

Redirecting from CM1 page

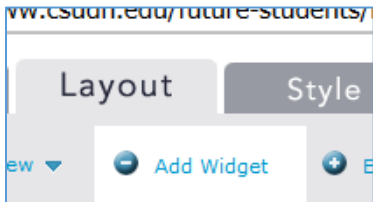

1. Open the page (redirect from page) in Edit mode (click Edit button.)

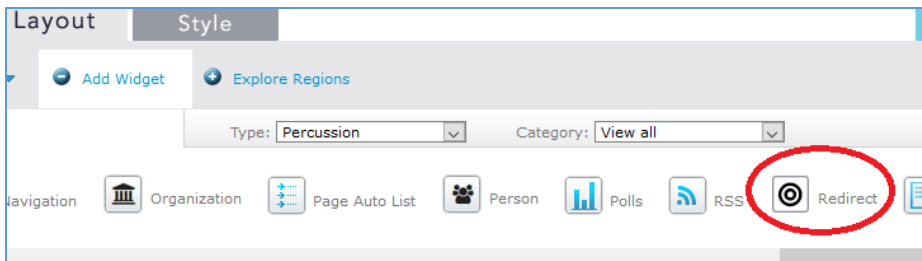

2. Click on Layout tab.

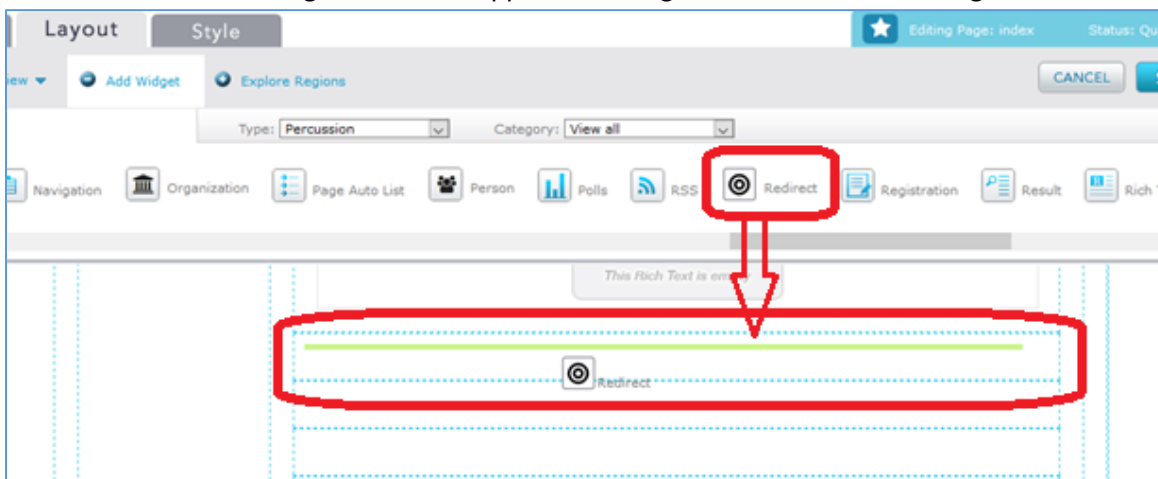

3. Expand Add Widget.

4. Scroll to the right until Redirect widget is showing on the widget list.

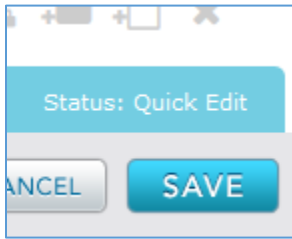

5. Drag and drop Redirect widget into Blue empty regions at the bottom of the page content area above template footer in content area. A green line will appear if the region is allowed to add widget.

