinator.

Independent study of a particular problem, issue, or readings under the direction of a member of the Women's Studies faculty. Course is not repeatable for credit in the Women's Studies minor.

Offered As needed

WMS 495. Special Tpcs: Women's Studies. (3 Units)

An intensive study of an issue or a concept in Women's Studies that is of particular interest to both the faculty member and the students. Repeatable course with different topics. Three hours of seminar per week.

Offered As needed

WMS 496. Internship in Women's Studies. (3 Units)

Practical application of coursework in Women's Studies through supervised work and field experience in politics, law, art, communications, social welfare agencies or other area as approved by the instructor and coordinator of the program. Course is not repeatable for credit in the Women's Studies minor.

Offered Fall, Spring

Women's Studies, Bachelor of Arts

Requirements

Total Course Requirements for the Bachelor's Degree

See the "Requirements for the Bachelor's Degree (p. 95)" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

Elective Requirements

Completion of elective courses (beyond the requirements listed below) to reach a total of a minimum of 120 units.

General Education Requirements (49 units)

See the "General Education (p. 158)" requirements in the University Catalog or the Class Schedule for the most current information on General Education requirements and course offerings.

Graduation Writing Assessment Requirement

See the "Graduation Writing Assessment Requirement (p. 112)" in the University Catalog.

Major Requirements (39 units)

The following courses, or their approved transfer equivalents, are required of all candidates for this degree.

| WMS 495 | Special Tpcs: Women's Studies |
| WMS 496 | Internship in Women's Studies |
| Total Hours | 39 |

Upon completion of the Bachelor of Arts in Women's Studies, a degree recipient will be able to:

- Explain and critically analyze how different social, political, and economic forces have historically impacted the experiences and representations of women in the United States and abroad.
- Use intersectional approaches to demonstrate comparative knowledge of how societal institutions and power structures shape the material reality of women's lives, not only with respect to gender, but also race, ethnicity, national origin, religion, social class, ability, sexual orientation, age, etc.
- Synthesize foundational and contemporary feminist theories from a variety of textual, media, and information sources, using discipline-specific methodologies in the creation of original papers, projects, oral presentations, and creative works.
- Evaluate the unity and divisions within the women's movement with the goal of learning how to engage in and/or implement practical solutions to contemporary real-world problems.
- Engage in critical self-reflection in order to demonstrate an understanding of agency and social responsibility in personal, professional and community settings.