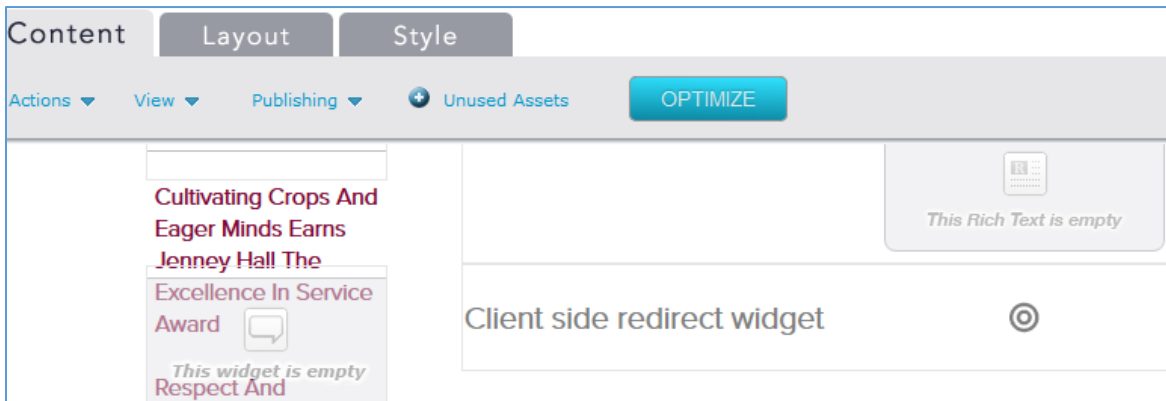

Redirecting from CM1 page

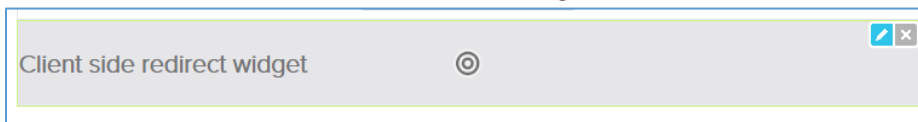

- Click Save button on Layout tab.

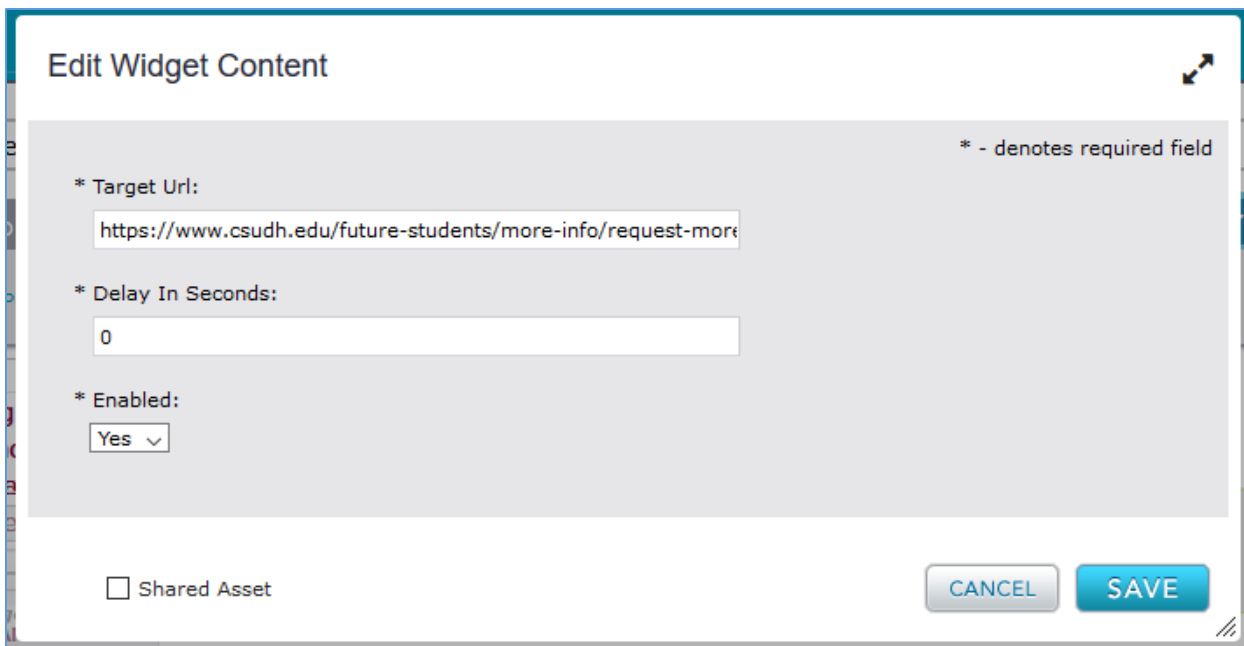

- Click on Content tab. Scroll down until Client side redirect widget appears in the content area.

- Double click within the Client side redirect widget.

- Fill out the redirect information in the text box and click Save button.

A screenshot of the "Edit Widget Content" dialog box. The title bar reads "Edit Widget Content". The main area contains three required fields: "* Target Url:" with the value "https://www.csudh.edu/future-students/more-info/request-more", "* Delay In Seconds:" with the value "0", and "* Enabled:" with a dropdown menu set to "Yes". A legend indicates "* - denotes required field". At the bottom, there is a checkbox for "Shared Asset" and two buttons: "CANCEL" and "SAVE".

- Publish/approve the page.
